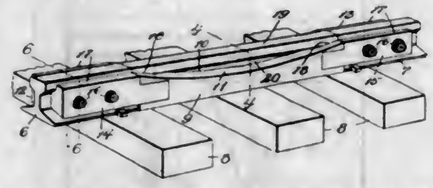
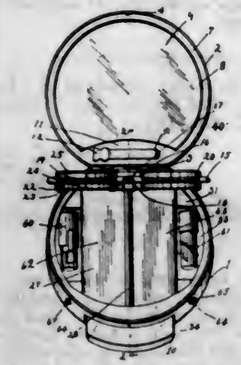
1,625,452. ESCAPE TRICK DEVICE. THEODORE P. BRUNNER, Los Angeles, Calif. Filed Nov. 24, 1925. Serial No. 71,150. 4 Claims. (Cl. 273—158.)



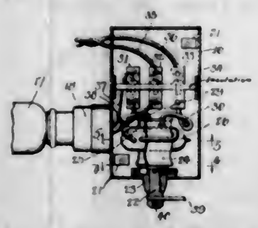
1. An escape trick device comprising a tie bar, a plurality of equally sized rings, flexible tie means connecting one of the rings to the tie bar, and flexible tie means connecting each successive ring through its adjacent ring to the tie bar.

1,625,453. PANTS AND POCKET RULER. CRESCENZO CAPUANO, Los Angeles, Calif. Filed Mar. 22, 1926. Serial No. 96,559. 8 Claims. (Cl. 33—11.)



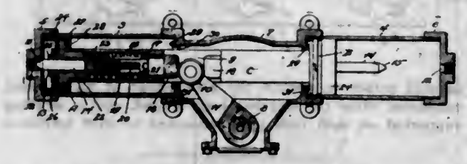
1. A rule having a body structure with a straight edge at one end, a convex curve at the other end, convex curved sides, the curve of one of the sides being merged into the curve at the end, said side having a sharper curve than the other side, the body structure having a plurality of cut-out sections, some of said sections having a reverse curve suitable to form a stencil to mark pocket flaps.

1,625,454. RAIL FOR LOCOMOTIVE STALLS. THOMAS CARDWELL, Sedalia, Mo. Filed Jan. 9, 1924. Serial No. 685,183. 15 Claims. (Cl. 238—122.)



9. A rail of the character described having a longitudinally curved recess formed intermediate its ends and a removable section adapted to be received in said recess.

1,625,455. VANITY CASE. JOHN S. CORRY, San Pedro, Calif. Filed Oct. 27, 1925. Serial No. 65,126. 11 Claims. (Cl. 132—83.)

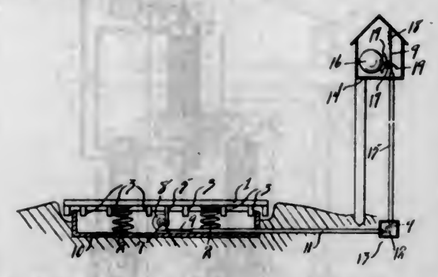


1. A vanity case comprising a box-like structure formed of a base with a lid hinged thereto, a diaphragm hingedly connected to the base having compact holders mounted therein, a false bottom below the diaphragm and a slidable tray in the false bottom.

1,625,456. SWITCH. PAUL K. CRAMBLET, Beloit, Wis. Filed Aug. 11, 1924. Serial No. 731,283. 3 Claims. (Cl. 200—54.)

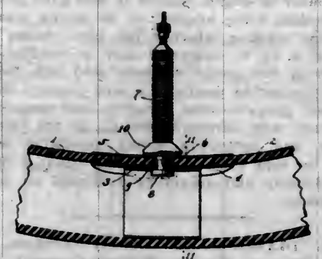
1. In combination, a casing adapted to be secured to a closet door frame, a rock shaft journaled in said casing and having one end projecting from the casing, a mercury switch on said shaft for controlling the flow of current to a lamp, and means adapted to be controlled by the door for actuating said switch comprising an arm of substantial length on the outer end of said shaft and spring means tending to hold said shaft in a position such as to cause the mercury switch to permit the flow of current and also acting to hold said arm projecting beyond the plane of the forward side of the door frame for engagement and operation by the door as the latter approaches its closed position.

1,625,457. AIR ENGINE. JOSEPH M. DAPRON, St. Louis, Mo., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed Apr. 21, 1924. Serial No. 707,875. 3 Claims. (Cl. 121—44.)



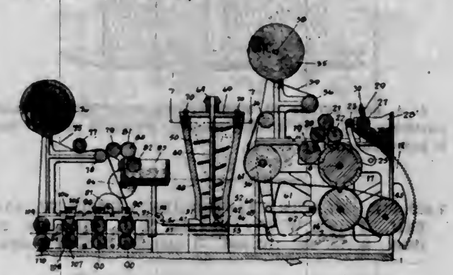
1. In an air engine in combination, two alined cylinders; a central housing connecting said cylinders; a pair of pistons mounted one in each of said cylinders; a piston-rod connecting said pistons; two cylinder-heads, one mounted on the outer end of each of said cylinders, and each having a central port; a restricted longitudinal bore in each end of said piston-rod; a thimble seated in the inner end of each of said bores; a crank journaled in said housing having a roller thereon, said roller projecting between said thimbles; a sleeve mounted in each of said bores and yieldingly and slidably mounted within one of said thimbles; and a valve-stem yieldingly mounted in each of said sleeves, each valve stem being adapted to seat in the port on the cylinder head of the cylinder in which it moves before the completion of the stroke of the piston on which it is mounted.

1,625,458. CARROTING FUR AND ART OF TREATING THE SAME. PHILIP C. DONNER, Summit, N. J. Filed Apr. 28, 1925. Serial No. 26,542. 9 Claims. (Cl. 8—21.)



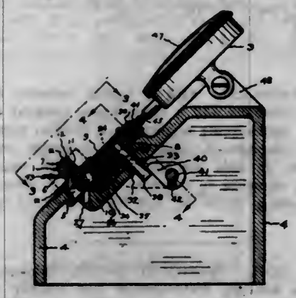
1. The herein described art of preparing fur which consists in treating fur fibers with a liquid mixture of nitric acid and tannic acid, the liquid mixture being diluted with water.

1,625,459. RAILWAY-CROSSING SIGNAL. JOHN H. ESTES and WILLIAM P. WILLIAMS, Fort Worth, Tex. Filed Nov. 13, 1926. Serial No. 148,220. 2 Claims. (Cl. 116—67.)



2. Warning signal apparatus comprising means embedded in a highway near a railway crossing comprising an open-top box-like structure, a depressible board mounted above said structure with its ends projecting beyond said box structure and springs supporting said board normally slightly above said box structure, slabs attached to said board and resting on the highway to form approaches to said board, a signaling apparatus, a spool and a pinion rigid with each other and provided with a shaft journaled in said box, a rack attached to said board and adapted to engage said pinion for actuating the same, a cable operatively connected to said signaling apparatus and extending within said box structure and attached to said spool, and means normally holding said cable taut but resilient to permit the operation of said cable by said rack and pinion.

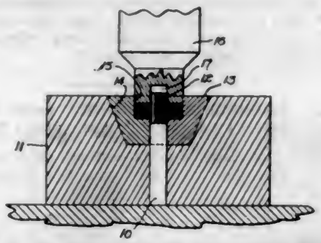
1,625,460. PNEUMATIC TUBE. WALTER L. FAIRCHILD, New York, N. Y. Filed June 28, 1921. Serial No. 481,059. 2 Claims. (Cl. 152—13.)



1. An inner tube for pneumatic vehicle tires having a combined joint and valve structure comprising, a ring of rubber located within the tube and overlapping the joint, a strip of rubberized material overlapping said ring and joint, and a valve piercing the ring, the strip and the tube, the said ring, strip and joint being vulcanized into a substantially homogeneous condition.

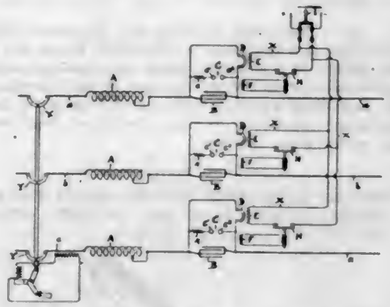
1,625,461. DISPENSING MACHINE. ADINO F. FILES, Maumee, Ohio. Filed Oct. 19, 1925. Serial No. 63,535. 7 Claims. (Cl. 93—6.)

1. In a dispensing machine for dispensing separated quantities of a substance in containers, means for feeding two sheets of a material, means for forming outlines of cementitious material on one end of said sheets, means for depositing the substance on the other of the said sheets and means for securing the sheets together along the cementitious outlines.



1,625,462. DIMENSION GAUGE. HAROLD FRAUENTHAL, Cleveland, Ohio. Filed Sept. 24, 1926. Serial No. 137,491. 6 Claims. (Cl. 33—147.)

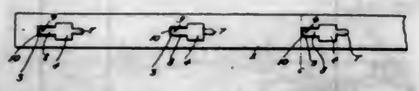
1. In a gauge particularly adapted for the accurate measurement of internal dimensions, in combination, a base support, a fixed gauge member carried by said support, a slide movable on said support toward and away



from said fixed gauge member, a second gauge member carried by said slide, means exerting substantially uniform pressure and arranged to maintain said second gauge member in spaced relation to said fixed gauge member, said slide being adapted to be moved toward said fixed gauge member whereby the piece whose internal dimension is to be measured may be readily disposed externally of said gauge members, said slide being positioned in measuring position by said pressure exerted on said second gauge member, whereby said gauge members will contact with internal portions of the piece to be measured, and indicating means associated with and actuated by said slide, whereby said internal dimension will be directly and accurately indicated on said indicating means.

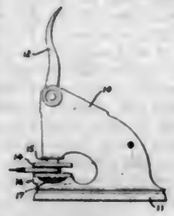
1,625,463. DIAMOND LAP. ERNEST GAUTHIER, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 29, 1922. Serial No. 609,645. 4 Claims. (Cl. 51—206.)

1. A new article of manufacture comprising diamond particles and finely divided metallic particles molded into a homogeneous aggregate.



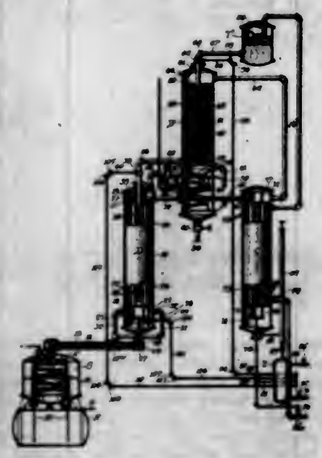
1,625,464. ELECTRICAL-CURRENT-LIMITING SYSTEM. FRAZER W. GAY, Newark, N. J. Filed Apr. 22, 1926. Serial No. 103,890. 6 Claims. (Cl. 175—294.)

1. The combination with a power delivery circuit of a reactance element and a capacitance element connected in series in said circuit to provide a normal substantially neutralized impedance, and means excited by sudden current rises in said circuit operating to short circuit one of said elements to thereby bring into effect the full current limiting value of the other element remaining in circuit.



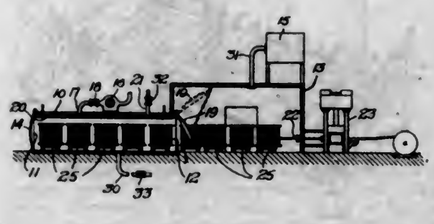
1,625,465. COIL. MARTIN B. GROUT, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 3, 1925. Serial No. 20,325. 8 Claims. (Cl. 175—359.)

1. A device of the character described including a tube provided with an orifice, a terminal secured to said tube by means of a plurality of integrally formed depending legs imbedded in said tube and having a free end extending into said orifice, said free end adapted to be flexed



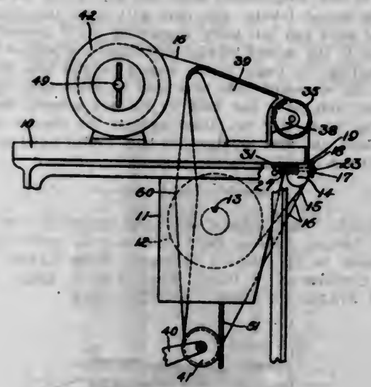
in said orifice to permit the attachment of an external conductor after the coil has been wound, and a winding supported on said tube and connected to said terminal.

1,625,466. SEAL AND MEANS FOR MAKING THE SAME. SAMUEL A. HAMNETT, Los Angeles, Calif. Filed Apr. 20, 1926. Serial No. 24,456. 6 Claims. (Cl. 18—1.)



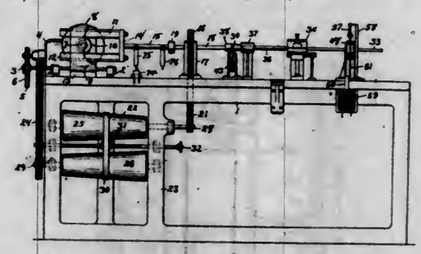
1. In combination with a seal having a base, means to hold a disc upon said base, said means comprising a flexible band adapted to engage said disc and means to alter the size of said band and to hold the band in adjusted position.

1,625,467. APPARATUS FOR DISTILLING HYDROCARBONS UNDER PRESSURE AND A CATALYZING AGENT. FRANCIS M. HESS, Whiting, Ind. Filed Sept. 29, 1922. Serial No. 591,215. 6 Claims. (Cl. 196—54.)



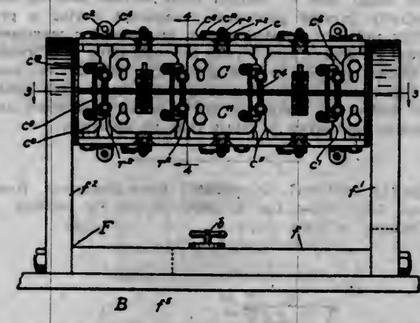
1. In a cracking system of hydrocarbon distillation, the combination of a still, a primary dephlegamator, a vapor conduit leading from said still to said primary dephlegmator, a secondary dephlegmator, a vapor conduit leading from said primary dephlegmator to said secondary dephlegmator, and means for introducing a catalyzing agent into the presence of the vapor in said secondary dephlegmator.

1,625,468. METHOD OF AND APPARATUS FOR DRYING AND STORING DRIED MATERIAL PREPARATORY TO PROCESSING. WILLIAM FULLER HOSFORD, Oak Park, Ill., assignor to Western Electric Company, Incorporated, a Corporation of New York. Filed July 26, 1923. Serial No. 653,845. 12 Claims. (Cl. 34—46.)



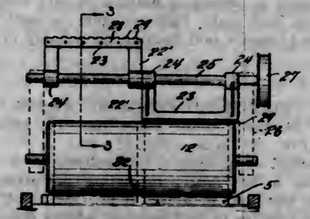
1. The method of preparing material for processing, consisting in drying the material in one enclosure, transferring the dried material to a storage enclosure, and maintaining the material independent of atmospheric humidity conditions continuously throughout the drying, transferring and storage thereof.

1,625,469. TAPE OR RIBBON WORKING MACHINE. WILLIAM FULLER HOSFORD, Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 21, 1923. Serial No. 682,126. 2 Claims. (Cl. 242—55.)



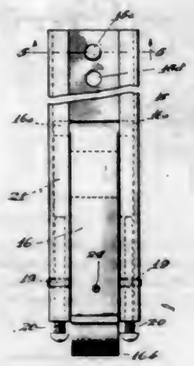
2. In a machine for working metallic ribbons, a supply source, a take-up device, a work table having a surface to contact with a ribbon, said ribbon being reversed between the supply and take-up device, driving means for the take-up device whereby the ribbon is withdrawn from the supply source and passes twice over the table each time moving in the same direction and at the same speed and in contact with the surface of the table, and brake devices engaging different sections of the ribbon for applying tension thereto.

1,625,470. PAPER-TUBE-MAKING MACHINE. ROBERT J. JAUCH, Fort Wayne, Ind. Filed July 6, 1925. Serial No. 41,561. 22 Claims. (Cl. 93—80.)



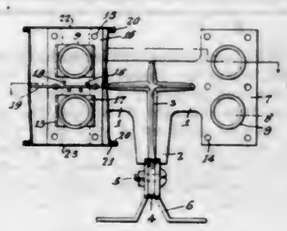
10. In a paper tube making machine, a unitary mandrel having simultaneous rotary and longitudinal movement on its forward stroke and longitudinal movement only on its backward stroke and being operable to wind thereon paper strips in coiled formation to form a tube thereon.

1,625,471. TUBE IRONING AND GRIPPING DEVICE. ROBERT J. JAUCH, Fort Wayne, Ind. Filed Apr. 28, 1926. Serial No. 105,130. 12 Claims. (Cl. 93—80.)



1. In a device for ironing and gripping a tube formed on a mandrel, means for producing relative reciprocation of said device and mandrel, a plurality of rolls with roughened surfaces mounted in said device and adapted to ride on different surfaces of said tube while it is in position on said mandrel, means for permitting said rolls to rotate freely by contact with the tube surfaces, and means for preventing their counter-rotation on the tube stripping stroke.

1,625,472. PULP-WEB CUTTER. WILLIAM A. KELLY, Green Bay, Wis., assignor of one-half to Frank J. Tinmerman, Green Bay, Wis. Filed Mar. 8, 1926. Serial No. 93,137. 5 Claims. (Cl. 92—38.)

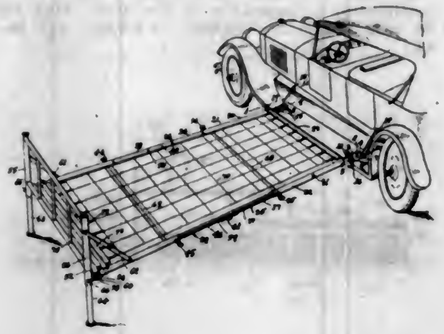


1. The combination with a pulp web carrier, of a cutter device, comprising opposed means for perforating the web revoluble about an axis transversely of, and adjacent to, the plane of movement of the carrier.

1,625,473. RADIATOR HANGER. WALTER F. KNOX, Chicago, Ill. Filed Apr. 21, 1923. Serial No. 633,602. 34 Claims. (Cl. 248—17.)

2. In a radiator hanger, the combination of a formed sheet metal base of channel cross section forming substantially parallel guideways, a bracket having a projecting radiator supporting arm mounted for movement in said guideways, and devices for supporting said bracket in desired position in said guideways, said devices comprising a screw extending longitudinally in each guideway, and a nut carried by the base for each screw and engaging said screw to retain it in its guideway.

1,625,474. SIGNAL LANTERN. PAUL KOROKNAY, Houston, Tex. Filed Apr. 9, 1926. Serial No. 100,836. 4 Claims. (Cl. 40—132.)

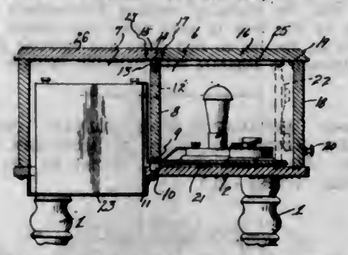


1. A signal lantern comprising a back plate, a reinforcing rib thereon, an extension on said plate, an arm on said extension, said arm being integral with the rib on said plate, an attaching bracket on said arm, housing supports on said plate, light housings on said supports, and means to secure said housings detachably to said supports.

1,625,475. FIRE-FLAME-COLORING MEANS. JOHN A. LAHEY, Sewaren, N. J. Filed Mar. 12, 1925. Serial No. 15,138. 1 Claim. (Cl. 52—23.)

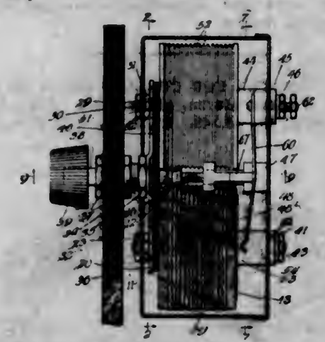
The method of making a composition to be employed in coloring a fire flame, consisting in mixing soluble salts in a quantity of water to provide a salt solution, immersing asbestos in said solution, adding insoluble salts to the mixture to produce a comparatively thick mass, draining the excess solution from the mass, and allowing the latter to dry so as to incorporate the salts in the fibers or constituents of the asbestos.

1,625,476. COLLAPSIBLE CAMP BED. MADS M. LARSEN, Colton, Calif. Filed Mar. 24, 1924. Serial No. 701,454. 4 Claims. (Cl. 5—119.)



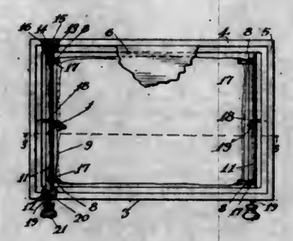
1. A collapsible camp bed comprising clamps adapted to rigidly engage the running board of a vehicle, tubular side bars rigidly connected together and hingedly connected to the clamps, extension side bars mounted in the tubular side bars and having longitudinally extending grooves and transverse bolt holes in line with the grooves, studs extending outwardly from the tubular side bars near their attached ends, wing nuts screw-seated upon the studs, braces pivotally connected to the clamps and having bolt holes through the swinging ends to removably engage upon the studs, set screws mounted through the outer sides of the tubular side bars near their swinging ends so that the tips of the set screws operate in the grooves and in the bolt holes, second extension side bars substantially like the first extension side bars, downwardly folding hinges connecting corresponding extension side bars, second tubular side bars rigidly connected together and slidingly mounted upon the second extension side bars, said second extension side bars having longitudinal slots and bolt holes, set screws in the second tubular side bars with their tips operating in the slots and bolt holes, supporting posts hingedly connected to the second tubular side bars, and jointed braces connecting the posts to the second tubular side bars, so that the extension side bars may be telescoped into the tubular side bars and held by the set screws, the supporting posts may be folded against the second tubular side bars, the first tubular side bars folded upwardly and the braces attached to the studs.

1,625,477. ELECTRIC-CORD ANCHORAGE. WILLIAM P. LEAHY, Canton, Ohio, assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio, a Corporation of Ohio. Filed Aug. 5, 1922. Serial No. 579,973. 1 Claim. (Cl. 173—251.)



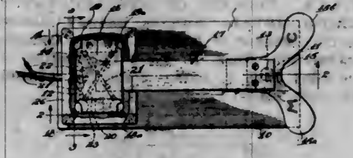
In an electrically operated tool having a handle, an electric conductor leading to the tool, a conductor anchorage secured to the handle, the anchorage comprising a member secured relative to the handle, a conductor protector spring member connected at one end to the member which is secured relative to the handle and constructed to serve either as a compression or tension spring, the conductor being secured to the protector spring member only adjacent the free end of the spring member and free to slide through the other end of the spring member in both directions.

1,625,478. CABINET FOR RADIO RECEIVING SETS. MARVIN C. LINDEMANN, Holland, Mich., assignor to Bay View Furniture Company, Holland, Mich., a Corporation of Michigan. Filed Feb. 21, 1924. Serial No. 694,189. 2 Claims. (Cl. 45—52.)



1. A cabinet for radio receiving sets comprising a rectangular casing having a compartment at each end extending transversely of the casing, a series of legs supporting the casing, a removable panel extending longitudinally of the casing between the end compartments and dividing the central portion of the casing into a forward and a rear compartment, the casing being provided with a groove in the bottom in which the lower edge of the panel is adapted to seat, the rear compartment in the center of the casing being closed by the removable panel and being adapted to contain a portion of a radio receiving set, the cabinet being provided with hinged portions in the top over the forward and rear central compartments, the side of the cabinet for the forward compartment being hinged to the hinged top portion for the said compartment and folded over the rear top portion of the cabinet, the forward compartment enclosed by the hinged top and side portions being adapted to contain the remainder of the radio receiving set and the panel being provided with notches in the lower edge through which the wiring between the portions of the radio receiving set may extend, and a spring catch mounted in the upper edge of the panel and adapted to engage in the stationary portion of the top.

1,625,479. RHEOSTAT. ALFRED F. C. LOTZ, Chicago, Ill., assignor to Electrical Engineers Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 26, 1925. Serial No. 18,522. 7 Claims. (Cl. 201—59.)

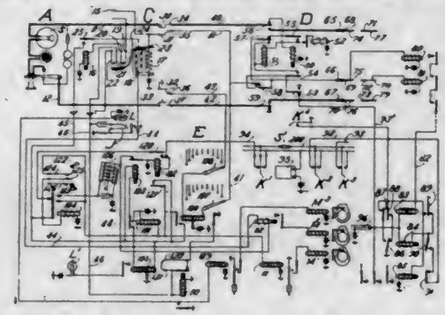


1. In a device of the class described, the combination of an insulating cylinder, a unitary conducting cylinder of substantially the same length as said insulating cylinder, a pair of parallel resistance conductors, wound upon said cylinders, each of said cylinders being adapted for receiving substantially the entire windable portions of said conductors and said conducting cylinder providing a single variable connection between the conductors, circuit connections for the conductors, and means for turning the cylinders to transfer the conductors from one cylinder to the other.

1,625,480. BAG HOLDER. CLARENCE C. LUDY, Venice, Calif. Filed Dec. 23, 1925. Serial No. 77,231. 9 Claims. (Cl. 83—26.)

1. A bag holder comprising in combination a supporting structure, a plurality of partially rotatable shafts mounted therein, means on said shafts adapted to engage the upper edge of a bag and hold same suspended, means comprising a catch device to restrain the shafts from rotation, the mounting for said shafts allowing slight longitudinal movement, such movement releasing the catch device, whereby the shafts may be partially rotated to release the bag.

1,625,481. FOOT SWITCH. HECTOR P. MACLAGAN, Chicago, Ill., assignor to McIntosh Electrical Corporation, Chicago, Ill., a Corporation of Delaware. Filed May 25, 1923. Serial No. 641,379. 4 Claims. (Cl. 200—6.)

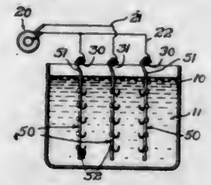


1. In a foot switch, the combination of an elongated base of insulating material, a pivotal support carried by each end of said base, the pivot portions of said supports being in alignment with each other, a treadle mounted for oscillation on one of said supports, a plate mounted for oscillation on the other of said supports, metal contact bars carried by said plate, insulated contacts carried by the base for engagement by said bars when said plate is oscillated, and a bar of insulating material rigidly connecting said treadle and said plate, the separation of said treadle and said plate being such as to prevent leakage of high tension current from said contact bars to said treadle.

1,625,482. AUTOMATIC TELEPHONE SYSTEM. TALBOT G. MARTIN, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Original application filed Mar. 15, 1921, Serial No. 452,468, now Patent No. 1,539,132, dated May 26, 1925. Divided and this application filed Apr. 6, 1925. Serial No. 20,885. 20 Claims. (Cl. 179—18.)

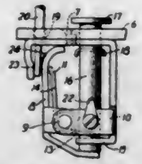
1. In a telephone system, subscribers' lines, trunk lines, groups of primary line switches and a group of rotary secondary line switches for extending calling lines to idle trunk lines, there being a secondary trunk line extending from each primary group to one of said secondary line switches, chain relays associated with said first named trunk lines, each relay being energized when the associated trunk becomes busy, a relay normally deenergized,

means controlled by said chain relays when all the associated trunks become busy for causing said normally de-energized relay to energize, and means controlled by the



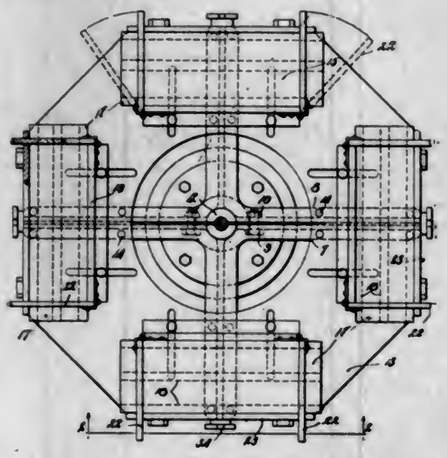
energization of said relay for making all of said secondary trunk lines busy, said means including circuits extending through contacts on relays in each of the secondary line switches.

1,625,483. CASEIN GLUE. ALFRED CARL MARWIN, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 24, 1922. Serial No. 570,731. 4 Claims. (Cl. 87—17.)



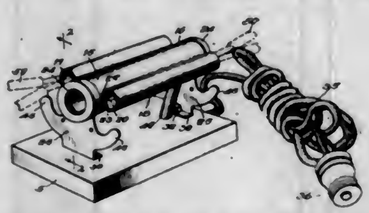
2. A casein glue composition consisting of about 25 per cent casein, alkaline earth hydroxide about 3⅛ per cent, caustic alkali about 2⅛ per cent, water soluble alkaline salt of an alkali about 2⅝ per cent, and water.

1,625,484. PROCESS OF AND APPARATUS FOR CLEANING METAL. SUMNER REDWAY MASON, Wilmette, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 7, 1923. Serial No. 643,867. 15 Claims. (Cl. 204—1.)



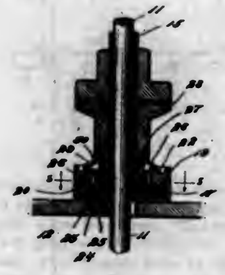
4. A process of cleaning a metal part, which consists in subjecting it to alternating current in an electrolyte of a solution of ferric chloride and hydrochloric acid to remove scale and rust therefrom, and thereafter as an anode to direct current in a sulphuric acid solution to remove foreign matter.

1,625,485. TERMINAL FOR ELECTRIC CONDUCTORS. OSWALD H. MAURER, Flushing, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 29, 1926. Serial No. 105,385. 4 Claims. (Cl. 173—259.)



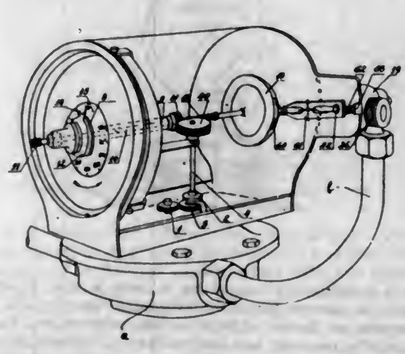
1. In combination with an apparatus mounting panel, a terminal for electric conductors, said terminal comprising a stationary conducting member and a movable member, said members having oppositely disposed clamping surfaces, means for pivotally mounting said movable member upon said stationary member, a spring for normally holding said clamping surfaces in engagement, means for mounting said terminal upon the back of said panel with the clamping surfaces substantially perpendicular to the face of said panel and means passing through an opening in said panel and operable from the front thereof to separate said clamping surfaces.

1,625,486. APPARATUS FOR MOLDING CEMENTITIOUS MATERIAL. JOHN P. MCKNIGHT, Revere, Mass. Filed June 2, 1925. Serial No. 34,325. 6 Claims. (Cl. 25—41.)



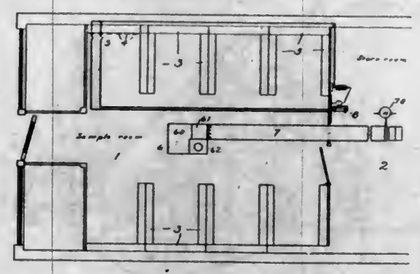
1. Apparatus for molding cementitious material comprising a supporting member, a shaft carried by said base member, supporting means mounted on the shaft and rotatable about the axis thereof, the supporting means carrying at spaced intervals a series of molding forms adapted to contain cementitious material and a cover for any one of said molds carried by a support mounted on said shaft above said supporting means and rotatable about the axis thereof.

1,625,487. HEATER FOR CURLING IRONS AND THE LIKE. WILLIAM MEYER, Chicago, Ill. Filed July 22, 1925. Serial No. 45,148. 6 Claims. (Cl. 219—22.)



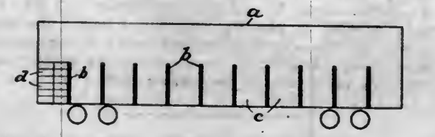
1. In a heating device of the class described, the combination of a main heating compartment for receiving and heating a device to be heated, an auxiliary heating compartment communicating with said main compartment for receiving the device and maintaining the heated condition thereof, and a single heater for both of said compartments, said heater being disposed in the main heating compartment and heating said main compartment to a higher temperature than said auxiliary compartment so that the temperature of the device may be maintained in the auxiliary compartment without overheating the device.

1,625,488. OILER FOR SPINNING MACHINES. JOHN R. MILSON, Mansfield, Mass., assignor of one-fourth to Charles E. Milson, Providence, R. I. Filed Jan. 2, 1926. Serial No. 78,858. 6 Claims. (Cl. 308—169.)



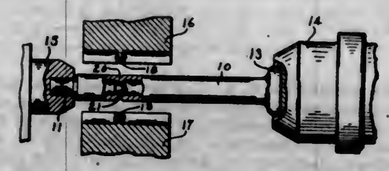
4. In a spinning machine, the combination with the spindle and package carrying tube and its driving whirl, of an oiling device for the tube and spindle comprising an oil reservoir carried by the lift rail of the machine, an oil pad supplied with oil from the reservoir in contact with the spindle, a lid member on the reservoir having an oil measuring recess in its face and having oil and air holes communicating with the reservoir below said lid having a whirl supporting portion, the lower flange of said whirl projecting downwardly into said oil measuring recess and spaced from the bottom wall thereof whereby the rapid rotation thereof creates a downwardly directed air pressure through said holes to assist in directing the oil upwardly through said pad and tube.

1,625,489. LIQUID METER. ALFRED MONARD, Paris, France, assignor to Societe l'Aster, Paris, France. Filed July 12, 1923, Serial No. 651,144, and in France Mar. 29, 1923. 2 Claims. (Cl. 221—101.)



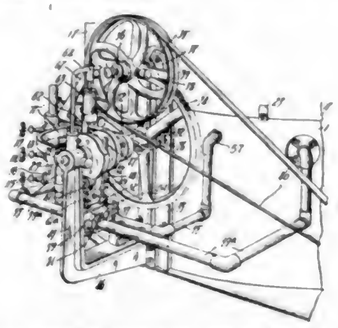
1. In a liquid meter, a valve including a stem adapted to be manually actuated to open the valve, a slide coacting with the valve stem to lock the latter in open position, a rotatable cam, a member on said slide adapted to be engaged and operated by said cam whereby to release the slide, said member being displaceable laterally to a position out of the path of the cam, a member mounted on said slide actuated by the valve stem during the closing movement of the latter and operating to displace the first mentioned membed out of the path of the cam, and means normally tending to return the first mentioned member to cam engaging position.

1,625,490. SELF-SERVING-STORE EQUIPMENT. ROGER T. MORRIS, Seattle, Wash. Filed June 29, 1925. Serial No. 40,234. 1 Claim. (Cl. 186—1.)



A retail merchandising equipment comprising adjacent sample displaying and goods storage rooms, a combined delivering and payment station located in the sample room, an automatic goods conveyor connecting the storage room with the delivery station in the sample room, and separate signaling means associated with each sample whereby the purchaser may himself indicate to the sample room the particular articles desired.

1,625,491. TRANSPORTABLE DYNAMITE MAGAZINE. GEORGE M. NORMAN, Wilmington, Del., assignor to Hercules Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Sept. 29, 1925. Serial No. 59,376. 8 Claims. (Cl. 105—369.)

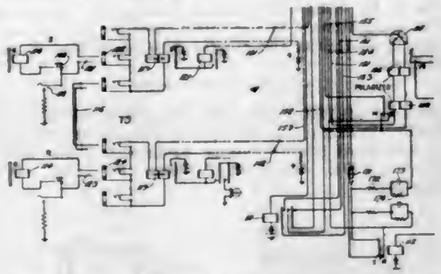


3. The method of shipping dynamite, comprising dividing the floor space of a freight car into compartments of predetermined area, packing the dynamite in relatively weak containers whose two dimensions are fractional parts of the compartments and stacking the containers in the compartments to completely cover the floor of each loaded compartment and thereby prevent shifting of the containers.

1,625,492. METHOD OF MAKING TIRE-VALVE CASINGS. ERASTUS G. OAKLEY, Southport, Conn., assignor to Bridgeport Brass Company, Bridgeport, Conn. Filed July 3, 1924. Serial No. 724,084. 9 Claims. (Cl. 29—157.)

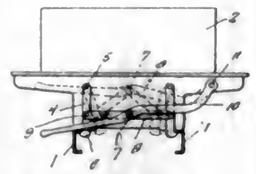
1. The process of making a valve casing or the like, which comprises displacing inwardly the wall of a tubular blank to form an interior shoulder in the tube bore, and simultaneously forming a head upon one end of the blank and closing the groove formed by the displacement of the wall.

1,625,493. CAN CLEANING AND DRYING APPARATUS. JOSEPH O'CONNELL and HAROLD HAMILTON KERR, Kensington, Victoria, Australia. Filed Mar. 25, 1925, Serial No. 18,116, and in Australia Sept. 27, 1924. 13 Claims. (Cl. 141—7.)



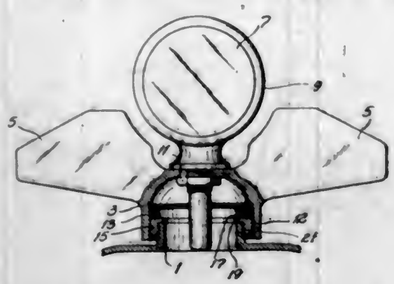
1. A can cleaning apparatus, comprising a cylindrical tank, a rotary grid-like can support above the tank, means for injecting a cleaning liquid into and onto the cans, said liquid being thereafter collected in the tank, means to impart a rotary movement of the liquid in the tank, and a stationary skimmer, against which the rotating liquid moves, arranged to guide the liquid toward the periphery of the tank.

1,625,494. PROCESS OF PICKLING RIPE OLIVES. HOLGER DE FINE OLIVARIUS, San Francisco, Calif., assignor to California Packing Corporation, San Francisco, Calif., a Corporation of New York. Filed Jan. 27, 1926. Serial No. 84,158. 7 Claims. (Cl. 99—1.)



2. A process of pickling ripe olives which includes treating the olives with a cutting agent in conjunction with a solvent adapted to render the olives readily susceptible to the action of the cutting agent.

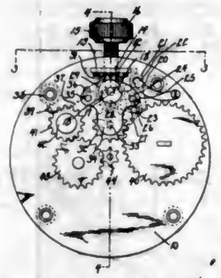
1,625,495. TELEGRAPH SYSTEM. HENRY W. O'NEILL, Elmhurst, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 8, 1925. Serial No. 48,949. 31 Claims. (Cl. 178—51.)



1. The combination in a telegraph system of a transmission line, means for simultaneously impressing on said line a plurality of alternating currents of different frequencies, means under control of message signals for correspondingly changing the character of said alternating currents, receiving devices for said changed currents each comprising a contact set, and a vibratory circuit controlling member for engaging said contact set, said member being adapted when in vibration to exert continuously one condition of circuit control over said contact set and to exert continuously when at rest another condition of circuit control to give rise to direct current message impulses corresponding to said message signals.

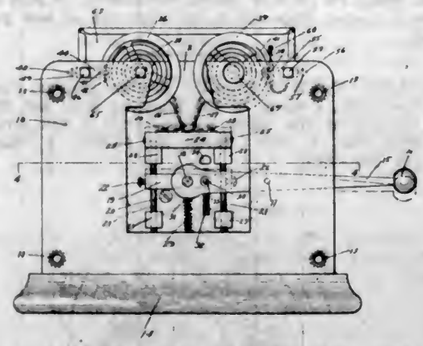
1,625,496. DUMP-BODY VEHICLE. CLARENCE E. PACKARD, Abilene, Kans. Filed Mar. 10, 1926. Serial No. 93,657. 1 Claim. (Cl. 298—38.)

In a dump body vehicle, and in combination, chassis bars in parallelism and channel formed in vertical section, a dump body hingedly connected with said chassis bars, and means for detachably connecting the forward portion of the body to said chassis bars; said means comprising transversely swingable latch bars pivotally connected to the forward portion of the body and having outwardly directed hooks to engage the upper flanges of the chassis bars, links pivotally connected together and pivotally connected to said latch bars intermediate their ends, and a transverse vertically swingable lever pivotally connected at one end to the front portion of the body above the pivots of the links with the latch bars and pivotally connected at an intermediate point in its length to the pivotal connection between the links, the distance between the pivots of the lever being such as to allow the pivotal connection between the links to be disposed below the connection of the links with the latch bars when the latch bars are engaged with the flanges of the chassis bars.



1,625,497. RADIATOR CAP. HARVEY S. PARDEE, Ravinia, Ill., assignor to Belle Evans Pardee, Ravinia, Ill. Filed May 10, 1926. Serial No. 107,934. 7 Claims. (Cl. 220—24.)

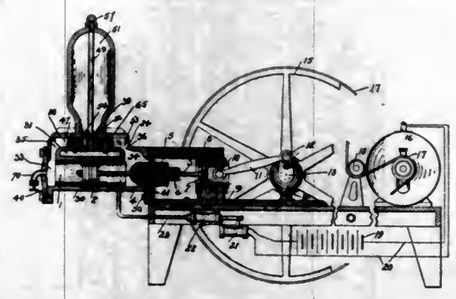
6. A radiator cap comprising a body, a stop threaded thereto, means for positively holding the stop in any one of an infinite number of its threaded positions, an adapter threaded to the body and non-resiliently abutting the stop ring, and means for fastening the adapter to a radiator neck.



1,625,498. STEM-WINDING AND STEM-SETTING WATCH. WILSON E. PORTER, New Haven, Conn., assignor to New Haven Clock Co., New Haven, Conn. Filed Nov. 15, 1924. Serial No. 750,085. 1 Claim. (Cl. 58—72.)

In a stem-winding and stem-setting watch of the type in which the stem is pulled out for setting, the combination with the front and back movement-plates thereof, of winding-and-setting trains, a longitudinally-movable and rotatable winding-and-setting stem, a primary winding-and-setting wheel through which the said stem passes and which is turned in either direction thereby, a pivotal yoke-shifter located between said plates and directly connected with the said stem, a pivotal yoke located adjacent to but not bearing upon the front face of the front movement-plate and connected with the said yoke-shifter for movement thereby, a shouldered stud upon which the said yoke pivots, an intermediate winding-and-setting

wheel interposed between the said yoke and the front face of the front-movement plate and turning upon the said stud, a secondary winding-and-setting wheel also interposed between the said yoke and the front face of the front movement-plate and swung, with the yoke, into engagement with a member of the said setting-train when the winding-and-setting stem is pulled outward, and a pin carried by the yoke, mounting the wheel last mentioned.



1,625,499. TIMING DEVICE FOR THE BALANCE-WHEEL UNITS OF CLOCK AND WATCH MOVEMENTS. WILSON E. PORTER, New Haven, Conn., assignor to The New Haven Clock Co., New Haven, Conn., a Corporation. Filed Sept. 22, 1926. Serial No. 136,976. 6 Claims. (Cl. 73—56.)

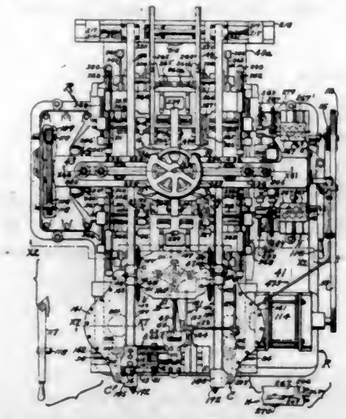
1. A device for timing the balance-wheel units of time-pieces, having means for mounting a master balance-wheel unit and a trial balance-wheel unit, and means for directly engaging with the edges of the rims of the balance-wheels of such units for simultaneously starting the two units in oscillation in opposite directions whereby one balance-wheel is given a clockwise impulse and the other an anti-clockwise impulse, the said means comprising yielding impulse-fingers, the edges of which co-act with the edges of the balance-wheel rims.

1,625,500. PUMP. MARTIN JOSEPH QUINN, Toronto, Ontario, Canada. Filed Nov. 21, 1923. Serial No. 676,168. 2 Claims. (Cl. 103—125.)

1. A pump comprising a cylinder, a piston within the cylinder, a single valve chest over-lying the cylinder, valved suction ports and valved discharge ports, arranged side by side in said chest, a partition separating the valved suction ports from the valved discharge ports and shutting off communication between them through said chest, an intake header below and communicating through the valved suction ports with the suction side of said partition, fluid-ways communicating with the suction side of said partition and through the valved discharge

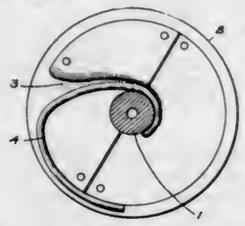
ports with the discharge side of the valve chest, the discharge side of said chest having an outlet above the level of the discharge valves in combination with a single cover for the valve chest enclosing the valved suction and discharge ports, and rendering both sets of ports and their valves simultaneously accessible when the cover is removed.

1,625,501. TRAVELING CONVEYER. WILLIAM H. ROBERTSON, Dayton, Ohio. Filed Feb. 15, 1924. Serial No. 692,999. 59 Claims. (Cl. 104—88.)



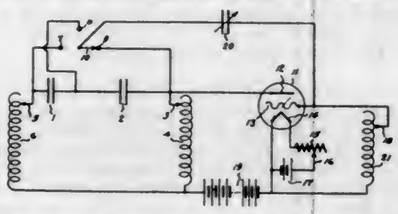
1. In an automatic conveyer system, a plurality of independent traveling carriers, a circuitous track system including main line track and sidings, alternating sets of guide means engageable with the main line track and sidings respectively, the transfer from main line to siding track and vice versa being effected by operatively engaging one set of guide means and retracting the other, means for automatically transferring carriers from the main line track to a siding at a predetermined transfer point by alternation of the guide means including track located trip means located in differently spaced relation transversely to the path of travel and transversely adjustable selective mechanism located upon each carrier and adjustable transversely of the path of travel for engagement with the trip mechanism at any one of a plurality of transfer points throughout the system whereby the selective mechanism will idly pass certain trip means and be operatively engaged with only the trip mechanism for which it has been previously adjusted.

1,625,502. AUTOMATIC PAN-MAKING MACHINE. WILLIAM JOHN ROEPKE, Los Angeles, Calif., assignor, by mesne assignments, to Roepke Pan Machine Corporation, Wilmington, Del., a Corporation of Delaware. Filed Apr. 22, 1926. Serial No. 103,930. 96 Claims. (Cl. 153—17.)



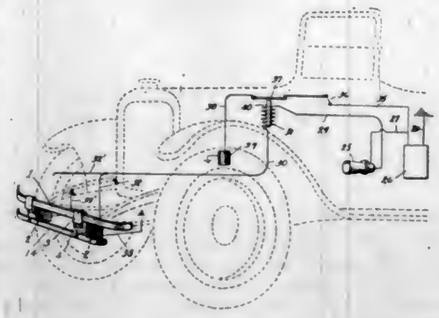
1. A pan making machine comprising in combination, an abutment and a form spaced apart to form an open space adapted to admit a blank edgewise between the form and said abutment; folders surrounding and co-

operating with the form to form a pan folding mechanism; blank placing mechanism adapted and arranged to move a blank edgewise into folding position in said space; means to reciprocate the form toward and from the abut-



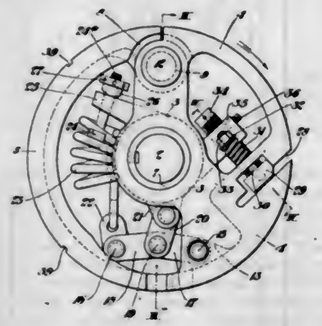
ment to clamp and release the blank; and means to operate the folders to and from the form to fold the clamped blank onto the form to form a pan, and finally to withdraw the folders from the form to release the pan.

1,625,503. CABLE REEL. CLAUDE O. SCHOOLEY, Perth Amboy, N. J., assignor to Standard Underground Cable Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 8, 1925. Serial No. 61,195. 3 Claims. (Cl. 242—77.)



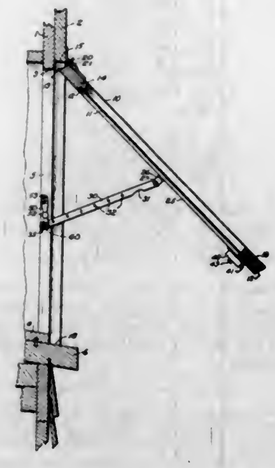
1. A reel for an electric cable including a cylindrical drum and a circular end flange, said end flange being provided on its inner face with a groove extending spirally from and in a curvature continuous with the curvature of the drum, such groove extending to the periphery of the flange.

1,625,504. CONVERTER OF ELECTRIC CURRENT. FREDERICK GRANT SIMPSON, Seattle, Wash. Filed July 6, 1926. Serial No. 120,696. 10 Claims. (Cl. 250—36.)



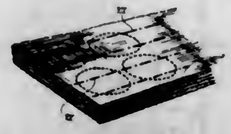
1. The method of creating an alternating electric current, in an oscillatory circuit, which consists in directly supplying increments of energy, to said oscillatory circuit, in the form of unidirectional pulsations of electric current; said pulsations being resident in a part of said oscillatory circuit, but having a source external to said circuit; successive pulses, of said pulsations, being uniformly in the same direction and said pulsations being delivered to said oscillatory circuit at substantially twice the frequency of said alternating current.

1,625,505. COLLISION-SIGNAL SWITCH. OSCAR C. STUMP and EARL R. STUMP, Seattle, Wash. Filed Feb. 21, 1925. Serial No. 10,748. 2 Claims. (Cl. 200—52.)



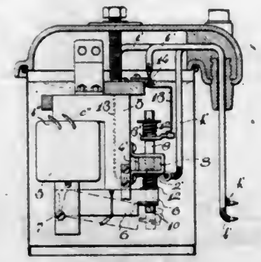
1. In a motor vehicle, in combination, a fixed bumper bar, a housing fixed to the said bumper bar, an electric switch mechanism contained in said housing and comprising a switching member that is movable between "off" and "on" positions, a push rod slidably mounted in said housing with its inner end disposed in position to engage with the said switching member to move it from "off" to "on" position, and having its outer end extended from the housing forwardly of the fixed bumper, yieldable means for resisting inward movement of the push rod and a bumper supported by the outer end of said push rod.

1,625,506. TAKE-UP BLOCK. EDWARD THOMAS, Cleveland, Ohio, assignor to The American Steel and Wire Company of New Jersey, a Corporation of New Jersey. Filed Mar. 9, 1926. Serial No. 93,386. 5 Claims. (Cl. 242—78.)



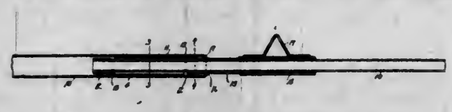
5. A take-up or drawing block comprising a shaft, a hub secured to said shaft, a drum portion formed in two parts, one of the parts of said drum being freely mounted on said shaft, the other of said drum parts being hinged at one end to said first mentioned drum part, and having its other end connected by a series of toggle levers with said hub and said first mentioned drum part, a spring connected to one of said toggle levers and said hub and adapted to normally urge said levers into collapsed position, said toggle levers being adapted to be forced into extended position to expand said drum parts into operative position against the tension of said spring when said shaft and hub are rotated, and a material receiving slot and gripping means in said first mentioned drum part, and means operable by said hub for operating said gripping means.

1,625,507. CLOSURE FASTENER. HENRY E. THOMPSON, Newark, N. J. Filed Jan. 29, 1925. Serial No. 5,577. 3 Claims. (Cl. 292—266.)



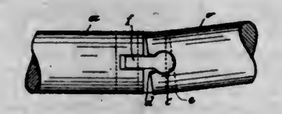
1. In a device of the character described the combination of a casing surrounding an opening; a closure for said opening, provided with a frame pivoted to said casing; a spacing bar provided with a cam surface pivoted to said frame; a bracket adapted to receive and guide said spacing bar; means to secure said bracket to said casing including a fulcrum around which said bar and cam surface are adapted to turn to tighten said closure; and means for securing said spacing bar in a locked position.

1,625,508. LAMINATED PACKING AND METHOD OF FORMING THE SAME. ROBERT HARRY THORNE, Williamsport, Pa. Filed Dec. 30, 1921. Serial No. 525,822. 1 Claim. (Cl. 154—2.)



A method of forming laminated packing which consists in utilizing fabric layers having distinguishingly colored threads constituting visible means indicating the run of the threads thereof, superimposing the layers with alternate layers of unvulcanized rubber and with the run of the threads of each of the several layers as shown by said indicating means is at an angle to those of the several other layers to avoid unravelling and unequal stretching, compressing the layers together under heavy pressure, die-pressing the compressed layers to the required form and then vulcanizing and subsequently trimming the vulcanized packing.

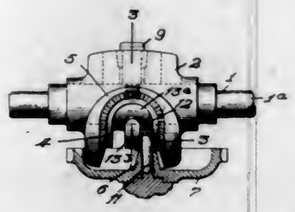
1,625,509. ELECTROMAGNETIC SWITCH. NOBUFUMI TOGAMI, Saga, Japan. Filed Apr. 27, 1923. Serial No. 635,118. 1 Claim. (Cl. 200—87.)



A circuit controller including a casing, an electro-magnet suspended in the casing and embodying a yoke, an armature pivoted to swing vertically with respect to the lower end of the yoke, an insulation bar secured transversely of the yoke and provided adjacent the respective ends with openings, substantially U-shaped hooks straddled about the ends of the bar and having their side portions provided with openings aligning with the openings in the bar and constituting fixed contacts, a terminal clamp continuing from one side portion of each hook, rods slidable vertically through the aligning openings in the bar and hooks and loosely pivoted at their lower ends to the armature, and slidable and yieldingly mounted contact on the rods adjacent the upper and lower ends thereof for alternately contacting with the upper and lower portions of the hooks which constitute the fixed contacts, substantially as and for the purposes set forth.

1,625,510. TELESCOPIC FISHING ROD. CHARLES A. TREDWELL, New Haven, Conn., assignor to Winchester Repeating Arms Co., New Haven, Conn. Filed Oct. 14, 1924. Serial No. 743,528. 1 Claim. (Cl. 287—126.)

In a fishing-rod having joint-sections which are relatively longitudinally-adjustable, the combination with two of the joint-sections thereof, of a laterally expansible but longitudinally non-extensible friction-sleeve mounted upon the lower end of one of the said joint-sections and having friction bearing in the upper end of the other joint-section, the said sleeve being provided at its respective ends with integral tubular clips respectively separated from its ends by transverse slots.

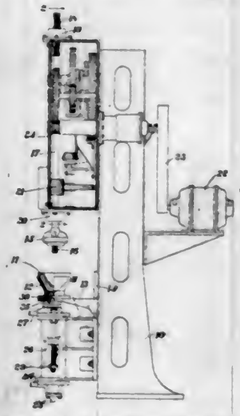


1,625,511. SHAFT COUPLING. KARL FRIEDRICH UNGERER, Pforsheim, Germany. Filed Apr. 22, 1924, Serial No. 708,286, and in Germany Dec. 21, 1923. 5 Claims. (Cl. 64—91.)

1. A shaft coupling comprising shaft ends having the same contour as the shaft with transverse slots and circular seats at the ends of said slots and relatively movable flat plates having cylindrical heads fitting said seats

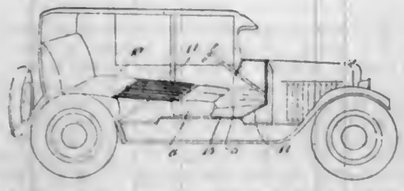
and slots, the shaft ends also having slots at right angles to the afore-mentioned slots and the plates slotted from opposite edges to interfit and form a cross extending into both shaft ends.

1,625,512. REVERSING MECHANISM. SERGIUS VERNET, Brooklyn, N. Y. Filed Mar. 5, 1924. Serial No. 696,983. 6 Claims. (Cl. 74—14.)



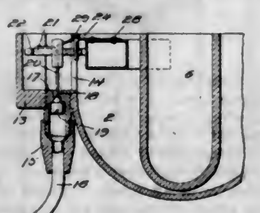
1. In a reversing mechanism of the type described, a rock shaft, a warped reversing gear thereon, means to drive the gear, in alternately reverse direction to oscillate the the rock shaft back and forth, and means to cause a reduction in the driving torque on the rock shaft during the reversing movements.

1,625,513. PENCIL. CHARLES E. WEHN, Alameda, Calif., assignor to Listo Pencil Corporation, Alameda, Calif., a Corporation of California. Filed Apr. 19, 1924. Serial No. 707,667. 5 Claims. (Cl. 120—18.)



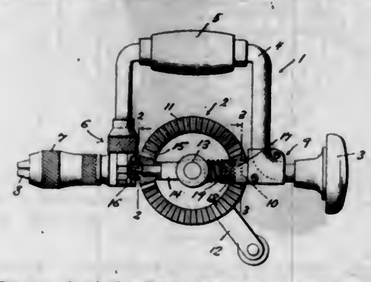
1. A pencil of the character described, comprising a tube having a slot formed in one end and a central passage in the other end and in communication with the slot, said central passage forming a receptacle for a pencil lead, a rack bar slidably mounted in the slotted portion of the tube, said rack bar being secured against rotary movement in the tube, a short nut journalled on one end of the tube and engageable with the rack bar to advance or retract the same, and a feed bar attached to the rack bar and extending into the lead receiving passage.

1,625,514. APPARATUS FOR FORMING PLASTIC MATERIALS. ARTHUR O. AUSTIN and DONALD KEITH MACLEOD, Barberton, Ohio, assignors, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Feb. 12, 1925. Serial No. 8,821. 35 Claims. (Cl. 25—3.)



1. In combination a thread forming member, a continuously connected reciprocating drive having a definite range of movement for advancing said member to form a thread and for arresting the advance of said member at a definite position.

1,625,515. AUTOMOBILE BED. WILLIAM R. BAILEY, Elmhurst, Ill. Filed Nov. 18, 1925. Serial No. 69,837. 1 Claim. (Cl. 5—118.)

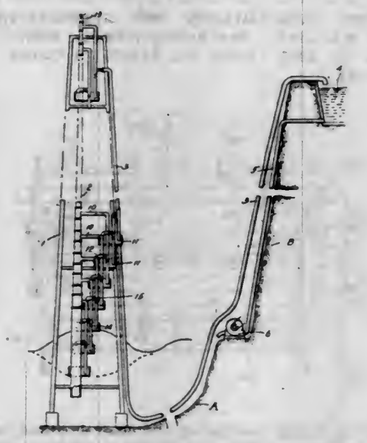


The combination with an automobile front seat having a back removably hinged to brackets secured on the base of the seat, of a flat grid formed with depending lugs on one end thereof for engagement with said brackets when said seat back is removed, and means for hingedly securing said grid lugs to said brackets whereby the free end of said grid may be swung to rest on top of the rear seat of an automobile.

1,625,516. CARBURETOR. FRED H. BARGER, Cherry Valley, Ark. Filed Feb. 18, 1925. Serial No. 10,036. 4 Claims. (Cl. 137—104.)

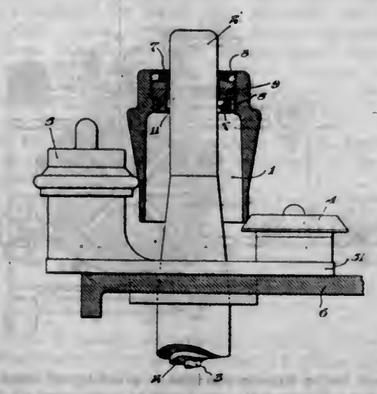
3. In a carburetor and in combination, a fuel chamber, a vertically swingable lever in said chamber, an upwardly seating valve for controlling the inlet to said chamber having a stem connected at an intermediate point of its length to the lever and extending above the lever, a float, a spring strip having a bifurcated end portion straddling the upwardly extending portion of the valve stem and fixedly connected to and arranged above the lever and also fixedly connected to and arranged above the float and having an intermediate portion spaced above the portion of the lever adjacent to the float, and a headed screw extending downwardly through and engaging with its head the intermediate portion of the spring strip and threaded in the lever.

1,625,517. COMBINATION BRACE AND DRILL. CHARLES W. BEAMER, Tonopah, Nev. Filed June 9, 1926. Serial No. 114,734. 2 Claims. (Cl. 145—66.)



1. In a tool of the class described, in combination, a brace including the usual U-shaped portion, pawl and ratchet mechanism, bushing, and chuck rotatably mounted in the bushing, said chuck being provided at its inner end with a polygonal socket a clamp carried by a remote arm of the U-shaped portion of the brace, said clamp being provided with a polygonal extension, a drill attachment for the brace including a beveled gear, a shaft provided with means for mounting said gear to rotate in a plane substantially parallel to said shaft, a pinion rotatably mounted on one end of the shft and meshing with the gear, said pinion being provided with an extension fitting into the aforesaid socket, a spring pressed coupling sleeve mounted upon the opposite end of the shaft and provided with a polygonal socket for reception of the correspondingly shaped extension on said clamp.

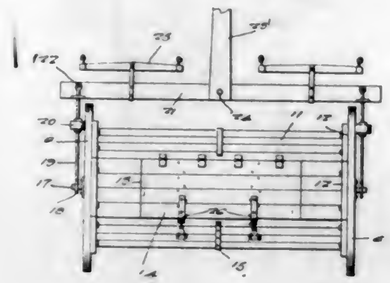
1,625,518. SPRING WHEEL. WILLIAM JAKOB BEISEL, Port Richmond, N. Y., assignor to Beisel Spring Wheel Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 27, 1922. Serial No. 609,298. 8 Claims. (Cl. 152—50.)



1. A spring wheel comprising in combination, a hub, a metal felloe, a plurality of sickle shaped spring spokes having radial inner ends secured to the hub and outer ends extending along the inner face of said felloe, the said inner face having a central groove like radial depression in which the outer ends of the spokes fit longitudinally and caps extending across said ends bolted to the felloe, thus rigidly clamping the outer spoke ends to the felloe.

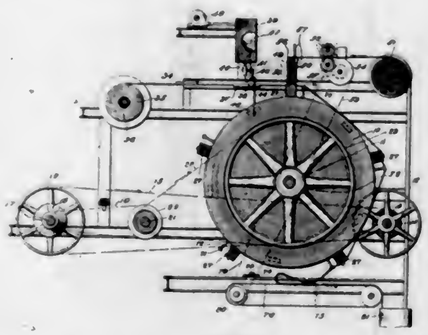
1,625,519. WAVE MOTOR. HERBERT L. BOOTH, Beverly Hills, Calif. Filed Sept. 20, 1926. Serial No. 136,520. 6 Claims. (Cl. 103—64.)

1. A device of the character described comprising conduits at successively higher elevations and all communicating with a body of water having a periodic natural change in the level thereof, means for automatically alternately creating and destroying a vacuum in all of the conduits by said change in the level of the body of water, means for lefting liquid in each of said conduits by said vacuum, and means for automatically discharging the elevated liquid from each of said conduits into the next higher conduit when the vacuum is destroyed.



1,625,520. CAP SPINNING FRAME. ROBERT BURGESS, Newton Center, Mass., assignor of one-half to Joseph H. Jones, Winthrop, Mass. Filed May 31, 1923. Serial No. 642,379 6 Claims. (Cl. 118—62.)

1. In live-cap spinning devices, the combination with a rotatable spinning element, of a live cap driven by light frictional engagement with the blade or barrel of said element, having a bore in the cap-head permitting



the cap to assume its normal positions when at rest and in motion without cramping or binding upon said blade or barrel, and oppositely-located pivot-wheels coacting to sustain the cap while in active rotation with its axis uni-directional with that of the spinning element and its bell-shaped portion in an intermediate position substantially concentric with the axis of the spinning element whereby cramping or binding interfering with free vertical relative movement is obviated.

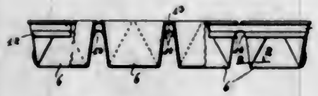
1,625,521. GRAIN-MIXING AND CHEMICAL-TREATING MACHINE. ORR BURGETT, Scobey, Mont. Filed Sept. 26, 1925. Serial No. 58,887. 6 Claims. (Cl. 259—81.)

1. In a mixing machine of the class described, a pair of ground engaging disks, a plurality of brackets arranged concentrically about the center of the inner surface of the disk and spaced at equal intervals from each other and spaced inwardly from the periphery of the disks, bars disposed between the brackets on the inner faces of the disks, bars extending between the brackets from one disk to the other, said bars and disks forming a skeleton frame for a polygonal receptacle, and panels mounted on said bars to form the sides of said polygonal receptacle.

1,625,522. LACING-TIPPING MACHINE. FRED E. BURLINGAME, Pawtucket, R. I., assignor to Attleboro Braiding Co., South Attleboro, Mass., a Corporation of Massachusetts. Filed June 26, 1924. Serial No. 722,581. 14 Claims. (Cl. 18—1.)

4. In a lacing tipping machine, a plurality of cooperating die blocks having dies arranged to close upon a lacing to form a tip thereon, means for advancing said blocks to act successively upon a continuous length of lacing fabric to form tips thereon and also feed length to the next succeeding die.

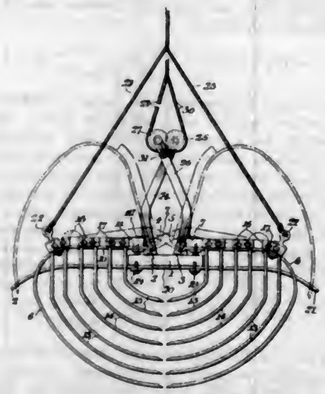
1,625,523. STOCKING. WALTER D. BUTZ, Norristown, Pa. Filed Sept. 6, 1922. Serial No. 586,435. 4 Claims. (Cl. 66—182.)



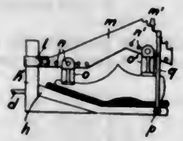
1. A stocking comprising a reinforced area at the back, with bands of the reinforced fabric extending at intervals across the front of the stocking and confining therebetween panels of the unreinforced fabric.

1,625,524. MANUFACTURE OF STEEL SHEETS. WILLIAM E. CAUGHERTY, Natrona, Pa., assignor, by mesne assignments, to Allegheny Steel Company, Brackenridge, Pa., a Corporation of Pennsylvania. Filed June 18, 1924. Serial No. 720,783. 5 Claims. (Cl. 148—12.)

1. The method, which consists in roughing down steel sheets to approximately one-half their finished length, in annealing the roughed down sheets at a temperature sufficiently high to transform the grain structure thereof, in pickling said annealed sheets, in matching or pairing the roughed down sheets, in rolling the paired or matched sheets to length, in pickling the sheets after rolling and then annealing the same.



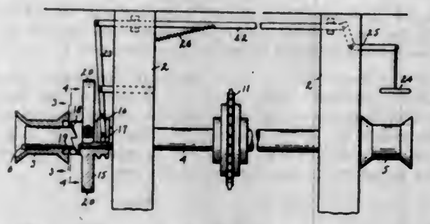
1,625,525. BAKING PAN. HENRY B. CRAMER, San Diego, Calif. Filed July 12, 1926. Serial No. 121,900. 5 Claims. (Cl. 53—6.)



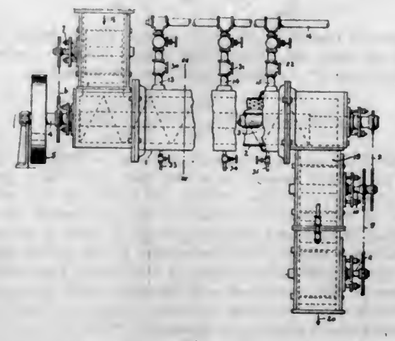
1. In combination with pans united into a group, a strip around the upper edges of the united pans formed for gradually guiding and for equally spacing the pans in all lateral directions within the upper edges of another group of pans when so placed.

1,625,526. POWER FORK. SCHUYLER DAVEY, Stillwater, N. Y. Filed Aug. 9, 1926. Serial No. 128,242. 7 Claims. (Cl. 294—111.)

1. A power fork comprising a central support, a pair of rectangular frames, a plurality of tines connected to each frame, means pivotally supporting said tines and frames from the central support, and means for positively moving the tines and frame to and from operative position, each of said moving means being operable to raise and lower said fork.



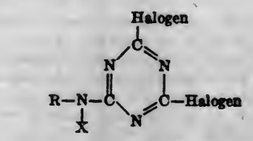
1,625,527. PNEUMATIC SOLE-LAYING MACHINE. ALBERT DEMNITZ, Dresden, Germany. Filed Mar. 13, 1924, Serial No. 699,103, and in Germany Mar. 19, 1923. 2 Claims. (Cl. 12—37.)



1. A pneumatic sole-laying machine, which comprises a rotatably mounted table, a plurality of pressing devices arranged radially on said table, a clamping lever having a free end for each of said pressing devices, a plurality of notches provided at the free end of said clamping lever, and a stirrup which is rockingly mounted and capable of co-operating with said notches for engaging and adjusting said clamping lever in operative position.

1,625,528. TONG-OPERATING SAFETY APPLIANCE. WELDON C. ERWIN, Yorba Linda, and CECIL H. SWEET, Brea, Calif., assignors to John W. MacClatchie, Compton, Calif. Filed Apr. 27, 1925. Serial No. 26,004. 6 Claims. (Cl. 255—35.)

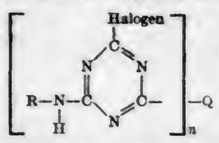
1. The combination with the draw works of a well which includes a drive shaft and a cat head fixed on the end thereof, an axially shiftable eccentric journaled on the drive shaft adjacent the cat head, the proximate ends of the cat head and eccentric forming cooperating clutch elements, the opposite end of the eccentric having a projecting sleeve provided with an annular recess, a forked operating arm engaging said recess for axially shifting the eccentric to engage or disengage the clutch, actuating means for the forked arm having an operating handle at the opposite end of the drive shaft, a strap on the eccentric, and a cable fixed to the strap and having means for engaging tongs.



1,625,529. PASTEURIZER. THOMAS W. W. FORREST, Oakland, Calif., assignor to Sun-Maid Raisin Growers of California, Fresno, Calif., a Cooperative Association of California. Filed Nov. 22, 1924. Serial No. 751,568. 5 Claims. (Cl. 99—2.)

1. Dried fruit Pasteurizing mechanism comprising a horizontally arranged tubular outer casing provided with upper controlled steam supply means and lower controlled drainage means, a cylindrical inner casing spaced within the outer casing and a conveyor therein adapted to transfer material through said inner casing, said inner casing being provided with a plurality of perforations on its upper side only open to the space between the cylinders to allow steam action therethrough from said space on said material and said inner casing provided with an inlet valve to control the fruit to the conveyor and an outlet therefor and means to restrain the outflow of the fruit therefrom to retain the steam.

1,625,530. INTERMEDIATE PRODUCT FOR THE SYNTHESIS OF DYES AND PROCESS OF MAKING SAME. HERMANN FRITZSCHE, EDUARD KRUMMENACHER, HANS GUBLER, and OTTO KAISER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 20, 1923, Serial No. 652,856, and in Switzerland Sept. 7, 1922. 5 Claims. (Cl. 260—27.)

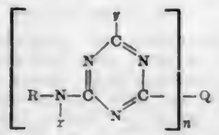


3. As new intermediate products for the synthesis of dyes, the herein described new compounds of the general formula:

wherein R means an aromatic complex derived from hydrocarbons having not more than 12 carbon atoms, and X hydrogen, alkyl or aralkyl, one of the two residues R and X containing at least one strong acid group, which products are colorless to gray and yellowish powders, dissolving in solvents yielding colorless to yellow and brownish solutions, and which are characterized by two mobile atoms of halogen at the cyanuric nucleus.

1,625,531. INTERMEDIATE PRODUCT FOR THE SYNTHESIS OF AZO DYES AND PROCESS OF MAKING SAME. HERMANN FRITZSCHE, EDUARD KRUMMENACHER, HANS GUBLER, and OTTO KAISER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 20, 1923, Serial No. 652,857, and in Switzerland Sept. 7, 1922. 12 Claims. (Cl. 260—27.)

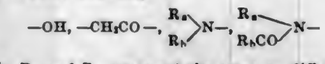
7. The herein described new intermediate products for the synthesis of azo-dyes of the general formula:



wherein R means an aromatic residue which, firstly, contains at least one strong acid group, secondly, contains at least one of a group of auxochromes including

(wherein Ra and Rb represent the same or different alkyl, aryl or aralkyl radicals or a hydrogen atom), Q a hydrogen atom or a radical which are linked to the carbon atom of the cyanuric nucleus by one of a group of connecting links which contains O or N, and *n* a whole number not higher than the number of the mobile hydrogen atoms originally present in the amino and hydroxy groups of the compounds corresponding with the radical Q, which products form colorless to gray and yellowish powders which dissolve in solvents forming from colorless to yellow and brownish to yellow and brownish solutions, and which are characterized by the presence of a mobile atom of halogen at the cyanuric nucleus.

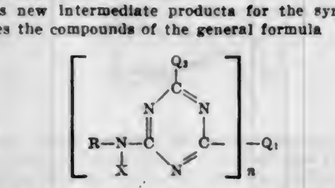
1,625,532. PROCESS OF MAKING INTERMEDIATE PRODUCTS FOR THE MANUFACTURE OF AZO DYES. HERMANN FRITZSCHE, EDUARD KRUMMENACHER, HANS GUBLER, and OTTO KAISER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 20, 1923, Serial No. 652,858, and in Switzerland Sept. 7, 1922. 1 Claim. (Cl. 260—27.)



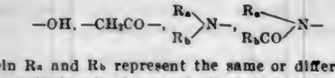
The herein described process of making intermediate products of the general formula

wherein R means an aromatic complex which contains one of a group of auxochromes including

(wherein Ra and Rb represent the same or different alkyl, aryl or aralkyl radicals or hydrogen atoms), *x* a hydrogen atom or an alkyl, aralkyl or aryl residue, one of the two residues R and *x* containing at least one strong acid group, Q a hydrogen atom or a radical which is linked to the carbon atom of the cyanuric complex by one of a group of connecting links which contains —O— or —N— *y* a halogen or a hydrogen atom or a radical, the hydrogen and the radical being linked to the carbon atom of the cyanuric nucleus by one linking, such as —N— or —O—, and *n* a whole number not higher than the number of the mobile hydrogen atoms originally present in the molecule corresponding with Q, which consists in condensing, in the first phase, at least one molecular proportion of a cyanuric trihalide with one molecular proportion of a compound containing a mobile atom of hydrogen which is linked to an oxygen or a nitrogen atom, but not carrying besides one of a group of auxochromes including



(wherein Ra and Rb represent the same or different alkyl, aryl or aralkyl radicals or a hydrogen atom), then causing to react, in a second phase, any number of the atoms of halogen belonging to the products obtained in the first phase with compounds carrying mobile atoms of hydrogen which are linked to oxygen or nitrogen atoms, whereby at least one of the compounds which are employed in the second phase, firstly, contains the mobile hydrogen atom linked to a nitrogen atom, secondly, contains still one of a group of auxochromes including

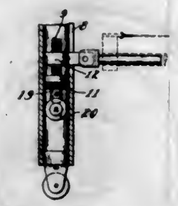


(wherein Ra and Rb represent the same or different alkyl, aryl or aralkyl radicals or hydrogen atoms), thirdly, contains a strong acid group, one phase at least being carried out in water.

1,625,533. INTERMEDIATE PRODUCT FOR THE SYNTHESIS OF AZO DYES AND PROCESS FOR MAKING SAME. HERMANN FRITZSCHE, EDUARD KRUMMENACHER, HANS GUBLER, and OTTO KAISER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 20, 1923, Serial No. 652,859, and in Switzerland Sept. 7, 1922. 12 Claims. (Cl. 260—27.)

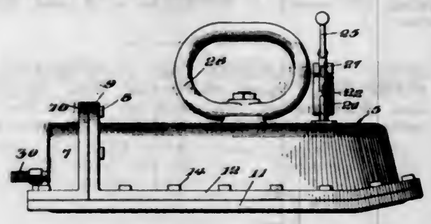
7. As new intermediate products for the synthesis of azo-dyes the compounds of the general formula

wherein R means an aromatic complex which contains at least one of a group of auxochromes including



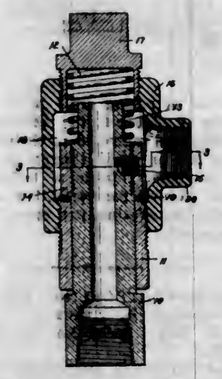
(wherein Ra and Rb represent the same or different alkyl, aryl or aralkyl radicals or a hydrogen atom), *x* a hydrogen atom or an alkyl, aralkyl or aryl residue, one of the two residues R and *x* containing at least one strong acid group, Q_1 a hydrogen atom or a radical which is linked to the carbon atom of the cyanuric nucleus by one of a group of connecting links which contains —O— or —N—, Q_2 one hydrogen atom or one radical which is linked to the carbon atom of the cyanuric nucleus by one of a group of connecting links which contains —O— or —N—, and *n* a whole number not higher than the number of the mobile hydrogen atoms originally present in the amino and hydroxy groups of the compound corresponding with the radical Q_1, which products are from colorless to gray and yellowish powders, dissolving in solvents from colorless to yellowish and brownish solutions.

1,625,534. ADJUSTABLE SICK BED. WILLIAM B. GARDINER, Quincy, Mass., assignor of forty-eight one-hundredths to Sebastiano Marchese, Quincy, Mass. Filed Sept. 6, 1924. Serial No. 736,229. 2 Claims. (Cl. 5—64.)



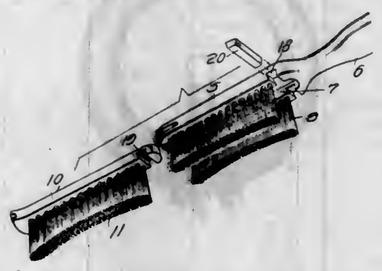
1. A bed having corner posts, driving shafts mounted respectively in the two corner posts at each end, each

constructed at one end to receive a driving crank, a longitudinal screw contained in each post, a bevel gear on each of said screws, bevel gears on the adjacent shaft meshing with the gears on the screws to rotate the



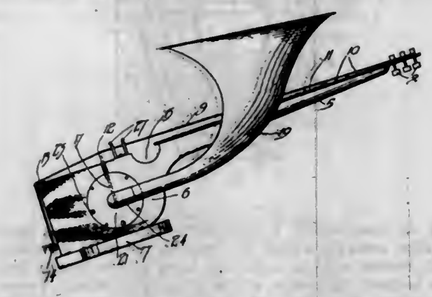
screws, travelers fitted to said screws to progress lengthwise and projecting through slots in the posts, a bed bottom, and pivoted, extensible couplings between said travelers and the bed bottom.

1,625,535. STEAM-HEATED IRON. ADOLPH GRAF, Chicago, Ill. Filed Jan. 11, 1924. Serial No. 685,655. 4 Claims. (Cl. 68—26.)



1. A steam iron comprising a hollow body having laterally projecting flanges on opposite sides thereof, a base having a steam tight connection with said flanges, said body and said base being provided with communicating steam passages, the passages in said base having their outlet portions extended at an acute angle to the material operated on, and means for supplying steam to said body.

1,625,536. SWIVEL PIPE JOINT. GEORGE GRONNER, Davenport, Iowa. Filed May 24, 1924. Serial No. 715,711. 1 Claim. (Cl. 285—167.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)

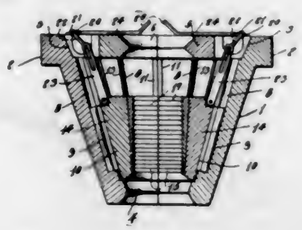


A swivel pipe joint embodying a T-fitting, a plug for closing one end thereof, said plug formed with a recess, a bearing engaged in the opposite end of the fitting, a tubular member partially inserted within the T-fitting, said tubular member formed with a reduced terminus spaced from the fitting, a collar carried by the tubular member adjacent the terminus and spaced from the fitting, a set screw uniting the collar and the tubular member, a packing ring interposed between the collar and the bearing, and a spring seated in the plug and engaging the collar to compress the packing ring.

1,625,537. TOOTHBRUSH. FRANCIS L. GULLICKSON, West Salem, Wis. Filed May 25, 1926. Serial No. 111,564. 3 Claims. (Cl. 15—176.)

1. In a tooth brush, the combination with a head and a handle extending therefrom, the head being formed in its under face with a centrally disposed longitudinal seat having undercut side walls, rows of bristles secured to the head on opposite sides of the seat, and a removable head section slidably mounted in said seat for longitudinal movement and provided with a row of bristles extending longitudinally of said section, the side walls of the outer end of the head and the outer end of the head-section being conjointly formed with a groove, and a U-shaped clip frictionally seated in said groove to retain said section in its assembled position in said seat.

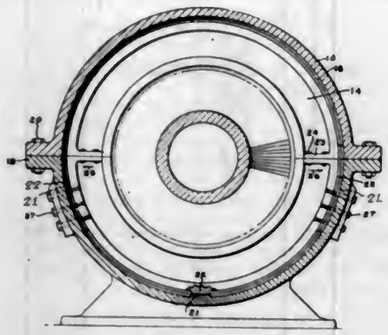
1,625,538. MUSICAL INSTRUMENT OF THE STRINGED TYPE. RUPERT ALEXANDER HAZELL, Melbourne, Victoria, Australia. Filed Apr. 21, 1926, Serial No. 103,553, and in Australia Nov. 24, 1925. 1 Claim. (Cl. 84—296.)



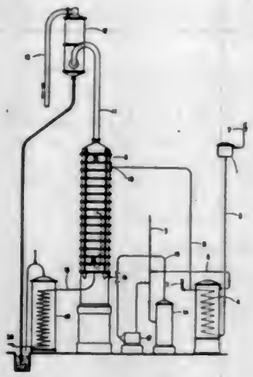
A musical instrument of the class described comprising a body portion having a neck portion at the end of which art keys for adjusting the tension on strings which pass rearwardly over a bridge, and over a metal angle piece, to be held to the instrument in any suitable way, frets disposed upon the upper surface of the neck portion at selected intervals, said bridge member being characterized by a straight edge adapted to support a plurality of strings in one plane, the bridge having an extension in the form of a stylus which connects a diaphragm supported in any suitable way, and carried in a recess formed in the body of the instrument, a tubular extension in communication with the diaphragm and a knee gripping member to the instrument body as described.

1,625,539. ILLUMINATED ORNAMENTAL DEVICE. MAX HERSKOVITZ, Chicago, Ill.; William Herskovitz and Charles Weinfeld executors of said Max Herskovitz, deceased; said William Herskovitz now by judicial change of name William Herst. Filed Dec. 10, 1923. Serial No. 679,842. 1 Claim. (Cl. 240—10.)

A device of the character set forth, comprising a core formed of sheet fibrous material in the form of an annulus of concavo-convex cross-section, a clip extending across the convex face of said core with its ends overlapping the rear side of said core, said clip having a substantially flat upper portion, and a hollow nipple, for an electric-lamp socket, on said flat portion, said core and the upper end portion of said clip which opposes the rear face of said core containing apertures substantially in registration with each other and with the opening in said nipple.



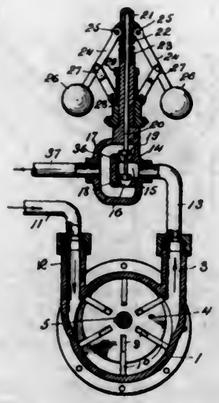
1,625,540. AUTOMATIC ROTARY-SPIDER BUSHING. FRANK HERTZBERG, Lomita, Calif. Filed Aug. 13, 1925. Serial No. 50,101. 2 Claims. (Cl. 24—263.)



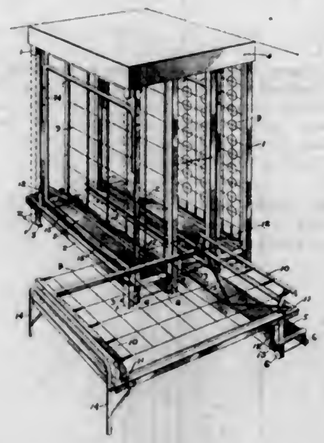
2. In combination, a bushing internally tapered, units of slips mounted within the bushing for axial movement with respect thereto, said slips being of less length than the vertical dimension of the bushing, elements loosely connecting the slips of the respective units, shafts journaled on the upper end of the bushing and provided with cranks, and links connected to the cranks and to the upper end of a slip of each unit.

1,625,541. ELASTIC-FLUID TURBINE. FRANCIS HODGKINSON, Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 21, 1923. Serial No. 682,117. 12 Claims. (Cl. 253—78.)

1. In a turbine having a cylinder and a rotor, a stationary blade-carrying ring supported by the cylinder and concentric with the rotor and means cooperating between the ring and the cylinder whereby the ring may expand within the cylinder and remain substantially concentric with the rotor while maintaining a predetermined spacing with respect to the cylinder at at least three points.



1,625,542. PREPARATION OF NONFERMENTED BEVERAGES. FRITZ HOSTETTLER, Bern, Switzerland. Filed Aug. 23, 1926, Serial No. 130,993, and in Switzerland Sept. 17, 1925. 3 Claims. (Cl. 99—11.)

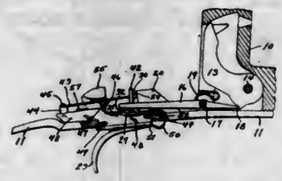


1. A process of preparing fruit juice beverages, comprising the steps of adding to the fresh must a sufficient quantity of sulphurous anhydrid to cleanse the must and leave a part of the anhydrid therein in solution, thereby to render the must capable of being stored for an indefinite period without pasteurization or refrigeration; and subsequently transfusing the must with humidified air to desulphurate it.

1,625,543. SPEED-CONTROLLING MECHANISM FOR MOTORS. CHARLES B. HUTCHISON, Parsons, Kans. Filed Apr. 28, 1924. Serial No. 709,342. 10 Claims. (Cl. 188—183.)

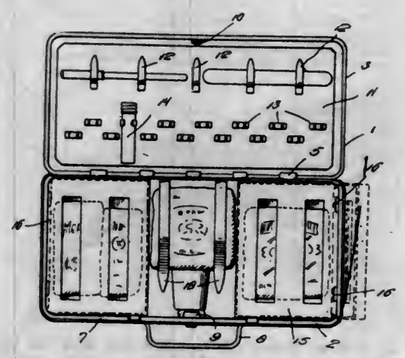
1. In a speed controlling mechanism, of the kind described, the combination with a driving element of a motor, of a cylinder having an intake port and an exhaust port for fluid, a piston attached to and movable by said driving element in said cylinder and arranged to force fluid from said intake port to said exhaust port, and governing means controlled by the speed of movement of said motor driving element for controlling the discharge of fluid through said exhaust port, in a manner such that the discharge will be respectively increased and decreased, as the speed of the driving element is reduced and increased.

1,625,544. DISPLAY RACK. NELS JENSEN, Grass Valley, Calif. Filed Mar. 30, 1926. Serial No. 98,446. 3 Claims. (Cl. 211—14.)



1. A display rack for bed springs, comprising the combination of an upright housing having a plurality of vertically extending openings thereinto, a plurality of carriages mounted on rollers and respectively slidable into and out of such openings, each carriage comprising an inverted U-shaped channel bar, two upright supports carried by each carriage respectively adjacent the ends thereof, a frame for each carriage pivotally mounted on the said supports adjacent one end of the frame and adapted to support a bed spring thereon, the frames being movable about the pivots to a horizontal position when the carriages are withdrawn from the frame housing, and means at the free ends of the frames for supporting the same in the horizontal position.

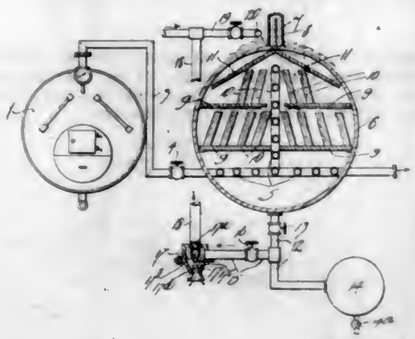
1,625,545. SHIM. JOHN KARMAZIN, East Amherst, N. Y., assignor to Laminated Shim Company, Inc., Long Island City, N. Y., a Corporation of New York. Filed Mar. 20, 1923. Serial No. 626,288. 2 Claims. (Cl. 308—244.)



1. As an improved article of manufacture, a shim consisting of a plurality of superposed sheets, each of said sheets except the bottom sheet being so punched as to provide a tongue which will extend into the next adjacent sheet, said bottom sheet presenting a smooth flat surface parallel to the upper surface of said shim.

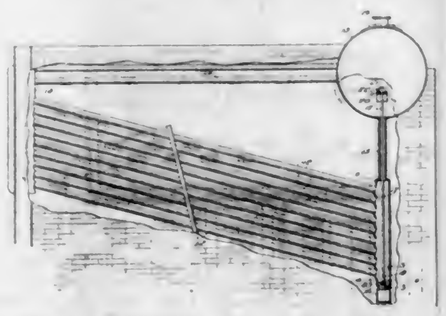
1,625,546. AUTOMATIC SINGLE-TRIGGER MECHANISM FOR DOUBLE-BARREL GUNS. JOE KAUTZKY, Jr., Fort Dodge, Iowa. Filed July 17, 1926. Serial No. 123,207. 10 Claims. (Cl. 42—42.)

1. In a gun lock, a frame, a trigger standard thereon, a trigger pivoted to said standard, a sear pivotally arranged on each side of said standard and having an inwardly directed arm at its rear end, a sear-lifting plate pivotally mounted and adapted to be raised by operation of said trigger, a sear lifter pivoted on said plate and adapted for selective engagement beneath the arms of said sears, a tumbler pivoted on said standard and adapted to oscillate said sear lifter, and means on said sears for oscillating said tumbler.



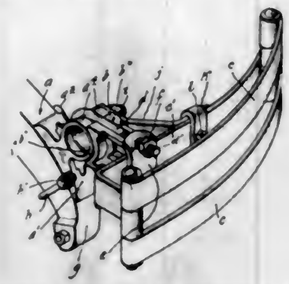
1,625,547. EMERGENCY KIT. ARCHIBALD K. KESSLER, Huntington, W. Va. Filed Mar. 2, 1926. Serial No. 91,748. 1 Claim. (Cl. 220—20.)

An emergency kit, comprising a container formed of a pair of hinged container forming half sections, means for releasably locking said sections in closed container forming relation, and a pair of rectangular frame members hingedly mounted in the opposite ends of one section and movable toward each other to closed position, each frame member having a plate member formed with inter-



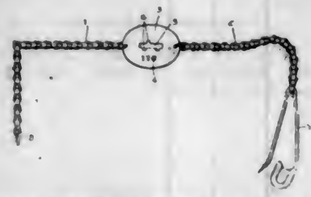
ally extending flanges on the sides adapted for cooperation in the closed position of the members with the ends of the section for dividing said section into a plurality of compartments, and in the open position of the members to provide communication between the several portions of the section.

1,625,548. APPARATUS FOR DRYING AND SEASONING TIMBER. ADOLF MARTIN KORIOLKE, Gilderoy, Victoria, Australia. Filed July 25, 1923, Serial No. 653,813, and in Australia July 25, 1922. 3 Claims. (Cl. 34—30.)



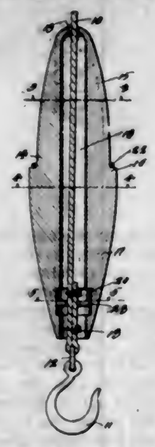
1. Apparatus for drying and seasoning timber, comprising a hermetically sealed kiln for receiving timber to be treated, a boiler, piping in the kiln for receiving steam from the boiler, a trap, a pipe leading from the kiln to the trap, a vacuum pump, a branch from the pipe to the pump, and a condenser operative to cause condensation inside of the kiln, for the purposes specified.

1,625,549. STEAM BOILER. FREDERICK W. KRONENBERG, Philadelphia, Pa. Filed June 19, 1925. Serial No. 38,268. 9 Claims. (Cl. 122—406.)



1. In a steam boiler, the combination with the front and rear headers, tubes arranged in vertically disposed series between the headers, and a steam drum communicating with both of said headers, of means for insuring a supply of water from said drum to the lower portion of the rear header and the lowermost tube supplied from that portion of the header, said means comprising a series of pipes extending from a point within the drum through the header to the bottom of the latter, the lower end of each pipe having lateral openings therein to discharge water laterally of the header.

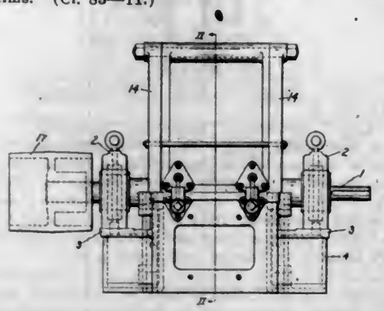
1,625,550. VEHICLE BUMPER. FRANK J. LAHER, Portland, Oreg. Filed Dec. 29, 1925. Serial No. 78,126. 10 Claims. (Cl. 293—55.)



8. In a vehicle bumper, a base adapted to be set upon the frame end of a vehicle, said base being resilient and having a concaved bottom means for drawing said base towards the vehicle frame upon which it is mounted to flatten said concave portion and flex said base.

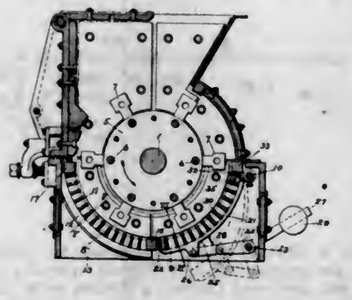
1,625,551. LAUNDRY-HANDLING DEVICE. EDWIN LANE, New York, N. Y., assignor to Carolyn Laundry, New York, N. Y., a Corporation of New York. Filed Nov. 16, 1925. Serial No. 69,556. 4 Claims. (Cl. 40—21.)

1. A device adapted to secure a plurality of fabric pieces together for laundering, comprising a flexible metallic member composed of two sections with a tag having a key way formed thereon connecting the two sections and means for fastening the loose ends of the sections to form a laundry-holding loop.



1,625,552. COMBINED WHIP WEIGHT AND BUFFER. CHARLES W. LEWIS, Portsmouth, N. H. Filed July 27, 1925. Serial No. 46,439. 6 Claims. (Cl. 294—82.)

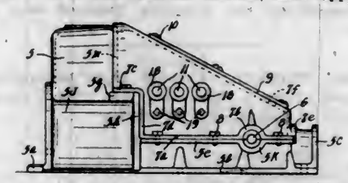
6. A cable whip weight comprising an elongated body formed with a longitudinal bore through its center, the said body including a pair of laterally detachable



sections, a ring removably mounted in the body adapted to engage a cable, and an exterior ring adapted to be slidably fitted on the body sections to lock the same in position about a cable.

1,625,553. PULVERIZING MACHINE. WILLIAM K. LIGGETT, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 8, 1923. Serial No. 644,166. 8 Claims. (Cl. 83—11.)

1. In a machine of the class described, the combination of a casing having an opening through a portion of its end wall to permit access to the interior of said casing, a shaft traversing said casing with its ends projecting through the opening, bearings for said shaft spaced from said casing to provide a working area, and a disk rotating with said shaft and lying closely adjacent the opening with its periphery in close proximity to the circumferential wall of said opening.

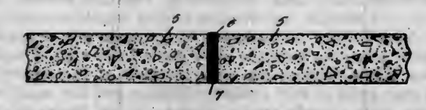


1,625,554. PULVERIZING MACHINE. WILLIAM K. LIGGETT, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 8, 1923. Serial No. 644,167. 35 Claims. (Cl. 83—11.)

1. In a grating of the class described, the combination of side bars having open topped seats, spacer blocks loosely mounted in said seats, grate bars loosely mounted in said seats between said blocks, and means for exerting pressure endwise of the series of assembled bars and blocks to hold said series in place.

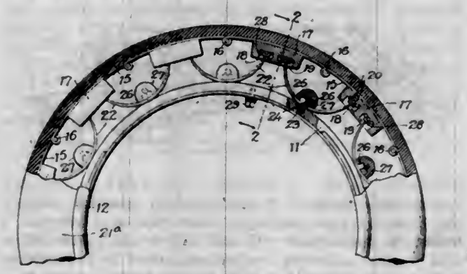
1,625,555. TRANSMISSION COVER FOR FORDS. RICHARD A. LINQUIST, Minneapolis, Minn. Filed June 5, 1926. Serial No. 113,951. 4 Claims. (Cl. 74—56.)

1. A casing for the transmission mechanism of an automobile, having a planetary transmission, pedal-controlled brake drums for operating the same, and a clutch lever shaft connected to one of said pedals and extending across said casing below said pedals, comprising an upper section, said section having connecting flanges disposed in a horizontal plane passing through the center of the crank shaft of the motor and adapted to be secured to a lower section of said casing, such upper section also having another removable section thereon, said upper sec-



tion and removable section having connecting flanges meeting in a horizontal plane passing substantially through the center of the clutch lever shaft, said removable section having semi-cylindrical portions at its front and rear ends fitting over similar sections on said upper section.

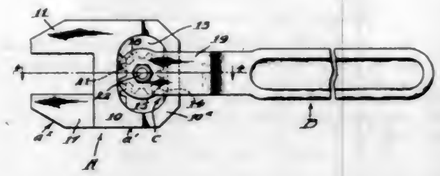
1,625,556. FIRE GRATE. ALEXIS S. LOMSHAKOFF, Prague, Czechoslovakia. Filed Sept. 19, 1923. Serial No. 663,562. 5 Claims. (Cl. 126—152.)



1. A fire grate having a permanent body of air permeable parts formed of strata of fire resisting particles, the strata being of varying air porosity.

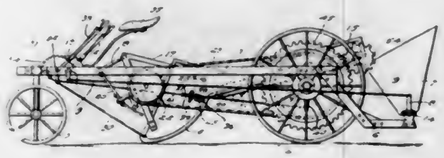
1,625,557. EXPANSION JOINT. JOHN P. MCDONALD, Austin, Tex. Filed May 17, 1924. Serial No. 714,083. 1 Claim. (Cl. 94—18.)

A method of constructing expansion joints for concrete road sections consisting in placing a sawdust filler between the adjacent ends of sections, and at the bottom of the space between the sections, leaving a space between the upper surface of the sawdust filler and upper surface of the road sections, and finally filling in bituminous material until the bituminous material engages the sawdust and the upper edge of the bituminous material is level with the upper surfaces of the road sections.



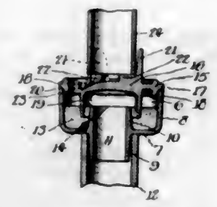
1,625,558. CUSHION TIRE. JOHN MCILWAINE, Virden, Ill. Filed June 25, 1926. Serial No. 118,532. 3 Claims. (Cl. 152—8.)

2. In a cushion wheel, a rim, plates thereon having curved outer edges, a tire casing having beads engaged by the edges of the plates for anchoring it to the rim, a plurality of tread plates hingedly connected and embraced



by the casing, yieldable means for holding the tread plates in spaced relation to the rim, said means comprising springs anchored between their ends to the rim, the said springs having angularly disposed ends, blocks secured to the plates between the pivots, said blocks having cavities therein, and anti-friction elements rotatable in the cavities engaged by the angularly disposed ends of the springs.

1,625,559. WRENCH. BERNARD LYNN MCNERNEY, Minneapolis, Minn. Filed Oct. 22, 1924. Serial No. 745,133. 2 Claims. (Cl. 81—127.)

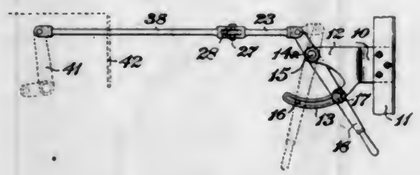


1. In a wrench, a pair of head members, each comprising a shank and a right-angular jaw reaching forwardly thereof, the shank of one member being formed with a way in the front edge thereof and also formed with an elongated opening therethrough at the rear thereof, said opening paralleling said way and communicating therewith, the shank of the second member fitting said way in the shank of the first member and slidable therein, there being rearwardly projecting rack teeth at the rear edge of said shank, there being rack teeth projecting forwardly from the rear wall of the opening in the shank of the first member, a gear located in said opening and meshing at its forward and rear sides with said first and second rack teeth respectively, a handle bifurcated at one end thereof, the branches of said handle straddling the shank of said first member and formed with opposed annular bosses on the inner sides thereof, the rims of said bosses riding against the outer margins of the forward and rear walls of said elongated opening and the margins of the faces of said bosses bearing against the ends of the rack teeth on both shanks, said gear being fixed to the handle between and in axial alinement with the bosses thereon, said handle serving to turn and guide the gear and said gear serving, through coaction with said rack teeth, to relatively shift the head members and open and close said jaws.

1,625,560. STONE PICKER. HERBERT MORRIS, South Valley, N. Y. Filed Mar. 29, 1924. Serial No. 702,834. 1 Claim. (Cl. 55—17.)

A picking machine of the character specified comprising a main frame having a rear depressed portion, a bucket, a shaft rigid with the bucket and journaled on said portion, gathering mechanism carried by the machine including an elevator, said bucket being arranged to receive material from the elevator, a crank extending from said shaft, and an operative connection for said crank whereby the bucket may be tilted for emptying and may be secured in normal receiving position.

1,625,561. DRAIN TRAP. NEWTON MORRIS, Fond du Lac, Wis. Filed Apr. 21, 1926. Serial No. 103,490. 2 Claims. (Cl. 182—8.)

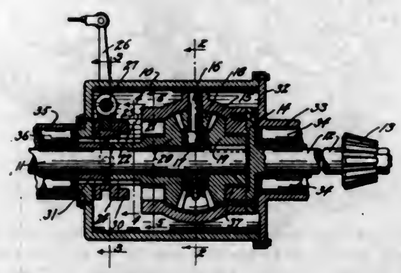


1. A drain trap comprising, a two part construction having in combination, a cup having an outlet above the bottom thereof, and a cover element supported solely on the lip of the cup, said cover element including a sealing bell, means upstanding from the surface of said bell to space a drain pipe therefrom and a plurality of upstanding prongs adapted to engage said drain pipe.

1,625,562. MANUFACTURE OF ARTIFICIAL SILK AND THE LIKE. FREDERICK CARL NIEDERHAUSER and ALFRED ERNEST SUNDERLAND, Roanoke, Va., assignors to The Viscose Company, Marcus Hook, Pa., a Corporation of Pennsylvania. Filed Nov. 9, 1920. Serial No. 422,783. 5 Claims. (Cl. 18—54.)

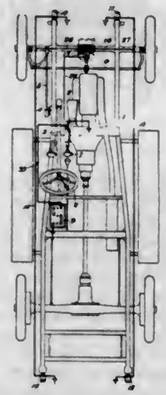
1. In the manufacture of cellulose products from a cellulosic solution, a setting bath into which the solution is projected and from which the "set" product is withdrawn, said bath comprising a crystalline reagent and a soluble colloid serving to materially retard the crystallization of said reagent in the "set" product withdrawn from the bath.

1,625,563. THROTTLE-CONTROL MECHANISM. JOHN S. PAYNE, Midland Park, N. J. Filed Sept. 17, 1926. Serial No. 136,048. 4 Claims. (Cl. 74—39.)



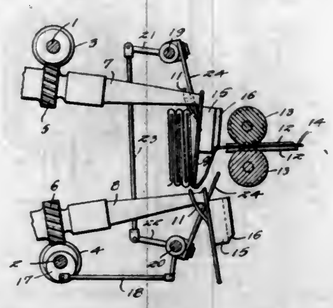
1. In a throttle control mechanism for railroad vehicles, the combination of a throttle operating lever: a reach rod, connected thereto; a floating lever, connected intermediate its ends, to the reach rod; a shaft; means for rotatably supporting said shaft; a hand lever, rigidly secured to the shaft; an arm, rigidly secured to the shaft; a link, connecting the arm and floating lever; a hand lever, rotatably mounted on the shaft, and comprising a hand arm and a link arm; and a link, connecting the link arm and the floating lever.

1,625,564. TRANSMISSION GEAR. GURDON T. POLLARD, Denver, Colo. Filed Apr. 15, 1926. Serial No. 102,172. 2 Claims. (Cl. 74—34.)



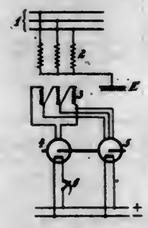
1. A transmission mechanism for transmitting power from a first shaft to a second shaft comprising a member secured to the extremity of said second shaft and extending around the extremity of said first shaft; planet

gears carried in said member; a gear carried on said first shaft adapted to engage said planet gears; means for causing said planet gears to selectively rotate either around or with said first shaft, said means comprising a sun gear rotatably mounted on said first shaft and maintained in engagement with said planet gears; and means adapted



to cause said sun gear to rotate with said member or remain stationary as desired, said means comprising a rigid support; a toothed clutch slidably carried on said sun gear and arranged to rotate therewith, said clutch having means for engaging said member or engaging said rigid support at will.

1,625,565. SIGNALING AND DIRECTION-INDICATING APPARATUS FOR AUTOMOBILES. ABRAHAM ROSENBERG and WILLIAM OLLINGER, New York, N. Y., assignors to F. Thomas Moore, Washington, D. C. Filed Feb. 10, 1922. Serial No. 535,551. 1 Claim. (Cl. 177—389.)

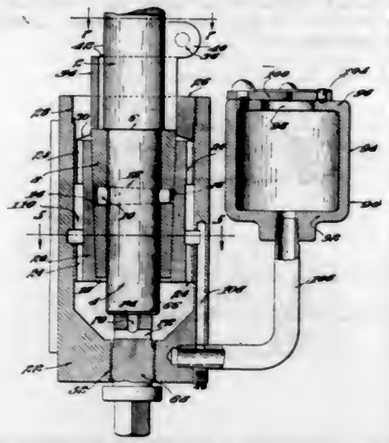


In an electric signaling system for a vehicle having a steering mechanism and a brake mechanism; the combination of a right direction signal, a left direction signal, a switch having two stationary contacts, a conductor between each stationary contact and one of the signals respectively, a movable contact member in the switch including means for contacting either one of the stationary contacts singly when moved to either side of a neutral position, and for contacting both stationary contacts simultaneously when in neutral position, means actuating the movable contact member upon movement of the steering mechanism and means electrically energizing the movable contact member upon actuation of the brake mechanism.

1,625,566. FOLDING MACHINE. DUNBAR A. ROSENTHAL and COURTNEY P. WINTER, Chambersburg, Pa., assignors to United States Paper Mills, Inc., Chambersburg, Pa. Filed Dec. 3, 1926. Serial No. 152,501. 25 Claims. (Cl. 270—89.)

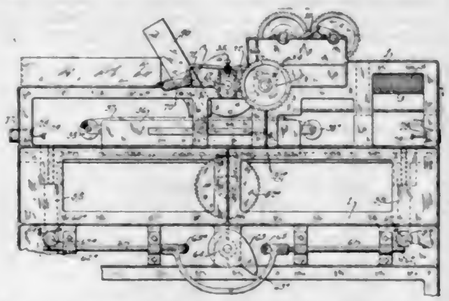
1. In a folding machine of the class described, a plurality of opposed rotatable tucking blades for folding material fed thereto, the axes of said blades being out of alinement.

1,625,567. DEVICE FOR NEUTRALIZING THE HIGHER HARMONICS IN HIGH-VOLTAGE-LINE PLANTS. REINHOLD RÜDENBERG, Berlin-Charlottenburg, and KARL KUBDA, Nuremberg, Germany, assignors to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany, a Corporation of Germany. Filed May 6, 1922, Serial No. 558,936, and in Germany Sept. 10, 1921. 2 Claims. (Cl. 172—237.)



1. In combination with a high-voltage supply line system, means for absorbing the higher harmonics generated therein, comprising a higher harmonic field generator suitably connected into said line system and means for synchronously driving said generator from said line system to produce higher harmonic electromotive forces of a frequency, phase and value equal to similar forces generated in the line system.

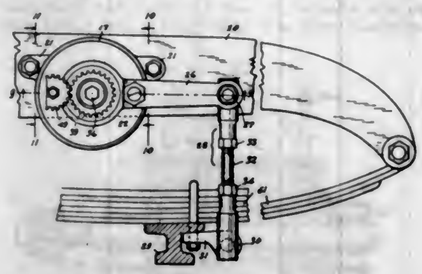
1,625,568. BEARING. WESLEY J. SHAW, Haverhill, Mass., assignor to New England Wood Heel Co., Haverhill, Mass., a Corporation of Massachusetts. Filed Jan. 20, 1923. Serial No. 613,857. 6 Claims. (Cl. 308—732.)



3. A device of the class described, having, in combination, an internally screw-threaded tube, a bushing in the tube having a tapered bore, an expansible annular nut threaded in the tube in contact with the bushing, an expansible collar within the annular nut, a tapered shaft

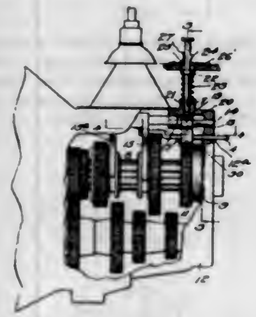
extending into the tube through the expansible collar bearing against the walls of the tapered bore, and means

for expanding the expansible collar to expand the nut into close engagement with the interior walls of the tube.



1,625,569. AUTOMATIC PRINTING PRESS. ABE J. SHICKMAN, WALTER A. THUM, and WILLIAM L. DEMPSEY, St. Louis, Mo.; said Thum and said Dempsey assignors to said Shickman. Filed Oct. 30, 1924. Serial No. 746,764. 2 Claims. (Cl. 101—55.)

1. An automatic printing press of the class described, comprising in combination, an automatic paper sheet feeding medium provided with a spring and cam-actuated means for imparting accelerated motion to a sheet of paper at the instant it is being fed to a rotatable printing roll having gripping means for securely holding in a predetermined adjusted position the sheets of paper thus accelerated, a reciprocating form-carrying frame adapted to rest for a period of time at each end of its inward and outward movement, automatic means for elevating said form-carrying frame during one of said periods of rest, means for rigidly holding said form-carrying frame in an elevated position during one full stroke, means for depressing said form-carrying, reciprocating frame during each alternate stroke of said frame.

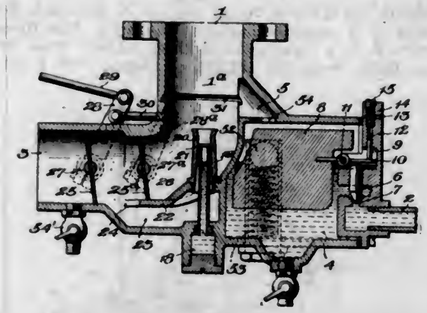


1,625,570. SHOCK-ABSORBING DEVICE. BENJAMIN F. SHIELDS, CHARLES G. CROMBIE, and GEORGE A. WINDELL, Seattle, Wash. Filed May 15, 1923. Serial No. 639,083. 23 Claims. (Cl. 188—130.)

1. A shock absorber embodying a mounting member; a rotary member operatively disposed in said mounting member; a brake shoe operatively mounted between said mounting and said rotary members; a cam pin which actuates said brake shoe, said mounting and rotary members forming a housing and completely enclosing said shoe and pin; gear means fixedly mounted on said cam

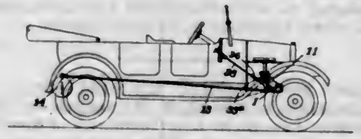
pin; and gear means, intermeshing with said pin gear means, fixedly mounted upon and borne by said mounting member, whereby relative movement between said mounting and rotary members may be imparted to said cam pin.

1,625,571. STOP FOR ROTATING PARTS. EDWARD M. SHINKLE, U. S. Army, Honolulu, Territory of Hawaii. Filed June 15, 1926. Serial No. 116,214. 13 Claims. (Cl. 192—4.)



2. In a device of the character described, the combination with a rotating element, of a double ended pawl member pivotally mounted adjacent the said element, means on said element adapted to be engaged by either end of said pawl, means carried by said pawl for rotating the same in an opposite direction to the rotation of said element, and means for positively positioning said pawl to prevent revolution of said element in one direction.

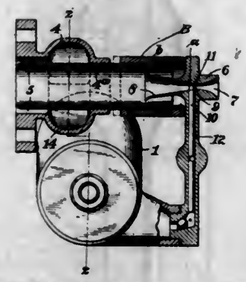
1,625,572. CARBURETOR. WARD T. SIMPSON, Detroit, Mich., assignor, by mesne assignments, to Albert G. Dickinson, Grand Rapids, Mich. Filed Sept. 4, 1918. Serial No. 252,559. 1 Claim. (Cl. 261—46.)



In combination in a carburetor, a housing, a mixing chamber, a fuel chamber closed to atmosphere and in open communication with the mixing chamber in order to subject the fuel chamber to the vacuum created by the engine to draw thereinto fuel from a main supply at a lower level than the carburetor, and an ejector for delivering fuel to the mixing chamber and capable of such delivery against the vacuum existing in the fuel chamber, said ejector having a central fuel tube and a primary air tube, said fuel tube being confined closely throughout a considerable portion of its length within the primary air tube which extends slightly beyond the fuel tube and which has its inside bore slightly tapered toward its upper end, the passage between fuel tube and

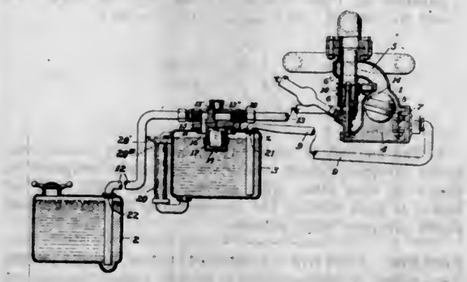
its surrounding tube contributing to the primary air a high velocity and confining it close against the wall of the fuel tube throughout that portion of said fuel tube which is coextensive with the said primary air tube, and the space between the primary air tube and the housing

forming a secondary air passage, the form of both passages being such that air rushing through them induces cones of intense depression over the fuel tube, and two anterior throttle valves operating in seriatim order to control air to the primary and secondary air passages, substantially as described.



1,625,573. CARBURETOR. WARD T. SIMPSON, Ann Arbor, Mich., assignor, by mesne assignments, to Albert G. Dickinson, Grand Rapids, Mich. Filed Oct. 21, 1920. Serial No. 418,417. 14 Claims. (Cl. 261—72.)

1. A fuel supply system for internal combustion engines, comprising a fuel chamber to receive fuel from a lower level tank, a float valve controlling said supply, a mixing chamber in communication at one end with the engine intake, a fuel ejector extending into the other end of the mixing chamber and connected with the fuel chamber, said fuel chamber having communication above its fuel level with the engine intake to be subjected to the vacuum depression of the engine intake, a valve seat arranged opposite and spaced apart from the end of the mixing chamber where the ejector is located to leave an annular air inlet space, and a sleeve valve movable in relation to said mixing chamber from its closed position against said seat, said ejector, mixing chamber, engine intake, and valve being axially in line, and the air tube of said ejector having an outwardly flaring upper end to make a restricted space between itself and the mixing chamber wall, in order to give greater velocity to the secondary air, thus intensifying the degree of vacuum induced by same over the fuel tube, substantially as described.

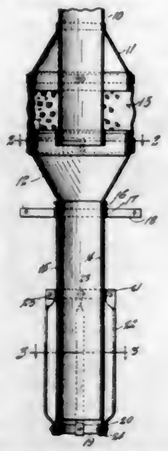


1,625,574. CARBURETOR. WARD T. SIMPSON, Grand Rapids, Mich., assignor, by mesne assignments, to Albert G. Dickinson, Grand Rapids, Mich. Filed Oct. 21, 1920, Serial No. 418,422. Renewed Feb. 2, 1927. 2 Claims. (Cl. 261—64.)

1. In a carburetor, the combination of a fuel bowl having an upward extension with a tube extending horizontally through said extension, supported by the wall thereof and forming between itself and a part of said extension a surrounding chamber 4 and with a restricted annular passage 5, a ring shaped throttle valve slidably mounted on the extension of said horizontal tube, a bracket extending from the lower part of the fuel bowl upwardly and having a seat portion opposite the said

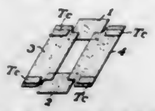
horizontal tube and serving as a seat for the ring shaped throttle valve, a nozzle extending from said seat portion into the horizontal tube, said nozzle having its central opening continued through the seat portion, and an oil supply conduit extending through the bracket and discharging into the nozzle, substantially as described.

1,625,575. CARBURETOR AND FUEL-FEEDING SYSTEM THEREFOR. WARD T. SIMPSON, Ann Arbor, Mich., assignor, by mesne assignments, to Albert G. Dickinson, Grand Rapids, Mich. Filed Oct. 21, 1920. Serial No. 418,423. Renewed Mar. 16, 1925. 5 Claims. (Cl. 158—36.1.)



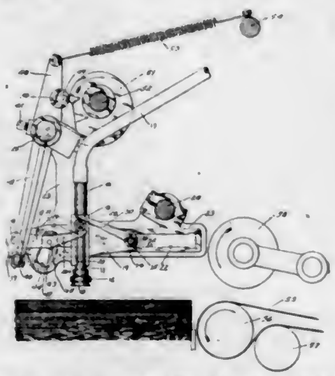
1. In combination in a fuel feed system for automobiles, a carburetor of the vacuum feed type having its fuel chamber subjected to the vacuum depression from the manifold, a main fuel tank, a tank intermediate the main tank and the carburetor, a pipe for supplying fuel from the main tank to the intermediate tank, a pipe extending from the lower part of the intermediate tank to the fuel chamber of the carburetor, a float valve in the fuel chamber controlling the inlet from the said last mentioned pipe, a second pipe connected with the carburetor at a point where there is less vacuum than in the fuel chamber, and with the intermediate tank through a port at the top of the latter whereby there will be a preponderance of vacuum depression in the fuel chamber in respect to that in the intermediate tank and a float valve controlling said port, for cutting off communication between the said intermediate tank and the carburetor through said port, substantially as described.

1,625,576. TELESCOPING SUCTION PIPE. GROVER C. STACY, Dallas, Tex. Filed Mar. 9, 1926. Serial No. 93,430. 2 Claims. (Cl. 193—30.)



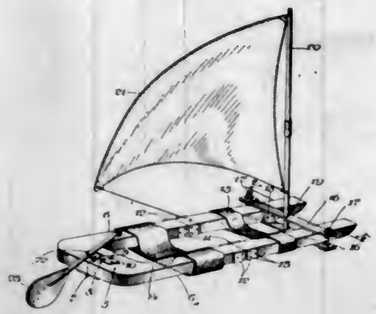
1. In an elevator telescope, a depending pipe, a sleeve telescoping on the pipe, a stop ring at the upper end of the pipe receiving the thrust of the sleeve, a reinforcing

member in the lower end of the sleeve, a supporting ring surrounding the sleeve, guard bars having their upper ends secured to the supporting ring and offset from



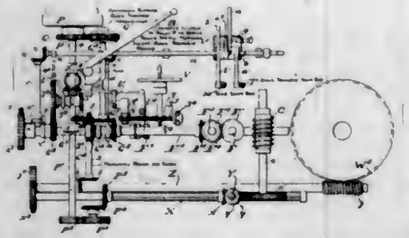
the sleeve, and stirrups on the lower ends of the bars engaging around the lower end of the sleeve and the reinforcing member therein.

1,625,577. METHOD OF ASSEMBLING, TABBING, AND APPLYING COMPOSITE BOX WRAPPERS. JOHN S. STOKES, Huntington Valley, Pa., assignor to Stokes and Smith Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Feb. 18, 1926. Serial No. 89,127. 20 Claims. (Cl. 93—36.)



1. The method of preparing an adhesively coated composite wrapper, which comprises attaching wrapper elements to each other with adhesive, and while said adhesive is fluid coating the box-engaging face of the composite wrapper with adhesive.

1,625,578. SUCTION SHEET-PICK-UP MECHANISM. CHARLES W. TREMPER, New Haven, Conn., assignor, by mesne assignments, to The Tremper-Shields Company, New Haven, Conn., a Corporation of Connecticut. Filed Nov. 6, 1926. Serial No. 146,689. 12 Claims. (Cl. 271—26.)

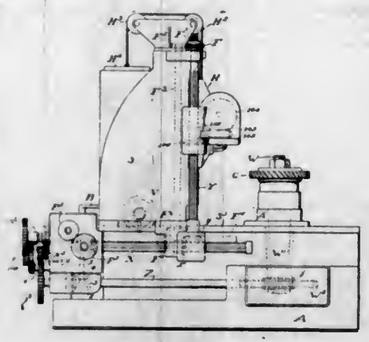


1. A sheet-pick-up mechanism, having a plurality of suction pick-up members, and yielding means for depressing such members into engagement with the sheet and for thereafter counteracting the lifting action of the suction, whereby the lifting and canting of the sheet by suction is prevented.

1,625,579. BATHING BOAT. PHILIP N. WALTERS, New York, N. Y., assignor to Gaco Corporation, East Greenwich, R. I., a Corporation of Rhode Island. Filed July 14, 1926. Serial No. 122,297. 5 Claims. (Cl. 9—21.)

5. A bathing boat comprising a substantially U-shaped buoyant body composed of a sectional transverse stern member and sectional elongated side members extending therefrom, a hinge connection on the under side of the adjoining ends of the stern sections, a pair of hinge leaves on the upper side of the stern member at the adjoining ends of its sections, a detachable pin for said leaves, hinge connections on the inner sides of the adjoining ends of the respective side sections, flexible material loosely connecting the side members, and a rigid tie connection for the forward sections of the side members.

1,625,580. SPUR-HOBBING MACHINE. WILLIAM F. ZIMMERMANN, Maplewood, N. J., assignor to Gould & Eberhardt, Newark, N. J., a Corporation of New Jersey. Filed Aug. 27, 1924. Serial No. 734,487. 24 Claims. (Cl. 90—4.)



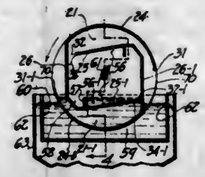
1. A hobber combining a head; a quick-transverse mechanism; a manual control normally available for causing said mechanism quickly to transverse said head in either of two opposite directions; and an interlock positionable by said head when adjacent a predetermined zone to prevent said control from being so actuated as to cause said head to enter said zone at a quick traverse rate.

1,625,581. FIXED-ANGLE HELICAL-GEAR HOBBER. WILLIAM F. ZIMMERMANN, Maplewood, N. J., assignor to Gould & Eberhardt, Newark, N. J., a Corporation of New Jersey. Filed Jan. 23, 1925. Serial No. 4,207. 27 Claims. (Cl. 90—4.)

1. A balanced-drive hobbing-machine comprising a bed; a relatively heavy stanchion shiftably supported thereon;

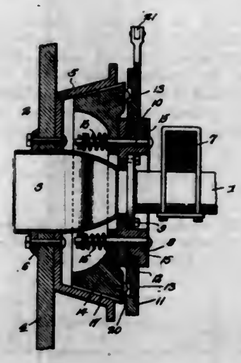
a work-supporting spindle non-shiftably journaled in said bed near one end thereof; an intermediate splined shaft and a parallel transmission shaft, each journaled on said bed transversely to said spindle; two pairs of spur change-gears connecting said two shafts; a splined transmission shaft journaled on said stanchion parallel with said spindle; a head slidable on said stanchion; a hob-supporting spindle on said head, said hob-spindle being inclined at a major angle of about a third to an eighth

of a quadrant; means for effecting a minor adjustment of a few degrees of said major angle; two pairs of angle-gears connecting said hob-spindle with said splined transmission shaft, one of said angle-gears being splined to said shaft; a pair of angle-gears connecting said shaft to said intermediate shaft, one of said gears being splined to said intermediate shaft; and a pair of angle gears connecting said parallel transmission shaft with said non-shiftable work-spindle.



1,625,582. FLEXIBLE HOLLOW ARTICLES AND METHOD OF MAKING THE SAME. ARVID E. ANDERSON, Chicago, Ill., assignor to Airubber Corporation, Chicago, Ill., a Corporation of Illinois. Filed Nov. 10, 1924. Serial No. 748,881. 20 Claims. (Cl. 154—2.)

4. The method of making hollow articles, which consists in cutting sheets having faces of unvulcanized rubber to blanks of the desired size and shape, placing said blanks with their rubber faces face to face, and applying a vulcanizing heat to the blanks and simultaneously applying pressure to the exteriors of the blanks along the peripheries thereof and compressing the rubber faces and uniting the same in a vulcanized joint of less thickness than the combined thickness of the two blanks around the periphery of the article and along the line of pressure applied thereto, said pressure extruding rubber of each face in a fillet extending along the inner edge of the peripheral joint.

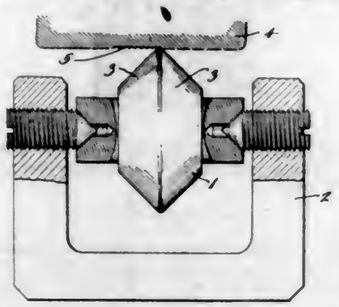


1,625,583. FLOW METER. CHARLES M. ANDERSON, Salt Lake City, Utah. Filed Sept. 1, 1926. Serial No. 133,069. 12 Claims. (Cl. 73—37.)

1. A flow meter comprising a rotor having measuring buckets spaced around the axis thereof, a walled liquid supply compartment arranged longitudinally adjacent said buckets, means for conducting liquid from said compartment to said buckets, and balancing pockets arranged

to retard the action of said rotor each time a measuring bucket registers with the level of a liquid flowing through the said rotor.

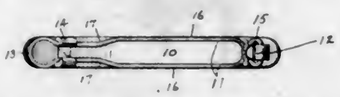
1,625,584. BRAKE. MERVYN FRANCIS ANDERSON and THEODORE FAUROT CLARK, Hoboken, N. J. Filed Feb. 5, 1926. Serial No. 86,272. 3 Claims. (Cl. 188—71.)



1. In a brake and in combination, a tapered female member for connection to a rotary element, an anchor member having a circumferential groove the bottom of which is stepped, a tapered male member held against turning and movable laterally with respect to the anchor member and having rounded protuberances at its side remote from the female member, spring means for moving the male member in a direction away from the female member, and an annular turnable thrust member arranged in the circumferential groove of the anchor member and having its inner edge stepped and also having in its face confronting the male member grooves for cooperation with said protuberances; the said tapered male member having on its perimeter diagonal spaced strips of brake lining.

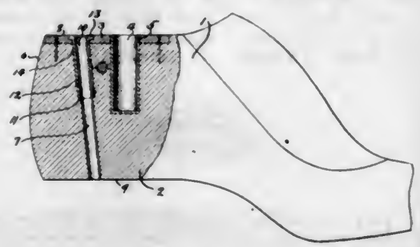
1,625,585. CORE FOR SPOOLS, REELS, BOBBINS, AND THE LIKE. HARRY W. ARCHER, New Haven, Conn., assignor to The Acme Wire Co., New Haven, Conn., a Corporation. Filed Feb. 15, 1926. Serial No. 88,261. 4 Claims. (Cl. 242—68.)

1. As a new article of manufacture, a skeleton core for spools, reels, and the like, comprising a substantially-tubular arbor-receiving body provided with integral diverging longitudinally-disposed spool-supporting vanes separated one from the other throughout their length by open spaces.



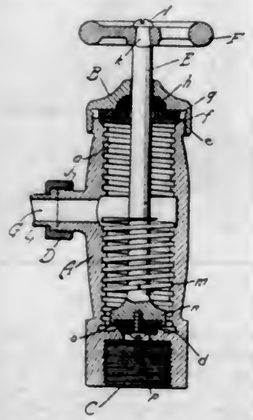
1,625,586. METHOD AND APPARATUS FOR PRODUCING FILMS FOR COLOR PHOTOGRAPHY. JEAN AUDIBERT, Villeurbanne, France, assignor to The Corporation Société des Films en Couleur Keller Dorain of France. Filed Dec. 9, 1926, Serial No. 153,689, and in France Dec. 4, 1925. 6 Claims. (Cl. 41—25.)

3. The method of embossing plastic materials which comprises rolling a tool having a polished working surface over a polished cylinder, and rolling the polished cylinder over the plastic material.



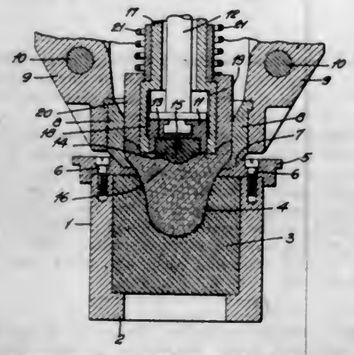
5. A film suitable for use in color photography, comprising a transparent base provided on one side with a series of contiguous lenticular refracting ridges disposed at an angle to the axis of the film.

1,625,587. BARRETTE. WILLIAM T. BATTLE, Providence, R. I., assignor to George F. Berkander, Providence, R. I. Filed Mar. 31, 1925. Serial No. 19,586. 1 Claim. (Cl. 132—48.)



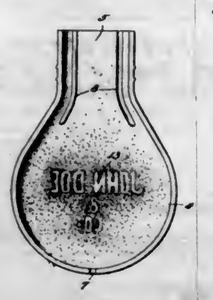
A barrette comprising a body member, a catch thereon having a receptive opening consisting of angularly disposed side walls and a locking seat consisting of a rounded base and side walls, disposed substantially at right angles to the side walls of the receptive opening, and a resilient pin comprising an endless wire loop hingedly connected to the said body member and having substantially parallel side members, the free end of the said loop being tempered whereby it may be forced inside of and released from the interior of the said catch on the body member.

1,625,588. LAST. WILLIAM P. BECKER, Pelham, N. Y., assignor to The New York Last Company, New York, N. Y., a Corporation of New York. Filed Feb. 19, 1926. Serial No. 89,288. 1 Claim. (Cl. 12—139.)



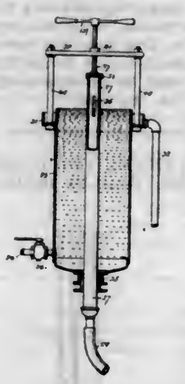
A last comprising a wooden heel structure, said heel being provided with a bore extending vertically thereof from the upper face thereof to and through the lower or bottom face, an internal shoulder in said bore intermediate the ends thereof, a resilient pad on the upper face of said last, and a headed metal ferrule lying in said bore and provided with integral means for preventing withdrawal, the lower end of the ferrule terminating short of the bottom face of the last and abutting said shoulder, the head resting upon and being set into said pad.

1,625,589. SILENCER OR FLOW REGULATOR FOR VALVES, FAUCETS, AND THE LIKE. RALPH E. BLETCHER and ERNEST H. BUCKNELL, Los Angeles, Calif. Filed Jan. 25, 1926. Serial No. 83,591. 3 Claims. (Cl. 251—35.)



3. In a device of the character described, a body member provided with an inlet port and an outlet port, a deep threaded member therein threadedly engaging said body member and provided with a valve head on one end, and external means for actuating said member for retarding and accelerating the flow of liquid through said device and for completely closing the said inlet port; said threaded member being adapted for the flow of liquid through a circuitous path formed by its thread.

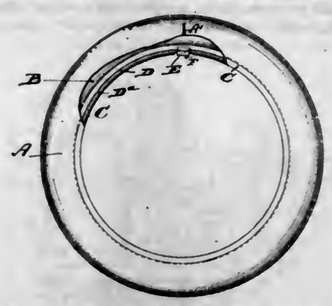
1,625,590. APPARATUS FOR SHAPING GLASSWARE. ROBERT W. CANFIELD, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed June 26, 1926. Serial No. 118,743. 7 Claims. (Cl. 49—35.)



1. A press mold for making glass blanks for paste-mold glassware, comprising a mold body of carbon material having sufficient thermal conductivity to mold molten glass without sticking thereto.

1,625,591. MASK FOR ELECTRIC-LIGHT BULBS. EARL G. CHASE, Smethport, Pa. Filed Mar. 3, 1926. Serial No. 92,041. 3 Claims. (Cl. 240—48.6.)

1. A mask for electric light bulbs, of a size to leave a space between the bulb and mask for the circulation of air, and comprising complemental longitudinal sections including body and neck portions, and having inner grooves forming passage ways in the neck portion projecting beyond the shoulder between the body and neck for the escape of heated air from the space formed between the body portion of the bulb and mask.

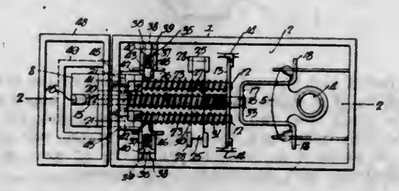


1,625,592. LIQUID-MIXING APPARATUS. ELLSWORTH THOMAS CONANT and LAURENCE SORENSON MCLANE, Honomu, Territory of Hawaii. Filed Dec. 1, 1924. Serial No. 753,401. 3 Claims. (Cl. 137—21.)

1. In an apparatus of the character described, a container having an open top to permit the free overflow of liquid therefrom, means to maintain a supply of liquid to the container and maintain a constant overflow, a discharge pipe from said container, said discharge pipe having a vertically disposed opening, and means to vertically adjust the discharge pipe to submerge more or less of said opening.

1,625,593. TIRE COVER. LESTER H. CROSS, Detroit, Mich., assignor to C. M. Smillie & Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 19, 1926. Serial No. 149,320. 4 Claims. (Cl. 150—54.)

1. In a device of the character described, a tire cover; a coiled spring having its ends connected together to form a ring lodged in a hem of the cover; a rod housed within the spring ring having one end only attached to the spring; means adapted to engage said rod, whereby upon

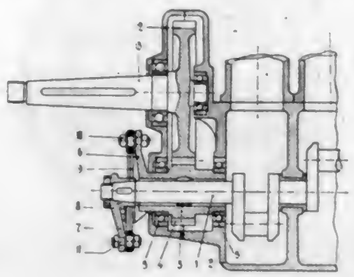


distending the spring to open the cover the spring may be held distended by the rod while engaged by said means until manually released.

1,625,594. BOTTLE CLOSURE. HARRY DE WALLACE, Syracuse, N. Y., assignor to Wallace M. Weeks and John A. Pease, Skaneateles, N. Y. Filed Aug. 16, 1926. Serial No. 129,569. 3 Claims. (Cl. 215—38.)

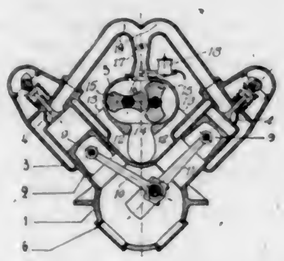
1. A bottle closure comprising a disk having a thick stiff central portion and having a portion beyond the central portion compressed to a degree to provide a thin pliable member which is curved to engage over the bead of a bottle mouth and which is integral with the central portion, said member being bent upwardly at its inner side to abut the periphery of the thick stiff central portion so as to receive support therefrom.

1,625,595. LOCK AND LATCH. OSCAR A. EASTLACK, Camden, N. J. Filed Nov. 28, 1921. Serial No. 518,192. 8 Claims. (Cl. 70—29.)



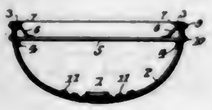
1. The combination with a casing of a bolt slidable therein and adapted in an advanced position to project beyond the side of said casing, a single retracting element slidable within said bolt in a direction coincident with the movement of said bolt and normally projecting beyond the face of said bolt, means for limiting the relative movement between the retracting element and the bolt, and means engaging said retracting element for effecting initial relative movement between the retracting element and the bolt and subsequent concurrent movement of the retracting element and the bolt, to effect retraction of the bolt to a position within the casing.

1,625,596. SPEED REDUCER FOR INTERNAL-COMBUSTION ENGINES. GUIDO FORNACA, Turin, Italy. Filed Aug. 13, 1924, Serial No. 731,852, and in Italy Aug. 23, 1923. 1 Claim. (Cl. 74—7.)



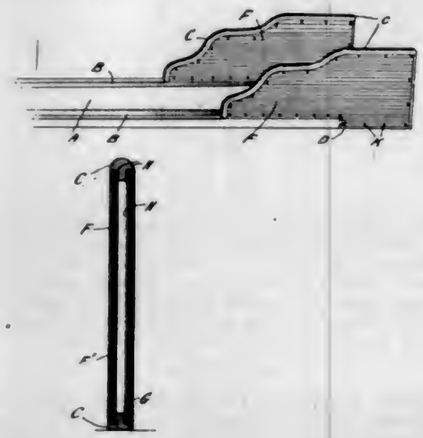
In a speed reducing mechanism, the combination with a casing, of driving and driven shafts projecting out-

wardly from the casing, a hollow counter-shaft mounted concentrically to the driving shaft, an antifriction bearing for the counter shaft, a spherical journal supporting the driving shaft within the counter shaft, radial arms



fixed on the outer end of the driving shaft, radial arms fixed on the counter shaft, and a flexible member connecting the arms of one shaft to the arm of the other shaft.

1,625,597. FORCED-FEED INTERNAL-COMBUSTION ENGINE. GUIDO FORNACA, Turin, Italy. Filed Dec. 18, 1924, Serial No. 756,762, and in Italy Dec. 22, 1923. 1 Claim. (Cl. 123—55.)



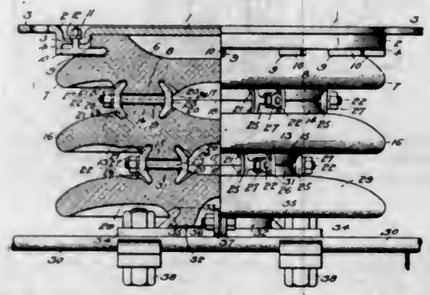
A forced feed internal combustion engine of the V-type consisting of a single casting comprising the upper part of the crank case, two cylinders, and the casing for the forced feed compressor arranged between the two cylinders to which it is connected by means of webs which constitute air inlet conduits to the compressor.

1,625,598. ALUMINUM BOAT. FRED L. FRIET and JOSEPH FRIET, Parkers Prairie, Minn. Filed Oct. 14, 1926. Serial No. 141,601. 2 Claims. (Cl. 9—6.)

1. A boat structure comprising a hull, ribs disposed transversely thereof in spaced relation, gunwale strips applied to the inner surfaces of the ribs and disposed longitudinally of the hull below the edges thereof, a seat board resting at its ends upon the gunwale strips and having end edges bearing against the inner surfaces of the ribs and outer gunwale strips applied to the exterior surface of the hull and disposed longitudinally thereof, and opposite the ends of the seat board.

1,625,599. KICK BACK FOR BOWLING ALLEYS. FREDERICK GESSERT, Jamaica, N. Y. Filed Jan. 8, 1927. Serial No. 159,821. 9 Claims. (Cl. 273—54.)

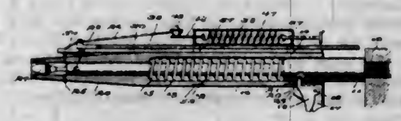
2. In a bowling alley, a kick-back comprising a supporting frame, provided with parallel faces on opposite sides thereof for supporting kick-back boards for adjacent alleys, kick-back boards, both surfaces of which are adapted for use as kick-back, and means for removably securing said kickback boards to the frame, the arrangement being such that by interchanging the boards both surfaces thereof may be used.



1,625,600. WHIPSTOCK. FRED I. GETTY, Jennings, La. Filed Apr. 6, 1926. Serial No. 100,112. 6 Claims. (Cl. 255—1.)

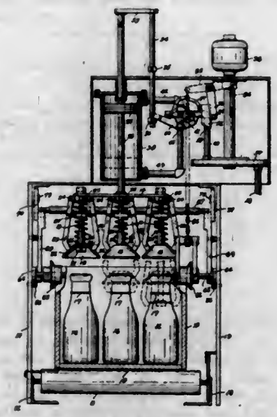
1. A whipstock comprising an elongated body adapted to be rigidly seated in a well casing, said body comprising

a tapered portion, a concave surface carried by said tapered portion extending substantially from side to side of the interior of the casing when the tool is seated therein, said surface terminating at its lower end in an abrupt outward curve whereby to maintain contact with the cutting tool.



1,625,601. INSULATOR. WALTER T. GODDARD, Hamilton, Ontario, Canada, assignor to Locke Insulator Corporation, Baltimore, Md., a Corporation of Maryland. Filed Oct. 1, 1921. Serial No. 504,666. 8 Claims. (Cl. 173—318.)

4. Means for securing together a plurality of superposed insulator sections, comprising radially extending bolt members recessed into the contacting faces of the sections and having angularly disposed fingers at their inner ends anchored within the sections, retaining elements carried by said bolts anchored within the outer peripheries of the sections, and nuts on the outer ends of the bolts engaging said retaining elements.



7. In a high tension insulator, a metallic supporting section provided with an annular hub portion having a series of openings in the web of the hub, a disk-shaped section of insulating material provided with a series of radial openings engaging the supporting section within the annulus of the hub portion, and angular clamping members secured to the metallic member through the openings therein and having portions engaging within the openings in said insulating section to secure such sections together.

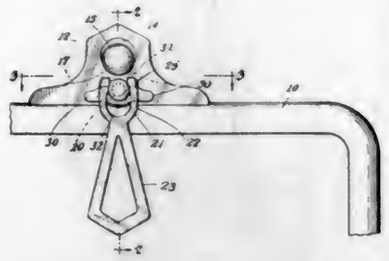
1,625,602. SURGICAL APPLIANCE. HAROLD G. GOULD and KYLE DIRIAS OSENSHAIN, McKinney, Tex. Filed Apr. 6, 1926. Serial No. 100,131. 18 Claims. (Cl. 128—326.)

1. A surgical appliance for tying ligatures, comprising a barrel, means slidably mounted in the barrel for clamping a tissue, means for holding a loose slip knot in embracing relation with the clamping means, means for removing the slip knot from the holding means and in embracing relation with the tissue, and means for drawing the knot up tight on said tissue.

1,625,603. CUTTER FOR MILK-BOTTLE SEAL RINGS. ALFRED C. GRISCOM, Sandy Hook, Conn., assignor to King Sanitary Pipe Cleaner Company, Sandy Hook, Conn., a Corporation of Connecticut. Filed Sept. 21, 1926. Serial No. 136,783. 18 Claims. (Cl. 140—144.)

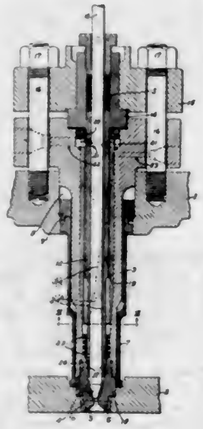
1. In a cutter for milk bottle seal rings, a conveyor for crates carrying a plurality of bottles, a cutter for the ring of each bottle, and means controlled by the crate for moving the cutters to cut the rings.

1,625,604. METHOD FOR CONSTRUCTING COUPLINGS FOR RHEOSTATS AND THE LIKE. FREDERICK C. HERSEE, Watertown, Mass. Filed Mar. 10, 1923. Serial No. 624,215. 2 Claims. (Cl. 204—8.)



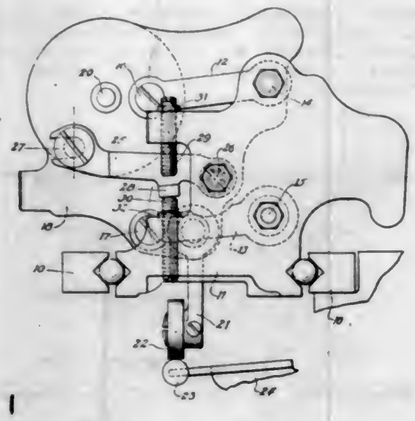
1. The method of constructing an electrical coupling comprising a lead wire and a cap nut molecularly united therewith, consisting of the provision of a master stem having an exteriorly threaded portion with a recess in one end thereof to receive a portion of the lead wire, the application of a protective coating to the exposed surface of the master stem for preventing molecular union of an electrodeposit therewith, and forming a cap nut by electro-deposit to enclose the said threaded portion of the master stem and a portion of the lead wire, said cap nut and lead wire being thereby constituted a unitary assembly for detachable association with a support.

1,625,605. BAG-FRAME FASTENER. WILLIAM C. HIERING, Newark, N. J., and EMIL J. WALTER, New York, N. Y., assignors to J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed July 31, 1924. Serial No. 729,234. 1 Claim. (Cl. 292—89.)



A combined catch and latch for bags, comprising in combination with a pair of hinged frames, of a raised flat plate secured at its edge to one of said frames, said plate containing a circular opening in its upper part, a second plate secured to the other frame parallel to the first plate, said second plate having a recess in its lower portion, a spherical knob on the second plate adapted to

be sprung through the opening in the first plate, a headed stem rotatable transversely in the first plate, a collar fixed on said stem, a channelled support embracing the first named plate, said support having an opening to guide said collar, a flat spring bowed outwardly to extend interjacent the head of said stem and support, stops on said



spring to positively limit inward movement of the stem, a flattened bail on said stem adapted to pass through the recess in the second plate when in one position and engage the outer surface of the plate when said stem is rotated into another position, and a handle pivoted in the head of said stem whereby it may be rotated.

1,625,606. FUEL INJECTOR FOR INTERNAL-COMBUSTION ENGINES. REINHARD HILDEBRAND, Webster Groves, Mo., assignor to Fulton Iron Works Company, St. Louis, Mo., a Corporation of Delaware. Filed Mar. 22, 1923. Serial No. 626,855. 2 Claims. (Cl. 128—33.)

1. In a fuel injector for internal combustion engines, a tubular housing having a fuel inlet, an air inlet and an outlet for the discharge of air and liquid fuel, a tube surrounded by and closely fitted to the inner face of said housing, said tube having a tapered end engaging a correspondingly tapered portion of said housing, a valve extending through said tube and seated in said outlet to control the discharge therefrom, said air inlet being in communication with said tube to provide for the delivery of compressed air therethrough, the outer face of said tube having a channel communicating with said fuel inlet and provided with discharge branches in said tapered end, and said discharge branches being directed toward said outlet to provide for the discharge of streams of liquid fuel in approximately the direction of flow of the compressed air.

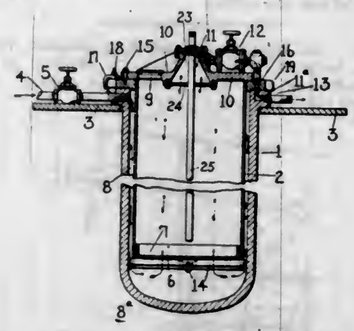
1,625,607. LIMIT STOP FOR SHIFTABLE PLATENS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed Apr. 28, 1923. Serial No. 635,273. 6 Claims. (Cl. 197—81.)

1. A typewriter having a member mounted thereon for case shift movement, a stop for limiting the movement of said member, lever mechanism for connecting said stop with said member and arranged to impart a reduced movement to said stop, and spaced abutment members for limiting the movement of said stop.

1,625,608. COMPOSITION FOR KILLING CERTAIN WEEDS. ROY T. HOLMES, Athens, Ga. Filed Oct. 6, 1924. Serial No. 742,071. 2 Claims. (Cl. 167—6.)

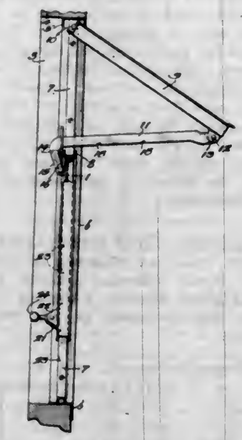
2. An exterminator for noxious weeds comprising an aqueous solution of sulphate of ammonium.

1,625,609. LINK BELTING. HENRY A. HOUSE, Bridgeport, Conn. Filed Feb. 8, 1924. Serial No. 691,331. 5 Claims. (Cl. 74—64.)



1. A link belting comprising friction sections, sheet metal plates, each plate at its opposite ends being bent outwardly upon itself and longitudinally slotted to provide a plurality of loops therein, spaced from each other transversally of the plates, the ends of the plates having extended prongs adapted to pass through the plate and connect the loops with the friction sections of the belting, the loops on one link adapted for interfitting engagement in the spaces between the loops in the adjacent link plate and rods extending through the loops.

1,625,610. METHOD OF FURNACING IN THERMO-CHEMICAL TREATMENT AND APPARATUS THEREFOR. CHARLES B. JACOBS, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 24, 1921. Serial No. 447,592. 12 Claims. (Cl. 23—79.)

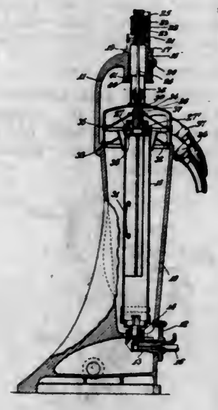


1. The method of furnacing, in the art of carrying on synthetic reactions by the thermo-chemical treatment by

the batch method of charges which shrink during treatment, which comprises, carrying on the treatment of a batch until a substantial shrinkage has occurred, adding

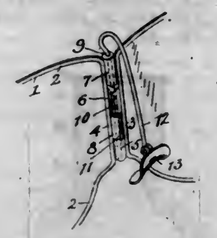
to the batch an augmenting charge at a time substantially prior to the completion of the treatment of the original batch, and treating the augmented batch until completion.

1,625,611. WINDOW. ARTHUR A. JAHR, Forest Park, Ill., assignor of one-half to August E. Schultz, Chicago, Ill. Filed Sept. 20, 1926. Serial No. 136,602. 14 Claims. (Cl. 189—66.)



1. The combination with a window having two sashes, one mounted to slide along the window frame and the other mounted to swing; of a link attached to the second sash and adjustably connected therealong with the first sash whereby the effective length of the link is adjustable to regulate the angularity of the sashes.

1,625,612. FASTENING DEVICE. CARL C. JENSEN, Chicago, Ill. Filed Apr. 5, 1926. Serial No. 99,785. 4 Claims. (Cl. 20—92.)

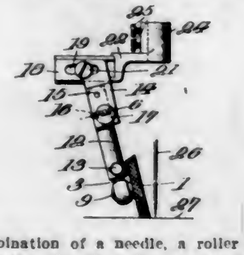


1. In combination with a pair of members to be joined, said members having mortises in their meeting ends of a fastening device comprising a pair of fastening elements, one fixedly secured in each mortise, said fastening elements having interlocking knuckles concealed within the members to be joined and a pin inserted through said interlocking knuckles to join said members and removable from said knuckles without relative movement between said members, said pin and knuckles co-operating to hold said members against relative movement without additional connections.

1,625,613. CENTRIFUGAL MACHINE. LEO D. JONES and ARTHUR U. AYRES, Philadelphia, Pa., assignors to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed Apr. 15, 1926. Serial No. 102,156. 26 Claims. (Cl. 233—13.)

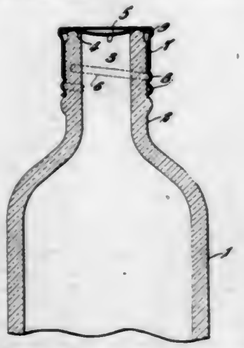
1. In a centrifugal machine, a casing, a bowl mounted in said casing, means to suspend and rotate said bowl, a discharge compartment supported by said casing and surrounding said bowl, and means to seal off said compartment from the atmosphere.

1,625,614. SPECTACLES. LOUISE C. KING, Cleveland, Ohio. Filed Oct. 5, 1923. Serial No. 666,665. 2 Claims. (Cl. 88—41.)



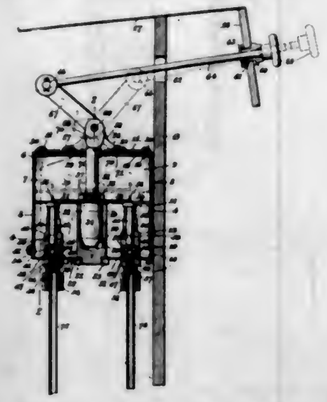
1. A device of the character described comprising a pair of closely adjoining rigid lenses each having a rim member secured to the edge thereof adjoining the other lens, interfitting hinge knuckles carried by the rim members, a hinge pin passing through the knuckles, a knuckle carried by one rim member having a shoulder engageable with the inner side of the other rim member and so positioned as to limit the inward pivotal movement of the lenses past a position in which the lenses are in alignment and a bridge carried by the hinge pin and adjustable toward and from the inner side of the hinge.

1,625,615. PLIERS. ANTHONY KUTTES, Alameda, Calif. Filed Feb. 13, 1926. Serial No. 88,001. 6 Claims. (Cl. 294—36.)



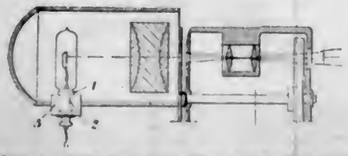
1. In a pliers, a member having a jaw portion and a handle portion, a second member pivotally secured to said first member and having a jaw portion arranged to cooperate with the jaw portion of said first member, a handle pivotally secured to said second member, and variably engageable cooperating means on said second handle and said first member adapted to cause the urging of said jaws together when said handles are urged together.

1,625,616. PRESSER FOOT FOR SEWING MACHINES. WILLIAM B. LONG, Chicago, Ill., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 14, 1923. Serial No. 680,670. 10 Claims. (Cl. 112—240.)



1. The combination of a needle, a roller presser foot, a supporting means for the roller presser foot including a presser bar, a bracket carried thereby, and bodily adjustable in a direction parallel with the direction of feed, a second bracket carried by said first-named bracket, and adjustable in a direction at right angles to the direction of feed, said second bracket having a depending portion, an arm pivoted to said depending portion and carrying said roller presser foot, and means for shifting said arm about this pivot and clamping said arm in adjusted positions.

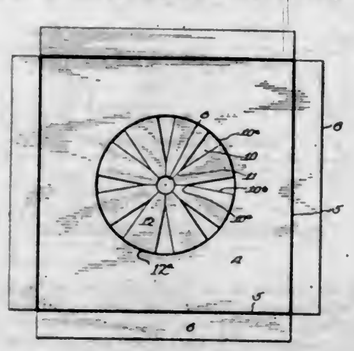
1,625,617. BOTTLE CLOSURE. CLARENCE D. LUKENS, St. Louis, Mo. Filed Feb. 23, 1924. Serial No. 694,698. 3 Claims. (Cl. 215—43.)



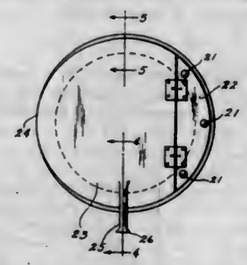
1. A bottle having the open end thereof provided with a finished rim, a cap of soft pliable and compressible metal adapted to close the open end and engage said rim, and a screw clamp adapted to apply pressure to said cap in order to firmly seat the same on said rim so that the rim will sink into the cap metal, whereby said cap is compressed and ironed on said rim to form its own gasket and seal the bottle.

1,625,618. OIL PUMP. ADOLPH W. F. MANZEL, Buffalo, N. Y., assignor to Manzel Bros. Co., Buffalo, N. Y., a Corporation of New York. Filed June 4, 1921. Serial No. 475,130. 27 Claims. (Cl. 184—27.)

27. A multiple-feed oil-pump comprising a plurality of oil-feeding devices, each oil-feeding device having a cylinder provided with an oil-inlet and an oil-outlet, and a plunger slidable in each cylinder, the plungers of said oil-feeding devices closing the oil-inlets to said cylinders when in normal position and means to move said plungers idly outwardly and then inwardly to and beyond said oil-inlets to feed oil through said outlets, the effective portions of the inward movement of certain of said plungers being greater than those of the remaining plungers and the range of movement of all of said plungers corresponding.



1,625,619. ELECTRIC LAMP FOR CINEMATOGRAPHIC APPARATUS. JACQUES MARETTE, Vincennes, France, assignor to Pathe Cinema, Anciens Etablissements Pathe Freres, Paris, France. Filed Aug. 8, 1922, Serial No. 580,507, and in France Dec. 5, 1921. 1 Claim. (Cl. 176—32.)

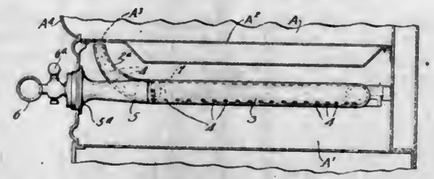


A lighting device for projection apparatus comprising an ordinary glow-lamp, a ring secured to the cap of said lamp and adapted to rest with its lower edge on the upper edge of the lamp-socket for ensuring automatically the exact position in height of the lamp filament and a lug secured on said ring extending longitudinally on said cap towards the lower part of said cap and adapted to engage into a recess provided in said lamp-socket for ensuring automatically the exact angular position of said filament.

1,625,620. PACKING UNIT FOR SHIPPING CASES. EDWARD E. MASTON, Chicago, Ill., assignor to Mid-West Box Company, Chicago, Ill., a Corporation of Indiana. Filed July 5, 1924. Serial No. 724,204. 2 Claims. (Cl. 217—27.)

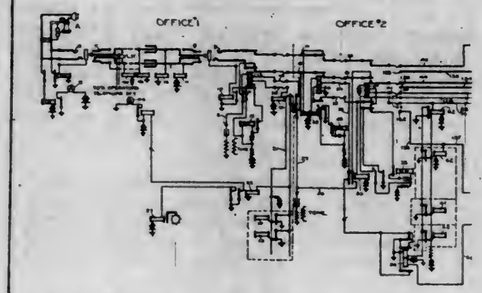
1. A packing unit for shipping cases consisting of a sheet of paper board having a substantially flat portion forming a partition, and marginal spacing flanges, the central portion of the partition being provided with integral radially extending tongues, flexible relatively to said flat portion, and with inwardly convergent openings cut therethrough between said tongues to space the outer ends of the tongues from one another to facilitate the flexing of said tongues.

1,625,621. HEADLIGHT SHIELD. EDWARD C. NEUENDORF, Wyandotte, Mich. Filed Apr. 9, 1924. Serial No. 705,156. 1 Claim. (Cl. 240—45.6.)



In combination with a vehicle headlight, adapted for use with a vehicle, and provided with a rim mounted thereon; a segment mounted on the face of said rim and adapted to project inwardly slightly of the opening of the same, the straight edge of said segment extending vertically; a shield hingedly mounted on the straight edge of said segment, the central portion of the free side of said shield being bulged outwardly to project slightly beyond the edge of said rim, said bulge being gradual throughout the major portion of said shield for distributing the major weight thereof uniformly over its area; a stud projecting downwardly from one side of said shield substantially diametrically thereof; and means cooperatively connected to said stud for swinging said shield on its point of attachment as a pivot for deflecting, at will, in a direction away from said segment, the light rays emanating from said headlight said shield when moved to closed position forming with said segment a slightly bulged circular disc.

1,625,622. MANUFACTURE OF A SUBSTITUTE FOR TURPENTINE. LELAND L. ODOM, Little Rock, Ark., assignor to M-O-R Products Company, Little Rock, Ark., a Copartnership consisting of C. C. Monger, L. L. Odom, and J. D. Reynolds. Filed Mar. 18, 1924. Serial No. 700,178. 5 Claims. (Cl. 134—56.)

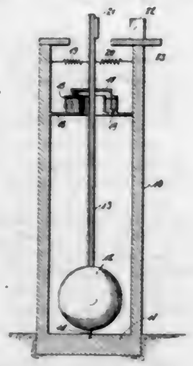


2. A turpentine substitute comprising the recovered distillate of a mixture of resin, lime, and a distillate of petroleum.

1,625,623. GAS-STOVE BURNER. HENRY W. O'DOWD, Jersey City, N. J., assignor, by mesne assignments, to Standard Gas Equipment Corporation, Baltimore, Md., a Corporation of Maryland. Filed Sept. 21, 1922. Serial No. 589,517. 8 Claims. (Cl. 158—99.)

1. In or for a gas stove, the combination of a substantially U-shaped burner tube, and a mixing tube connected directly to the base portion of said burner tube and communicating therethrough with both of its branch portions, one of said branch portions being provided at its free end with an offset lighting extension.

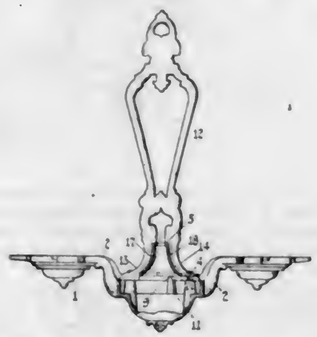
1,625,624. CALL-DISTRIBUTING SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 31, 1920. Serial No. 370,142. 10 Claims. (Cl. 179—27.)



3. In an automatic telephone system, a plurality of incoming lines, a plurality of primary trunks terminating in said primary trunk selecting switches, means for characterizing unselectable primary trunks by the absence of potential and for characterizing selectable trunks by the presence of potential, means for operating a primary trunk selecting switch of an incoming line to select a primary trunk characterized by the presence of potential, a secondary trunk selecting switch for each primary trunk, secondary trunks terminating in said secondary switches, means for operating the secondary switch of the selected trunk to seize an idle secondary trunk and means for preventing the selection of a primary trunk when all the secondary trunks are in an unselectable condition.

10. In a telephone system, incoming lines, a plurality of operators' positions, means including automatic switches for extending said incoming lines to said operators' positions, a plurality of recording devices at each operator's position, means for rendering an operator's position unselectable, two releasing means for rendering said operator's position selectable, and means including said recording devices for determining which releasing means has been employed.

1,625,625. SEISMOGRAPH. NORMAN H. RICKER, Houston, Tex., assignor to Humble Oil and Refining Company, Houston, Tex., a Corporation of Texas. Filed Dec. 11, 1924. Serial No. 755,290. 6 Claims. (Cl. 88—14.)

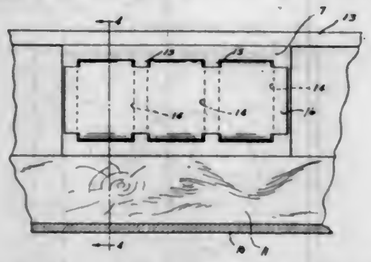


1. In a device of the class described, in combination, a seismograph having a member adapted to respond to earth

tremors, an interferometer having an operating element thereof carried by said member and a second element otherwise supported, means whereby interference bands

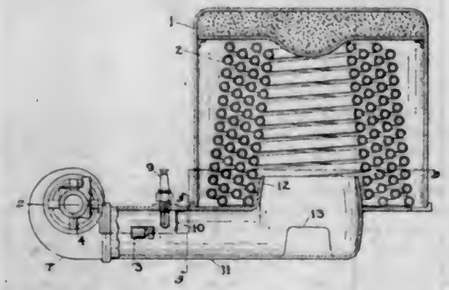
are displayed by coaction of said elements, and means for observing the influence of movements of said member upon the interference bands displayed by said interferometer.

1,625,626. LIGHTING FIXTURE. JOHN K. RIDDLE, Toledo, Ohio, assignor to The Edward N. Riddle Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 28, 1924. Serial No. 746,290. 4 Claims. (Cl. 240—78.)



1. A lighting fixture comprising a spider, having a plurality of radiating arms, screws cast in said spider, a loop by which said spider is suspended, there being circumferential slots in the lower ends of said loop which engage said screws, lugs formed on said spider, a conoidal body cover mounted on said spider, there being slots in said cover and diametrically opposite grooves which fit the lower ends of said loops and lead from the top of the conoidal piece to said slots, there being recesses formed in said cover which register with said lugs for the purpose set forth substantially as described.

1,625,627. PRODUCT FOR DESTROYING MOSQUITO LARVÆ. EMILE CHARLES CAMILLE ROUBAUD and RAYMOND ALEXANDRE VEILLON, Paris, France. Filed Nov. 21, 1923, Serial No. 676,002, and in France Nov. 30, 1922. 5 Claims. (Cl. 167—6.)

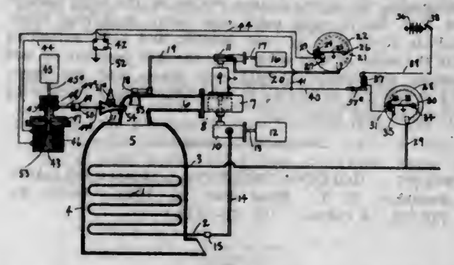


1. A product for destroying mosquito larvæ formed of a mixture under the form of an impalpable powder of a solid toxic substance, substantially insoluble in cold water, with a nutritive substance for the larvæ.

1,625,628. TILE CLOSURE. HAROLD SCARTH, Detroit, Mich. Filed Apr. 9, 1924. Serial No. 705,162. 2 Claims. (Cl. 72—66.)

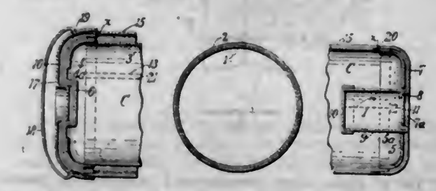
1. A tile closure of the class described adapted for use with a tile having a plurality of openings formed therein, adjacent openings being separated by a comparatively thin partition, comprising a main body portion made from a stamping; a plurality of tongues projecting outwardly from each of the longitudinal edges of said main body portion, the tongues on each edge being in spaced relation and separated a distance greater than the thickness of said partition, said tongues being angularly turned to said main body portion and adapted for insertion into said openings for retaining said main body portion in position as a closure for said openings, said main body portion extending across the spaces separating said tongues, lying in engagement with said partition and the ends of said main body portion being projected beyond the edges of the endmost of said openings.

1,625,629. COMBUSTION SYSTEM. LEWIS L. SCOTT, St. Louis, Mo., assignor to Electrol, Inc. of Missouri, St. Louis, Mo., a Corporation of Missouri. Filed May 20, 1921. Serial No. 471,276. 4 Claims. (Cl. 158—28.)



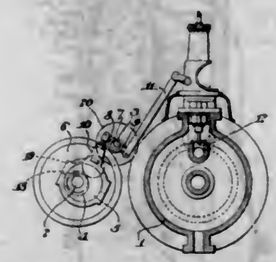
1. Combustion apparatus for igniting oil in an unvaporized state, comprising a fuel nozzle, a blower for furnishing air to promote combustion, a perforated plate placed in the path of the fuel mixture for retarding the velocity of said mixture, and an ignition device for igniting said mixture of fuel and air, said ignition device being located in the direct path of the fuel and air mixture.

1,625,630. COMBUSTION SYSTEM. LEWIS L. SCOTT, St. Louis, Mo., assignor to Electrol, Inc. of Missouri, St. Louis, Mo., a Corporation of Missouri. Filed May 21, 1921. Serial No. 471,414. 1 Claim. (Cl. 158—28.)



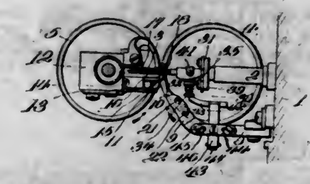
In combustion apparatus for burning heavy oils, in combination with a heat absorbing medium, a fuel burning device associated therewith, means for supplying an oil fuel thereto, an auxiliary ignition device for said fuel comprising means for supplying an independent gas fuel,

a magnet valve for controlling the supply of said gas fuel, electrically operated means for igniting the gas fuel, a circuit including said igniting means and the mag-



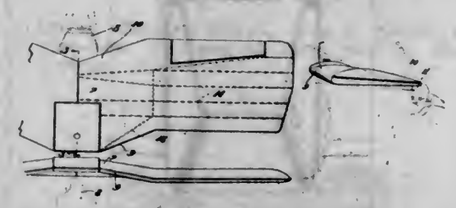
net of said valve, and automatic means governed by conditions of operation of the apparatus for controlling said circuit.

1,625,631. CONTAINER FOR EXPLOSIVES. JOHN B. SPOTSWOOD, Montclair, and HAROLD M. GULICK, Arlington, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 27, 1923. Serial No. 627,957. 7 Claims. (Cl. 102—12.)



1. A container for explosive charges made of waterproof quick burning material and comprising an inner explosive-containing unit having an igniter-charge chamber, structurally distinct from the interior space of the inner explosive-containing unit, at one end, and an outer unit of substantially the size of the inner unit and closely receiving the same, said outer unit having an open end and said inner unit being received in the outer with the igniter-charge-chamber end exposed by said open end.

1,625,632. VALVE GEAR FOR STEAM ENGINES. JOHANN STUMPF, Berlin, Germany. Filed Feb. 19, 1921. Serial No. 446,504. 3 Claims. (Cl. 121—167.)

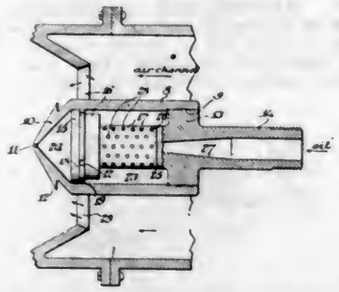


1. Valve gear for steam engines comprising two eccentrics running at different angular speeds, and valve operating mechanism associated therewith, including a rocking lever having as its fulcrum one of said eccentrics means for establishing operative relationship between said lever and the other eccentric, and means for communicating movement from said lever to the valve, the elements having such operative relationship that the eccentrics will cooperate to give one valve opening movement with each rotation of the crank shaft, said valve opening movement being greater than that due to either eccentric alone.

1,625,633. MACHINE FOR OVERCASTING THE EDGES OF FABRICS. CHARLEY THEBO, Chicago, Ill., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 4, 1924. Serial No. 730,015. 10 Claims. (Cl. 112—16.)

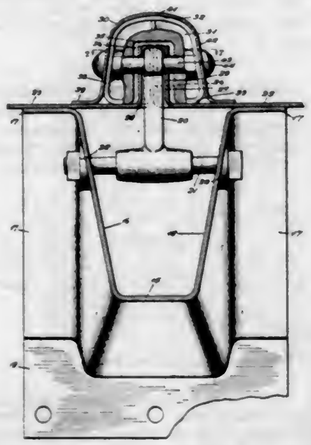
1. A machine for forming an edge covering for a fabric, comprising a thread carrying reciprocating needle, means for supporting said fabric with the body portion thereof in a plane at right angles to the line of reciprocation of the needle, means for turning the edge portion of the fabric to be covered at the stitching point, so that said edge portion lies in a plane substantially parallel with the line of reciprocation of the needle, means for engaging the needle thread loops and for placing the same against the face of the bent portion of the fabric opposite that passed by the needle as it moves to penetrate the fabric, and means for placing a looper thread along the edge of the fabric and for interlocking the same with the needle thread loops on one face of the fabric and the shanks of the same loops on the other face of the fabric.

1,625,634. AIRPLANE WING CONSTRUCTION. BENJAMIN DOUGLAS THOMAS, Ithaca, N. Y., assignor of one-tenth to Thomas-Morse Aircraft Corporation, Ithaca, N. Y., a Corporation of New York. Filed Mar. 8, 1923. Serial No. 623,613. 1 Claim. (Cl. 244—12.)



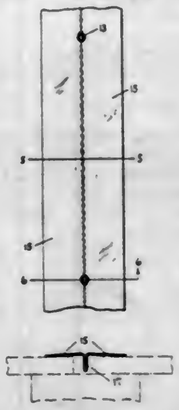
An airplane wing of full aerofoil section throughout its span and shaped so as to increase the pilot's angle of vision without diminishing the wing area, the middle portion of the wing being extended forward for said purpose at both the leading and trailing edges, parallel transverse trussed beams in the side portions of the wing, and auxiliary beams, of similar construction, in said middle portion, said auxiliary beams being arranged at an angle to said side portion beams and connected thereto.

1,625,635. FUEL BURNER. JOHN A. WILLNERS, Philadelphia, Pa. Filed Apr. 18, 1923. Serial No. 632,852. 7 Claims. (Cl. 158—76.)



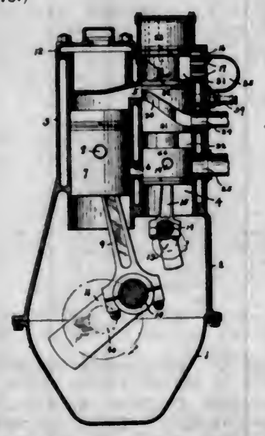
6. In a fuel burning device, the combination of a chambered body having a conical shaped end and a discharge vent at the apex of the cone, means dividing the interior of the chambered body into two compartments, one cylindrical and the other conical, said dividing means comprising a cylindrical body having a projecting circular flange of greater diameter than that of the main body and fitting the surrounding wall of the cylindrical com-

partment, having its face toward the other compartment provided with a centrally disposed circular recess and channels extending entirely through the flange from the periphery thereof and delivering tangentially to the circular recess, and an annular body covering said channels



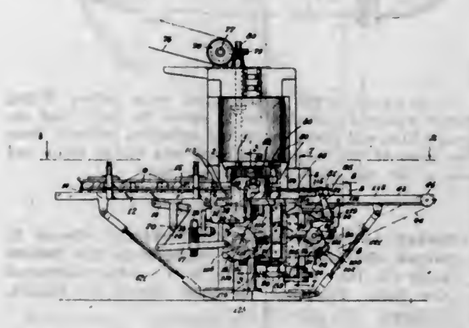
on one side and having an opening registering with the circular recess and flaring toward the conical compartment, a straining device positioned within the cylindrical compartment and means delivering fuel under pressure to the straining device.

1,625,636. CAR ROOF. WILLIAM WRIGHT, Chicago, Ill., assignor, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 26, 1924. Serial No. 709,245. 14 Claims. (Cl. 108—5.4.)



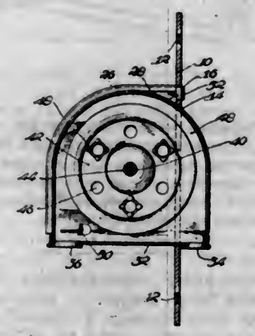
1. A car roof comprising, in combination: side plates; channeled carlines extending from side plate to side plate, roof sheets having side flanges extending upwardly over the channels provided by said carlines, said flanges of adjacent roof sheets being disposed alongside each other when secured in place, and portions of adjacent roof sheets and their flanges being offset to provide openings; links extending through said openings, bolts connecting the lower ends of said links, to the sides of said carlines; saddles arranged over the offset portions of said roof sheets but spaced therefrom, said saddles having extensions registering with each other at each side of the offsets of said roof sheets and spaced from each other by the side flanges of the roof sheet flanges therebetween, said extensions and the roof sheet flanges therebetween being riveted together, said saddles having a top portion and having side portions extending transversely with respect to the side flanges of the roof sheets, the lower ends of said side portions resting on the main body of the roof sheets at each side of said offsets, said seam caps enclosing the side edges of adjacent roof sheets, said seam caps having a top web and depending sides terminating in lateral flanges resting on the main body of the roof sheets, said seam caps being supported intermediate their ends by said saddles, and bolts extending into the sides of said seam caps, the side portions of said saddles, the offsets of said roof sheets and the upper end of the link extending in said offsets, said bolts being riveted to said seam caps.

1,625,637. HOLDING MOLDING. JOSEPH C. ABEL, Brooklyn, N. Y. Filed May 29, 1924. Serial No. 716,721. 6 Claims. (Cl. 72—118.)



2. In a panel-board arrangement comprising panels spaced apart, holding molding between the panels having resilient flanges overlapping adjacent edges of said panels, said flanges being downwardly pitched during the initial stages of the assembling operation and adapted to yield to assume another and final position on said panels upon consummation of the assembling operation, and fastening devices passing through said molding only.

1,625,638. ENGINE. JAMES B. BAYNES, Buffalo, N. Y. Filed Oct. 28, 1922. Serial No. 597,493. 8 Claims. (Cl. 123—75.)

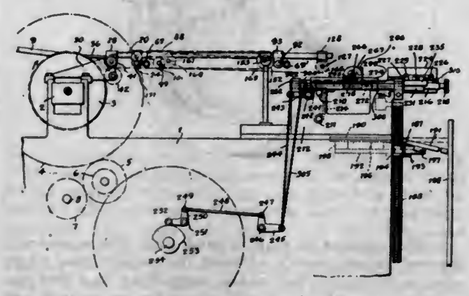


4. In a four-cycle internal combustion engine, the combination of a cylinder having a port at each end of its working chamber, a valve chamber adjacent the cylinder and connected thereto by said ports and having two exhaust ports and an intake port for fuel, a valve slidable in the chamber and having an exhaust passage, a fuel passage and a chamber to receive the explosive charge of the engine and which acts as an exhaust passage during the scavenging stroke of the engine.

1,625,639. HEADING MACHINE AND BODY-CONVEYING MEANS. JULIUS BRENZINGER, Fairfield, and PAUL H. LANGE, Bridgeport, Conn., assignors to The Max Ams Machine Company, Bridgeport, Conn., a Corporation of New York. Filed Nov. 22, 1922. Serial No. 602,505. 18 Claims. (Cl. 113—29.)

1. Body conveying mechanism comprising: a rotatable member, means for feeding a body occupying a recumbent position, a member for moving the body into an upright position, means for intermittently and progressively rotating said second member in one direction only, and means for moving the up-ended body to the first member.

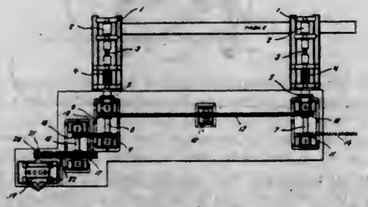
1,625,640. PULLEY. JOSEPH H. DILLON, Wilmette, Ill., assignor to Dillon Pulley Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 18, 1922. Serial No. 537,398. 24 Claims. (Cl. 16—21.)



2. In a device of the class described, an apertured sheet metal face plate, a casing thrust partly through said aperture, a pulley in said casing, said casing projecting through said aperture to house the portion of the pulley projecting past the plane of said face plate, and apertures in the bottom of said casing in tangential alignment with the periphery of said pulley.

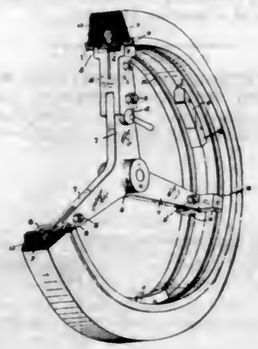
1,625,641. EMULSIFICATION OF OILS AND FATS AND PRODUCTS MADE THEREFROM. ROBERT DOUGLAS and HUGO G. LOESCH, Rochester, N. Y., assignors to Douglas-Pectin Corporation, Rochester, N. Y., a Corporation of New York. Filed Sept. 4, 1923. Serial No. 660,902. 10 Claims. (Cl. 99—11.)

1. A pectin-stabilized oil or fat emulsion.



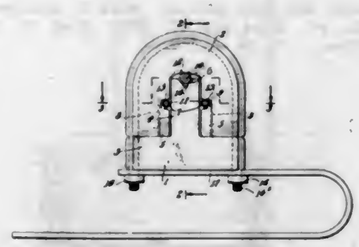
7. The improved step in the process of manufacture of a food dressing consisting in emulsifying vegetable oils or fats by means of a solution of pectin.

1,625,642. METHOD AND MECHANISM FOR DELIVERING AND STACKING SHEETS. MICHAEL A. DROITCOUR, Providence, R. I. Filed Apr. 8, 1924. Serial No. 704,963. 36 Claims. (Cl. 271—76.)



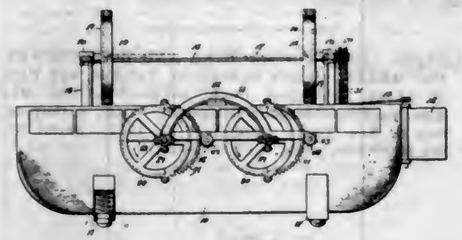
1. A sheet delivery mechanism including in combination a delivery table, a perforate belt, and suction means having an open channel extending beneath the belt, the belt running in friction contact with the suction means thereby closing the top of the channel.

1,625,643. ROLLING METAL. NOAH W. ELLIOTT, New Castle, Pa. Filed Aug. 17, 1925. Serial No. 50,618. 7 Claims. (Cl. 80—54.)



1. A rolling mill comprising a plurality of successively arranged stands of rolls, sprocket means coaxial with and having a driving connection with one roll in each roll stand, roller chain means connecting the sprocket means of successive roll stands, a relatively high speed rotary power source provided with a primary sprocket, and chain and sprocket speed reduction gearing connecting said primary sprocket with one of said rolls, including a silent chain connected to said primary sprocket connection with one of said rolls and a silent chain connecting said two last mentioned sprockets.

1,625,644. MANUFACTURE OF CUSHION TIRES. GEORGE F. FISHER, Roselle, N. J., assignor, by mesne assignments, to Morgan & Wright, Detroit, Mich., a Corporation of Michigan. Filed Feb. 17, 1922. Serial No. 537,159. 4 Claims. (Cl. 154—12.)



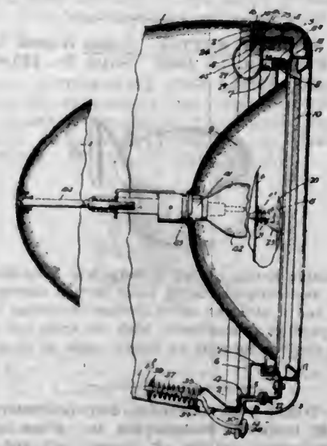
1. That method of shaping solid tires with a centrally disposed annular cavity adjacent the metallic base which consists in, vulcanizing rubber composition to a two-part metallic base whose opposed edges are in contact and around a sectional core supported by the metallic base, and subsequently removing the core and allowing the two parts of the metallic base to assume the normal abutting relation they occupied during vulcanization.

1,625,645. INSULATOR. LOUIS FORT, Jersey City, N. J. Filed Oct. 5, 1922. Serial No. 592,463. 2 Claims. (Cl. 173—314.)

1. In an insulator, the combination of a base member having a base flange and a central rib upstanding therefrom and shoulders of lower height than said rib on opposite sides of the same, with seating surfaces extending substantially straight across said rib and shoulders, a cap member of U-shape adapted to fit about said rib, and having guiding grooves adapted to interlock with said shoulders, and clamping means comprising a strap adapted to be secured about said cap member and base flange to secure the same together with conductors extending between said rib and shoulder seating surfaces and the adjacent surfaces of said cap member, said cap and base members being movable relatively to each other transversely of the conductors and while still interlocked prior to tightening said clamping means to accommodate the thickness of the conductors secured between them.

1,625,646. AIRCRAFT. FRANCIS GADDIS, Merrick, N. Y. Filed May 3, 1926. Serial No. 106,516. 12 Claims. (Cl. 244—16.)

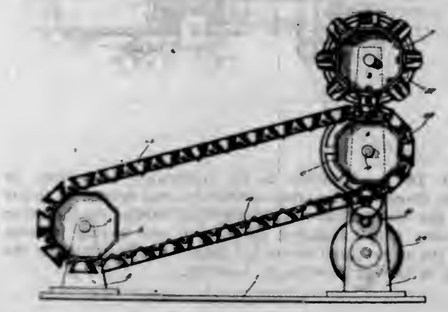
1. In an air craft, a supporting body, oblong lifting rotors extending longitudinally above the body, and oblong lifting and propelling rotors extending laterally from the sides of the body, there being one at the front and one at the rear on each side of the body.



1,625,647. DISPLAY EASEL AND TRAY. GOWAN C. GILLAN, Franklinville, N. Y., assignor to The Ontario Knife Co. Inc., Franklinville, N. Y., a Corporation of New York. Filed Apr. 15, 1926. Serial No. 102,273. 3 Claims. (Cl. 211—28.)

3. The combination with a rectangular tray having vertical walls throughout its edges, a sheet fitting within the tray and having recesses in its side edges at one end, an easel, and supports at the sides of the easel fitting in the recesses of the sheet and confined between the walls of said recesses and the walls of the tray.

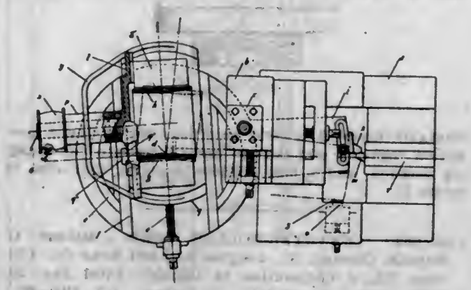
1,625,648. HEADLIGHT CONSTRUCTION. CHARLES E. GODLEY, Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company, a Corporation of Michigan. Filed Jan. 25, 1926. Serial No. 83,748. 5 Claims. (Cl. 240—41.)



1. In a lamp, a body including a radial shelf, a reflector housed by the body and provided at its mouth with a forwardly open annular groove, spaced portions of the outer wall of the said groove being formed into ears directed radially outward and disposed forwardly of the shelf, a compression spring between each ear and the shelf, and limit means carried by the shelf for limiting the forward movement of the reflector by the springs,

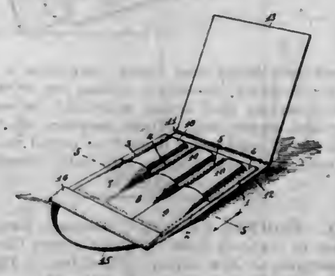
the body and the reflector having slidably interfitting portions separate from the said limit means for guiding the movement of the reflector by the springs, a door secured

to the mouth of the body and including a lens, and a packing ring seated in the groove and engaging the inner face of the lens.



1,625,649. VIENNA-ROLL-FORMING MACHINE. CHARLES GOTTFRIED, New York, N. Y. Filed Dec. 17, 1925. Serial No. 76,047. 4 Claims. (Cl. 107—8.)

2. In a Vienna roll forming machine, an endless chain formed with a series of flat links, each link having an aperture substantially in the center thereof, a cup mounted on each of said links, a rivet extending through part of the cup and through said aperture for connecting the cups to the links, each of said rivets having an enlarged head projecting beyond the links, a pair of polygonal-shaped pulleys for said chain, each of said pulleys having a series of apertures adapted to receive the enlarged heads of said rivets as the chain passes over whereby the various links will be centered on the different faces of the respective pulleys, a series of dies arranged adjacent one of said pulleys, and means for operating the pulleys and dies so that as the cups pass over a certain point the dies will enter the same for forming the dough therein into the proper shape.

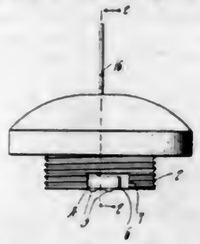


1,625,650. METHOD OF MACHINING DOUBLE CONICAL WORK PIECES. KARL GOTTMANNS, Hilden, Germany. Filed Nov. 14, 1925, Serial No. 69,136, and in Germany Oct. 30, 1924. 11 Claims. (Cl. 82—1.)

1. The method of machining a double-conical work piece by means of a suitable tool, one of the said two elements being movable towards the other, which consists in setting the work-piece so that the point of the circumference where the two conical surfaces meet located at one end of a diameter transversal to the line of travel of the movable element on the same plane with the working edge of said tool, is in direct alignment with the line of travel of the point where said working edge is applied, angularly setting said work-piece about an axis passing through said point at right angle to a plane passing through said diameter and said line of travel, so that

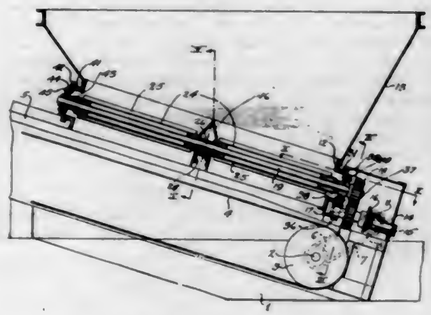
the generatrix of one of the conical surfaces originating at said point is in direct alignment with the line of travel of said working edge, revolving said workpiece about its own axis while said conical surface is machined, angularly displacing said work-piece about said first mentioned axis, upon completion of the machining of said surface, bringing the generatrix of the other conical surface originating at the same point into direct alignment with the line of travel of said working edge, and in machining said other conical surface.

1,625,651. REED HOLDER. FREDERICK GRETSCH, Brooklyn, N. Y. Filed Mar. 22, 1926. Serial No. 96,619. 3 Claims. (Cl. 150—34.)



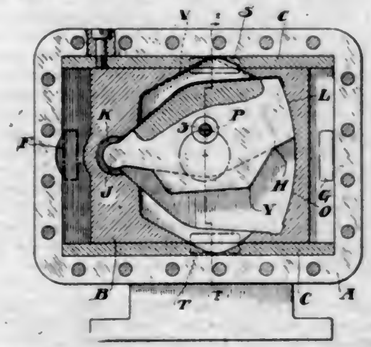
1. A saxophone reed holder comprising a body formed from a piece of stiff material, a flexible member mounted on said body and extending from near the center thereof down to and over one end and back to near the center at the opposite side, a series of lines of stitching for securing said member to the body so as to divide the member into a series of pockets, the pockets on one side of the body being in line with the pockets on the opposite side, each pocket being adapted to receive a reed with the flat side contacting with the body whereby the reeds in the various pockets will reinforce each other, and a covering structure for covering said body, the means forming the pockets and the reeds, said covering structure protecting the exposed ends of said reeds and reinforcing said body for its full length.

1,625,652. LOCKING CAP FOR TANKS. HAROLD L. GROESBECK, Salt Lake City, Utah. Filed May 6, 1926. Serial No. 107,178. 1 Claim. (Cl. 70—90.)



A locking cap for tank closures, including a threaded cap adapted to engage the threaded nozzle of a tank, a

horizontal partition in said cap, spring actuated dogs pivotally secured to said partition and adapted to engage the tank nozzle to prevent unscrewing of the cap, a stud

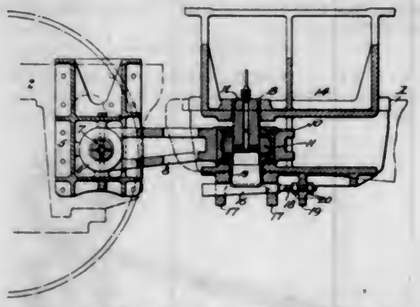


rotatably mounted in said partition and having a projection engaging said dogs to move them into non-engaging position, and a lock cylinder engaging said stud to rotate it.

1,625,653. CONVEYER-ROLLER FEED. MILTON O. HARGER, Chicago, Ill., assignor to Abell-Howe Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 20, 1926. Serial No. 82,420. 12 Claims. (Cl. 198—62.)

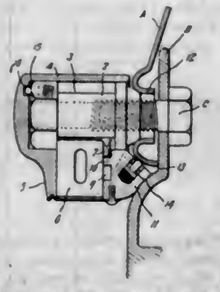
4. A conveyer roller feed device comprising a hopper, a conveyer mounted therebelow, means for driving said conveyer, rotatable feed means positioned between said conveyer and hopper, and slidable bearings for the feed means to permit adjustment thereof to control the flow of the material from said hopper onto said conveyer.

1,625,654. ENGINE. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Jan. 8, 1926. Serial No. 80,016. 5 Claims. (Cl. 121—50.)



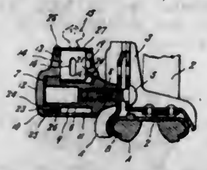
2. A fluid actuated engine comprising a cylinder, a crank shaft, an outer flat piston in said cylinder, and an inner piston pivotally mounted wholly within said outer piston and connected to the crank of said crank shaft to transmit the motion of both of said pistons to said shaft.

1,625,655. COOKING KETTLE. JESSIE HARDIE, Albany, N. Y. Filed Sept. 14, 1926. Serial No. 135,433. 2 Claims. (Cl. 53—8.)



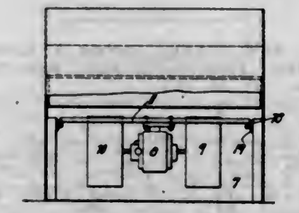
1. A cooking kettle having a body, and a handle composed of a vertically extending inner section curved longitudinally, and a straight outer section extending in substantially parallel arrangement, with the axial line of said body, said sections forming an acuate angle at their upper ends.

1,625,656. JOINT FOR ARTICULATED LOCOMOTIVES. HENRY K. HARWICK, Philadelphia, Pa. Filed Sept. 28, 1926. Serial No. 138,265. 5 Claims. (Cl. 105—175.)



1. The combination in an articulated locomotive, of two frames; a coupling carried by one frame; a socket in the coupling; a vertical pivot-pin carried by the other frame; a ball mounted on the pin and having its seat in the socket; and means for longitudinally adjusting the pin to take up wear in its bearings.

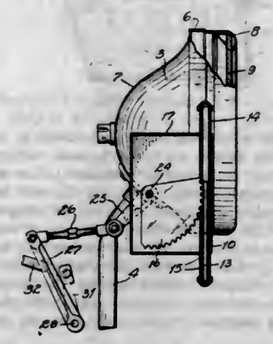
1,625,657. LOCK FOR SPARE WHEELS OF AUTOMOBILES. FREDERICK W. HENKE, Jr., Philadelphia, Pa., assignor to Fox Automotive Products Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed Jan. 21, 1926. Serial No. 82,753. 5 Claims. (Cl. 70—122.)



1. The combination with a securing nut, of a housing having one end open arranged to be passed over the nut to enclose the same and to be secured thereto against endwise removal therefrom, the housing being formed with a hollow extension to serve as a casing for a lock, such extension being formed with a projection extending toward the open end of the housing shaped to engage with a surface adjacent to the nut that will prevent rotation of the housing so long as it is applied and secured to the nut.

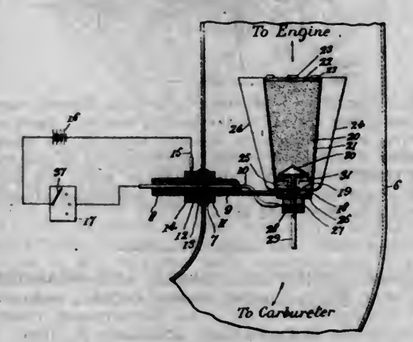
1,625,658. AUTOMOBILE TIRE LOCK. FREDERICK W. HENKE, Jr., Philadelphia, Pa., assignor to Fox Automotive Products Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed Jan. 21, 1926. Serial No. 82,754. 11 Claims. (Cl. 70—122.)

1. The combination with a securing nut having a head of standard construction adapted to be engaged by a wrench, of a housing adapted to enclose the nut, a lock casing carried by the housing, and a lock the body of which is mounted in the lock casing and is therein movable radially relative to the nut to engage therewith to prevent separation of the nut and housing, the lock having key-operated parts to engage with the lock casing and hold the lock body in engagement with the nut until released through the operation of the key.



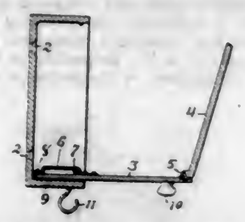
1,625,659. MOTOR-BOARD SUSPENSION. PERCIVAL P. HENSHALL, Atlantic City, N. J., assignor to John J. Nesbitt, Inc., Atlantic City, N. J., a Corporation of New Jersey. Filed Feb. 25, 1925. Serial No. 11,618. 1 Claim. (Cl. 248—16.)

A vibration absorbing support for cabinets comprising a motor board, plates attached to the ends of said board for supporting it at three points, said plates having bottom projections of small cross sectional area and lead strips carried by the cabinet, said projections and strips being in contact whereby the vibrations set up in the board by a motor and fan assembly in suspension therefrom may pass only through said points of contact.



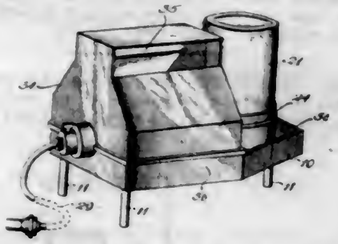
1,625,660. GLARE DEFLECTOR FOR HEADLIGHTS. NICHOLAS R. HOMYER, and WILLIAM M. HOMYER, Granite City, Ill. Filed Dec. 14, 1925. Serial No. 75,829. 3 Claims. (Cl. 240—45.)

3. In a device of the character described, the combination of an automobile having a pair of headlights, of a casing mounted to one side of said headlights and secured to a metal ring, a tubular rack mounted to slide upwardly and downwardly within a slotted tube mounted at one end of the said casing above mentioned; of a shutter-blade secured to said tubular rack and adapted to slide upwardly and downwardly within said slot in said slotted tube; of additional shutter-blades slidably mounted to the lower edge of the above mentioned shutter-blade, of a sector-gear mounted upon a shaft, a crank-arm mounted upon said shaft; another crank-arm being connected to the first mentioned crank-arm by means of a connecting bolt; a horizontal bar connected to the lower free end of the last mentioned crank-arm; brackets secured to the radiator of the automobile to hold the said horizontal bar in position; a crank-arm mounted on the



end of said horizontal-bar; a rod provided with ratchet-teeth secured to the said last mentioned crank-arm, the teeth of said rod being adapted to engage the edge of a steel plate secured to the dash or instrument board of the automobile; a spring for forcing said ratchet-teeth of said rod into contact with said steel-plate, and a handle secured upon the free end of said rod, as and for the purpose set forth.

1,625,661. VAPORIZER FOR GASOLINE ENGINES. ROBERT H. JOHNSON, Washington, D. C. Filed Dec. 11, 1925. Serial No. 74,821. 5 Claims. (Cl. 219—38.)



5. A vaporizer for gas engines comprising a hollow threaded arm fitted through the intake pipe of the engine and insulated therefrom, means on said threaded arm for securing the same to said pipe, a hollow insulating sleeve extending through said arm, said arm having a substantially flat extention, a receptacle having a perforated base fitted on said extension, a mass of carbon particles in said receptacle, a hollow insulating sleeve passing through said perforated base and said extension, a stem extending through said insulating sleeve and having a cone head at its upper end embedded in the particles in said receptacle, a wide spread insulating flange on said sleeve below said cone head, a source of current connected at one side with said arm and at the other side through the first mentioned hollow insulating sleeve with said stem.

1,625,662. FOLDING HOOK. HARRY LESTER KAST, Fort Wayne, Ind. Filed Dec. 5, 1925. Serial No. 73,339. 2 Claims. (Cl. 248—24.)

1. In a device of the class described, a housing attachable to the frame of a coach, and having an open front, a pair of transversely disposed pins within said housing and adjacent the lower end thereof, and a folding hook member composed of sections hinged together so as to have limited pivotal action, one of said sections having an elongated loop through which one of said pins extends, and having fulcrum bearing with the other of said pins and supported relation with the bottom of said housing when said hook member is extended for use, said member being operable to fold and close the front of the housing.

1,625,663. HUMIDIFIER. WILLIAM HARDY KELLY, Charlotte, N. C., assignor of one-third to Charles F. Keistler, Charlotte, N. C. Filed June 16, 1926. Serial No. 116,354. 6 Claims. (Cl. 261—104.)

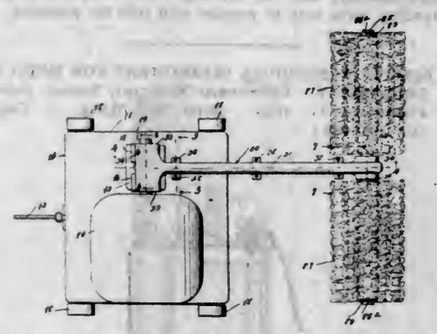
1. A humidifier, comprising a heating element, means for supplying dry air to the heating element, liquid containing wells located on opposite sides of the heating element, a perforated arched plate supported in said wells and bridging over the heating element, wicks laid across said arched plate and having their extremities extending into the liquid in said wells.

1,625,664. COMBINED CORSET AND BRASSIÈRE. JOSEPH JULIUS KISPERT, Branford, Conn., assignor to I. Newman & Sons, Inc., New Haven County, Conn., a Corporation of Connecticut. Filed May 23, 1925. Serial No. 32,481. 1 Claim. (Cl. 2—30.)

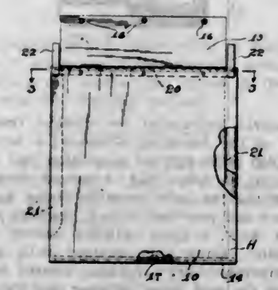
A combined brassière and corset, comprising a corset body, a plurality of looped members or straps carried by the corset body at the rear and near the upper edge, means for dividing said straps into sections so as to present substantial horizontal passage-ways arranged at different heights when the corset is in use, a brassière body, a plurality of looped members connected with the brassière body at the rear near the lower edge, and a flexible member extending through the looped members of the brassière and through any of said passageways whereby the brassière may be connected to the corset body at different heights.

1,625,665. COOLING RADIATOR FOR AEROPLANES AND OTHER VEHICLES AND PROCESS FOR ITS MANUFACTURE. ALEXANDRE LAMBLIN, Paris, France. Original application filed Jan. 7, 1925, Serial No. 1,012, and in France Jan. 24, 1924. Divided and this application filed Jan. 9, 1926. Serial No. 80,186. 1 Claim. (Cl. 257—125.)

In a cooling radiator for aeroplanes and other vehicles, the following combination; a front header, a rear header, tubular elements of V-shaped transverse section, said elements having free spaces therebetween and being interposed between the front and the rear headers and disposed longitudinally with respect to the direction of movement of the vehicle, shutters pivotally disposed on the base portions of the tubular elements, means for controlling said shutters in a manner either to open said shutters with respect to each other in order to permit a transverse current of air to penetrate between the elements or to close said shutters with respect to each other, and means for guiding a current of air longitudinally to circulate in part between the wings of the V of each element and in part between the free spaces formed between said elements, said shutters serving also to guide said latter current of air, when said shutters are closed with respect to each other.



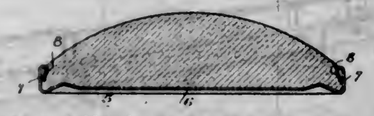
1,625,666. SAW CLAMP. EDWARD N. LARGE, Ryderwood, Wash. Filed Mar. 12, 1926. Serial No. 94,270. 4 Claims. (Cl. 76—78.)



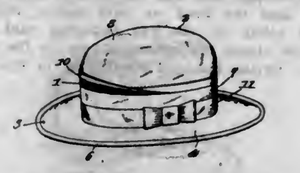
1. In a saw clamp of the character described, comprising supporting elements, a pair of relatively long jaw members, one of greater length than the other and having the ends thereof formed to provide supporting brackets, means for securing said supporting brackets to said elements, adjustable means for securing said jaw members loosely together, and means positioned between said jaw members at the lower portions of the same for spreading apart the said lower portions to cause the upper portions thereof to come together in gripping relation.

1,625,667. BRUSHING AND POLISHING MACHINE. WALTER D. LEE, Grand Junction, Colo. Filed May 23, 1925. Serial No. 32,382. 6 Claims. (Cl. 15—49.)

1. A device of the class described comprising a brush shaft, a driving member rigid on said shaft, a supporting arm for said shaft, and said supporting arm overlapping said driving member at the ends thereof to prevent longitudinal displacement of the shaft, said supporting arm being in part separable to release the shaft with the brush assembled thereon, and driving means associated with said driving member.

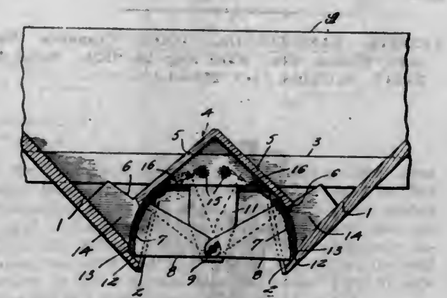


1,625,668. CLOTHES HAMPER. DAVID LONDON, Baltimore, Md. Filed Jan. 30, 1926. Serial No. 84,911. 1 Claim. (Cl. 150—1.)



A clothes hamper comprising a bag having means at the upper sides of the bag for suspending the latter from supporting means, said hamper having an auxiliary compartment inside of said bag and a cover common to said bag and said auxiliary compartment, a removable spreadng member at the top of the bag, and a removable relatively rigid member resting on the bottom of said bag, said upper spreading member and said lower rigid member serving to maintain the shape of the bag.

1,625,669. COMPACT POWDER HOLDER. JOHN S. LYON, Rochester, N. Y., assignor of one-half to John Bartholomew, Rochester, N. Y. Filed Jan. 11, 1926. Serial No. 80,514. 1 Claim. (Cl. 132—82.)



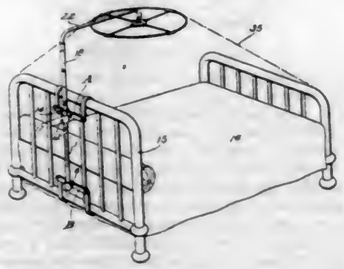
A tray or holder for compacted powder cakes of the character described embodying a sheet metal bottom having a surrounding shallow side wall, the upper edge of the material forming said wall being flanged inwardly and downwardly so that its margin is crimped against the inner face of the side wall at an outwardly spreading incline to strengthen the holder, a continuation of the outer surface of the side wall thus becoming an inner wedging surface for the cake.

1,625,670. HAT. FRANK D. MAXWELL, Boise, Idaho. Filed Aug. 11, 1925. Serial No. 49,553. 1 Claim. (Cl. 2—176.)

A hat including a body formed of one piece of metallic screening shaped to provide a crown portion and a rim portion, a ring-like covering fitted over the rim portion and extending upwardly on the inside and the outside of the crown to reinforce the fold in said body which defines between the crown and rim portions, a covering on the outside top portion of the crown and spaced at its edge from the first mentioned covering, and a band joined at its upper edge to the crown covering in a manner to prevent bulging, the said band constituting a ventilating flap which extends to but is free from the outer edge of the ring-like covering when in a closed position and is adapted to be upwardly folded to expose the body.

1,625,671. HOPPER DOOR. ROBERT METCALF and MORRISON JONES, Hazard, Ky. Filed July 29, 1926. Serial No. 125,753. 3 Claims. (Cl. 105—249.)

2. In combination with a hopper having an inclined bottom leading to a delivery opening, the lower end of said bottom having a recess providing a shoulder, a hood inclined oppositely to the bottom and spaced therefrom, and a door for closing the space between the bottom and hood pivoted to move into open and closed positions through an arc, said door when closed seating in said recess and engaging the shoulder, a shaft suitably journaled, and a flexible member connecting said shaft and door.



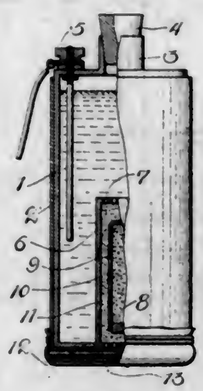
1,625,672. METHOD OF AND MEANS FOR WATERPROOFING TEXTILE AND OTHER MATERIALS. CHARLES JOSEPH MORETON, London, England. Filed Jan 22, 1926, Serial No. 83,135, and in Great Britain Dec. 24, 1925. 4 Claims. (Cl. 91—68.)

1. A process for waterproofing textile material consisting firstly in treating the material with an emulsion of palm oil, tallow, ammonia, gylcerine, borax, wax and karaya gum and secondly with a metallic sulphate solution and finally drying by heat, as set forth.

1,625,673. CANOPY HOLDER. VIRGINIA P. NELSON, New York, N. Y. Filed May 4, 1926. Serial No. 106,719. 2 Claims. (Cl. 135—5.1.)

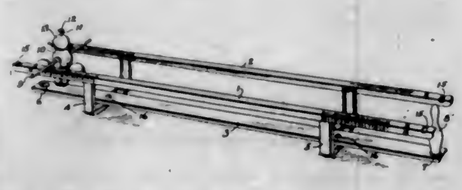
2. A device of the character described, comprising a screw-threaded rod, a hook on the lower end of the rod,

a sleeve mounted to move on the rod and having a hook thereon, hook members adapted to engage a support and having openings receiving the hook at the lower end of the rod and the hook on said sleeve, respectively, a threaded collar on the rod engaging said sleeve and adapted to clamp the hook members on the support, an extension having one end telescoping in the rod, a slot



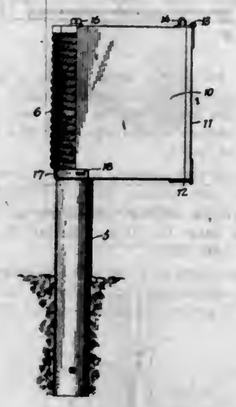
and pin connection between the extension and the rod preventing turning movement of the rod, an arm having telescoping engagement with the extension, a slot and pin connection between the arm and the extension preventing independent movement of said parts, and a canopy supporting device carried by the free end of said arm.

1,625,674. SAND-TESTING TOOL. CLARENCE NEWBURN, Electra, Tex. Filed Aug. 29, 1925. Serial No. 53,247. 9 Claims. (Cl. 255—1.)



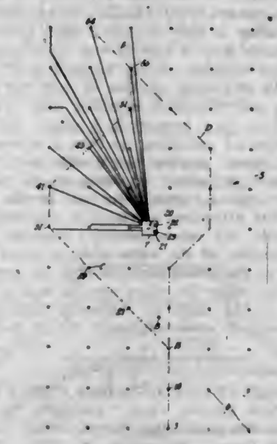
1. An oil sand testing tool including in combination with a drill pipe having back pressure valves integral therewith, a shoe mounted on said drill pipe at a spaced point from its bottom end; a working barrel threaded into said drill pipe; a standing valve therein, provided with an apertured seat; a traveling valve reciprocable within said working barrel comprising a tubular member threaded into a cage, the latter having a ball suspended therein; a sleeve disposed beneath said ball arranged to normally cover ports in said cage; a spring controlled plunger movably mounted in said tubular member disposed to impinge said sleeve; means to permit circulation of water downwardly past said suspended ball, through said standing valve seat and upwardly through said back pressure valves, and means to impart downward movement to said traveling valve to actuate said plunger to simultaneously seat the ball and close the ports in said standing valve seat to prepare said tool for pumping.

1,625,675. ELECTRICAL INSTRUMENT FOR MEDICAL TREATMENT. YOSHITOSHI NOISHIKI, Tottori, Japan. Filed Dec. 17, 1925. Serial No. 75,914. 1 Claim. (Cl. 174—89.)



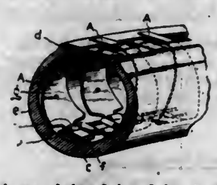
In an electric instrument for medical treatment the combination of the following elements; a metallic outer casing provided with exterior insulation and a plurality of apertures in its lower end; a second metallic casing positioned within the outer metallic casing and over the said apertures and provided with a plurality of openings in its upper wall; a glass cylinder located within the second metallic casing and provided with gamma ray producing minerals; cotton packing located between the outer wall of the said glass cylinder and the inner wall of the second metallic casing; a terminal mounted on the exterior of the outer casing and adapted for connection with an electric current; and a terminal rod held in suspension from the said terminal and within the said outer casing.

1,625,676. BOWLING-GAME APPARATUS. CHARLES HAMILTON PAJEAU, Glencoe, Ill., assignor to Toy Tinkers, Inc., Evanston, Ill., a Corporation of Illinois. Filed Jan. 25, 1926. Serial No. 83,703. 13 Claims. (Cl. 273—37.)



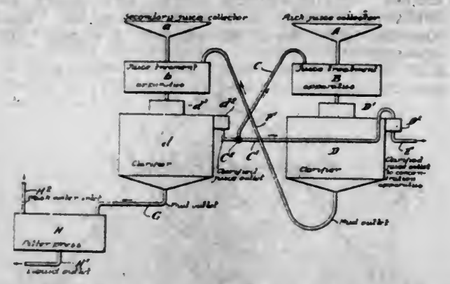
1. In a game apparatus, a pair of spaced rails, and a traveler member adapted to be rolled upon the rails; the traveler member including a roller spanning the rails, momentum-acquiring means carried by the roller for continuing rotation imparted to the roller, and friction means carried by the roller for retarding rotation thereof.

1,625,677. HOG GREASER. HERBERT B. PALM and BERNARD L. PALM, Huron, S. Dak. Filed July 19, 1926. Serial No. 123,558. 5 Claims. (Cl. 119—157.)



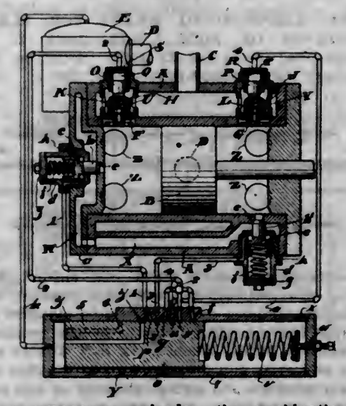
1. In a rubbing post, a post having an absorbent rubbing surface, a grease container rotatably mounted on the post, and means for holding the grease in the container in contact with the rubbing surface.

1,625,678. SYSTEM FOR CARRYING OUT MIMIC BOMBING ATTACKS. ARTHUR W. PARSONS, Miami, Fla. Filed Mar. 27, 1925. Serial No. 18,931. 34 Claims. (Cl. 244—1.)



1. In a system of the character described a field, a plurality of operable stationary target devices located on said field and spaced from each other, and means operatively connected with said devices for so actuating said devices as to progressively present a succession of targets simulating a constantly forwardly moving body.

1,625,679. AUTOMOBILE TIRE. GEORGE D. PEARSON, Montreal, Quebec, Canada. Filed Jan. 27, 1926. Serial No. 84,204. 14 Claims. (Cl. 152—8.)



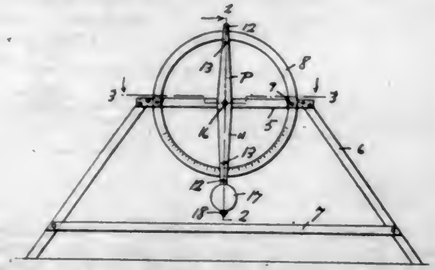
2. A tire such as claimed in claim 1 distinguished by the means for presenting the smooth surface consisting of a pivoted end of each spring extending over a pivotal connection therewith and between the same and the inside surface of the tire casing.

1,625,680. PROCESS OF RECOVERING SUGAR CONTENT IN CANE JUICES. CUTHBERT GEORGE PETREE, New York, N. Y., assignor to Petree & Dorr Engineers, Inc., New York, N. Y., a Corporation of Cuba. Filed Apr. 20, 1925, Serial No. 24,395, and in Union of South Africa Aug. 18, 1924. 4 Claims. (Cl. 127—57.)

1. The method of treating the rich and weaker juices coming from different stages of a sugar cane milling circuit which consists in decanting the rich juice, adding the mud thereby produced to the weaker juice, then decanting the latter, and separating and separately recovering the solids and juice vehicle constituting the mud produced by the decantation of the weaker juice by subjecting the last mentioned mud to a press action.

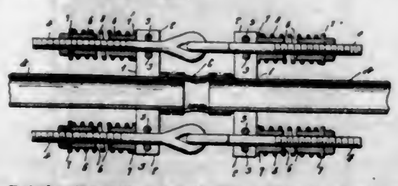
1,625,681. SINGLE-CHAMBER CLEARANCE UNLOADER. WILLIAM PRELLWITZ, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 27, 1926. Serial No. 125,244. 8 Claims. (Cl. 230—24.)

1. In a compressor unloader, the combination of a cylinder and piston, a single clearance chamber, and



means for alternately placing said chamber solely in communication with either one end or the other of the cylinder for unloading purposes.

1,625,682. OBSTETRIC APPLIANCE. MARY ETHEL RAGG, Upper Norwood, England. Filed Mar. 28, 1925, Serial No. 19,030, and in Great Britain Apr. 12, 1924. 5 Claims. (Cl. 45—50.)

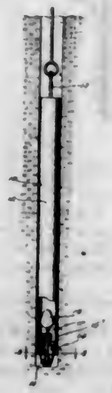


1. Obstetric appliance comprising in combination, a supporting and thrust resisting member for the woman's back, leaf springs on which said member is mounted, and means for attaching said member to a bedstead or operating table.

1,625,683. BLADE-GRADER LEVEL AND SLOPE INDICATOR. JOSEPH RAIL, Terre Haute, Ind. Filed Oct. 23, 1926. Serial No. 143,696. 3 Claims. (Cl. 33—215.)

1. A device of the class described including a frame, having a horizontal bar, a ring mounted on the bar so that said bar is disposed diametrically across the ring, a pair of rods, a bolt piercing the centers of the rods and the mid point of the bar, bolts projecting through the ends of the rods outside of the ring, other bolts piercing the end portions of the rods inside of the ring, spacing elements on the bolts, the spacing element on the lowermost bolt being provided with a weight element.

1,625,684. REENFORCING MEANS FOR FLEXIBLE COUPLINGS OF PIPE LINES. JOHN C. RODDY, Palatka, Fla. Filed Apr. 22, 1926. Serial No. 103,857. 2 Claims. (Cl. 285—00.)

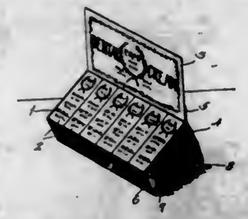


1. Reinforcing means for flexible couplings of pipe lines, including pipe sections, and a flexible coupling connecting said pipe sections, comprising clamp members secured to the pipe sections adjacent to the flexible coupling, said clamp members having spaced arms, rods slidably mounted between said arms and hingedly secured together between the clamp members, and springs mounted on said rods and operatively connected to said arms to normally hold the pipes in alinement.

1,625,685. POCKET HOLDER FOR POOL TABLES. NOAH F. ROLLEY, Karthaus, Pa. Filed Apr. 28, 1925. Serial No. 26,405. 1 Claim. (Cl. 273—12.)

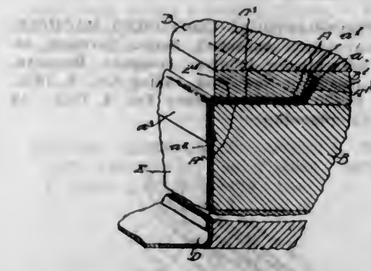
In a pocket holder for pool tables, a bar, a tubular covering for the bar to cushion the impact of balls thereagainst, a pocket suspended by said bar and covering, and fastening elements separate from the bar to secure the same to the table.

1,625,686. BAILER DUMP. STANLEY A. RUTNER, Hill, Calif. Filed May 12, 1926. Serial No. 108,620. 1 Claim. (Cl. 166—19.)



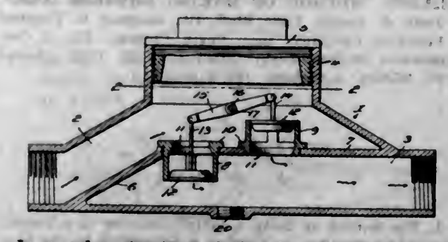
In a bailer dump, a shell, a tubular member fitting within and secured to the lower extremity of said shell, said tubular member having a smooth inside, said tubular member providing a seat, a valve dart having a depending extension with a hole in the lower end thereof, said valve dart adapted to rest on said seat when the valve dart is in its normal position to close the lower end of the shell, a pair of flexible members, each of said flexible members bent and formed of a single piece of material to provide an attaching portion, a bowed portion, and an offset rebent portion, the flexible members being attached to said depending extension of the valve dart by a means extending through the hole in the extension and through the attaching portions of the flexible members respectively, the rebent portions coacting with the depending extension of the valve dart to cause the frictional contact of the bowed portions with the inside of the tubular member, when the valve dart is moved upwardly with respect to the shell, to releasably hold the valve dart off the seat, to open the lower end of the shell.

1,625,687. DISPLAY CARTON. JOHN J. RYAN and JOHN GAFFNEY, New Haven, Conn., assignors to National Folding Box Company, New Haven, Conn., a Corporation of New Jersey. Filed Apr. 17, 1925. Serial No. 23,748. 3 Claims. (Cl. 206—44.)



1. As an article of manufacture, a carton blank having a bottom section, a top section, a front section intermediate and unitary with bottom and top sections, a back section, end sections at each end of the bottom section, tabs formed on the edges of said end section opposite said bottom section for folding into the carton, an end section at each end of said top section having tabs

thereon for folding into the carton and an extension which projects further from said end section at given points than at other points and a tab formed as a back-

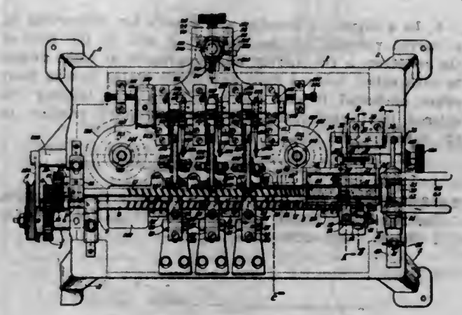


ward extension of said top section, said top being printed to simulate articles in the carton and said tab being printed with an advertising display.

1,625,688. ROOF-FLASHING SEALING AND RETAINING DEVICE. GEORGE W. SCHAEFFER, Chicago, Ill. Filed Nov. 25, 1925. Serial No. 71,314. 1 Claim. (Cl. 108—26.)

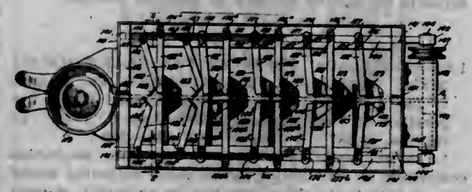
A device for the purpose indicated consisting of sheet metal folded to form two similar plies spaced apart for admitting a metal sheet between them, one ply being bent away from the other at right angles along a line parallel to the fold at a substantial distance therefrom, the other ply being left extending beyond said line for a substantial distance for subsequent bending at a like angle after insertion of the metal sheet, and one ply being formed with one or more projections extending for contact with the other ply to maintain the spacing between them before insertion of said sheet.

1,625,689. VALVE STRUCTURE. GEORGE WILLIAM SPANGLER, Greencastle, Pa. Filed Mar. 3, 1925. Serial No. 12,864. 1 Claim. (Cl. 50—38.)



In a valve structure of the class described, a new article of manufacture comprising a casing in the form of a single casting, the central portion of which is substantially Y-shaped in cross-section and formed at its top with outstanding segments carrying an upstanding internally screw-threaded flange, the opposite end portions of the casting being cylindrical in cross-section, the portion of the casing between the ends and the aforesaid central portion being gradually increased in height and provided with inclined top portions, an open top cylinder formed on the exterior one side of the casting, and a closure plug cooperable with the aforesaid flange.

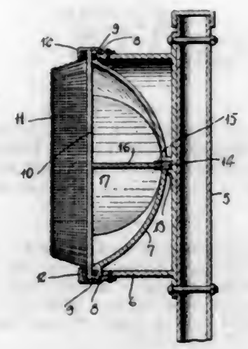
1,625,690. ORNAMENTAL AWNING FABRIC AND METHOD OF MAKING THE SAME. ANDREW SWANFELDT, Los Angeles, Calif. Filed Feb. 11, 1926. Serial No. 87,710. 1 Claim. (Cl. 41—17.)



The method of ornamenting awning material which consists in covering the material with a composite design embodying a plurality of dissimilar characters of different colors arranged so as to produce a nonpatterned effect.

1,625,691. NEEDLE-STRAIGHTENING MACHINE. WILLIAM TIVENDALE, Clydebank, Scotland, assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Jan. 24, 1925, Serial No. 4,378, and in Great Britain Feb. 13, 1924. 40 Claims. (Cl. 153—39.)

1. A needle-straightening machine having a plurality of hammers arranged to individually act upon each of the needles at different portions of the length thereof, and means for relatively feeding the needles and hammers during effective needle-straightening operations of said hammers.



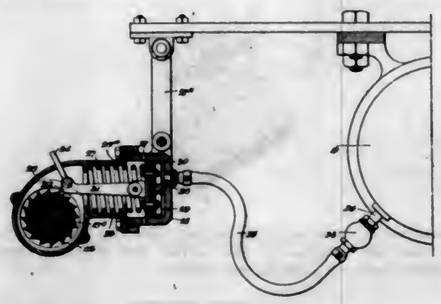
1,625,692. YARN CLEANER. HENRY E. VAN NESS, Elmira, N. Y. Original application filed Feb. 14, 1923, Serial No. 618,883. Divided and this application filed June 4, 1925. Serial No. 34,787. 4 Claims. (Cl. 28—66.)

1. In a yarn cleaner for removing particles from a traveling yarn, two pairs of transverse blades located

so that the yarn passes successively between the inner edges of the blades of each pair, and means for causing alternate separating movements of the blades of each pair.

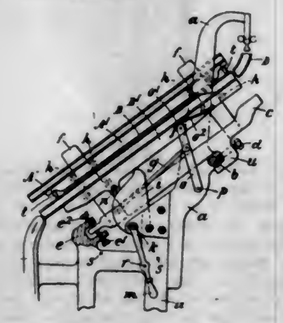
1,625,693. SIGNAL. THOMAS F. VEST, Birmingham, Ala., assignor of one-half to Two Vest Sign Company, Birmingham, Ala., a Corporation of Alabama. Filed Jan. 15, 1926. Serial No. 81,453. 2 Claims. (Cl. 88—1.)

1. In a signal, a housing and means for supporting it, a curved reflector in the housing, a seat in the wall of the reflector, a rib therein having grooves at right angles to each other, colored light penetrable plates having their edges anchored in the rib, and means for holding the colored light penetrable plates in assembled relation to the reflector and rib.



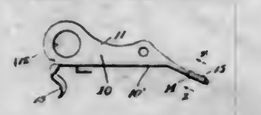
1,625,694. FOLDABLE RACK. HAROLD E. WILLIAMS, Carthage, Mo. Filed July 9, 1925. Serial No. 42,576. 3 Claims. (Cl. 224—29.)

2. A rack comprising an upper longitudinal rail, means for connecting the rack to a running board, foldable jointed supports uniting the rail and the said connecting means, each consisting of a pair of links respectively pivoted to the rail and to the connecting means, and pivotally united with each other, a rigid intermediate bar connecting the jointed supports at their intermediate pivotal connections, and means interposed directly between the top rail and at least one of the jointed foldable supports for holding the rack in extended position.



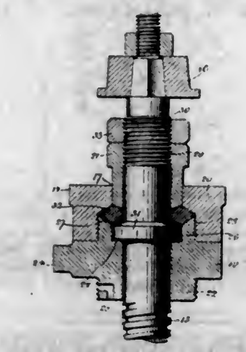
1,625,695. SLACK ADJUSTER FOR BRAKE MECHANISM. WALTER S. ADAMS, Philadelphia, Pa., assignor to The J. G. Brill Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 3, 1925. Serial No. 41,287. 5 Claims. (Cl. 188—203.)

1. An automatic slack adjuster for brake mechanism comprising in combination, brake shoes, actuating mechanism for the brake shoes including an adjustable element, an auxiliary cylinder mechanism, means for admitting air to the cylinder whenever the actuating mechanism moves beyond a predetermined position, means connected with the cylinder mechanism for adjusting the adjustable element when the cylinder mechanism is operated by the direct action of the air admitted as aforesaid, and means



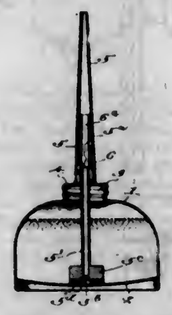
for retaining air in the cylinder mechanism to permit delayed action after the brake shoes are released by the actuating mechanism.

1,625,696. TYPOGRAPHICAL COMPOSING MACHINE. CHRISTIAN AUGUSTUS ALBRECHT, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y., a Company of New York. Filed Nov. 8, 1925, Serial No. 66,470, and in Germany Feb. 4, 1925. 12 Claims. (Cl. 199—45.)



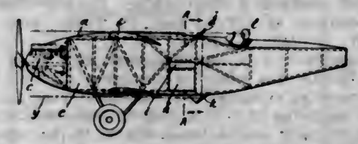
2. A typographical composing machine according to claim 1, characterized by the fact that the shifting devices are so constructed that, without alteration, they are adapted for use in connection with different numbers of magazines.

1,625,697. METHOD OF MAKING BREAKER ARMS. JOHN C. BAKER, Lake Bluff, Ill., assignor to Fansteel Products Company, Inc., North Chicago, Ill., a Corporation of New York. Filed June 17, 1925. Serial No. 37,632. 4 Claims. (Cl. 113—112.)



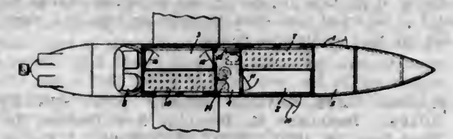
1. The method of fixing a contact member to a breaker arm, which consists in forming a depression in the arm, placing a disc of metallic welding medium in said depression, the thickness of said disc being less than the depth of said depression, placing a contact member above said disc, and then subjecting the arm, contact member and disc to a welding heat while so positioned that the weight of said contact member is the sole means which maintains said member in said depression.

1,625,698. PACKING FOR GATE VALVES. WILLIAM H. BARTON, Montclair, N. J. Filed Nov. 6, 1926. Serial No. 146,761. 3 Claims. (Cl. 251—50.)



1. In a valve having a stem, a packing box of separable parts having a packing therein, a shoulder on the stem arranged between a portion of said box and the packing, said packing box including a gland adjustably connected with the stem and removable therefrom and co-active with the packing.

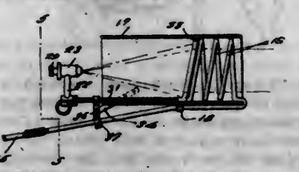
1,625,699. HAND OILER. ARTHUR R. BENTON, Beverly Hills, Calif. Filed Jan. 7, 1926. Serial No. 79,764. 7 Claims. (Cl. 221—48.)



1. A hand liquid dispenser can having its discharge spout provided with an extension within the can, said extension being freely slidable by gravity within the spout and constituting the only inlet to said spout.

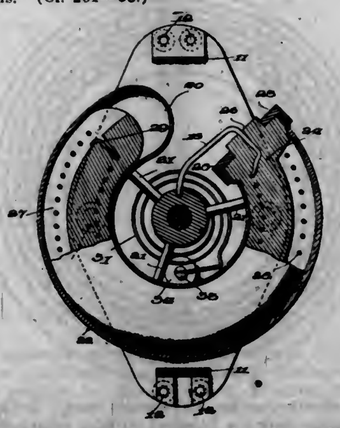
1,625,700. FREIGHT-AIRPLANE BODY. ARCHIBALD BLACK, Garden City, N. Y. Filed June 1, 1925. Serial No. 34,260. 8 Claims. (Cl. 244—30.)

1. An airplane body having a cargo compartment comprising substantially flat side walls, and substantially flat top and bottom walls, forming a symmetrical internal cargo space, standardized cargo containers of dimensions corresponding to the said cargo space and openings in the side walls to permit removal of the said containers.



1,625,701. AIRPLANE AND OTHER AIRCRAFT BODY. ARCHIBALD BLACK, Garden City, N. Y. Filed June 8, 1925. Serial No. 35,755. 9 Claims. (Cl. 244—30.)

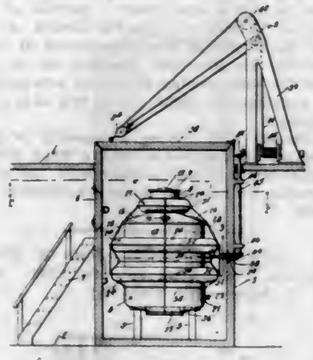
4. An aircraft body having side walls defining a load carrying compartment, an opening in one side wall to give access to said compartment, a portion of the side wall structure extending below the bottom of the body and below the bottom of the compartment at said opening, to provide the structural strength for the said side wall below the said opening and being arranged to offer minimum resistance to flight, and a foot step carried by said extension.



9. An aircraft body having a plurality of passenger accommodating compartments, and a fixed lower berth and an upper berth in each compartment, the said berths being staggered with respect to the longitudinal center of the aircraft.

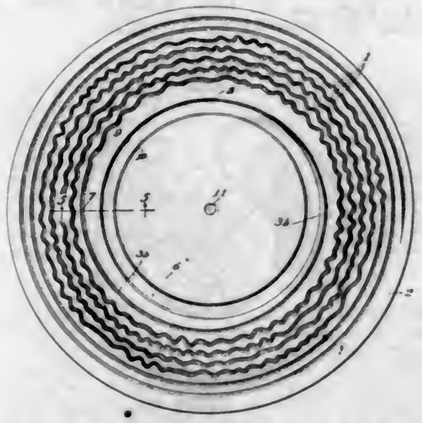
1,625,702. CACTUS BURNER. JOHN B. BLACKWALL, San Antonio, Tex. Filed July 18, 1925. Serial No. 44,549. 2 Claims. (Cl. 158—33.)

1. A burner of the character described comprising a cylindrical casing having the outer end portion of a pipe line coiled within the forward end thereof, a valve jet secured to the outer end of the pipe line and arranged centrally and in spaced relation adjacent the rear end of the casing, a sliding heat resisting flame deflector arranged within the casing in alinement with the coils, means whereby to adjust said deflector relative to the coils, and a force feed reservoir secured to the opposite end of the pipe line.



1,625,703. RHEOSTAT. EDWARD HALFORD BOBO, Ranger, Tex. Filed Aug. 21, 1925. Serial No. 51,623. 7 Claims. (Cl. 201—55.)

1. In a rheostat, an arcuate shaped metallic tube, means for rotating the tube about its axis, a core of insulating material arranged in said tube, a resistance

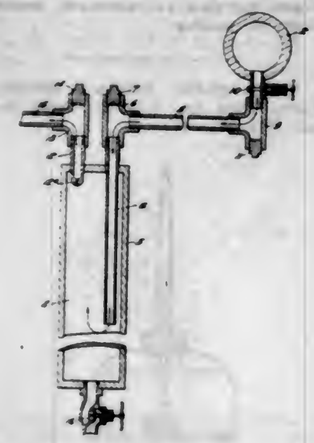


coil molded within said core with a part of each convolution of said resistance exposed, and a body of current conducting liquid in the tube adapted to move with rotation of the tube and during said movement change the point of electrical connection between the tube and resistance coil in a continuous manner.

1,625,704. LIFE-SAVING MEANS FOR SUNKEN SHIPS. BENJAMIN M. BONILLA, New Orleans, La. Filed June 24, 1926. Serial No. 118,295. 3 Claims. (Cl. 114—16.7.)

2. In a life saving mechanism for sunken vessels, a room located in the vessel, a hinged closure for said room, a buoyant structure adapted to be located in the room and to be hermetically sealed, a door lifting device connected with the door of the room, gearing for actuating said lifting device, a shaft extending into said buoyant structure and removably connected with said gearing, means to actuate said shaft, and means to cover the bearing for the shaft when the shaft is withdrawn from engaging the gearing.

1,625,705. SOUND RECORD. FRANK C. HINCKLEY, Stratford, Conn., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn., a Corporation of New York. Filed May 29, 1924. Serial No. 716,665. 6 Claims. (Cl. 274—41.)



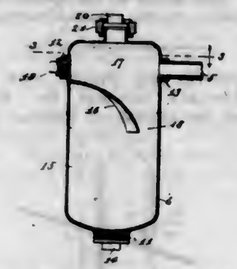
3. A silently ending phonograph record including a body portion having a terminal circular groove provided with a sloping outer wall, and having a high pitch leading-in groove entering the circular groove near the upper edge of the wall and connected with the sound groove.

1,625,706. WAXED MILK-BOTTLE STOPPER MADE OF PASTEBOARD. CATHERINE BRADLEY and LILLIAN MARGHERITTA BRADLEY, Bathurst, New Brunswick, Canada. Filed Apr. 22, 1926, Serial No. 103,948, and in Canada Sept. 21, 1925. 1 Claim. (Cl. 215—51.)

A new and useful closure for a bottle or jar consisting of a disc showing two slots, one thru centre, the other near the edge and parallel to first slot, and a tongue detachably secured to disc by a necessarily larger portion at one end, the other end thereof being passed thru said slots to form an extractor pad or tab.

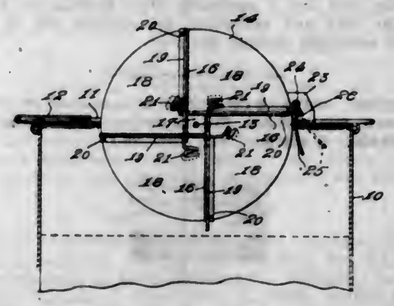
1,625,707. BLOW-OFF DEVICE FOR STEAM BOILERS. ERWIN CALDWELL, Birmingham, Ala., assignor to Perry-Caldwell Manufacturing Company (Inc.), a Corporation of Alabama. Filed Jan. 21, 1925. Serial No. 3,818. 6 Claims. (Cl. 122—382.)

1. A blow-off device for steam boilers comprising a receptacle having means for connecting it to receive water from the water space of a boiler, and refuse-water discharge means leading from said receptacle at a point removed from the path of the boiler water entering it and having a restricted orifice leading upwardly from the upper portion of the receptacle for continuously discharging the boiler water received by the receptacle.



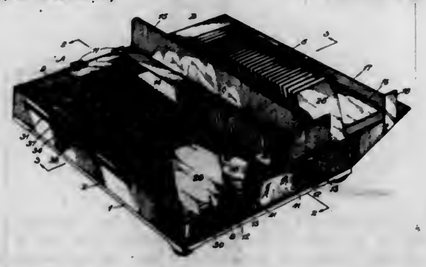
1,625,708. ILLUMINATED SIGN. EUGENE CARRAINE, Philadelphia, Pa. Filed Oct. 31, 1925. Serial No. 65,967. 1 Claim. (Cl. 40—132.)

The combination in an illuminated sign, of a front section having open letters or characters therein; transparent material extending over the open spaces; a body portion consisting of a back and two side members, one edge of the body section being secured to the front section; a strip at the back of the front section under which the opposite end of the body section is located; top and bottom sections hinged to the front section, the top section extending over the body section and the bottom extending within the body section; perforated lugs at the upper edge of the body portion; slots in the top section through which the lugs extend; tongues on the body section extending into the perforations of the lugs; perforated lugs on the bottom section, slots in the body



portion through which the lugs extend; and tongues on the body portion extending through the perforations in the lugs, locking the parts together.

1,625,709. SEDIMENT TRAP FOR BOILERS. FREDERICK CONRAD, Bogota, N. J., assignor of one-half to Bertha L. Conrad, Bogota, N. J. Filed Mar. 6, 1926. Serial No. 92,878. 2 Claims. (Cl. 210—57.)



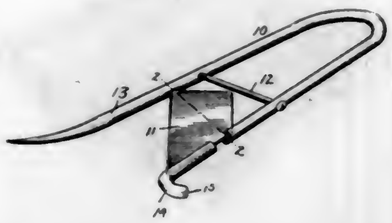
1. A sediment trap for domestic boilers comprising a body having top and bottom openings and a pair of side openings near the top, means for closing certain of said openings, and a division plate for dividing the body into upper and lower compartments, said division plate being arranged below said side opening and inclined from the horizontal to almost the vertical so that sediment deposited thereon will move to the lowermost part thereof and then drop into the lower compartment, said lowermostpart being spaced from the wall of the body to present a passage-way.

1,625,710. TRAP. HENRY J. CORSON, Orville, Wash., assignor of one-half to William H. Comkle, Orville, Wash. Filed June 11, 1926. Serial No. 115,316. 2 Claims. (Cl. 43—72.)

1. An animal trap comprising a container, a stationary platform thereon, a rotor at the inner end of the platform, said rotor including spaced side walls, circumferentially spaced platforms extending outwardly from a point substantially central of the rotor and providing together with the side walls, separate compartments, a trigger movable longitudinally of each compartment and adapted to extend beyond the outer end thereof, a pivotally mounted plate arranged in the path of the extended end of the trigger and having an opening therein to receive said trigger and hold the latter against movement and a bait holder at the inner end of the trigger, whereby an animal may pull the trigger longitudinally to release the rotor.

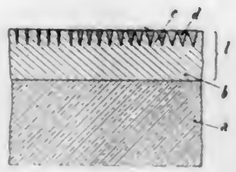
1,625,711. SORTING DEVICE. GEORGE W. COX, Jr., Washington, D. C., assignor to National Assorting Company, Washington, D. C., a Corporation of Delaware. Filed Sept. 26, 1925. Serial No. 58,893. 30 Claims. (Cl. 129—16.)

1. A sorting device comprising a plurality of movable elements each provided with a plurality of tabs, the tabs of the several elements being arranged in a plurality of parallel rows, each element being provided with a plurality of sets of indicia, each set of which is classified in accordance with the classification of one of said rows, and means spacing each element of each row from the adjacent element in the same row.



1,625,712. APPARATUS FOR COOLING BY THE EXPANSION OF GASES. VICTOR CREMIEU, Colombieres-sur-Orb, France. Filed Jan. 9, 1926, Serial No. 80,198, and in France May 12, 1925. 2 Claims. (Cl. 62—92.)

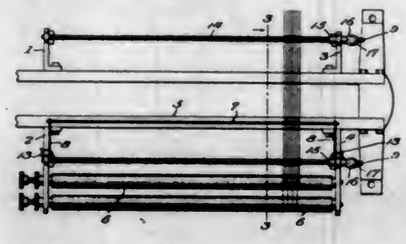
1. An apparatus for the production of cold by the expansion of compressed gas, comprising a stationary supply tube adapted for connection with a source of compressed gas, a tapered seating provided at the end of said tube, a stationary tube surrounding the said supply tube upon a portion of its length and a slidable element comprising an internal tube which is slidable with a slight



play in the space between the two stationary tubes, said internal tube having a tapered seating cooperating with the said seating of the first-mentioned stationary tube, a closed chamber surrounding this last-mentioned seating, and an external tube slidable with a slight play upon the second stationary tube, narrow channels being formed through the wall of the said seating of the first-mentioned stationary tube, other narrow channels being formed upon the tapered surface of the said seating, said channels serving for the flow of the gas contained in the first-mentioned stationary tube into the space between said tube and the internal tube of the said movable element.

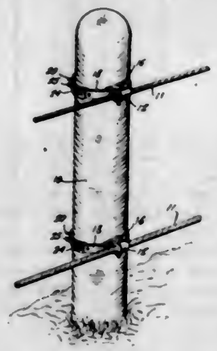
1,625,713. CORN KNIFE. JOHN F. CULLISON, Oberlin, Kans. Filed Apr. 1, 1925. Serial No. 19,940. 1 Claim. (Cl. 30—9.)

A broom corn knife comprising a handle, having legs and a blade situated between the legs, with its cutting edge extending obliquely and providing an angular space between it and one of the legs, said leg being longer than the other leg and outturned from the other leg and being of tapering form at its free end, and said other leg being blunt.



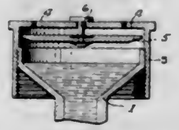
1,625,714. PHOTOCOLLOGRAPHIC PRINTING PLATE AND METHOD FOR PRODUCING THE SAME. MARIANO DE' SPERATI, Turin, Italy, assignor to Argentographica (U. S. A.) Limited, London, England, a Company of England. Filed May 12, 1926, Serial No. 108,616, and in Italy May 3, 1925. 8 Claims. (Cl. 41—41.5.)

1. A printing plate comprising a support, a layer of colloidal material on said support, said layer comprising a moisture impervious sheet immediately adjacent to said support and a moisture pervious sheet on its skin or surface remote from said support, said moisture pervious sheet having definite, relatively small hard and impervious spots for inking and printing purposes.



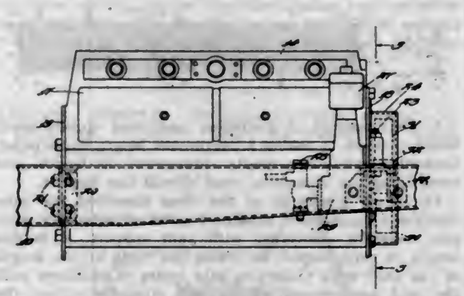
8. A printing plate comprising a support; and a layer of colloidal material on the support which is hardened and impervious to moisture with the exception of an extremely thin superficial skin that is differentiated in hardened portions and pervious portions to form the printing surface.

1,625,715. RACK FOR HOLDING WARP THREADS. HUGH P. EANES, Asheville, N. C., assignor to Paramount Machine Company, a Corporation of North Carolina. Original application filed Aug. 2, 1924, Serial No. 729,666. Divided and this application filed Aug. 2, 1924. Serial No. 729,709. 3 Claims. (Cl. 28—42.)



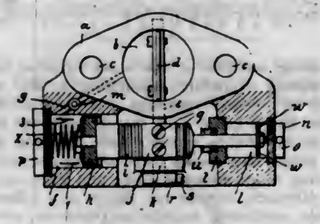
1. A device of the character described including a support, a rod held thereby, a spiral spring sleeved over the said rod and adapted to receive threads drawn over the rod between its coils, a sleeve mounted on the rod and adapted to be moved longitudinally thereof for adjusting the tension of the spring, and means for holding said sleeve in its adjusted position.

1,625,716. PROTECTOR FENCE FOR HIGHWAYS. CHARLES EDWARDS, Lansford, Pa. Filed Dec. 29, 1926. Serial No. 157,838. 2 Claims. (Cl. 256—54.)



1. In a rope fence protector for highways, the combination with posts, ropes for said posts, of yokes contacting with and removably secured to the posts, a cross sectional U-shaped rope guide having its arms received in the yoke and a removable pivot holding the guide in the yoke and permitting the rounded end of the guide extending through the yoke.

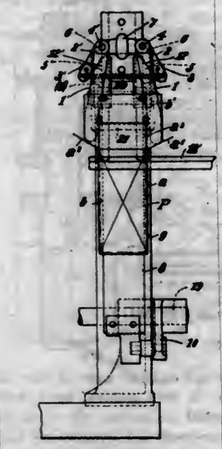
1,625,717. GREASE-CUP VALVE. ARTHUR B. FAIRCHILD, Buhl, Idaho. Filed July 14, 1926. Serial No. 122,428. 2 Claims. (Cl. 184—89.)



1. A grease cup having perforations in the ends of its cap, a washer closing the perforations and manually operated means for moving the washer away from the perforations to permit air to enter the cap.

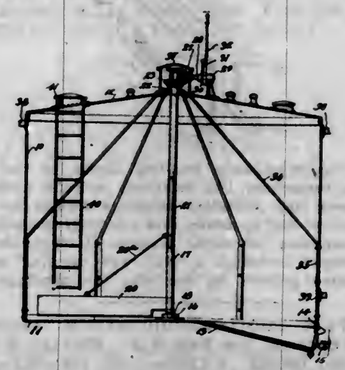
1,625,718. AUTOMOBILE ENGINE. STEPHEN IVAN FERETE and STUART G. BAITS, Detroit, Mich., assignors to Hudson Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed May 18, 1925. Serial No. 29,928. 6 Claims. (Cl. 123—195.)

1. The combination of an engine block, a crankshaft, a cam shaft, a third shaft for driving one or more of the essential moving parts of the engine, said engine block having centers for said crankshaft and cam shaft, and a flat plate secured to one face of said engine block and carrying the center for said third shaft.



1,625,719. AUTOMATIC REGULATOR FOR INTERNAL-COMBUSTION ENGINES. LOUIS FERRETTE, Paris, France. Filed May 4, 1926, Serial No. 106,774, and in France Jan. 6, 1926. 2 Claims. (Cl. 137—153.)

1. An automatic regulating device for internal combustion engines comprising a main body block, an aperture therein through which fuel is admitted to the intake manifold of an engine, a throttle valve pivotally mounted in said aperture, a shaft reciprocable in said block at right angles to the throttle axis, a piston on one end of said shaft and responsive to negative pressure in said aperture, a spring for returning the piston to its initial position, a conduit entirely within the body block allowing communication between the fuel aperture and the space at the head of said piston, a damping device attached to the opposite end of said shaft and opposing movement of said piston, and throttle operating mechanism located between the piston and damping device and actuated by movement of said shaft.

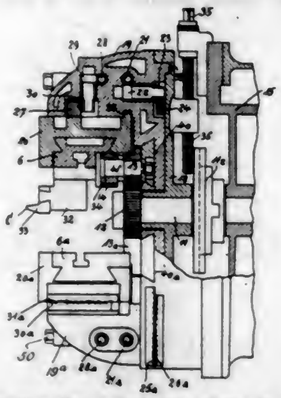


1,625,720. CLOSING PARCELS. PAUL GANOLER, Esslingen, Germany, assignor to the Firm Fr. Hesser Maschinenfabrik-Aktiengesellschaft, Stuttgart-Cannstatt, Germany. Filed Oct. 6, 1923, Serial No. 666,987, and in Germany Oct. 17, 1922. 5 Claims. (Cl. 93—6.)

1. In a device for closing a filled bag, means for flattening the empty portion of the bag, horizontal rotary means adapted to grip the uppermost edge of said flattened empty portion, means for rotating said horizontal rotary means, causing them to coil the said

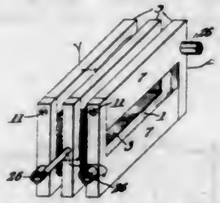
empty portion, and means for reducing the relative distance of the said horizontal means from the top of the filled portion of the bag while coiling the empty portion.

1,625,721. TANK CLEANER. EDWARD J. HAHN, Gridley, Kans. Filed May 5, 1925. Serial No. 28,186. 9 Claims. (Cl. 210—209.)



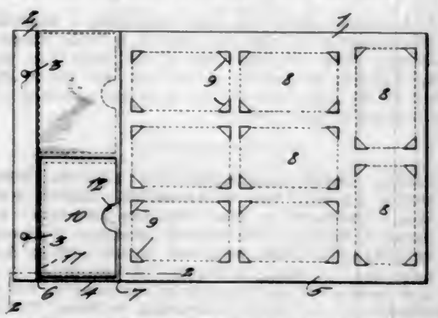
1. A cleaning device for tanks comprising a rotatable shaft adapted to be supported therein, a blade laterally projecting from the lower end of the shaft and disposed adjacent the bottom of the tank, and means disposed at the upper end of said shaft for adjusting the blade longitudinally thereof.

1,625,722. BEVEL-WHEEL-SHAPING DEVICE OPERATING BY ROLLING MOVEMENTS. MARTIN HARBECK, Grossflottbeck, near Hamburg, Germany, assignor to Heidenreich & Harbeck, Hamburg, Germany. Filed Jan. 14, 1926, Serial No. 81,812, and in Germany Nov. 13, 1924. 3 Claims. (Cl. 90—9.)



1. A bevel wheel shaping machine operating by rolling movement of the blank, comprising a blank carrier and cutters, both adapted to rotate about axes fixed as to space, means for adjusting the cutters of two intersecting axes including a face plate, angular guides adjustable in a circular path on said face plate, ran

guides carried by said angular guides and adjustable with respect to the angular guides in paths concentric to an



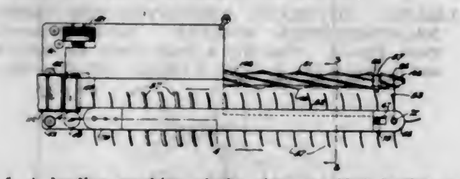
axis intersecting the central axis of the face plate, and rams reciprocable in said guides, upon which rams said cutters are mounted.

1,625,723. INDUCTIVE-COUPLING DEVICE. LEWIS M. HULL, Mountain Lakes, and RICHARD W. SEABURY, Boonton, N. J., assignors to Radio Frequency Laboratories, Incorporated, Boonton, N. J., a Corporation of New Jersey. Filed Dec. 27, 1922. Serial No. 609,230. 7 Claims. (Cl. 171—119.)

1. An electro-magnetic coupling device of the type described, comprising two relatively movable elements, and primary and secondary windings formed by twin conductors on said elements, said relatively movable elements comprising concentric surfaces of revolution, the outer element including a thin web carrying spaced ribs, forming grooves for receiving the windings.

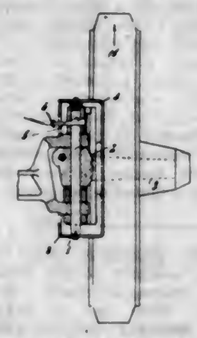
1,625,724. PHOTOGRAPHIC ALBUM. FERDINAND HUSZTI-HORVATH, New York, N. Y. Filed Oct. 4, 1926. Serial No. 139,502. 6 Claims. (Cl. 129—20.)

1. A photograph or like album made up of leaves each including a main section and a stub section, the stub section being provided on opposite surfaces in offset relation with pockets.



1,625,725. METHOD AND APPARATUS FOR PROVIDING PARACHUTE SHROUD LINES. LESLIE L. IRVIN, Buffalo, N. Y., assignor to Irvin Air Chute Co., Buffalo, N. Y., a Corporation of New York. Filed May 15, 1925. Serial No. 30,584. 30 Claims. (Cl. 33—125.)

1. That method of producing parachute shroud cords which consists in taking a continuous length of material, tensioning the same equally throughout its length, and subdividing the same into equal shroud line lengths.



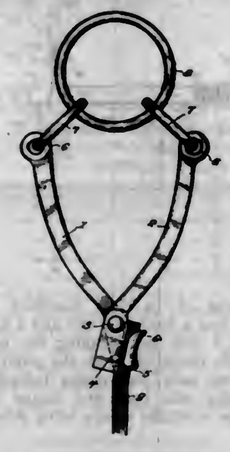
18. In an apparatus of the class described the combination of a support, a pair of series of relatively movable members associated with said support, a flexible length of cord, means for fixing the ends of the length of the cord with respect to said series of members with the said cord wound sig-zag and alternately from the one series of members above the other series of members thus subdividing the said cord into a plurality of lengths of cord, and means for moving the one series of members away from the other series of members to tension said lengths of cord.

1,625,726. COAL-LOADING MACHINE. THOMAS L. JOHNSON, Charleston, W. Va. Filed Mar. 18, 1925. Serial No. 16,472. 9 Claims. (Cl. 198—9.)

1. A loading machine of the class specified having a forward loading extremity comprising a flat receiving plate with an endless receiving conveyor at one side edge thereof and a guard near the opposite side edge, the conveyor having flights movable over the said plate between the supporting means therefor and the said guard, and a feeding roller disposed above and near one side of the plate outwardly beyond the guard, said roller having spiral blades continuing lengthwise thereover, and means for operating the receiving conveyor and roller.

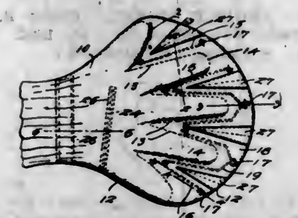
1,625,727. BRAKE DEVICE. HENRI WOUTER JONKHOFF, Semarang, Java, Dutch East Indies. Filed Apr. 8, 1924, Serial No. 705,116, and in the Netherlands Mar. 21, 1922. 5 Claims. (Cl. 188—140.)

1. An automatic device for applying wheel brakes, comprising, mechanism for use with a wheel and its brake, the mechanism including, a drum mounted to remain



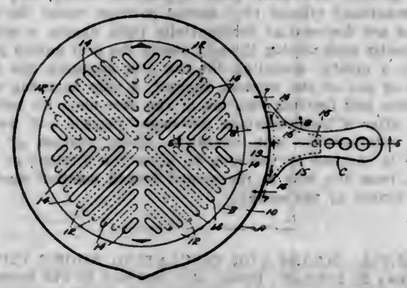
stationary upon rotation of the wheel in one direction, detent means to cause the drum to rotate with the wheel upon rotation in the other direction, and connecting means between the drum and the brake arranged to apply the brake upon rotation of the drum, the detent means being a bell crank lever pivoted to the drum, one arm of the lever bearing against the wheel spokes and operating as a pawl therewith, whereby in one direction it permits passage of the wheel spokes, and in the other direction it is entrained by the wheel spokes.

1,625,728. BOTTLE. MICHAEL A. KLEIN, Chicago, Ill. Filed Jan. 18, 1923. Serial No. 613,502. 1 Claim. (Cl. 215—1.)



In a bottle comprising an elongated body normally positioned in a longitudinal plane and resting on one of the side walls of the body when in an inoperative position and formed substantially rectangular in cross section and having its longitudinal edge portions bevelled, one of the end walls of said body being rounded, and a neck defined by the body, the other of the end walls of the body being curved outwardly and inwardly with respect to the body and merging into the wall of the neck whereby said body may be rolled upon said other end portion to dispose the neck in substantially a horizontal plane, substantially as described.

1,625,729. TONGS. JOHN HOWARD KRUM, Bonners Ferry, Idaho, assignor of one-half to Charles Earl McGlocklin and Elmer David Traver, Bonners Ferry, Idaho. Filed July 6, 1925. Serial No. 41,843. 1 Claim. (Cl. 24—132.)

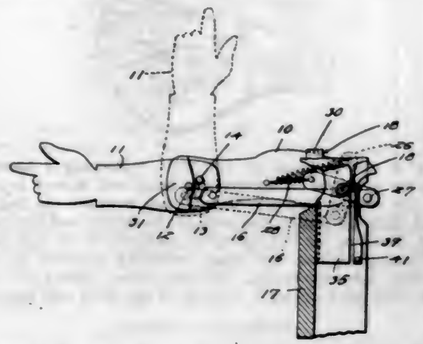


A cable tongs comprising oppositely disposed arms which cross each other and are pivoted together adjacent one end thereof, the end of one arm adjacent the pivot being flattened by having its inner face concaved longitudinally to form a jaw, the other arm being likewise flattened adjacent the pivot points and having its inner face widened from its inner edge and the outer edge of the widened portion rounded inwardly to form a second jaw, the inner end of the second jaw being curved outwardly and the opposite end of the second jaw being substantially straight and the said second jaw being bowed inwardly with one end curved in opposed relation, and means attached to the arms opposite the jaws whereby to move said jaws toward and away from each other.

1,625,730. WEBBED HAND FOR SWIMMERS. ALEXANDER HENRY LAKE, Marshfield, Wis. Filed May 29, 1926. Serial No. 112,621. 9 Claims. (Cl. 9—21.5.)

2. A webbed hand for swimmers comprising a member having a pocket to receive the hand and spread fingers of the wearer and providing a web between the fingers and extended beyond the ends of the fingers and reinforcing elements for the extended portions of the web and extending between the finger receiving portions of the pocket, said reinforcing elements being curved to cup the extended portions of the web at the palm side thereof.

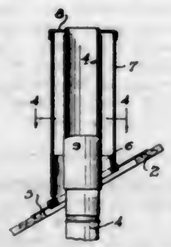
1,625,731. HANDLE FOR COOKING UTENSILS. ALEXANDER F. LEE, Boston, Mass. Filed Nov. 19, 1925. Serial No. 70,020. 1 Claim. (Cl. 53—5.)



A cooking utensil having a metallic stem projecting therefrom and a metallic handle having a portion at one end thereof overlapping said stem, spaced apart from said stem and secured to said stem at a plurality of points, there being an air space between the overlapping portions of said stem and handle and between the said handl and the body of the utensil, said points of attachment being small relative to the area of the overlapping portions and being the only metallic contact between the said handle and the body and stem of the utensil.

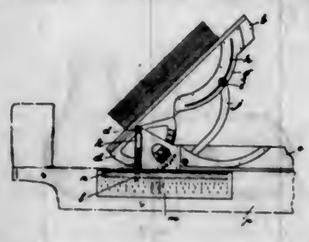
1,625,732. MANUFACTURE OF BUTYRIC ACIDS AND OTHER ALIPHATIC ACIDS. LOUIS LE FRANC, Paris, France, assignor to Lefranc & Cie., Paris, France, a Company. Filed Aug. 18, 1922, Serial No. 582,804, and in France Sept. 26, 1921. 1 Claim. (Cl. 260—120.)

A process of manufacture of butyric acid, starting with cellulosic substances which comprises the following steps: first reducing said cellulosic substances into a powder; hydrolyzing said powdered substances into a sugar must at about 170° C.; neutralizing the acids produced by means of calcium carbonate; purifying by add-



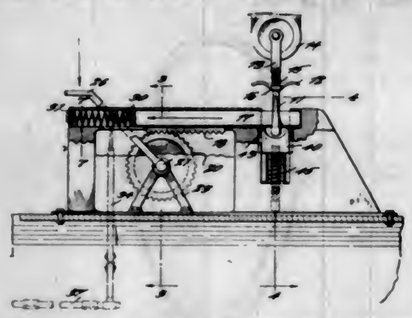
ing calcium oxide until an alkaline reaction is shown, whereby the harmful impurities are precipitated and the medium is adapted to the biochemical action; bringing the must to about 40° C.; preparing a culture by sowing sugary solutions with bacilli of the types found in garden soil; effecting successive fermentations of said culture at 40° C.; sowing the purified must with the culture thus prepared which is capable of a symbiotic action upon the must; allowing said sown must to ferment in a closed vessel and separating the butyric acid obtained in the form of a butyrate substantially as described.

1,625,733. VEHICLE SIGNAL. EDWIN R. LINEHAN, River Falls, Wis. Filed Nov. 16, 1926. Serial No. 148,704. 8 Claims. (Cl. 116—52.)



1. A signal of the type described comprising an arm formed in two sections connected at their adjacent ends for pivotal movement from a position where they are substantially aligned to a second position where the sections are disposed at substantially right angles, a spring normally maintaining the sections in the first named position, a pivotal mounting for the arm engaging the free end of one of the sections thereof, a stop engaging said section and limiting rotation of the arm upon its mounting after a predetermined movement thereof and means for rotating the arm operative when rotation of the arm is checked by the stop to move the sections of the arm from the first to the second named position against the action of the spring.

1,625,734. MEANS FOR INSULATING SMOKE PIPES. LENA E. LINHART, Dawn, Mo., assignor to The Buckeye Incubator Company, Springfield, Ohio, a Corporation of Ohio. Filed Sept. 1, 1925. Serial No. 53,844. 2 Claims. (Cl. 126—314.)

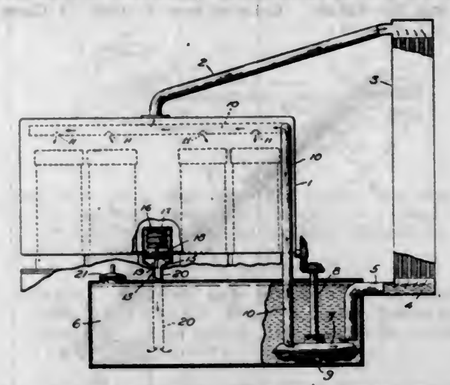


1. The combination, with the smoke pipe of a stove located in an inclosing structure, the upper part of which extends through an opening of said structure into outside atmosphere, of a thimble-like member secured to said structure about said opening and through which said pipe passes, and a single jacket of uniform diameter throughout for the upper end of said pipe spaced therefrom to form an air chamber, the upper end of said jacket being closed to outside atmosphere and the lower end fitted to said thimble with a tight fit to close said jacket to outer air at the lower end thereof, leaving the air chamber formed by said jacket in communication only with the air in said structure.

1,625,735. DRAFTING INSTRUMENT. MICHAEL MAURER, Spisska Nova Ves, Czechoslovakia. Filed Nov. 21, 1925. Serial No. 70,641. 1 Claim. (Cl. 33—75.)

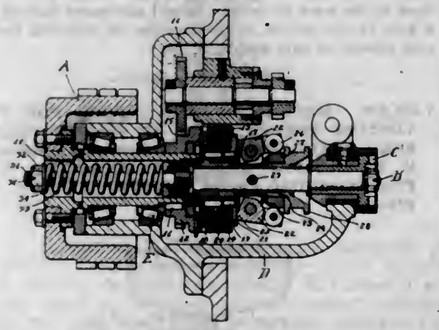
A drawing instrument comprising a straight-edge, a protractor member bearing a scale, secured to an edge thereof at one end of said edge, a guide plate having an arcuate slot secured to said straight-edge, a second straight-edge, a plate carried thereby, means pivoting said first-named straight-edge to said plate concentric with said protractor, said plate having an opening through which the protractor scale may be read, a strut having one end pivoted to said second-named straight-edge, means connecting the other end slidingly in said slot, a pointer on the second-named straight-edge, and adjustable normally to said edge and a third straight-edge having a scale thereon for co-operation with the said pointer.

1,625,736. BOAT RETAINING AND RELEASING DEVICE. GUS MENEFEE, Atlanta, Ga. Filed June 11, 1926. Serial No. 115,308. 4 Claims. (Cl. 9—23.)



1. In apparatus of the class described, boat launching means including a block and fall and a hook connected with the block, a bolt for engaging the hook, a pedal, means operatively connected with the pedal for releasing the bolt from the hook, and means independently operated for releasing said bolt, and means retaining the bolt inactive, the retaining means being releasable by the hook.

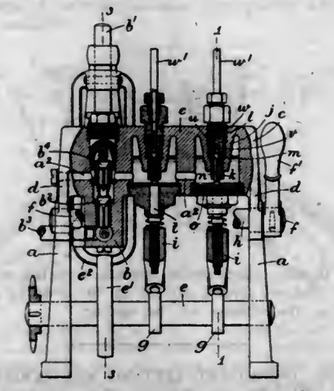
1,625,737. MEANS AND METHOD OF COOLING INTERNAL-COMBUSTION ENGINES. WELLINGTON W. MUIR, Lockport, N. Y. Filed Nov. 20, 1922. Serial No. 602,267. 11 Claims. (Cl. 123—178.)



1. In a cooling system for an internal combustion engine, the combination of a jacket; a tank; a radiator;

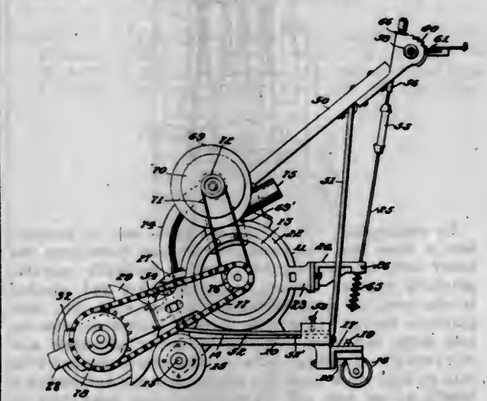
a pump located in said tank; connections between said jacket and radiator; connections between said radiator and tank; connections by which said pump forces liquid

from said tank back to said jacket; connections by which said liquid flows from said jacket back to said tank; and a thermostatically controlled valve for governing said last named connection.



1,625,738. MACHINE TOOL CLUTCH. LESTER F. NENNINGER, Cincinnati, Ohio, assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed May 9, 1925. Serial No. 29,202. 3 Claims. (Cl. 192—69.)

1. A clutch mechanism including a sleeve having a clutch spider portion and a contained spindle, the spider having clutch elements loosely associated therewith and the spindle having additional clutch elements mounted thereon and in co-operative relation to the clutch elements of the spider, the series of clutch elements being axially shiftable as an entirety on the spindle, a clutch finger hub secured on the spindle adjacent said parts, clamping fingers pivoted to said hub and provided with cam portions for operatively engaging certain of the clutch elements to exert a clamping action thereagainst, means on the spindle for shifting said fingers into and out of clamping position, and a compression spring supported by the spindle in position to engage the clutch elements and resist axial movement of the clutch as an entirety when clamping pressure is applied through the movement of the fingers.



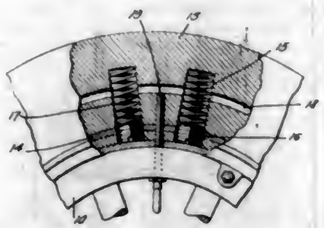
1,625,739. MEANS OR ARRANGEMENT FOR SUPPLYING LIQUID FUEL TO INTERNAL-COMBUSTION ENGINES. SIMON DOKK OLSEN, London, England. Filed Oct. 3, 1924, Serial No. 741,512, and in Great Britain Oct. 26, 1923. 5 Claims. (Cl. 123—139.)

1. In a liquid fuel supply device for internal-combustion engines, the combination of an accumulator reservoir arrangement, a distributor valve and a restricted oil passage leading therefrom and separate from said valve,

so that the fuel supply depends on the time the valve is open, and is independent of the extent of the opening, substantially as described.

1,625,740. FLOOR-SURFACING MACHINE. WILLIAM PASCHALL, Birmingham, Ala. Filed Aug. 13, 1924. Serial No. 731,855. 32 Claims. (Cl. 51—176.)

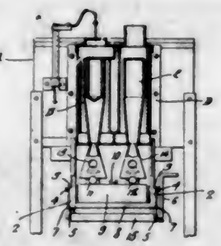
1. A floor surfacing machine comprising a base, a pair of coaxial upright ring bearings supported on the base, rings pivotally mounted on said ring bearings, arms extending forward from the rings, a surfacing drum on said arms, arms projecting rearwardly from said rings, a main handle also projecting rearwardly, and connections between said handle and said rearwardly projecting arms for varying the relation of the drum to the floor, substantially as set forth.



1,625,741. STEEL. OTTO PATTERMANN, Kladno, Czechoslovakia, assignor to Poldihütte, Palackeho Trida, Praha-Vinohrady, Czechoslovakia, a Joint Stock Company. Filed Jan. 29, 1926, Serial No. 84,754, and in Germany Jan. 8, 1925. 2 Claims. (Cl. 75—1.)

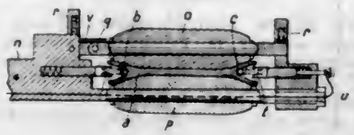
1. A special steel comprising 10% tungsten, 3% chromium and 3% nickel.

1,625,742. RESILIENT TIRE. EDGAR W. PERRY, Boston, Mass. Filed Nov. 6, 1925. Serial No. 67,363. 2 Claims. (Cl. 152—8.)



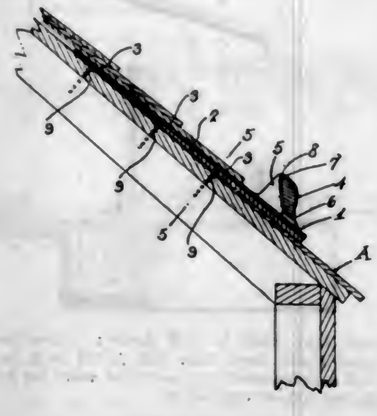
1. A resilient tire of the character described having an annular plate arranged therein adjacent the inner periph-

ery thereof, an air duct extending annularly of the tire and radially disposed interconnected pockets being ar-



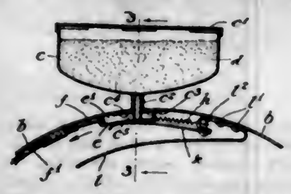
ranged therein, compression springs mounted within the pockets, and set screws carried by the annular plate for regulating the tension of the springs.

1,625,743. ORGANIZED LIFTING MECHANISM. ROBERT L. RAMSEY, Ben Wheeler, Tex. Original application filed Feb. 19, 1925, Serial No. 10,356. Divided and this application filed Aug. 7, 1926. Serial No. 127,956. 1 Claim. (Cl. 126—96.)



In combination, vertical spaced guide bars in parallelism, a cross bar interposed between and connecting the lower ends of said vertical bars, a vertically movable platform disposed between said guide bars and adapted in one position to be supported by said cross bar, said platform having at its ends vertical sleeves movable on said guide bars, and said sleeves having outwardly and downwardly extending arms, a rock shaft journaled in said vertical guide bars, below said cross bar and having a handle at one end, and vertically-disposed cams fixed to said rock shaft alongside said sleeves and located between the sleeves and the downwardly extending portions of said arms.

1,625,744. ELECTRIC-TRACTION SYSTEM FOR AGRICULTURAL IMPLEMENTS. FRANZ REMY, Fosses-lez-Namur, Belgium. Filed Apr. 19, 1926, Serial No. 103,132, and in Belgium Apr. 28, 1925. 6 Claims. (Cl. 191—12.)

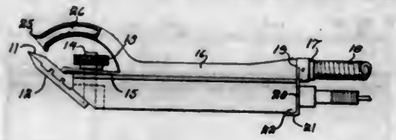


1. In an electric traction system for agricultural implements, a pair of fixed aerial conductors, current collecting elements movable along said conductors, a connecting cable supported on the ground and connected to said collector elements and means movable along said cable for collecting current therefrom.

1,625,745. HOOK BRACKET. JOHN J. RHODES, South Hamilton, Mass., assignor of one-half to Fred M. Gordon, South Hamilton, Mass. Filed June 30, 1924, Serial No. 723,297. Renewed Sept. 1, 1926. 1 Claim. (Cl. 304—19.)

A hook supporting bracket for a roof, comprising a stem and a head, the stem having holes therein so that it can be nailed to the roof, a semi-cup shaped member connected with the head to form a recess for receiving the head of a hook, the upper edge of said member having a curved recess therein to receive a portion of the stem of the hook to prevent lateral movement thereof and a hole in the bottom of the member for draining the recess formed by said member.

1,625,746. METHOD OF AND DEVICE FOR PREVENTING THE SKIDDING OF SELF-PROPELLED ROAD VEHICLES. ISADORE L. ROSENTHAL, Brooklyn, N. Y., assignor to Julia Rosenthal, Brooklyn, N. Y. Filed Jan. 2, 1926. Serial No. 78,735. 3 Claims. (Cl. 291—1.)



2. Devices of the character described comprising a container for friction material mounted on the mud guard and having flanges secured thereto, a discharge spout for the material, a valve plate slidable along the undersurface of the mud guard and disposed in operative relation to the spout to control the escape of material therefrom, spring means to resist yieldingly movement of the valve, a flexible cable secured to the valve and provided with means at the operator's seat for the application of force thereto, means to guide the valve in its movements and a curved baffle on which the material is discharged, said baffle directing the material to the tread of a road wheel.

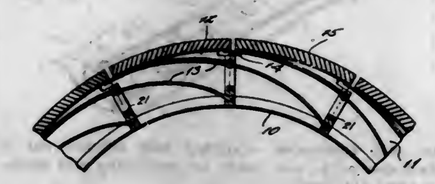
1,625,747. ATTACHMENT FOR HAIR CLIPPERS. MARTIN LOVEJOY RUFF, Jacksonville, Fla. Filed May 19, 1926. Serial No. 110,271. 2 Claims. (Cl. 30—1.)

1. The combination with a pair of clippers having cutting blades, and adjusting means, of an exhaust air duct

connected with the handle portion of the clippers and curved over the adjusting means to a point adjacent to the edges of the blades and means extending from the

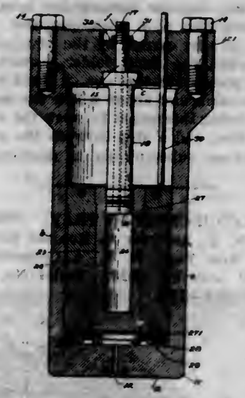
base of the duct, along the handle portion, and engaged by the adjusting means, for retaining the forward end of the duct in operative position with reference to the blades.

1,625,748. MACHINE FOR CUTTING OR SEVERING METALLIC BARS. FRITZ SCHIESS, Lichtensteig, Switzerland. Filed Jan. 25, 1923. Serial No. 615,131. 1 Claim. (Cl. 164—95.)



In a machine of the class described, the combination of a fixed die, a pair of independently operable dies opposite said fixed die, independently operable fluid pressure actuated means for actuating said independently operable dies, and comprising a pair of pistons, arranged one within the other, and means to yieldingly resist the movement of one of said pair of dies.

1,625,749. COMPOSITE ARTICLE AND PROCESS OF MAKING SAME. RICHARD W. SEABURY, Boonton, N. J., assignor to Radio Frequency Laboratories, Incorporated, Boonton, N. J., a Corporation of New Jersey. Filed July 21, 1922. Serial No. 576,637. 3 Claims. (Cl. 20—89.)

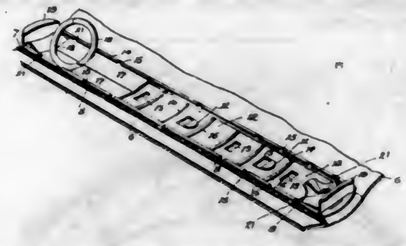


1. A composite article presenting an exterior surface of wood, and a fibrous base therefor, the wood cemented to the fibrous base by means of an infusible phenolic condensation product and impregnated therewith from within outwardly, said fibrous base impregnated with a bituminous material.

1,625,750. TIRE. LOUIS C. SNYDER, Boonville, Ind. Filed Jan. 6, 1926. Serial No. 79,628. 2 Claims. (Cl. 152—8.)

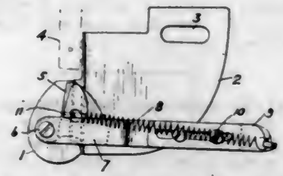
2. A tire comprising a rim, a circumferential series of resilient elements having their inner extremities fixed with relation to the rim, and their outer extremities spaced in overlapped relation and tangentially disposed, a tapered metallic shoe including opposed angular shaped members arranged upon and secured to each element adjacent the free end thereof, said members being slotted at their inner ends to slidably receive the adjacent end of the next resilient element, a covering of relatively soft material carried by each shoe, and said shoes unitedly defining a sectional outer rim.

1,625,751. FLUID-PRESSURE INTENSIFIER. JOHN C. SOLBERG, Arlington, Mass., assignor of one-half to Frederick C. Langenberg, Cambridge, Mass. Filed June 12, 1925. Serial No. 36,755. 3 Claims. (Cl. 138—10.)



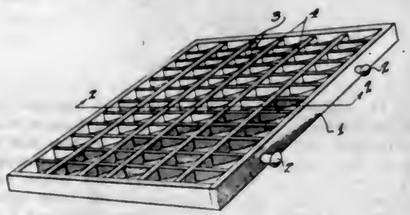
1. In combination, a main cylinder, a movable piston therein having a high pressure cylinder formed therein, a ram fixed with relation to the main cylinder and working in the high pressure cylinder, said ram comprising two parts movable with relation to each other, one of said parts being a sleeve secured to the main cylinder, the other of said parts being a headed stem and a packing between the end of the sleeve and the end face of the head of the stem.

1,625,752. LOOSE-LEAF BINDER. HARRY C. STERLING, Syracuse, N. Y., assignor to McMillan Book Company, Syracuse, N. Y., a Corporation of New York. Filed Nov. 14, 1923. Serial No. 674,661. 3 Claims. (Cl. 129—24.)



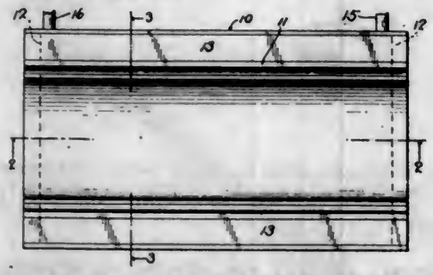
1. In a loose-leaf binder, the combination of a flexible cover; a trough-like metal supporting plate reinforcing the back of said cover; thread stitches passing through

said plate and cover and connecting the same with each other; a leaf engaging mechanism distinct from said



plate, said mechanism overlying said stitches out of contact therewith; and means for connecting said mechanism with said plate.

1,625,753. HEMMER FOR SEWING MACHINES. FREDERICK THOMAS, Philadelphia, Pa., assignor to Rhode Island Braiding Machine Company, Philadelphia, Pa., a Corporation of Delaware. Filed Sept. 23, 1922. Serial No. 589,963. 5 Claims. (Cl. 112—141.)

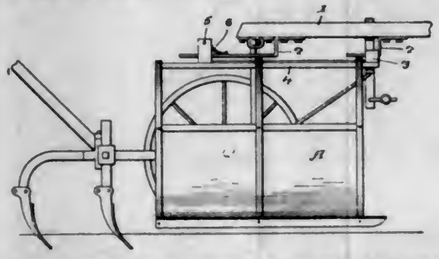


5. In a sewing machine hemmer for tubular or round work the combination of a plate provided with a fixed folder section, an arm carried by the plate and extending above and beyond the fixed folder section, a movable folder section pivoted to the arm, a fixed vertical pivot provided on the arm and about which the movable folder is turnable, a spring interposed between the arm and movable folder section, and a stop between the arm and movable folder section, substantially as described.

1,625,754. WATCH-CRYSTAL TRAY. TOSHIO TOBITA, New York, N. Y., assignor to Konishi Kotakudo Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 22, 1926. Serial No. 103,736. 1 Claim. (Cl. 211—28.)

A watch crystal holder embodying a tray divided by a plurality of intersecting longitudinal and transverse partitions into a plurality of rectangular compartments having vertical walls, and a separately formed filler piece seated on the bottom and contacting with the side walls of said compartments, said filler piece having a gradually curved upper face sloping downwardly from the upper edge of the forward wall of each compartment and merging into the bottom adjacent the rear wall thereof, whereby the said rear wall will serve to slightly separate the crystals when placed in a stacked relation on said filler piece.

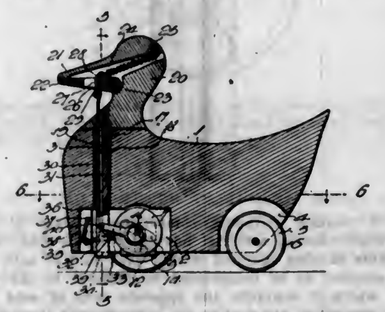
1,625,755. SMELTER SPOUT. LOUIS HENRY WILLIAMS, Camas, Wash., and RALPH E. WATT, Ontonagon, Mich. Filed Nov. 11, 1925. Serial No. 68,379. 1 Claim. (Cl. 266—38.)



A smelter's spout of semi-cylindrical formation comprising a metallic outer section, an inner section of refractory material coextensive in length with the outer section, spacing means located between said sections at the ends thereof, other spacing means located between said sections at the longitudinal edges thereof, the provision of the spacing means defining a chamber between the outer and inner sections, and water inlet and outlet pipes leading into said chamber.

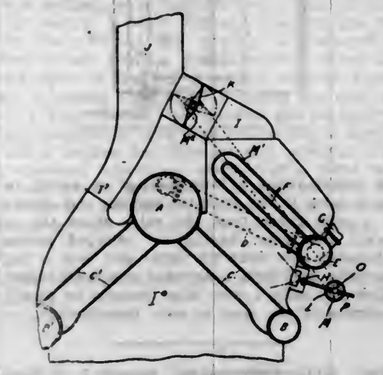
1,625,756. MAILING CARTON. EDGAR W. WINTERS, Kansas City, Mo., assignor to The Non-Spi Company, Kansas City, Mo., a Corporation of Missouri. Filed Jan. 28, 1924. Serial No. 688,993. 3 Claims. (Cl. 229—40.)

1. As a new article of manufacture, a blank of stiff material foldable to form a rectangular carton having a top and bottom and two sides and ends forming longitudinal extensions of the bottom, T and G, one of the ends having an arm foldable to extend lengthwise of the carton and between and at right angles to the top and bottom and flatwise against the inner face of one of the sides, and a flap projecting from the last-named side and adapted to fit flatwise against the inner face of the bottom and against the adjacent longitudinal edge of the said arm.



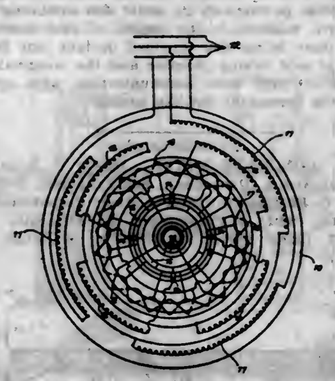
1,625,757. SUPPORTING DEVICE. WILLIAM HAGOOD WOODS, Gable, S. C. Filed Nov. 18, 1925. Serial No. 69,919. 1 Claim. (Cl. 248—20.)

A supporting device comprising a pair of Z-shaped brackets adapted to be fastened to a support, a member adapted to be fastened to an object to be supported, said



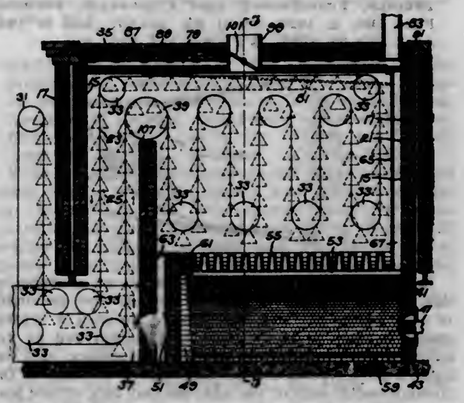
member having a socket at one end and a U-shaped member at the other end, said socket and U-shaped member being adapted to receive the brackets and a cam lever in the U-shaped member for clamping a bracket in said member.

1,625,758. MECHANICAL TOY. LOYAL L. WYNN, Florence, Colo. Filed Oct. 3, 1924. Serial No. 741,865. 7 Claims. (Cl. 46—45.)



1. A toy comprising a wheeled body simulating the body of a living creature, said body having a head provided with a stationary upper jaw and a pivoted lower jaw, spring means for upwardly snapping said lower jaw against the upper jaw, and means driven by a wheel of the body for alternately moving said lower jaw downwardly against the action of said spring means and quickly releasing said movable jaw for snapping engagement with the upper jaw to effect simulation of the sound created by the creature represented.

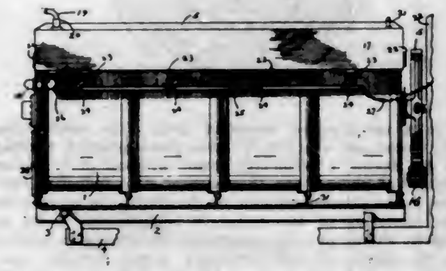
1,625,759. STEAM SUPERHEATER. HAROLD E. YARROW, Glasgow, Scotland. Filed Apr. 6, 1920, Serial No. 371,748, and in Great Britain Oct. 31, 1919. 1 Claim. (Cl. 122—480.)



A water tube boiler comprising two upwardly converging sets of steam generating tubes, a main combustion space located between the said sets of generating tubes, two uptakes separated by a partition and located on the farther sides of the respective sets of generating tubes, a steam superheater located in one of said uptakes, an auxiliary heating device located in said uptake between said superheater and the set of steam generating tubes adjacent thereto, said auxiliary device comprising a plurality of oil fuel burners the axes of which are directed towards the said generating tubes and away from the superheater device, a damper located in the said uptake beyond the said superheater, and means for operating the said damper and for controlling the fuel supply to the oil burners interdependently.

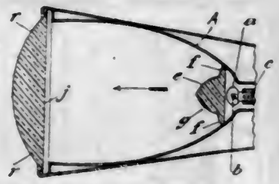
1,625,760. ALTERNATING-CURRENT MOTOR. CARL ALTWICKLER, Gotha, Germany, assignor to Deutsche Werke Aktiengesellschaft, Berlin-Wilmersdorf, Germany, a Corporation of Germany. Filed Oct. 15, 1923, Serial No. 668,761, and in Germany June 27, 1922. 1 Claim. (Cl. 172—280.)

In a compensated induction motor, the combination of a rotor and a stator, a three phase primary winding on the stator, a secondary stator winding of a greater number of phases than three arranged in inductive relation to the primary winding of the stator and serving for the excitation of the motor, a commutator, a set of brushes sliding on the commutator conforming in number to the phases of the secondary stator winding, connections between the phases of the secondary stator windings and said brushes respectively, an exciting and compensating rotor winding which is connected to the commutator and receives current from the secondary stator winding in which latter electro motive force is generated of such magnitude or phase that the current passing between the secondary stator winding and the commutator winding will excite the rotary field of the motor.



1,625,761. BAKING OVEN. ARTHUR H. BALLARD, Boston, Mass., assignor to Ballard Oven Corporation, Boston, Mass., a Corporation of Massachusetts. Filed July 3, 1922. Serial No. 572,403. 27 Claims. (Cl. 107—57.)

1. A baking oven having a baking chamber, a traveling conveyor with means to guide the same in a circuitous path into, through and out of said chamber, a radiating floor of uneven formation to present respectively lower and upper heat-absorbing and heat-radiating surfaces of

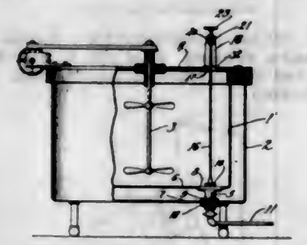


extended area, a separate combustion chamber extending beneath the baking chamber and lengthwise the general direction of travel of said conveyor through the same, said chamber having refractory walls, and means for distributing the heated gases from said combustion chamber to said radiating floor, the latter having horizontal flue-like passages on its under side extending transversely with relation to the length of said combustion chamber, there being also provided upright exit flues at the sides of said baking chamber and the marginal edges of said floor, said flues communicating with opposite ends of each horizontal flue-like passage.

1,625,762. CONCRETE MIXER. ORSON C. BARRYMORE and REGINALD A. DADDISMAN, San Francisco, Calif., assignors to Barrymore Concrete Mixer Corporation, San Francisco, Calif., a Corporation of California. Filed Sept. 23, 1926. Serial No. 137,186. 8 Claims. (Cl. 83—73.)

1. Concrete mixing apparatus comprising a trough mounted lengthwise on a motor truck and pivoted directly to the rear portion of the chassis frame of the truck for tipping upwardly at its forward end, a mixer shaft in the trough rotatably supported in bearings at opposite ends thereof and arranged for driving outside of the forward end of the trough, a spur gear secured to said shaft engaging a driving gear mounted on the truck between the cab of the truck and the forward end of the trough so that the spur gear may be lifted from said driving gear upon tipping the truck.

1,625,763. LIGHT PROJECTOR. CARL FREDSRIK BERTHELSEN, Frederiksberg, near Copenhagen, Denmark. Filed Dec. 2, 1926, Serial No. 152,257, and in Denmark July 28, 1925. 1 Claim. (Cl. 240—41.)

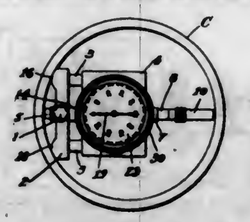


In a light projector, the combination of a source of light, a lens disposed in front of and in close proximity to said source of light, said lens comprising a central convex portion having a short focal length and an annular portion surrounding said central portion, said annular portion having a front face slightly inclined to the circumferential edge of the lens, the rear face of said lens being flat, and a second plano-convex lens having a radius of relatively great length disposed in front of and in axial alignment with said first lens, said second lens being positioned with respect to said first lens to converge the light from said source to form a beam of parallel rays.

1,625,764. WEATHER STRIPPING. MAURICE E. BOSLEY, Chicago, Ill. Filed June 16, 1924. Serial No. 720,297. 4 Claims. (Cl. 20—69.)

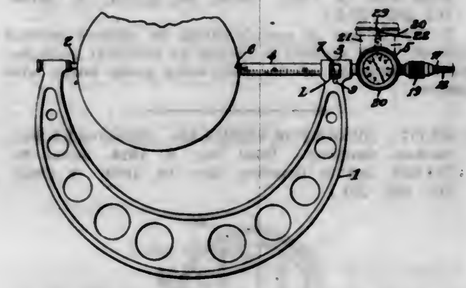
1. A weather stripping comprising a strip of flexible, wear-resisting material having a double fold, and a yieldable packing enclosed within each fold of said strip and adapted to be compressed to conform to the parts with which it contacts, the opposite ends of said strip being separately stitched to the body thereof inwardly of the folds, thereby enclosing the packings separately and providing a double stitch of the strip therebetween.

1,625,765. VALVED OUTLET FOR PASTEURIZERS. WILLIAM RATZENSTEIN, Chicago, Ill., assignor to Creeco Creamery Supply Co., a Corporation of Illinois. Filed May 10, 1926. Serial No. 107,918. 6 Claims. (Cl. 137—21.)



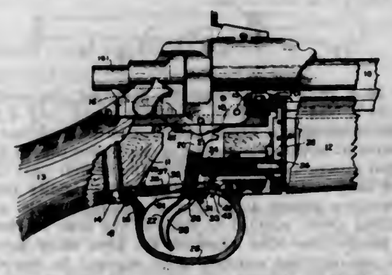
2. In combination, a tank having an outlet in the bottom, a valve in the tank for opening and closing the outlet, a stem rising from the valve above the top of the tank, said stem having an enlarged externally-screwthreaded part near its upper end, and a support for the valve and stem comprising a screwthreaded hub having in the side a slot large enough to permit the main portion of the stem to pass therethrough.

1,625,766. DIAL INDICATOR. ROBERT J. O. SIMPSON, Athol, Mass., assignor to The L. S. Starrett Company, Athol, Mass., a Corporation of Massachusetts. Filed Aug. 21, 1922. Serial No. 582,159. 17 Claims. (Cl. 33—178.)



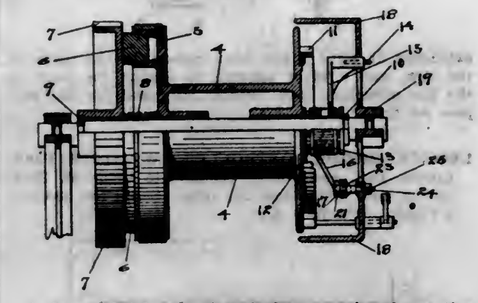
1. In a cylinder gauge, a base presenting portions adapted for stable contact interiorly of a cylinder along two spaced parallel lines, a dial indicator slidably mounted on said base for movement transversely relative thereto and having a pointer and a pair of spaced alined bearings, a member reciprocably mounted in one of said bearings and provided at one end with means detachably to receive a contact element, a contact element detachably connected with said reciprocable member, a contact element mounted in the other of said bearings, said contact elements adapted to contact with

the interior of the cylinder in a plane perpendicular to the plane containing the lines of contact of said base, a spring confined between said reciprocable member and



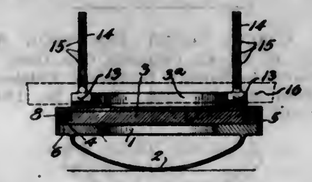
said last-named contact element, and motion transmitting connections between said reciprocable member and the pointer of said dial.

1,625,767. MICROMETER CALIPERS. ROBERT J. O. SIMPSON, Athol, Mass., assignor to The L. S. Starrett Company, Athol, Mass., a Corporation of Massachusetts. Filed Oct. 15, 1923. Serial No. 668,588. 7 Claims. (Cl. 33—178.)



1. In combination with the frame of an outside micrometer calipers, said frame having a bearing and said bearing having a sight opening therethrough and a reading line adjacent said opening, a graduated sleeve mounted in said bearing, a dial indicator casing carried by said sleeve, a dial and a pointer mounted upon said casing, a contact stem slidable within one end of said sleeve, a plug fixed in the opposite end of said sleeve, a chuck mounted on said plug and having a sight opening and a reading line adjacent said opening, a graduated relatively stationary contact stem fixed in said chuck and alined with said relatively movable contact stem, and motion transmitting connections between said relatively movable contact stem and said pointer.

1,625,768. TRIGGER MECHANISM FOR FIREARMS. CHARLES H. BARNES, Ilion, N. Y. Filed Apr. 28, 1923. Serial No. 634,082. 15 Claims. (Cl. 42—69.)



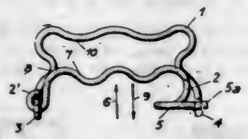
3. In a firearm, a manually actuated main trigger for effecting the firing of said firearm, power means for actuating said main trigger comprising a compression spring interposed between said main trigger and a fixed abutment, and a second trigger for controlling said power means.

1,625,769. CLUTCH-ENGAGING DEVICE. ALFRED J. ERSTED, Portland, Oreg. Filed Oct. 5, 1925. Serial No. 60,646. 12 Claims. (Cl. 192—93.)

1. In a clutch engaging device: a pair of coacting helix members; a slotted housing enclosing said members; means to rotate one of said members; and yieldable mechanism adjustably mounted within the slot of said housing for holding the other of said helix members stationary.

1,625,770. BILLIARD COMPASS. JOHN ARTHUR KAYE, Sault Ste. Marie, Ontario, Canada. Filed Mar. 26, 1926. Serial No. 97,799. 14 Claims. (Cl. 273—24.)

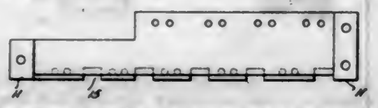
1. A device of the character described, including a flat base, a curved support extending transversely across the base on which the base is adapted to rock, a flat plate fitted against the base and rotatable thereon in a plane parallel to the base, and a billiard cue guide on the flat plate.



1,625,771. MANUFACTURE OF MENTHOL. KARL SCHÖLLKOPF, Dusseldorf-Oberkassel, Germany, assignor to Rheinische Kampfer-Fabrik Gesellschaft mit beschränkter Haftung, Dusseldorf-Oberkassel, Germany. Filed Nov. 28, 1922, Serial No. 603,853, and in Germany Nov. 23, 1921. 3 Claims. (Cl. 260—158.)

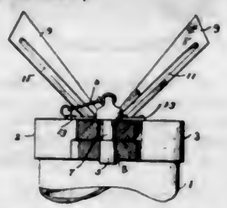
1. The process for manufacturing inactive menthol which consists in heating thymol with catalysts promoting the hydrogenation and hydrogen under pressure, separating the inactive menthol from the liquid menthols mixture by physical methods and heating the latter mixture with catalysts promoting the hydrogenation and hydrogen under pressure.

1,625,772. SACK CLOSURE. GUSTAV MÖLLER, Dortmund, Germany. Filed Feb. 21, 1927, Serial No. 170,022, and in Germany Sept. 22, 1924. 1 Claim. (Cl. 24—30.5.)



A sack closure, comprising, in combination, two bows of practically N-shaped form and of different size, and having undulated middle portions, the side portions of the larger bow being crooked inwardly and forming obtuse angles lying at right angles with respect to the

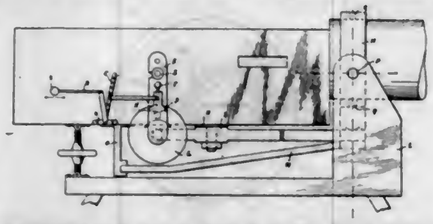
crooked portions, and forming an eye at one end and a hook at the other end, and the smaller bow forming at one end also an eye which is coupled with the eye of the first-mentioned hook, and at the other end a grip



extending at right angles with respect to the plane of the bow, and a pivot adapted to engage the hook of the first-mentioned bow, substantially and for the purpose set forth.

1,625,773. MOTOR CONTROLLER. WILLIAM B. PARK, Linton, Ind., assignor of one-half to Clyde M. Zink, Linton, Ind. Filed Jan. 24, 1924. Serial No. 688,312. 1 Claim. (Cl. 200—8.)

In a motor controller, a casing, drums mounted therein and carrying contacts, a finger bar formed as a metal frame located between the drums, fingers mounted upon and insulated from the finger bar and cooperating with the respective drums, an elongated support carried by the finger bar, the edge of the finger bar toward one drum being notched, and a plurality of arc guards located within said notches and resting upon said support.

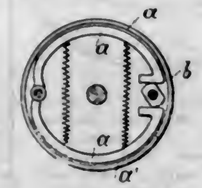


1,625,774. CASING COVER AND TOOL HOLDER. FREDERICK W. SADLER, Oklahoma City, Okla., assignor of one-fourth to Barbara E. Turney, Oklahoma City, Okla. Filed May 19, 1926. Serial No. 110,262. 3 Claims. (Cl. 24—243.)

1. A tool for deep wells comprising a casing cover including similar sections pivotally connected at one end and having overlapping portions at the opposite end, and a locking pin having a head at one end and adapted to pass through registering openings formed in the overlapping end portions and having a part adjacent the head reduced to provide a shoulder for the overlapping end portion of a section to engage over to prevent casual withdrawal of the pin.

1,625,775. MEANS FOR REGULATING AUTOMATICALLY SWEEPING FIRE IN MACHINE GUNS. JEAN SCHELUTO and FERNAND JULIEN JOSEPH FURNEMONT, Brussels, Belgium; said Scheluto assignor to Gaston Emile Coene, Uccle, near Brussels, Belgium. Filed Aug. 20, 1925, Serial No. 51,468, and in Belgium Aug. 29, 1924. Renewed Nov. 10, 1926. 3 Claims. (Cl. 89—2.)

1. Means for regulating automatically "sweeping" fire in machine guns comprising recoil mechanism, gearing for traversing the gun, links connecting said recoil mechanism and traversing gear and means for adjusting the relative positions of said links which traversing gear includes a ratchet wheel, a worm rotated by said ratchet wheel, a double toothed sector engaging said ratchet



wheel and pivoted on the gun base, and a single toothed sector engaging said first named sector and fixed to the cradle of the gun.

1,625,776. ELECTRON-EMITTING CATHODE AND PROCESS OF PREPARING THE SAME. FREDERICK HOLBORN, Hoboken, N. J., assignor to Hazeltine Corporation, Jersey City, N. J., a Corporation of Delaware. Filed Jan. 14, 1926. Serial No. 81,164. 4 Claims. (Cl. 250—27.5.)

2. The process of manufacturing an electron-emitting cathode which consists in coating an electrical conductor with a compound of the alkali-earth group mixed with guaiac.

1,625,777. BRAKE FOR VEHICLES. NICOLAUS KÜCHEN, Aachen, Germany. Filed Dec. 8, 1924, Serial No. 754,644, and in Germany May 10, 1924. 1 Claim. (Cl. 188—251.)

A brake lining, especially for motor vehicles made from an alloy of copper (58 to 64 parts), zinc (32 to 38 parts), manganese (0.5 to 2.5 parts), iron (0.5 to 2 parts) and aluminum (0.01 to 2 parts).

1,625,778. KNIFE WITH DETACHABLE BLADE. WILLIAM E. NICKERSON, Boston, Mass., assignor to Gillette Safety Razor Company, Boston, Mass., a Corporation of Delaware. Filed May 22, 1924. Serial No. 715,222. 6 Claims. (Cl. 30—9.)

1. In a knife of the character described, the combination of a blade having an elongated shank, and a blade holder comprising a handle provided at its front end with an integral upper jaw having in its under edge a longitudinal groove adapted to receive the greater part of the upper edge of the blade and give lateral rigidity thereto, a lower jaw hinged at its rear end to the handle, and a clamping sleeve adapted to slide on the jaws in front of the handle, the outer edges of the jaws being provided with cam surfaces adapted to be engaged by the sleeve and to limit its clamping movement, whereby the jaws are caused to grip the blade firmly between them.

Patents Nos. 1,625,779 to 1,626,588.

THE
OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 357—No. 4. TUESDAY, APRIL 26, 1927. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. PATENT OFFICE, *Washington, Apr. 15, 1927.*

Swan O. Peterson, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application for patent of Edward G. Carr, 1329 Downer Avenue, Milwaukee, Wis., and patent granted March 21, 1922, No. 1,410,114, to Swan O. Peterson, 2511 Eleventh Street, Rock Island, Ill., and a notice of such declaration sent by registered mail to said Peterson at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Peterson, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 14, 1927.*

The Wynne Paper Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Transo Envelope Company, 3512 North Kimball Avenue, Chicago, Ill., for registration of a trade-mark and trade-mark registered August 10, 1920, No. 134,146, to The Wynne Paper Co., 318 West Thirty-ninth Street, New York, N. Y., and a notice of such declaration sent by registered mail to said The Wynne Paper Co. at the said address having been returned by the post office as undeliverable, notice is hereby given that unless The Wynne Paper Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 6, 1927.*

Austin O. Stanley, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application for patent of Clifford M. Paxton, 1134 Pacific Street, Brooklyn, N. Y., and patent granted August 10, 1926, No. 1,595,888, to Austin O. Stanley, 205 High Street, Detroit, Mich., and a notice of such declaration sent by registered mail to said Stanley at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Stanley, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

TIME LIMITS FOR ACTIONS.

Completing applications	6 mos.
Responding to official actions:	
If dated prior to May 2, 1927	1 yr.
If dated on or after May 2, 1927	6 mos.
Renewal of applications:	
If allowed prior to May 2, 1927	2 yrs.
If allowed on or after May 2, 1927	1 yr.

(See act of March 2, 1927, 357 O. G. 5.)

This act affects all applications pending before this Office, irrespective of their filing dates.

Condition of Applications Under Examination at Close of Business April 15, 1927.

(Total number of applications awaiting action, excluding Trade-Mark Division, 58,425; Trade-Mark Division, 1,909. Oldest new case, Aug. 5, 1926; oldest amended, Sept. 2, 1926. The dates given are 1926 except where † indicates 1927.)

Room No.	Divisions, Examiners, and Subjects of Inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Tillage; Scattering Unloaders	†Feb. 14	†Feb. 14	489
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Dec. 20	†Jan. 3	721

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decisions.

KISHPAUGH *v.* GAUTHIER.

Decided April 2, 1926.

1. INTERFERENCE—MOTION TO DISSOLVE BY PATENTEE—PATENTABILITY OF ISSUE.

A patentee involved in an interference may not contend that the claims of his patent are not patentable.

2. SAME—ISSUE—CONSTRUCTION OF.

The issue of an interference is to be construed in the light of the patent or application in which it originated.

3. SAME—SAME—SAME—APPLICANT AND PATENTEE—MOTION TO DISSOLVE—PRIOR ART.

In an interference involving a patent prior patents or other sources of information may be used only to ascertain the meaning of doubtful terms or expressions. They may not be used to show that the issue would not be patentable if construed broadly or according to an interpretation based on the patentee's specification or other publications which define the terms used.

4. SAME—MOTION TO DISSOLVE—INTERFERENCE IN FACT.

Motions to dissolve based on the ground that there is no interference in fact will not be set for hearing except in cases involving design patents or applications.

ON PETITION.

ELECTRICAL COMMUNICATING SYSTEM.

Mr. John G. Roberts for Kishpaugh.

Messrs. Pennie, Davis, Marvin, and *Edmonds* for Gauthier.

KINNAN, *Acting Commissioner:*

The party Kishpaugh petitions from the order of the Law Examiner, citing *Morgan* v. *Taylor* v. *Hanson*, 208 O. G. 985, with reference to ground 2 of Kishpaugh's motion to dissolve, which alleges:

That the claims corresponding to counts of the issue are unpatentable to Gauthier as construed by him to read upon the disclosure of his application.

[1, 2, 3] Kishpaugh, being a patentee, has no right to contend that the claims of his patent are not patentable. The issue of an interference is to be construed in the light of the patent or application in which it originated. Prior patents or any other source of information may be used only to ascertain the meaning of doubtful or technical terms or expressions. They may not be used to show that the issue would not be patentable if construed broadly or according to any interpretation based on the patentee's specification or other publications which define the terms used.

[4] Petitioner also requests that the third ground of his motion to dissolve be set for hearing. This ground denies that there is interference in fact, because the counts can not be applied to the disclosures of the parties in such a way as to define a common patentable subject matter. This ground was once listed with other grounds under rule 122, but was designedly withdrawn more than 10 years ago. No question could possibly arise under such a ground that could not be raised under present ground 1 or 3 of rule 122 except in the case of interferences involving design patents or applications, and present ground 4 of rule 122 provides for this contingency. No reason is seen for disturbing the practice established many years ago and consistently followed to the present time.

The petition is denied. The motion will be heard as to ground 1. It will not be heard as to grounds 2 and 3.

SACHS *v.* BALL.

Decided December 10, 1926.

1. INTERFERENCE—MOTION TO DISSOLVE—NO RIGHT TO MAKE CLAIMS—STATEMENT POINTING OUT ELEMENT OR FEATURE NOT DISCLOSED.

When a motion to dissolve an interference is brought on the ground that one of the parties has no right to make the claims because he does not disclose the invention covered thereby, the motion should be accompanied by a clear, though brief, statement pointing out just what element or limitation in the claims is alleged to be not found in the disclosure of the application of such party.

2. SAME—SAME—SAME—SAME.

Where, in explanation of the ground that a party has no right to make the claim, the moving party quotes all of the claim except the introductory clause and states that the party neither shows nor describes the invention thus set forth, *Held* that the statement is insufficient.

3. INTERFERENCE—MOTION TO DISSOLVE BY PATENTEE—PATENTABILITY OF ISSUE.

A patentee may not impeach the patentability of his claims on a motion to dissolve.

4. SAME—SAME—ATTEMPT TO READ LIMITATIONS INTO CLAIMS.

A patentee may not, on a motion to dissolve, seek to read limitations into his claim in order to avoid the prior art.

5. SAME—ISSUE—CAN NOT BE PATENTABLE TO ONE PARTY AND UNPATENTABLE TO ANOTHER, IF READABLE ON BOTH, UNLESS REFERENCE ANTEDATES ONE AND NOT THE OTHER.

If the issue of an interference between an applicant and a patentee is properly readable upon each case, then the patentee cannot be heard to say that the claim is patentable to him, but not to the other party.

6. SAME—SAME—MUST BE CONSTRUED BROADLY, IN THE LIGHT OF APPLICATION OR PATENT IN WHICH IT ORIGINATED.

The issue of an interference must be construed broadly, in the light of the application or patent in which it originated.

ON PETITION.

Patent interference No. 53,832, between the patent of Joseph Sachs, granted September 22, 1925, No. 1,554,528, on application filed February 7, 1922, No. 534,682, and the application of Albert P. Ball, filed October 6, 1921, Serial No. 505,740.

Mr. Harry R. Williams for Sachs.

Messrs. Jones, Addington, Ames & Seibold for Ball.

ROBERTSON, *Commissioner:*

The party Sachs has filed a petition from the action of the Law Examiner refusing to set his motion to dissolve for hearing as to count 1 until a more particular statement of the grounds thereof

is made and refusing, under the ruling in *Morgan* v. *Taylor* v. *Hanson*, 208 O. G. 985, to set for hearing his motion as to grounds 4 and 5.

It is to be noted that Sachs filed a request for reconsideration of the Law Examiner's ruling, but before the Law Examiner had acted upon it filed the present petition. Clearly the petition should not have been filed unless and until the Law Examiner had refused to modify his ruling.

[1, 2] No reason is seen for the objection to specifically stating clearly, though briefly, just what element or limitation in the claims is alleged to be not found in the disclosure of the application of the other party. The only statement in explanation of the ground that Ball can not make the counts is that he neither shows nor describes a switch having "rigid walls, etc.," the matter quoted being all of the claim except the introductory clause. It would have been a very simple matter to have stated which element of the claim or which limitation in the claim it is contended the party Ball did not disclose. It is noted that in the explanatory part of the motion as to two of the counts certain words have been underscored. If it was intended to indicate thereby that that was what was not disclosed, it should have been so stated.

The time within which the explanatory statement can be made is extended 15 days from the date of this decision.

No error is found in the action of the Law Examiner in refusing to set Sachs's motion for hearing as to grounds 4 and 5.

[3] It is well settled (see *Manson* v. *Hutchison*, 201 O. G. 569, and *Conradson* v. *Drake et al.*, 152 MS. Dec. 838) that a patentee may not impeach the patentability of his claims on a motion to dissolve. In the latter case, decided September 11, 1926, I expressly refused to overrule the decision in *Manson* v. *Hutchison*.

[4, 5] It is also well settled that a patentee may not, on a motion to dissolve, seek to read limitations into his claim in order to avoid the prior art. If the claim is properly readable upon each case, then the patentee can not be heard to say that the claim is patentable to him, but not to the other party. This matter was fully considered in *Morgan* v. *Taylor* v. *Hanson*, supra, *Kishpaugh* v. *Gauthier*, 357 O. G. 787, and *Ryan* v. *Gautheir*, 152 MS. 296.

In the second of these cases the First Assistant Commissioner said:

> The issue of an interference is to be construed in the light of the patent or application in which it originated. Prior patents or any other source of information may be used only to ascertain the meaning of doubtful or technical terms or expressions. They may not be used to show that the issue would not be patentable if construed broadly or according to any interpretation based on the patentee's specification or other publications which define the terms used.

[6] In the third case he stated that the prior art could not be used to show that the claim constituting the issue was applicable to the disclosure of a prior patent—

> since the issue must be construed broadly, in the light of the specification of the patent or application in which it originated, and a patentee in interference may not deny the patentability of his own claims.

Hearing on the petition is requested. It is not customary to set petitions of this kind for hearing and no reason is seen for making an exception of this case.

The petition is denied.

Court of Appeals of the District of Columbia.

MY OWN COMPANY *v.* THE JANSZEN GROCERY COMPANY.

No. 1,863. Decided December 6, 1926.

APPEAL from Patent Office. Affirmed.

Mr. Walter F. Murray for My Own Company.

Mr. A. E. Wallace for the Janszen Grocery Co.

Before MARTIN, Chief Justice; VAN ORSDEL, Associate Justice; and HATFIELD, Judge U. S. Court of Customs Appeals.

VAN ORSDEL, *J.*:

This is an appeal from the decision of the Commissioner of Patents, sustaining the notice of opposition filed by appellee, the Janszen Grocery Company, to the application of appellant, My Own Company, for the registration of the trade-mark "My Own" for food products, condiments, canned fruits and vegetables, canned soups, and canned condensed and evaporated milk.

It is conceded by the opposer that the mark has been used in interstate commerce by appellant company since May 29, 1922; but the opposer offered evidence tending to establish its use of "My Own" as a trade-mark for canned goods since the year 1900. The case turns upon the sufficiency of the testimony to establish prior use by appellee company during the period named.

It is unnecessary for us to review the testimony of the witnesses on this point. It was held sufficient by the various tribunals below to conclusively establish prior use of the mark by appellee company. A careful review of the record convinces us that this conclusion is correct. To hold otherwise would require us to discredit a number of witnesses, whose testimony we think is entitled to belief. In this view of the case we are convinced that the Commissioner was right in rejecting the registration of appellant's mark.

The decision of the Commissioner is affirmed.

PATENT SUITS.

ADJUDICATED PATENTS.

(D. C. Md.) The Baker patent, No. 966,514, for salting peanuts in shell, *Held* valid and infringed. *Karesh* v. *Shell-On-Sol-Ted Peanut Co.*, 17 F. (2d) 496.

(D. C. Ohio.) The Smith patent, No. 1,262,860, for incubator, claims 1 and 2 *Held* not infringed. *Buckeye Incubator Co.* v. *Blum*, 17 F. (2d) 456.

(C. C. A. N. J.) The Smith patent, No. 1,262,860, for incubator, *Held* valid and infringed. *Buckeye Incubator Co.* v. *Cooley*, 17 F. (2d) 453.

(C. C. A. N. J.) The Smith patent, No. 1,263,138, for means for tilting incubator trays, *Held* not infringed. *Buckeye Incubator Co.* v. *Cooley*, 17 F. (2d) 453.

(C. C. A. La.) The Kenner patent, No. 1,426,084, for mop with drying device, *Held* not infringed. *Dry Hand Mop Co.* v. *Squeez-Ezy Mop Co.*, 17 F. (2d) 465.

(C. C. A. La.) The Kenner patent, No. 1,427,478, for mop head having detachable handle, *Held* not infringed. *Dry Hand Mop Co.* v. *Squeez-Ezy Mop Co.*, 17 F. (2d) 465.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,514,244, T. Allatt, Tea cartridge, decided March 17, 1927, claims 1 and 2.

Pat. 1,542,432, M. F. F. Wilson, Artificial flower, decided March 19, 1927, claims 1, 2, and 3.

Pat. 1,591,512, I. H. Chaiken, Wrist watch, decided March 19, 1927, claims 3, 4, and 5.

Pat. 1,602,786, A. E. Stewart, Knitting machine and process, decided April 7, 1927, claims 4, 5, 8, 9, 12, and 13.

Final decisions in interferences have been rendered against the following trade-marks:

T. M. 190,118, Corsets, corset waists, brassières, etc. American Lady Corset Co., Detroit, Mich. Registered October 7, 1924. Decided March 18, 1927.

T. M. 209,792, Canned fish, J. C. Mullins & Co., Los Angeles, Calif. Registered March 2, 1926. Decided April 7, 1927.

Disclaimer.

1,551,533.—*Bernhart A. Benson*, Chicago, Ill. BRACKET FOR LAMPS. Patent dated September 1, 1925. Disclaimer filed April 7, 1927, by the patentee, assignee by mesne assignments, *Chicago Electric Manufacturing Company*, consenting.

Hereby enters the following disclaimer, namely: that he disclaims from the scope of claim 1 of the said Letters Patent No. 1,551,533 any embodiment of that claim in which the slots in the attaching member do not have entrance openings at the outer peripheral edge of the attaching member.

TRADE-MARKS

OFFICIAL GAZETTE, APRIL 26, 1927.

[VOL. 357. No. 4.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 170,572. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) EVERETT, HEANEY & CO. INC., New York, N. Y. Filed Oct. 11, 1922.

FAST COLOR

No claim is made to the words "Fast Color" apart from the other features of the mark.

Particular description of goods.—Cotton Print Cloth Piece Goods.

Claims use since 1902.

Ser. No. 206,365. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) PACKARD MOTOR CAR COMPANY, Detroit, Mich. Filed Dec. 6, 1924.

The trade-mark consists of a hexagon surrounded by a ring.

Particular description of goods.—Automobiles and Constructive Parts Thereof.

Claims use since 1905.

Ser. No. 208,407. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE JEWETT RADIO & PHONOGRAPH CO., Detroit, Mich. Filed Jan. 21, 1925.

JEWETT Quality Products

No claim is made to the words "Quality Products" apart from the mark shown in the drawing.

Particular description of goods.—Radiodials, Radio Loud Speakers, Radio Receiving Sets, and Radio Loud-Speaker Units.

Claims use since Sept. 18, 1924.

Ser. No. 208,410. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) JOS LOWE CO. INC., Brooklyn, N. Y. Filed Jan. 21, 1925.

"HOUSE HOLD."

Particular description of goods.—Bread.

Claims use since about June 1, 1924.

Ser. No. 211,368. (CLASS 27. HOROLOGICAL INSTRUMENTS.) MESSINGWERK SCHWARZWALD AKTIEN-GESELLSCHAFT, Villingen, Germany. Filed Mar. 20, 1925.

The words "Schwarzwald Tula" are disclaimed apart from the mark shown in the drawing.

Particular description of goods.—Watches and Parts Thereof.

Claims use since 1920.

Ser. No. 211,717. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) STANDARD GROWERS EXCHANGE, Orlando, Fla. Filed Mar. 26, 1925.

No claim is made herein to the registration of the color lines shown in the drawing, nor to the pictorial representation of the goods, nor the words "Brand," "Grown in U. S. A.," "Oranges and Grapefruit," "Orlando, Florida," "Net Contents 1⅗ Bushels," and "Di Giorgio Fruit Corporation, New York." Claims use since September, 1924.

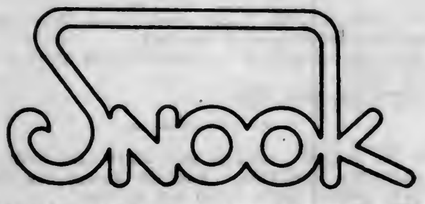
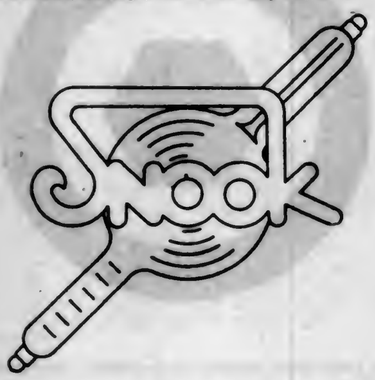
Ser. No. 214,083. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) KING QUALITY PRODUCTS, INC., Buffalo, N. Y. Filed May 9, 1925.



No claim is made herein to the words "Buffalo" and "Quality" apart from the mark as shown.

Particular description of goods.—Radio Apparatus and Parts—Namely, Tube Sockets, Rheostats, Panel Mountings, Jacks, Tube-Socket Adapters, Inductance Switches, Switch Levers, Knobs, Potentiometers, Dials, and Binding Posts.

Claims use since about Nov. 1, 1922.



Ser. No. 214,900. (CLASS 44. DENTAL, MEDICAL, AND SURGICAL APPLIANCES.) VICTOR X-RAY CORPORATION, Chicago, Ill. Filed May 25, 1925.

Particular description of goods.—Rotary Rectifying Switches and X-Ray Apparatus.

Claims use since about 1908.

Ser. No. 214,901. (CLASS 44. DENTAL, MEDICAL, AND SURGICAL APPLIANCES.) VICTOR X-RAY CORPORATION, Chicago, Ill. Filed May 25, 1925.

Particular description of goods.—Rotary Rectifying Switches and X-Ray Apparatus.

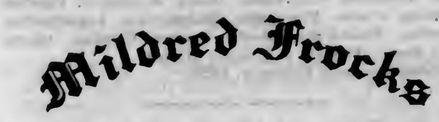
Claims use since about 1908.

Ser. No. 215,090. (CLASS 37. PAPER AND STATIONERY.) THE PAPER MILLS' COMPANY, Chicago, Ill. Filed May 29, 1925.

The words "Fine Stationery" are disclaimed apart from the mark shown.

Particular description of goods.—Writing Paper and Mailing Envelopes.

Claims use since May 21, 1925.

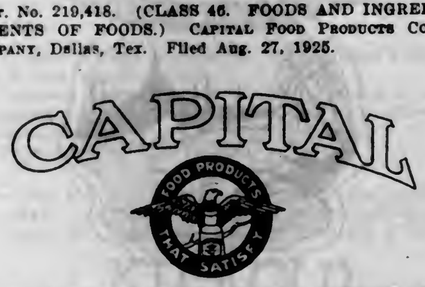


Ser. No. 217,113. (CLASS 39. CLOTHING.) SOPHIA ROSEN, doing business as Bernel Hosiery Company, Tulsa, Okla. Filed July 9, 1925.

Particular description of goods.—Silk Hosiery and Leather Shoes for Men, Women, and Children.

Claims use since May 1, 1925.

Ser. No. 218,238. (CLASS 39. CLOTHING.) ARONSON MANUFACTURING COMPANY, Dallas, Tex. Filed Aug. 1, 1925.



No claim is made to the word "Frocks" apart from the mark shown.

Particular description of goods.—Frocks, Dresses, and Gowns.

Claims use since Mar. 1, 1924.

Ser. No. 219,418. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CAPITAL FOOD PRODUCTS COMPANY, Dallas, Tex. Filed Aug. 27, 1925.

Applicant disclaims apart from the mark shown in the drawing the words "Food Products That Satisfy."

Particular description of goods.—Mayonnaise Salad Dressing, Mayonnaise, Mustard, Thousand Island Dressing, Horse-Radish, and Sandwich Relish Consisting of a Mixture of Cream Cheese, Mayonnaise, and Pickle Relish.

Claims use since July 1, 1925.

Ser. No. 221,753. (CLASS 15. OILS AND GREASES.) MASURY-YOUNG COMPANY, Charlestown, Mass. Filed Oct. 15, 1925.

Particular description of goods.—Lubricating Grease.

Claims use since about Jan. 1, 1910.

Ser. No. 222,565. (CLASS 39. CLOTHING.) FALK MERCANTILE COMPANY LIMITED, Boise, Idaho. Filed Oct. 30, 1925.

Particular description of goods.—Workingmen's Clothes—Namely, Overalls, Pants, and Work Shirts.

Claims use since May 1, 1925.

Ser. No. 222,645. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) VICTOR X-RAY CORPORATION, Chicago, Ill. Filed Oct. 31, 1925.

Particular description of goods.—Bucky Diaphragms or Secondary Ray Filters, Cassettes, Cassette Changers, Special Film Chests for Protecting Undeveloped X-Ray Films, Films, Film Holders, Film Mounts, Fluoroscopes, Sphere Gaps, Centrifuge Tubes, Centrifuge Cups, Centrifuge Heads, Intensifying and Fluoroscopic Screens, Fluoroscopic Grids, Interval Timers, Dark-Room Lamps, Phototherapy Lamps, Thermotherapy Lamps, Mercury-Vapor Quartz Lamps for Scientific Use, Hot-Wire and Electro-

static Meters, Storage and Drying Racks, Raygraphs, Stereoscopes for the Examination of X-Ray Photographs and Negatives, Fluoroscopic Lamps, Shadow and Illuminating Boxes, and X-Ray Timers.

Claims use since about 1897.

Ser. No. 223,137. (CLASS 15. OILS AND GREASES.) PANHANDLE REFINING COMPANY, Wichita, Falls, Tex. Filed Nov. 11, 1925.

The words "Petroleum Products" are disclaimed except in connection with the other features of the mark.

Particular description of goods.—Petroleum Products—Namely, Gasoline, Naphtha, Kerosene, Stove Distillate, and Fuel Oil.

Claims use since Sept. 15, 1925.

Ser. No. 223,848. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) KEYSTONE GROCERY & TEA CO., Pittsburgh, Pa. Filed Nov. 25, 1925.

Naborhood

"Has A Friendly Flavor"

No claim is made to the phrase "Has a Friendly Flavor" apart from the mark as shown in the drawing.

Particular description of goods.—Coffee.

Claims use since June 1, 1924.

Ser. No. 225,299. (CLASS 2. RECEPTACLES.) E-Z OPENER BAG COMPANY, Decatur, Ill. Filed Dec. 30, 1925.

OAK

The representation of the paper bag is not claimed apart from the other features of the mark.

Particular description of goods.—Paper Bags.

Claims use since Aug. 1, 1902.

Ser. No. 225,303. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) WM. GROSSMAN CO., Milwaukee, Wis. Filed Dec. 30, 1925.

ARENA

Particular description of goods.—Coffee, Tea, and Spices; Cocoa, Prepared Mustard, Food-Flavoring Extracts, Jams, Jellies, and Canned Goods—Namely, Corn, Peas, Tomatoes, Sauerkraut, Beans, Asparagus, Peaches, Apricots, Pears, Pineapples, Raspberries, Loganberries, Cherries, Blueberries, Beets, Tomato Catchup, Olives, Chili Sauce, Pickles, and Apple Butter.

Claims use since February, 1925.

Ser. No. 225,964. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PALMERS, LIMITED, Montreal, Quebec, Canada. Filed Jan. 15, 1926.

No claim is made to the word "Mandalay" apart as shown. The drawing is lined to indicate a red background.

Particular description of goods.—Bleach Creams, Beauty Creams, Cold Creams, Cleansing Creams, Face Powders, Face Packs, Compact Face Powders, Liquid Face Powders, Compact Rouges, Liquid Rouges, Talcum Powders, Eyebrow and Eyelash Growers, Eyebrow Pencils, Eyedrops, Face Bleachers, Hair Salves, Shampoos, Skin Lotions, Hand Lotions, Lip Sticks, Bath Salts, Witch-Hazel Salves, Chemical Preparations for Softening the Cuticle, Nail Polishes, Nail Bleaches, Toilet Waters, Perfumes, Hair Tonics, Tooth Powders, Dentifrices, Sachets, and Incense.

Claims use since Dec. 26, 1925.

Ser. No. 226,012. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) MARK H. MOODY, doing business as Winnisquam Farms, Waterbury, Vt. Filed Jan. 16, 1926.

The showing in the drawing is not intended to indicate color. No claim is made herein to any particular color, but broadly to the features illustrated regardless of color. No claim is made to the word "Moody" apart from the mark illustrated in the drawing.

Particular description of goods.—Farm, Orchard, or Milk Products—Namely, Fresh Milk, Fresh Apples, and Butter.

Claims use since Oct. 21, 1924.

Ser. No. 226,325. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) W. H. YOUNG CORPORATION, Chicago, Ill. Filed Jan. 23, 1926.

RE-STORO

No claim is made to the words "Ribbon Inking Fount" apart from the mark shown.

Particular description of goods.—Type-Operated Inking Appliances for Typewriters, Adding Machines, Addressographs, Cash Registers, and Check Protectors.

Claims use since Jan. 14, 1926.

Ser. No. 226,785. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WARREN P. RASH, Middlesboro, Ky. Filed Feb. 2, 1926.

KIL-KOLD

Particular description of goods.—Medicine for Colds, La Grippe, and Flu.

Claims use since September, 1924.

Ser. No. 226,968. (CLASS 11. INKS AND INKING MATERIALS.) PEERLESS ROLL LEAF CO., INC., New York, N. Y. Filed Feb. 6, 1926.

Superleaf

No claim is made to the word "Leaf" apart from the mark shown.

Particular description of goods.—Imitation Gold and Silver Leaf Mounted on a Roll of Paper.

Claims use since Aug. 1, 1925.

Ser. No. 227,474. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) HELMUTH REICHHOLD, doing business as Beck-Koller & Company, Detroit, Mich. Filed Feb. 18, 1926.

Particular description of goods.—Dry, Paste, and Ready-Mixed Paints, Varnishes, and Lacquers.

Claims use since Feb. 5, 1925.

Ser. No. 227,482. (CLASS 39. CLOTHING.) SUPER FASHION CLOTHES, Brooklyn, N. Y. Filed Feb. 18, 1926.

Super Fashion Clothes

No claim is made to the words "Fashion" and "Clothes" apart from the mark shown in the drawing.

Particular description of goods.—Men's Suits and Coats.

Claims use since Jan. 29, 1926.

Ser. No. 227,801. (CLASS 39. CLOTHING.) KASS-QUINBY RUBBER COMPANY, INC., New York, N. Y. Filed Feb. 25, 1926.

Particular description of goods.—Bibs, Baby Pants, Aprons, Bathing Caps, Bathing Capes, Shadow Petticoats, Bathing Shoes, Shadow Panels, Garters, Scarfs, Girdles, and Corsets.
Claims use since Mar. 12, 1925.

Ser. No. 227,831. (CLASS 12. CONSTRUCTION MATERIALS.) EUBÖOLITHWERKE A.-G. IN OLTEN, Olten, Switzerland. Filed Feb. 26, 1926.

EUBÖOLITH

Particular description of goods.—Jointless Floors, Wainscoting Panels, Ceilings, and Roofing Covers Made of Sawdust, Magnesite, and Chloride of Magnesium.
Claims use since Jan. 1, 1899.

Ser. No. 227,853. (CLASS 32. FURNITURE AND UPHOLSTERY.) ROLL-A-WAY BED CORPORATION, Chicago, Ill. Filed Feb. 26, 1926.

Da-o-dor

Particular description of goods.—Household Couches, Beds, Mattresses, and Bed Springs.
Claims use since July 26, 1924.

Ser. No. 228,019. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES.) ALL-AMERICAN RADIO CORPORATION, Chicago, Ill. Filed Mar. 3, 1926.

No exclusive right is claimed in the word "Treeliter" apart from the mark as shown.
Particular description of goods.—All-Metal Christmas-Tree Holders.
Claims use since July 31, 1925.

Ser. No. 228,231. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) FRANCIS S. ECKEL, Los Angeles, Calif. Filed Mar. 6, 1926.

DELTA KING

Particular description of goods.—Fresh Citrous Fruits and Fresh Grapes.
Claims use since July 1, 1925.

Ser. No. 228,600. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) FRANCIS S. ECKEL, Los Angeles, Calif. Filed Mar. 13, 1926.

DELTA QUEEN

Particular description of goods.—Fresh Citrous Fruits and Fresh Grapes.
Claims use since July 1, 1925.

Ser. No. 228,627. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) MARTIN C. WAHL, El Centro, Calif. Filed Mar. 13, 1926.

BARBARA WORTH

Applicant hereby disclaims the surname "Barbara Worth" apart from the mark as shown in the drawing. The mark consists of the name "Barbara Worth" and the pictorial representation of a girl which is fanciful.
Particular description of goods.—Fresh Cantaloupes and Fresh Vegetables.
Claims use since Feb. 23, 1926.

Ser. No. 228,975. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE COLES COMPANY, Middletown, Conn. Filed Mar. 22, 1926.

FORTUNE

Particular description of goods.—Wheat Flour, Stock and Poultry Feeds.
Claims use since July, 1904.

Ser. No. 229,507. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) ELECTRIC SALES SERVICE COMPANY, San Francisco, Calif. Filed Apr. 1, 1926.

THERM-ELECT

Particular description of goods.—Electric Air Heaters and Electric Water Heaters.
Claims use since Apr. 13, 1916.

Ser. No. 230,781. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WILLIAM J. A. BAILEY, doing business as Bailey Radium Laboratories, East Orange, N. J., assignor to Pauline S. T. Bailey, trading as the Bailey Radium Laboratories, East Orange, N. J. Filed Apr. 27, 1926.

RADITHOR

Particular description of goods.—Radioactive Medicinal Water.
Claims use since May 1, 1925.

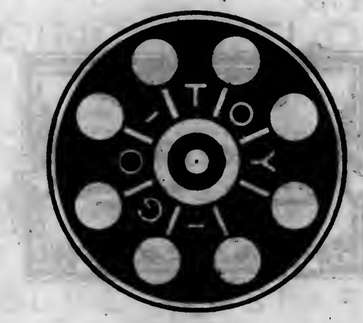
Ser. No. 231,540. (CLASS 15. OILS AND GREASES.) JOHN HANCOCK OIL CO., Minneapolis, Minn. Filed May 13, 1926.

JOHN HANCOCK

Particular description of goods.—Gasoline, Motor Oil, and Cup Grease, Gear Grease, and Lubricating Grease.
Claims use since Apr. 10, 1924.

Ser. No. 231,625. (CLASS 32. FURNITURE AND UPHOLSTERY.) MCDOUGALL COMPANY, Frankfort, Ind. Filed May 14, 1926.

Domestic Science



Particular description of goods.—Kitchen Cabinets, Domestic Units in the Nature of Cupboard Units.
Claims use since May 21, 1921, on kitchen cabinets, and on kitchen units, in the nature of cupboard units since July 1, 1923.

Ser. No. 232,059. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ABBOTT LABORATORIES, North Chicago, Ill. Filed May 22, 1926.

AROMOL

Particular description of goods.—Tasteless Castor Oil.
Claims use since Dec. 27, 1924.

Ser. No. 232,561. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) GO-TOY MFRS. INC., Brooklyn, N. Y. Filed June 1, 1926.

No claim is made to the word "Toy" except as associated with the word "Go" and other features of the mark.
Particular description of goods.—Mechanical Toys—e. g., Children's Wheeled Toys.
Claims use since Nov. 1, 1925.

Ser. No. 233,580. (CLASS 45. BEVERAGES, NONALCOHOLIC.) SEARS & DERR COMPANY, Chillicothe, Ohio. Filed June 21, 1926.

PERFECTO

"Perfecto."
Particular description of goods.—Nonalcoholic, Malt-less Beverages and Flavoring Syrups Used in Making the Same.
Claims use since May 21, 1926.

Ser. No. 234,005. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) SERVICE EQUIPMENT CO., South Gate, Calif. Filed July 1, 1926.

Particular description of goods.—Air-Pressure Gauges.
Claims use since July 15, 1925.

Ser. No. 234,080. (CLASS 39. CLOTHING.) BROWN-DURRELL CO., Boston, Mass., and New York, N. Y. Filed July 8, 1926. Under section 5b of the act of 1905 as amended in 1920.

ForestMills

Particular description of goods.—Underwear of Knitted, Netted, or Textile Fabric, and Bathing Suits.
Claims use since 1885 on underwear and since 1921 on bathing suits.

Ser. No. 234,127. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JÜNGER & GEBHARDT AKT. GES., Berlin, Germany. Filed July 3, 1926.

The wording and naming in the mark is disclaimed apart from the manner shown.

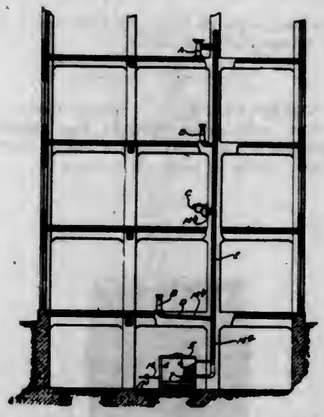
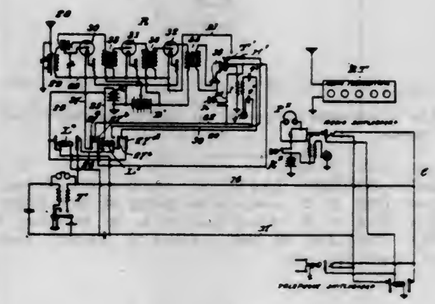
REISSUES



APRIL 26, 1927.

16,604. SEALED VALVE. JOHN J. CAVETT, Woodlawn, Pa., assignor to The Koppers Company, a Corporation of Delaware. Filed Feb. 21, 1927. Serial No. 170,020. Original No. 1,540,513, dated June 2, 1925, Serial No. 591,193, filed Sept. 28, 1922. 8 Claims. (Cl. 251—27.)

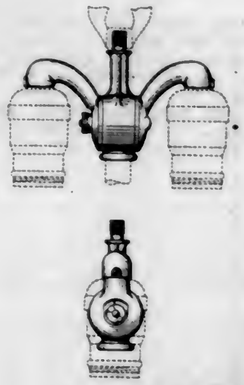


3. A valve having an approximately conical body portion with an up-turned lower edge, thus providing a continuous annular space between the edge and the body, a valve seat member adapted to contact at its lower end with said valve between the body portion and said up-turned edge and provided with openings in its lower end, and means for supplying liquid to the valve, whereby the valve is adapted to be sealed against the passage of gas while permitting liquid to pass.

16,605. COOLING DEVICE FOR DRINKING FOUNTAINS. HARRY C. RIDLER, Minneapolis, Minn. Filed Nov. 26, 1926. Serial No. 150,994. Original No. 1,539,867, dated June 2, 1925, Serial No. 581,543, filed Aug. 12, 1922. 10 Claims. (Cl. 62—147.)

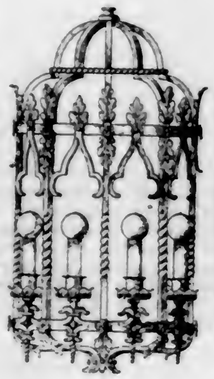
10. The combination with a refrigerator, of a plurality of drinking fountains, a cold water return pipe having branches connected to the overflows of the several fountains, a drinking water supply pipe passing through said refrigerator and arranged in heat exchanging relation with said cold water return pipe, and a covering medium enclosing said return pipe and said supply pipe.

16,606. RADIO RECEIVING APPARATUS. HARRY F. LOWENSTEIN and EDWARD E. CLEMENT, Washington, D. C., assignors, by direct and mesne assignments, to Edward F. Colladay, Washington, D. C. Filed Jan. 6, 1927. Serial No. 159,461. Original application filed Aug. 14, 1922, Serial No. 581,773. Renewed July 22, 1924. Original No. 1,522,308, dated Jan. 6, 1925. 6 Claims. (Cl. 250—6.)



1. In a combined radio and telephone system, a central station, a subscriber's station, a wire circuit connecting them, a radio receiving set at the subscriber's station, and a telephone transmitter related thereto so as to receive sound waves therefrom, with means controllable by a radio operator at the central station to close the circuits of said transmitter for current supply thereto and for telephonic transmission over the wire circuit to central.

DESIGNS



APRIL 26, 1927.

72,510. ELECTRIC-LIGHTING FIXTURE. ABRAHAM COOPER, Brooklyn, N. Y. Filed Feb. 12, 1926. Serial No. 16,504. Term of patent 7 years.

The ornamental design for an electric lighting fixture, as shown.

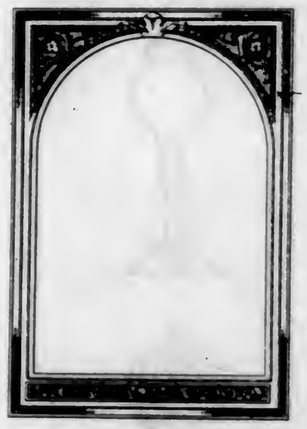
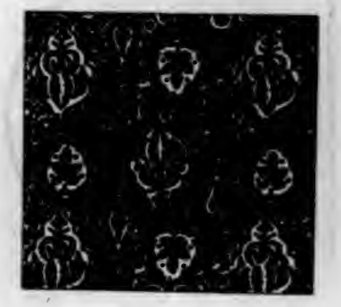
72,516. COMBINED SALT AND PEPPER SHAKER. ALFRED J. FLAUDER, Bridgeport, Conn., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 8, 1927. Serial No. 21,066. Term of patent 7 years.



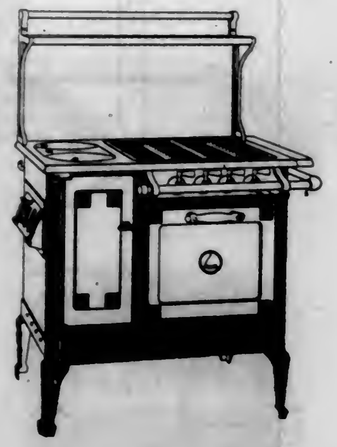
The ornamental design for a combined salt and pepper shaker substantially as shown.

72,517. FROLIC BUTTON. CHARLES T. HATHAWAY, Duluth, Minn. Filed Dec. 10, 1926. Serial No. 20,006. Term of patent 3½ years.



The ornamental design for a frolic button, as shown.

72,518. PICTURE MOUNTING. WILLIAM J. HELMQUEST, San Francisco, Calif., assignor to California Card Manufacturing Company, San Francisco, Calif., a Corporation of California. Filed Feb. 9, 1927. Serial No. 20,663. Term of patent 7 years.



The ornamental design for a picture mounting, substantially as shown.

72,519. LINING PAPER OR SIMILAR ARTICLE. JACK LADER, Brooklyn, N. Y., assignor to C. R. Whiting Co., Newark, N. J., a Copartnership composed of Victor Friedlander and Frank V. Friedlander. Filed Nov. 18, 1926. Serial No. 19,762. Term of patent 3½ years.

The ornamental design for lining paper or similar article, as shown.

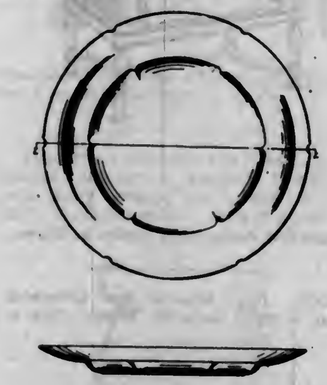
72,520. COMBINATION STOVE. HENRY LANGE, Quincy, Ill. Filed Feb. 23, 1927. Serial No. 20,850. Term of patent 14 years.

The ornamental design for a combination stove, as shown.

72,521. TASSEL FRINGE. DAVID M. LENDING, Brooklyn, N. Y. Filed Feb. 25, 1927. Serial No. 20,902. Term of patent 3½ years.

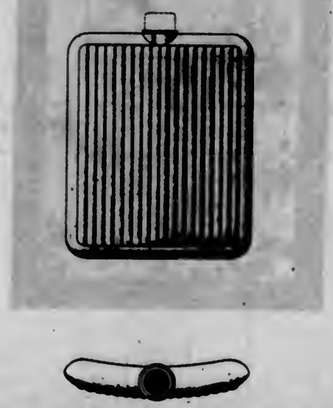
The ornamental design for tassel fringe, as shown.

72,522. WALL BRACKET FOR BIRDCAGES. LEWICKI J. LEON, West Chicago, Ill. Filed Dec. 27, 1926. Serial No. 20,149. Term of patent 14 years.



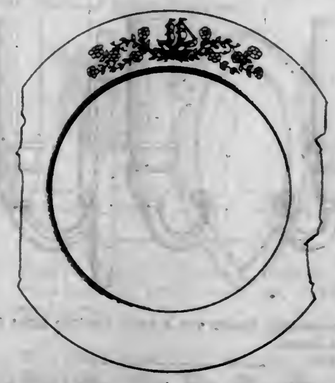
The ornamental design for a wall bracket for birdcages, as shown.

72,523. BURIAL CASKET. ZENE MAULSBY, Everett, Wash. Filed Feb. 24, 1925. Serial No. 12,464. Term of patent 3½ years.



The ornamental design for a burial casket, as shown.

72,524. PLATE OR SIMILAR ARTICLE. THOMAS CLEMENT MERRIMAN, Tunstall, England, assignor to William S. Pitcairn Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 22, 1925, Serial No. 14,847, and in Great Britain July 8, 1925. Term of patent 3½ years.

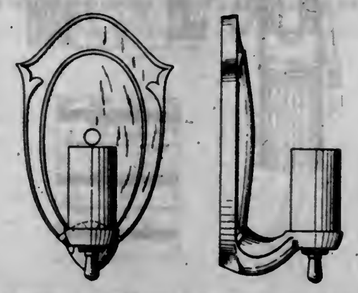


The ornamental design for a plate or similar article as shown.

72,525. POCKET FLASK. HARRY NEUSAUS, New York, N. Y., assignor to E & J Bass, Incorporated, a Corporation of New York. Filed Apr. 11, 1922. Serial No. 1,691. Term of patent 3½ years.

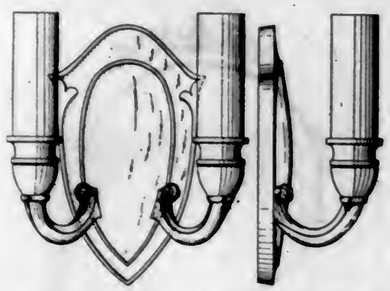
The ornamental design for a pocket flask substantially as shown and described.

72,526. PLATE OR SIMILAR ARTICLE. MAX J. PALM, Jr., Cincinnati, Ohio. Filed Nov. 10, 1926. Serial No. 19,661. Term of patent 3½ years.



The ornamental design for a plate or similar article, as shown and described.

72,527. DOLL. CAROLINE A. PETERS, Los Angeles, Calif. Filed Feb. 7, 1927. Serial No. 20,643. Term of patent 3½ years.



The ornamental design for a doll as shown.

72,528. SINGLE ELECTRIC-LIGHT BRACKET FIXTURE. CEPHAS B. ROGERS, Danbury, Conn. Filed Jan. 4, 1927. Serial No. 20,274. Term of patent 3½ years.

The ornamental design for a single electric light bracket fixture, as shown.

72,529. TWIN ELECTRIC-LIGHT BRACKET FIXTURE. CEPHAS B. ROGERS, Danbury, Conn. Filed Jan. 4, 1927. Serial No. 20,275. Term of patent 3½ years.

The ornamental design for a twin electric light bracket fixture, as shown.

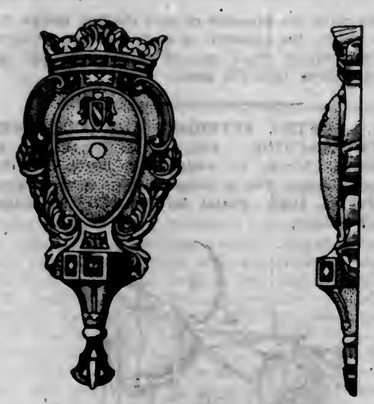
72,530. LINING PAPER OR SIMILAR ARTICLE. WILLIAM SCHMITZ, Newark, N. J., assignor to C. R. Whiting Co., a Copartnership composed of Victor Friedlander and Frank V. Friedlander, Newark, N. J. Filed Nov. 27, 1926. Serial No. 19,864. Term of patent 3½ years.

The ornamental design for lining paper or similar article as shown.

72,531. DRESS. MAUDE SIEGEL, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Feb. 28, 1927. Serial No. 20,922. Term of patent 3½ years.

The ornamental design for a dress, substantially as shown.

72,532. HEATER. RICHARD W. SPAKE, Quincy, Ill., assignor to Comstock-Castle Stove Company, Quincy, Ill., a Corporation of Illinois. Filed Feb. 25, 1927. Serial No. 20,901. Term of patent 14 years.



The ornamental design for a heater, as shown.

72,533. RUG. JULIA STABLER, New Brunswick, N. J. Filed Mar. 4, 1927. Serial No. 20,963. Term of patent 7 years.

The ornamental design for a rug substantially as shown.

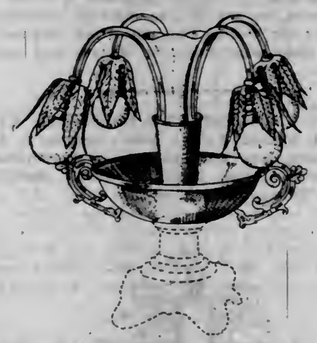
72,534. BACKPLATE FOR BRACKET LIGHTING FIXTURES OR SIMILAR ARTICLES. GUSTAVE E. VILLARET, Leonia, N. J., assignor to Harry Hilfman, New York, N. Y. Filed Feb. 24, 1927. Serial No. 20,881. Term of patent 3½ years.

The ornamental design for a backplate for bracket lighting fixtures or similar articles, as shown.

72,535. ARM FOR LIGHTING FIXTURES OR SIMILAR ARTICLES. GUSTAVE E. VILLARET, Leonia, N. J., assignor to Harry Hilfman, New York, N. Y. Filed Feb. 24, 1927. Serial No. 20,885. Term of patent 3½ years.

The ornamental design for an arm for lighting fixtures or similar articles, as shown.

72,536. ESCUTCHEON PLATE FOR LIGHTING FIXTURES OR SIMILAR ARTICLES. GUSTAVE E. VILLARET, Leonia, N. J., assignor to Harry Hilfman, New York, N. Y. Filed Feb. 24, 1927. Serial No. 20,886. Term of patent 3½ years.

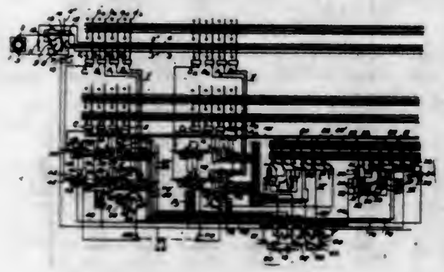


The ornamental design for an escutcheon plate for lighting fixtures or similar articles, as shown.

72,537. DISPLAY RACK. CLYDE E. WATSON, Appleton, Wis. Filed Dec. 27, 1926. Serial No. 20,163. Term of patent 3½ years.

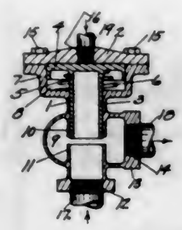
The ornamental design for a display rack, as shown.

72,538. LIGHTING FIXTURE. JOSEPH ZWEIG, Brooklyn, N. Y. Filed Oct. 7, 1926. Serial No. 19,261. Term of patent 3½ years.



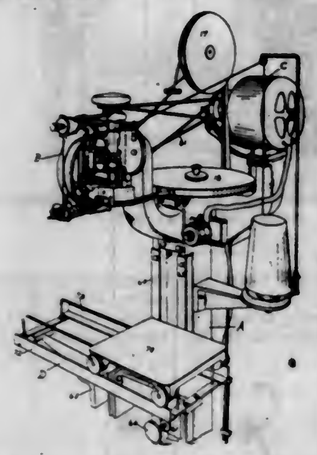
The ornamental design for a lighting fixture, as shown.

PATENTS



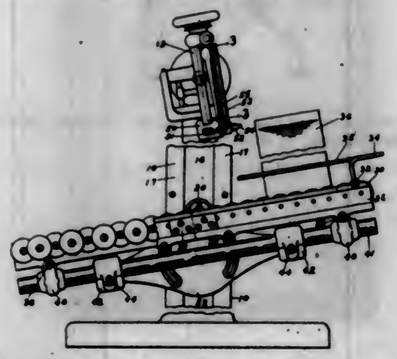
GRANTED APRIL 26, 1927.

1,625,779. ELECTROMECHANICALLY-CONTROLLED TELEPHONE SYSTEM. FRITZ ALDENDORFF, Berlin-Wilmersdorf, Germany, assignor of one-fourth to Paul Kollsch, New York, N. Y. Filed Aug. 26, 1921, Serial No. 495,723, and in Austria Sept. 8, 1918. 32 Claims. (Cl. 179—18.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



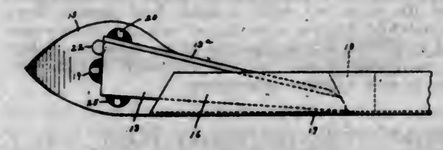
1. In a telephone system, lines, calling means, calling-line-marking-switches for electrically indicating that a line is calling, switches for electrically marking wanted lines, calling-line-connecting-switches for connecting to calling lines, wanted-line-connecting-switches for connecting to wanted lines, a switch common to a group of calling line marking switches and adapted to set the calling line connecting switches onto the calling lines marked by the calling-line-marking-switches, and a switch common to a group of wanted line marking switches and adapted to set the wanted line connecting switches onto the wanted lines marked by the wanted line marking switches.

1,625,780. DIFFERENTIAL-PRESSURE VALVE. CHARLES H. ATKINS, Palmer, Mass., assignor to Atkins and Company, Inc., Palmer, Mass., a Corporation of Massachusetts. Filed Nov. 28, 1925. Serial No. 71,968. 8 Claims. (Cl. 137—103.)



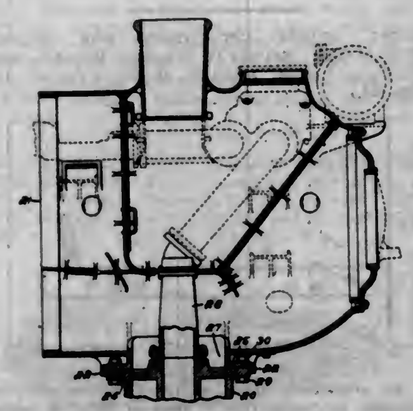
1. A valve, of the class described, comprising a casing having oppositely-disposed inlets and an intermediate outlet, a passage between one of said inlets and said outlet, and a chamber into which the other of said inlets opens, a valve member arranged in said casing to open and close said passage, provided with a part in and coextensive in area with that of said chamber, yielding means to retain said valve member in open position, except when the pressure on the closing side of said valve member falls below the pressure on the other side thereof together with the pressure of said yielding means, and means to relieve the pressure in said chamber, the latter being closed except when one of said inlets and said relief means open into the same.

1,625,781. SEWING, SEVERING, AND SEAM-REENFORCING MACHINE. ADELMER M. BATES and ALBERT KRASA, Chicago, Ill., assignors to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Feb. 1, 1923. Serial No. 616,372. 20 Claims. (Cl. 112—122.)



1. In a sewing machine, a feed dog carrier having therein a slideway, a cutter bar mounted in the slideway, and means to reciprocate the bar in the slideway.

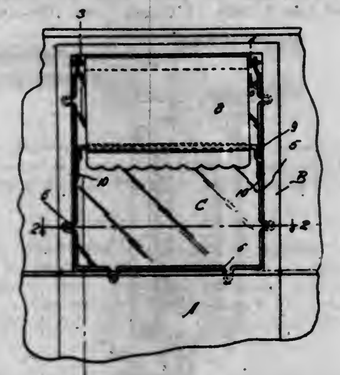
1,625,782. BAG-SEWING MACHINE. ADELMER M. BATES and JOHANN E. DANCKER, Chicago, Ill., assignors to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Apr. 23, 1924. Serial No. 708,363. 14 Claims. (Cl. 112—11.)



5. In apparatus for closing the mouths of filled bags, a gravity conveyor inclined at substantially the critical angle and a sewing head overhanging the conveyor and having a feeding device with a line of feed parallel with the conveyor.

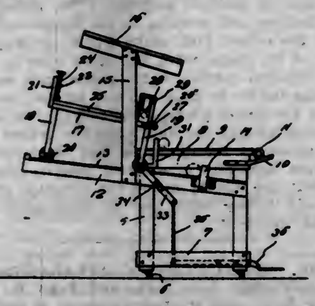
1,625,783. PILE WIRE. JAMES BAGLEY, Bedford, Mass., assignor, by mesne assignments, to Alice L. Pfeiffer, Bedford, Mass. Filed Dec. 11, 1925, Serial No. 74,742. Renewed July 21, 1926. 9 Claims. (Cl. 139—44.)

1. A pile wire including a body portion, a blade, and a blade holder fixed to the body portion, said holder comprising opposed jaws yieldingly grasping the sides of the blade, and permitting lateral displacement of the outer end portion thereof, and a plurality of abutments collectively preventing endwise and edgewise movements of the blade interposed between the jaws, said abutments including an outer abutment for the outer end of the blade, and a holding-down abutment for the outer end portion of the blade, both carried by one of the jaws, the arrangement being such that lateral displacement of the outer end portion of the blade disengages it from the outer and holding-down abutments, and permits the removal of the blade from the holder.



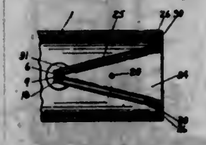
1,625,784. LOCOMOTIVE SMOKE-BOX AND SADDLE CONSTRUCTIONS. WILLIAM L. BEAN, West Haven, Conn. Original application filed Mar. 5, 1925, Serial No. 13,242. Divided and this application filed Apr. 2, 1926. Serial No. 99,415. 18 Claims. (Cl. 105—44.)

1. In a locomotive, the combination of a cylinder saddle and a smoke-box interengaging with each other and held against relative displacement in a horizontal direction by reason of their interengagement, and means rigidly attaching said smoke-box to said saddle.



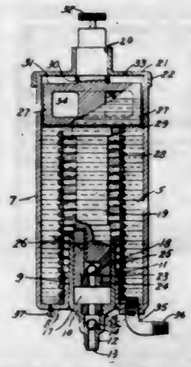
1,625,785. AWNING FOR AUTOMOBILE DOORS. GILBERT V. BLACKFORD, Independence, Kans., assignor of one-half to William R. Hobbs, Independence, Kans. Filed July 3, 1926. Serial No. 120,865. 3 Claims. (Cl. 156—15.)

1. In an awning construction for automobile doors, wherein the same includes a window frame, the sides and bottom of which are channeled, a relatively U-shaped wire frame adapted for removable disposition within the window frame of the door, outwardly extending tongues formed on the arms and base portion of the U-shaped



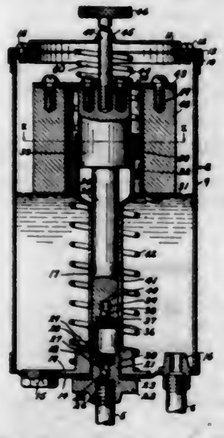
frame and adapted to fit in the channeled sides and bottom respectively of the window frame, and a curtain supported in the U-shaped frame.

1,625,786. MATRIX-MAKING MACHINE. BEN CLIFFORD BLACKMON, Dallas, Tex. Filed Oct. 12, 1925. Serial No. 62,038. 14 Claims. (Cl. 154—1.)



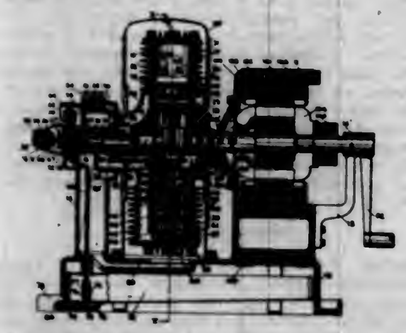
1. In a device for making matrices with a hand roller, a supporting structure, a top on the supporting structure, an inclined track way on the supporting structure, a truck movable on said track way, means for normally holding said truck in its rearmost position, brackets extending from the truck so that it may be pushed to its rearmost position by the hand roller, and a shelf supported above the truck on the supporting structure.

1,625,787. CARBURETOR. CHESTER H. BRASELTON, Toledo, Ohio, assignor to The Tillotson Manufacturing Co., Toledo, Ohio, a Corporation of Ohio. Filed Feb. 24, 1919. Serial No. 278,743. 9 Claims. (Cl. 261—62.)



1. In a carburetor, a fuel nozzle, a choke tube section provided with a plurality of leaf springs which are secured at one end to said section, and having their free ends converging toward the fuel nozzle, said springs decreasing in thickness towards their free ends.

1,625,788. VIBRATION-OPERATED PUMP. CHESTER H. BRASELTON, New York, and FRED B. MACLAREN, Malba, N. Y.; said MacLaren assignor to said Braselton. Filed Jan. 27, 1922. Serial No. 532,193. Renewed Aug. 7, 1924. 7 Claims. (Cl. 103—28.)



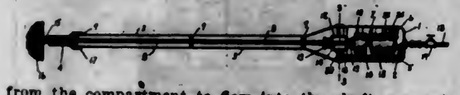
1. The combination of a hollow tank adapted to be subjected to vibration; a tank of lower level; a pump chamber within the hollow tank; a relatively heavy piston working in the pump chamber and projecting upwardly therefrom; means for supporting the piston upwardly in a yielding manner against gravity so that when the hollow tank is vibrated vertically the inertia of the piston will cause relative movement between it and the tank; and an enlarged portion on the piston above the pump chamber and working in the liquid containing portion of the hollow tank and adapted to dampen the operation of the piston when the liquid rises to the surface of the enlarged portion of the piston, said enlarged portion being lighter in mass per unit volume than the other parts of the piston whereby the buoyancy of said portion when submerged in the liquid tends to relieve the weight of the piston on the spring so that the latter will push the piston upwardly to elevated position to its uppermost limit and thereby reduce the vibration of the piston when said hollow tank has an abnormally high level of liquid therein.

1,625,789. LIQUID-PUMPING APPARATUS. CHESTER H. BRASELTON, New York, and FRED B. MACLAREN, Malba, N. Y.; said MacLaren assignor to said Braselton. Filed Feb. 18, 1922. Serial No. 537,584. Renewed Aug. 19, 1926. 7 Claims. (Cl. 103—208.)

1. In a fuel feed apparatus for automotive vehicles, a high level tank, a pump cylinder within and attached to said tank, a conduit leading from the bottom of said cylinder to a source of fuel supply, a pump discharge passage connecting said cylinder and tank, a piston in said cylinder possessing relatively high inertia, yieldable means tending to hold said piston and cylinder in predetermined relative positions, said cylinder having an enlargement near its upper end with a small fluid passage therethrough and said piston having an enlarged portion movable within the enlarged portion of the cylinder, whereby the movement of the piston is dampened as liquid collects in said cylinder enlargement.

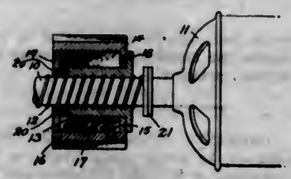
1,625,790. TWO-CYCLE ROTARY PLANT. CARL P. BROCKWAY, Toledo, Ohio, assignor to Industrial Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed July 27, 1921. Serial No. 487,974. 11 Claims. (Cl. 123—44.)

2. In combination, a rotatable muffler and stationary means for conducting gases from said muffler.



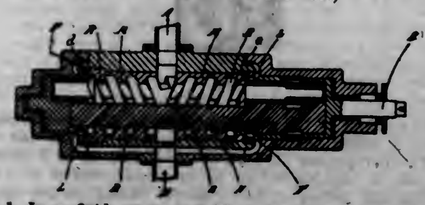
1,625,791. SHIELD ATTACHMENT FOR AUTOMOBILE DOORS. FRANCIS H. CAMPBELL, Brighton, Mass. Filed Aug. 8, 1925. Serial No. 48,989. 2 Claims. (Cl. 296—44.)

1. An attachment shield of the character described comprising, in combination, a sheet of celluloid formed in channel-bar shape and adapted to be slipped over the top edge of an automobile door or the like to protect said top edge and the sides of the door adjacent thereto; a plurality of U-shaped spring strips arranged transversely on the inner side of said celluloid sheet for clamping said shield to the door; cushioning material covering said spring strips and fastening means binding said sheet and spring strips together.



1,625,792. AUTOMOBILE CLEANING DEVICE. JOHN W. CARRINGTON, Cincinnati, Ohio. Filed July 11, 1924. Serial No. 725,399. 1 Claim. (Cl. 15—29.)

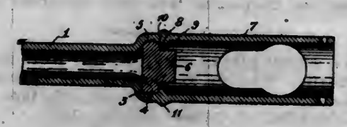
A manually supported apparatus for cleaning automobiles and the like, comprising a relatively long narrow rigid tube provided at its rear end with a casing, a light electric motor housed within the casing, a closed compartment arranged in the casing rearwardly of the tube, a pipe extending through the casing for feeding water into said compartment, a rigid hollow shaft journalled in said tube and extending through said compartment and tube, said shaft being driven at its rear end by the motor and having apertures within the compartment to permit water



from the compartment to flow into the shaft, a member fixed to the forward end of the shaft and having a rearwardly extending skirt slidably engaging the forward end of the tube to prevent water from the exterior entering said tube, and a cleaning element mounted on the front end of the hollow shaft, adapted to receive water from the latter and to rotate with the shaft.

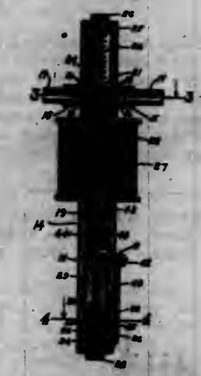
1,625,793. GAS-ENGINE STARTER. RALPH H. CHILTON, Toledo, Ohio, assignor to Industrial Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed Nov. 16, 1920. Serial No. 424,451. 4 Claims. (Cl. 74—7.)

1. In an engine starter, the combination of a drive shaft; a sleeve on the shaft having both rotatable and axial movement; a pinion having limited axial and rotatable movement on the sleeve; and a rubber driving connection between the sleeve and pinion, said connection being adapted to hold yieldably the pinion at one limit of its axial movement on the sleeve and forming a driving connection between the sleeve and pinion, and said sleeve having a shorter torque radius than that of the pinion.



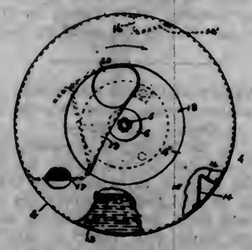
1,625,794. PUMP HAVING ROLLING PISTONS WORKING IN NUTS. PAUL CHRISTLEIN, Nuremberg, and KARL WERNER, Nuremberg-Eibach, Germany. Filed Feb. 21, 1924, Serial No. 694,227, and in Great Britain Oct. 9, 1923. 8 Claims. (Cl. 103—89.)

1. In a fluid pump, a rolling threaded piston, a nut in which the piston rotates, and feed conduits provided at the admission side of the pump, said conduits being constructed to increase the velocity of admission of the fluid to the pump.



1,625,795. METHOD OF MAKING A DRAG-LINK ELEMENT. FREDERICK C. CRAWFORD, Detroit, Mich., assignor to The Steel Products Company, Cleveland, Ohio, a Corporation of Ohio. Original application filed Jan. 11, 1923, Serial No. 612,143. Divided and this application filed Mar. 15, 1924. Serial No. 699,422. 2 Claims. (Cl. 29—153.)

1. The method of making an element for drag-links or the like, which consists in forming an end-flange upon a body portion of said element; placing in the flange recess an abutment member which is adapted to form an annular space between it and said flange; butt-welding



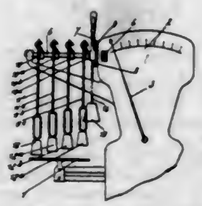
a tubular socket-member to said flange and permitting the intruded metal to engage said abutment member whereby such metal when cool will secure said abutment member in place.

1,625,796. IGNITION-CONTROLLING MEANS. FREDERICK S. DENISON, Minneapolis, Minn., assignor to Minneapolis Heat Regulator Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Dec. 8, 1922. Serial No. 605,736. 8 Claims. (Cl. 158—28.)

1. A device of the class described comprising a cylinder, a pilot pipe connected with the cylinder across its bore, a valve slidable in the cylinder adapted when in one position to interrupt flow through the pipe across the bore, a by-passage in the cylinder connecting the pipe around the bore, a coil embracing the housing adapted when energized to move the valve to open position, said valve on de-energization of the coil being adapted to return to a closed position, and means adjustable to regulate the speed rate of valve return.

1,625,797. MACHINE FOR FRYING PEANUTS AND THE LIKE. ADELARD G. DESCHENES, Lisbon, Me., assignor of one-half to Eugene A. Brunelle, Somersworth, N. H. Filed Feb. 8, 1922, Serial No. 617,673. Renewed Apr. 11, 1924. 13 Claims. (Cl. 53—7.)

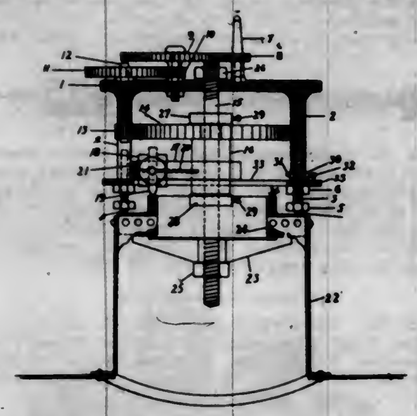
1. In a machine for frying shelled nuts and the like, the combination of a rotary drum adapted to contain a quantity of frying fat, means for intermittently discharg-



ing into said fat a quantity of nuts, means for rotating said drum to lift said nuts out of the fat, a trough on the interior of said drum for collecting said nuts as the drum turns and discharging them from the drum.

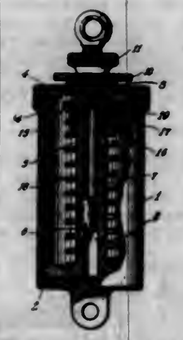
1,625,798. ADVERTISING DEVICE AND REFLECTOR THEREFOR. WILLIAM M. DOERING and CHARLES J. DOERING, Cincinnati, Ohio. Filed Jan. 11, 1924. Serial No. 685,700. 3 Claims. (Cl. 40—129.)

3. A tire advertising device comprising a concave reflector the rim of which extends into the hollow interior of an unmounted tire casing, the tire casing thus supporting the reflector, a light source located within said concave reflector, and a sign disposed across the side of the tire, portions of said sign being more light permeable in order to visually accentuate the advertising display thereon.



1,625,799. AUTOMATIC WEIGHING MACHINE. PAUL DURAND, Paris, France. Filed June 9, 1923, Serial No. 644,305, and in France May 1, 1923. 1 Claim. (Cl. 265—48.)

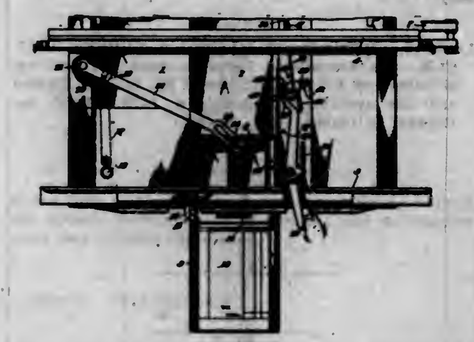
In weighing scales, weight depositing means and an indicator of the totals of weights deposited operated thereby; in combination with a plurality of stationary rows of graduations one above the other separate from the aforesaid indicator and corresponding respectively to the different unitary totals, masking means for said rows, means operatively connected with the weight depositing means for automatically moving the masking means up and down in front of said rows of graduations, and a movable pointer adapted to be swung in front of said graduations by operation of the weighing device.



1,625,800. GASKET-SEATING MACHINE. WILLIAM S. EDWARDS, Lockland, Ohio. Filed July 26, 1926. Serial No. 125,116. 9 Claims. (Cl. 82—4.)

9. A device of the character specified, comprising a frame, a shaft mounted in said frame, the lower end of said shaft being adapted to extend into the dome of a tank, standards on said frame whereby the same may be supported on said dome, means carried by said standards for levelling said frame with respect to said dome, means on said shaft for securing said frame to said dome, a tool arm rotatably mounted on said shaft and slidable thereon for adjustment in a vertical plane, means for securing the adjustment of said arm, a tool adjustably mounted in said arm so as to operate on the gasket seat of said dome, a spindle mounted in said frame and arranged to be driven by a portable source of power,

means whereby said spindle is arranged to actuate said arm, and means for automatically adjusting said tool in said arm during operation.



1,625,801. PACKING. ANDREW EKMAN, Grand Rapids, Mich., assignor, by mesne assignments, to Bleick Syndicate, composed of William D. Bleick and D. H. Connor, Newark, N. J., and F. J. Parker and J. J. Harris, Montclair, N. J. Filed Nov. 14, 1921. Serial No. 514,884. 1 Claim. (Cl. 286—30.)

In a device of the character described, the combination with a casing having a piston movable therein and a piston rod passing through one end thereof, of a sheet of metallic packing having its outer edge secured to said casing and having a sleeve portion fitting around said piston rod, a follower on said piston rod having a wedge action on said sleeve and a spring one end of which is in engagement with said follower and the other end of which is in engagement with said piston whereby the pressure of said follower on said sleeve is varied according to the movement of said piston.

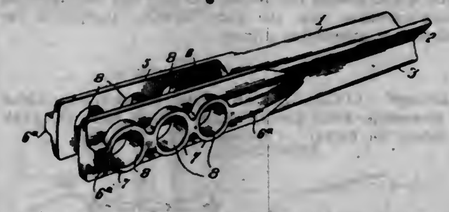
1,625,802. TOLL-SLIP PLATEN. HARRY A. FOOTHORAP, Harrisburg, Pa., assignor to Elliott-Fisher Company, New York, N. Y., a Corporation of Delaware. Filed May 14, 1925. Serial No. 30,266. 5 Claims. (Cl. 197—124.)

1. In a machine of the class described, the combination with a support having transverse carriage guides and a platen guideway in right angular relation, of a platen movable in the guideway, a platen retracting arm carried by the support and connected to the platen, a spring for

moving the arm, a platen line spacing mechanism and platen holding and releasing mechanism including a release key located in front of the support.

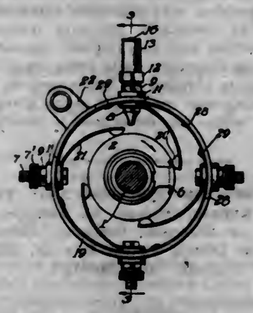
1,625,803. WATER COOLER AND REFRIGERATING APPARATUS. EDWARD A. HAAS, Los Angeles, Calif., and MACK POSEY, Sand Springs, Okla. Filed July 5, 1923, Serial No. 649,551. Renewed Jan. 25, 1927. 2 Claims. (Cl. 62—142.)

1. A water cooler formed of a single casting and comprising an inner, cylindrical chamber closed at the bottom and open at the top and constituting an ice chamber, the upper face of the bottom being dished and provided with a central drain opening for carrying off the drippage, opposite, upstanding circular flanges formed on said bottom having apertures adapted to be plugged or unplugged, and when unplugged to be put in communication with the interior of an ice box, an annular water chamber surrounding the ice chamber and closed at the top and bottom, means for constantly supplying water thereto, means for drawing off the water when desired, an annular vacuum chamber surrounding the water chamber and closed at each end, and a hollow, vacuum lid hinged to the upper, annular walls of the vacuum and water chambers and having a depending portion for fitting into and closing the ice chamber.



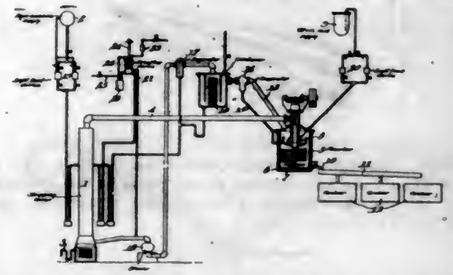
1,625,804. METHOD OF MAKING TRUCK LEVER CONNECTIONS. SOREN HANSSON, Butler, Pa., assignor of one-half to Harry Temple Anderson, Butler, Pa. Filed Nov. 21, 1924, Serial No. 751,314. Renewed Mar. 2, 1927. 4 Claims. (Cl. 29—164.)

1. The method of forming connecting bars which consists in subjecting the end of a metal bar or star cross-section, comprising four substantially equal flanges radiating at right angles with one another from a common center, to an upsetting operation whereby two opposite angles between the flanges are substantially filled with



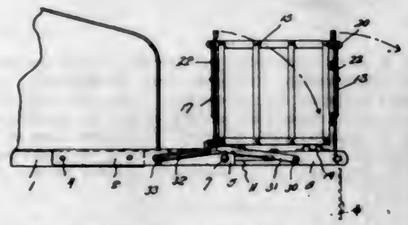
metal, and then subjecting this portion of the bar to a stamping operation directed in the plane of the bisector of the two open angles to form a pair of parallel side members of a clevis.

1,625,805. TRUCK-LEVER CONNECTION. SOREN HANSSON, Butler, Pa., assignor of one-half to Harry Temple Anderson, Butler, Pa. Original application filed Nov. 21, 1924, Serial No. 751,314. Divided and this application filed Jan. 2, 1926. Serial No. 79,013. 4 Claims. (Cl. 74—17.)



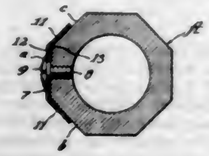
1. A metal connecting bar having a body portion of star cross-section, including four substantially equal flanges radiating from a common center line, and an integral clevis formed at one end of the bar comprising a pair of parallel side members, the center lines of the flanges of the star lying in substantially the same planes as the diagonals of the rectangle outlined by the clevis members.

1,625,806. TIMER. BURTON U. HILLS, Chicago, Ill. Filed Jan. 28, 1922. Serial No. 531,177. 10 Claims. (Cl. 200—19.)



3. In an ignition timer, a casing, a rotor of insulating material having a metallic member on a portion of the periphery thereof, binding posts carried by said casing and insulated therefrom, electrical contact members carried by said binding posts and adapted to intermittently engage said metallic member of the rotor, one of said binding posts having an oil duct therethrough, means for lubricating said rotor through said duct, and means for yieldably maintaining said oil duct normally closed at the exterior.

1,625,807. PROCESS FOR THE MANUFACTURE OF AMMONIUM NITRATE. HENRY HOWARD, Cleveland, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 26, 1926. Serial No. 111,838. 6 Claims. (Cl. 23—103.)

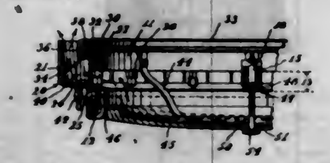


1. Process of making ammonium nitrate which comprises contacting an inert gas with a water solution of ammonia, contacting the resulting mixture of inert gas and ammonia with a solution containing ammonium nitrate, adding nitric acid to the solution of ammonium nitrate and reusing the unabsorbed inert gas for conveying more ammonia from the water solution thereof to the solution of ammonium nitrate.

1,625,808. LUGGAGE CARRIER. JOHN HYDE, Albion Township, Reno County, Kans. Filed Nov. 14, 1925. Serial No. 69,141. 7 Claims. (Cl. 224—29.)

1. A luggage carrier comprising a frame, and a foldable receptacle carried by and adjustable relative to the frame from a working position to a vertical or substantially vertical position with a portion below the point of suspension of the receptacle, the said receptacle being made up of a bottom wall and hingedly connected upright walls, and the said upright walls being capable of being folded precedent to shifting of the receptacle to upright position and being also capable of being restored to upright position when the receptacle is positioned horizontally.

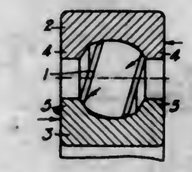
1,625,809. CLIP FOR PENCILS AND THE LIKE. CHARLES R. KEEHAN, Chicago, Ill., assignor, by mesne assignments, to Autopoint Company, Chicago, Ill., a Corporation of Illinois. Filed May 24, 1924. Serial No. 716,839. 1 Claim. (Cl. 24—11.)



The combination with a pencil body of polygonal cross section of a clip comprising an attaching head and a spring prong, said head being angularly shaped to correspond to the contour of the pencil body and to overlie and contact with a plurality of faces of said polygonal body, and a single screw for connecting the clip head to the body.

1,625,810. METHOD OF MAKING A RUBBER ARTICLE. ORA KRICHBAUM, Delaware, Ohio. Original application filed Feb. 27, 1925, Serial No. 12,044. Divided and this application filed July 6, 1926. Serial No. 120,624. 4 Claims. (Cl. 18—56.)

1. The method of manufacturing a rubber article which consists of taking two sheets of raw rubber of desired size and a sheet of raw rubber of smaller size, placing separating sheets of suitable material formed with holes therein upon opposite sides of the sheet of raw rubber of smaller size, then placing the said sheet of rubber with the separating material assembled with respect thereto between the two sheets of rubber and vulcanizing the assembled sheets.



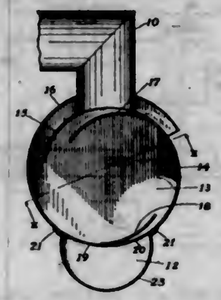
1,625,811. BANJO. WILLIAM L. LANGE, New York, N. Y. Filed Nov. 11, 1922. Serial No. 600,879. 25 Claims. (Cl. 84—276.)

5. A sound instrument comprising a frame provided with upper lateral sound outlets near the upper edge of the frame and intermediate sound outlets about midway between the upper and lower edges; and establishing free communication between the interior of the instrument and the exterior atmosphere; a diaphragm tensioned over said frame and terminating in a flesh hoop; a tension ring on said hoop spaced from said upper outlets and extending below said upper outlets; and a sound deflector having a base secured around said frame at the lower part of said intermediate outlets and having an upwardly extended outer flange spaced from and extending above the lower part of said tension ring.

1,625,812. ROLLER BEARING FOR RADIAL AND AXIAL LOADS. KARL OSKAR LEON, Lidkoping, Sweden. Filed Sept. 9, 1925, Serial No. 55,282, and in Sweden Mar. 28, 1925. 2 Claims. (Cl. 308—212.)

1. Roller bearing for axial and radial loads, comprising inner and outer race rings having concave races, rollers between said race rings having convex mantle surface and tapered end surfaces, said rollers being adapted to adjust themselves into oblique positions when the bearing is subjected to axial load, and rigid flanges

at the sides of the inner and outer races adapted to limit the oblique positioning of the rollers and to transfer axial load through the rollers.

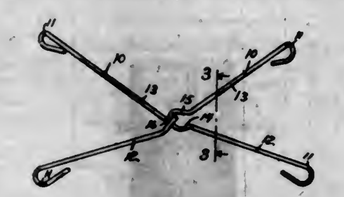


1,625,813. [WITHDRAWN.]

1,625,814. [WITHDRAWN.]

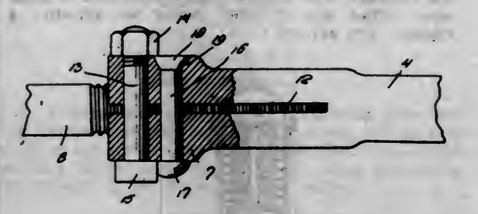
1,625,815. PAINT COMPOSITION. JOHN WILKERSON LOWMAN, Chattanooga, Tenn. Filed May 22, 1925. Serial No. 32,189. 1 Claim. (Cl. 134—46.)

A paint comprising 80 per cent of a filler such as white lead, 10 per cent of calcium sulphate, 10 per cent of sodium silicate, and sufficient water for rendering the paint workable with a brush or spray.



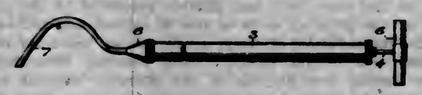
1,625,816. AIR CLEANER. CLYDE C. MANCHESTER, Toledo, Ohio, assignor to Industrial Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed Feb. 21, 1920, Serial No. 360,507. Renewed Sept. 10, 1926. 15 Claims. (Cl. 183—80.)

1. In an air cleaner, a separating chamber substantially helical in cross section with its axis horizontal, whereby spaced overlapping walls are provided upon the upper side of the chamber, an air offtake pipe extending through said overlapping walls, said chamber having a dust exit opening along the lower portion thereof, and a dust box depending from said chamber around said opening.



1,625,817. BED BOTTOM. FREDERICK C. MARQUARDT, Milwaukee, Wis. Filed Dec. 31, 1924. Serial No. 759,002. 1 Claim. (Cl. 5—259.)

Means for flexibly inter-connecting the units of a coil spring assembly of the class described, comprising substantially V-shaped links inter-engaged at their apices and having their free ends in connection with adjacent coils, the apices of said links being substantially blunt and having circumflex bends whereby the sections of the links immediately adjacent their point of contact are oblique relative to the normal common plane of the links and at substantially right angles to each other, thus adapting the links for comparatively large relative angu-

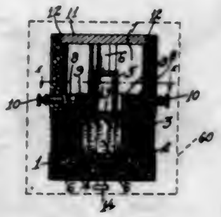


lar or turning movement in any direction from their normal plane and enhancing the free movement of the individual inter-connected coils.

1,625,818. TURNBUCKLE. ROBERT C. MCARTHUR, Salamanca, N. Y., assignor to Walter O. Fredrikson, A. Edward Krieger, and Robert C. McArthur, trustees, Salamanca, N. Y., constituting McArthur Turnbuckle Company. Filed Nov. 11, 1925. Serial No. 68,432. 5 Claims. (Cl. 287—60.)

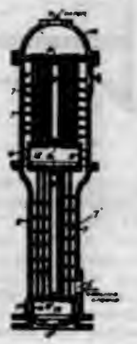
1. A turnbuckle comprising a yoke, the ends thereof being provided with threaded bores, the yoke being split longitudinally at each end portion, the slits extending through the respective threaded bores, a pair of oppositely threaded rods receivable in the respective bores, and a tightening bolt extending transversely through each of the slit portions of the yoke, and means for limiting the lateral expansion of the split portions of the yoke should the tightening bolt become disengaged from the split portion of the yoke.

1,625,819. GREASE GUN. FRED W. MCNEELY, Evansville, Ind. Filed Oct. 25, 1924. Serial No. 745,894. 2 Claims. (Cl. 221—47.3.)



1. A portable grease gun having a barrel, a reciprocatory combined suction and pressure piston movable within the barrel, manual means for reciprocating the piston, and an elongated, arc-shaped, nozzle rigid throughout its length connected to one end of the barrel.

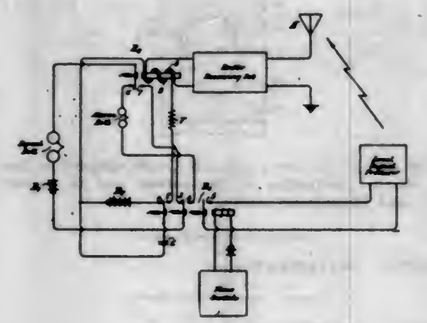
1,625,820. ELECTROMAGNETIC SWITCH. EARL P. OSWALD, Detroit, Mich., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio, a Corporation of Ohio. Filed Mar. 13, 1920. Serial No. 365,616. 5 Claims. (Cl. 200—112.)



1. In a solenoid magnet, a body having a central chamber, a body of mercury in the chamber, a soft iron core

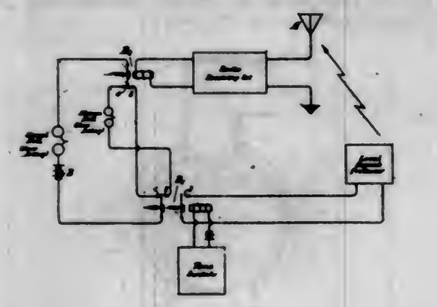
sustained in normal position by the mercury, said core having a hollow longitudinal chamber, a threaded plug closing the chamber and adapted to be turned to a greater or less extent into the chamber to vary the buoy-

ancy of the core, and a coil of a predetermined number of turns about the lower end of the body, the center of which is below the center of the core when in normal position, the buoyancy of the core determining the amperage of current required to actuate the same.



1,625,821. SUBCOOLING CONDENSER. ROBERT JEWETT PABODIE, Maywood, Ill., assignor to The Griscom Russell Company, New York, N. Y., a Corporation of Delaware. Filed May 5, 1921. Serial No. 467,010. 4 Claims. (Cl. 257—32.)

1. In a sub-cooling condenser, a casing comprising a plurality of sections, a longitudinal passage for the vapor and condensate extending through said sections, said passage comprising a group of straight tubes in each of the respective sections, said tubes being attached to the casing at one point only and slidably supported in the casing at one point so as to be free to expand and contract under the influence of temperature change, the cross sectional area of the passage being constant throughout each section but varying in the different sections approximately inversely as the density of the medium being conveyed.

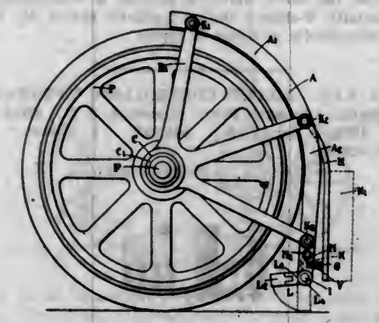


1,625,822. RADIO RECEIVER AND TROUBLE ALARM. RALPH K. POTTER, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed July 15, 1926. Serial No. 122,686. 3 Claims. (Cl. 250—20.)

1. In association with a radio receiving set responsive to distant and local signals, a signal annunciator, means for actuating said signal annunciator in response to distant signals, means for announcing an alarm, a signal producer designed to transmit a local signal to the receiving set, means for periodically setting in operation said signal producer and simultaneously therewith rendering said alarm announcing means temporarily inoperative, and means for maintaining the inoperative condition of

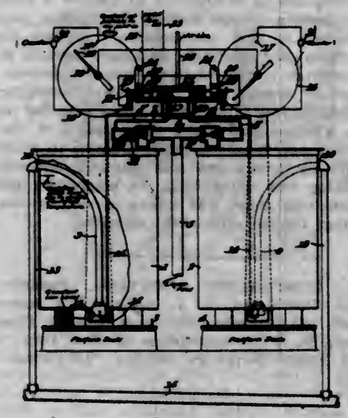
the alarm announcing means if the receiving set is operative and for destroying said condition and operating said means if the receiving set is inoperative.

1,625,823. RADIO RECEIVER AND TROUBLE ALARM. RALPH K. POTTER, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed July 15, 1926. Serial No. 122,687. 3 Claims. (Cl. 250—20.)



1. In association with a radio receiving set, a signal producer designed to transmit a local signal to the receiving set, a normally open circuit, a slow acting annunciator therein, means for periodically setting in operation said signal producer and simultaneously therewith closing the circuit through said annunciator, and means—responsive to the local signal when the receiving set is in operative condition—for re-opening said circuit.

1,625,824. GUARD FOR THE WHEELS OF VEHICLES. WILLIAM DOCKRAY RATCLIFF, London, England, assignor to Inventors' Trading Company, Limited, London, England. Filed Aug. 27, 1924, Serial No. 734,495, and in Great Britain Aug. 27, 1923. 8 Claims. (Cl. 293—58.)

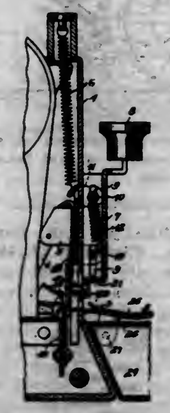


1. A wheel guard comprising a member adapted to extend in front of the wheel with its lower end spaced from the surface over which the wheel passes, a second member

connected directly to the first mentioned member for swinging movement, means for normally holding the sec-

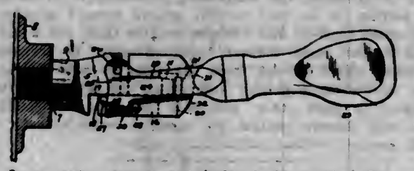
ond mentioned member at an angle to the first mentioned member, and means for releasing the second mentioned member so that it may swing into vertical position.

1,625,825. LIQUID-WEIGHING APPARATUS. JASPER M. ROWLAND, Niagara Falls, N. Y., assignor to Hooker Electrochemical Company, New York, N. Y., a Corporation of New York. Filed Aug. 2, 1926. Serial No. 126,657. 6 Claims. (Cl. 249—26.)



1. Automatic liquid weighing apparatus comprising a tank located on a scale platform, a siphon outlet for said tank and having its upper bend located above the highest level reached by liquid within said tank, a gas pipe entering said siphon for initiating the discharge flow therethrough, and means operable when a predetermined weight of liquid has been introduced into said tank for delivering gas through said pipe to start said siphon.

1,625,826. MANUFACTURE OF VAT DYESTUFFS. MAXIMILIAN PAUL SCHMIDT, Biebrich-on-the-Rhine, Germany, assignor, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 20, 1923, Serial No. 675,932, and in Germany Nov. 25, 1922. 3 Claims. (Cl. 260—124.)

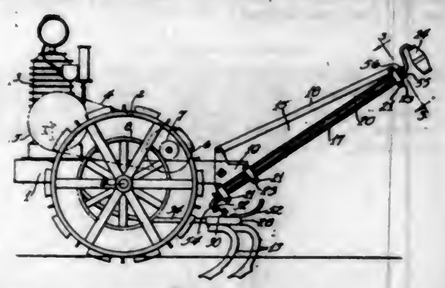


2. As a new product the vat dyestuff substantially identical with the product obtained by an alkaline fusion of the methoxynaphthalene 1.8-dicarboxylic-acid-di-imide which most probably is a mixture of isomeric dimethoxy perylene-tetracarboxylic-acid-di-imides, which is a black powder with a metallic luster forming with an alkaline hydrosulphite solution a blue vat, from which cotton and wool are dyed blue shades.

1,625,827. STAMP-DISPENSING MACHINE. WILLIAM F. SCHWEIGER, Rochester, N. Y., assignor to Multiposter Company, Incorporated, Rochester, N. Y., a Corporation of New York. Filed Nov. 19, 1924. Serial No. 750,952. 3 Claims. (Cl. 211—33.)

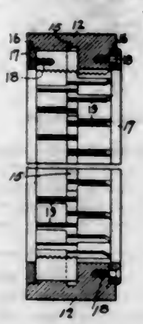
1. A stamp dispensing machine comprising strip feeding instrumentalities, stamp severing means, and an actuating device for the feeding instrumentalities and stamp severing means, said actuating device being movable independently of the stamp severing means.

1,625,828. WATER GAUGE FOR BOILERS. JOHN C. SHAFFER and LYNN S. MANKIN, Tulsa, Okla., assignors to Tulsa Valve Company, Tulsa, Okla. Filed Oct. 29, 1926. Serial No. 144,993. 7 Claims. (Cl. 251—147.)



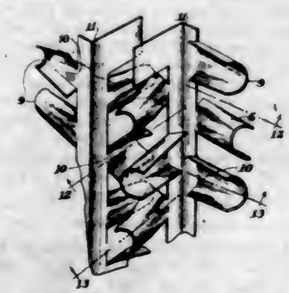
1. In a water gauge, a tubular body portion for connection with a boiler, said tubular body portion having a tubular stem provided with an outlet opening at its free end, a reciprocatory housing mounted to slide upon the tubular stem and having a laterally extending outlet opening, said housing being provided at its outer end with a cam face and having a seating part to engage with the outlet end of the tubular stem, a handle provided at its forward end with a pair of spaced arms and having a cam face between the arms for contact with the cam face of the housing, said arms being provided at their forward ends with transverse heads extending above and below the same, means for pivotally connecting the upper ends of the transverse heads with the body portion, and shifting elements carried by the housing and arranged forwardly and rearwardly of the lower ends of the transverse heads to contact therewith.

1,625,829. GARDEN CULTIVATOR. STANLEY W. SHAW, Galesburg, Kans. Filed Sept. 5, 1925. Serial No 54,748. 1 Claims. (Cl. 97—48.)



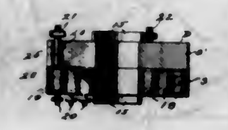
A device of the type described comprising a two-wheeled motor-propelled frame, beams laterally swing-

able relative thereto, axially rotatable guiding handles mounted on the frame and extending upwardly and rear-



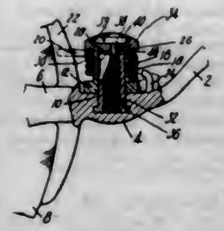
wardly, and a connection between each handle and a beam for lateral movement of said beam upon rotation of the respective handle.

1,625,830. PIPE-THREADING DIE. HOWARD W. SMITH, Ellwood City, Pa. Filed May 28, 1923. Serial No. 641,987. 3 Claims. (Cl. 10—120.)



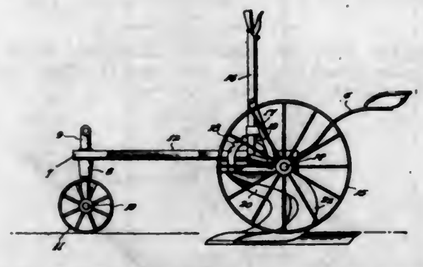
2. A threading die comprising a circularly curved holder having an internal central groove formed parallel to the sides thereof, and chasers shorter than the width of said holder, said chasers being disposed in transverse grooves which extend from the sides of said holder to the said central groove and which are staggered with respect to each other, and side members for clamping the said chasers against the opposite walls of said central groove.

1,625,831. APPARATUS AND PROCESS FOR LEACHING, FILTERING, AND ABSORBING GASES AND THE LIKE. HAROLD M. STARK, Highland Park, Mich. Filed Feb. 24, 1923. Serial No. 620,926. 14 Claims. (Cl. 183—4.)



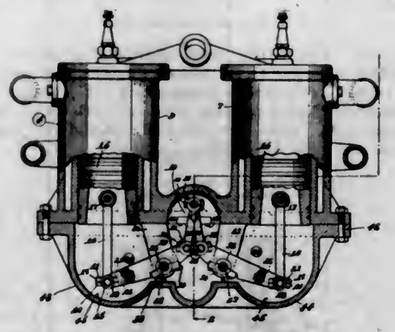
1. In a gas filter, a pair of filter plates arranged in spaced relation side by side and baffles extending from each of said plates toward the other plate, the baffles of one plate being closely spaced with respect to the baffles of the other plate to provide a multiplicity of substantially V-shaped linear capillary spaces for holding a multiplicity of drops of liquid.

1,625,832. CIRCUIT-CONTROLLING APPARATUS. MITCHELL AUGUSTUS STEIN, Anderson, S. C. Filed Feb. 15, 1921. Serial No. 445,227. 1 Claim. (Cl. 173—324.)



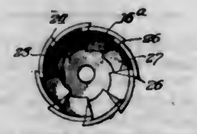
An electrical distributer comprising an element composed of a pair of sections to fit around a relatively movable portion of a steering mechanism, clamping means carried by said sections to fix the element upon said portion, a plurality of contactors carried by said element, being insulated therefrom and being situated in different radial and circumferential positions in respect to said movable steering mechanism portion, said contactors having means for the attachment of wires, a complementary element composed of sections to fit around a relatively stationary portion of said steering mechanism, clamping means carried by said complementary element for securing it upon said relatively stationary portion in confronting position to the relatively movable element, said complementary element being composed of concentric conducting rings having intermediate and separating insulating rings which extend above the surfaces of the conducting rings providing concentric journals in which the ends of the contactors run, said relatively movable elements bearing and riding upon the upstanding portions of the insulating rings, and means carried by the conducting rings for the attachment of wires.

1,625,833. OPHTHALMIC MOUNTING. FREDERICK A. STEVENS, Providence, R. I., assignor, by mesne assignments, to Bausch and Lomb Optical Company, Rochester, N. Y., a Corporation of New York. Filed Aug. 21, 1922. Serial No. 583,204. 13 Claims. (Cl. 88—50.)



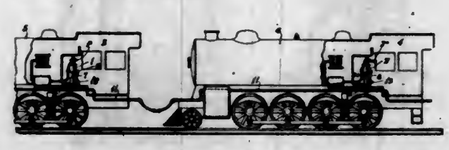
1. An eyeglass mounting having, in combination, a support having rigidly secured thereto a post the free end of which is provided with teeth, and a cap mounted upon the post having teeth engaging the teeth of the post, and a guard having a sleeve freely mounted about the post between the support and the cap.

1,625,834. CULTIVATOR. GLENN W. STILGENBAUER, Shepherd, Mich. Filed Sept. 30, 1926. Serial No. 138,733. 2 Claims. (Cl. 97—206.)



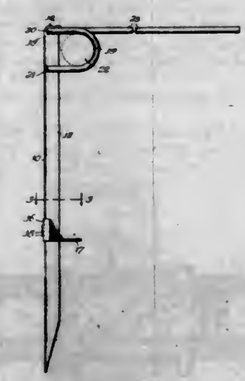
1. In an implement of the character specified, a standard enlarged at its lower end to provide a seat which is convex upon its top side, a blade mounted upon the seat and adjustable to admit of its pitch being varied and means for securing the blade to its seat.

1,625,835. INTERNAL-COMBUSTION ENGINE. O. D. SUTTON and CLYDE E. KENDALL, Chicago, Ill. Filed Mar. 14, 1925. Serial No. 15,484. 7 Claims. (Cl. 123—54.)



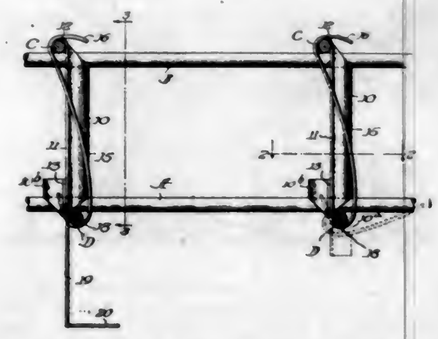
4. In combination, a casing having a pair of cylinders, pistons reciprocatory therein, a crank shaft supported by the casing in a plane midway between the cylinders, portions depending from the casing and terminating on opposite sides of said midway plane, fulcrum shafts mounted in said depending portion, rocking levers on said shafts, connecting rods connecting the outer ends of said rocking levers with said pistons, pitmen connecting the inner ends of said rocking levers with the crank of said crank shaft, substantially as described.

1,625,836. CUTTING TOOL. ARTHUR G. TANGUAY, Chicago, Ill., assignor, by direct and mesne assignments, to Badger Tool & Mfg. Co., a Corporation of Illinois. Filed Sept. 5, 1925. Serial No. 54,839. 11 Claims. (Cl. 29—103.)



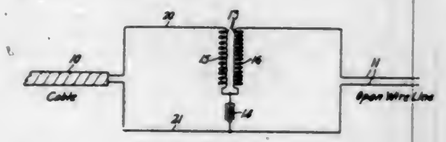
1. A cutting tool comprised of a member having a plurality of radially arranged elements, the longitudinally disposed edges of one of said elements being arranged at one side of the longitudinal adjacent edge of another element to thereby produce cutters of the opposite longitudinal edges of each element.

1,625,837. NONRETURN CHECK VALVE FOR BRAKE SYSTEMS CONNECTING A PLURALITY OF ENGINES. CHARLES RAYMOND WHITACRE, Cincinnati, Ohio. Filed May 3, 1926. Serial No. 106,400. 4 Claims. (Cl. 303—14.)



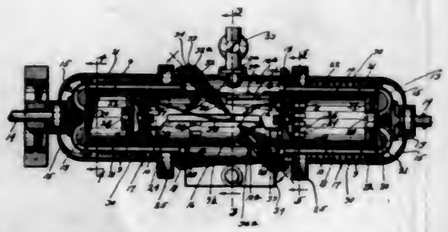
3. In means of the character described, braking apparatus, a main air brake pipe communicating with said braking apparatus, an automatic brake valve for each engine, a brake pipe communicating from said main brake pipe to each automatic brake valve, and a non-return check valve interposed between each automatic brake-valve and said main brake valve comprising a valve body having a central vertical opening therethrough, the outer ends of which are internally threaded to receive the ends of brake pipe and said body having a horizontal tapered opening intersecting said vertical opening, a tapered bushing in said horizontal opening, a tapered plug in said bushing, a hand lever on the reduced end of said plug and having an opening therethrough adapted to register with said vertical opening and having a reduced opening thereon parallel with said opening and adapted to aline with said vertical reduced openings in said check-valve or be closed therewith, according to the position of said hand lever and said plug having a transversely disposed hole in its large end with passageways through said body connecting said hole with said vertical opening and means inserted in said passageway whereby the flow of air can go in one direction only, substantially as set forth.

1,625,838. SUPPORT AND SPACER FOR BARS. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 5, 1926. Serial No. 99,913. 9 Claims. (Cl. 94—8.)



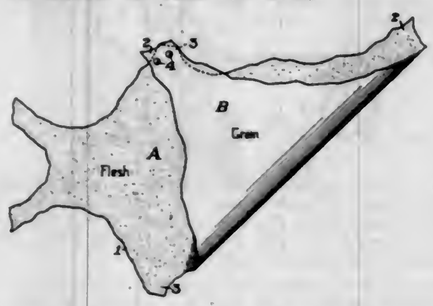
1. In a device of the class described, the combination of a stake of generally channel form in cross section, and a separate hook composed of wire pivoted for movement transversely across the vertical axis of the stake with the pivot of the hook near the top of the stake.

1,625,839. JUNCTION CLIP AND SPACER FOR REENFORCEMENTS. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 6, 1926. Serial No. 152,893. 6 Claims. (Cl. 94—8.)



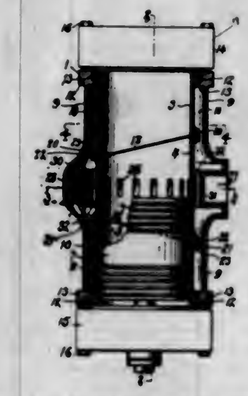
6. In combination, a rigid, sheet metal spacer providing a seat at each end for a bar, and a pair of spring arms pivoted to one end of said spacer and adapted to engage over a bar at the pivot end and to be hooked over a parallel bar at the opposite end of said spacer.

1,625,840. TRANSMISSION SYSTEM. HORACE WHITTLE, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 18, 1921. Serial No. 485,447. 4 Claims. (Cl. 178—44.)



1. In a wave transmission system for transmitting signaling currents in the speech frequency range and signaling currents in the ultra speech frequency range, two lines of different characteristic impedances, coupling means for said lines comprising a transformer for transmitting both speech and ultra speech frequencies, and means cooperating with said transformer for preventing substantial reflection losses for the whole range of frequencies.

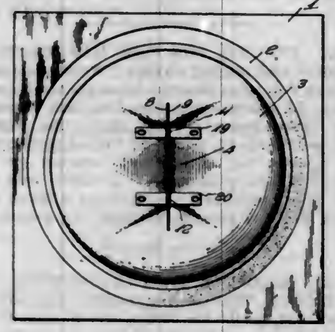
1,625,841. ROTARY RECIPROCATING ENGINE. ARTHUR H. WRIGHT, Minneapolis, Minn. Filed Apr. 16, 1926. Serial No. 102,439. 10 Claims. (Cl. 123—43.)



1. An engine comprising a cylinder, piston and outer support, said piston having a reciprocating movement within said cylinder, and an oblique rotary connection between said cylinder and outer support arranged to cause rotation of one of the elements in respect to the other when said piston is reciprocated.

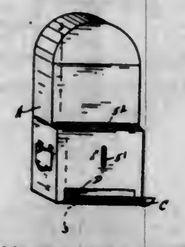
1,625,842. ART OF COLORING LEATHER. PETER A. BLATZ, Wilmington, Del. Filed June 15, 1926. Serial No. 116,084. 11 Claims. (Cl. 8—5.)

1. In the art of coloring leather, the step of fastening the skins together; portions of the skins being overlapped in an uneven or unsymmetrical condition, and then drumming such connected skins in a coloring solution.



1,625,843. CYLINDER FOR DOUBLE-ACTING ENGINES. THOMAS DAVID BOWEN, Cynwyd, Pa., assignor, by direct and mesne assignments, of one-third to Hubert C. Verhey and one-third to L. C. Cope, Philadelphia, Pa. Filed Apr. 22, 1925. Serial No. 24,965. 7 Claims. (Cl. 123—173.)

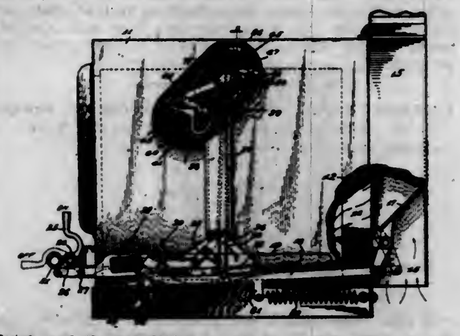
1. A double acting engine cylinder comprising a casing, a liner having its working ends secured in said casing, said liner comprising separate sections having an expansion joint formed between said sections and said joint positioned on a plane extending obliquely in relation to the longitudinal axis of the cylinder.



1,625,844. SOUND-REPRODUCING APPARATUS. CYRIL A. BRIGHAM, East Orange, N. J., assignor to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed Nov. 2, 1926. Serial No. 145,809. 7 Claims. (Cl. 179—115.)

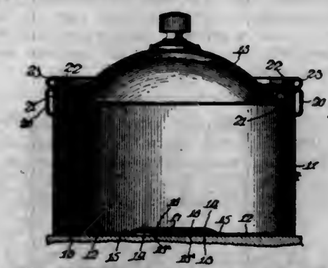
1. An electromagnetic sound reproducer comprising an electromagnetic driving mechanism, a vibratory member actuated by said mechanism, a sound reproducing diaphragm, said diaphragm being substantially dished at the center thereof and having a pair of co-extensive parallel lip portions secured to said vibratory member

whereby vibrations initiated in said vibratory member are transferred through said lips to said sound reproducing diaphragm.



1,625,845. MERCHANDISE-VENDING MACHINE. ALONZO CANTRELL, Salt Lake City, Utah. Filed Apr. 21, 1926. Serial No. 103,454. 1 Claim. (Cl. 194—88.)

A vending machine comprising a casing having a coin receiving slot in its upper end; a manually-operated coin directing mechanism mounted in said casing, said mechanism consisting of spaced apart parallel plates; a shaft pin journalled in said plates; a recess formed in the inner face of the outer of said plates; a trigger member pivoted and operated within said recess; a coin receiving and directing disk secured on said shaft pin, and having a laterally projecting pin therein; arc-shaped slots cut in the adjacent one of said plates, and within which slots the said lateral pin is operated; an irregular recess is cut in the side of another of said plates; a thin casing operable in said irregular shaped recess and pivoted on said shaft pin; a spring held catch longitudinally movable in said thin casing; a spring held dog pivotally mounted on the outer face of said thin casing; a plate 16 having a semicircular slot therein is secured to the recessed plate; a ratchet wheel formed on the outer face of a drum; slots cut in the said plate 16 and similar slots cut in the wall adjacent through which the said spring held dog engages with the teeth of said ratchet wheel, whereby the drum is intermittently rotated.



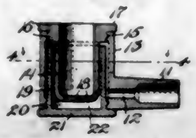
1,625,846. COOKING OVEN. JOHN E. CHAMBERS, Shelbyville, Ind. Filed May 20, 1926. Serial No. 110,488. 17 Claims. (Cl. 126—42.)

1. In combination with an oven having one or more ventilation openings, means for controlling the flow of air through said openings, a heating element located within said oven for heating said oven, regulating means for said heating element, said ventilation-control means being spring-pressed to closed position, a latch for holding said ventilation-control means in open position, and latch-operating means operatively interconnecting said

latch and the regulating means for said heating element so that said latch will be released when said last-named means is operated to shut off said heating element.

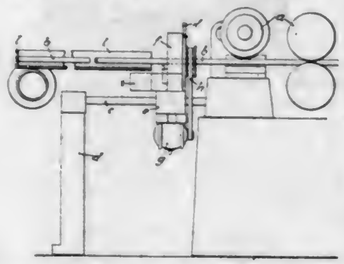
1,625,847. CULINARY VESSEL. WILLIAM W. DECKER, Jr., Chicago, Ill. Filed Feb. 2, 1925. Serial No. 6,177. 3 Claims. (Cl. 53—8.)

1. A culinary vessel of the character described having a substantially large bottom wall plane on radial lines extending inward to a substantially small portion about the centre, said central portion being circumferentially defined by a shallow stress-relieving formation upstanding above the inner surface of the bottom and adapted to have its circumferential margin yield radially inward under expansion stresses in the outer plane portion of the bottom.



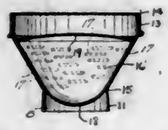
1,625,848. BATTERY UNIT AND METHOD OF PRODUCING THE SAME. CYRIL P. DEIBEL and WALTER G. WAITT, Lakewood, Ohio, assignors to The Twin Dry Cell Battery Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 3, 1926. Serial No. 106,251. 3 Claims. (Cl. 136—109.)

1. In a battery unit, a container having a layer of plastic material on the bottom thereof, partitions dividing



said container into a plurality of compartments, said partitions having one side embedded in said plastic material, a dry cell removably secured in each of said compartments, said cells being removable from said compartments without disturbing the seal of the individual compartments.

1,625,849. PIPE. EDWARD T. FITZ-GERALD, Newark, N. J. Filed Jan. 14, 1925. Serial No. 2,246. 1 Claim. (Cl. 131—12.)

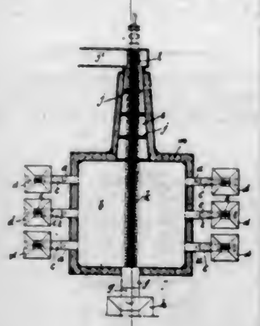


A pipe comprising a cylindrical shell with open ends and a lateral stem opening at the bottom, a cylindrical thimble with a flange at its closed end, said thimble screwed into the bottom of the shell and having its enclosed part slightly smaller than the inside of the shell and having its flange fitting against the bottom edge of the shell, and a bowl screwed into the top end of the shell and having a part within the thimble and slightly smaller than the thimble, the bowl having a flange to extend to form the top rim of the shell, the parts forming a series of annular cylindrical spaces when assembled, and presenting all surfaces subject to easy wiping when separated.

1,625,850. CUTTING-OFF DEVICE PARTICULARLY FOR TUBES. PAUL GEDIEN, Cologne-Braunsfeld, and KARL SCHWADE, Cologne-Lindenthal, Germany. Filed Oct. 28, 1926, Serial No. 144,899, and in Germany Dec. 23, 1924. 2 Claims. (Cl. 164—75.)

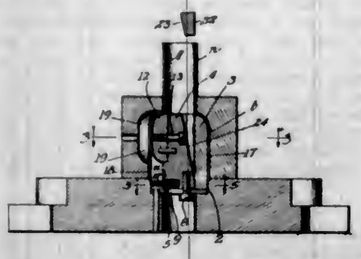
1. In a tube-cutting device, the combination of tube-feeding means, a cutter-supporting block mounted for sliding movement in parallelism with a tube fed by said feeding means and supporting a cutter in axial alinement with said tube and means carried by said cutter-supporting block and disposed in position to be engaged by the moving tube thereby to cause sliding movement of said cutter-supporting means.

1,625,851. SPRAY HEAD FOR BOILER-WASHING MACHINE. DANIEL A. HEGARTY, Houston, Tex., assignor to Mystic Washer Company, Houston, Tex. Filed Sept. 27, 1926. Serial No. 137,937. 7 Claims. (Cl. 68—30.)



6. In a wash boiler an upwardly directed circulating column, a flaring spray head thereon having discharge openings therein, and means to close said openings responsive to fluid pressure in said column to open and allow discharge of fluid.

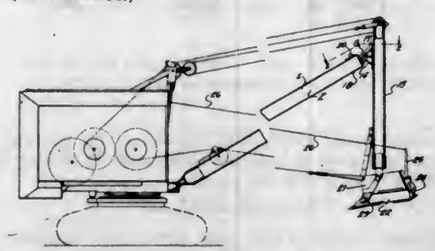
1,625,852. PROCESS FOR THE MANUFACTURE OF LINOXINLIKE SUBSTANCES. WILLY O. HERRMANN and HANS DEUTSCH, Munich, Germany, assignors to Consortium für Elecktrochemische Industrie, Munich, Germany. Filed June 13, 1925, Serial No. 36,941, and in Germany June 18, 1924. 17 Claims. (Cl. 106—22.)



1. A product of manufacture obtained by heating resinous aldehyde condensation products with organic hydroxy acid compounds, incorporating a filling material therewith and hot pressing to form the desired article.

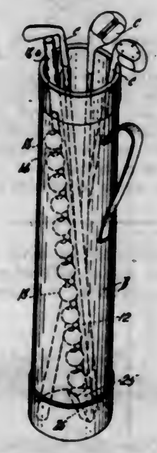
1,625,853. CEMENT AND LIME BURNING. GEORGE EDWARD HEYL, Westminster, London, England. Filed Mar. 4, 1926, Serial No. 92,271, and in Canada Mar. 5, 1926. 4 Claims. (Cl. 222—1.)

1. A method of burning calcareous material consisting in blowing in a plurality of successive planes opposing jets of combustible flaming at a vitrifying temperature, and blowing a separate jet of powdered calcareous material transversely, successively to encounter said flaming jets.



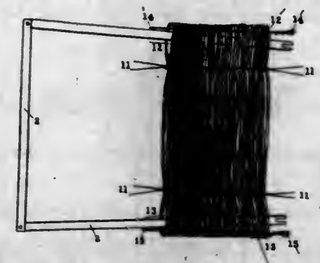
1,625,854. DIE FOR MAKING CARBURETOR FRAMES. FRANK HOLT, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 29, 1925. Serial No. 26,625. 4 Claims. (Cl. 153—21.)

1. Die mechanism for forming a lateral cylindrical flange on a cylindrical shell comprising spreader mechanism for intimately receiving the shell, a cam block on said spreader mechanism, means co-operating with said spreader mechanism to force said cam block against the cylindrical shell wall to form a lateral bulge thereon,



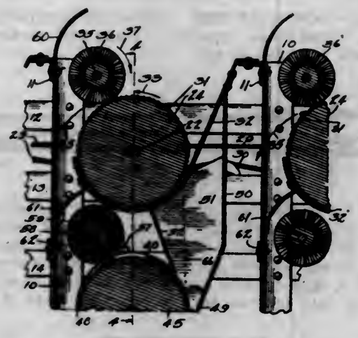
means for punching a hole through the outer wall of said bulge, and an expansion plug for entering said bulge hole from the outside and expanding the metal around said hole into the lateral flange.

1,625,855. POWER SHOVEL. JOHANNES S. HUBER, Milwaukee, Wis., assignor to Harnischfeger Corporation, Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 10, 1926. Serial No. 101,022. 10 Claims. (Cl. 214—138.)



1. The combination with the boom and dipper stick of a power shovel, of means connecting said dipper stick to said boom for pivotal movement with respect to the latter about an axis extending longitudinally of and fixed relatively with respect to the same and for pivotal movement about an axis substantially transverse to said first-named axis.

1,625,856. GAME-BALL HOLDER. RANDALL F. JUDD, Brookline, Mass. Filed Oct. 11, 1926. Serial No. 140,831. 2 Claims. (Cl. 224—0.5.)

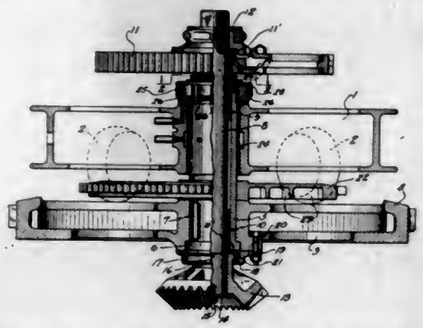


1. A game-ball holder comprising an elongated stiff rod, adapted to be inserted in a bag and having a recessed longitudinal side formed to receive and support zones of a row of game balls and oppose displacement of the balls in certain directions, and a plurality of pairs of resilient jaws projecting from the recessed side and formed to bear on opposite zones of a row of balls seated on the recessed side, and adapted to yieldingly oppose displacement of the balls in other directions, each pair of jaws independently confining a ball in a predetermined position on the rod and opposing its accidental removal from said position.

1,625,857. METHOD FOR MAKING MOP HEADS. EDWARD JUMONVILLE, New Orleans, La. Filed Dec. 2, 1925. Serial No. 72,754. 2 Claims. (Cl. 300—21.)

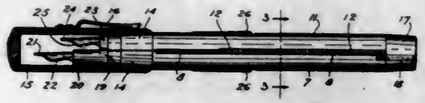
1. The method of making mop-heads which includes helically winding yarn on a form where the helix is laid with a pitch equal substantially to two diameters of the yarn, then cross-stitching in a single layer the strands thus wound and then removing the mop from the form.

1,625,858. SEED-CLEANING MACHINE. MELVIN L. KOLLMAN, Sioux City, Iowa, and EMIEL L. KLAPPAL, Witton, S. Dak. Filed July 18, 1924. Serial No. 726,740. 3 Claims. (Cl. 209—78.)



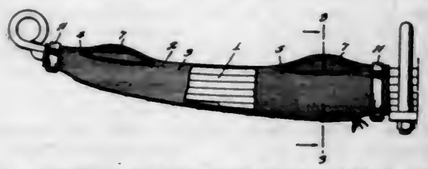
1. A seed separating machine comprising a frame, an inclined trough mounted thereon, a cloth covered roller journalled on said frame and arranged in said trough said roller being tapered so as to be smaller at its discharge end than at its receiving end and a roller brush in contact with said cloth covered roller so that seed carried upon said cloth covered roller may be brushed therefrom by said roller brush.

1,625,859. EXCAVATOR CRANE. ROLF LJUNGKULL, Milwaukee, Wis., assignor to Harnischfeger Corporation, Milwaukee, Wis., a Corporation. Filed Apr. 15, 1926. Serial No. 102,154. 3 Claims. (Cl. 212—70.)



1. In an excavator crane of the character referred to, the combination with a relatively fixed gear, a frame arranged above said gear and supported for rotary movement with respect thereto, of a hollow cylindrical pin provided at its lower end with a head and extending upwardly through the center of said gear and the axis of rotation of said frame, said pin being threaded at its upper end and provided therein with a longtudinally extending groove, a nut threaded upon said end and acting upon the upper side of said frame to hold the latter against axial movement with respect to said gear, said nut being provided at its outer edge with a plurality of longitudinally extending grooves, and a locking member arranged loosely upon the threaded end of said pin above said nut and resting upon the latter, said member being

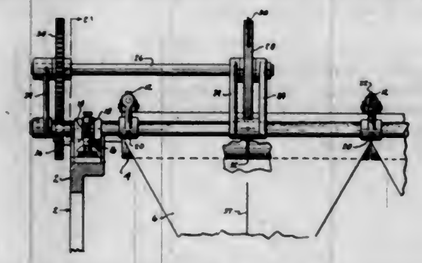
provided at its inner edge with an inwardly extending lug engaging the groove in said threaded end and at its outer edge with a downwardly extending lug arranged in one of said grooves with which the nut is provided, the arrangement being such that upon upward axial move-



ment of said washer upon said pin said downwardly extending lug is disengaged from said nut to permit adjustment of the latter while said inwardly extending lug maintains its locking engagement with the threaded end of said pin.

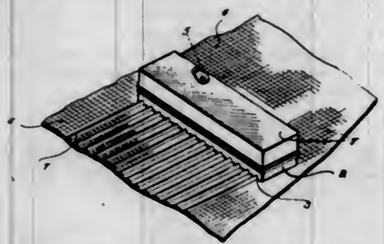
1,625,860. FOUNTAIN PEN. MILTON M. MACH, Omaha, Nebr. Filed June 20, 1925. Serial No. 38,546. 5 Claims. (Cl. 120—42.)

1. In a fountain pen, a main pen-barrel having longitudinal guide members, an auxiliary pen-barrel connected slidably with said guide members, said main and auxiliary barrels having portions adapted to register transversely to form a tapering seat, and a cap frictionally engageable with said tapering seat to cover the ends of both barrels.



1,625,861. SPRING COVER. FRANCIS DUFFY MADGE, Sound Beach, Conn. Filed Jan. 2, 1926. Serial No. 78,764. 5 Claims. (Cl. 267—37.)

1. A cover for an automobile spring having at least one rebound clip, comprising a single piece body portion adapted to cover the upper side of the spring and to provide side portions to extend down each side of the spring and around the lower edges thereof, said single piece body portion having an unbroken top, and gussets set into the side portions adjacent the opposite upper edges thereof and adjacent each clip.



1,625,862. MEANS FOR FORMING NEWS AND TABLOID SECTIONS FROM A CONTINUOUS WEB. EARL L. MARTIN, New York, N. Y. Filed June 2, 1926. Serial No. 113,135. 5 Claims. (Cl. 270—42.)

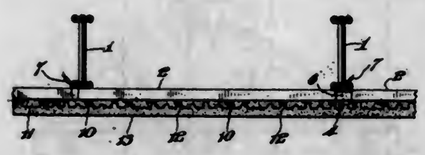
1. In a printing press, the combination of a drag roll, a slitting device intermediate of the ends of said drag roll and having a cylindrical surface adapted to constantly engage the web upon the drag roll and a knife

extending around substantially one-half of the periphery thereof and adapted to intermittently slit the web as it passes over said drag roll.

1,625,863. APPARATUS FOR APPLYING NONSLIPPING MATERIAL TO FLOOR COVERINGS. GORDON MCLARTY, Rochester, N. Y. Filed Mar. 23, 1925. Serial No. 17,627. 2 Claims. (Cl. 18—59.)

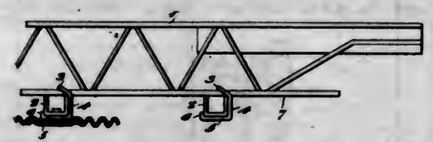
2. A distributing member comprising a box like structure for containing the nonslipping element, said structure having an air intake opening and having a plurality of elongated slots, the structure being formed with discharge openings at one end of each slot, so that the material in the structure will be forced through the slots into the interstices of the floor covering under pressure of the contents of the receptacle, and will be shaped by the discharge opening as the receptacle is moved over the floor covering.

1,625,864. BALLAST DIGGING AND CLEANING MACHINE. GEORGE C. MELIN, Galesburg, Ill. Filed July 9, 1926. Serial No. 121,304. 8 Claims. (Cl. 104—7.)



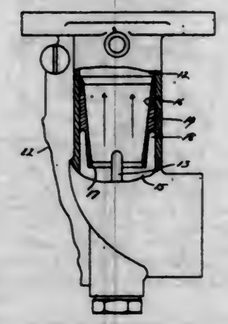
1. In a machine of the class described, the combination of a flat car, a pair of shoes adapted to be inserted beneath the ties of the track, wedge-shaped ridges on said shoes adapted to engage the lower surface of the ties and raise them, means for shifting said shoes outwardly from said car, and means for raising said shoes above the level of the track.

1,625,865. FURRING CONSTRUCTION. GEORGE F. PAWLING, Philadelphia, Pa. Filed Sept. 6, 1924. Serial No. 736,245. 4 Claims. (Cl. 72—118.)



1. In a ceiling construction of the character stated, a supporting structure, furring having adjacent ends fitted

together and suspended from said supporting structure, the furring consisting of a plurality of sections to form a continuous member for the whole length of the ceiling,

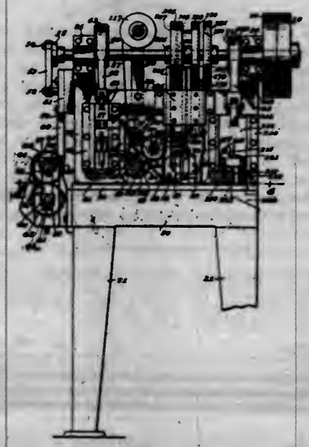


said furring being provided with metal-lath supporting clips, and metal lath arranged beneath said furring and engaged by said clips.

1,625,866. MEANS OF SUPPORTING CEILING FURRING. GEORGE F. PAWLING, Philadelphia, Pa. Filed Nov. 26, 1924. Serial No. 752,286. 1 Claim. (Cl. 72—118.)

A clip for securing furring to skeletonized joist formed from a single piece of material, as wire, and bent to form a horizontal, furring supporting portion and a pair of vertical side pieces terminating in a loop projecting at an inclination and in a direction toward the toe of the clip, said loop being adapted to engage over a bar of the lower cord of skeletonized joist and an upturned end for each of said horizontal portions which upturned parts form the toe of the clip.

1,625,867. AJUTAGE. ANTOINE P. PLAUT, Detroit, Mich., assignor of one-half to Roberts Brass Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed July 23, 1921. Serial No. 486,941. 2 Claims. (Cl. 137—75.)

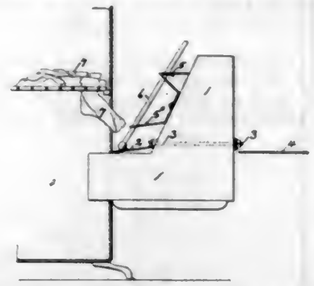


1. In a carbureter, the combination with an induction conduit having a substantially straight portion extending in a single direction, a tapering tubular member not of Venturi form entirely within the straight portion of said conduit, the small end of said tapering member being spaced from said outer induction conduit to form a surrounding annular pocket whereby a curved Venturi passage is obtained at the entrance to said tubular member, the sides of said passage being formed by the fluid trapped by said annular pocket.

1,625,868. CARDING MACHINE. JOHN PLATT, Harrow, England, and WILLIAM PLATT and HENRY PLATT, Roubaix, France. Filed June 23, 1925, Serial No. 38,952, and in Germany July 1, 1924. 2 Claims. (Cl. 19—106.)

1. In a carding machine, the combination with a swift clothed with the ordinary card clothing of a doffer which is clothed with a clothing comprising straight and rigid teeth that taper from bottom to top to provide needle-like points.

1,625,869. MACHINE FOR MAKING BOTTLE CLOSURES. FREDERIC K. PLYMPTON, Brewster, N. Y., assignor to Naomi D. Plympton, Brewster, N. Y. Filed Apr. 18, 1925. Serial No. 24,301. 29 Claims. (Cl. 140—93.)



1. In a machine of the character described, a wire forming and attaching mechanism for attaching wire balls to cap stock or the like, comprising wire forming means adapted to form lengths of wire into U-shape, means for passing the legs of said formed wire in one direction partially through the stock, means for bending and clinching the inserted ends with respect to the stock, and means for bending the non-inserted portion in flatwise relation to the surface of the stock.

1,625,870. STOVE-FUEL IGNITER. HUBERT W. ROBERT, Campbell, Nebr. Filed Jan. 30, 1926. Serial No. 85,063. 3 Claims. (Cl. 175—115.)

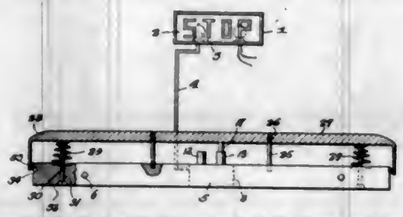
1. A fuel igniting device for stoves comprising a support of insulating material having one face downwardly inclined and then extended forward, a coil of resistance

wire mounted upon this face of the support adjacent the horizontal portion thereof and adapted to be connected in a normally open circuit with a source of current, and

means projecting from the inclined face of the support whereby a match may be supported with its head against the resistance wire.

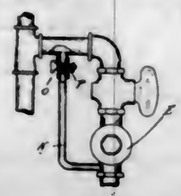
1,625,871. BOAT-ANCHOR HOIST. HENRY ROBERTSON and HAROLD HIRDLER, Long Prairie, Minn. Filed June 11, 1925. Serial No. 36,436. 4 Claims. (Cl. 254—186.)

1. A boat anchor hoist comprising a bracket applicable to a boat, a windlass drum journaled on the bracket, a hoisting rope arranged to be wound on the windlass drum, an anchor attached to the hoisting rope, a ratchet wheel on the brake drum and a pawl on the bracket, a manually operated brake for the windlass drum independently mounted in respect to the pawl and having a part arranged to engage the pawl and release the same from the ratchet wheel during the brake-setting action, said pawl being arranged to automatically reengage the ratchet wheel during the releasing of the brake.



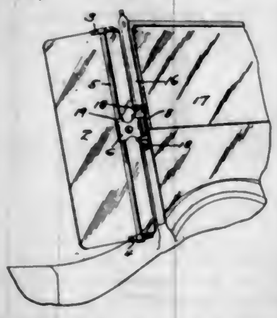
1,625,872. COMBINATION WINDOW. HENRY J. SCHLACKS, Chicago, Ill. Filed Dec. 29, 1925. Serial No. 78,074. 5 Claims. (Cl. 20—48.)

1. A window construction comprising a movable window with panes fixed in opposite sides thereof and providing a space therebetween, metal channel members mounted upon the opposing edges of said fixed panes, a supporting frame having its vertical sides secured to said channel members, the top and bottom members of said supporting frame being secured to the top and bottom bars of said window, and a casement window hingedly mounted in said supporting frame.



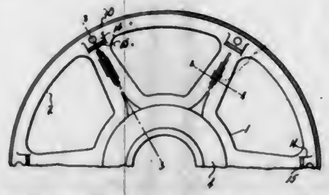
1,625,873. ELECTRIC SIGNAL FOR RAILROAD CROSSINGS, PUBLIC HIGHWAYS, AND THE LIKE. BRUCE J. SHALD, O'Neill, Nebr. Filed June 16, 1926. Serial No. 116,427. 5 Claims. (Cl. 246—246.)

4. An electric signal including a base member having a central opening and provided with fixed guide posts located at opposite sides of the center of the base member, a depressible member adapted to be engaged by the wheels of a vehicle and provided with openings receiving the guide posts, cushioning means interposed between the base members and the depressible member, a switch



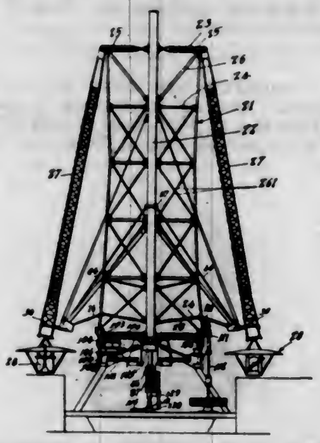
mounted in the central openings of the base member and arranged in the said circuit and switch operating means carried by the base member and arranged to be engaged by the depressible member.

1,625,874. GAS VALVE. FRANK W. SHUELL, Detroit, Mich., assignor to Ever Hot Heater Company, Detroit, Mich., a Corporation of Michigan. Filed Feb. 4, 1924. Serial No. 690,614. 1 Claim. (Cl. 236—33.)



The combination with a gas burner, a supply conduit therefor and a thermostatically operated valve for varying the supply, of a by-pass conduit around said valve, a plug in said by-pass conduit rotatable about an axis transverse to said conduit, said plug having a laterally extending full circular opening therethrough adapted to extend axially of said conduit, said opening being calibrated to limit the amount of gas passing therethrough to that necessary for supplying the pilot light for the burner.

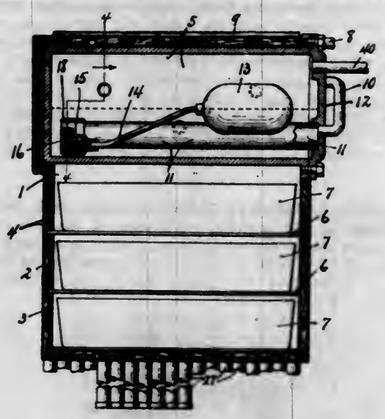
1,625,875. VEHICLE WIND WING. ALBERT WASSEL, San Francisco, Calif., assignor, by direct and mesne assignments, to George J. Henry, San Francisco, Calif. Filed Mar. 17, 1919. Serial No. 283,003. 6 Claims. (Cl. 296—84.)



1. A wind shield wing comprising a transparent plate and a rod extending lengthwise of said plate, and secured on its ends with said plate, a bracket constructed and adapted to be secured to a standard and having a cylindrical member, a link embracing said cylindrical member and said rod and clamping means whereby the link is caused to seize the rod and the cylindrical member.

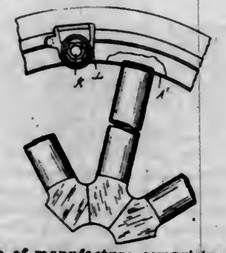
1,625,876. CAST WHEEL. ELMER F. WATERBOR, Detroit, Mich., assignor to Christine McD. Simpson, Detroit, Mich. Filed Jan. 18, 1926. Serial No. 82,187. 4 Claims. (Cl. 301—65.)

3. A cast wheel including a hollow hub having spaced front and rear walls, and a peripheral wall extending therebetween, hollow spokes of triangular cross section integral with said hub and a felly having spaced side flanges and a web forming an uninterrupted channel opening radially outwardly of the wheel, one of the side flanges of said felly and one of the walls of each of said spokes lying substantially in the same plane with one of the walls of said hub and forming one side of the wheel, the peripheral wall of said hub and the web of said felly diverging from one side of the wheel to the other.



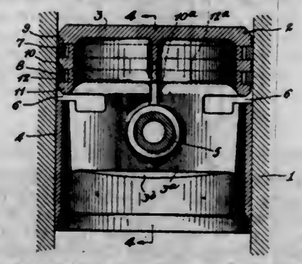
1,625,877. AMUSEMENT APPARATUS. EDWARD K. WOOD, Wilmington, and JOHN METZGER, deceased, Venice, Calif., by Constance I. Metzger, administratrix, Venice, Calif., assignors to Amusement Engineering Corporation of California, Los Angeles, Calif., a Corporation of California. Filed Nov. 10, 1925. Serial No. 68,077. 13 Claims. (Cl. 272—41.)

1. An amusement apparatus comprising a rotatably mounted frame, means to rotate said frame, an arm hinged to the frame, a carriage swingingly suspended from the arm, releasable means to latch the arm against swinging when the frame is rotating, and means to release the latching means while the frame is rotating including fluid pressure actuated mechanism and electrically operated mechanism controlling the fluid pressure actuated mechanism.



1,625,878. REFRIGERATING APPARATUS. EUGENE L. BARNES, Watertown, N. Y. Filed May 22, 1925. Serial No. 32,172. 21 Claims. (Cl. 62—95.)

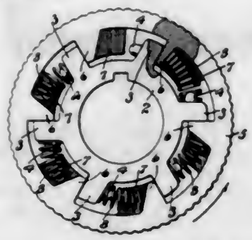
10. A refrigerating system in which cold is obtained by releasing a liquid medium under pressure and vaporising it, comprising means for controlling the passage of the medium from the high pressure side of the system to its low pressure side, and a cooler for freezing and segregating any moisture in the high pressure medium, so as to obviate interference with the passage of the medium by



freezing of such water, exposed to be cooled by the liquid medium in the low pressure side of the system.

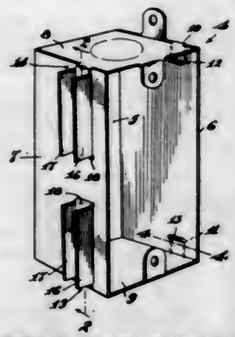
1,625,879. VEHICLE WHEEL. WILLIAM N. BOOTH, Detroit, Mich. Filed Apr. 30, 1917. Serial No. 165,383. 1 Claim. (Cl. 301—67.)

The new article of manufacture comprising a semiwood wheel for motor vehicles and composed of a body of wooden spokes radiating from a common center and each having an integral shaped outer end, in combination with a wrought metal endless fixed rim which presents a demountable-rim-supporting raised back flange, said fixed rim having at points below said back flange as many pressed-out, closed, concave sockets as there are spoke ends, said sockets fitting the shaped ends of respective wooden spokes and sealing the end-grain thereof, and said rim being circumferentially tensioned upon and holding under compression the body of spokes, as a whole.



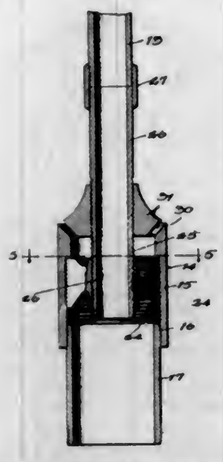
1,625,880. ENGINE. WARD HOLT BROADFIELD, Canton, Ohio, assignor to The H. H. Miller Industries Company, Canton, Ohio, a Corporation of Ohio. Filed Dec. 7, 1922. Serial No. 605,508. 4 Claims. (Cl. 74—109.)

1. In an engine, the combination with a cylinder, of a piston having a head and a skirt, said skirt being formed



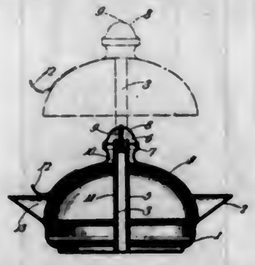
with an annular groove, and a ring mounted in said annular groove, said ring being formed in its under surface with a recess extending from a point remote from one end to a point remote from its other end and closed at its opposite ends to prevent oil from flowing into the joint of the ring, and the outer wall of the recess in said ring extending outwardly and downwardly beyond the lower surface of said ring and forming with the outer surface of the ring a relatively thin edge disposed below the lower surface thereof and adapted to scrape oil from the wall of the cylinder and guide it into said recess.

1,625,881. SECTIONAL FEED ROLLER FOR WOODWORKING MACHINES. WENDELL R. BUSS and M. EVERETT DICK, Holland, Mich., assignors to Buss Machine Works, Holland, Mich., a Corporation of Michigan. Filed July 21, 1924. Serial No. 727,127. 1 Claim. (Cl. 144—250.)



In combination, a shaft, a plurality of driving sections mounted in alinement with the shaft and on the same to rotate therewith, each of said sections having a plurality of spaced apart outwardly extending fingers, a plurality of feed roll outer sections located one around each driving section, each of said outer sections having a plurality of inwardly extending spaced apart lugs and a web at one side extending from each lug part way to the next adjacent lug, a coiled spring bearing at one end against each finger and at the opposite end against a lug, the end of the spring bearing against the lug lying alongside of the web connected therewith, and circular plates keyed to the shaft and located between adjacent driving and feed roller sections, substantially as described.

1,625,882. CONDUIT SWITCH BOX. CHARLES D. CONVERSE, Los Angeles, Calif. Filed Oct. 26, 1925. Serial No. 64,730. 3 Claims. (Cl. 247—21.)

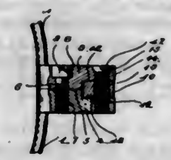


1. In a switch-box, an end wall, a side wall, an extension projecting from said end wall overlying the side wall and spaced out-turned flanges on said extension projecting substantially at right angles from the side wall forming a lath-receiving member, said extension being formed with an end tongue and said side wall being formed with an opening to receive said tongue.

1,625,883. GAS-ENERGY-CONTROL HEAD FOR OIL WELLS. ERD V. CROWELL, Los Angeles, Calif. Filed Mar. 31, 1923. Serial No. 629,198. 4 Claims. (Cl. 166—2.)

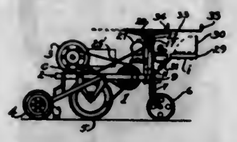
1. In a device of the character described for use with oil and gas wells, discharge tubing, a packer associated with the discharge tubing and having anchoring means controlled by the discharge tubing, a control head arranged upon the packer, and co-operative valve means carried by the control head and discharge tubing for positively and definitely regulating the degree of opening through said valve means.

1,625,884. SMOKER'S ASH TRAY AND LIKE RECEPTACLE. REGINALD MOSS DAVIS, London, England. Filed May 18, 1926, Serial No. 109,820, and in Great Britain May 25, 1925. 1 Claim. (Cl. 131—51.)



A smoker's ash tray comprising in combination a receptacle having a well portion and a wall sloping upwardly from the well portion, an upstanding post secured to the base of the receptacle, a cover for said well portion, a sleeve carried by said cover and mounted on said post, and a pin and slot connection between said post and said sleeve.

1,625,885. OPHTHALMIC MOUNTING. GEORGE H. DU PAUL, Southbridge, Mass., assignor to Shur-On Standard Optical Company, Inc., Geneva, N. Y., a Corporation of New York. Filed Feb. 10, 1926. Serial No. 87,206. 3 Claims. (Cl. 88—53.)



1. An ophthalmic mounting comprising a split lens ring having two end pieces projecting outwardly adjacent the split, the end pieces being formed to provide a temple receiving recess between them, one of said end pieces having an opening intersecting one wall of the temple receiving recess, a tubular temple bearing post internally

threaded and rigidly secured to the other end piece, projecting across the recess and detachably fitting in the opening of the other end piece to bridge the recess, a temple mounted to turn on the post, and a screw fastener

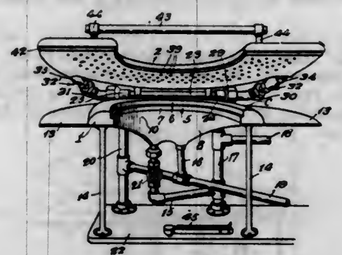
passed through said opening and engaging the end piece in which the opening is provided and also extending in and anchored to the post to draw the two walls of the temple receiving recess into engagement with opposite faces of the temple.

1,625,886. STEERING ATTACHMENT FOR VEHICLES. JACK ANDREW FELTON, Los Angeles, Calif. Filed Mar. 9, 1925. Serial No. 14,111. 4 Claims. (Cl. 280—92.)

1. In combination with a power tractor having a frame; a wheel; a yoke in which said wheel is mounted; uprights secured to said frame; a cross member connecting said uprights; a steering post rising from said yoke and being rotatably supported from said frame; a steering wheel journalled to said cross member; and operative means connecting said steering wheel and said steering post.

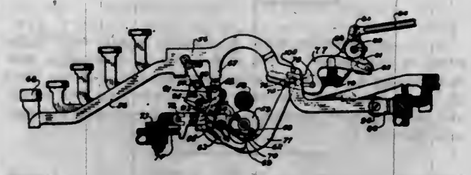
1,625,887. DRY-PAN CRUSHER. JOHN S. FOWLER, San Mateo, Calif., assignor to Pacific Foundry Company, San Francisco, Calif., a Corporation of California. Filed Dec. 5, 1925. Serial No. 73,419. 4 Claims. (Cl. 83—45.)

3. In a dry pan crusher, a pan comprising a frame; an annular screen plate adapted to rest upon said frame, said screen plate being divided into a plurality of sections; depending marginal flanges at the edges of and integral with said sections; lugs formed with, and longer than the width of, said flanges, said lugs having slots therein; and bolts passing through said slotted lugs for separately connecting together said sections and adapting them for relative vertical adjustment.



1,625,888. ROOFING ELEMENT AND METHOD OF MAKING THE SAME. JULIUS H. GILLIS, Elizabeth, N. J., assignor, by mesne assignments, to Anaconda Sales Company, a Corporation of Delaware. Filed Aug. 15, 1923. Serial No. 657,489. 16 Claims. (Cl. 204—8.)

1. A method of making roofing elements, which comprises preparing a base containing a plastic substance, allowing the plastic substance to assume a non-adhesive condition, applying a metallic layer to the surface of the base, and simultaneously heating the metal and pressing

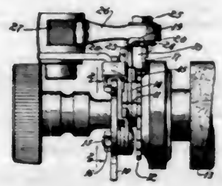


it against the base, the heating of the metal being carried on to an extent sufficient to soften the plastic substance and render it adhesive.

1,625,889. MEANS FOR RENOVATING AND REBLOCKING HAT BRIMS. HENRY HEARTFIELD, Brea, Calif. Filed Sept. 13, 1923. Serial No. 662,389. 5 Claims. (Cl. 223—31.)

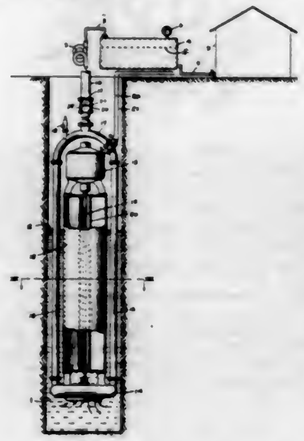
1. A hat brim blocking outfit comprising a member including a flat removable form supporting surface having a vertical shoulder; a removable form having a depending lip adapted to engage the periphery of said shoulder and having a surface adapted to receive a hat brim; and means cooperating with said form to operate upon a hat brim received upon said surface.

1,625,890. ESCAPEMENT MECHANISM FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed May 10, 1924. Serial No. 712,181. 9 Claims. (Cl. 197—82.)



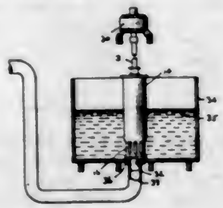
1. In a typewriter, the combination with escapement mechanism, of a universal member for actuating said escapement mechanism, power actuated means for operating said escapement mechanism independently of said universal member, a space lever for controlling said power actuated means and driving connection between said power-actuated means and escapement mechanism separate from said space lever.

1,625,891. REMOVABLE PLATEN SUPPORT. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed July 19, 1924. Serial No. 726,907. 12 Claims. (Cl. 197—145.)



1. The combination with a platen shaft, of an upright plate having an open seat therein for receiving said platen shaft, a ratchet on said platen shaft, a bracket

pivotally mounted on said platen carriage plate eccentric to said shaft, a pawl mounted on said bracket for engaging said ratchet wheel, and a limit stop for said pawl,



said stop being pivoted on said plate independently of said shaft and arranged to limit movement of said bracket and pawl about the pivotal mounting of said bracket.

1,625,892. VERTICAL-SHAFT FLOATING PUMP. ALADAR HOLLANDER, Berkeley, Calif., assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif., a Corporation of California. Filed May 17, 1926. Serial No. 109,483. 3 Claims. (Cl. 103—87.)

1. In combination with a vertical shaft centrifugal pump, a float below which said pump is suspended, said float having a tubular opening therethrough, a motor fixed on top of said float, a driving shaft connecting said motor and said pump in operative relation and passing through said opening.

1,625,893. VERTICAL-PUMP MECHANISM. ALADAR HOLLANDER, Berkeley, Calif., assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif., a Corporation of California. Filed May 17, 1926. Serial No. 109,484. 3 Claims. (Cl. 103—89.)

1. A vertical shaft pump, comprising a cylindrical body having a plurality of peripheral openings in its lower part and thereabove an annular internal conical seat and therebelow a pump casing portion, guide vanes and a central dispersion cone all formed integrally, an impeller positioned between said guide vanes and said seat, a vertical driving shaft for said impeller, a downwardly directed conical member and a central tube enclosing said shaft and integral with said member, a surface on said member adapted to engage said conical seat, other guide vanes on said member adapted to direct fluid to said impeller.

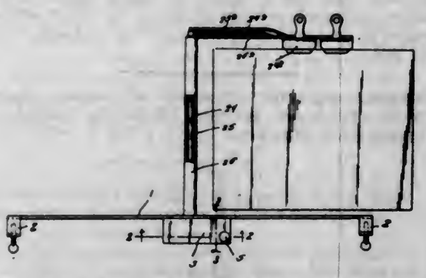
1,625,894. FLEXIBLE GASKET FOR TIRE MOLDS. HOWARD O. HUTCHENS and CHARLES A. KESSLER, Eau Claire, Wis., assignors to Gillette Rubber Co., Eau Claire, Wis., a Corporation of Wisconsin. Filed Dec. 14, 1925. Serial No. 75,158. 2 Claims. (Cl. 18—45.)

1. A sealing ring adapted to seal the space between the toes of the beads of a pneumatic tire during the vulcanizing process, comprising a flexible fabric covered rubber core having a central stiffening cable embedded therein, the ring being of substantially triangular cross-section with the upper corners rounded to avoid the formation of a ridge on the side walls of the tire.

1,625,895. ATTACHMENT FOR TELEPHONES. SARAH KATZ, Detroit, Mich. Filed Feb. 9, 1926. Serial No. 87,055. 1 Claim. (Cl. 45—82.)

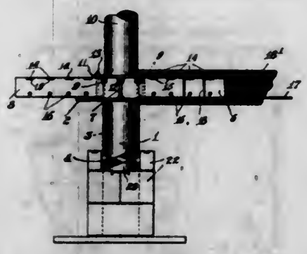
A combined note pad, pencil and pencil sharpener attachment for a telephone standard, said attachment comprising a bracket formed of a pair of clamping bands having their central body portions surrounding the standard and spaced vertically thereof, a spacing rod attached to and extending between said clamping bands, means for clamping said bands to the standard, and means on the upper of said bands whereby its central body portion is adapted to support a pencil rack, said upper band having its end portions bent away in opposite directions from the central body portion and adapted to support a pencil sharpener and memorandum pad respectively.

1,625,896. WATER MOTOR. WILLIAM KEYWOOD, Easton, Wash. Filed Nov. 1, 1926. Serial No. 145,622. 3 Claims. (Cl. 170—84.)



1. The combination in a water motor of a pair of endless chains and transversely arranged blades carried thereby, of fixed tracks and rollers carried by the blades supported on said tracks, a pair of unshipping plates normally in inoperative position, and means for moving said plates to operative position for unshipping the blades of the working flights of the chains.

1,625,897. CABLE CLAMP AND BRIDLE RING. CHARLES H. KLEIN, Jersey City, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 2, 1924. Serial No. 753,515. 2 Claims. (Cl. 248—36.)



1. The combination of a supporting plate or the like having an opening with depressions formed radially thereof, of a bridle ring having arms between which wires may be inserted within the confines of said ring, a base for said ring comprising a counterbored portion and a somewhat flattened portion positioned on said supporting plate, projections on the flattened portion registering with the depressions in the supporting plate, and an attaching device with an enlarged head seated in said counterbored portion to secure the supporting plate and bridle ring in their registered relation to a supporting wall, said enlarged head-operating to exert pressure at a point directly above said projections to maintain them seated in said radial depressions to prevent rotation of the bridle ring.

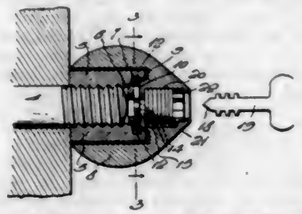
1,625,898. MUSIC-LEAF TURNER. CHARLES L. KNAPP, Shenandoah, Pa. Filed Apr. 6, 1926. Serial No. 100,108. 2 Claims. (Cl. 84—498.)

1. A music leaf turner comprising a casing, a shaft, and inner and outer sleeves surrounding said shaft and all journaled in and extending from the casing, sweeps carried by the shaft and the inner and outer sleeves and equipped with means for the connection with the same of leaves of music, superposed swingable devices disposed in the casing and fixed to the shaft, the inner sleeve and the outer sleeve, respectively, said swingable devices having lower disc-like portions, upper plates and means connecting the disc-like portion and upper plate and also having pendent portions of different lengths on said plates and the said pendent portions being arranged to normally rest in spaced relation and two pendent portions being provided with reversely arranged projections disposed toward the other pendent portion, springs for moving the said swingable devices, a stop for limiting the movement of said devices under the action of their springs, and a manually controlled spring influenced keeper having a beveled toe to engage the pendent portions of the swingable devices.

1,625,899. FIREPROOF BUILDING CONSTRUCTION. JOHN LALLY, Boston, Mass. Filed May 17, 1923. Serial No. 639,592. 7 Claims. (Cl. 72—15.)

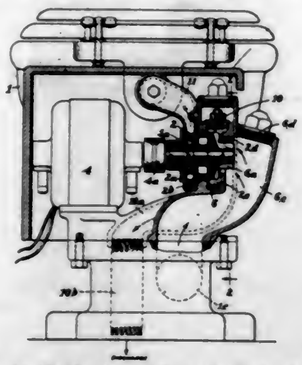
1. Fireproof building construction comprising a column, a crown plate secured to one end thereof, a plurality of radially extending arms on said crown plate, a plurality of reinforcing rings on said arms, a second plate on top of the arms and means for tying the plates and arms together, the arms, rings and plates being adapted to be embedded in concrete.

1,625,900. REENFORCED-CONCRETE-FLOOR CONSTRUCTION. JOHN LALLY, Great Neck, N. Y. Filed Oct. 19, 1925. Serial No. 63,404. 2 Claims. (Cl. 72—66.)



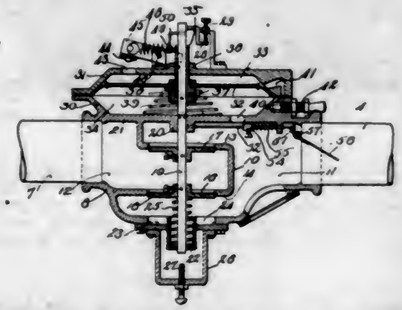
1. A cellular member for concrete floors comprising a pre-cast slab consisting of a bottom and outwardly flaring end and side walls the top edges of which are grooved and a sheet metal dome having a top, sides and ends, the edges of the sides and ends engaging the slab grooves.

1,625,901. NUT GUARD. CHARLES LAY, San Antonio, Tex. Filed Apr. 1, 1926. Serial No. 99,135. 2 Claims. (Cl. 70—122.)



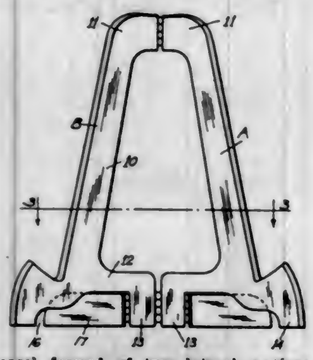
1. In combination with a nut having a recess whose wall is formed with a circumferential groove near one end of the nut; a head having a socket of a depth to

receive said nut, the wall of said socket being shaped for free circumferential movement about the nut, a boss projecting from the head into said recess, a projectable



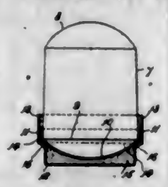
and detractable bolt carried by said boss and adapted for reception in said groove when projected, and lock-controlled means whereby said bolt may be retracted.

1,625,902. MARINE WATER-CLOSET. ULYSSES G. LEE, Chicago, Ill., assignor to U. G. Lee & Co. (Inc.), Chicago, Ill., a Corporation of Illinois. Filed Nov. 20, 1926. Serial No. 149,687. 6 Claims. (Cl. 4—90.)



1. In a marine water closet, a bowl having inlet and outlet passages, supply and eduction pumps in said passages, the eduction passage having a clean out plug adjacent the intake of the eduction pump.

1,625,903. POWER-CONTROL APPARATUS FOR PNEUMATIC-DISPATCH SYSTEMS. JAMES G. MACLAREN, Syracuse, N. Y., assignor to The Lamson Company, Syracuse, N. Y., a Corporation of Massachusetts. Filed May 12, 1926. Serial No. 108,532. 24 Claims. (Cl. 243—9.)

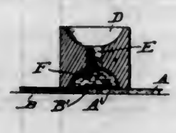


2. Power control apparatus for a pneumatic dispatch system of the minimum flow type having a transmission tube, means for creating a carrier propelling air flow therethrough, and a controlling valve for governing such flow through the tube, a minimum flow being permitted when the valve is in closed position, said apparatus comprising a spring actuated latch for holding the valve in fully open position during the flight of the carrier through the tube.

1,625,904. FOLDING EASEL. PAUL O. MATTSON, Denver, Colo. Filed Apr. 6, 1926. Serial No. 100,138. 3 Claims. (Cl. 40—146.)

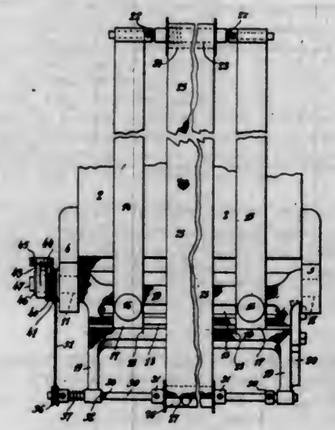
1. An easel formed of two lateral sections hingedly connected on a vertical middle line whereby said sections may be turned either into a confronting relation or into an angular relation, each of said sections being formed at its lower end with an outwardly projecting shoulder upon which a picture may be supported, and wings connected to the two lateral sections at their lower ends and thereby adapted to be turned toward or from the rear face of the corresponding section into or out of angular relation thereto, said wings having their lower edges on a level with the lower edges of each section and thus being adapted to rest on a supporting surface and when in angular relation bracing the easel in an upright position.

1,625,905. LIGHT-REFLECTING DEVICE OR UNIT. RICHARD HOLLINS MURRAY, Manchester, England. Filed Apr. 5, 1926, Serial No. 99,776, and in Great Britain Jan. 22, 1926. 5 Claims. (Cl. 88—1.)



1. A light reflecting device, comprising a cylindrical plano-convex lens the axial length of which is substantially twice the radius of its convex surface, and a concave reflecting surface having a flat outer surface parallel to the plano surface of said lens arranged behind said lens.

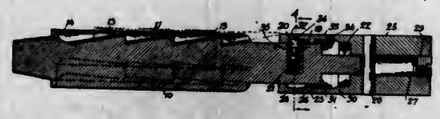
1,625,906. DILATOR. HOWARD W. NAYLOR, Morris, N. Y. Filed Apr. 23, 1926. Serial No. 104,125. 7 Claims. (Cl. 128—341.)



1. A dilator comprising a stem having a covering of fiber strands projecting radially therefrom.

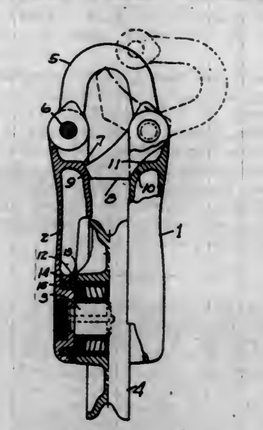
1,625,907. PROCESS OF JOINING MATERIALS. EDWIN O. PETERSON, Elgin, Nebr. Filed Mar. 1, 1926. Serial No. 91,642. 2 Claims. (Cl. 154—42.)

1. The herein described process of uniting the edges of transparent and non-transparent material, consisting in placing the edges to overlap, applying a chemical solvent to said overlapped edges to dissolve the edges of the transparent material, applying pressure within a localized area adjacent the overlapping edges to retain them in intimate relation and to confine the chemical solvent within said localized area, and retaining the edges under pressure until the hardening of the seal is completed.



1,625,908. FACSIMILE-PRINTING ATTACHMENT. STEPHEN HAINES PLUM, 2d, Madison, N. J., assignor to American Type Founders Company, a Corporation of New Jersey. Filed Jan. 8, 1926. Serial No. 79,921. 2 Claims. (Cl. 101—336.)

1. The combination with a platen press having lugs adapted to receive a gripper bar, of an attachment of the character described comprising a base bar mounted to oscillate in said gripper bar lugs, frame members adjustably mounted in said base bar, and projecting upwardly therefrom, an upper roller mounted in the extreme free upper ends of said upright frame members, a lower roller mounted on said base bar, a sheet of fabric wound upon said roller and means carried by said base bar and one of the said gripper bar lugs for operating the said sheet of fabric across the platen of the press.

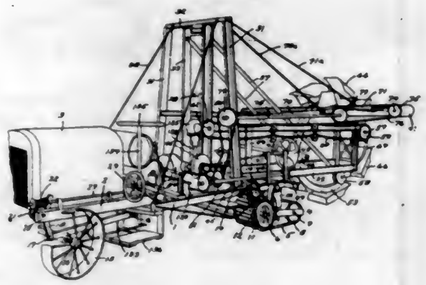


1,625,909. CASING PULLER. JAMES W. PRICE, Tulsa, Okla. Filed Apr. 26, 1926. Serial No. 104,811. 2 Claims. (Cl. 294—96.)

1. In a casing puller, a mandrel having longitudinally movable slips, a sleeve movable to engage the slips for forcing them longitudinally of the mandrel, a detent for holding the sleeve on the mandrel, a shearing element on the mandrel projecting into the sleeve, a shearable element carried by the sleeve for engaging the shearing element and preventing movement of the sleeve with respect to the mandrel under normal operating conditions and

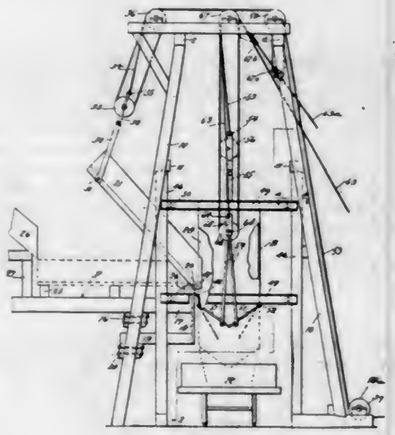
shearable to permit movement of the sleeve longitudinally of the mandrel whereby the slips are abutted and move for releasing them from a casing.

1,625,910. CABLE BLOCK. ROBERT P. RAMSEY, Duluth, Minn., assignor to Clyde Iron Works, Duluth, Minn., a Corporation of Maine. Filed Aug. 29, 1924. Serial No. 734,932. 1 Claim. (Cl. 254—192.)



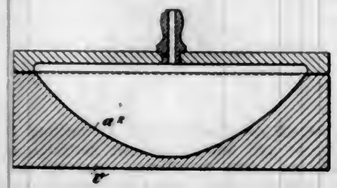
In a cable block, the combination of a frame comprising two side members, the latter being duplicates, a pulley mounted between said side members, a clevis pivotally attached at one end to one of said side members, and an angularly related arm on said clevis adjacent such pivotally attached end adapted to extend entirely across the space between said side members, such space being left clear when said clevis is swung upwardly about its axis, said side members having upwardly and outwardly inclining faces symmetrically disposed with the center line of the block and said arm being formed with faces complementary to those on said side members and adapted to contact therewith in the closed position of said clevis.

1,625,911. GOLF TEE. HAROLD L. RICHARDS, Crystal Falls, Mich. Filed Oct. 5, 1926. Serial No. 139,694. 1 Claim. (Cl. 273—33.)



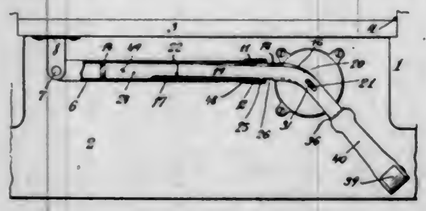
A golf tee comprising an elongated peg provided with a ball seat at one end portion and a disc threaded upon the peg for adjustment lengthwise thereof and operating to limit the extent of insertion of the peg within the ground.

1,625,912. EXCAVATING MACHINE. BENJAMIN M. ROLPH, Dixon, Ill. Filed Aug. 2, 1924. Serial No. 729,840. 8 Claims. (Cl. 37—97.)



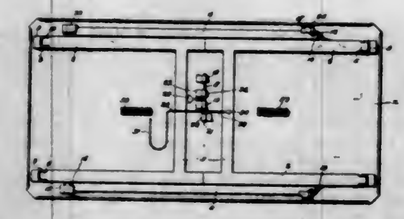
1. A device of the class described, comprising an automotive vehicle, a frame pivotally mounted in said vehicle so as to swing, in a horizontal plane; an excavating wheel rotatably mounted in the free end of said swinging frame, means for imparting the force of the motive element of said vehicle to said frame, to give an oscillating movement thereto; and means for imparting the force of said motive element to said ditching wheel, to cause a rotatory movement thereof, coincidently with the oscillating movement of said frame.

1,625,913. MATERIAL-HANDLING DEVICE. WALTER S. RUSSELL, Los Angeles, Calif. Filed June 16, 1926. Serial No. 116,264. 7 Claims. (Cl. 214—41.)



1. In a device of the character described, a supporting frame, a dump bucket associated with the frame, downwardly opening gates for the discharge mouth of the bucket, said bucket being open at one side and being movable vertically with respect to the frame whereby the elevation of the discharge mouth may be varied, means for so moving the bucket; a loading chute pivotally mounted on the frame and normally supported in horizontal position to receive its load, the chute being adapted to deliver its load to the bucket through said open side when the chute is pivotally moved out of horizontal position, and means for moving the chute pivotally.

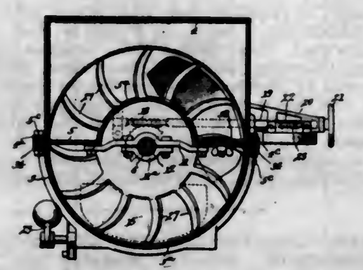
1,625,914. METHOD OF MAKING THIN-METAL SHAPES. GEORG SEIBT, Berlin-Schoneberg, Germany. Original application filed July 23, 1923. Serial No. 653,396. Divided and this application filed Sept. 26, 1924, Serial No. 740,108, and in Germany Jan. 9, 1923. 3 Claims. (Cl. 113—44.)



1. A method of making extremely thin foil-like sound reproducing diaphragms which comprises clamping a thin sheet of aluminum around its edges and producing a drawing pressure on one surface of the metal by means of a plastic medium until the metal is reduced to a thickness less than .05 of a millimeter.

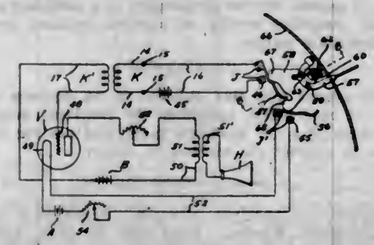
1,625,915. FRICTION CASEMENT-WINDOW ADJUSTER. EDWIN J. SIBLEY, Westbury, N. Y. Filed Dec. 17, 1925. Serial No. 75,935. 8 Claims. (Cl. 292—275.)

1. A casement window adjuster comprising a support, a pair of levers mounted to swing thereon, a tube slidably mounted on said levers, a handle, a rack on one of the levers and a pinion secured to said handle in engagement with the said rack for operating the said one lever into frictional engagement with the said tube.



1,625,916. COMBINED SEAT SUPPORT, TABLE, AND LUGGAGE CARRIER FOR AUTOMOBILES. DICK C. SLATER, Latrobe, Pa. Filed Sept. 24, 1924. Serial No. 739,679. 19 Claims. (Cl. 45—11.)

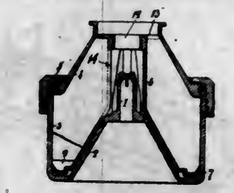
1. An article of the class described comprising a top, legs arranged in pairs and hinged to the top and provided with connecting bars, extension leg members also arranged in pairs and having connecting bars, said extension leg members and their cross bars conforming to the configuration of the hinged leg members and the cross bars thereof and fitting against the same and detachable and reversible whereby the device may be elevated for use as a table, and means for securing the hinged legs and the extension legs in either position of the latter for holding



the legs in rigid relation with the top, the cross bars of the extension leg members fitting against the cross bars of the legs in both positions of the said extension leg members.

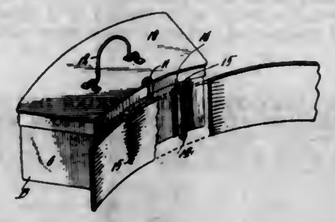
1,625,917. FEEDING AND MIXING MACHINE CONNECTED IN GANGS. SIMON SNYDER, Muncy, Pa., assignor to Sprout, Waldron & Co., Muncy, Pa., a Corporation of Pennsylvania. Filed Apr. 7, 1926. Serial No. 100,427. 14 Claims. (Cl. 83—44.)

1. A machine of the character described comprising a casing having an intermediate partition and a feed hopper at one side of said partition and a delivery chamber at the other side thereof and having a discharge opening in its bottom within said delivery chamber, a vertical shaft having its bearings within said delivery chamber in vertical alinement centrally of said bottom, a feed wheel on said shaft having a centrally disposed hub-like portion with spaced conveyor arms projecting outwardly therefrom into close proximity to cylindrical walls of the casing, and a feed regulating device consisting of an oscillatory plate underlying said feed wheel between it and said bottom, and means for adjusting said plate so as to vary the size of said discharge opening.



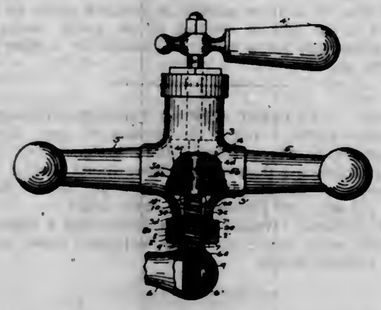
1,625,918. ELECTRIC PHONOGRAPH. ADOLPH A. THOMAS, New York, N. Y. Filed Feb. 10, 1926. Serial No. 87,306. 29 Claims. (Cl. 179—100.1.)

1. An electric phonograph reproducer comprising a casing, a fixed coil mounted in said casing, a needle arm pivoted to said casing, a coil carried by the inner end of said needle arm to vibrate in inductive relation to said fixed coil, said coils being so arranged that their axes are substantially at right angles to the plane of vibration of said needle arm, and operative circuit connections for said coils.



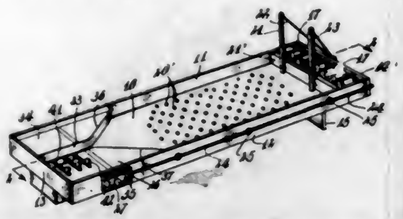
1,625,919. CENTRIFUGAL SEPARATOR. THOMAS CHRISTIAN THOMSEN, Copenhagen, Denmark, assignor to Messrs. Koefoed, Hauberg, Marstrand & Helweg Aktieselskabet Titan, Copenhagen, Denmark. Filed July 9, 1926, Serial No. 121,402, and in Denmark Mar. 8, 1926. 3 Claims. (Cl. 233—33.)

1. A centrifuge for removing suspended substances from liquids, comprising, a bowl having an opening centrally disposed in the top thereof, a plurality of pairs of walls extending outward from the center of the bowl,



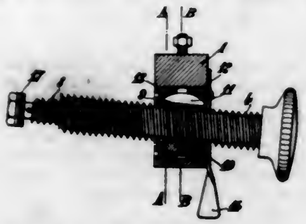
each pair of walls forming a cell, and an opening in the rear wall of each cell communicating with the space between the cells.

1,625,920. BOX. FRED A. THURMAN, Apache, Okla. Filed Aug. 11, 1924. Serial No. 731,412. 2 Claims. (Cl. 224—26.)



1. A box of the class described including a pair of channel irons disposed interiorly thereof, a partition engaged with said channel irons in order that it may be removed, a third channel iron on the partition, a fourth channel iron on the interior of the box, and a substantially T-shaped partition having two of its terminals engaged with the third and fourth channel irons all in the manner and for the purpose specified.

1,625,921. FLOW REGULATOR FOR FAUCETS. ORVIS W. VALLIER, Watertown, N. Y., assignor to J. B. Wise Incorporated, Watertown, N. Y., a Corporation of New York. Filed Dec. 6, 1926. Serial No. 152,929. 4 Claims. (Cl. 277—24.)



2. In combination with a mixing valve and its housing, a spout having a hollow head, means to swingably connect the head of the spout to the housing of the mixing valve, and an open coil spring having one end disposed in the head and seated on the bottom of the head so as to be supported thereby and having its opposite end disposed adjacent to the mixing valve said means engaging the central part of the spring so as to compel the fluid to pass through the interior of the spring to reach the spout.

1,625,922. PRIZE-GAME DEVICE. SAMUEL WEIDENFELD, New York, N. Y. Filed Oct. 21, 1926. Serial No. 143,066. 2 Claims. (Cl. 273—120.)

1. In a prize game device of the class described, a gate member positioned so as to normally retain balls in stalls provided to accommodate the said balls, and a means of raising the said gate member so as to release first smaller balls, and then larger balls therefrom, said means comprising a slide connected to the said gate member, said slide slidably mounted in guide bars, a recess formed in the said slide adapted to be engaged by a plunger and a second plunger, said plungers being urged forward by springs.

1,625,923. OPERATING AND LOCKING DEVICE FOR OSCILLATING PANELS. CHARLES TERRES WEYMANN, Paris, France. Filed Nov. 5, 1926, Serial No. 146,452, and in France Nov. 16, 1925. 10 Claims. (Cl. 74—39.)

1. A device for operating and locking an oscillating panel pivoted on a fixed frame comprising in combination a screw, means for connecting this screw to the pivoting panel so that it can freely turn on itself and transmit to the said panel its displacements in translation, a nut for the said screw, the said nut being pivoted on the fixed frame so as to be capable of rotating about an axis parallel to the axis of rotation of the panel, means for causing the said screw to rotate, means for locking this screw in position.

1,625,924. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Filed May 26, 1926. Serial No. 111,884. 17 Claims. (Cl. 260—156.)

3. A methanol catalyst initially comprising a difficultly reducible metal oxide, an easily reducible metal oxide, and a metallic halide.

1,625,925. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Filed June 21, 1926. Serial No. 117,612. 12 Claims. (Cl. 260—156.)

1. A methanol catalyst comprising a plurality of difficultly reducible second group metal oxides, a plurality of difficultly reducible metal oxides from the third to seventh groups, and a metallic halide.

1,625,926. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Original application filed May 26, 1926, Serial No. 111,884. Divided and this application filed Sept. 25, 1926. Serial No. 137,810. 9 Claims. (Cl. 260—156.)

1. A methanol catalyst initially comprising a plurality of difficultly reducible metal oxides, nickel oxide, and a metallic halide.

1,625,927. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Original application filed May 26, 1926, Serial No. 111,884. Divided and this application filed Oct. 14, 1926. Serial No. 141,665. 9 Claims. (Cl. 260—156.)

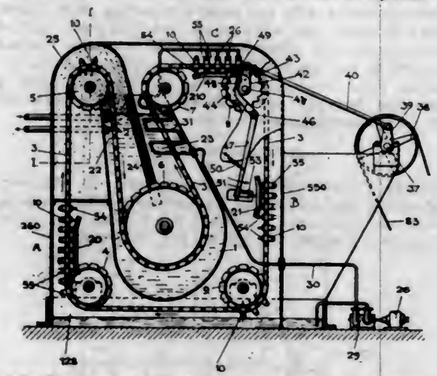
2. A methanol catalyst initially comprising a difficultly reducible metal oxide, cobalt oxide, and a metallic halide.

1,625,928. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Original application filed May 26, 1926, Serial No. 111,884. Divided and this application filed Oct. 14, 1926. Serial No. 141,666. 9 Claims. (Cl. 260—156.)

2. A methanol catalyst initially comprising a difficultly reducible metal oxide, copper oxide, and a metallic halide.

1,625,929. CATALYST FOR SYNTHETIC-METHANOL PRODUCTION. JOHN C. WOODRUFF and GROVER BLOOMFIELD, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a Corporation of Maryland. Original application filed May 26, 1926, Serial No. 111,884. Divided and this application filed Oct. 25, 1926. Serial No. 144,166. 7 Claims. (Cl. 260—156.)

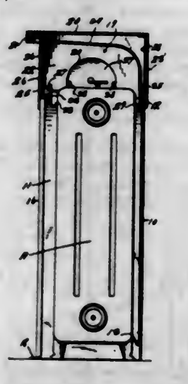
1. A mechanical catalyst initially comprising zinc oxide, chromium oxide, iron oxide and zinc chloride.



4. A process for the preparation of a methanol catalyst which comprises adding an aqueous solution consisting of chromium nitrate

$$(Cr(NO_3)_3 \cdot 9H_2O),$$

ferric nitrate and zinc chloride to an aqueous suspension of zinc oxide, obtaining the resultant mixture in the form of a dry hardened mass, and heating the said mass to convert the nitrates to oxides.



1,625,930. CLEANING DEVICE. PETER ELIS ÅSTRÖM, Gottenborg, Sweden. Filed May 14, 1924, Serial No. 713,319, and in Sweden May 22, 1922. 2 Claims. (Cl. 141—7.)

1. In an apparatus for treating receptacles, a tank adapted to contain a hot liquid bath and having a partition across the top portion, whereby the contents thereof are separated at the top of the tank and communicate only at the bottom of the tank, means for heating the liquid at the inlet side of the tank only arranged adjacent the top of the inlet side of the tank so that the liquid in the tank will be of a higher temperature on the inlet side than in any other part of the tank and of a gradually decreasing temperature from its inlet side to the outlet side, a hood above said inlet portion having a downwardly directed portion providing a passageway for the hot vapors generated in said heated inlet side, said hood being open at its lower end to allow the escape of the cooled vapors as well as the supply to the tank of receptacles to be heated, and means for conveying said receptacles through said passageway from its open end to the inlet side of the tank and thereafter through said hot liquid bath to the outlet side of the tank, whereby the temperature of the receptacles is

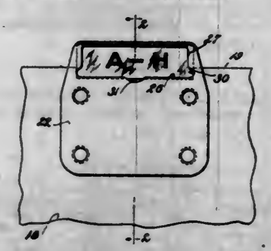
gradually increased from the open end of said vapor passageway to the inlet of the tank and gradually decreasing from the inlet of the tank to the outlet of the same.

1,625,931. RADIATOR CASING OR COVER. BERT BAXTER, Welch, W. Va., assignor to Baxter & Company, Welch, W. Va., a Corporation of West Virginia. Filed July 1, 1926. Serial No. 119,958. 5 Claims. (Cl. 257—136.)

3. A casing for radiators comprising a lower section formed with a back and ends, the ends being inwardly flanged to provide portions extending vertically along the front of the radiator at each end thereof and from top to bottom of the radiator casing, said portions defining a front opening extending from top to bottom of the casing, the lower section having a height approximately that of the radiator, a removable top section fitting over the top of and supported by the lower section and including a back, ends, a front plate and a top, the front plate having apertures, and a deflector disposed within and carried by the top section and extending upward and forward from the lower margin of the back plate of the top section to the upper margin of the front thereof.

1,625,932. NONGLARE ATTACHMENT FOR REFLECTORS. ROY L. BERG, New Ulm, Minn. Filed May 29, 1924. Serial No. 716,617. 1 Claim. (Cl. 240—45.)

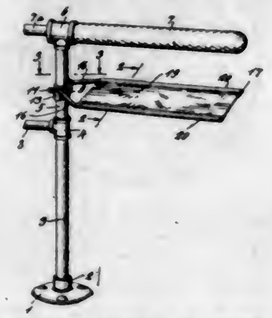
The combination with a headlight comprising a reflector and a light bulb having an axis normally disposed substantially horizontally, of a plate disposed diagonally above said bulb and in the reflector with its central transverse axis extending at an angle substantially of 45 degrees to the vertical, a rod journaled in the reflector to which said plate is secured, said rod having one end bent at an angle, a tension spring secured to



said end adapted normally to hold said plate in inoperative position against the reflector, and said rod having its other end bent to form an operating arm, and means adapted to be pulled upon by the operator for swinging said arm and rod and said plate.

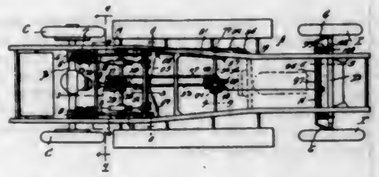
1,625,933. FRICTION BODY FOR MULTIPLE-DISK CLUTCHES AND THE LIKE. JULIUS BING, Eisenach, Germany, assignor to Magnet-Werk G. m. b. H. Eisenach Spezialfabrik für Elektromagnet-Apparate, Eisenach, Germany. Filed Mar. 19, 1926, Serial No. 96,058, and in Germany Apr. 20, 1925. 10 Claims. (Cl. 192—107.)

1. In a friction body for friction clutches and the like, a supporting ring comprising two sectors, an adjacent friction ring comprising two sectors, the sectors of the friction ring being secured to the sectors of the supporting ring in such a way that all dividing joints between the sectors of the friction ring are in staggered relationship to the joints between the sectors of the adjacent supporting ring.



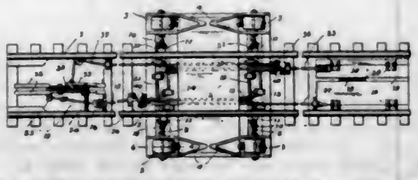
1,625,934. INDEX CARD. CHARLES H. COBB, Newton, Mass., assignor, by mesne assignments, to Service Bureau, Inc., Cambridge, Mass., a Corporation of Massachusetts. Filed Sept. 11, 1926. Serial No. 134,778. 5 Claims. (Cl. 129—16.8.)

1. An index card having a cut-away portion adjacent its upper edge, the lower edge of the cut-away portion being spaced below the top edge of the card, and a tab consisting of a folded piece of sheet material attached to the card over the cut-away portion, said tab having a window opening extending downwardly to ap-



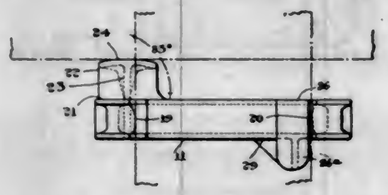
proximately the lower edge of the cut-away portion, the lower margin of the window overhanging said portion to provide a flange behind which a label may be slipped when inserted into the window.

1,625,935. DRY-STEAM SLEEVE-FINISHING BOARD. IRWIN W. COX, Denver, Colo. Filed Oct. 15, 1926. Serial No. 141,737. 2 Claims. (Cl. 211—27.)



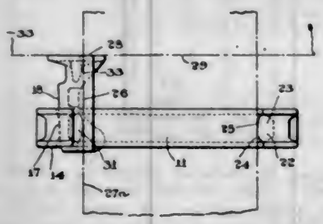
1. A supporting shelf adapted to be secured to a vertical support, comprising, a collar having a central opening adapted to receive said support and two openings for the reception of supporting bars, one of said last named openings being located on each side of the central opening, a bar having one end secured in each of said openings means for adjustably securing the collar to the support and a fabric stretched between said arms.

1,625,936. COMBINATION BRAKE AND JACK MECHANISM FOR AUTOMOBILES. ELMER FERRY and CORA FERRY, Buffalo, N. Y. Filed Apr. 13, 1926. Serial No. 101,698. 19 Claims. (Cl. 188—5.)



1. A combined braking and jacking mechanism including, in combination, an outer tubular member, and an inner tubular member, means for extending the inner member from the outer member, a shank slidable in the inner tubular member, means for extending the shank from the inner tubular member, means for rockably mounting the outer tubular member on a vehicle, and a yieldable brace for normally maintaining the mechanism in a predetermined position.

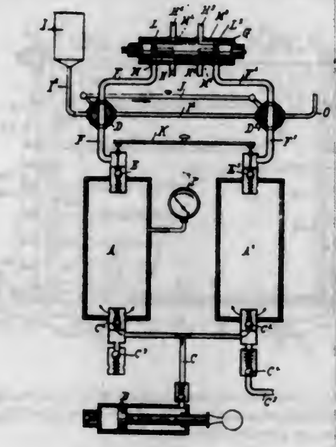
1,625,937. RAILROAD GATE. PACIFICO FRULLA, Memphis, Tenn. Filed Aug. 3, 1926. Serial No. 126,887. 4 Claims. (Cl. 246—293.)



1. In an apparatus for the purpose set forth, the combination of gates mounted for rocking movement in a vertical plane, a main operating lever mounted at a distance from the said gates, yieldable means for holding the said lever in position to receive impact from a locomotive, operative connections between the lever and the several gates whereby to lower the gates, yieldable means connected with the gates for holding them raised, means to engage the main levers and hold them against reverse movement after actuation, a releasing element disposed at the opposite side of the gates from the actuating lever to be rocked by a locomotive, and a connection between the said releasing lever and the said restraining means.

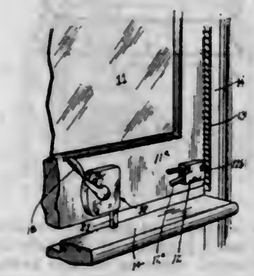
1,625,938. RAIL ANCHOR. HARRISON H. GIFFORD, Montreal, Quebec, Canada, assignor to Holden Company Limited, Montreal, Canada. Filed Aug. 16, 1926. Serial No. 129,592. 4 Claims. (Cl. 238—330.)

1. A rail anchor comprising a single casting extending in the transverse direction of the rail, and contacting with the base thereof, said casting having upwardly projecting portions, one of which is grooved so that its uppermost edge overlies the rail base, metallic inserts fitting snugly into recesses formed in the projections and surrounded by metal comprising same, so that there is no relative movement between them, said inserts having teeth which contact with each side of the rail flange and bite into same to hold the anchor in position.



1,625,939. RAIL ANCHOR. HARRISON H. GIFFORD, Montreal, Quebec, Canada, assignor to Holden Company Limited, Montreal, Quebec, Canada. Filed Aug. 16, 1926. Serial No. 129,593. 3 Claims. (Cl. 238—324.)

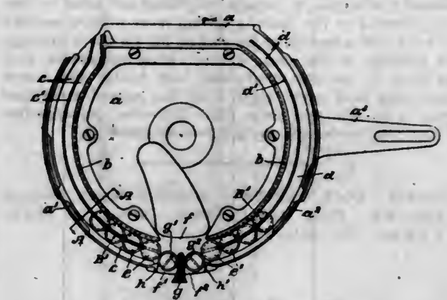
1. A rail anchor comprising, a main body portion adapted to extend transversely of a rail and having an upwardly turned portion at each end, one grooved to form a guide, and a wedge shaped member fitting into said guide and grooved on one side to fit over the edge of the rail flange, and metal inserts fitting in recesses in the main body portion and the wedge shaped portion on their sides adjacent the rail flanges, said inserts having toothed projections adapted to cut into the edges of the rail flanges.



1,625,940. METHOD AND MEANS FOR STARTING INTERNAL-COMBUSTION ENGINES. NICOLAS HERZMARK, Paris, France. Filed Nov. 21, 1924, Serial No. 751,416, and in France Nov. 23, 1923. 5 Claims. (Cl. 123—179.)

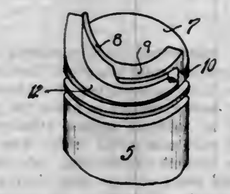
1. A starting device for use in starting a multiple cylinder internal combustion engine comprising, a plurality of chambers for receiving compressed injecting material, a distributor, separate connections from the chambers to the distributor, means connecting one of the

chambers through the distributor to a cylinder at compression stroke position, and means connecting another chamber through the distributor to a cylinder at expansion stroke position.



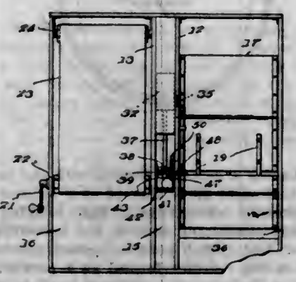
1,625,941. WINDOW-SASH STARTER. MAURICE J. HOFFENBERG, New York, N. Y. Filed June 2, 1925. Serial No. 34,279. 5 Claims. (Cl. 268—132.)

1. A window sash starting and lifting device comprising a casing, a plunger bolt and a gear for actuating said bolt in said casing, said casing, bolt and gear carried by the sash, the sash and the entire device being adapted to move with respect to the window sill.



1,625,942. BOBBIN BATTERY FOR AUTOMATIC WEFT-REPLENISHING LOOMS. DENIS MACHELL HOLLINS, Blackburn, England, assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Feb. 7, 1925, Serial No. 7,724, and in Great Britain Dec. 6, 1924. 6 Claims. (Cl. 139—245.)

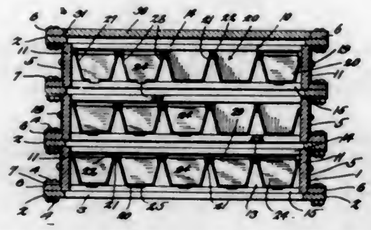
1. A battery for automatic filling replenishing looms comprising a plate having parallel flanges presenting a compartment to receive the butts of a plurality of superimposed bobbins and having an end wall presenting a central longitudinally extending rib to engage diametrical



recesses upon the butts of the bobbins and to prevent rotation of the bobbins during their passage through the compartment.

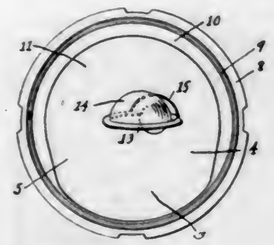
1,625,943. PISTON. THOMAS A. HUTSELL, Spokane, Wash., assignor to Hutsell Motor Company, Spokane, Wash. Filed Dec. 21, 1925. Serial No. 76,647. 3 Claims. (Cl. 123—59.)

3. A piston having a closed head and fashioned with an inset baffle plate of arcuate form, an annular flange on part of said plate forming an exterior lateral groove and an abutment shoulder closing one end of said groove, said shoulder and flange extending to the periphery of the said piston, and a spiral face of said head exterior of the uncovered portion of the plate for guiding swirling currents of gas.



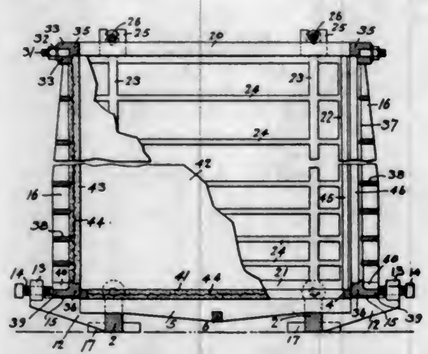
1,625,944. DISPENSING AND ADVERTISING DEVICE. HULBERT A. JONES, Ada, Okla. Filed Oct. 5, 1923. Serial No. 666,775. 1 Claim. (Cl. 194—22.)

In a dispensing and advertising device, a vertically disposed coin chute provided with a slot, a slotted coin holder mounted for sliding movement in the chute, a



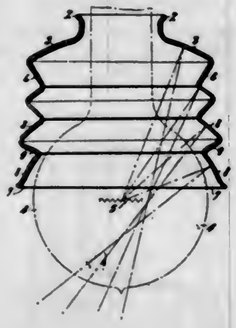
weighted lever pivotally mounted intermediate its ends and having one end pivotally secured to the coin holder, a rotatably mounted shaft arranged at right angles with respect to the lever, a cam shaft fixed to said shaft and normally arranged to engage the weighted lever to prevent rotation of the shaft, a second lever pivoted midway its ends and adapted to be rocked on its pivot through the medium of the cam, a cover plate associated with the slots of the coin chute and coin holder and means connecting said cover plate with the second mentioned lever to operate said cover plate following the operation of the coin holder for the purpose specified.

1,625,945. TOOL CABINET. HARRY S. KUHN, Waynesboro, Pa. Filed May 22, 1925. Serial No. 32,159. 1 Claim. (Cl. 211—7.)



A cabinet for supporting trays including a body portion, said body portion embodying side members, each of the side members being constructed of a plurality of horizontally disposed bars arranged in pairs, the pairs of bars being supported in vertical spaced relation with each other, one bar of each pair being wider than its adjacent bar to provide a support, upstanding side members positioned between the pairs of bars, and resting on the supports, angle members secured to the spaced bars and upstanding side members to secure them in position.

1,625,946. HEAD LAMP. JOHN H. LAIRD, Louisville, Ky. Filed Mar. 13, 1924. Serial No. 699,053. 1 Claim. (Cl. 240—41.)



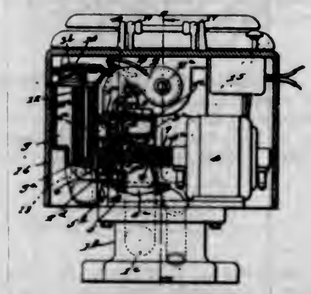
A lamp having a deflector formed with the part thereof above the horizontal plane thereof as a catenary of revolution adapted to reflect rays of light striking the same from a focus converging toward the horizontal axis of the reflector, and with a portion located centrally of the lower half of the reflector formed as a parabola of revolution having its focus at a distance equal to the parameter of the catenary, and with the intermediate portions from the horizontal plane to the beginning of the parabola curved off to smoothly join the two curves of revolution already noted.

1,625,947. MOLD FOR CASTING CLAY BLOCKS AND THE LIKE AND METHOD OF MOLDING. JAMES M. LAMBIE and DONALD W. ROSS, Washington, Pa. Filed Jan. 10, 1925. Serial No. 1,593. 31 Claims. (Cl. 25—129.)

1. A mold side comprising an open-work relatively rigid frame, provided intermediate its edges with a molding surface of porous plaster-like material.

1,625,948. LAMP REFLECTOR. NIELS LANG, Vancouver, British Columbia, Canada, assignor to Lang's Daylight Limited, Vancouver, Canada. Filed May 14, 1923, Serial No. 638,874. Renewed Oct. 21, 1926. 3 Claims. (Cl. 240—103.)

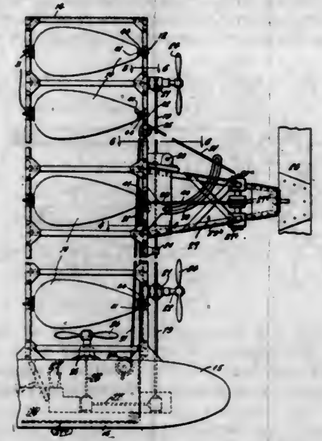
1. A tubular shaped light reflector, comprising a body having a neck and a plurality of co-axially arranged annular frusto-spherical reflecting surfaces having their centers of curvature arranged at different points along the direction of the longitudinal axis of the reflector, said reflecting surfaces being connected by annular co-axially arranged reversely disposed reflecting surfaces.



1,625,949. STRAIGHTEDGE INSTRUMENT. GILBERT LEE, Rockford, Ill. Filed Nov. 5, 1923. Serial No. 672,721. 1 Claim. (Cl. 33—82.)

A straight edge instrument of the character described, comprising a main body member of bifurcated form to provide a head end and spaced parallel arms projecting therefrom arranged to straddle a board or the like, the edges of the arms providing straight edges for scribing purposes, a swingable arm pivotally mounted between the rigid arms at the head end and also providing straight edges for scribing purposes, the head end of the body member having a right angle portion on one side thereof to serve as a stop to limit the pivotal movement of the pivoted arm at a position of the arm 90° with respect to the body member and having a bevel portion on the other side of the head end at an angle of approximately 45° with respect to the right angle portion whereby to serve as a stop for the pivoted arm to limit the movement there-

of when the same is swung to a position making an angle of approximately 135° with respect to the body member, and means for securing the pivoted arm in any intermediate or limit position of angular adjustment with respect to the body member.



1,625,950. MARINE WATER-CLOSET. ULYSSES G. LEE, Chicago, Ill., assignor to U. G. Lee & Co. Inc., Chicago, Ill., a Corporation of Illinois. Filed Jan. 8, 1926. Serial No. 80,030. 12 Claims. (Cl. 4—77.)

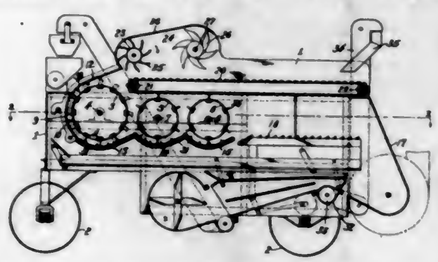
1. In a marine water closet, a bowl having inlet and outlet passages, supply and eduction pumps in said passages, the eduction pump having a greater capacity than the supply pump, means for operating said pumps simultaneously, and means for keeping the supply pump submerged in water while the eduction pump is allowed to drain back into the bowl.

1,625,951. DIRIGIBLE AIRSHIP. WARREN LEMON, St. Louis, Mo. Filed Oct. 6, 1925. Serial No. 60,749. 5 Claims. (Cl. 244—6.)

1. In a dirigible airship, the combination of a rigid framework, a plurality of gas bags supported by said framework in superimposed relation, a car carried by the lower end of said framework, horizontally disposed propellers mounted in said framework for propelling said airship, a horizontally disposed frame pivotally supported on said framework and extending rearwardly therefrom, and a rudder operatively mounted on said frame for steering said airship, said frame having operative connection

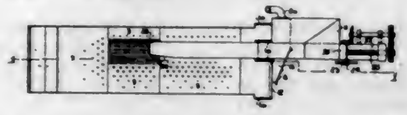
with said framework for permitting the displacement of said frame and rudder in a vertical plane in close proximity to said framework.

1,625,952. PHOTOMICROGRAPHIC CAMERA. FRANCIS F. LUCAS, East Orange, N. J. Original application filed Nov. 22, 1921, Serial No. 517,017. Divided and this application filed Dec. 29, 1923. Serial No. 683,290. 2 Claims. (Cl. 88—24.)



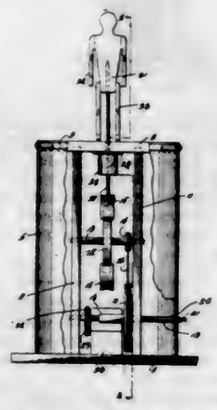
1. The combination with an image-forming device having an adjustable tube, of means for deriving the image formed in said image-forming device, and means for clamping said image deriving means to the adjustable tube of said image-forming device, said clamping means providing for a clearance for different sizes of visual lenses and a set screw for securing said clamping means to said adjustable tube.

1,625,953. THRASHING MACHINE. HERMAN A. LUNDQUIST, Toledo, Ohio, assignor of one-half to The Banting Manufacturing Company, Toledo, Ohio, a Corporation of Ohio. Filed July 23, 1925. Serial No. 45,450. 2 Claims. (Cl. 130—27.)



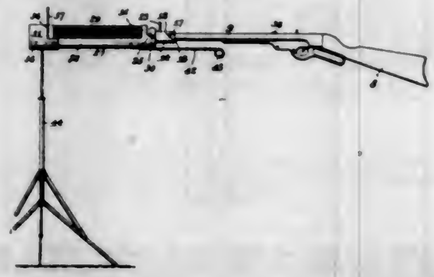
1. In a thrashing machine, the combination of a thrashing drum, a conveyor disposed substantially tangential to the upper part of said drum, a band cutter above said conveyor, a retarder in advance of said band cutter ad-

jacent the forward end portion of said conveyor, a concave at the outer side of said thrashing drum, a breast plate extending from the receiving end of said concave and inclined toward said conveyor, thereby providing a thrashing throat, teeth projecting from said breast plate



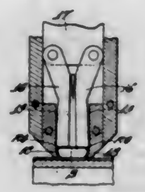
for combing and retarding the movement of material, a grate at the underside of said thrashing drum, and teeth projecting from said grate for effecting a separating and retarding of the movement of the material passing thereover.

1,625,954. FURNACE. ANNE JACOBUS MATHYS AUGUST RIDDER VAN DER DOES DE BIJE, The Hague, Netherlands. Filed Aug. 15, 1923. Serial No. 657,591. 3 Claims. (Cl. 110—32.)



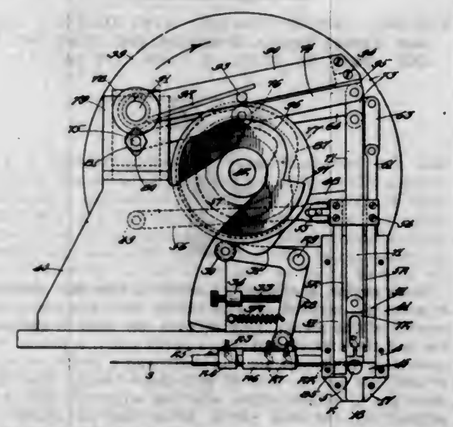
2. In a furnace, a fire bottom including a bar grate portion and a plate grate portion, both grate portions in their entirety being arranged in the same plane, a feed ram slidable over the bar grate portion of the fire bottom and a nozzle arranged above the fire on the fire bottom for supplying supplementary air above the fire bed.

1,625,955. DANCING FIGURE TOY. SAMUEL M. MOORE, Sumner, Ill., assignor of one-sixth to William J. Moore, Sumner, Ill., and one-sixth to Rosie A. Welton, one-sixth to Mary Blanchie Moore, one-sixth to Bonnie R. Sagers, and one-sixth to Bert Sagers, Lawrenceville, Ill. Filed Dec. 24, 1925. Serial No. 77,598. 3 Claims. (Cl. 46—40.)



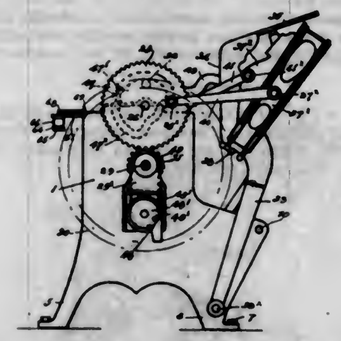
1. A device of the character described comprising a casing, a cam member comprising a circular disk and eccentric projections mounted on the disk secured upon a rotatable transverse shaft, means for rotatably operating the shaft and cam member, a rod movably mounted in the upper portion of the casing arranged to contact with the cam member and reciprocated thereby, and a figure having flexible limb members pivotally secured thereto mounted on the upper end of the rod.

1,625,956. SAFETY TARGET ATTACHMENT FOR AIR RIFLES. JOHN B. MULHOLLAND and ALFRED F. BORSCHEL, Buffalo, N. Y. Filed Mar. 29, 1922. Serial No. 547,663. 9 Claims. (Cl. 124—15.)



1. The combination with a rifle, of a sleeve detachably secured to the outer end of the barrel of said rifle, an annulus surrounding said sleeve and pivotally secured thereto, an elongated frame pivotally secured to said annulus and having its pivots at right angles to the pivots of said annulus, and means for supporting a target at the outer end of said frame.

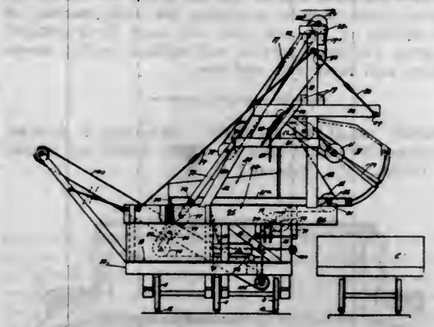
1,625,957. METHOD OF APPLYING FASTENERS. JAMES H. REED, Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 2, 1923. Serial No. 616,621. 17 Claims. (Cl. 1—2.)



1. The method of driving and anchoring staples which consists in applying driving force to the head of a staple and, while forcing the legs of the staple into the work, deflecting them relatively to the portions of the head that are respectively adjacent thereto to anchor them in the work by engaging them on that side of the work from which the staple is driven.

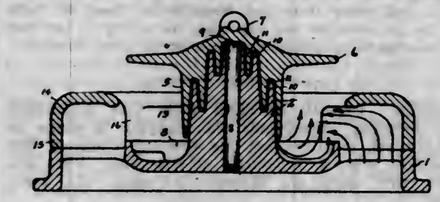
1,625,958. STAPLING MACHINE. JAMES H. REED, Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 2, 1923. Serial No. 648,935. 40 Claims. (Cl. 1—20.)

1. A machine for driving fasteners having a driver and a clinching member located at the same side of the work.



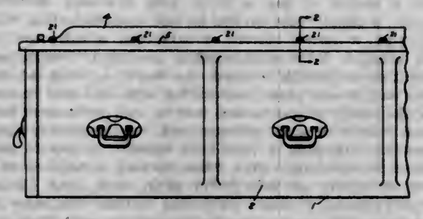
1,625,959. PRINTING MACHINE. WILLIAM GEORGE REYNOLDS, Grandview, Manitoba, Canada. Filed Oct. 2, 1925, Serial No. 60,064, and in Canada Oct. 18, 1924. 12 Claims. (Cl. 101—287.)

1. In a printing machine in combination, a platen mounted to permit placement of a stack of paper sheets therebenearth, means for creating and maintaining a suction of air towards the face of the platen to draw the uppermost sheet of the stack towards the platen and subsequently hold the same thereon, means for rotating the platen to printing position and for returning the same, means for shifting the stack of paper to clear the rotating platen and for returning the stack to its initial position and means for withdrawing a sheet of paper from the platen subsequent to the return of the same.



1,625,960. MATERIAL-HANDLING DEVICE. WALTER S. RUSSELL, Los Angeles, Calif. Filed Jan. 4, 1926. Serial No. 79,062. 10 Claims. (Cl. 214—41.)

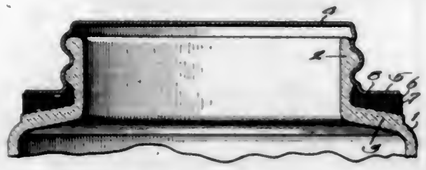
1. In a device of the character described, a dump bucket having a downwardly opening discharge mouth, a pair of closure gates hingedly connected to the bucket adjacent the mouth, and releasable means adapted to hold said gates closed; said means including a pair of links pivotally connected to one another at their upper ends and pivotally connected at their lower ends, one to each of said gates, a travelling sheave at the pivotal connection between links, a sheave, stationarily mounted, except for rotation, on the bucket, a cable trained over



said sheaves, and means for operating said cable to vary the distance between said sheaves and hold them at adjusted position thereby to vary the angular disposition of the links and hold them in adjusted relative angular position, respectively.

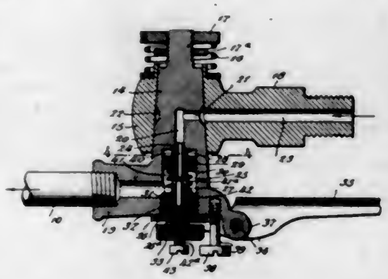
1,625,961. OIL BURNER. CARROLL J. SHERMAN and CHARLES H. SHERMAN, Houston, Tex. Filed Mar. 21, 1925. Serial No. 17,374. 3 Claims. (Cl. 158—80.)

1. A burner including a base, a distributer thereon, said base having an air inlet opening adjacent the distributer, a generator cap fitted over the distributer and forming a fuel film channel between them, said burner having a fuel inlet duct terminating in said channel, an annular air regulator on the base forming a mixing chamber between it and the cap into which said channel discharges fuel, said regulator having an air inlet opening adapted to be brought into, and out of registration with the base opening to regulate the flow of air into said chamber.



1,625,962. FASTENING DEVICE. RALPH E. SMITH, ROY J. ARNOLD, and JOHN C. GAY, Galion, Ohio, assignors to The Galion Metallic Vault Company, Galion, Ohio, a Corporation of Ohio. Filed July 31, 1925. Serial No. 47,196. 13 Claims. (Cl. 27—35.)

1. In combination, a case, a cover, means to support a fastening member carried on said cover, a fastening member slidably mounted thereon, and means carried by said



cover for moving said member into and out of engagement with said case to fasten the cover thereon, said means for receiving said fastening member on the case consisting of the wall of the case turned over to form a receiving and engaging portion of the case, said fastening member being adapted to engage the under portion of that portion of the case, and the cover being adapted to engage the upper portion, and resilient sealing means between said cover and said case.

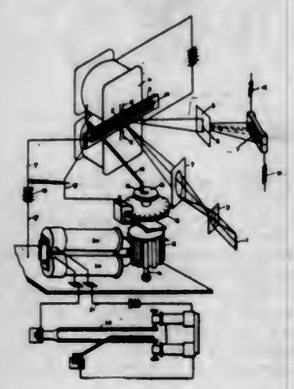
1,625,963. SEALING GASKET. THEODORE J. SNYDER, Chicago, Ill. Filed May 14, 1925. Serial No. 30,260. 1 Claim. (Cl. 215—40.)

A jar having an exteriorly threaded neck and a surrounding shoulder at the base of the neck; in combination with a cap threaded upon said neck and having a base portion overlying said shoulder; and a packing ring of resilient material clamped by the cap between the base portion of the cap and the shoulder of the jar, said packing ring having an annular cavity in each of its lower and upper faces and respectively closed air tight by the jar shoulder and cap base, the cavity in one face of the ring being within the circle of the other cavity.

1,625,964. FLASH IGNITER FOR GAS BURNERS. OTTO SPAHR, Philadelphia, Pa., assignor, by mesne assignments, to Milwaukee Gas Specialty Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Jan. 23, 1924. Serial No. 687,887. 2 Claims. (Cl. 158—115.)

1. A gas lighter comprising a valve casing connected with a source of gas, a valve plug rotatably mounted therein, a supply tube carried by and communicating with said plug, a burner carried by said tube, a valve seat in said plug, a valve stem slidably mounted therein and projecting outwardly beyond the same, a valve at the inner end of said stem co-operating with said seat to control the supply of gas to said burner, said valve stem having a restricted axial passage and communicating apertures for supplying a restricted amount of gas to said burner to maintain a pilot flame thereat, a head on said stem exteriorly of said valve plug, said head having parallel spaced recesses extending across the same in diametric directions, a handle pivoted on said plug and having a forked end projecting beneath said head into the recesses thereof for actuating said valve and for pivotally adjusting said valve plug and its associated elements relatively to said casing, and a stop adjustably mounted upon said valve plug and adapted to be engaged by said head to arrest the opening of said valve at a predetermined point.

1,625,965. CONNECTING-ROD ATTACHMENT. HERBERT AUGUST STRUPP, Evansville, Ind. Filed Nov. 3, 1925. Serial No. 66,528. 1 Claim. (Cl. 74—71.)



In an engine, a cylinder; a piston reciprocable therein, a wrist pin secured in said piston with the center of gravity of the piston lying between the head of the piston and the axis of said pin, a crank shaft, a piston rod connecting said wrist pin and shaft, and a weight secured to said rod on the side of said shaft remote from the wrist pin to counterbalance said rod, wrist pin, and that portion only of said piston which has its center of gravity coincident with the axis of said wrist pin.

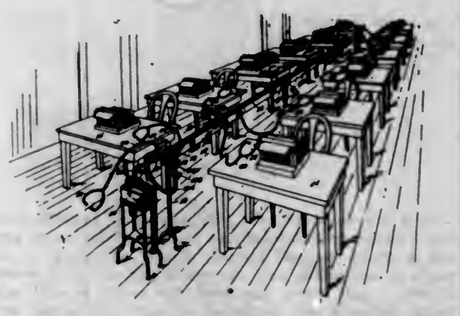
1,625,966. METHOD OF MANUFACTURING DETONATING COMPOSITIONS FOR EXPLOSIVE AND PERCUSSION CAPS. EDMUND VON HERZ, Berlin-Charlottenburg, Germany. Filed Oct. 21, 1925, Serial No. 64,054, and in Germany Oct. 23, 1924. 6 Claims. (Cl. 52—2.)

1. A process for the manufacture of priming compositions for detonators and percussion caps, comprising the employment of the metallic salts of the iso-nitro-amines.

1,625,967. PHOTOTELEGRAPHIC APPARATUS. DÉNES VON MIHÁLY, Budapest, Hungary. Filed Dec. 29, 1923, Serial No. 683,429, and in Hungary Jan. 2, 1923. 5 Claims. (Cl. 178—6.)

1. In an apparatus for dividing or assembling pictures into or from their composite elements more particularly adapted for phototelegraphy, the combination of an oscillograph, a frame mounted in said oscillograph to pivot about an axis, a loop mounted in said frame to pivot about an axis arranged at an angle to said first axis, a mirror mounted on said loop, means to oscillate said loop, means to oscillate said frame simultaneously about said axis arranged at an angle to said other axis.

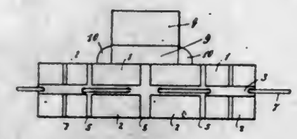
1,625,968. DISPENSING CONTAINER FOR LUBRICATING GREASE, ETC. LOUIS WARE, Miami, Ariz. Filed May 25, 1925. Serial No. 32,634. 3 Claims. (Cl. 229—53.)



3. A dispensing container comprising two flat side walls of flexible material which are substantially parallel throughout and which are directly connected to each other at two lateral edges and at one end so that their inner faces lie in contact with one another substantially throughout, said side walls being free from connection to one another at the other end so as to provide an opening, and said lateral edges tapering, throughout at least a portion of the length, inwardly toward said opening.

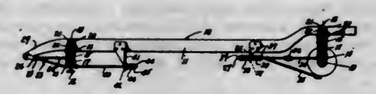
1,625,969. LUBRICANT. HARRY H. WILLOCK, SAMUEL J. CAPLAN, and JOSEPH E. BARB, Pittsburgh, Pa., assignors to Waverly Oil Works Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 30, 1921, Serial No. 497,032. Renewed Sept. 3, 1926. 6 Claims. (Cl. 87—9.)

1. A lubricant comprising a hydrocarbon oil, aluminum oleate, oleic acid, and a lime soap.



1,625,970. SOUND DISTRIBUTING AND TRANSMITTING MEANS AND METHOD. CHARLES K. WOODBRIDGE, Flushing, N. Y., assignor to Dictaphone Corporation, Bridgeport, Conn., a Corporation of New York. Filed Feb. 21, 1924. Serial No. 694,250. 22 Claims. (Cl. 181—18.)

1. An apparatus of the character described including sound-reproducing means, sound-conveying means, a coupling device between the sound-reproducing means and the sound-conveying means and a plurality of listening tubes connected to said sound-conveying means at points at different distances from the sound-reproducing means, and means for causing the sounds emitted at such different points to be substantially the same.

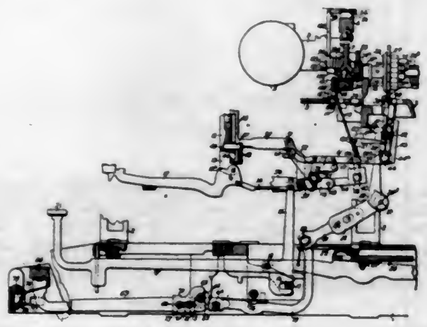


1,625,971. LIFE BELT. JOHN BALDWIN ADAMS, Wellington, New Zealand, assignor to Bertram Egley, Wellington, New Zealand. Filed Oct. 24, 1925, Serial No. 64,673, and in New Zealand July 1, 1925. 2 Claims. (Cl. 9—17.)

1. A life belt adapted to be placed around the upper portion of a person's body, consisting of an upper series and a lower series of buoyant elements separated by vertical webs, a horizontally disposed web arranged between said series of elements joining said vertical webs and provided throughout its extent with spaced eyelets, and a strap extending through said eyelets and having its end extending beyond the ends of the web to permit

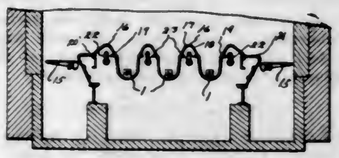
said ends to be fastened together after the belt has been donned by the user, a buoyant element above said upper series of elements connected to the upper edge of the belt, and a horizontally disposed web connecting said buoyant element to the upper edge of the belt, substantially as described.

1,625,972. CHASSIS. FRANK W. AYRES, Colby, Kans. Filed May 13, 1922. Serial No. 560,558. 1 Claim. (Cl. 267—20.)



In a chassis, a frame embodying side members, an axle disposed beneath the frame, vertically aligned pairs of spring seats carried by said axle and the side members, a spring disposed intermediate the spring seats of each pair and secured to each thereof, shafts pivotally engaged with the axle at each spring seat thereof and extending through the spring seats of the side members, a spring abutting the upper surfaces of the spring seats of the side members, and means carried by said shaft for adjusting the tension of the last mentioned springs, the pivotal connection of said shafts with said axle comprising a ball and socket, the spring seats of the axle each forming a portion of one of the sockets.

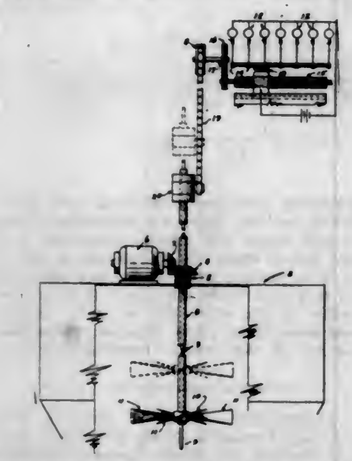
1,625,973. CIRCUIT CLOSER. WILLIAM BANIKA, Stamford, Ontario, Canada. Filed Sept. 18, 1925. Serial No. 57,182. 2 Claims. (Cl. 200—59.)



1. A switch including a casing having a block of insulation therein; a rotatably mounted spindle, the insulation being slotted concentric with the spindle; three arcuate contacts mounted in the insulation adjacent the slotted portion, two of the contacts being positioned at opposite sides of the slotted portion and the third contact being common to the other two; a U-shaped arm carried by the spindle; and rotatable connectors carried by the legs of said arms and adapted to be received in the slotted portion, each of the connectors being adapted to engage the said third contact and one of the other two contacts; and a spring connected with the spindle and the casing to normally hold the connectors out of engagement with all the contacts.

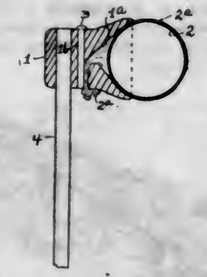
1,625,974. TYPEWRITING MACHINE. EDWIN E. BARNEY, New Rochelle, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed Dec. 12, 1925. Serial No. 75,062. 15 Claims. (Cl. 197—112.)

1. In a typewriting machine, the combination of a space bar frame comprising side arms and a connecting space bar; a pivot rod; and plates detachably secured to said side arms for retaining said frame on said pivot rod.



1,625,975. UNDERFEED STOKER. ROYCE L. BEERS, Detroit, Mich., assignor to Detroit Stoker Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 15, 1923, Serial No. 668,747. Renewed Jan. 3, 1927. 19 Claims. (Cl. 110—44.)

1. In a furnace, an ash receiver at one side thereof, a retort adjacent to one side of said ash receiver, and an air tuyère extending longitudinally of the retort supported along a longitudinal edge by a longitudinal wall of the retort, said tuyère being movable transversely of the retort along the said point of support for shifting consumed fuel laterally onto said ash receiver.

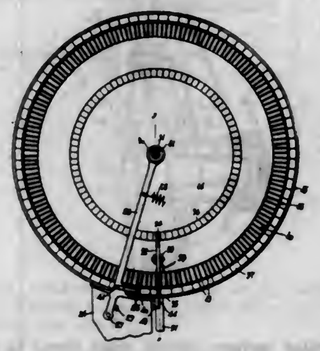


1,625,976. CONTENTS-LEVEL INDICATOR FOR CONTAINERS. GEORGE M. BECHTEL, Montclair, N. J. Filed Feb. 4, 1926. Serial No. 86,018. 1 Claim. (Cl. 33—125.)

In an indicator for the contents of a container, a rotatably mounted wheel with its axis disposed vertically, means for rotating said wheel, an upright tubular shaft slidable through the center of said wheel and having a driving connection therewith, a guide member passing through said shaft and serving to guide the vertical movements of the shaft, a level-seeking device carried by said shaft within the container and comprising blades pitched to cause ascent through the container contents as the shaft is rotated, said device and shaft adapted to move downwardly by gravity, the pitch of said blades causing it and the shaft to move upwardly when the

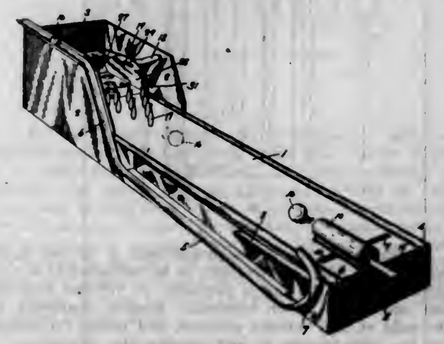
shaft is rotated, indicating means, and a connection between said shaft and means whereby the vertical movement of the shaft will operate the indicator.

1,625,977. MUSCLE BEATER. HUTCHINSON L. BEVIER, Duluth, Minn. Filed Jan. 22, 1925. Serial No. 4,011. 1 Claim. (Cl. 128—54.)



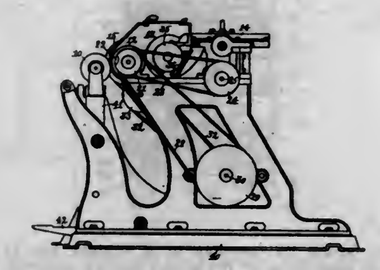
In a muscle beater, the combination of a mallet having a recess formed in one of its ends, said mallet having a clamp passage formed therein extending at an angle to said recess and communicating with said recess, a sack, a ball within said sack, the mouth of said sack being gathered and extending through said recess into said clamp passage, means extending into said clamp passage for clamping the end of said sack therein.

1,625,978. CONTROLLING DEVICE FOR MARINE ENGINES. EUGENE FRANÇOIS JOSEPH BERLAND, Paris, France. Filed Feb. 17, 1922, Serial No. 537,302, and in France Mar. 14, 1921. 1 Claim. (Cl. 137—159.)



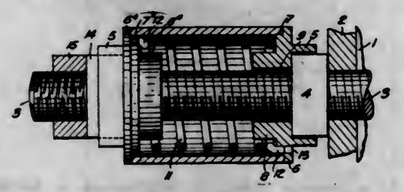
A device for automatically regulating marine engines in accordance with the depth of immersion of the propellers, comprising in combination a receiving and amplifying device of the type adapted to receive and transmit an amplified liquid pressure proportional to the depth of immersion of the propeller, and means for regulating the speed of the marine engine and adapted to be controlled by said amplified liquid pressure.

1,625,979. COIN MAGAZINE. FREDERIC H. BRINKERHOFF, Riverdale, N. J. Filed Aug. 21, 1925. Serial No. 51,581. 22 Claims. (Cl. 133—5.)



1. A coin magazine comprising movable coin holding means having a series of coin receiving pockets, a coin chute with which said pockets register in succession, means operable for automatically advancing said coin holding means step by step and controlled by the coins as the coins move from the chute into the pockets, and means for paying out one or more of the last coins received by said pockets and returning the coin holding means a corresponding number of steps.

1,625,980. GAME APPARATUS. LOUIS G. BRINKMAN, Dayton, Ohio. Filed July 23, 1926. Serial No. 124,448. 22 Claims. (Cl. 273—38.)

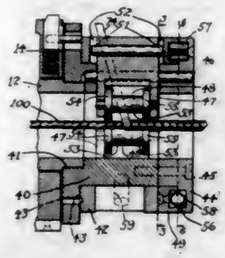


1. In a game apparatus of the character described, the combination with a base supporting article to be knocked therefrom, of a swinging carrier normally positioned below the level of and beyond the margin of the base to receive the article knocked therefrom, swinging links guiding the carrier from such position to a position over the base, the bottom of the carrier being apertured for the deposit of the articles therethrough onto the base, and closure means for the apertures operable upon the to and fro movement of the carrier to open and close the apertures as the carrier approaches the opposite limits of its movement.

1,625,981. MACHINE FOR TREATING HIDES, SKINS, AND LEATHER. JOHN J. BROPHY and WINN E. BROUGHTON, Peabody, Mass., assignors to The Turner Tanning Machinery Company, Peabody, Mass., a Corporation of Maine. Filed May 25, 1922. Serial No. 563,617. 9 Claims. (Cl. 149—16.)

1. In a machine of the character described, in combination, a bed roll to support the hide, skin or leather operated upon, a bladed cylinder co-operating therewith and provided with a shaft, a framework having bearings through which said shaft is extended, an electric motor supported by said frame-work and having its rotor directly connected with one end of said shaft to rotate the bladed cylinder, a pulley mounted on the other end of said shaft, a grinding wheel cooperating with said bladed cylinder and provided with a shaft, a reciprocating carriage, an electric motor mounted on said carriage and having its rotor directly connected with the shaft of said grinding wheel, a shaft for effecting reciprocation of said carriage, and a pulley on the last mentioned shaft connected with the pulley on the shaft of the bladed cylinder.

1,625,982. COMBINED LOCK NUT AND NUT TIGHTENER. HENRY BROWNLEE, Port Hope, Canada. Filed Jan. 11, 1926. Serial No. 80,653. 4 Claims. (Cl. 85—32.)

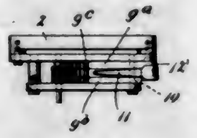


1. In a combined locknut and nut tightener, the combination with a bolt, of a nut threaded thereon, a nut receiving socket member, a second nut threaded on the bolt, means for locking the second nut on the bolt, a second nut receiving socket member, means extending between the socket members whereby the first nut is locked against outward longitudinal and consequently retrograde movement relatively to the second locked nut, and means extending between the socket members and secured to each for turning the first mentioned socket member and its nut upon the bolt being elongated.

1,625,983. METHOD OF AND APPARATUS FOR WRAPPING STRAND MATERIAL AROUND A CORE. HERBERT FRED CARTER, Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 6, 1923. Serial No. 678,982. 31 Claims. (Cl. 117—41.)

1. In a mechanism for serving strand material spirally to a core, a rotatable serving head, a strand material

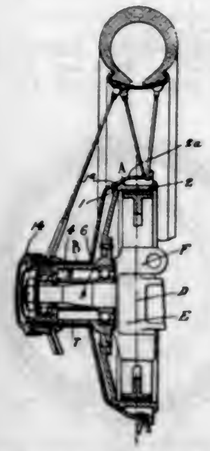
supply holder carried by the serving head, a serving device rotatable with said head, means carried by said serving device so located as to be out of contact with the served strand material and adapted to support the



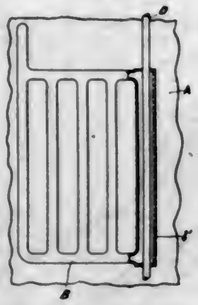
core to insure its traveling in a straight line at the point of application of the strand serving material, and means for subjecting said means to pressure tangentially of the served strand.

1,625,984. ART OF DISTILLING HYDROCARBON MATERIAL. EDGAR M. CLARK, New York, N. Y., assignor to Standard Development Company, a Corporation of Delaware. Filed Jan. 17, 1921. Serial No. 437,998. 5 Claims. (Cl. 196—76.)

1. The process of producing useful hydrocarbon materials which comprises subjecting the pitch residue resulting from the steam distillation of hydrocarbon oils to heat while supplying steam thereto until still wax distills over, then stopping the supply of steam and continuing the heating of the residue to the formation of coke.



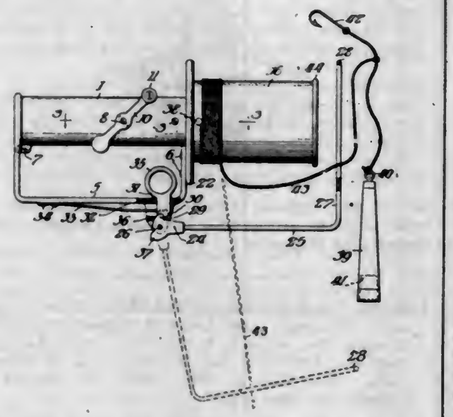
1,625,985. PRESSURE GAUGE. GEORGE H. CLARK, Melrose, Mass., assignor to Crosby Steam Gage & Valve Company, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 5, 1919. Serial No. 342,816. 2 Claims. (Cl. 73—109.)



1. In a pressure gauge, in combination, a Bourdon spring tube; a sector; mechanism operatively connecting the spring tube with the sector; a pinion engaged and actuated by the sector; and indicating means actuated by the pinion; the sector comprising a forked member, operatively connected with the spring tube, and a rotatively spring controlled intermediate member; and the members having a common axis and engaging the pinion; together with the controlling spring.

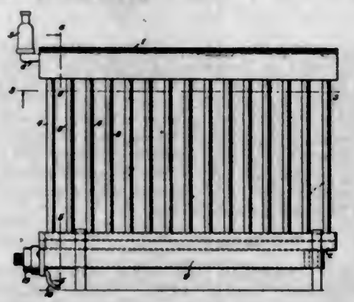
1,625,986. SPOKED METAL WHEEL FOR MOTOR VEHICLES AND THE LIKE. EMILE HENRI COQUILLE, Paris, France, assignor to Rudge-Withworth Limited, Coventry, Warwick, England. Filed Dec. 9, 1922, Serial No. 605,897, and in France Dec. 23, 1921. 4 Claims. (Cl. 301—9.)

2. In combination in a demountable wheel hub an inner and an outer hub part, sleeved barrel regions of said hub parts not larger in diameter than necessary to accommodate the internal mechanism thereof, positive torque transmitting means on said sleeved regions axially slidable one in the other, a screw-threaded member engaging the remote end of one of said sleeved regions and contacting with the other to axially force one part upon the other and a pair of complementary conical clutching surfaces several times larger in diameter than said barrel regions for constituting the sole axial force sustaining abutment and in so doing relieving the positive torque means from sudden force.



1,625,987. HEATING AND COOLING OF BUILDINGS. RICHARD GODFREY CRITTALL and JOSEPH LESLIE MUSGRAVE, London, England. Filed Sept. 20, 1923, Serial No. 663,863, and in Great Britain Nov. 10, 1922. 1 Claim. (Cl. 257—124.)

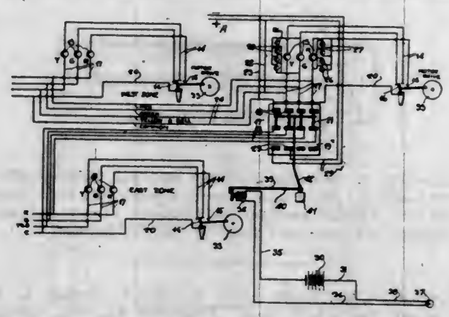
A heat exchange device comprising a hollow liquid holding grid adapted especially to be embedded in a concrete wall and having a plurality of vertical portions and upper and lower horizontal headers connected to the ends of said vertical portions, and means for changing the temperature of and causing the circulation of liquid in said grid including a pipe extending vertically through one of said vertical portions and adapted to contain a medium of a different temperature than the liquid in said grid.



1,625,988. FISHING DEVICE. ANDREW F. DICE, Joliet, Ill., assignor of one-third to George Dice and one-third to Minnie Dice, Joliet, Ill. Filed Mar. 17, 1924. Serial No. 699,676. 16 Claims. (Cl. 43—19.)

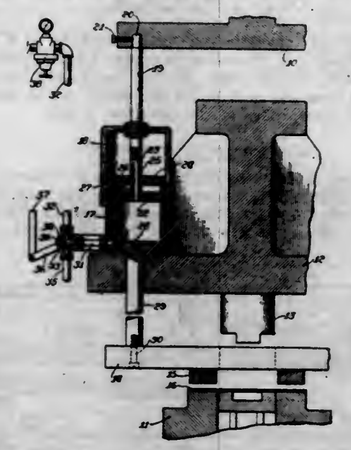
1. In a rodless fishing device, the combination of a handle, a reel extending forwardly from the handle in axial alinement therewith, mechanism for rotating the reel, and a guide for feeding the line on to the reel in

a direction transverse to the axis of the handle and swingable laterally toward and away from the same in line with the axis thereof.



1,625,989. ELECTRIC HEATER. ALLEN M. DUFFIE, Buffalo, N. Y., assignor to William H. Robinson, Buffalo, N. Y. Filed Dec. 26, 1923. Serial No. 682,796. 5 Claims. (Cl. 219—38.)

1. In an electric heater, the combination with a radiator having fluid circulating tubes and a lower head of a casing arranged below said head and providing a chamber, the upper wall of which is provided by the lower wall of said head, a heating element in said chamber, and means of support for said heating element including transversely arranged plates of insulating material and means to provide for the unitary assembly of said plates and element whereby said element and its supporting means may be removed and replaced as a unit with reference to said head.



1,625,990. TRAFFIC SIGNAL. HENRY GARRETT, Dallas, Tex. Filed Aug. 29, 1925. Serial No. 53,333. 8 Claims. (Cl. 177—337.)

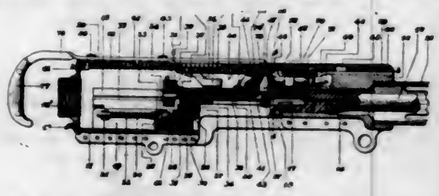
1. A traffic control signal system including stations grouped in two distinct zones with each station having the usual indicative signals, primary circuits leading from a central power station to both zones with each circuit including all the signals of like indication in the different stations of both zones, means in each zone for normally controlling the selective operation of the indicative signals for that zone for normally controlling traffic, a switching means normally closing the primary circuits between the two zones, a normally open auxiliary circuit leading from a source of energy to the switching means, and mechanism electrically controlled at a distant point

and operative to actuate the switching mechanism to open the primary circuits through the farther zone and to close the auxiliary circuit through one of the lines of signals of like indication in said farther zone.

1,625,991. BLANK-HOLDING MEANS. RUDOLPH W. GLAESNER and OLOF G. NILSON, Chicago, Ill., assignors to Marquette Tool & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 21, 1922. Serial No. 595,985. 11 Claims. (Cl. 113—46.)

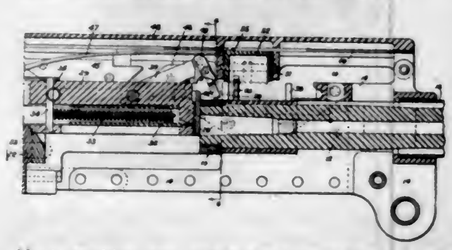
1. A mechanically operated draw press embodying a forming block, a movable element co-operating with the forming block, and yielding blank holding means movable with and with respect to the said element, whereby said movable element will be operable upon the work and will be relieved of the stress of the said blank holding means, the said blank holding means embodying a plurality of yieldable cushion elements, the said cushion elements being disposed above the work.

1,625,992. GAS BURNER. H. MITCHELL GODSEY, Shreveport, La., assignor, by direct and mesne assignments, to Godsey-Murphy Company, Inc. Filed Sept. 14, 1923. Serial No. 662,773. 1 Claim. (Cl. 158—99.)



A gas burner comprising a block, a gas chamber adapted to receive a gaseous fuel and supported in spaced relation to the inner end of said block, the space between said block and said chamber being open to the atmosphere, said block having a plurality of Venturi passages formed therein and extending from said air space to the outer end

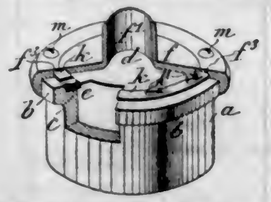
of said block to form burner ports, said block also having a plurality of air passages arranged to conduct air to the outer end of said block adjacent said burner ports, and a



plurality of discharge ports for said gas chamber adjacent said air space and directed towards the inner ends of said Venturi passages to discharge streams of gas through the space and into the Venturi passages.

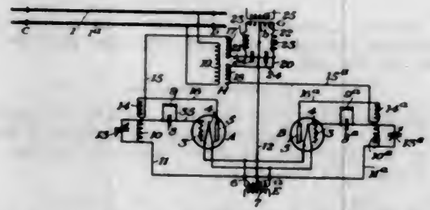
1,625,993. MACHINE GUN. WALTER T. GORTON, U. S. Army, Springfield, Mass. Filed July 12, 1922. Serial No. 574,558. 18 Claims. (Cl. 89—33.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)

15. In an automatic gun the combination of a breech casing having a transverse cartridge feeding channel, a mechanism for at will feeding cartridges into said channel from left to right, or vice versa, and an extractor operable irrespective of the direction of feed.



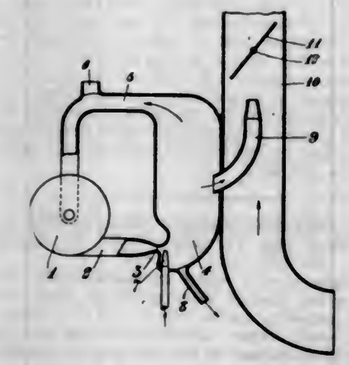
1,625,994. MACHINE GUN. WALTER T. GORTON, U. S. Army, Springfield, Mass. Filed July 11, 1924. Serial No. 725,440. 12 Claims. (Cl. 89—33.) (Granted under the act of Mar. 3, 1883, 22 Stat. L., 625.)

12. A machine gun embodying a reversible cartridge feeding mechanism, recoil operated means for operating said mechanism either right or left handed, an extractor pivotally mounted in said means and an ejector mountable on either side of the extractor.



1,625,995. TELEPHONIC RECEIVER. EDWARD ALFRED GRAHAM, Brockley, England; Maria Graham and Alfred Graham executrix and executor of said Edward Alfred Graham, deceased. Filed May 31, 1924, Serial No. 717,063, and in Great Britain June 14, 1923. 8 Claims. (Cl. 179—115.)

1. A telephonic receiver comprising a casing provided with a seat, an electro-magnetic diaphragm influencing system within said casing, a diaphragm extending over said diaphragm influencing system and supported by said seat, substantially rigid damping material arranged between said seat and the peripheral portion of said diaphragm and against which the latter bears, an outer abutment and spring means arranged between the outer

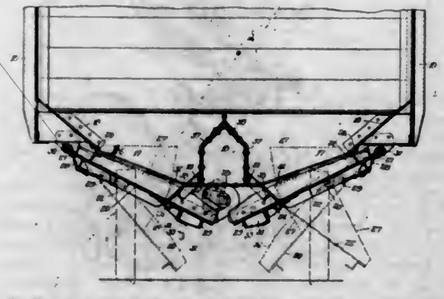


side of the peripheral portion of the diaphragm and said outer abutment and adapted to exert a yielding pressure against said diaphragm.

1,625,996. ELECTRICAL APPARATUS. LARS O. GRONDAHL, Pittsburgh, and HARRY M. RYDER, Forest Hills Borough, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Nov. 3, 1923. Serial No. 672,642. 3 Claims. (Cl. 250—36.)

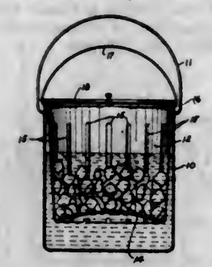
1. In combination, two electron tubes having grid circuits tuned to resonance at different frequencies, a power transformer, an output transformer, a plate circuit for one said tube comprising a first winding of said power transformer and a first primary winding on said output transformer, a plate circuit for said second tube including a second winding on said power transformer and a second primary winding on said output transformer, and a pair of conductors constantly connected with a secondary winding on said output transformer.

1,625,997. METHOD OF AND APPARATUS FOR ATOMIZING LIQUID FUEL. OSCAR ROBERT GRÖNKWIST, Stockholm, Sweden. Filed May 6, 1922, Serial No. 559,035, and in Germany May 7, 1921. 4 Claims. (Cl. 261—1.)



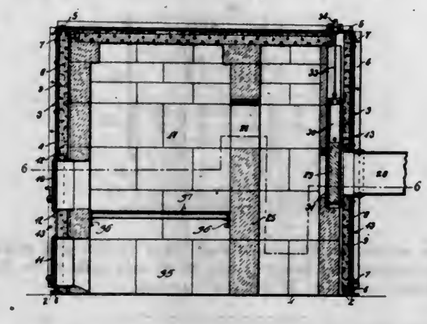
1. The method of atomizing liquid fuel for an internal combustion engine, which consists in passing a current of gas past such liquid fuel so as to atomize and mix

said fuel with said gas, maintaining at least a substantial portion of said current of gas and atomized fuel mixed therewith in circulation in a circuit past such liquid fuel, delivering a portion of such mixed gas and atomized fuel to the intake of the engine, and admitting a corresponding quantity of fresh gas to said circulating current.



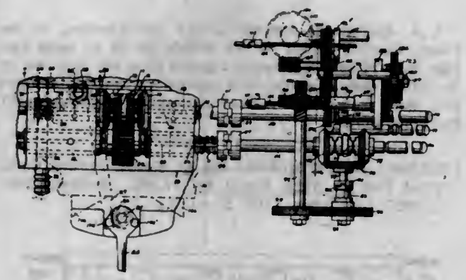
2. An apparatus for atomizing liquid fuel, comprising in combination a circulation passage, means for generating and maintaining a current of gas in circulation through said passage past said liquid admitting means, an outlet from said circulation passage for discharging a mixture of gas and atomized fuel, and an inlet for fresh gas to said circulation passage.

1,625,998. DUMP-CAR CONSTRUCTION. DAVID HINDAHL, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed May 3, 1922, Serial No. 558,236. Renewed July 30, 1924. 25 Claims. (Cl. 105—281.)



1. A dump car comprising a pair of bottom dump doors pivoted along axes adjacent to the sides of said car, sloping floor members located adjacent to the center line of said car and contacting with said dump doors along lines spaced from said center line, said doors having extension members extending beyond said spaced lines, said doors being provided with swinging closure members pivoted adjacent to said floor members, and flexible operating means for said closure members having their pitch lines always extending through the pivotal axes of said dump doors.

1,625,999. DOMESTIC COOKING VESSEL. MARY S. IRISH, Los Angeles, Calif. Filed Dec. 26, 1924. Serial No. 758,124. 1 Claim. (Cl. 53—1.)

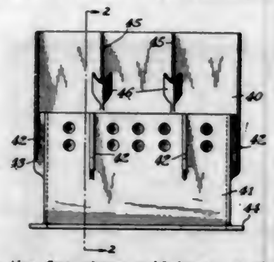


In a device of the class described, an interior and an exterior vessel, said inner vessel having a tapering side wall spaced from the outer vessel and having a dished upwardly projecting bottom, said inner vessel having a plurality of longitudinally extending slots in its side wall, said slots extending from a point intermediate the side wall of said inner vessel to and into the outer portion of the upwardly dished part of said dished bottom and the remaining portion of the bottom being imperforate, said inner vessel having a lid thereon.

1,626,000. INCINERATOR. EDGAR BOYD KAY, Washington, D. C. Filed June 6, 1924. Serial No. 718,392. 7 Claims. (Cl. 110—18.)

1. A portable incinerator comprising a base plate, spaced angle irons mounted on the base plate near its edges, side and end panels stepped in the space between said angle irons and bolted together along their vertical edges, Z irons arranged at the corners and bolts to an end and a side panel, a lining of refractory material and a top slab of refractory material adapted to rest on the lining to form a closure.

1,626,001. MACHINE-TOOL DRIVE. EDWARD J. KEARNEY, Wauwatosa, and JOSEPH ARMITAGE, Milwaukee, Wis., assignors to Kearney-Trecker Corporation, West Allis, Wis. Filed Dec. 31, 1923. Serial No. 683,647. 64 Claims. (Cl. 90—21.)



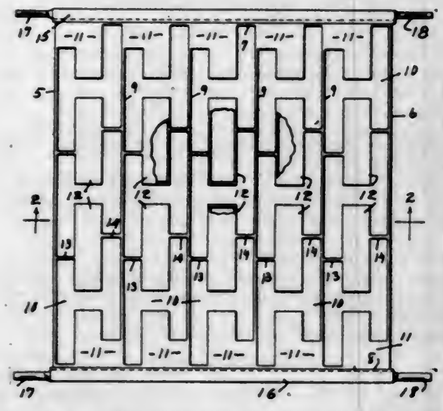
1. In a machine tool, the combination with a reciprocable table and a relatively movable member supported therefrom and arranged for the actuation of a table attachment, of a table actuating member, a power train connecting said members, and means for establishing a plurality of alternative forward driving connections with said power train.

53. In a machine tool, the combination with a movable table and a power train including a table actuator and a removable portion connectable in series therewith, of a power-trip device arranged to be driven by the removable portion of said train, and a frame means supporting said device and said removable portion for unitary connection with and removal from said table, said trip being adapted when in use to interrupt motion transmission through said train to said actuator.

1,626,002. FLUE. JEAN MARTIAL LOBIT, Brooklyn, N. Y. Filed Dec. 6, 1921. Serial No. 520,370. 2 Claims. (Cl. 98—66.)

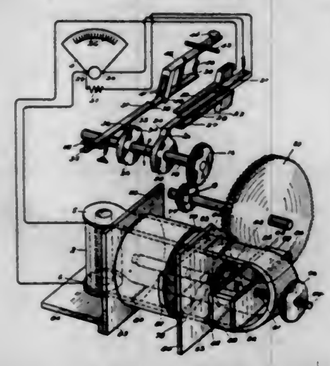
1. A ventilator comprising in combination, a flue including upper and lower gas-conducting sections, means whereby said upper section is supported by and in series

with said lower section, means whereby any liquid flowing down the inside wall of said upper section is discharged exteriorly of said lower section, a baffle extend-



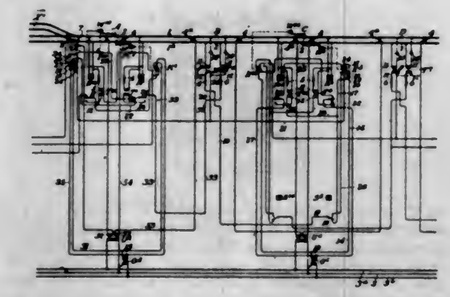
ing across the line above said lower section and means for causing any liquid flowing down said baffle to be discharged exteriorly of said lower section.

1,626,003. SPACE BAND. JEAN MARTIAL LOBIT, Staten Island, N. Y. Filed Feb. 6, 1926. Serial No. 86,488. 8 Claims. (Cl. 199—68.)



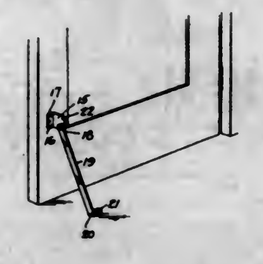
1. A spaceband comprising, in combination, a resilient member folded in the middle so as to form two legs, each of said legs being tapered from its free end to its folded end, a wedge, and means for restraining said free ends from their normal tendency to spread apart from one another.

1,626,004. BRICK MOLD. JOE LO FORTI, Fresno, Calif. Filed Dec. 23, 1925, Serial No. 77,205. Renewed Feb. 5, 1927. 2 Claims. (Cl. 25—119.)



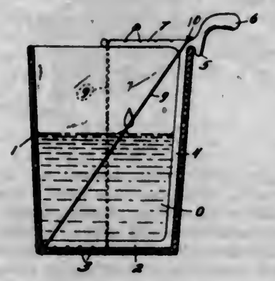
1. A brick mold comprising a rectangular frame; partitions dividing said frame into a plurality of troughs; substantially L-shaped cores mounted at each end of each of said troughs, the cores in each trough being opposed relatively to each other; a plurality of rectangular cores mounted in each of said troughs on the longitudinal center thereof and equally spaced apart; webs connecting said rectangular cores to said partitions, the webs of each core being in staggered relation whereby a substantially H-shaped mold is provided the adjacent ends of the legs of which are of different lengths.

1,626,005. APPARATUS FOR DETERMINING THE PERCENTAGE OF CARBON IN A SPECIMEN OF IRON OR STEEL. CARL JOHAN GUNNAR MALMBERG, Surahammar, and JOHAN GUNNAR HOLMSTRÖM, Saltsjo-Storangen, Sweden. Original application filed Feb. 5, 1921, Serial No. 442,895, and in Sweden Dec. 22, 1917. Divided and this application filed June 26, 1924. Serial No. 722,623. 8 Claims. (Cl. 175—183.)



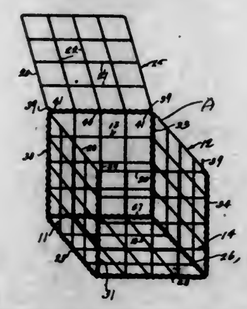
1. Apparatus for determining the percentage of carbon in a specimen of iron or steel, comprising a magnetic circuit including the specimen to be tested, and a permanent magnet for magnetizing said specimen, an induction coil wound upon a portion of said circuit, means for repeatedly varying the magnetic force between two chosen values, and a measuring instrument for measuring the difference between the magnetic fluxes through the specimen at said two values.

1,626,006. RAILWAY-TRAFFIC CONTROLLING APPARATUS. RONALD A. MCCANN, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 23, 1924. Serial No. 687,960. 25 Claims. (Cl. 246—34.)



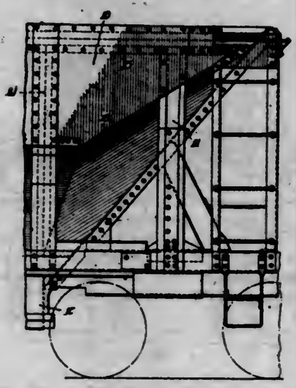
24. In combination, a two phase alternator having two windings in which the currents are in quadrature, a stretch of railway track, means for supplying alternating current to the rails of said stretch in series from one said winding, and means for supplying alternating current to the rails of said stretch in parallel from the remaining winding.

1,626,007. DOOR-HOLDING DEVICE. CHARLIE BARRETT MITCHELL, Los Angeles, Calif. Filed Feb. 25, 1925. Serial No. 11,570. 1 Claim. (Cl. 292—338.)



A door holding device comprising a supporting and attaching plate constructed from a sheet of metal to provide a flat body formed at one end with an angularly disposed attaching flange by which the plate is adapted to be secured to a door with the body projecting outwardly from the door, an arm constructed of strap metal pivotally mounted on one side of the body adjacent its lower forward edge, said arm having its opposite end bent to provide an angular extension, and an exteriorly corrugated sleeve embracing the extension and adapted to frictionally engage the floor when the arm is swung downwardly to prevent movement of the door in one direction, the upper forward corner of the plate being slit to provide a lug bent laterally so that the lug will be disposed in the path of movement of the arm which when lifted to occupy an inactive position is slightly flexed so as to permit it to clear and pass the lug, whereby upon releasing the arm it will again be disposed in the path of the lug and thus maintained in its inactive position.

1,626,008. SANCTUARY LAMP. BERNARD MULLER-THYM, Kansas Cty, Mo. Filed May 28, 1923. Serial No. 641,914. 5 Claims. (Cl. 67—55.)

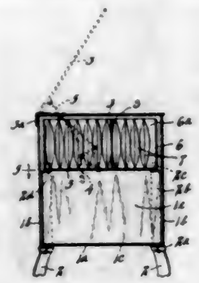


1. A sanctuary lamp comprising an oil containing vessel, a pair of parallel wicks close enough to conjointly support combustion at a single point in close proximity to the surface of the oil, and extending through the oil in said vessel, and means securing the opposite ends of said wicks adjacent the bottom and top of said vessel respectively.

1,626,009. FOLDING CRATE. TIMOTHY J. MURRAY, Covington, Ind. Filed Oct. 21, 1924. Serial No. 744,966. 13 Claims. (Cl. 220—6.)

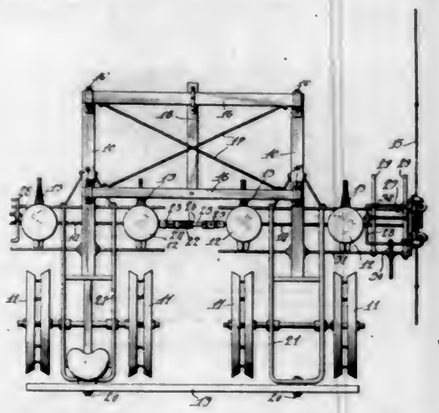
1. As an article of manufacture a collapsible crate comprising a bottom, side walls, a front wall, and rear wall, and inherently shaped spiral coil members threaded through the adjacent edge portions of said walls and bottom to rigidly connect the same in detachable relation.

1,626,010. CAR. JOHN O. NEIKIRK, Lombard, Ill., assignor to National Dump Car Company, Chicago, Ill., a Corporation of Maine. Filed Apr. 3, 1924. Serial No. 703,904. 4 Claims. (Cl. 105—247.)



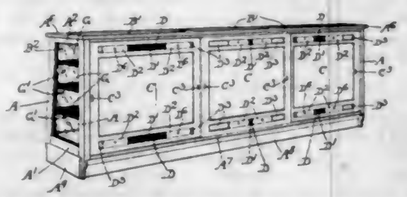
1. A railway car for carrying lading, comprising a side wall, a top chord arranged adjacent to the top of said wall, said top chord comprising an angular member arranged along the top of said wall with the apex of said angular member facing interiorly of said car, an end portion for said car, a member for joining said top chord to said end portion, said member having an angular portion conforming to said top chord and having an angular portion the concave side of which faces outwardly of said car, and a hand rail located adjacent to said outwardly facing angular portion whereby said hand rail may be conveniently grasped by an operator, said member being united to said end portion.

1,626,011. NEEDLE VENDOR IN THE FORM OF A MINIATURE PHONOGRAPH. EUGENE F. O'NEILL and ELMER L. KERN, Minneapolis, Minn. Filed May 26, 1924. Serial No. 715,843. 2 Claims. (Cl. 211—7.)



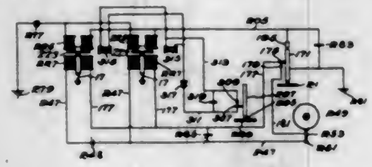
1. A sales display device for the necessary accessory parts of a machine, such as a phonograph, comprising a substantially rectangular casing having one side thereof formed of a plurality of layers of sheet material, said

layers being loose adjacent the corners of said casing, legs having portions of angle shape in cross section disposed in said casing, one side of said portions being dis-



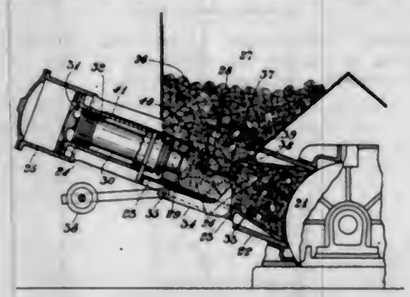
posed between said layers and the other side being disposed along the adjacent side of said casing, one of said sides of said portions having a bent-over end, and a tray in said casing supported on said bent-over ends.

1,626,012. CHECKROW PLANTER. JOSEPH C. REUSE, Libertyville, Ill. Filed June 23, 1922. Serial No. 570,481. 1 Claim. (Cl. 111—54.)



Check-row mechanism comprising a pair of planters having forwardly projecting poles, spacing bars pivoted to said poles to permit relative vertical movement thereof, and cross braces for holding said poles against relative movement in a horizontal direction.

1,626,013. COUNTER. WILLIAM T. SHERER, Chicago, Ill. Filed Feb. 18, 1924. Serial No. 693,457. 2 Claims. (Cl. 211—25.)

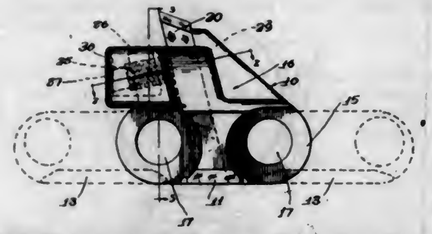


1. A display case divided by vertical partitions into a series of separate compartments the compartments being open at one side of the case, doors for closing the open ends of the compartments supported so as to slide in front one of the other and adjustable ventilating means mounted in the doors and located entirely within the planes including the opposite faces of the doors whereby the doors may slide past one another without interfering with the adjustments of the ventilating means.

1,626,014. ORNAMENTING MACHINE. CLINTON F. SMITH, Attleboro, and JEAN B. SABOURIN, Norton, Mass. Filed Apr. 21, 1923. Serial No. 633,804. 31 Claims. (Cl. 78—13.1.)

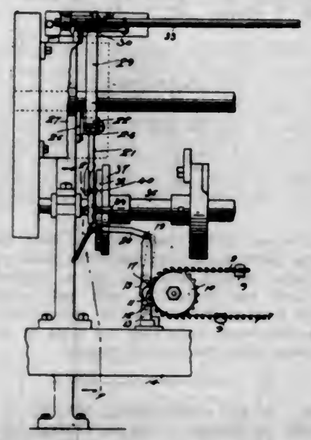
1. In a pattern controlled reproducing machine, the combination with a rotary support for a pattern plaque having a varying contour, of a traveler with a reciprocatory plunger, devices for causing relative traverse between the face of the plaque and the traveler while the latter is in contact with the former, said traveler having imparted thereto a reciprocatory movement responsive to the varying contour of the pattern, a rotary work support, a tool, a reciprocatory tool carrying rod movable independently of the traveler, a magnet for moving the tool carrying rod and tool directly away from the work, a controlling circuit for the magnet, and contacts extraneous of the pattern and controlled by the pattern-caused movement of the traveler plunger whereby movement of the tool follows movement of the traveler.

1,626,015. PULP GRINDER. JOHAN DANIEL ULLGREN, Stocksund, Sweden, assignor to Aktiebolaget Karlstads Mekaniska Verkstad, Karlstad, Sweden, a Swedish Company. Filed July 11, 1924, Serial No. 725,332, and in Sweden Aug. 11, 1923. 13 Claims. (Cl. 83—75.)



1. In a pulp grinder the combination of a frame, a grinding stone rotatable in said frame, a wood magazine, means in said magazine for feeding wood through the same towards said stone, and means actuating said magazine in a direction towards said stone for feeding wood to the latter during the interruption of said feeding means.

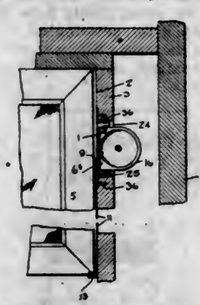
1,626,016. CUTTER CHAIN. FREDERICK W. VODOZ, Wilmette, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 24, 1924. Serial No. 757,896. 5 Claims. (Cl. 262—33.)



1. A cutter chain block having a body provided with an outwardly extending bit receiving aperture, a set

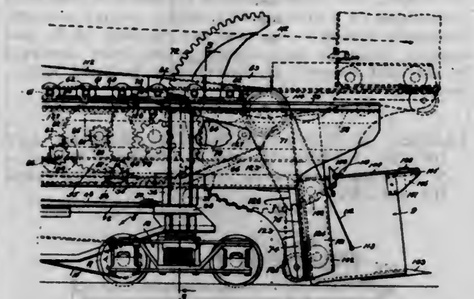
screw extending through the front face of said block for securing a bit in said aperture, the head of said set screw normally projecting beyond the front face of said block,

and cuttings propelling means carried by said block and extending laterally therefrom thence forwardly to form a protection for the head of said set screw.



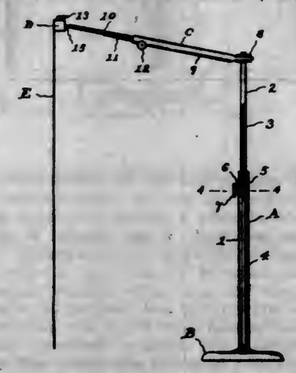
1,626,017. COURSE-CONTROLLING ATTACHMENT FOR KNITTING MACHINES. ALFRED WAGNER, Philadelphia, Pa., assignor to Gotham Silk Hosiery Company, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 22, 1923. Serial No. 682,137. 3 Claims. (Cl. 66—167.)

1. In a knitting machine, an arresting bar and a narrowing chain, in combination with means actuated by the narrowing chain to operate the arresting bar, said means including a shifting bar, an abutment carried by the arresting bar to be engaged by said shifting bar, a bell crank lever for actuating the shifting bar, and means actuated by the narrowing chain to operate the bell crank lever.



1,626,018. SASH-BALANCING DEVICE. AUGUST L. WAGNIERE, Los Angeles, Calif. Filed Jan. 18, 1923. Serial No. 613,514. 8 Claims. (Cl. 16—198.)

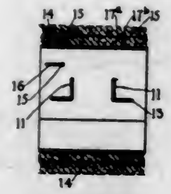
1. In a sash balancing device, the combination of a face plate having a side plate extending therefrom, a pulley having a disc with a central opening, lying against and frictionally engaging the side plate and having a cylindrical rim projecting from the disc, a tubular arbor attached to the side plate and passing through the said central opening of th disc, a spring within the pulley having its inner end attached to the arbor and having its outer end attached to the pulley to exert rotary force upon the pulley, a cover plate frictionally engaging the said cylindrical rim and having a body with a centrally disposed button engaging the end of the bore of the arbor, operating to center the arbor, and having a flange extending toward the side plate, means located at the arbor for securing the cover plate in position, and a flexible



band wrapped on the outer face of the pulley, said face plate having an opening through which the end of the band extends for attachment to the sash.

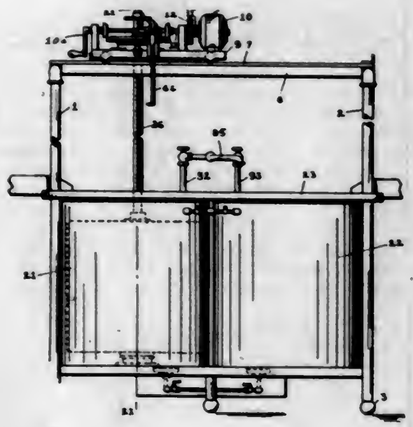
1,626,019. EXCAVATING APPARATUS. WILLIAM A. WHITMIRE, Big Creek, Calif. Filed Mar. 13, 1923, Serial No. 624,864. Renewed Sept. 25, 1926. 5 Claims. (Cl. 214—1.)

1. An excavating apparatus, comprising a wheeled truck, an excavating mechanism supporting body pivotally mounted on said truck, a carriage frame supported for longitudinal movement on said body, an elevating crane pivoted to said carriage frame, and a dipper mounted for movement on said carriage frame and elevating crane.



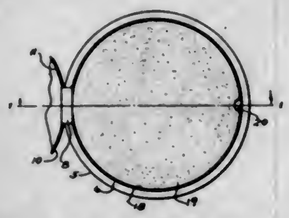
1,626,020. PAPER-HANGING DEVICE FOR WALLS. ERNEST R. BUSKEY, Cleveland, Ohio. Filed May 16, 1925. Serial No. 30,647. 8 Claims. (Cl. 216—4.)

1. A device for applying paper to a side wall, including a standard adapted to rest upon the floor, a lateral arm pivotally mounted upon the standard to swing in a hori-



zontal direction, a cross bar arranged at substantially right angles to and pivotally mounted upon the end of the lateral arm to swing freely into different angular positions, and means for securing an end of a strip of wall covering to the cross bar whereby it can be supported in close proximity to the wall and will hang vertically by gravity.

1,626,021. TILE CONSTRUCTION. FRANK CESARIO, Port Chester, N. Y. Filed Mar. 3, 1926. Serial No. 91,882. 4 Claims. (Cl. 72—42.)

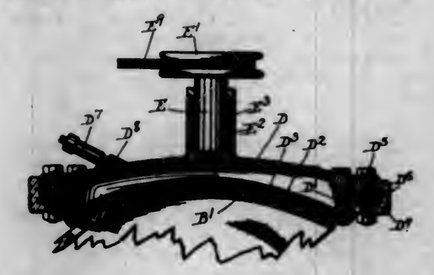


1. In a tile of the class described a support, rectangular shaped, said support jointed together at or near its extremities, by a plurality of L shaped locking members, threadedly attached at or near one extremity of the said support, elongated slots formed in the other extremity of the said support, to accommodate the said locking members.

1,626,022. MACHINE FOR WASHING, RINSING, AND DRYING DISHES. JAMES C. CORBETT, Rochester, N. Y. Filed Nov. 7, 1925. Serial No. 67,677. 1 Claim. (Cl. 141—9.)

In a dish washing machine, the combination of a pair of tanks placed side by side, an overhead track supported over said pair of tanks, a carriage adapted to move back and forth on said track, a cage adapted to hold dishes to be washed, a threaded shaft suspended from said carriage and connected to said cage to either turn or raise and lower said cage on the rotation thereof, a gear mounted on said carriage and threaded on said shaft, a clutch splined on said shaft below said gear, and means for either holding said clutch in frictional contact with said gear to rotate therewith and rotate said shaft with said cage, or holding it out of engagement with said gear to allow said shaft and cage to remain stationary so as to raise or lower said shaft on the rotation of said gear.

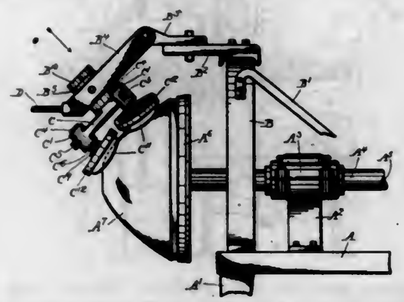
1,626,023. VANITY CASE. CHARLES N. CORTELL, Mamaroneck, N. Y. Filed June 24, 1925. Serial No. 39,234. 12 Claims. (Cl. 132—83.)



1. In a vanity box, a case having upwardly extending sides, inwardly projecting edges on said sides, a cover for said case having edges projecting therefrom fitting closely within said inwardly projecting edge of said case, and a compact carrying backing in said case having its upper edges formed to insure contact with said projecting edge of said cover, whereby when said cover is closed said backings of varying sizes are held firmly in the vanity box.

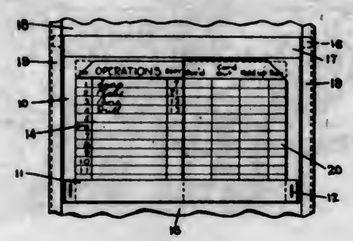
1,626,024. PANTALOON DRESS. PEARL M. CRANE, Kansas City, Mo. Filed Feb. 8, 1926. Serial No. 86,799. 1 Claim. (Cl. 2—71.)

A pantaloon dress comprising a body portion and pantaloons carried thereby, the outer sides of said pantaloons being formed with box plaits, separate skirt or apron panels also carried by said body portion at the front and rear of the pantaloons, respectively, and flexible strap elements connecting the sides of said skirt or apron panels near the bottom thereof.



1,626,025. GLASS-POLISHING MACHINE. CHARLES W. DAKE and ROBERT S. LEVIS, Chicago, Ill., assignors to The Pyle-National Company, Chicago, Ill., a Corporation of New Jersey. Filed Oct. 2, 1922. Serial No. 591,756. 2 Claims. (Cl. 51—196.)

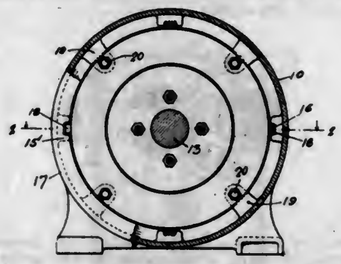
1. A pad for glass polishing machines and the like comprising a rigid flanged circular plate, a flexible impervious diaphragm closing the bowl formed by the plate and flange, a flexible polishing pad supported by the impervious diaphragm, the periphery of the pad and the diaphragm extending beyond and enfolding the flange, an annular ring encircling the outer periphery of the plate



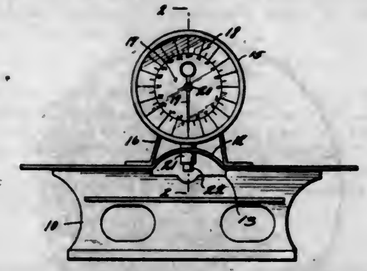
and having an inwardly extending flange parallel with the face of the plate, the inner diameter of said flange being greater than the outer diameter of the flange on the plate and means for clamping the flange and the edge of the plate together, said means being located outside the plate flange.

1,626,026. GLASS-POLISHING MACHINE. CHARLES W. DAKE and ROBERT S. LEVIS, Chicago, Ill., assignors to The Pyle-National Company, Chicago, Ill., a Corporation of New Jersey. Filed Oct. 2, 1922. Serial No. 591,757. 2 Claims. (Cl. 51—131.)

1. In a glass polishing machine, a mandrel upon which the work is mounted for rotation, a spider mounted for rotation about an axis inclined to the axis of rotation of the work, a plurality of separate polishing pads mounted each for rotation upon the spider adapted to engage the work, the pads being free to oscillate to conform to the surface of the work, each pad being rotatably mounted upon the spider, a pivoted support for the spider, the spider being free to move toward and from the work.



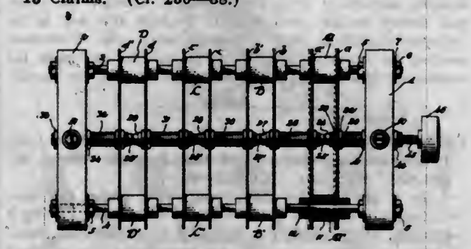
1,626,027. CARD INDEX. DWIGHT C. DANIELS, Worcester, Mass. Filed Oct. 2, 1923. Serial No. 666,076. 5 Claims. (Cl. 129—16.7.)



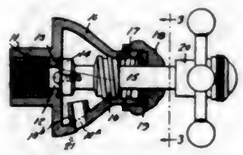
2. A card index comprising a carrier provided with a pocket, a record card insertable into said pocket and a temporary card likewise insertable into said pocket which has a folded flap arranged to slidably hook over an edge of the record card and hold the two cards aligned with their indicia in proper relationship.

1,626,028. REMOVABLE STATOR FOR ELECTRIC MOTORS. CARL L. DAUN and PAUL E. KELLER, Milwaukee, Wis., assignors to American Electric Motor Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Jan. 29, 1923. Serial No. 615,685. 3 Claims. (Cl. 171—252.)

1. In an electric motor, a frame, a stator and a rotor mounted therein, the said frame being provided interiorly with a plurality of circumferential rows of grooved projections concentrically and axially aligned with respect to the rotor, and locking keys, each engaging a plurality of the aligned grooved projections and the stator, to position the latter concentrically with relation to the rotor, whereby upon removal of the said keys the stator and its winding as a unit may be withdrawn from the frame.

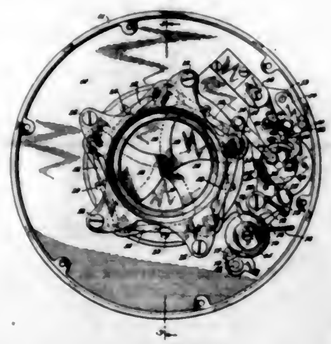


1,626,029. SAW TOOTH GAUGE. CLYDE A. BRIGGS, Millwood, Oreg. Filed Apr. 17, 1926. Serial No. 102,736. 2 Claims. (Cl. 33—202.)



1. A saw tooth gauge comprising a member adapted to lie flat upon the edge faces of the saw teeth, and a micrometer including a dial means for rigidly mounting the micrometer upon said member, a pointer operating over the dial and an actuator therefor, a spring resiliently urging the actuator downward beyond the inner face of the member, and means operatively connecting the actuator to the pointer to cause its rotation around the dial in one direction as the actuator is moved inward.

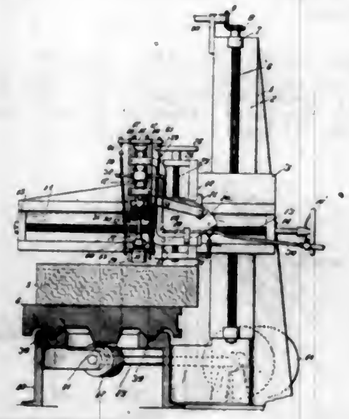
1,626,030. SPARK-GAP DEVICE. JAMES H. EASTMAN, Detroit, Mich. Filed May 17, 1926. Serial No. 109,807. 13 Claims. (Cl. 250—38.)



1. A spark gap device comprising a plurality of electrodes arranged in pairs, means for supporting the electrodes including elastic plates, each electrode being mounted in such a way that it can be adjusted relatively to its respective plate, and adjusting means acting upon the plates to flex the same for simultaneously adjusting the spark gaps.

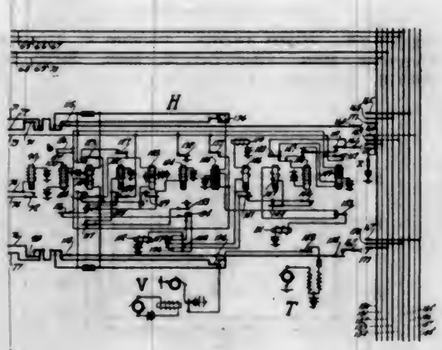
1,626,031. BIBCOCK OR FAUCET. EDGAR A. ECKHOUSE, Cleveland, Ohio, assignor to The Central Brass Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 6, 1923. Serial No. 611,037. 5 Claims. (Cl. 251—155.)

3. A cock or faucet comprising a hollow symmetrical casing having inlet and outlet openings, said outlet opening being in one side of said casing and a spout extending inwardly from said outlet opening and terminating closely adjacent said inlet opening.



1,626,032. PHOTOGRAPHIC SHUTTER. SHERMAN M. FAIRCHILD, Oneonta, N. Y. Filed June 1, 1922. Serial No. 565,075. 25 Claims. (Cl. 95—63.)

25. In a photographic shutter, in combination, a movable blade-actuating member, a detent shiftable into and out of engagement with said member to lock and unlock the same, a pivoted dog connected with the detent to shift the same out of engagement with said blade-actuating member, a rotatable device associated with the dog to actuate the same, a spring connected with the blade-actuating member to actuate the same, a tensioning member associated with the spring to tension the same, and means acting automatically to lock the dog in inoperative position but connected with the tensioning member for actuation thereby to release the dog when the tensioning member is itself actuated to tension the spring.

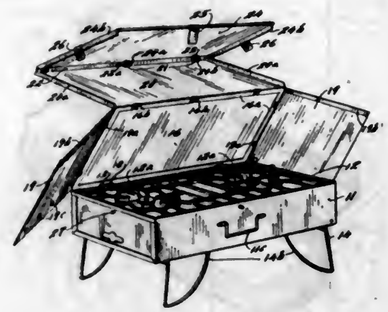


1,626,033. BUSH-HAMMERING MACHINE. CARL FÜRST, Bedford, Ind. Filed Jan. 7, 1924. Serial No. 684,800. 8 Claims. (Cl. 125—8.)

1. In a machine for bush hammering stone, the combination of a support for the stone, a hammer having a roughened under surface comprising a plurality of stone-engaging projections, means for sustaining the hammer over the stone, a reciprocating motor for imparting vertical movements to the hammer in opposite directions comprising a floating element to which the hammer is attached, means whereby the hammer and stone support may be adjusted transversely relative to one another in one horizontal direction, and means for causing relative, continuous transverse movement in another horizontal direction between the hammer and the surface of the stone being operated on, means for giving movements of partial rotation to the hammer while out of contact with

the stone, and springs arranged to retract the hammer from the stone as soon as the down stroke thereof is completed.

1,626,034. AUTOMATIC TELEPHONE SYSTEM. JOHN E. GARDNER, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Feb. 2, 1921, Serial No. 441,875. Renewed Sept. 17, 1926. 39 Claims. (Cl. 179—18.)



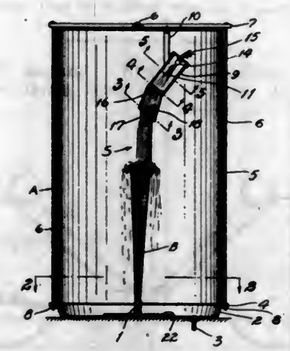
1. In an automatic telephone system, means controlled by a calling subscriber for connecting with a called line, means including a reoperative switch for then extending the connection to a plurality of other called lines, each time maintaining the last established connection, and means whereby the subscriber on one of said called lines can disconnect his line from said connection.

1,626,035. OVEN FOR CAMP STOVES. HANS C. HANSON, Albert Lea, Minn., assignor to American Gas Machine Company, Albert Lea, Minn., a Corporation of Minnesota. Filed Aug. 10, 1925. Serial No. 49,473. 11 Claims. (Cl. 126—38.)

1. A camp stove structure comprising a unit having in combination a casing having a top edge, a plate hingedly

connected to said edge, a series of plates hingedly connected along adjacent edges and to said plate, all of said plates forming an articulated unit constituting five sides of a rectangular oven so as to be supported either on top

of said casing and vertically alined therewith or disposed at the rear thereof, said plates being collapsible into flat position on top of said casing with two of said plates disposed beneath said first mentioned plate and two disposed above said plate.

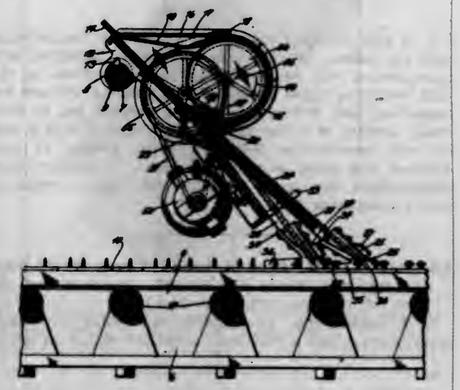


1,626,036. MOP. JOHN S. HIGGINS, Jr., Chicago, Ill. Filed June 19, 1925. Serial No. 38,158. 1 Claim. (Cl. 15—229.)

In a mop, a flexible body portion having a marginal sheath, a rigidifying frame within said sheath, mop strands secured to the inner margin of the sheath, a tab on said body portion adapted to be clamped in a mop holder, said flexible body portion having relatively sharp corners on opposite sides of said tab and flat terminal portions in a longitudinal line through said tab for the purpose set forth.

1,626,037. DISPLAY DEVICE. NORRIS B. HOLT, St. Louis, Mo. Filed Mar. 17, 1926. Serial No. 95,211. 4 Claims. (Cl. 299—4.)

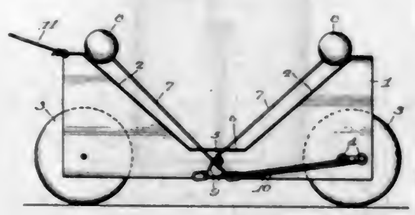
1. A display device comprising a stream of fluid, means whereby rays of light of different colors are simultaneously directed against and through said stream of fluid, and a reflector positioned to reflect said colored



rays of light against said stream of fluid, said stream of fluid being interposed between said means for producing rays of light and said reflector.

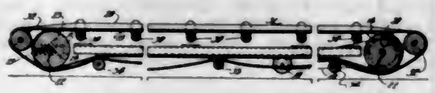
1,626,038. ALLOY. WARD S. IRELAND, Beloit, Wis., assignor to Lipman Refrigeration Company, Beloit, Wis., a Corporation of Delaware. Filed Jan. 29, 1926. Serial No. 84,559. 2 Claims. (Cl. 75—1.)

1. An alloy consisting of the following ingredients in substantially the proportions specified: Tin, 95 to 97½%, and silver, 2½ to 5%.



1,626,039. MACHINE FOR PLACING WASHERS UPON THE PINS OF RUBBER-HEEL MOLDS. JULIUS H. KINTZELE, St. Louis, Mo., assignor to Dryden Rubber Company, Chicago, Ill., a Corporation of Illinois. Filed July 18, 1925. Serial No. 44,436. 14 Claims. (Cl. 18—1.)

1. A machine of the character described comprising a cylindrical hopper, tangential chutes conducting washers from the hopper, chute fingers for conducting washers from said chutes to pins to which the washers are to

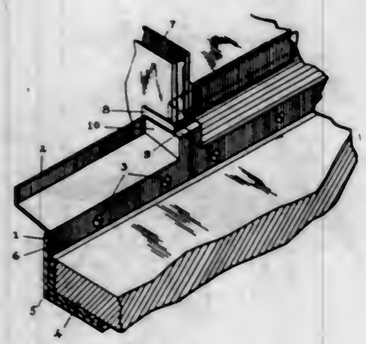


be applied, rotary supports in the hopper, means for rotating said supports in a direction opposite to the direction of the tangential chutes, and a wiper pivotally supported by said supports at an angle in advance thereof and movable thereby across the openings to said chutes whereby to remove washers jammed at said openings.

1,626,040. MECHANICAL TOY. LEONARD D. KROFF, Sterling, Ill. Filed Nov. 9, 1925. Serial No. 67,816. 4 Claims. (Cl. 46—47.)

1. In a mechanical toy, the combination of a wheeled body, a knocker operative to vibrate back and forth, front and rear portions of said body constructed and disposed in position to form opposite stops to receive the impacts of said knocker to produce a pounding or knocking sound, and wheel-operated means for actuating said knocker from one stop to the other when the toy is propelled along the floor.

1,626,041. BELT CONVEYER. GORDON R. KYLE, Belleville, N. J., and BENJAMIN A. MITCHELL, West New Brighton, N. Y. Filed Apr. 21, 1925. Serial No. 24,751. 15 Claims. (Cl. 198—203.)



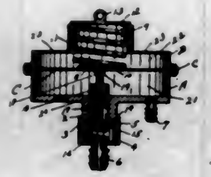
1. A belt conveyer comprising an endless transmission belt, an endless wearing pad, and means including said transmission belt for preventing tensional stress in the load conveying upper stretch of said wearing pad and for supporting and driving said endless wearing pad by frictional contact of a run of said wearing pad with a run of said transmission belt, the upper stretch of said wearing pad being of sufficient width to contact with substantially the entire width of the upper stretch of said transmission belt.

1,626,042. GLASS. FRED M. LOCKE, Victor, N. Y. Filed Aug. 28, 1916, Serial No. 117,227. Renewed Oct. 29, 1926. 7 Claims. (Cl. 106—36.1.)

1. A boro-silicate glass batch containing an alkali metal nitrate and a relatively large percentage of silica.

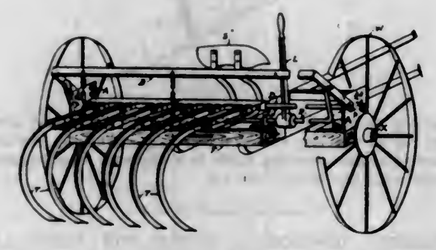
1,626,043. MOP MOLD FOR LIBRARY-STACK CONSTRUCTION. HOMER W. LOMBARD, Jamestown, N. Y., assignor to Art Metal Construction Company, Jamestown, N. Y., a Corporation of New York. Filed Sept. 4, 1926. Serial No. 133,642. 5 Claims. (Cl. 45—1.)

5. A mop mold for a library stack construction having a pair of uprights with a shelf supported between them having a downwardly projecting flange at the front thereof, said mop mold comprising a vertical flange connecting the uprights at the front, an inclined flange projecting rearwardly from said vertical flange between the uprights, a vertical extension at the end of said rearwardly projecting extension with a space left open between said vertical extension and the downwardly projecting flange of said shelf to provide a ventilating opening between said mop mold and said shelf.



1,626,044. ANTIDIABETIC SUBSTANCE. FREDERICK S. MACY, Brooklyn, N. Y. Filed May 8, 1926. Serial No. 107,792. 7 Claims. (Cl. 167—7.)

1. A method of preparing an anti-diabetic substance from the pancreas consisting in grinding and macerating the tissue, precipitating the proteins therefrom with ammonium sulphate, separating the precipitate from the solution by filtration, obtaining a precipitate from the filtrate by means of ammonia and combining said precipitate with the red juice expressed from muscles of fresh unrefrigerated beef, whereby a substance is produced which acts to reduce dextrose.



4. An anti-diabetic substance embodying a principle or hormone derived from the pancreas and a complementary substance obtained from the muscles which when administered either internally or subcutaneously acts in interrelation with the principle or hormone to relieve the diabetic syndrome.

1,626,045. VALVE. ROBERT E. MITTON, Salt Lake City, Utah. Filed Apr. 7, 1926. Serial No. 100,352. 1 Claim. (Cl. 303—54.)

A control valve comprising a cylindrical casing having a centrally extended sleeve flange on each end, and with a valve seat formed on one of said flanges; a cup slidable within one of said sleeve flanges; a valve seat formed on the other of said flanges; an air line connection screwed thereon; a diaphragm secured in said casing, and having a valve seat thereon; a valve stem slidably carried in one of said sleeve flanges, and a valve on each end of said stem.

1,626,046. QUACK-GRASS-ROOT RAKE. EDWIN L. MORGENROTH, Kewaskum, and CHARLES R. MORGENROTH, Milwaukee, Wis. Filed June 11, 1926. Serial No. 115,252. 1 Claim. (Cl. 56—393.)

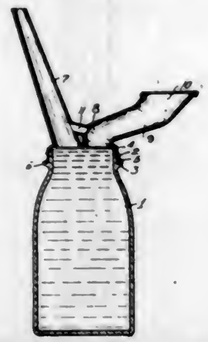
The combination in a machine for raking and gathering quack grass, as well as other noxious weeds, with the roots thereof out of previously plowed ground, of ground wheels supporting a frame, having a seat and draft means on the frame, with respective, lateral support members, attached to said frame; the rod D adjustably supported by and secured to said supports; a teeth lifting bar pivoted to said supports; bearings for supporting the rod R, relative to said frame; the said rod R, having levers in revolvable articulation with said teeth lifting bar; a hand lever, secured to said rod R; sleeves E axially turnable upon said rod D and adapted to engage the butts of a series of the teeth T; the teeth T, the inside edges whereof are concave in contour, and the butts whereof are adapted to be secured to flanges of said sleeves E; spacing clamps H, adapted to be fitted over and secured upon the lower parts of the butts of each such series of said teeth T, and means for connecting each such series of the teeth T with said teeth lifting bar, substantially as described and illustrated.

1,626,047. GAS STOVE. GUILFORD S. MORLEY, University City, Mo., assignor to Majestic Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Dec. 11, 1925. Serial No. 74,694. 2 Claims. (Cl. 158—99.)

1. A gas burner provided with a central air port from which secondary air is discharged, a circular series of gas ports formed around and adjacent to said central air port, means whereby a mixture of gas and primary air is discharged from said gas ports to commingle with the air from said central air port, and a cover having an orifice of a diameter larger than the diameter of said central air port above said air ports and gas ports, a secondary air passage being formed between said cover and the body of the burner to provide for the delivery of additional air to said orifice, and said central air port, gas ports and air passage being in communication with each other at points below said cover.

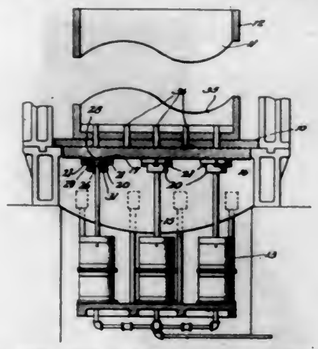
1,626,048. CAR DIAPHRAGM AND METHOD OF FORMING THE SAME. HARRY U. MORTON, Chicago, Ill., assignor to Morton Manufacturing Co., a Corporation of Illinois. Filed Nov. 29, 1926. Serial No. 151,200. 5 Claims. (Cl. 105—18.)

1. A railway car vestibule diaphragm unit constructed of a single strip of material of uniform width cut to a predetermined length and creased and folded transversely intermediate its ends to form a top with inclined top sections terminating in integral legs.



1,626,049. METHOD OF KNITTING HOSIERY. GILBERT MURPHY and WALTER A. SIMOND, Franklin, N. H., assignors to Acme Knitting Machine & Needle Company, Franklin, N. H., a Corporation of New Hampshire. Filed Nov. 21, 1921. Serial No. 516,563. 1 Claim. (Cl. 66—188.)

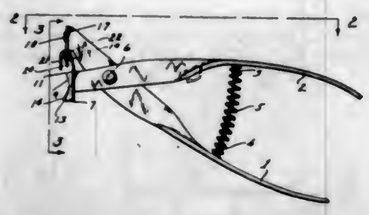
That improvement in the art of knitting seamless stockings which consists in manipulating a circular series of needles and a thread to knit a short section of plain tubular fabric, next knitting a plain toe pocket on a portion of said needles, then knitting a short section of plain circular fabric immediately behind said toe pocket on all of said needles, then introducing an additional set of needles to cooperate with approximately half of the needles of said circular series to knit a ribbed fabric in the upper part of the foot of the stocking while the remaining needles of said series knit a plain fabric in the lower part of said foot, next knitting a



heel pocket, then knitting the leg of the stocking, and, at any desired point in the knitting of the leg, introducing another set of needles to cooperate with all the needles formerly in operation to knit a circular ribbed leg fabric.

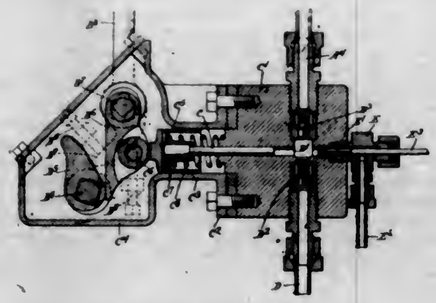
1,626,050. FILLING DEVICE. OSCAR PRATT, Laurier, Wash. Filed Sept. 15, 1926. Serial No. 135,552. 3 Claims. (Cl. 221—28.)

1. The combination with a container and a removable closure cap having a pouring spout, of a filling nozzle fashioned with an elbow, and an upwardly inclined barrel having an angularly funnel shaped end with its inlet edge parallel with the top of the cap.



1,626,051. DIE CUSHION. FREDERICH J. RODE, Chicago, Ill., assignor to Marquette Tool & Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed May 29, 1925. Serial No. 33,612. 12 Claims. (Cl. 113—46.)

1. In a sheet metal drawing press a pressure member, a cushioning device therebelow, means connecting the cushioning device with the pressure member, said connecting means embodying a member having a curved extremity on one end thereof, and resiliently yielding means other than the cushioning device for maintaining the said curved extremity in abutment with the said pressure member, said connecting means permitting the pressure member to tilt with respect to the said cushioning means.

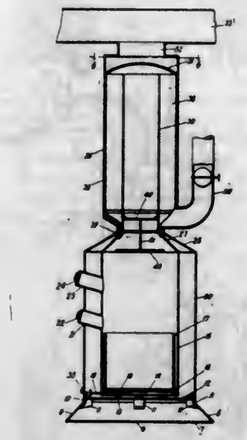


1,626,052. CAN OPENER OF THE NIPPER TYPE. AUGUST C. SCHAEFER, Portland, Oreg. Filed June 11, 1925. Serial No. 36,424. 3 Claims. (Cl. 30—3.)

1. In a can opener of the nipper type in combination with nipper jaws, of a shearing blade mounted to the outer end of the upper jaw, a plate mounted to the outer end of the lower jaw; upper and lower forward projecting lugs formed on said plate, the upper lugs to engage the turned over edge of a can, the lower lugs to engage the side wall of the can; and an inverted U shaped element formed on the upper edge of said plate and having

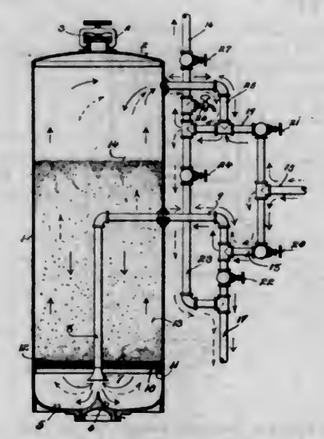
one leg thereof extended forwardly to be positioned over the top of the can and to freely engage the top surface thereof as the shearing blade is withdrawn from engagement with the top of the can.

1,626,053. GOVERNING DEVICE FOR INTERNAL-COMBUSTION MOTORS. PHILIP L. SCOTT, Three Oaks, Mich., assignor to Super Diesel Tractor Corporation, La Porte, Ind., a Corporation of New York. Filed July 5, 1919. Serial No. 308,876. 3 Claims. (Cl. 123—140.)



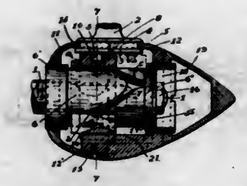
1. In an internal combustion engine a governing apparatus comprising means for beginning the injection of fuel at a fixed point in the engine cycle and for continuing such injection during a part of the cycle which is variable in length in response to variations in the load, said means comprising a fuel pump and an automatic relief valve and mechanical means for freeing said valve to permit its automatic movement in response to pressure in the pump cylinder and governor controlled means for controlling the operation of the relief valve, the operation of the relief valve being independent of the motion of the pump plunger.

1,626,054. HEATING FURNACE OR STOVE. GOTTLIEB STRIFFLER, Chicago, Ill. Filed June 30, 1926. Serial No. 119,603. 2 Claims. (Cl. 126—67.)



1. A stove of the class described having an outer shell and an inner shell, the inner shell forming a duct for the gases of combustion and being provided with corrugations extending lengthwise thereof substantially over the entire length thereof but leaving a smooth middle portion, said middle portion having a reduced diameter, the outer shell forming with the outer corrugations of the inner shell a plurality of ducts for air to be heated and with the smooth middle portion of the inner shell a narrow passage way for said air connecting the upper and lower portions of said plurality of air ducts, and a

pipe fitting snugly into the smooth middle portion of the inner shell, forming a continuation of the lower portion thereof, and forming with the inner corrugations of

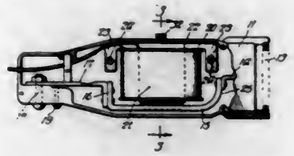


the upper portion of the inner shell a plurality of ducts for the gases of combustion, said ducts communicating with the upper end of said pipe.

1,626,055. WATER SOFTENER. VERNON L. TANNEHILL, Fort Wayne, Ind., assignor to Fort Wayne Engineering and Manufacturing Co., Fort Wayne, Ind. Filed Aug. 9, 1926. Serial No. 128,065. 2 Claims. (Cl. 210—24.)

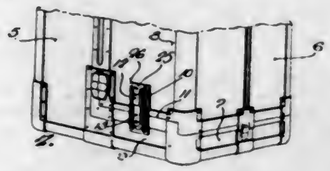
1. A water softener comprising a casing having a bed of zeolites spaced from its bottom a deflector located centrally at the bottom of the casing below the zeolites and having a cusp-like contour, a pipe leading laterally into said casing and passing downwardly centrally thereof and adapted to discharge water over the point of said cusp-like member, whereby said water is uniformly distributed across the bottom of said zeolites and may pass upwardly therethrough, a discharge pipe leading from the upper portion of said casing, means for controlling and reversing the flow of water through said casing, and means for introducing salt into said casing.

1,626,056. PROPELLER. MILTON D. THOMPSON, Fairhaven, Mass. Filed Mar. 14, 1925. Serial No. 15,618. 5 Claims. (Cl. 170—154.)



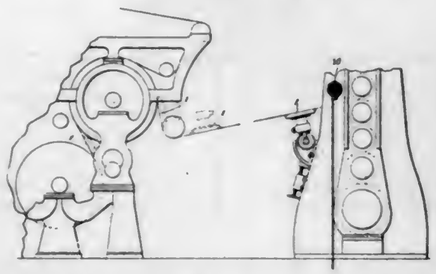
1. In a feathering and reversing propeller, the combination, of a shaft, a hub fixed on said shaft, a pin-way on said hub, starting at the after end thereof and diverging into two pin-ways, one spiralling to the right hand and the other to the left hand, a cam-ring mounted on said hub and adapted to both oscillate and reciprocate thereon, pins on the inner periphery of said cam-ring, adapted to be engaged by said pin-ways, a tranaversely jointed casing, the forward part bearing on an enlarged portion of said hub, bearings equally spaced about the periphery of said casing, propeller blades oscillatively operable in the said bearings and with hubs having circumferential grooves, the collars thus formed being,—the one on the inner and the other on the outer side of said casing, pins eccentrically placed and inwardly disposed on the ends of said propeller hubs, slots on the outer periphery of said cam-ring, their sides adapted to engage said pins in said propeller hubs and means for securing said casing against longitudinal movement on said shaft.

1,626,057. WELL-PRODUCTION APPARATUS. FRED B. VAUGHN, Maywood, and IDRIS THOMAS, Whittier, Calif. Filed Jan. 29, 1925. Serial No. 5,464. 6 Claims. (Cl. 103—232.)



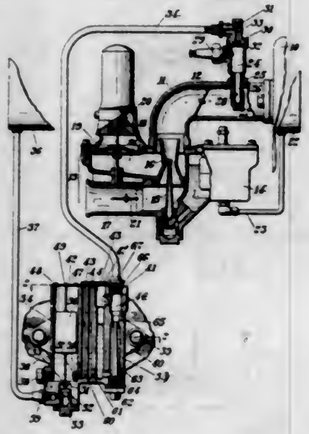
1. A well construction including tubing in the bore of the well, a jet submerged in the liquid in the lower portion of said tubing and adapted for elevation of said liquid by discharge of fluid under pressure through a restricted orifice and into said liquid, and means for adjusting said orifice of the submerged jet by turning said tubing at the top of the well.

1,626,058. SELF-REGULATING DEVICE FOR ELECTROMAGNETIC CLIPPERS. LEO J. WAHL, Sterling, Ill., assignor to Wahl Clipper Corporation, Sterling, Ill., a Corporation of Illinois. Filed Oct. 16, 1925. Serial No. 62,806. 4 Claims. (Cl. 175—338.)



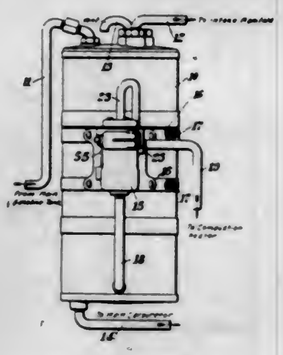
1. In a device of the character described, an electromagnet comprising a coil, a core extending through the same, said core having a relatively large mass of iron at one end thereof and an armature contacting face at the other end thereof and said coil being movable on said core toward and away from said mass thereof, and adjustable means for yieldingly urging said coil away from said mass.

1,626,059. TRUNK FITTING. GEORGE HENRY WHEARY, Racine, Wis., assignor to Wheary Trunk Company, Racine, Wis., a Corporation of Wisconsin. Filed June 18, 1925. Serial No. 37,980. 8 Claims. (Cl. 292—5.)



1. In a device of the character described, the combination with two members adapted to be releasably held in closed position, of a hasp carried by one member and engageable with the other to prevent longitudinal movement between the members; means slidably operated by the hasps to prevent transverse movement between the members, and means positioned upon each member and adapted to fall in alignment when the sections are in closed position to protect the movable elements thereof.

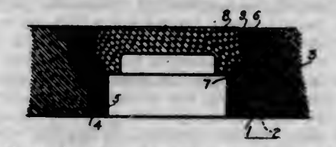
1,626,060. MOISTURE INDICATING AND RECORDING. GEORGE STANFORD WITHAM, Jr., Hudson Falls, N. Y. Filed Jan. 26, 1922. Serial No. 531,863. 17 Claims. (Cl. 73—24.)



1. In paper making machines, a humidity and temperature indicating and recording device including wet and dry bulb elements, and means for moving said elements across and adjacent to a face of the web of paper to indicate and record the humidity and temperature at any desired point along such face.

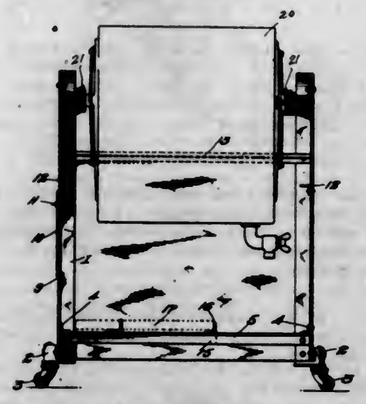
1,626,061. INTERNAL-COMBUSTION ENGINE. LIONEL M. WOOLSON, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 21, 1923. Serial No. 633,595. 8 Claims. (Cl. 123—122.)

1. A method of operating a fuelizer consisting in feeding a rich mixture to the combustion chamber under low suction conditions and a less rich mixture under high suction.



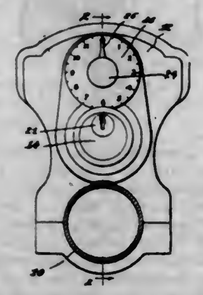
1,626,062. MIXTURE FORMING MEANS FOR INTERNAL-COMBUSTION ENGINES. LIONEL M. WOOLSON, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 21, 1923. Serial No. 633,773. 22 Claims. (Cl. 261—1.)

1. In mixture forming means for internal combustion engines, the combination with a Stewart type vacuum tank, of a carburetor adapted to operate on slightly varying levels and supported with definite relation to the level of said tank, and a check valve connection between the tank and carburetor.



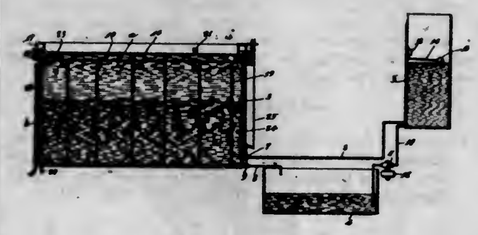
1,626,063. SEPARABLE VAULT-LIGHT LENS FRAME. EMANUEL J. ALFIERES, New York, N. Y. Filed July 3, 1925. Serial No. 41,402. 2 Claims. (Cl. 94—29.)

1. In devices of the character described, a base provided with a flat horizontal part having means for engaging and fixing the said base in concrete, the said base having an opening and a vertical flange bounding the opening, a lens, a lens frame, the said flange extending upwardly to



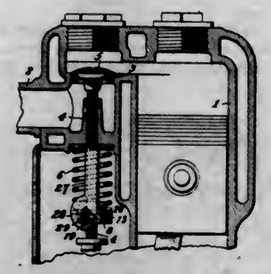
a point above the said base and arranged to support the said frame, and means engaging the flange interiorly adapted to support the lens alone within the said frame.

1,626,064. WASHING MACHINE. ALPHEUS W. ALTORFER, Peoria, Ill., assignor to Altorfer Bros. Company, East Peoria, Ill., a Corporation of Illinois. Original application filed Jan. 18, 1922, Serial No. 530,012. Divided and this application filed Apr. 4, 1925. Serial No. 20,629. 1 Claim. (Cl. 68—2.)



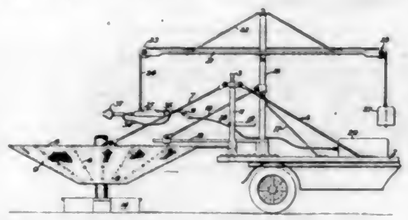
A frame for washing machines, including spaced side members each composed of an integral angle bar bent to form similar spaced supporting legs connected by an inverted substantially V-shaped top part, side panels conformably fitted in the side members, end panels connected to the legs and having their upper edges substantially alined with the upper parts of the legs and cylinder bearings secured to the inner faces of the V-shaped parts of the side panels, the V-shaped parts of the angle bars enclosing and overhanging said bearings.

1,626,065. LOCK MECHANISM. FREDERICK W. ANDREW, Andalusia, Pa., and MILTON TIBBETTS, Detroit, Mich., assignors to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed June 21, 1926. Serial No. 117,248. 17 Claims. (Cl. 70—127.)



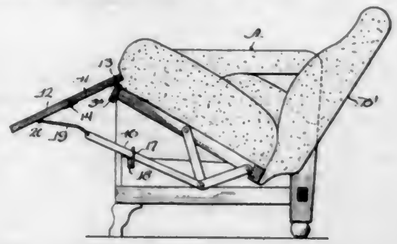
1. In a lock mechanism, the combination with a reciprocating switch element and a locking device therefor, of means for releasing the locking device comprising a reciprocating release element and means to prevent turning the release element when the latter has been reciprocated from its inoperative position towards its releasing position.

1,626,066. STORAGE SYSTEM FOR AND METHOD OF STORING AND REMOVING FROM STORAGE A LIQUID. MAXIMILIAN B. ANFENGER, San Francisco, Calif., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif., a Corporation of Delaware. Filed May 13, 1925. Serial No. 30,076. 4 Claims. (Cl. 221—67.)



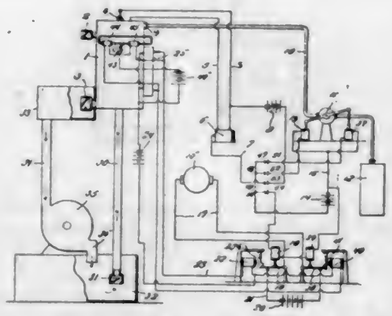
1. A storage system for liquids comprising a tank having a sealed floating roof, a pipe communicating with the upper portion of the tank, valved water supply means connected with the lower portion of the tank, valved water drain means connected with the lower portion of the tank, means operated by raising of the roof to a predetermined level to open the water drain valve and operated by falling of the roof to a predetermined level to close the water drain valve, and means operated by falling of the roof to a predetermined level to open the water supply valve and operated by raising of the roof to a predetermined level to close the water supply valve.

1,626,067. VALVE-ROTATING MECHANISM. MARCUS O. ANTHONY, New York, N. Y., assignor to Continental Engineering Corporation, Omaha, Nebr., a Corporation. Filed June 23, 1920. Serial No. 391,206. 6 Claims. (Cl. 123—90.)



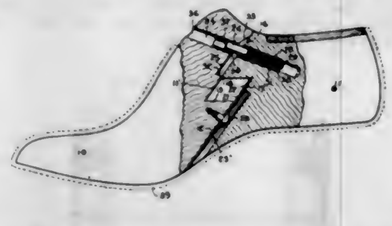
1. The combination with a poppet valve, its seat and spring, a rotator for said valve comprising a flanged body affixed to the valve and having therein a peripheral toothed member, a ring surrounding the toothed member, a ball clutch between said ring and the toothed body, a cap having a rotative interlocking engagement with the flanged body for holding the peripheral toothed member, the ring and the ball clutch in assembled relation, and means for actuating the ring during the operation of said valve.

1,626,068. APPARATUS FOR HARVESTING FRUIT. HAROLD W. BARTLETT, Alvarado, Calif. Filed Nov. 19, 1923. Serial No. 675,487. 12 Claims. (Cl. 56—328.)



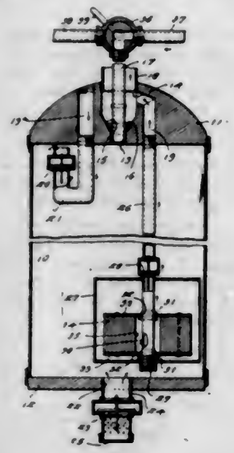
1. In an apparatus for harvesting fruit from a tree, means for shaking the tree, and adjustable means for supporting the weight of the shaking means.

1,626,069. RECLINING CHAIR. ALEXANDER C. BEECH, Chicago, Ill., assignor to Kroehler Mfg. Co., Naperville, Ill., a Corporation of Illinois. Filed Nov. 5, 1925. Serial No. 66,899. 10 Claims. (Cl. 155—171.)



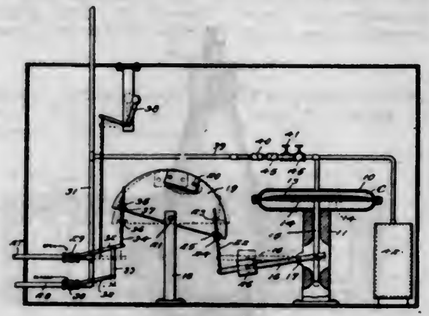
1. A reclining chair comprising a chair frame, a seat supported in said frame by means of trunnions located above said seat and comprising curvilinear bearing members, concentric with the axis of said trunnions and of a radius to exert a predetermined degree of frictional resistance against the movement of said seat on said trunnions, a leg rest hinged to said seat portion, and means operating automatically in the tilting of said seat to swing said leg rest to a predetermined position.

1,626,070. VACUUM PUMP AND POWER PLANT. EDWARD BOND and FREDERICK W. H. BOND, Vancouver, Wash. Filed Jan. 13, 1925. Serial No. 2,099. 4 Claims. (Cl. 103—231.)



1. In a structure of the class described, a tank in which a predetermined quantity of explosive mixture is adapted to be contained, said tank being provided with a valved discharge and at its top with an electrically operated pressure release valve, a cylinder on one side of the tank in communication therewith, successively operable contact means for the upper and lower ends of said cylinder, electrically operated valve means for controlling the mixture delivered to the tank, and a float operable in said cylinder for acting on the contact for closing electric circuits, one of said electric circuits including the electrically operated pressure release valve and the other electric circuit including the electrically operated valved means.

1,626,071. SHOE LAST. PASQUALE BORDA, New York, N. Y. Filed Jan. 15, 1925. Serial No. 2,677. 8 Claims. (Cl. 12—135.)



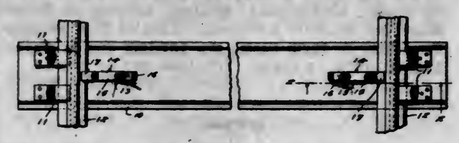
1. A last divided along substantially a downward and forward interrupted diagonal line near the arch, into a fore portion and a heel portion, the interruptions forming abutments which limit the contracting movement of said portions.

1,626,072. PUMP. SANFORD C. BRADY, Bartlesville, Okla. Filed July 31, 1926. Serial No. 126,214. 4 Claims. (Cl. 103—234.)

1. In a fluid pressure pump, a barrel having check-valved inlets, an outlet for the barrel, a conduit within the barrel communicating with the outlet and having its lower end sealed, the side wall of the conduit having an opening, the conduit being provided above and below the opening with valves, a float surrounding the conduit and having valve seats for coaction with said valves to thereby seal the opening when the float is lowered to a predetermined degree and means for alternately connecting the interior of the barrel with a source of fluid under pressure and with the atmosphere.

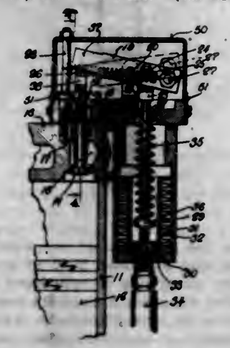
1,626,073. PRESSURE-CONTROL DEVICE. SANFORD C. BRADY, Bartlesville, Okla. Filed Sept. 9, 1926. Serial No. 134,566. 6 Claims. (Cl. 50—10.)

1. In combination with a conduit, intake and exhaust valves connected therewith, a connection between the valves whereby they are simultaneously and oppositely actuated including a lever, a further lever being connected with the first named lever, a weight associated with the last named lever and adapted to maintain the same in either of two positions and upon a predetermined movement of the lever from either of said positions toward the other of said positions, continuing such movement until the other of such positions is reached, pressure actuated means for shifting said lever from one toward the other of said positions, weight operated means for shifting the lever from said other toward the first named position, and a connection between the pressure actuated means and said conduit.



1,626,074. GLASS PARTITION FOR CLOSED AUTOMOBILE BODIES. WILLIAM BREWSTER, New York, N. Y. Filed Oct. 25, 1926. Serial No. 143,847. 5 Claims. (Cl. 296—85.)

1. A removable glass partition for closed automobile bodies, comprising a central glass adapted to be normally housed within a vertical pocket in the back of the front seat and having channels secured to its side edges, and side glasses hinged to the automobile body at each side of the central glass and adapted when closed to present their free edges in alinement with said channels, whereby when the central glass is raised said channels will travel along said edges, and a glass partition be thereby provided.



1,626,075. RAILWAY TIE AND RAIL FASTENER. JAMES F. BROWN, Lookout, Ky., assignor of one-half to J. E. Belcher, Lookout, Ky. Filed Mar. 8, 1926. Serial No. 93,202. 1 Claim. (Cl. 238—10.)

A rail clamp comprising a tie having means for engaging the flange of a rail supported on the tie, and a reversible retaining plate mounted on the tie and having one end extended away from the tie at an angle for engagement on the flange of said rail, and having its other end extended away from the tie at a greater angle than the first-named end for engagement with the base of a

jumper rail whereby to maintain said jumper rail in a canted position on the tie and first rail and in wedged relation to said first rail.

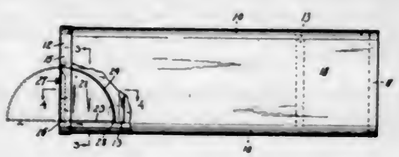
1,626,076. COMPRESSOR GOVERNOR. NIELS A. CHRISTENSEN, Milwaukee, Wis. Filed Apr. 18, 1924. Serial No. 707,586. 7 Claims. (Cl. 230—24.)

1. In a compressor control, the combination with a compressor and the pressure system supplied thereby, said compressor having a valve controlling passage of air to atmosphere, of a pair of spring-pressed latches engageable with each other to hold said valve open, of hammer means free of said latches and responsive to pressure changes in said system for moving one of said latches to cause their locking engagement to hold said valve open when the pressure in said system rises above the desired maximum value and for moving the other of said latches to release them from valve-holding position when the pressure in the system drops below the desired minimum value.

1,626,077. SAFETY DEVICE. CHARLES H. GAGE, Washington, D. C. Filed Apr. 15, 1925. Serial No. 23,364. 4 Claims. (Cl. 89—1.)

3. In a gate construction, a track, a gate to travel longitudinally of the track, wheels supporting the gate and traveling upon the track, a plow carried by the gate to remove ice and the like from the track, and a brush arranged beneath the plow to sweep the track after it has been cleared by the plow.

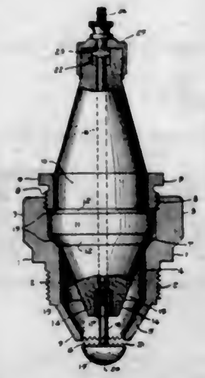
1,626,078. SAFETY PAPER. JOHN GENOESE, San Francisco, Calif. Filed Nov. 22, 1924. Serial No. 751,683. 2 Claims. (Cl. 91—67.95.)



1. A safety paper comprising a sheet of paper treated with a mixture containing sodium bromide, and with a mixture of zinc sulphate, nickel chloride and iodine.

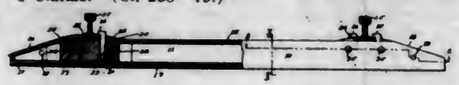
1,626,079. SUPPOSITORY AND MEANS FOR INSERTION OF THE SAME. HENRI CLÉMENT LAMBERT GOUONARD, Ahin-lez-Huy, Belgium, assignor to Societe Belge des Produits Rationnels, Ahin-lez-Huy, Belgium. Filed May 8, 1926. Serial No. 107,723, and in France May 22, 1925. 1 Claim. (Cl. 128—271.)

A device for the insertion of suppositories having a cylindrical body and a pointed head of greater diameter than said body, comprising a cylindrical rigid part of uniform diameter and smooth upon its whole length and adapted to receive the cylindrical body of the suppository, the outer diameter of said cylindrical part being such that the head of the suppository projects beyond the outer wall of said cylindrical part and covers the front edge thereof and a piston slidably mounted in the latter.



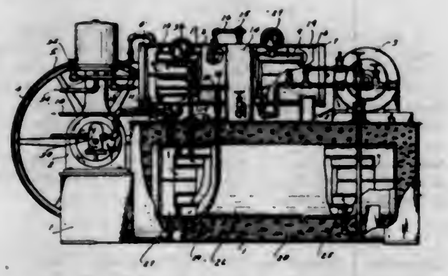
1,626,080. FABRIC-ROLL HOLDER. GEORGE GRAHAM and ADOLPH C. HELMUS, Douglaston, N. Y. Filed Feb. 10, 1926. Serial No. 87,365. 2 Claims. (Cl. 206—50.)

1. A cloth form comprising an oblong casing-shaped frame provided in one of its end walls with an opening a drawer adapted to be inserted through said opening into said frame including a bottom from which rises a flat front wall, a flat side wall extending at right angles to said flat front wall, and an arc-shaped side wall connecting said flat front wall and said flat side wall, a pivot pin extending through said drawer into said casing-shaped frame, said pivot pin being disposed at the junction point of said flat front wall and said flat side wall adjacent to the opening in said casing-shaped frame, said drawer being adapted to be swung around said pivot pin and thereby adapted to be inserted into and to be withdrawn from said frame.



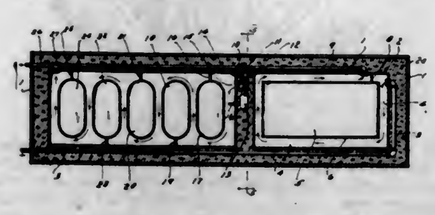
1,626,081. SPARK PLUG. GEORGE HADAICH, Detroit, Mich. Filed July 21, 1921. Serial No. 486,319. 1 Claim. (Cl. 123—169.)

In a spark plug, an insulator, an electrode rod axially of said insulator, a resistance head having an upwardly extending annular rim on the outer end of said electrode rod and set in said insulator, a cap on said insulator, a terminal in said cap, and a resistance head having a



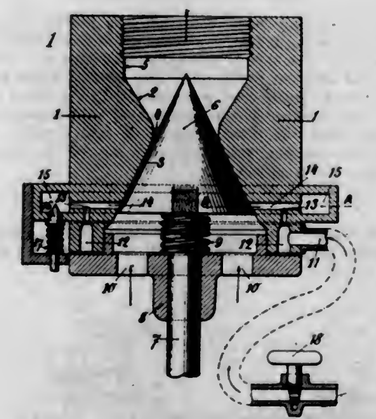
downwardly extending annular rim in said insulator opposed to the first mentioned head and retained against said cap by said terminal.

1,626,082. RAILWAY TIE. WILLIAM R. HALFERTY, Ollie, Iowa. Filed Dec. 14, 1926. Serial No. 154,762. 8 Claims. (Cl. 238—79.)



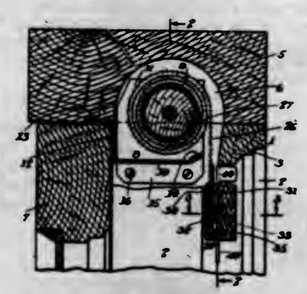
1. In combination with a hollow metallic tie having openings in the top member, a saddle block mounted in each opening having its lower edge resting on the inner surface of the bottom of said tie with its upper edge slightly above the upper surface of said tie, the top of said saddle block being formed with a rail receiving groove, each side of said saddle block being provided with a spike receiving groove, spikes for said grooves, and locking pins for securing said spikes in said spike receiving grooves and the saddle blocks in said tie.

1,626,083. BRINE-UNIT-TYPE REFRIGERATING MACHINE. HENRY E. HARRIS, Portland, Oreg. Filed Mar. 30, 1925. Serial No. 19,397. 3 Claims. (Cl. 62—115.)



1. In a unit type refrigerating machine, a main frame, a compressor and a prime mover mounted upon said frame, a cylindrical condensing chamber mounted upon said frame and adapted to having a condensing liquid passed therethrough, a cylindrical condensing chamber tank disposed within said condensing chamber and concentrical therewith; a cylindrical expansion chamber disposed within the frame, insulation material disposed thereabout; a cylindrical expansion tank disposed within said expansion chamber and concentrical therewith; and a piping circuit to properly connect the condensing chamber tank and the expansion tank to said compressor.

1,626,084. COOLING BOX. HENRY E. HARRIS, Portland, Oreg. Filed Mar. 30, 1925. Serial No. 19,398. 5 Claims. (Cl. 62—101.)



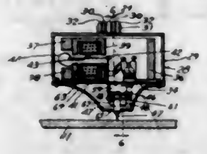
1. A cooling box comprising an insulated frame structure, vats disposed therein, one of said vats having a plurality of compartments therein, vertical baffle partitions connecting the walls of alternate compartments with the walls of the vat to form a circuitous channel for the circulation of a cooling and refrigerating medium between and around said compartments, and a piping system to carry the cooling and refrigerating medium to and from said vats.

1,626,085. CARBURETOR. LOUIS HENRIOT, Paris, France. Filed Mar. 13, 1924, Serial No. 698,966, and in France Mar. 19, 1923. 1 Claim. (Cl. 261—40.)

In a carburetor for internal combustion engines, the combination of a hollow body adapted to be connected with the intake manifold of the engine and in which is provided an air central duct having a tapered part whose opening, of the smallest diameter, is located on the side of the manifold of the engine, a tapered valve adapted to fit in and close the said tapered part of the duct and the top of which is also orientated towards the manifold of the engine, an annular fuel chamber provided in the wall of the said hollow body and arranged concentrically to the said central duct, the said hollow body having provided in its wall auxiliary air inlet ducts communicating, on the one hand with the free air and discharging, on the other hand, into the said central duct at points situated in a circle near the opening of the largest diameter of the said central tapered duct and spray nozzles starting from the said fuel chamber and ending into the said ducts.

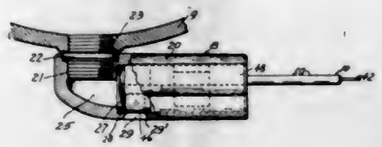
1,626,086. ROLLER SCREEN. FRANK D. HOBBS and CLARENCE HOBBS, Los Angeles, Calif. Filed Jan. 11, 1926. Serial No. 80,676. 3 Claims. (Cl. 156—39.)

1. In a screen roller, a mounting comprising a bottom wall, end walls, a rear wall, and a rear flange extending from the upper edge of said rear wall, the mounting being fitted in a groove cut in the under side of the jamb header of a window frame with said rear wall resting in front of the window sash, said rear flange resting against the under side of the jamb head over said sash, and said end walls resting against the side jamb members of the frame, means for securing the end walls of the mounting to the side jamb members, a roller mounted in said mounting, a screen secured and wound on said roller to be drawn down in front of the window frame, and means for holding the screen drawn down.



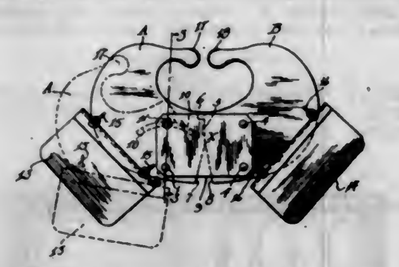
1,626,087. FLUID OPERATED PERCUSSIVE TOOL. CHARLES A. HULTQUIST, Los Angeles, Calif. Filed Apr. 23, 1925. Serial No. 25,252. 7 Claims. (Cl. 121—18.)

1. In a fluid operated percussive tool, a cylinder having a relatively large forward bore and a relatively small rearward bore, a hammer provided with a head reciprocably mounted in the forward bore and a shank reciprocably mounted in the rearward bore, fluid conducting means to maintain constant pressure on the face of the shank, an exhaust port communicating with the large cylinder bore so positioned as to be automatically controlled by the head of the hammer, a valve bore, a valve in the bore for controlling the flow of fluid to the forward



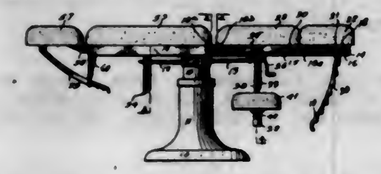
end of the large cylinder bore, a supply port from the small cylinder bore to the valve bore, a delivery port from the valve bore to the forward end of the large cylinder bore, a counter-bore in the rearward end of the delivery port, a reduced portion on the forward end of the valve adapted to enter the counter-bore, for the purpose of severing communication from the supply port and delivery port, a pressure shoulder on the valve for receiving intermittent pressure for moving the valve rearwardly and provided with a shank on the rearward end of the valve adapted to receive constant pressure on the face of the valve shank for moving the valve forwardly and means for maintaining constant pressure on the face of the valve shank.

1,626,088. APPARATUS FOR SOUND REPRODUCTIONS. JOHN J. JAKOSKY, Los Angeles, Calif., assignor to International Precipitation Company, Los Angeles, Calif., a Corporation of California. Filed Apr. 15, 1926. Serial No. 102,100. 6 Claims. (Cl. 179—100.1.)



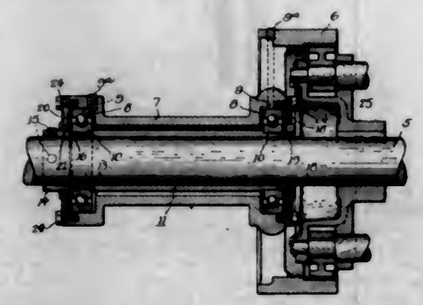
1. In apparatus for sound reproduction, a transmitting device, comprising a rocking member provided with means for carrying a phonograph needle, means supporting said rocking member so as to permit rocking movement thereof about one effective axis only, armature means mounted to vibrate, and flexible link means connecting said rocking member to said armature means in such manner as to transmit to said armature means rocking movement of said rocking member about said effective axis, and electromagnetic means associated with said armature means and adapted to produce current impulses corresponding to the movements of said armature means.

1,626,089. DRAIN DEVICE. JOHN J. JAKOSKY, Los Angeles, Calif. Filed July 14, 1926. Serial No. 122,365. 6 Claims. (Cl. 251—137.)



1. A drain device for liquid receptacles comprising, in combination with a receptacle having an opening in its wall, a drain member comprising a casing one of whose dimensions is materially less than either of its other two dimensions, said casing having a liquid passage therein, a valve seat in said liquid passage, a valve member movable in a direction perpendicular to said least dimension into and out of engagement with said valve seat, means for operating said valve member, means connecting said drain member to said receptacle with said least dimension of the drain member perpendicular to the wall of the receptacle, means establishing communication between said liquid passage at one side of said valve seat and said opening in the wall of the receptacle, and an opening in said casing establishing communication between said liquid passage at the other side of said valve seat and the outer air.

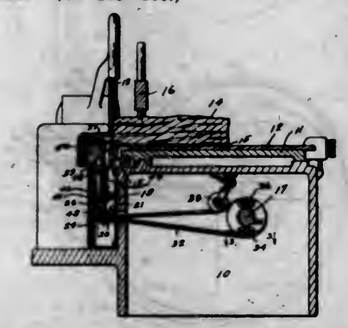
1,626,090. CALF WEANER. GEORGE MICHAEL KRAUSS, Lingle, Wyo. Filed Feb. 8, 1926. Serial No. 86,885. 2 Claims. (Cl. 119—132.)



1. A calf weaner comprising a body portion consisting of two identical parts, guide members securing said parts together, one of said parts being pivotally secured to said guide members and having an arcuate-shaped slot therein, and means disposed in said slot for securing said part in adjusted position.

1,626,091. OSTEOPATHIC OPERATING TABLE. JESSE W. MACKLIN, Anita, Iowa. Filed Feb. 7, 1924. Serial No. 691,155. 13 Claims. (Cl. 45—50.)

1. An operating table comprising a horizontally arranged supporting frame, a number of cushions supported thereon, one of which is pivotally connected on a horizontal axis adjacent to the outer edge of said frame member adapted to swing from a horizontal to a vertical position, a seat member located outside of said frame member and below the pivot member of said cushion, and means for supporting said cushion in any of its swinging positions of movement.



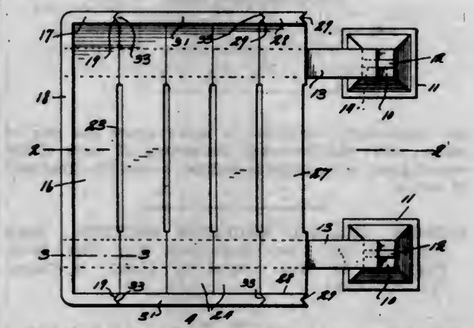
1,626,092. BALL-BEARING MOUNTING. ALBERT MASTER, Park Ridge, Ill. Filed Dec. 13, 1923. Serial No. 680,299. 1 Claim. (Cl. 308—189.)

A ball bearing mounting comprising, in combination, a pulley or the like to be mounted rotatably upon a shaft, a hub for the pulley, a sleeve within said hub having its end portions reduced in diameter, inner ball races mounted on said ends, outer ball races secured within the hub in proper relation to the inner races, a single collar

adapted to be mounted on the shaft adjacent one end of the sleeve, a dovetail lug on the collar extending into a dovetail recess in the end of the sleeve, and means to secure said collar to the shaft.

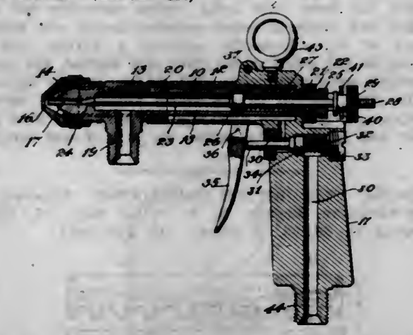
1,626,093. RINER ATTACHMENT FOR MEAT-SLICING MACHINES. JOHN W. NEASHAM, Des Moines, Iowa. Filed Feb. 25, 1924. Serial No. 695,081. 7 Claims. (Cl. 146—100.)

1. A meat riner comprising a support, a shaft rotatively and slidably mounted in said support, a cutter on said shaft, a bar slidably mounted in said support in parallel relation with said shaft, a guide plate on one end of said bar spaced a slight distance from one face of said cutter plate, means for rotating said shaft, and means for yieldably moving said bar and said rotary shaft longitudinally in one direction.



1,626,094. TOP ADJUSTABLE BANJO TAILPIECE. ROBERT B. PAGE, New York, N. Y. Filed May 4, 1923. Serial No. 636,600. 6 Claims. (Cl. 84—300.)

1. In a tail piece for musical instruments having strings, in combination, a base portion secured to the instrument, a pivotally supported covering member spring maintained in uncovering position and movable to covering position and when so moved extending over the base portion and engaging the strings of the instrument for tensioning the strings, and means including rotatably movable means cooperating between the covering member and base portion for retaining the covering member in covering position and releasable for permitting spring actuated movement of the covering member to uncovering position.

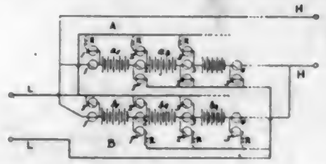


1,626,095. SECTIONAL FLORIST BENCH. GEORGE SUEL RAMSBURG, Somersworth, N. H. Filed May 11, 1926. Serial No. 108,362. 6 Claims. (Cl. 47—18.)

3. A florist's bench of the character described formed of reenforced concrete and consisting of a plurality of separate units or sections, the bench comprising portable posts, stringers adapted to rest upon the posts and having interlocking engagement therewith, an end section having a front wall and end walls adapted to have interlocking engagement with the stringers, a second section having end walls and formed to have interlocking engagement with the stringers, a plurality of body sections intermediate the first and second named sections each interlocking with the stringers, and removable walls disposed between the first and second-named sections, all of said sections being formed upon their confronting edge faces to provide drainage openings.

6. A florist's bench having a bottom and side and end walls and formed of interlocking sections of concrete, stringers of concrete having interlocking engagement with the under faces of said sections, the ends of said stringers being longitudinally grooved, the grooves opening upon the ends of the stringers, and posts having upwardly extending tongues engageable in the grooves in the stringers.

1,626,096. SPRAY GUN. CARL L. REICHENBACH, Yonkers, N. Y., assignor to Eclipse Air Brush Company, Newark, N. J. Filed Aug. 14, 1925. Serial No. 50,192. 4 Claims. (Cl. 91—45.)

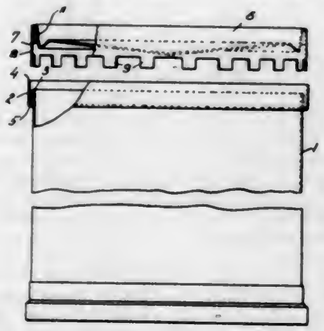


1. A spray gun comprising a barrel, a sleeve insertible in the barrel from the front, and extending therethrough, means at the back of the sleeve for locking it in place, and a stem insertible into the sleeve from the back, the sleeve having a seat against which the end of the stem can close, a nozzle on the front of the sleeve, the sleeve having passages to convey air to the nozzle, and a trigger for operating the stem.

1,626,097. ARRANGEMENT FOR TRANSFORMING DIRECT-CURRENT VOLTAGE. SAKUHEI SAITKAWA, Higashinojiri-Mura, Japan. Filed Apr. 23, 1924. Serial No. 708,469. 5 Claims. (Cl. 171—97.)

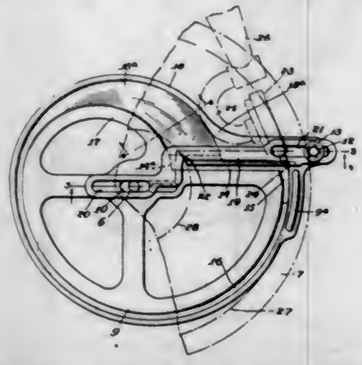
1. In apparatus for transforming the voltage of a direct current, comprising in combination two groups of storage batteries, a pair of mains supplying the voltage to be transformed and another pair to receive the transformed voltage, conductors by which each group of batteries may be connected either in series or in multiple

across one pair of mains, electrically operable automatic switches to control the current in the conductors, and an automatic device for collectively operating the switches in such manner that all units of one group of batteries



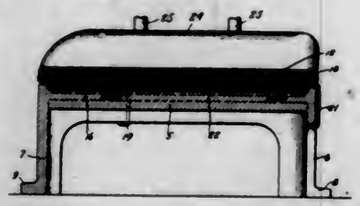
are momentarily connected in series across one pair of mains, while simultaneously connecting all units of the second group of batteries in multiple across the other pair of mains.

1,626,098. ROLLING RADIATOR SHUTTER. ADAM SCHEPPER and PAUL SCHROEDER, Bay City, Mich. Filed Mar. 11, 1925. Serial No. 14,627. 2 Claims. (Cl. 257—132.)



1. A rolling radiator shutter for automobiles comprising a sheet metal frame having an enlarged central opening, the edges of the frame being turned to form guides, the lower ends being curved outwardly and enlarged and having a roller mounted therein and spaced ahead of the automobile radiator, a flexible curtain wound on the roller at the front side thereof, the edges of which curtain travel in said guides, and an inclined drain strip secured to the frame adjacent the curved portion and extending upwardly and forwardly over the roller and frictionally engaging the back of said curtain.

1,626,099. CLOSURE FOR CONTAINERS. WILLIAM F. SCHWEIGERT, Buffalo, N. Y. Filed Sept. 17, 1925. Serial No. 56,893. 1 Claim. (Cl. 220—59.)

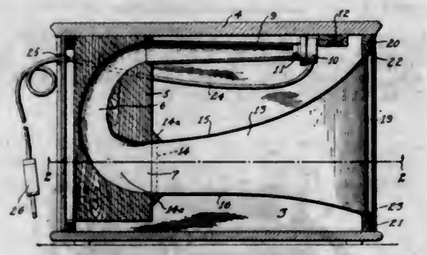


In a container having separable body and cover members, the combination of a double bend in the wall of the body at its top forming inner and outer top edges and an intermediate open annular groove, spaced slots in the bottom of the groove, an inverted annular groove on the periphery of the cover which embraces the inner top edge of the body when the cover is in position, tongues depending from the outer wall or flange of the cover extending through the slots in the bottom of the body groove and packing at the bottom of the groove on the cover.

1,626,100. ADJUSTABLE PHONOGRAPH REPEATER. HARRY SEIGMAN, New York, N. Y. Filed May 3, 1923. Serial No. 636,281. 5 Claims. (Cl. 274—15.)

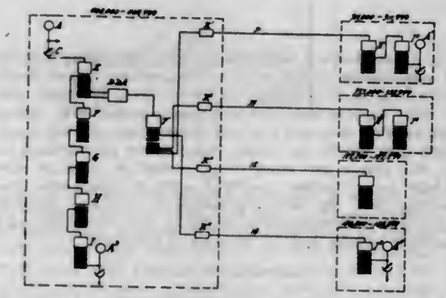
1. An adjustable phonograph repeater comprising a snail frame provided with an opening for receiving a stylus and further provided with a slot for receiving the center pin of a turntable, so that with said snail frame resting upon said turntable the snail frame is adjustable bodily in relation to the turntable within limits permitted by the length of said last mentioned slot, a slide mounted upon said snail frame and provided with a portion normally overhanging said opening in the snail frame and serving as a guide for the stylus, and means controllable by the operator for adjusting said slide into different positions relatively to said snail frame.

1,626,101. REST FOR SADIRON. HARRY SEIGMAN, New York, N. Y. Filed Apr. 27, 1925. Serial No. 25,997. 2 Claims. (Cl. 68—27.)



1. A device of the character described comprising a stand provided with ribs spaced apart, a board of fireproof material provided with channels spaced to register with said ribs, a netting mounted upon said board and provided with corrugations extending into said channels for registering with said ribs, and means for supporting said board adjacent said stand and in spaced relation thereto.

1,626,102. LOUD SPEAKING WIRELESS AMPLIFIER. JOSEPH RALPH SHOWERS, Shelbyville, Ind. Filed Apr. 24, 1922. Serial No. 556,203. 6 Claims. (Cl. 181—27.)

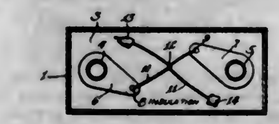


5. In a loud speaking wireless amplifier, a wooden sound conduit free of movable parts and comprising a tapering thick-walled tube, a block having a reversely bent passage therein to the smaller end of which the larger end of

said tube is rigidly secured, the passage in said block being circular at one end and gradually increasing in diameter and changing to rectangular shape at its larger end, a horn portion rigidly secured to said larger end,

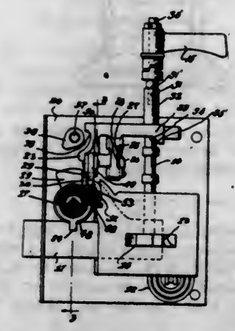
said horn portion having opposed resonating walls, and means to hold said block at one point to permit free vibration of said tube, the small end of said tube being constructed to receive and hold a wireless receiver.

1,626,103. AUTOMATIC TELEPHONE SYSTEM. GEORGE H. SIMMONS, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Aug. 25, 1922, Serial No. 584,171. Renewed Sept. 18, 1926. 14 Claims. (Cl. 179—18.)



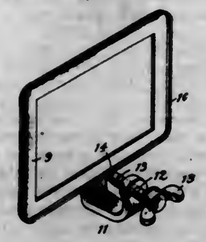
5. In a telephone system, a digit absorber, two paths over which said digit absorber may be taken for use, and discriminating means for causing said digit absorber to absorb a varying number of digits depending on the path in use.

1,626,104. METAL-COATED ELECTRODE. ERNEST L. SWIFT, Oakland, Calif., assignor to Virginia Swift, Oakland, Calif. Filed Feb. 21, 1922. Serial No. 538,888. 2 Claims. (Cl. 176—135.)



1. An electrode comprising a carbon consisting of carbon and a binder, a mineral acid and a halogen salt, said electrode being coated with metal in any suitable manner.

1,626,105. LOW-CAPACITY FUSE. EDWARD V. SUNDT, Chicago, Ill. Filed Feb. 8, 1926. Serial No. 86,878. 1 Claim. (Cl. 200—128.)

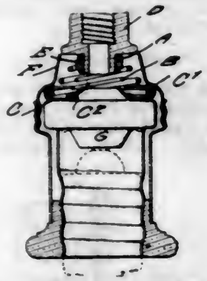


A low-capacity fuse comprising a casing, insulating members disposed in said casing, eyelets connecting said members together, lugs carried by said eyelets and being disposed between said insulating members, a fusible wire connected to one of said lugs, a high-resistant wire connected to the other lug, said wires contacting with each other and having their free ends secured to said insulating members, and terminals passed through said casing and through said eyelets.

1,626,106. LOCK MECHANISM. MILTON TIBBETTS, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed June 19, 1926. Serial No. 117,097. 20 Claims. (Cl. 70—18.)

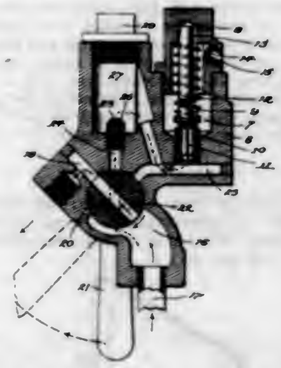
1. In a lock mechanism, the combination with a locking member, of means for releasing said member comprising an element adapted to be rotated and reciprocated, a device on said element adapted to release said member when said element is reciprocated with said device in a certain predetermined position, and means for preventing rotation of said element after said element has been started on its reciprocating movement to release the member.

1,626,107. DEVICE FOR HOLDING REGISTRATION CARDS ON AUTOMOBILES. PETER M. ULLRICH, Waverly, Iowa. Filed May 7, 1925. Serial No. 28,617. 2 Claims. (Cl. 40—10.)



1. A device of the character described, adapted for positioning a card upon a support, including an open front frame having a flange adapted to extend around the edge of the card and engage the face of the support for clamping the card between the frame and support, a bracket associated with the frame and adapted to extend beneath the edge of the support, and means carried by the bracket and engageable with the support for detachably connecting the frame thereto.

1,626,108. SHOCK-ABSORBING SOCKET FOR ELECTRIC FILAMENT LAMPS. PIERRE VAN BOMMEL Antwerp, Belgium. Filed Mar. 15, 1923, Serial No. 625,334, and in Belgium Mar. 22, 1922. 3 Claims. (Cl. 240—90.)

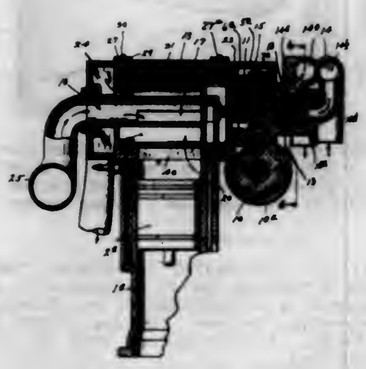


1. A shock absorbing socket having a nipple and a socket proper, an extension spring secured to the socket

in coil form and terminally connected to the nipple and to the socket proper, and a compression spring in coil form and bearing between the socket and nipple proper,

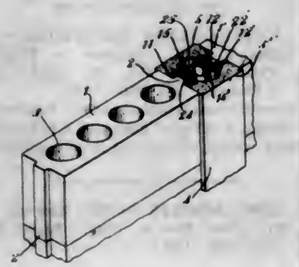
the tensions of these respective springs in their effect on the nipple and socket proper being in opposition and balanced under normal conditions.

1,626,109. PRESSURE-RETAINING VALVE. ELIHU FRANCIS WENTWORTH, East Orange, and NORMAN WILLIAM LYON, Caldwell, N. J., assignors to The New York Air Brake Company, a Corporation of New Jersey. Filed Mar. 11, 1926. Serial No. 94,034. 4 Claims. (Cl. 303—79.)



4. In a brake retainer, the combination of a loaded valve, arranged to be urged in an opening direction by the pressure of brake cylinder exhaust; a constriction located in the flow path beyond said valve and arranged to limit the flow to a rate less than the maximum capacity of the valve; a second and smaller constriction located in the flow path in advance of said valve; and means operable to direct the flow to the valve alternatively through the last named constriction to the valves, or directly to the valve.

1,626,110. GASKET. CLAUDE B. BAILEY, WILLIAM W. MCCORD, and CHARLES WILKINS, Wyandotte, Mich., assignors, by mesne assignments, to McCord Radiator & Mfg. Co., Detroit, Mich., a Corporation of Maine. Filed Feb. 15, 1923. Serial No. 619,121. 8 Claims. (Cl. 288—1.)

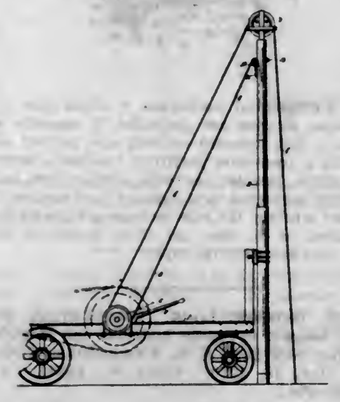


2. A gasket, comprising a body portion of outer layers of sheet metal and an interposed layer of asbestos or like material, said layers having a row of registering port holes therein spaced apart lengthwise of the gasket, tubular guide members formed from sheet metal and carried by the gasket body about said holes, said guide members projecting outward from the gasket body to one side thereof and having double flanges for reinforcement against bending.

1,626,111. FLUID-COOLED ROTARY VALVE FOR INTERNAL-COMBUSTION ENGINES. REUBEN F. BARKER, Portland, Oreg. Filed Feb. 5, 1925. Serial No. 7,054. 14 Claims. (Cl. 123—177.)

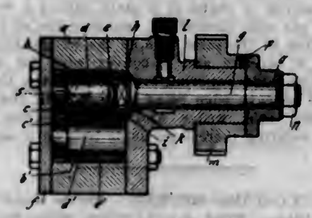
1. In an internal combustion engine comprising a series of compression cylinders, an independent rotary valve controlling each cylinder, the valves being arranged side by side, each of said valves being provided with intake and exhaust passageways, and intake and exhaust manifolds with which the intake and exhaust passageways of all the valves are respectively connected, each of said valves being further provided with a passageway for cooling fluid, the latter passageway extending parallel with said gas passageways, doubling back, admitting and emitting cooling fluid at one end of said valve.

1,626,112. BUILDING CONSTRUCTION. ALBERT F. BEMIS, Newton, Mass., assignor to Bemis Industries, Inc., Boston, Mass., a Corporation of Delaware. Filed June 13, 1925. Serial No. 36,851. 8 Claims. (Cl. 72—16.)



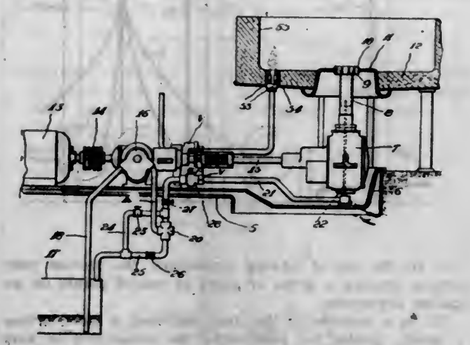
7. A structural column for walls of buildings and the like, comprising complementary sections, means for drawing said sections toward each other to provide recesses therebetween to receive projecting elements upon adjacent portions of the wall with which it may be associated, whereby the sections may clamp the projections therebetween.

1,626,113. MANUFACTURE OF STENCILS FOR DUPLICATING APPARATUS. PAUL CAMPION, Vitry-sur-Seine, France, assignor to A. B. Dick Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 15, 1923, Serial No. 668,768, and in Belgium Jan. 4, 1923. 7 Claims. (Cl. 41—38.6.)



1. A stencil sheet having a porous base, such as yoshino, provided with a type-impressible coating including cellulose nitrate, oil, and a glycerol fatty acid ester.

1,626,114. WEIGHT ELEVATOR FOR PULLING MACHINES. LEROY CHAMBERLAIN, Wichita Falls, Tex. Filed Apr. 22, 1926. Serial No. 103,871. 5 Claims. (Cl. 254—178.)



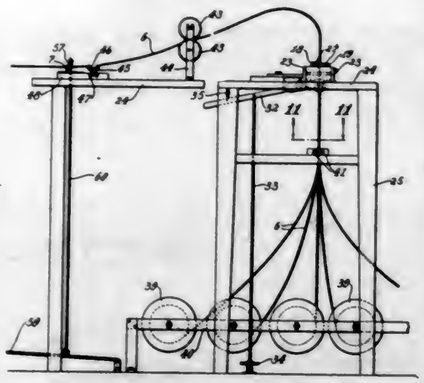
1. In a pulling and drilling machine; a weight elevator comprising in combination with a hollow tubular mast and a pair of drums, a pulley mounted near the top of said mast, a line wound about one of said drums and passing about said pulley a weight supported by said line interiorly of the mast; a second line wound in a reverse manner about the other of said drums and passing over a pulley on the top of said mast; means for holding said drums against rotation, and means for releasing said holding means to permit the said weight to be lowered within the mast to elevate a body engaged by said second line.

1,626,115. ROTARY PUMP. FRITZ EGERSDÖRFER, Charlottenburg, Germany. Filed June 2, 1925, Serial No. 34,304, and in Germany Oct. 2, 1922. 6 Claims. (Cl. 103—126.)

1. A pump comprising a solid block formed with two parallel bores bounding each other and respectively having equal diameters throughout the length of said block, interengaging gear wheels having their adjoining end faces flush with each other and having projecting shafts, said gear wheels and shafts being disposed within said bores, bushings filling out the spaces between said shafts and the walls of said bores and engaging, with their inner end faces, the end faces of said gear wheels to the circumferences thereof, and means separate from said block for closing said bores at the ends opposite to said bushings, said means being in close contact with the end faces of said gear wheels to the circumferences thereof and with the adjacent parts of the wall of said block, the casing provided by said block, bushings, and closing means being formed with intake and delivery ducts.

1,626,116. OIL BURNER. FRANKLIN HARDINGE, Chicago, Ill., assignor to Hardinge Brothers, Inc., Chicago, Ill., a Corporation of Illinois. Filed May 5, 1923. Serial No. 636,868. 2 Claims. (Cl. 158—36.)

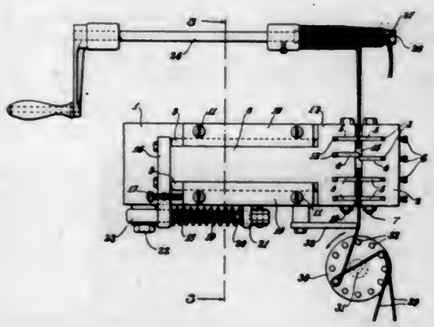
1. The combination in an oil burning appaartus of a rotary atomizer, means for rotating the atomizer, means for supplying oil to the atomizer under pressure comprising a valve, a pilot light for the atomizer having a gas supply feed means with a valve therein, and common means actuated by the actual rotation of the atomizer for opening and closing both said valves.



1,626,117. FLOORING MATERIAL. TREADWAY B. MUNROE, Chicago, Ill., assignor to Dahlberg & Company, Inc., Chicago, Ill., a Corporation of Delaware. Filed July 6, 1925. Serial No. 41,642. 6 Claims. (Cl. 20—6.)

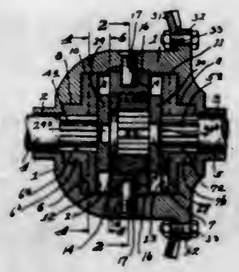
4. The herein described floor material ready for use in laying a floor and comprising a plurality of layers of

wood secured together with their grains crossing and formed into a predetermined shape; and a rigid plurality of layers of fibrous material secured to said layers of wood.



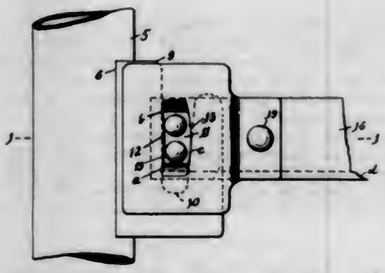
1,626,118. METHOD AND APPARATUS FOR MAKING IGNITER CONNECTIONS FOR DETONATORS. JOHN M. OLIN, VICTOR L. DAVIS, and JOHN B. SMITH, Alton, Ill., assignors to Western Cartridge Company, East Alton, Ill., a Corporation of Delaware. Filed Dec. 30, 1922. Serial No. 609,954. 43 Claims. (Cl. 18—26.)

1. In the art of making detonators, the process comprising, casting a series of plugs at spaced points on an igniter connection.



37. In a machine of the class described, a mold having a cavity, guides for positioning the connection in said cavity, adapted for casting a plug on said connection, and an element for ejecting the plug from the mold.

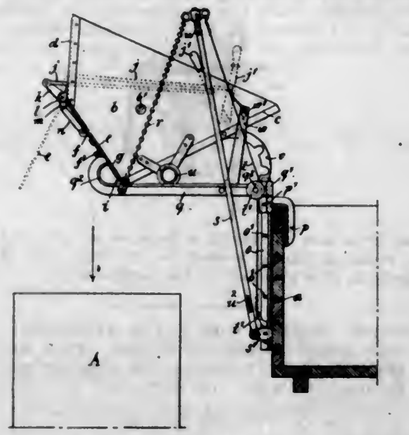
1,626,119. METHOD AND APPARATUS FOR STRIPPING DETONATOR-IGNITER TERMINALS. JOHN M. OLIN and JOHN B. SMITH, Alton, Ill., assignors to Western Cartridge Company, East Alton, Ill., a Corporation of Delaware. Filed Oct. 12, 1925. Serial No. 62,199½. 18 Claims. (Cl. 81—9.5.)



6. In an apparatus of the character described, a base, means to simultaneously sever an igniter connection and to cut the insulation from the severed end comprising severing cutters and stripping cutters adjacently mounted on said base.

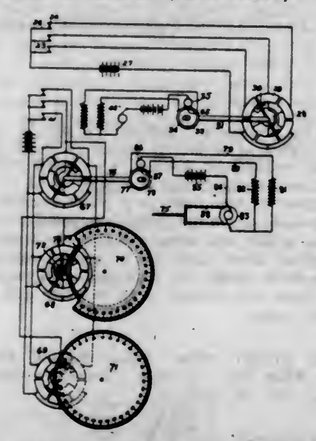
1,626,120. DIFFERENTIAL. FERDINAND W. SEECK, Lebanon, Oreg. Filed Sept. 18, 1923, Serial No. 663,398. Renewed Aug. 11, 1926. 6 Claims. (Cl. 74—99.)

1. In a differential mechanism, a driven case, a divided axle whose sections are journaled in opposite sides of the case, a disk mounted on each axle section, said case divided by a transverse partition, two gears journaled in said partition, meshing one with another, each gear being operatively connected with opposite axle sections through said disks whereby the axle sections are jointly driven by the rotation of the case, but either section is permitted relative rotation with the other.



1,626,121. BEDPOST LOCK. WALTER SILBER, Brooklyn, N. Y., assignor to Special Stamping and Manufacturing Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 81,683. 1 Claim. (Cl. 5—294.)

A bedpost lock comprising a bracket adapted to be secured to the post and having a portion thereof extending from the post, said extended portion having a tapered slot, a stamping in shape of a plate having a wedge depressed to one side thereof for engaging the slot and an off-set portion to the same side as the wedge, said wedge presenting a concave and a convex edge for engaging the slot, these edges tapering toward the plate, the curvature of the concave edge being greater than that of the convex edge, said wedge and off-set portion having means for securing thereto an angle iron on a bed frame.

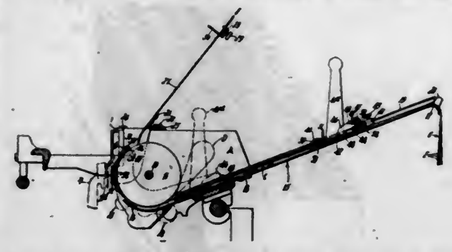


1,626,122. LOADING HOPPER. EDGAR JOHN SMITH, Cardiff, Wales. Filed Jan. 12, 1926, Serial No. 80,697, and in Great Britain Apr. 23, 1925. 5 Claims. (Cl. 193—5.)

1. An arrangement for facilitating loading a vehicle from and alongside a railway wagon, consisting of a hopper bucket, means for controlling the intermittent discharge of said bucket, hooks engaging over a side of said railway wagon, lever arms supported by said hooks

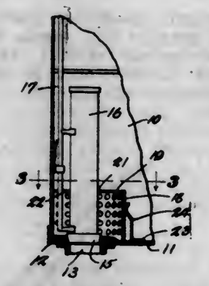
and supporting said bucket, and derricks supported by said hooks and extending upwards from beneath and supporting said lever arms.

1,626,123. GYROCOMPASS RELAY TRANSMITTER. ELMER A. SPERRY, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Mar. 12, 1920. Serial No. 365,145. 15 Claims. (Cl. 177—351.)



1. The combination with a gyro compass, of a transmitter driven thereby, a repeater motor in circuit with said transmitter, a plurality of electric contacts relatively positioned by said motor, a reversible motor actuated by said contacts, means controlled by said reversible motor for positioning said contacts in predetermined relationship, and a transmitter requiring more power to actuate the same than said first mentioned transmitter, also actuated by said reversible motor.

1,626,124. TYPEWRITING MACHINE. BURNHAM C. STICKNEY, Rutherford, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed July 12, 1924. Serial No. 725,536. 14 Claims. (Cl. 197—126.)



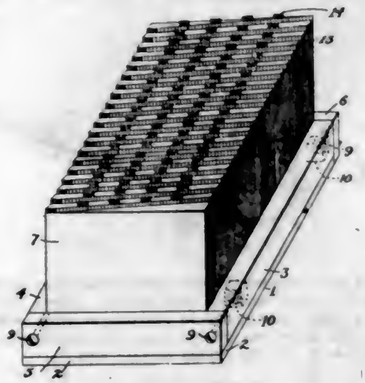
1. In a typewriting machine, as described, the combination of a frame, a platen mounted thereupon, a fan-

folded web carried around said platen, means for supporting manifolding ink ribbons between the web-plies in front of said platen, a paper-shelf over which said web is fed, said paper shelf fixed to the platen frame, a plurality of knife-blades projecting between the plies

of said web, to separate said plies preparatory to threading of the plies between said ribbons, means for maintaining said knife-blades in slidable relation with said shelf, and means for driving said knife-blades back from the platen to slit the bights of said web.

1,626,125. DRAIN GUARD FOR WASHING MACHINES. LE ROY W. TILT, Baltimore, Md. Filed July 7, 1926. Serial No. 120,908. 3 Claims. (Cl. 4—208.)

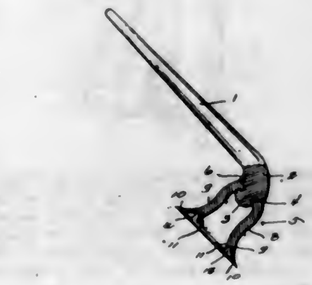
1. In a washing machine having a tub provided with a side wall and with a drain opening in its bottom adjacent said side wall, a guard of perforated metal covering the drain opening and having one end shaped to conform to said side wall, and spring means carried by the tub and engaging the guard to force it against the side wall thereof.



1,626,126. SORTING CASE. STUART B. TULLOSS, Washington, D. C. Filed Oct. 5, 1922. Serial No. 592,588. 5 Claims. (Cl. 129—15.)

1. A sorting case comprising a base member having sides and movable end members forming a tray, partition leaves and spacing strips arranged alternately in said base or tray extending from side to side and extending as a pack of leaves from end to end of the tray, and means for clamping the said movable end members against the ends of the pack to bind said leaves and strips together.

2. A sorting case comprising a series of partition leaves having index tabs bearing index numbers individual to the leaves raised above the top edges of several leaves immediately in front and positioned progressively from left to right on successive leaves from front to back and extending laterally of each other an amount only sufficient to show a portion of the number near the units end whereby the exposed tab area is reduced to less than the sum of the areas occupied by the whole index numbers.



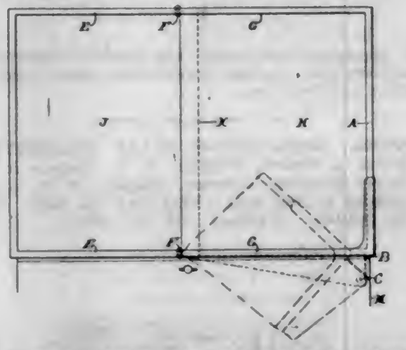
5. A leaf or card index comprising a series of cards, having tabs extending upwardly from the top edges of

the cards and positioned progressively from left to right and from front to back to form a plurality of diagonal rows of index tabs, each tab being backed by

a backwardly and downwardly extending buttress formed of the upper portions of the cards between it and the next succeeding row of tabs.

1,626,127. HAND MASSAGE IMPLEMENT AND MEDICINE APPLICATOR. OSCAR T. WAYNE, Philadelphia, Pa., assignor to X-It Laboratories, Inc., New York, N. Y. Filed Jan. 26, 1926. Serial No. 83,903. 2 Claims. (Cl. 128—62.)

1. A combined massage implement and medicine applicator comprising a cup shaped body the peripheral portion of which is annularly recessed to form a pair of lips, one of which is flared outwardly and is larger than the other, and both of which are substantially wedge shaped in cross-section to form relatively thin edges for engaging the person, and a handle carried by the cup for manipulating the same.

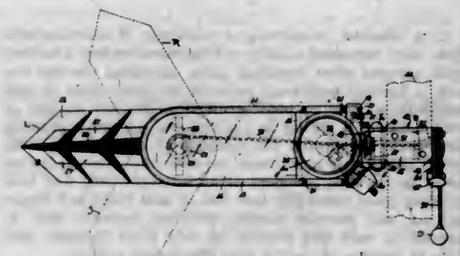


1,626,128. FLUSH-TANK CONSTRUCTION AND VALVE-LEVER-OPERATING MECHANISM THEREFOR. CHARLES C. WRIGHT, Camden, N. J., assignor of one-half to Camden Pottery Company, a Corporation of New Jersey. Filed July 23, 1925. Serial No. 45,568. 3 Claims. (Cl. 4—67.)

1. In a flush tank construction, the combination of a horizontally projecting valve-actuating spindle, of a china flush tank having a portion of its vertical wall increased in thickness, so as to provide a tapered boss formation integral with said side wall and projecting beyond the surrounding outer wall surface, said boss and wall behind the boss provided with a horizontally extending channel, a bushing forming a bearing for the spindle, secured in said channel and extending from the inner surface of the tank wall to near the outer

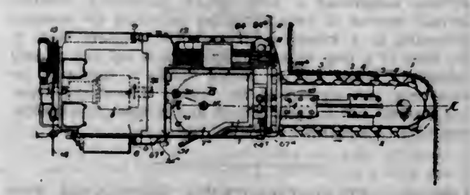
face of the boss and having a flange on its outer end and an actuating handle secured to the outer end of the spindle in close proximity to the integral boss.

1,626,129. WINDOW FOR MOTOR VEHICLES. HERBERT AUSTIN, Bromsgrove, England. Filed Apr. 12, 1926. Serial No. 101,529, and in Great Britain Apr. 29, 1925. 2 Claims. (Cl. 296—45.)



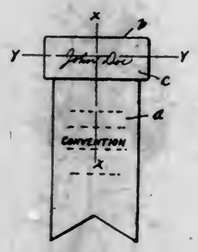
1. A main transparent medium for use as a window or wind screen of a motor vehicle, a main frame in which said transparent medium is set, said frame being hinged at one bottom corner to a part of the vehicle and being adapted to fold down in a plane parallel to such part, guides on said main frame, a supplementary frame comprising guides and being hinged to said main frame by a vertical hinge axis, and a supplementary transparent medium sliding in said guides of said supplementary frame and adapted to be slid into said guide of said main frame.

1,626,130. PLUMB BOB. ERICH BIATH, New York, N. Y. Filed May 18, 1926. Serial No. 109,889. 2 Claims. (Cl. 33—216.)



1. A plumb comprising an octagonal body, a conical tip at the upper end of said body, a lead line normally suspended from said plumb, a pair of apertures extending diametrically thru the body with their respective axes falling in intersecting planes, a level mounted lengthwise in each aperture, said levels indicating the true vertical alignment of the longitudinal axis of said plumb, and means on said body for suspending said plumb so that the same hangs vertically.

1,626,131. VEHICLE SIGNAL. DORA F. BEAUCHAMP, Forest Hills, N. Y. Filed Nov. 7, 1925. Serial No. 67,537. 4 Claims. (Cl. 116—48.)



1. A device of the character described comprising a housing having a plate and a panel at opposite sides and a partition between them, the housing having an opening between the plate and partition and the space between the panel and partition being closed with the exception of an aperture, a shaft extending through said partition, a signal arm connected to said shaft and located between said plate and partition to be moved through said opening into and out of the casing, and actuating means for the signal member connected to said shaft and located between said partition and panel and extending through said aperture.

1,626,132. MINING MACHINE. CHARLES E. DAVIS, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 22, 1920. Serial No. 375,703. 42 Claims. (Cl. 262—30.)

20. A mining machine slidable on a mine bottom comprising a cutter chain carrying cutter bar extending longitudinally thereof during lateral cutting, a motor whose height substantially determines the height of the machine located in rear of the rear end of said chain and operatively connected thereto, and means for feeding said machine laterally including feed operating means disposed on a horizontal axis in front of said motor and operated thereby and flexible feeding portions acting on the opposite ends of the machine frame.

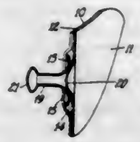
1,626,133. BADGE. JAMES C. DAY, Maplewood, N. J., assignor to The Whitehead & Hoag Company, Newark, N. J., a Corporation of New Jersey. Filed Feb. 24, 1926. Serial No. 90,256. 1 Claim. (Cl. 40—1.5.)

As a new article of manufacture, a badge comprising a strip of celluloid polished on one of its faces folded over near one end to form a name plate, the surface of said name plate exposed to view having a matt or slightly roughened surface, and means for securing the badge in place.

1,626,134. METHOD OF MANUFACTURE OF CUT MATRICES ADAPTED FOR THE PRODUCTION OF PHOTOGRAPHIC SURFACES COMPRISING REFRACTING ELEMENTS. MICHEL DEVIGNY, Paris, France. Filed Nov. 10, 1925, Serial No. 68,228, and in France Dec. 22, 1924. 4 Claims. (Cl. 41—25.)

1. The method of manufacturing matrices for the production of photographic surfaces comprising refracting elements, which consists in tempering, rectifying, and cutting a pattern wheel, rectifying a pattern cylinder, and rolling the pattern wheel on the pattern cylinder.

1,626,135. COUPLING FOR CLOSETS. CHARLES W. FANKHAUSER, Great Bend, Kans. Filed Apr. 16, 1926. Serial No. 102,516. 2 Claims. (Cl. 285—2.)

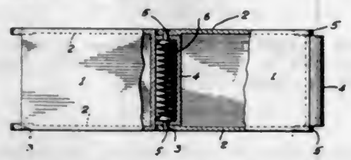


1. The combination with the flush tank and bowl of a closet, each having a passage formed therethrough and surrounded by an outwardly projecting threaded nipple, of an improved coupling therefor consisting of a pair of independent pipe sections each having one end slidably extended through one of said nipples and the other ends thereof in abutting relation, a collar surrounding each pipe and engaging the adjacent nipple, a packing surrounding each pipe and secured against the engaged nipple by the associate collar, and means for securing the abutting ends of said pipes together in leak-proof engagement.

1,626,136. FLYING SUIT. HENRY RIDGEWAY HART, Montclair, N. J. Filed June 30, 1925. Serial No. 40,489. 1 Claim. (Cl. 2—79.)

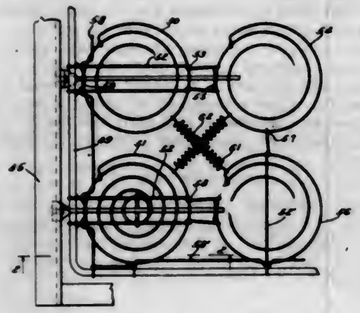
In an aviator's unionall suit a body portion having an outer layer of leather, an intermediate layer of moisture excluding material, and an inner layer of fur, and a legs portion united with the body portion and having an outer layer of cloth, an intermediate layer of moisture excluding material, and an inner layer of fur.

1,626,137. COLLAR-BUTTON GUARD. CHARLES HEIMGARTNER and OTTO STIERLI, Jersey City, N. J. Filed Oct. 23, 1926. Serial No. 143,562. 2 Claims. (Cl. 24—114.)



1. A collar button guard comprising a back plate and a front plate cemented together, a slit formed between said plates intermediate their length, a slot extending downwardly in the front plate in the region of said slit, an annular deformed portion on said front plate extending outwardly forming an annular pocket between the front and back plates, said back plate being depressed into said annular portion to form a curved ridge for releasably engaging the base of the collar button.

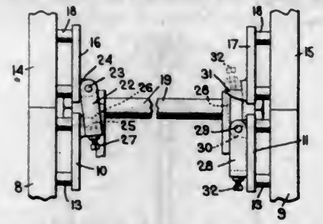
1,626,138. FASTENING DEVICE. CHESTER B. KOHN, South Orange, N. J. Filed Jan. 26, 1927. Serial No. 163,613. 7 Claims. (Cl. 24—124.)



1. A necklace clasp comprising a shell portion to which one end of a cord may be attached, and a cord-retaining portion removably connected to said shell portion and having a shank housed within said shell portion and spaced therefrom and adapted to receive and releasably hold a considerable portion of the end of the cord, whereby adjustments in the length of the necklace may be easily made.

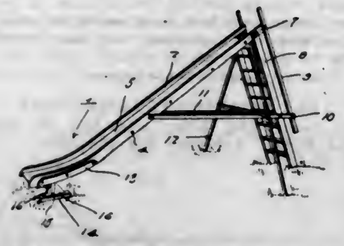
1,626,139. BRACELET. IRVING KRAYSLER, New York, N. Y., assignor to Farber-Krayslor & Bro., a Copartnership comprising as partners Julian Farber, Brooklyn, N. Y., and Irving Krayslor and Max Krayslor, New York, N. Y. Filed Apr. 3, 1926. Serial No. 99,438. 2 Claims. (Cl. 59—80.)

1. A bracelet comprising a plurality of disengageable links each including a body having side members provided with opposed pivot receiving holes extending through one end, a housing positioned between the other ends of said members, a yielding pivot projecting through an end of said housing, a spring in the housing normally pressing said pivot outwardly, the housing of one of said links being operatively positioned between the pivot receiving holes in the side members of an adjacent link, and said yielding pivot extending into one of said holes and exposing an end portion therein whereby pressure may be applied to said end portion of said pivot through said hole to depress the pivot into disengaged position.



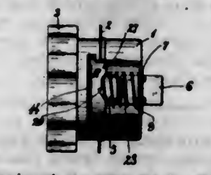
1,626,140. BED OR COUCH SPRING ORGANIZATION. CHARLES LOFMAN, Los Angeles, Calif., assignor to Roberti Bros., Los Angeles, Calif., a Corporation of California. Filed Sept. 30, 1925. Serial No. 59,569. 4 Claims. (Cl. 5—260.)

1. In an organization of the general character described, comprising a main frame supporting separate springs secured in rows by means including tie members extending to a subsidiary frame: tie members each in the form of a loop which is secured by a cut end to said subsidiary frame and is passed across a spring of an outer row and secured to the remote side of the upper lap thereof, and is then carried and secured to an adjacent side of a spring of another row.



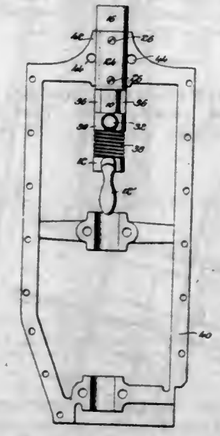
1,626,141. STANDARD-LOCKING MECHANISM FOR HOISTING MACHINES. RALPH M. LOVEJOY, Boston, Mass., assignor to Lewis-Shepard Company, Watertown, Mass., a Corporation of Massachusetts. Original application filed July 12, 1922, Serial No. 574,517. Divided and this application filed Feb. 7, 1925. Serial No. 7,508. 6 Claims. (Cl. 187—9.)

1. In a hoisting machine comprising a frame, a vertical guiding standard mounted thereon comprising a lower section, an upper section pivotally mounted thereupon and movable into alinement therewith to form an extension of said lower section, releasable locking means comprising relatively movable members upon the respective sections of said standard automatically movable into engagement when the sections are in extended position



and adjustable means operable to clamp said locking means in locked position, and vertically movable load supporting means mounted upon said standard.

1,626,142. PLAYGROUND SLIDE. MAX A. MCCREE, Beaumont, Tex. Filed Sept. 27, 1926. Serial No. 137,950. 4 Claims. (Cl. 272—56.5.)



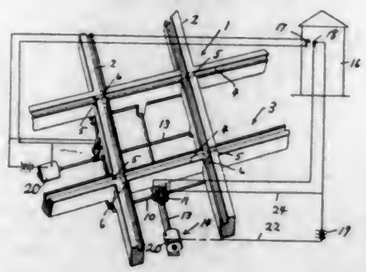
1. In a playground slide of the class described, a sliding board comprising a pair of spaced parallel side rails provided in their inner faces with grooves, transverse slats arranged in edge to edge abutting relation and assembled in groups spaced apart at intervals in the length of the board, transverse connecting bolts for the side rails located in the spaces between said groups of slats and below the upper sides of the slats, and a metal facing for the tops of said slats.

1,626,143. COIN DEVICE FOR PREPAYMENT METERS. JOSEF METTLER, Zug, Switzerland, assignor to the Firm Landis & Gyr A. G., Zug, Switzerland. Filed Feb. 25, 1922, Serial No. 539,331, and in Switzerland Feb. 18, 1921. 1 Claim. (Cl. 194—92.)

In a coin device for prepayment meters, a casing 1, having a coin receiving slot 12 and a discharge slot 13, a knob mounted for turning movement and also for movement toward and from the casing, and having a coin slot 14 and also an element 4 arranged in the casing and having a peripheral flange 17, a spring 9 normally projecting the knob from the casing and having a free end 9' arranged to bear against a coin in the slot, said flange having a pair of oppositely disposed notches 20^a, each having a shoulder 20 to engage said spring end in the absence of such coin and prevent rotation of the knob in such circumstances and also having converging sides, said flange being further provided with stop notches 27, one near each of the notches 20^a, to receive said free spring end and coact therewith to prevent premature return rotation of the knob, and means to prevent turning of the knob when the same is in projected position.

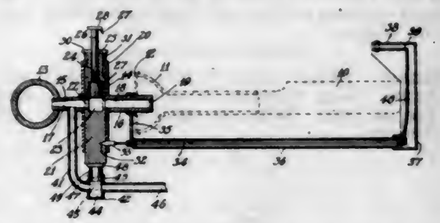
1,626,144. CASTING JIG. JOHN I. MICHAELS and LESTER R. WATKINS, Wichita, Kans., assignors to The Watkins Manufacturing Company, Wichita, Kans., a Corporation of Kansas. Filed June 26, 1926. Serial No. 118,792. 11 Claims. (Cl. 22—123.)

2. A bearing casting jig comprising a mandrel having a laterally extending surface adjacent to its upper end for contact with a machine part that is adapted to have a bearing casted therein, said mandrel having a hopper at the upper end thereof formed by inclining the upper surface of said mandrel, said hopper terminating in an orifice opening adjacent to the side of said mandrel, and means carried by said mandrel for cooperation with a bearing receiving machine part to produce a bearing receiving cavity about a portion of said mandrel, the said inclined upper surface of said mandrel intersecting the side wall thereof above said laterally extending surface whereby surplus metal remaining in said hopper after a bearing has been casted will be broken off from the bearing upon upward movement of the jig with respect to the bearing receiving machine part outside the defining limits of the bearing.



1,626,145. DETACHABLE LADDER FOR RAILWAY CARS. JONAS MITCHELL, Washington, D. C. Filed Dec. 10, 1926. Serial No. 153,879. 1 Claim. (Cl. 228—45.)

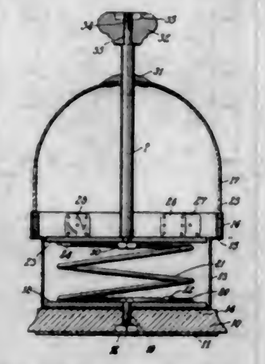
A ladder of the class described, comprising side bars connected by a plurality of rungs, a hanger bracket formed with a head having a laterally extending tank on one end thereof, and a plurality of pairs of diverging arms on the opposite end thereof, said arms being formed for



connection with the side bars of the ladder to mount the same thereon at one end, and a supporting bracket mounted on the side bars at the opposite end of the ladder and projecting laterally therefrom for cooperation with the hanger bracket to support the ladder in spaced parallel relation to the side of a railway car when the tank formed on said hanger bracket is secured in a bracket member atttached to the side of the car.

1,626,146. RAILWAY-TRACK-CROSSING STRUCTURE. LOUIS MORROW, Ontario, Calif. Filed Dec. 28, 1926. Serial No. 157,543. 2 Claims. (Cl. 246—273.)

1. In a structure of the class described, in combination, a grooved track rail, a block mounted for vertical sliding movement upon said rail and adapted to be projected into said groove to operate as a temporary bridge in the gap existing between opposed side walls of the groove, a rotatably mounted shaft, motor driven operating means for said shaft, and an eccentric connection between said shaft and block for reciprocating said block.



1,626,147. AUTOMATIC VALVE. ALEXANDER MOSER, Bayside, N. Y. Filed Aug. 31, 1926. Serial No. 132,705. 3 Claims. (Cl. 67—116.)

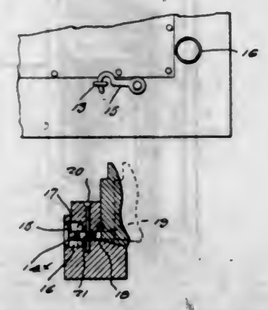
1. In combination with a burner, a valve having a hollow body and a plunger slidable in said body, a nipple and a sleeve extending in diametrically opposite directions from said body, channels in said plunger aligning with said nipple and sleeve when said plunger is depressed, said plunger having a chamber between said channels, means for locking said plunger in depressed position, means for lifting said plunger, a rotatable piston and stem in said plunger chamber for manually closing communication between said nipple and sleeve, a pin in said plunger chamber, said stem having a channel receiving said pin, said stem when rotated lowering or raising said piston.

1,626,148. GAMING DEVICE. ROBERT OBRIST, Weehawken, N. J. Filed Sept. 25, 1926. Serial No. 137,644. 2 Claims. (Cl. 273—145.)

1. In a gaming device, a bowl, a base plate supporting said bowl, a floating platform reciprocal in said bowl, a glass bell supported on said bowl making said floating platform visible, a spring supporting said floating platform, a rod secured to said platform extending upwardly and projecting above said bell, a knob secured to the projecting end of said rod, said bowl having an external

encircling flange, said bell being seated on said flange, and a retainer rim encircling said flange positioning said bell.

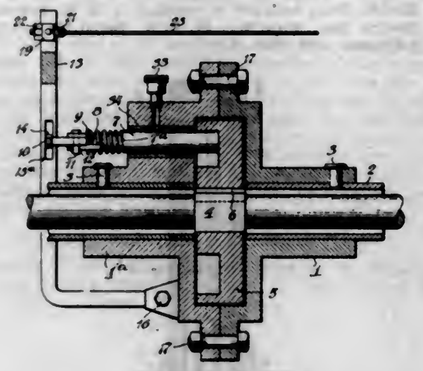
1,626,149. OBSTETRICAL INSTRUMENT. EDWIN ODELL, Central City, Nebr. Filed May 14, 1925. Serial No. 30,303. 3 Claims. (Cl. 128—324.)



1. In an instrument of the character described, a carrier member, a plurality of arms mounted intermediate their ends on said carrier member, said arms being made up of a single piece and a double piece interfitted with each other and having oppositely deflected bearing portions engageable with the carrier member, the single piece of each arm having an eye at its forward end, and a flexible element extended through the eyes and coacting therewith to form a contractible closed gripping loop at the forward end of the instrument, said flexible elements extending rearwardly and said rearwardly extending portion being operable to contour the loop when pulled relative to the arms.

1,626,150. CHANGEABLE PICTURE FRAME. STANLEY PARDA, Middletown, Conn. Filed June 28, 1926. Serial No. 119,128. 5 Claims. (Cl. 40—156.)

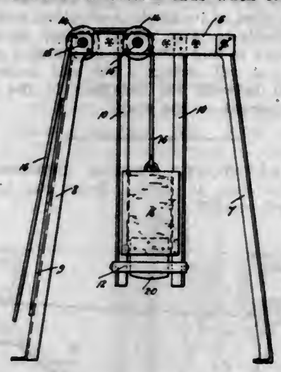
1. In combination, a main frame closed at its back and equipped on the inner side of its top bar with spaced staples, a glass-carrying frame movably connected with the main frame, a packet of pictures, each picture of the packet having a pair of apertures, and picture connecting and suspending devices, each of said devices being made up of a right angle member with a hook at the upper end of one arm and an aperture adjacent to the inner end of the other arm, and a pin adapted to be removably arranged in said aperture of the right angle member and having an angularly disposed head adapted to bear on the upper edges of certain of the pictures, and the said hooks of the right angle members being adapted to be engaged with and disengaged from the said staples.



3. A picture frame comprising a main frame having a rabbet in its forward side and also having a counter-

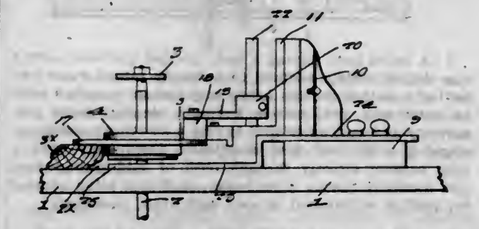
sink in its rear side and a bore extending from said countersink to the said rabbet, an endwise movable push pin having a head disposed in said countersink and also having a shank disposed and movable in said bore, means for detachably securing a glass-carrying frame in the

rabbet of the main frame, the said glass-carrying frame hingedly connected to the main frame and adapted when closed in the rabbet of the main frame to be in position to rest detachably against the forward end of said push pin, and means retaining the push pin in the main frame.



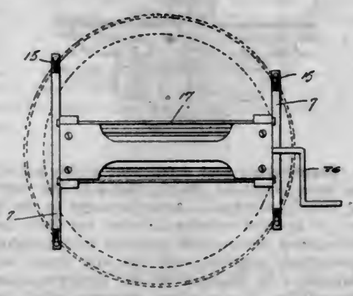
1,626,151. AUTOMOBILE BRAKE. PATRICK A. QUINN, Clifton, N. J. Filed Dec. 10, 1924. Serial No. 755,022. 1 Claim. (Cl. 188—30.)

In a device of the character designated, a casing, a motor drive shaft, a brake cam disc rotatable with said shaft and having shouldered cam surfaces in its face, a bell-crank lever pivotally mounted at one end on said casing and having a slot, a cross bar carried by said lever, a spring-actuated bolt having sliding connection with said cross bar and the latter working in said slot, said bolt being disposed parallel with said shaft, and a swiveled block connected with the free end of said lever for moving the latter to actuate said bolt to move the bolt out of register with the cams of the disc.



1,626,152. WOOD-SPLITTING MACHINE. CARL RASMUSSEN, Menlo Park, Calif. Filed Feb. 19, 1926. Serial No. 89,364. 2 Claims. (Cl. 144—193.)

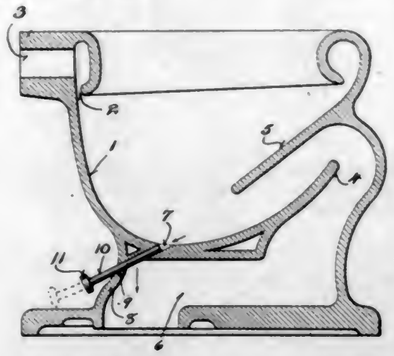
1. A machine for splitting wood, comprising two substantially horizontal crossbars spaced apart, supports secured to the end portions of the crossbars, two vertical guide bars arranged parallel to each other and suspended from the crossbars between their end portions with the bottom ends of the guide bars clear of the ground, a weighted blade slidable between the guide bars and free to project below their bottom ends when lowered, guide



sheaves mounted on the crossbars, and a flexible lifting device supported by the said sheaves and connected to the weighted blade.

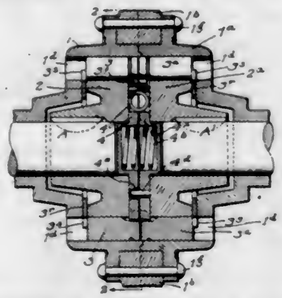
1,626,153. WOODWORK-SHAPER TABLE. EMMETT REAVELEY, Chicago, Ill. Filed May 16, 1925. Serial No. 30,772. 4 Claims. (Cl. 144—253.)

1. In combination, a table, a rotatable spindle on said table, cutting means on said spindle, and a collar surrounding the spindle in concentric relation and fastened to said table to render it relatively stationary with respect to the revolving spindle, and a work clamping ring adjustably connected with the table and arranged about the spindle and stationary collar.



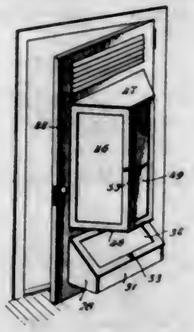
1,626,154. APPARATUS FOR WASHING CLOTHES. WILLIAM B. REEVES and MARTAIN J. POOLE, Whitehead, N. C. Filed May 5, 1926. Serial No. 106,888. 3 Claims. (Cl. 68—23.)

1. An apparatus for washing clothes including, in combination, spaced standards, clothes washing means between the standards, bars carried by the standards, each bar having in its under side adjacent to each of its ends



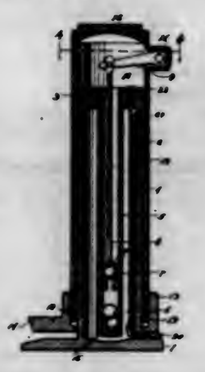
grooves to receive a tub rim and also having adjacent to each of its ends longitudinal vertically disposed slots adjacent to said grooves, each of said slots having at its intermediate point in its height a shoulder, and also having a comparatively large upper portion, hooks having shanks disposed in said slots and also having handle enlargements, and coil springs about said hooked shanks and disposed between the shoulders in the slots and handle enlargement on the shank.

1,626,155. LAVATORY. CHARLES REKEWITZ, Racine, Wis. Filed June 18, 1926. Serial No. 116,829. 3 Claims. (Cl. 4—257.)



1. A toilet bowl having a body portion provided with a cup shaped bottom adapted to normally retain water and having a hollow portion below said bottom provided with an outer wall, said bottom having a slanting drain passageway and said outer wall having a slanting passageway aligning with said first mentioned passageway, and a plug passing directly through both of said passageways and normally closing passageway, said plug being adapted for partial withdrawal to open said drain passageway.

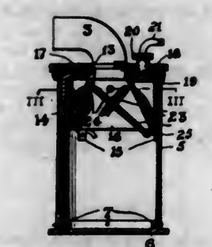
1,626,156. COMPENSATING GEARING. DAVID E. Ross, La Fayette, Ind. Filed Feb. 29, 1924. Serial No. 696,019. 21 Claims. (Cl. 74—7.)



1. A compensating gear comprising a driving member; opposed disks; rocking clutch elements for each disk adapted in one position to lock the same to the driving member; an annular member between the disks and frictionally engaged thereby and provided with peripheral devices operatively engaged with the said clutch elements and adapted to be displaced by the rotary movement of one disk relative to the other, whereby when one disk moves faster than the other the related clutch elements are simultaneously disengaged and the faster disk freed from the driving member; the said clutch elements re-engaging said disk when the disks resume same speed.

1,626,157. SERVICE DOOR. AGNES R. ROSSMAN, Scotch Plains, N. J. Filed Jan. 20, 1926. Serial No. 82,397. 6 Claims. (Cl. 232—1.)

1. A foldable cabinet for doors capable of being mounted in an opening formed in a door and including top, bottom and side members hingedly connected to said door adjacent said opening to permit said members to be moved to positions substantially within the inner and outer surfaces of the door with said side members forming a closure for the inner side of said opening when the cabinet is folded, and an inner closure member combining with said side members to form a compartment on one side of said door.

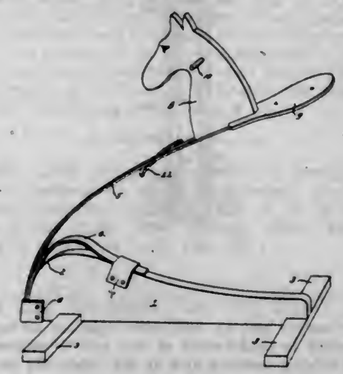


1,626,158. HYDRAULIC JACK. OTTO SCHLEMEYER, Electra, Tex., assignor of one-half to R. E. Scheurer, Electra, Tex. Filed May 27, 1926. Serial No. 111,954. 8 Claims. (Cl. 138—9.)

1. In a hydraulic jack, a base supporting a cylinder, a covering for said cylinder, a pipe entering said covering centrally thereof and depending within said cylinder to form an annular fluid reservoir; a plunger movable in said pipe to effect removal of fluid from said annular reservoir; an outer housing movable on said cylinder to receive the fluid removed from said annular chamber, means to effect movement of said plunger, and means to permit said fluid to be returned to said reservoir to lower the outer housing.

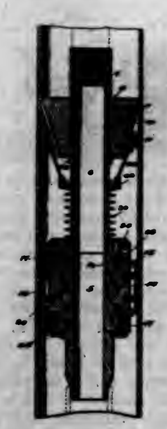
1,626,159. AIR MOISTENING AND CLEANING DEVICE. HENRY J. SCHMITT, Emsworth Borough, Pa., assignor of one-half to William M. Young, Avalon, Pa. Filed May 12, 1925. Serial No. 29,741. 4 Claims. (Cl. 261—99.)

1. In an air-moistener for an internal combustion engine, the combination of a container having a cover provided with a central aperture, means for admitting air into the lower portion of the container, an annular water tank mounted in the upper part of said container, the central bore of said tank converging upwardly, the upper end of said bore being in alignment with said aperture and being connected to the air intake of the



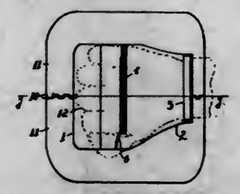
engine carburetor through said aperture, and a plurality of wicks having their ends immersed in the water contained in said tank and their bodies disposed in said bore, so that the air drawn through said container and bore by the suction of the engine will be moistened by contact with said wicks.

1,626,160. REMOVABLE WRIST-WATCH BRACELET. ABRAHAM SCHWALBERG, Brooklyn, N. Y. Filed Feb. 10, 1926. Serial No. 87,327. 7 Claims. (Cl. 324—4.)



5. In a wrist watch bracelet, a body member having an inner and an outer face and including a short folded section bent back on and attached to the inner face of said body member, a buckle permanently secured in place at the bend between said body member and said folded section, a tongue on the inner face of said buckle and a loop secured to the inner face of the body member at about the middle thereof and adapted to pass about a single thickness of material only in the operative position of the body member.

1,626,161. TOY EXERCISER. WILLIAM H. SHERROD, Los Angeles, Calif. Filed Dec. 15, 1925. Serial No. 75,591. 2 Claims. (Cl. 272—55.)



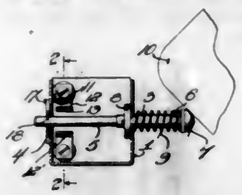
1. A device of the character described comprising; a base having an upwardly retrogressive curved surface at one end; a resilient bar having one extremity fixed at said end and a portion curving over said surface and spaced therefrom; a longer resilient bar having one extremity fixed at said end outside of the first bar and curving over the latter and progressively spaced therefrom; the free portion of the longer bar being extended upwardly over the base and having a seat at its upper extremity; and each of said bars being adapted for bending upon the curved surface beneath it when a load is placed upon said seat.

1,626,162. TUBING ANCHOR. ROY B. SIMONS and JOHN PENROD, Okmulgee, Okla. Filed May 9, 1924, Serial No. 712,083. Renewed Sept. 15, 1926. 7 Claims. (Cl. 103—219.)

1. A tubing anchor comprising male and female members having interfitting threads, the female member having spaced recesses, locking strips having offset terminal portions freely received in said recesses, and springs urging said locking strips outwardly into engagement with a casing.

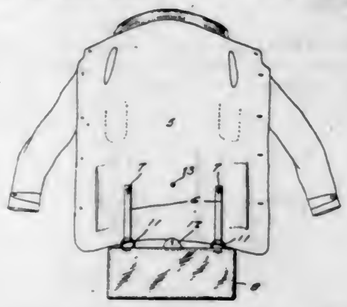
1,626,163. SWIMMING PAD. FRANKLIN J. SMITH, Santa Clara, Calif. Filed Feb. 23, 1926. Serial No. 90,059. 3 Claims. (Cl. 9—21.)

1. A device of the character indicated comprising a supporting element, a hand grip mounted thereon in parallel relation to the plane thereof, a pair of plates hingedly mounted on said supporting element and movable into engagement therewith on their rear surfaces, and stop means carried by said element and positioned forwardly of said plates for engagement with their front surfaces.



1,626,164. CONSTRUCTION OF FIREPROOF BUILDINGS. HENRY SORENSEN, San Francisco, Calif. Filed May 18, 1926. Serial No. 109,891. 2 Claims. (Cl. 72—71.)

1. In a reinforcement of an infilled structure spanning spaced flanged beams, the combination of means for attaching the one end of said reinforcement to a portion of one of said beams and the other end of said reinforce-

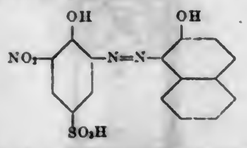


ment bent to form a wedge-like member to engage the flange on the opposed beam, whereby said reinforcement is initially tensioned and wedged to said beams when said member is driven.

1,626,165. ELECTRIC SWITCH. HOWARD A. SPAHR, Milwaukee, Wis. Filed Apr. 19, 1926. Serial No. 102,963. 1 Claim. (Cl. 200—1.)

An electrical switch comprising a casing having a circular aperture in its front wall and having a slot in its rear wall, a cylindrical plunger pivotally and slidably passing through said aperture and having its rear end slidably positioned within said slot, a head carried by the outer end of said plunger, a spring bearing against said head and against the front wall, a collar carried by said plunger and contacting with the inner face of said front wall, pairs of electrical contacts mounted within said casing and adjacent the rear portion of said plunger and adapted to be closed by said plunger when said plunger is rocked, and a latching plate carried adjacent said slot and adapted to lock said plunger against rocking motion while permitting sliding motion.

1,626,166. SEAT PAD FOR SPORTSMEN'S COATS. WILLIAM DEWEY STAIR, Mount Union, Pa. Filed July 28, 1926. Serial No. 125,482. 6 Claims. (Cl. 2—94.)



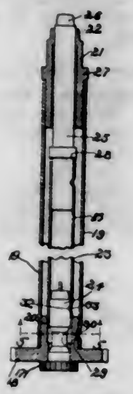
1. In combination with a coat of the character described, a seat pad normally depending below the coat, a sliding connection between the pad and the back side of the coat at the interior thereof, and means whereby the seat pad may be supported in position entirely within the coat when not in use.

1,626,167. DYESTUFFS CONTAINING CHROMIUM AND PROCESS OF MAKING THE SAME. FRITZ STRAUB, Basel, Switzerland, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Filed Jan. 29, 1926, Serial No. 84,755, and in Switzerland Feb. 14, 1925. 4 Claims. (Cl. 260—12.)

1. A process for the production of azo dyestuffs containing chromium by treating the ortho-hydroxy-azo dyestuffs obtained by coupling nitrated mononuclear ortho-hydroxy-diazo compounds with α-naphthyl-amine derivatives which combine in ortho-position to the amino group, with derivatives of trivalent chromium.

1,626,168. DYESTUFFS AND PROCESS OF MAKING SAME. FRITZ STRAUB, Basel, Switzerland, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Filed Jan. 29, 1926, Serial No. 84,756, and in Switzerland Feb. 16, 1925. 5 Claims. (Cl. 260—12.)

4. As new products the herein described acid wool dyestuffs containing chromium which have to be considered as complex chromium compounds of the azo dyestuffs corresponding with the formula:

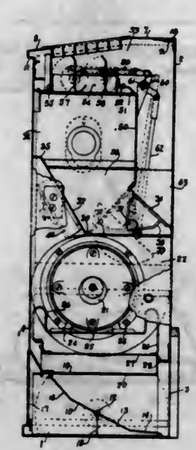


which products form black powders dissolving in water with red-violet-black, in dilute caustic soda solution with violet-black coloration, dyeing wool from an acid bath reddish-black shades with excellent properties of fastness.

1,626,169. DYESTUFFS CONTAINING CHROMIUM AND PROCESS OF MAKING SAME. FRITZ STRAUB, Basel, Switzerland, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Filed Jan. 29, 1926, Serial No. 84,757, and in Switzerland Feb. 16, 1925. 6 Claims. (Cl. 260—12.)

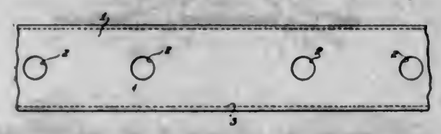
1. A process for the production of new acid wool dyestuffs containing chromium, by treating azo dyestuffs containing chromable groups with chromium chromate.

1,626,170. TIMEPIECE WITH HAND-DRIVING EXTENSION. GEORGE W. TONEY, Waltham, Mass., assignor, by mesne assignments, to Old Colony Trust Company, trustee, a Corporation of Massachusetts. Filed Jan. 3, 1921. Serial No. 434,748. 5 Claims. (Cl. 58—125.)



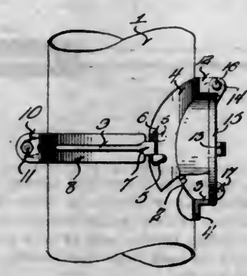
1. In a time piece, the combination, with a hand driving member and an indicating hand, of an extension shaft which is constructed at one end to embrace part of said driving member and at the other end to mount said hand, that part of the shaft which embraces said member and the part of the member embraced thereby, having interengaging offset portions formed and disposed to afford a driving clutch and to oppose yielding resistance to withdrawal of the shaft from the driving member.

1,626,171. PROCESS FOR COOKING VEGETABLE FIBER. SIDNEY D. WELLS, Quincy, Ill. Filed June 29, 1926. Serial No. 119,471. 8 Claims. (Cl. 92—9.)



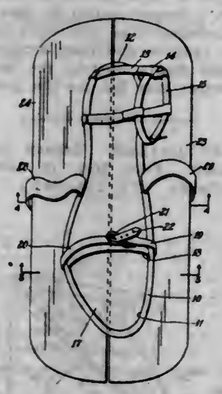
1. In a process of softening vegetable fibrous material, the steps consisting of treating such fibrous material with a solution of sodium carbonate and sulphur.

1,626,172. HEATING AND VENTILATING APPARATUS. JAY AUSTIN WOLFE, Columbus, Ohio, assignor to The Columbus Heating and Ventilating Company, Columbus, Ohio, a Corporation of Ohio. Filed Dec. 7, 1925. Serial No. 73,946. 13 Claims. (Cl. 237—137.)



6. In combination, a main casing having means to admit air at the bottom thereof, metallic means to resiliently support a motor and fans above the bottom of the casing, a deck, a fan housing supported on said deck cooperating with said motor and fans, said deck having an opening for the exit of air therethrough, a radiator above said motor, fans and fan housing, a casing enclosing said radiator having an opening at the top and at the bottom, means to control said openings whereby the air drawn into the main casing at the bottom may be discharged through the radiator or to one side of it, said main casing being so arranged that an inlet opening is at one side of the bottom and a recirculation opening at the other, and a damper located therebetween to control the passage of air through either side of the casing at the bottom thereof, and means located below and cooperating with the damper to prevent the passage of air from one opening to the other.

1,626,173. DRY CELL. VICTOR YNGVE, South Orange, N. J., assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y., a Corporation of New York. Filed Jan. 25, 1924. Serial No. 688,424. 5 Claims. (Cl. 136—107.)



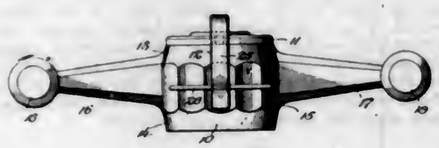
1. The method of forming a dry cell which comprises forming a plurality of perforated tablets of depolarizing mix, perforating a strip with perforations arranged in pairs longitudinally thereof, bending said strip into a number of comb shaped cross sections with the holes in alignment, placing the tablets with their holes in line with the holes in said electrode and inserting a carbon electrode through said aligned holes.

1,626,174. CHECK DRAFT. MATHEW ZENTNER, Oshkosh, Wis., assignor to Teela Sheet Metal Co., Oshkosh, Wis. Filed Mar. 26, 1925. Serial No. 18,430. 1 Claim. (Cl. 126—285.)

The combination of a flue pipe having an aperture through its cylindrical wall, and an attachment comprising a cylindrical portion provided with an outwardly projecting wide flanged portion curved to fit said pipe and extending completely around the cylindrical portion of said attachment, said attachment being positioned over the aperture in the pipe, a pair of outwardly opening hooks formed on opposite sides of the flanged portion, a pair of ribbed straps having laterally projecting pins carried at one end and adapted to engage said hooks and having apertured ears at the other end and a clamping bolt passing through the apertured ears of said straps, said flanged portion and said ribbed straps being rigid and serving to brace the pipe.

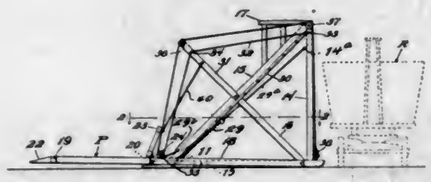
1,626,175. SWIMMING SHOE. JOSEPH ZIMMER, Brooklyn, N. Y. Filed Oct. 11, 1926. Serial No. 140,707. 1 Claim. (Cl. 9—21.)

A swimming shoe comprising a sole shaped similar to the foot, a cage at the rear end of said sole, a strap at the forward end, a pair of fins larger than said sole pivotally mounted on the latter, said fins comprising a pair of longitudinal flat members, individual hinges arranged side by side secured to said sole and each fin, said fins being adapted to lie parallel to said sole in the thrust stroke, the mutually adjacent corners of said fins being chamfered angularly to permit said fins to be rotated from an aligned position to a position substan-



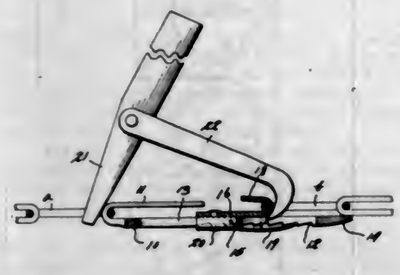
tially parallel to each other, and limiting straps mounted on said fins intermediate their length and connected to said soles, said straps being adapted to limit the movement of said fins from the thrust stroke to the recovery.

1,626,176. PLUG GAUGE. FRANCIS L. ATWOOD, Anderson, Ind. Filed May 25, 1926. Serial No. 111,567. 5 Claims. (Cl. 33—178.)



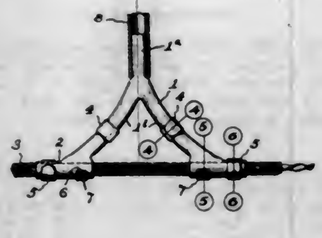
1. A plug gauge, comprising a cylindrical gauge element, a handle having an axial hole in one end thereof for receiving either end of said gauge element, means for preventing rotation of said gauge element in said handle, and means acting at that end of said gauge element which is received in such hole for holding said gauge element in said handle.

1,626,177. RADIATOR CAP. WILLIAM H. BILLINGSLEY, Florence, Ala. Filed Mar. 3, 1924. Serial No. 696,644. 1 Claim. (Cl. 292—101.)



The combination with a body member and a hinged cover therefor, of a latch carried by said cover for engagement with a keeper carried by said body member, said keeper consisting of an inherently resilient member secured at its ends to said body member at relatively widely separated points whereby the intermediate portion of said keeper may flex for the purpose set forth.

1,626,178. HAY LOADER. GEORGE JAMES BOWMAN, Glenburn, Calif. Filed Mar. 13, 1926. Serial No. 94,492. 6 Claims. (Cl. 214—131.)

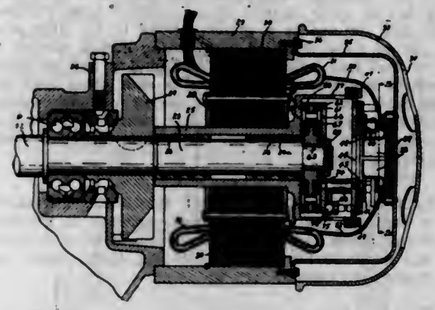


1. In a hay loader, a base, a substantially horizontal platform supported above and from the base, a pair of arms pivoted to the base and swingable about the pivots thereof from a horizontal position where they substantially align with the base to a vertical position where they substantially align with the edge of the platform remote from the free ends of the arms when in the first named position, a second platform carried by the free ends of the arms and having a pivoted apron at its inner edge, said apron being movable to a position where it substantially aligns with the platform to permit dumping of the contents when the arms are in the vertical position, the first named platform supporting the free edge of the apron during passage of the apron thereover and means for moving said arms from the horizontal to the vertical position thereof including a part supporting said apron at substantially right angles to its platform until the free edge of said apron overlies the first named platform.

1,626,179. TIGHTENER AND HOLDER FOR TIRE CHAINS. GEORGE JAMES BOWMAN, Glenburn, Calif. Filed July 17, 1926. Serial No. 123,163. 3 Claims. (Cl. 24—68.)

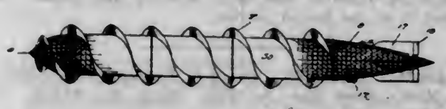
1. A tightener and holder for chains comprising a shank having ratchet teeth upon one face, and a slide mounted upon the shank and having a spring engaging the ratchet teeth, one end of the shank and the slide being provided with hooks turned towards each other, one of said hooks being longer than the other and said hooks being deflected so that the extremities of the hooks may pass each other when the hooks are brought into proximity.

1,626,180. LIGHTNING-ROD CONNECTER. BYRON C. BURKETT, Fremont, Ohio, assignor to The Burkett Lightning Rod Company, Fremont, Ohio, a Corporation. Filed June 4, 1924. Serial No. 717,699. 6 Claims. (Cl. 173—31.)



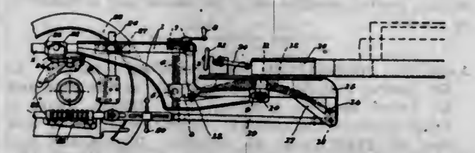
1. In lightning rod apparatus of the class described, the combination with a conductor and a collector, of a connecter device comprising complemental substantially Y-shaped tubular sections having tubular conductor and collector engaging ends.

1,626,181. PUMP. CHARLEY E. BURNS, Haynesville, La. Filed Jan. 11, 1926. Serial No. 80,404. 10 Claims. (Cl. 103—204.)



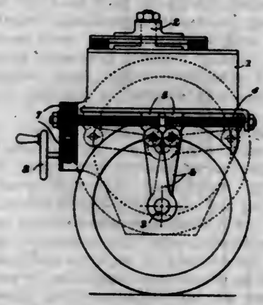
1. In combination, a cylinder, a pump rod, a piston working therein, a material cutter and means to rotate said material cutter telescoping within said pump rod.

1,626,182. ELECTRICAL APPARATUS. JOHN G. CAMPBELL, Dayton, Ohio, assignor, to Delco-Light Company, Dayton, Ohio, a Corporation of Delaware. Filed Feb. 24, 1923. Serial No. 621,093. 5 Claims. (Cl. 172—278.)



2. In an electric motor, the combination with a shaft and a rotor mounted for movement relative to the shaft; a speed responsive clutch for connecting the rotor and shaft; a speed responsive switch for controlling a motor circuit, said clutch and switch each having centrifugally-operated elements disposed at one end of the shaft, and means supported by the rotor adjacent said end of the shaft for supporting said elements of the clutch and switch.

1,626,183. LIGHTER-THAN-AIR CRAFT. JOSÉ S. CANDRAY, San Francisco, Calif. Filed Sept. 30, 1926. Serial No. 138,686. 17 Claims. (Cl. 244—6.)

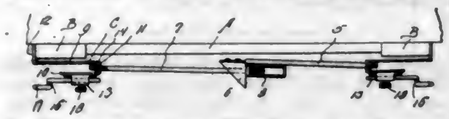


1. An air craft of the class described including, in combination, a stator core, a rotor casing about the core, means for rotatably mounting the casing about the core, lighter than air lift means mounted about the core and in the casing, means for rotating the casing, and propelling means on the casing.

1,626,184. COUPLING MEANS BETWEEN MOTOR TRACTORS AND THEIR TRAILERS. JOSEPH CODER and LOUIS CODER, St.-Marcel-les-Marseille, France. Filed June 25, 1926, Serial No. 118,521, and in France Apr. 26, 1926. 3 Claims. (Cl. 280—33.1.)

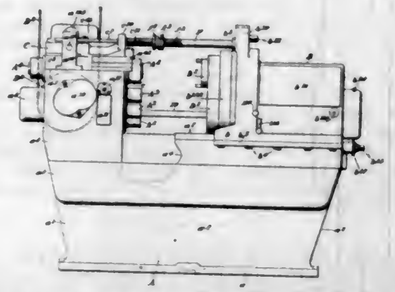
1. Coupling means for uniting trailers to their tractors of the type referred to, comprising in combination with a tractor a vertical shaft mounted to the rear of the back axle of the tractor, a frame pivoting about said shaft, means, mounted above said back axle, for guiding one end of said frame, means for coupling the other end of the frame to the front end of the trailer, screw means for adjusting the inclination of the trailer chassis with respect to the frame, a coupling rod for transmitting the drive from the tractor to the trailer, means for varying the length of said coupling rod, springs for absorbing longitudinal tensile and compressive forces and spring for absorbing vertical forces between the trailer and the tractor.

1,625,185. TRACTOR TRAILER OF THE TYPE CARRIED ON TWO WHEELS. JOSEPH CODER and LOUIS CODER, St.-Marcel-les-Marseille, France. Filed June 25, 1926, Serial No. 118,522, and in France Apr. 26, 1926. 6 Claims. (Cl. 280—33.1.)



1. A supporting wheel for a two wheeled trailer comprising in combination with the trailer a frame pivoted thereto depending sides on the frame forming slides for the wheel axle, left and right handed screws carried horizontally by the frame, nuts thereon, and arms connected to the nuts and to the wheel axle so that the wheel axle is supported by the screws and whereby on the rotation of the screws the wheels can be raised and lowered.

1,626,186. CURTAIN BRACKET. JAMES COLONE, Collinsville, Ill. Filed Mar. 20, 1926. Serial No. 96,256. 1 Claim. (Cl. 156—23.)



A device of the class described including, in combination, a pair of bars, a triangular shaped block on the end of one bar, the other bar piercing the block, a nut on the other bar for adjusting the bars in relation to each other, and side engaging members on the outer ends of the bars, each side engaging member including a U-

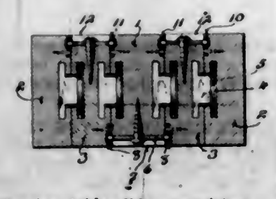
shaped body having its bight portion pierced by one of the bars, one side of the bight portion terminating in an offset extension, a sleeve on the other side of the side

engaging member, a shank slidable in the sleeve, a U-shaped portion merging from the shank and terminating in a hook.

1,626,187. THREADING MECHANISM. ADOLPH L. DE LEEUW, Plainfield, N. J., assignor to The Goss and De Leeuw Machine Company, New Britain, Conn., a Corporation of Connecticut. Original application filed Jan. 30, 1923, Serial No. 615,884. Divided and this application filed Dec. 23, 1924. Serial No. 757,652. 50 Claims. (Cl. 29—38.)

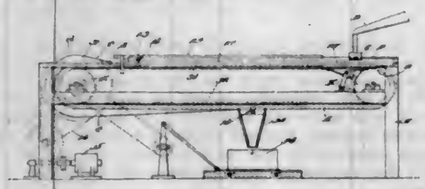
1. A combined threading and tooling mechanism comprising a relatively movable tool-carrier and work-carrier; a head; a spindle slidable in said head for supporting a threading tool; means for preventing relative movement between said head and said work-carrier while simultaneously causing relative movement between said tool-carrier and said work-carrier; and mechanism for positively causing said spindle to function during the last mentioned relative movement.

10. In a metal-working-machine, a bed; a sliding turret-head thereon, comprising a turret, indexing mechanism and locking mechanism for said turret, feed mechanism for said turret-head including speed change-gearing, reversing and speed-controlling devices, and controlling cams, and a feed-shaft with gearing to connect said shaft operatively with the respective instrumentalities of said turret-head; a multiple-spindle-head-stock connected with said bed and comprising a plurality of tool-spindles, one of said spindles being carried by a head mounted slidingly on said headstock, feeding mechanism for said tool-spindle-head, and means to actuate said head-tool-spindle rotatively, and a shaft to operate said feeding mechanism and actuating means; a main actuating gear common to said spindles other than said head-tool-spindle, and individual speed-change gears for each of said spindles; a main driving-shaft and connections between said main shaft and said turret-feed-shaft, said tool-spindle-head and said common spindle-driving-gear respectively, to permit actuation of the several instrumentalities thereof, through said main shaft, by a single source of power, such as a belt or motor.



50. A machine for simultaneously tapping and forming work, said machine combining a work-head and a forming-tool-head; means bringing said heads together and apart to form the work; an auxiliary head; a threading tool mounted shiftably therein; means for maintaining in unitary relation said work-head and said auxiliary-head; and means for causing said threading-tool to act on said work while said relation is being maintained.

1,626,188. SUSPENSION OF AUTOMOBILES AND OTHER VEHICLES. GEORGES HENRI ERNEST DE RAM, Boulogne-sur-Seine, France. Filed Nov. 20, 1922, Serial No. 602,296, and in France Dec. 5, 1921. 4 Claims. (Cl. 267—8.)

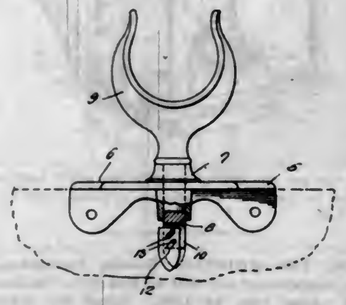


1. In a vehicle suspension, the combination of two springs of different flexibility, and a damping device associated with said springs and adapted to permit the simultaneous action of both of said springs under slow vibrations and to decrease the effectiveness of one of said springs under relatively rapid vibrations.

1,626,189. TABLE SLIDE. HERBERT H. DREW, Watertown, Wis., assignor to Watertown Tableslide Co., Watertown, Wis. Filed Nov. 10, 1924. Serial No. 748,957. 2 Claims. (Cl. 45—115.)

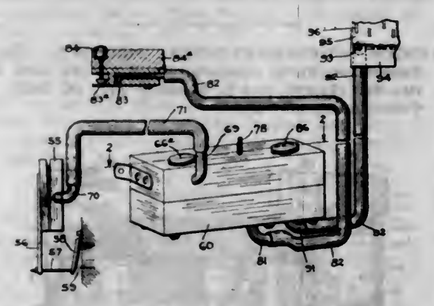
1. An extension table slide comprising a central member having racks secured to its vertical faces adjacent one side and having a pinion secured to its other side, a pair of outer members each having a rack secured to a vertical face adjacent one side, and a pair of intermediate members located between said outer members and said central member and having pinions meshing with the racks on said outer and central members and having racks meshing with the pinion carried by said central member.

1,626,190. HANDLE-BENDING MACHINE. WILLIAM S. ELLIOT, Northampton, Mass., assignor to Pro-phylac-tic Brush Company, Northampton, Mass., a Corporation of Massachusetts. Filed May 2, 1925. Serial No. 27,493. 20 Claims. (Cl. 18—3.)



1. In a machine of the character described and in combination, means for heating the handle locally intermediate its ends, a conveyor to carry the handle past the heating means, and means acting on the handle to displace an unheated part of it laterally and thereby to bend it at the heated portion.

1,626,191. OARLOCK. ERICK G. ERICKSON, Alexandria, Minn. Filed Mar. 9, 1926. Serial No. 93,478. 2 Claims. (Cl. 9—26.)

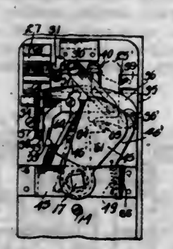


1. In combination with an oar lock and its keeper, wherein the pin of the oar lock is formed at its lower

end with a cross slot, a plate arranged in said slot, said plate being of substantially the same width as the slot but being of greater length than the slot, the lower end of said plate being pointed, said plate provided with a pair of vertically spaced diagonally extending slots, the lower end of the slots being arranged at a point intermediate the sides of the plate, pins extending trans-

versely through the slotted end of the oar lock pin and through the respective slots in the plate, said pins and the cooperating diagonally extending slots permitting the plate to move by gravity whereby one side portion thereof will project beyond the adjacent side of the oar lock pin the projecting portion of the plate adapted to cooperate with the lower end of the keeper to prevent the withdrawal of the oar lock.

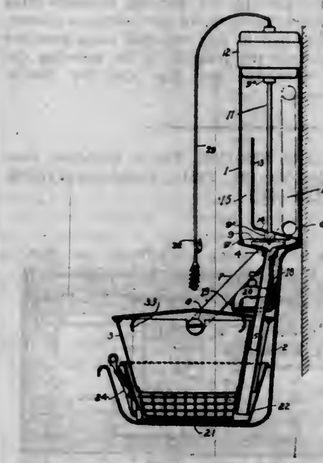
1,626,192. PNEUMATIC-CONTROL DEVICE. STANLEY L. FISHER, Chester, Conn., assignor to Pratt Read Player Action Company, Deep River, Conn. Filed Oct. 23, 1920. Serial No. 418,878. 28 Claims. (Cl. 84—48.)



1. In a pneumatic control device, a power pneumatic, a valve to control the admission of atmosphere and exhaust to said pneumatic, means to supply air below said valve to move the same and means, independent of said first named means, to cut off said air supply.

13. In a pneumatic control device, a controlling valve, a valve port adapted to be opened to operate said valve, and note sheet controlled means to restore said valve to its original position while said valved port is still open.

1,626,193. COIN-CONTROLLED LOCK. NORMAN W. GAYLE, Beech Grove, Ind., assignor to Charles N. Van Cleave, Indianapolis, Ind. Filed Oct. 5, 1923. Serial No. 666,816. 25 Claims. (Cl. 194—74.)

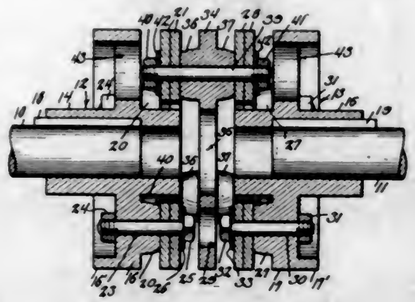


2. In a coin-controlled device, a casing having a coin-slot, a rockarm, means on the rockarm adapted to sus-

tain independently a coin of suitable character, a shutter for the coin-slot, pivoted coaxially with the rockarm, a detent for the shutter, and means whereby said coin

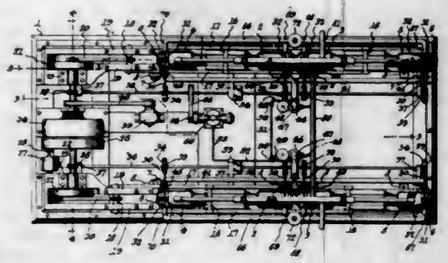
moves the shutter into latching engagement with the detent, and means for releasing the shutter, substantially as set forth.

1,626,194. DISHWASHING MACHINE. NELSON H. HENDERSON, Syracuse, N. Y., assignor to Syracuse Industrial Gas Co., Syracuse, N. Y., a Corporation of New York. Filed Mar. 12, 1924. Serial No. 698,778. 7 Claims. (Cl. 141—9.)



4. In a dish washing machine, the combination with a receptacle for holding the dishes to be washed, of a pump including a casing and a rotor in the casing, intake and discharge conduits leading respectively to and from the suction and pressure sides of the pump, the conduits being supported by the casing and having their other ends free, the intake conduit having its free end provided with a detachable telescoping lower section.

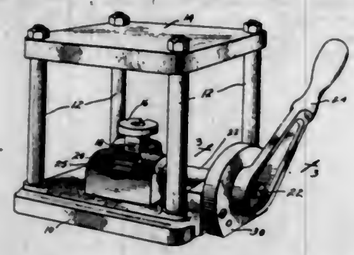
1,626,195. FLEXIBLE COUPLING. WILLIAM A. HILLER, Manor, Tex. Filed June 1, 1926. Serial No. 113,023. 1 Claim. (Cl. 64—96.)



In a flexible coupling of the character described, a pair of spaced disc members having centrally arranged aligned hubs, each of said disc members having an annular series of openings formed therethrough, axially extending opposed centrally bored lug carried by said disc members, a key disc arranged between said first mentioned disc members and having an annular series of apertures formed therethrough each aligning with and arranged between a pair of said aligned opposed lugs, an annular series of lugs projecting from each face of said key disc

each being positioned opposite an opening of the adjacent one of the first mentioned disc members, said key disc lugs being arranged in oppositely directed pairs and having a bore passing therethrough from one side of the key disc to the other, flexible annular coupling elements overlying the lugs upon each side of said key disc and abutting the ends of the lugs of the adjacent one of the first mentioned disc members, securing bolts passing

through each pair of lugs of the key disc and through the adjacent coupling elements to secure the same thereto and securing bolts passing through each lug of the pair of disc members and through the coupling elements lying thereagainst, to secure the coupling disc members thereto, said openings of said pair of disc members being provided and arranged to permit the removal of the securing elements associated with the key disc and the flexible coupling disc elements.

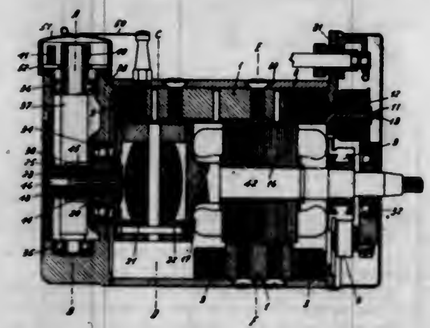


1,626,196. GASOLINE ENGINE. FRANK HOFFNER, Nanticoke, Pa. Filed May 31, 1924. Serial No. 717,062. 1 Claim. (Cl. 123—57.)

In a device of the class described, oppositely disposed cylinders, fuel conduits discharging into the cylinders, valve spindles supported for rotation, throttle valves on said spindles and operating in the conduits, arms on said spindles, a link connecting said arms, a second arm on one shaft, a governor operatively connected with the second arm, a driven shaft, pistons operating in the cylinders, means for connecting the pistons operatively with the driven shaft, a second valve shaft supported for rotation, means for connecting the driven shaft with the second shaft, and means for connecting the second shaft with the governor.

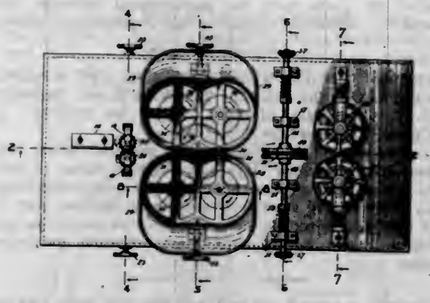
1,626,197. LOCKING MECHANISM. EARL S. HUTTON, Detroit, Mich. Filed Mar. 25, 1926. Serial No. 97,470. 6 Claims. (Cl. 29—89.)

6. In locking mechanism, a rotatable shaft, a notched disk on the shaft, a casing about the disk, a crank on the shaft, said crank having an arcuate portion extending between the disk and the casing and provided with a slot registering with the notch in the disk, a locking member loosely mounted within said notch and slot adapted to be



wedged against the casing to lock the shaft against rotation upon an impulse of rotation applied from the shaft to the disk.

1,626,198. TOY WHISTLE. EUGENE JACQUEMIN, Kent, Wash., assignor of one-half to Henry L. Charles, Kent, Wash. Filed Dec. 13, 1926. Serial No. 154,546. 5 Claims. (Cl. 46—46.)

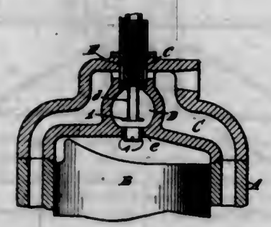


1. A toy whistle, comprising a tubular body member open at each end, its upper end having its forward edge reduced in thickness, and a tubular mouthpiece, open at each end and having its lower end of a form complementary to said upper end, hingedly secured to the member.

1,626,199. DYNAMO-ELECTRIC MACHINE. FRITZ KESSELRING, Furth, Germany. Filed Apr. 14, 1926. Serial No. 102,039, and in Germany Apr. 18, 1925. 5 Claims. (Cl. 171—209.)

1. A dynamo electric machine comprising in combination electro-magnets to produce magnetic fields, an armature shaft journalled by but two bearings, two armatures co-axially arranged side by side, on said shaft, one adapted to generate current for lighting and the other adapted to generate current for ignition, at least one pole of said electromagnets of the light-dynamo having a prolongation adapted to magnetize the ignition armature.

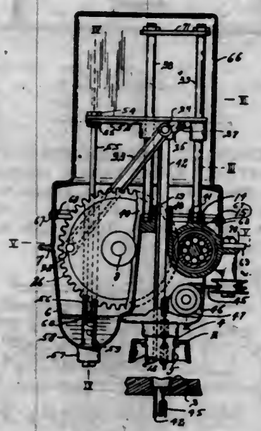
1,626,200. STORAGE-BATTERY GRID-PASTING MACHINE. BERT H. KRAFFT, Cambridge, Mass., assignor, by mesne assignments, to Samuel H. Borofsky, Brooklyn, N. Y. Filed May 14, 1926. Serial No. 109,117. 5 Claims. (Cl. 226—39.)



1. A storage-battery grid-pasting machine comprising in combination two oppositely-disposed paste receptacles, said receptacles being separated for the passage of a grid therebetween and having registering paste outlets, and a member rotatably mounted in each receptacle for forcing the paste through said outlets, said members each having an arm curving upwardly and outwardly from its lower point of support on said receptacle to the wall thereof.

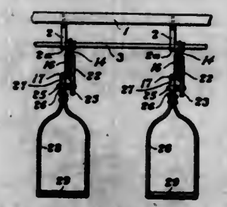
5. A storage-battery grid-pasting machine comprising in combination two oppositely-disposed paste receptacles separated for the passage of a grid therebetween and having registering paste outlets, means rotatably mounted in each receptacle for forcing paste through said outlets, a pair of fabric covered rollers constructed and arranged to permit the pasted grid to pass therebetween, and means for heating said rollers.

1,626,201. FABRIC MATERIAL AND PROCESS FOR OBTAINING SAME FROM CEMENT BAGS. JOSEPH LABO, Fenton, Mich. Filed Mar. 8, 1926. Serial No. 93,321. 4 Claims. (Cl. 8—8.)



1. The process of reclaiming cloth from used cement bags comprising the following steps; removing the seams and ragged portions from said bag to form a single ply fabric, beating said fabric to free the same from coarse particles and dust, mechanically washing said fabric in a hot washing solution, bleaching, rinsing, and extracting the fluid from the fabric.

1,626,202. INTERNAL-COMBUSTION ENGINE. CHARLES E. LUCKE, New York, N. Y., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Mar. 17, 1920, Serial No. 366,511. Renewed Sept. 17, 1926. 12 Claims. (Cl. 123—33.)

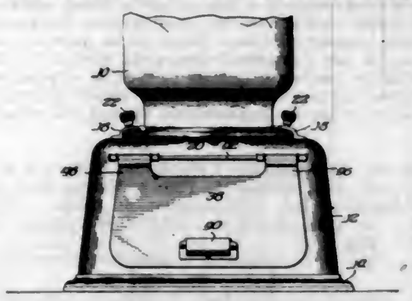


1. The method of feeding liquid or solid fuel to an internal combustion engine cylinder, which consists in compressing air in the engine cylinder and in a precombustion chamber having a restricted opening into the cylinder to ignition temperature, injecting fuel during or at the end of compression in a solid unbroken stream against a hot splash surface near the opening from the precombustion chamber into the cylinder, so as to secure combustion of only a limited portion of the injected fuel, and feeding the fuel to the cylinder by the flow of vapor and air from the precombustion chamber caused by relative pressures within the precombustion chamber and cylinder.

1,626,203. WINDMILL. HERBERT H. MACOMBER, Kendallville, Ind., assignor to Flint & Walling Mfg. Co., Kendallville, Ind., a Corporation of Indiana. Filed Dec. 29, 1922. Serial No. 609,554. 9 Claims. (Cl. 170—47.)

1. A wind motor open top main housing section unit, a closure cap for the unit, transmission mechanism mounted in the unit including a crosshead movable in the cap, and having bearings, a lubricant way above said bearings, and lubricant distributing ducts from the way to said bearings, and cross-head actuated pump means for supplying lubricant to the crosshead lubricant way.

1,626,204. SWING. JOHN J. MCGINTY, New York, N. Y. Filed Feb. 2, 1926. Serial No. 85,419. 2 Claims. (Cl. 272—36.)

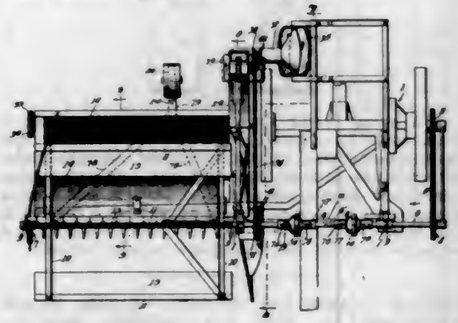


1. A swing having the combination of an operating shaft, means to rock said shaft, a hanger swung by said shaft, a gear carried by said hanger and swingable therewith, a pinion in mesh with said gear, said pinion being joined to a journal mounted in a bearing, said bearing being carried by a member, said member being pivoted in said hanger concentrically with said gear, a seat, and a suspender for said seat being joined to said journal.

1,626,205. CANDY-JAR HOLDER. EDWARD MEASER, Pittsburgh, Pa. Filed Sept. 13, 1923. Serial No. 662,880. 5 Claims. (Cl. 211—7.)

1. In combination, a glass jar containing confections, a pedestal having an open bottom for the jar, a shelf

telescoped in said pedestal to support the contents of the jar, an open bottom for said shell, a tray telescoping



in the bottom of said shell, and means contained in said tray for keeping the confections in the jar in a fresh condition.

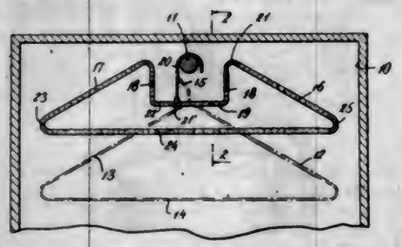
1,626,206. AUTOMATIC AND SEMIAUTOMATIC TELEPHONE SYSTEM. RALPH MORDIN, London, England, assignor to The Relay Automatic Telephone Company, Limited, London, England. Filed Dec. 3, 1923, Serial No. 678,234, and in Great Britain Jan. 5, 1923. 6 Claims. (Cl. 179—18.)

1. An automatic telephone system in which lines are selected by calling an invariable numerical designation comprising a main exchange, a number of lines thereon, a local exchange, a number of lines of the local exchange, a two-wire only junction between the exchanges, apparatus at the local exchange which upon any line thereon becoming a calling line will operate at once to extend this line to the junction, and means located in the main exchange and adapted upon being controlled by the calling subscriber in a particular manner so to modify the conditions of the said apparatus as to cause said apparatus to release the junction.

1,626,207. SEED-GATHERING DEVICE. SHERMAN L. MOSHER, Coffeyville, Miss. Filed Jan. 20, 1921. Serial No. 438,639. 16 Claims. (Cl. 56—207.)

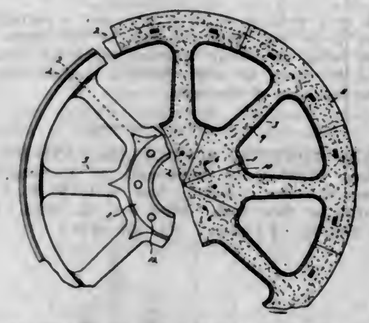
15. In a device of the kind described, grain cutting mechanism provided with a screen arranged to receive the cut grain and permit the seed shed therefrom to pass through the screen, in combination with means for conveying the seed from beneath the screen and delivering the same therefrom, means for regulating the speed of the conveying means, a supplemental conveyor arranged to receive the grain, a supplemental screen arranged to receive the grain from the supplemental conveyor, and means for adjustably operating the supplemental screen.

1,626,208. BINDING FUEL MATERIAL AND METHOD OF PRODUCING SAME. THEODORE NAGEL, Brooklyn, N. Y. Filed May 24, 1924. Serial No. 715,673. 12 Claims. (Cl. 44—14.)



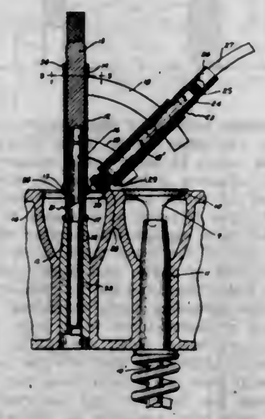
1. The method of making a fuel material which comprises mixing alcohol slops and sulphite liquor in suitable proportions, incorporating the same with comminuted fuel, pressing the same, and heating to between 250° C. and 500° C. to convert the mixture of alcohol slops and sulphite liquor into a hard, water-insoluble, smokeless binder.

1,626,209. SAFETY CRANKING DEVICE FOR INTERNAL-COMBUSTION MOTORS. DANIEL L. OULTON, Everett, Mass., assignor to Oulton Manufacturing Corporation, a Corporation of Vermont. Filed May 25, 1925. Serial No. 32,640. 3 Claims. (Cl. 123—185.)



2. In a device of the character specified the combination of a rotatable one-way clutch member provided with an inset portion having an inclined surface, a second rotatable member provided with a pocket, a third rotatable member arranged to receive cranking force mounted between said rotatable members, said third rotatable member being provided with a slanting hole, a plunger slidably mounted in said hole and arranged to bear at one end upon said inclined surface and to be projected by sliding contact therewith until its opposite end enters the pocket in said second rotatable member, thus forming a driving connection between said rotatable members.

1,626,210. GARMENT HANGER. LEON A. PHILLIPS, New York, N. Y. Filed May 18, 1925. Serial No. 30,891. 3 Claims. (Cl. 223—62.)

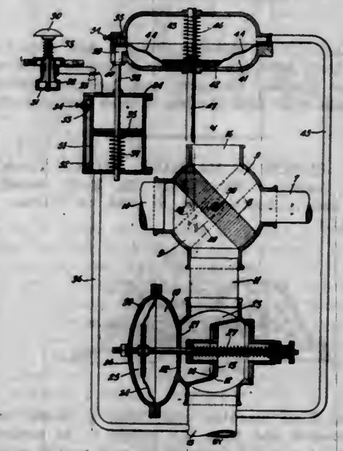


1. A garment hanger comprising a pair of upwardly and inwardly extending garment supporting members, a depressed horizontal portion connecting the inner ends of said supporting members, and a hook connected to said horizontal portion, the upper end of the hook terminating substantially in the horizontal plane passing through the upper ends of said supporting members.

1,626,211. CAST-WHEEL CONSTRUCTION. NED S. REED, Detroit, Mich., assignor to Paige-Detroit Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 27, 1925. Serial No. 26,264. 4 Claims. (Cl. 301—65.)

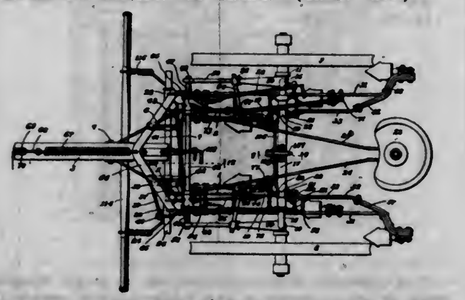
4. The combination with a wheel hub having an annular flange secured thereto and a cast wheel including a felly section opening radially outwardly, hollow spokes and a hollow hub section integral with said spokes and having spaced side walls with a continuous space between their inner terminal edges, the interiors of said spokes, felly and hub communicating and means for securing said cast wheel to said wheel hub including securing elements extending through said hub section and secured to said annular flange.

1,626,212. VALVE-SEAT GRINDER. JOSEPH W. ROY, Detroit, Mich., assignor of fifty-one one-hundredths to Phileas Delage, Detroit, Mich. Filed Apr. 16, 1925. Serial No. 23,529. 6 Claims. (Cl. 51—241.)



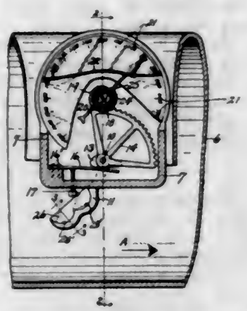
1. A valve seat grinder of the class described, comprising a center pin; a supporting member having a socket for the reception of said center pin; a sleeve threaded on said supporting member and adapted for threading longitudinally thereof; arcuate arms projecting outwardly from said sleeve; a tubular member adjustably carried by said arcuate arms; a grinding member; and means for carrying said grinding member mounted in said sleeve on said arms for regulating the distance of said grinding member from said center pin.

1,626,213. METHOD OF TREATING LIQUID INSULATED TRANSFORMERS. EMIL STENKVIST, Ludvika, Sweden, assignor to Allmanna Svenska Elektriska Aktiebolaget, Vasteras, Sweden, a Corporation of Sweden. Filed June 26, 1926, Serial No. 118,858, and in Sweden July 4, 1925. 1 Claim. (Cl. 175—361.)



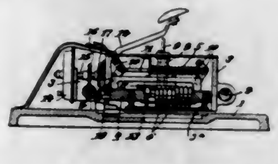
Method of treating transformers intended to operate in an insulating liquid in a closed receptacle, consisting in drying the transformer, filling the receptacle containing it with a dry gas under a pressure slightly higher than that of the atmosphere for storing or transport, expelling the gas and introducing liquid after storing or transport.

1,626,214. SINGLE-TUBE PNEUMATIC-DISPATCH UNIT. JOSEPH J. STOETZEL, Queens Village, N. Y., assignor to G. & G. Atlas Systems, Inc., New York, N. Y., a Corporation of New York. Filed June 9, 1926. Serial No. 114,651. 9 Claims. (Cl. 243—9.)



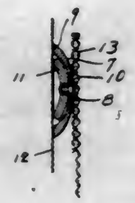
1. In a pneumatic dispatch apparatus, a carrier-transmitting line, a vacuum-producing device, means for connecting the vacuum-producing device to either end of the carrier-transmitting line to thereby cause carriers to travel through the line in either direction, and means for establishing a minimum flow of air through the line between carrier-impelling operations.

1,626,215. CULTIVATOR. CARL G. STRANDLUND, Moline, Ill., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Mar. 20, 1922. Serial No. 544,996. 15 Claims. (Cl. 97—233.)



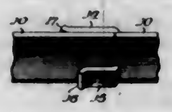
1. In a cultivator, the combination with an arch axle and dirigible wheels, of a frame movably supported on the axle, foot levers pivotally supported on the frame, and connections from said levers to the axle, said levers operable to move the frame laterally and simultaneously steer the wheels in the same direction.

1,626,216. FLOW METER. JOHN F. O. STRATTON, Chicago, Ill. Filed Sept. 7, 1920. Serial No. 408,495. 5 Claims. (Cl. 73—167.)



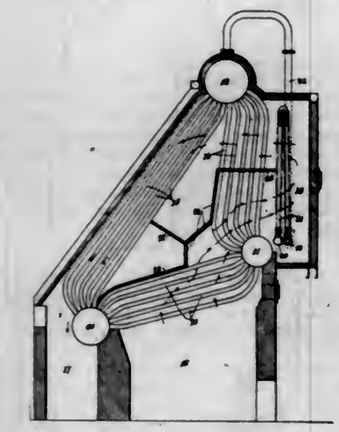
1. A vane or fluid pressure arm for flow meters comprising a blade having a plurality of curved surfaces all facing one general direction and openings extending through said vane and opening in said curved surfaces.

1,626,217. PUNCHING MACHINE. GUSTAV TAUSCHEK, Vienna, Austria. Filed July 28, 1925, Serial No. 46,683, and in Austria Apr. 8, 1924. 5 Claims. (Cl. 164—111.)



1. A punching machine comprising a punch carrier movable toward and from the article to be perforated, a plurality of punches mounted on said carrier movably, and a selector likewise mounted on said carrier movably and determining, according to its position, which of said punches shall be active during the movement of the punch carrier toward said article, one of said punches being constructed differently from the others at the portion controlled by the selector, and the latter having portions movable in different paths for the control of the respective kinds of punches.

1,626,218. GARMENT RETAINER. ABRAHAM WAISMAN, St. Louis, Mo. Filed Feb. 1, 1926. Serial No. 85,140. 3 Claims. (Cl. 241—7.)

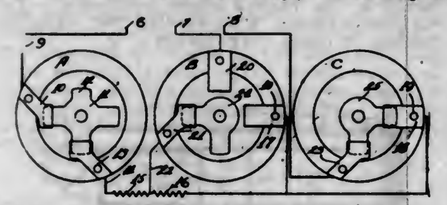


1. A garment retainer formed of a single circular piece of elastic material and being concavo convex in cross section and provided with an opening, the material surrounding said opening being thinner, more flexible and elastic than the remaining portion of the retainer whereby this portion of the retainer may flatten under pressure without distorting the remaining portion of the retainer.

1,626,219. STRIP FOR ROADWAYS. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Company, Chicago, Ill., a Corporation of Delaware. Filed Feb. 8, 1926. Serial No. 86,831. 3 Claims. (Cl. 94—18.)

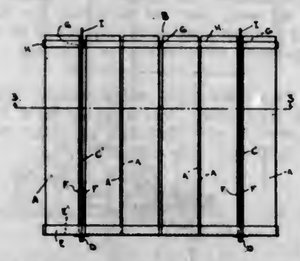
1. A road strip of channel form and a plurality of tongues projecting from the end of the strip, said tongues being alternately deflected oppositely from the body of the strip, the upper of said tongues being below the top edge of the strip.

1,626,220. COMBINED SUPERHEATER AND BOILER. HAROLD O. WOOLLEY, Maplewood, N. J., assignor to Power Specialty Company, New York, N. Y., a Corporation of New York. Filed Oct. 25, 1922. Serial No. 596,700. 2 Claims. (Cl. 122—478.)



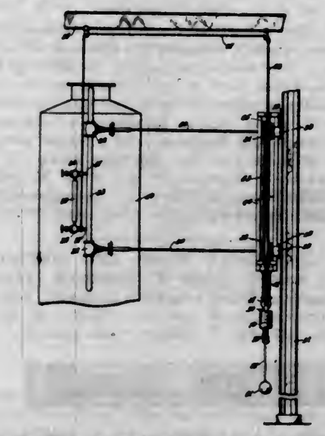
1. A combined boiler and superheater, comprising in combination, an upper steam drum, a pair of lower water drums, banks of boiler tubes connecting the said drums, and including a horizontal, a vertical and an inclined bank of tubes, a superheater having vertically arranged tubes disposed at one side of the vertical bank of tubes in a superheater chamber disposed above and to the side of the lower water drum connected to the vertical bank of tubes, and baffles arranged intermediate the boiler tubes and having connected therewith a horizontally extending baffle extending through the vertical bank of boiler tubes to a point adjacent the superheater, said baffles being adapted to direct all of the hot gases of combustion first over the horizontal and thence laterally over the vertical tubes and thence transversely across the tubes of the superheater whereby all of the gases are tempered in temperature before reaching the said superheater.

1,626,221. ELECTRIC HEATING SYSTEM. GEORGE R. BLAKESLEY, Janesville, Wis. Filed Dec. 7, 1922. Serial No. 605,355. 13 Claims. (Cl. 219—20.)



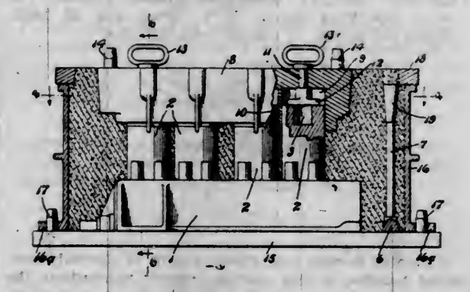
1. In combination, a two part heating unit, a three wire supply system comprising two main lines and a neutral line, and means comprising an electrical switch

for selectively connecting the two parts of said unit in series across the main line voltage, or connecting one



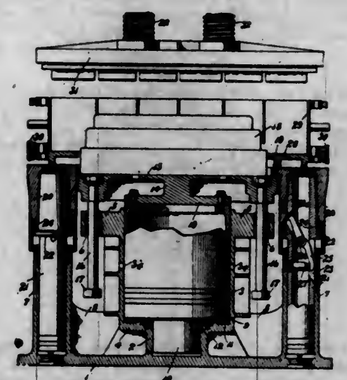
part of said unit across one main line and the neutral line or for connecting the two parts in series across one main line and the neutral line.

1,626,222. ICE-CAN CARRIER. GEORGE B. BRIGHT and RALPH N. COLE, Detroit, Mich., assignors to George B. Bright Co., Detroit, Mich., a Corporation of Illinois. Filed Aug. 21, 1922. Serial No. 583,332. 11 Claims. (Cl. 62—157.)



1. In an ice freezing apparatus, the combination with a plurality of individual ice cans, of a basket having means for carrying said cans comprising an upright adapted to pass between adjacent cans, a horizontally extending annular member secured to the upper end of said upright for embracing the cans, and a horisontally extending member also secured to said uprights affording support for the lower ends of the cans.

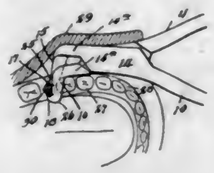
1,626,223. DISTILLING APPARATUS. JAMES H. BURLINGHAM, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Texas. Filed Oct. 18, 1921. Serial No. 508,437. 4 Claims. (Cl. 73—54.)



1. In distilling apparatus for inflammable liquids the combination of a still, an indicator spaced therefrom for indicating the level of liquid therein, conducting passages from the indicator to the still, each passage having a control valve for closing the passage, automatic means for closing the valves comprising cable drums operatively connected with the respective vives, means for rotating the drums, a trigger for normally restraining said rotating means, auxiliary means for withdrawing the trigger and releasing the rotating means including a weight suspended above said trigger, and means adapted to be severed by the heat of combustion disposed adjacent the indicator and normally supporting said weight.

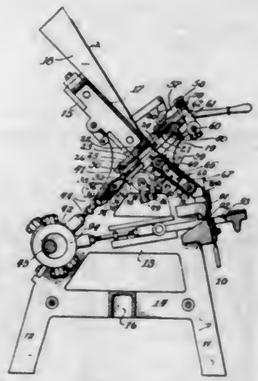
1,626,224. MOLDER'S PATTERN. DONALD J. CAMPBELL, Muskegon Heights, Mich. Filed Dec. 3, 1924. Serial No. 753,571. 3 Claims. (Cl. 22—158.)

1. In a device of the class described, a lower pattern member formed with spaced apart recesses in its upper side near each end thereof, an upper pattern member located over the upper end of the lower pattern member and telescopically mounted thereon, and manually operable means mounted on said upper pattern member adapted when moved to one position to enter said recesses and when in another position bridging said recesses, whereby said upper pattern member is adapted to be located in two different positions, one lower than the other upon said lower pattern member.



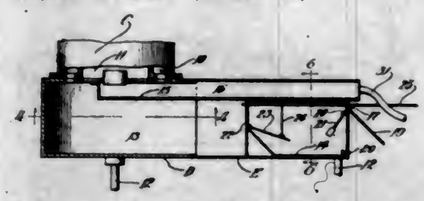
1,626,225. MOLDING APPARATUS. DONALD J. CAMPBELL, Muskegon, Mich. Filed July 20, 1925. Serial No. 44,733. 23 Claims. (Cl. 22—29.)

5. In a molding machine, a stationary supporting fixture including a base, a relatively small and short cylinder extending vertically from the base and a larger and longer cylinder extending from and above the first cylinder, a piston located within the larger cylinder and having a cylindrical projection at its lower end adapted to enter the smaller cylinder, a table carried at the upper end of the larger piston, a pattern located on and above



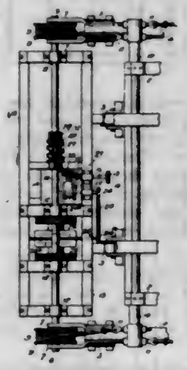
the table, a second table having an opening for the passage of the pattern bearing against the upper side of the first table, a flask carried by the second table around the pattern, means for alternately entering air into the smaller cylinder below said lower cylindrical extension to the piston and exhausting the air therefrom, whereby said cylinder is alternately elevated and dropped and sand within the flask around the pattern jolted and condensed, a squeezing head adapted to be located above the flask, and means for elevating the piston by directing compressed air into both cylinders thereby forcing the sand within the flask against the lower side of the squeezing head, substantially as described.

1,626,226. DENTAL FORCEPS. OSIAS CANTOR, Sea Gate, New York Harbor, N. Y. Filed Aug. 20, 1925. Serial No. 51,344. 8 Claims. (Cl. 32—34.)



1. Dental forceps comprising a pair of pivotally connected handles, a body portion formed intermediate the ends of said handles, adjacent said pivotal connection, a pair of substantially parallel jaws extending laterally and downwardly in a forwardly inclined plane from the forward end of said handles and said body portion, each jaw being formed with a beak, integral therewith, extending angularly downward therefrom in said forwardly inclined plane of the jaws and adapted to be actuated by said handles.

1,626,227. MACHINE FOR MAKING METAL BINDING STRIPS. JOHN W. DIXON, Maywood, Ill. Filed Oct. 16, 1924. Serial No. 743,867. 17 Claims. (Cl. 164—59.)



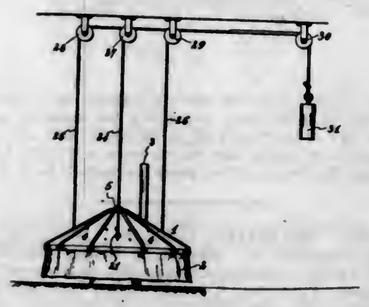
1. In a machine of the class described, the combination of a frame provided with a support for a blank to be severed, a plurality of stop fingers normally projecting beyond said support, a frame upon which said fingers are mounted, a cutting knife, means for retracting the finger frame and fingers concurrently with the advance of the cutting knife, means for adjusting the fingers individually with respect to the finger frame, and means for adjusting the finger frame to position the entire bank of fingers, with relation to the cutting line of the knife substantially as described.

1,626,228. AIR CONTROL FOR OIL BURNERS. FRANK S. EGLOFF, Riverside, Ill., assignor, by mesne assignments, to The Phoenix Burner Corporation, a Corporation of Illinois. Filed Apr. 29, 1926. Serial No. 105,392. 6 Claims. (Cl. 158—91.)

1. In combination with a burner having a stack connection, an air control in which is comprised a passage in communication with the burner, means extending transversely of the passage forming a narrow mounting, a damper for closing the passage having a portion of itself bent back to overlie the mounting whereby to pivotally support the damper thereupon, and a weight which counterbalances the damper in a manner to normally hold the same open but to permit the damper to move toward a closed position in response to an increased draft in the stack, substantially as described.

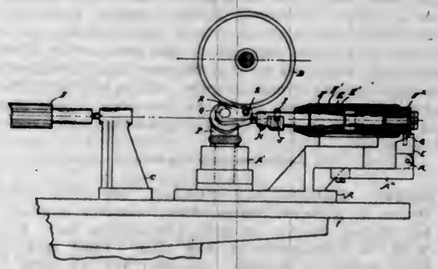
1,626,229. TRANSMISSION MECHANISM. ROBERT A. FONTAINE, Martinsville, Va., assignor to R. C. Anderson, Montreat, N. C. Filed July 13, 1921. Serial No. 484,330. 8 Claims. (Cl. 192—141.)

1. In a truck dump body moving mechanism, a drive shaft, a driven shaft, a worm on the driven shaft equipped with stops, a lever control mechanism for effecting the rotation of the driven shaft in one direction or the other, a frame rotatably mounted on the driven shaft in straddling relation to the worm thereon, an operative connection between the frame and the lever, and a finger pivoted on the frame with its free end traveling along the worm and adapted to be engaged by the stops for swinging the frame and moving the lever when the driven shaft has made a predetermined number of revolutions.



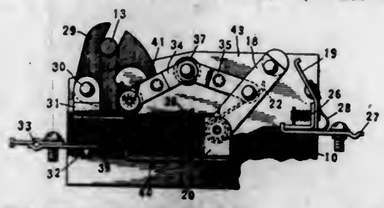
1,626,230. COMPOSITE GEAR AND METHOD OF MAKING SAME. LOUIS T. FREDERICK, Valparaiso, Ind., assignor to Fibroc Insulation Company, Valparaiso, Ind., a Corporation of Indiana. Filed Aug. 13, 1923. Serial No. 657,181. 5 Claims. (Cl. 154—2.)

1. The process of making gears having webs of reduced thickness, consisting in assembling flatwise a plurality of circular layers of woven fabric of the full diameter of



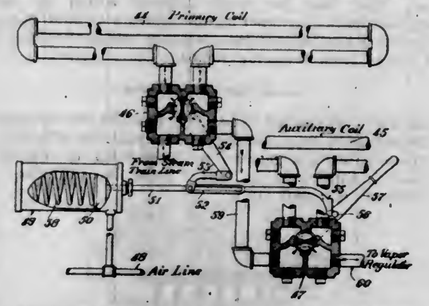
the gear in all directions, and a plurality of flat rings of woven fabric upon both sides of the first mentioned layers, said rings being superposed and forming the rim portion of the gear, said rings and layers being impregnated with a binder capable of hardening under heat, heating said rings and layers, and simultaneously compressing said rings and layers in a direction normal to their surfaces, and to such extent as to produce a greater aggregate reduction of thickness in the rim than in the web portion.

1,626,231. CHICKEN HOVER. FREDERICK FRENGLE, Cotati, and FRANCIS D. ROHAN, Petaluma, Calif., assignors to Pride of Petaluma Brooder Stove Company, Petaluma, Calif. Filed Dec. 27, 1923. Serial No. 682,993. 4 Claims. (Cl. 119—31.)



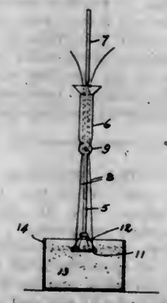
1. A hover comprising a conical canopy, an apron depending from the outer edge of said canopy, said canopy being formed of a plurality of triangular panels, a cone to which the apexes of said panels are secured, flanges formed on the edges of said panels, removable joining strips adapted to engage said flanges to hold the panels together, a plurality of bars secured to the inside of the canopy, reinforcing rods extending between said bars, and secured thereto, hanger straps secured to said bars, ropes secured to said hanger straps, and extending over sheaves, and a counter weight at the end of the ropes.

1,626,232. TRIMMING DEVICE. ANDREW A. GAGARIN, Detroit, Mich., assignor to Gear Grinding Machine Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 2, 1923. Serial No. 610,281. 6 Claims. (Cl. 125—11.)



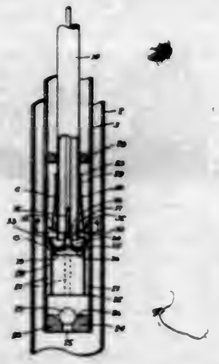
1. In a trimming mechanism for grinder wheels, a plurality of trimming points for independently trimming different portions of the grinder wheel to exactly conform to the contour of the work, said points being rotatable about a common axis through arcs having different radii.

1,626,233. MULTIPLE-CIRCUIT SWITCH. BENJAMIN E. GETCHELL, Plainville, Conn., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn., a Corporation of Connecticut. Filed Apr. 25, 1925. Serial No. 25,773. 6 Claims. (Cl. 200—113.)



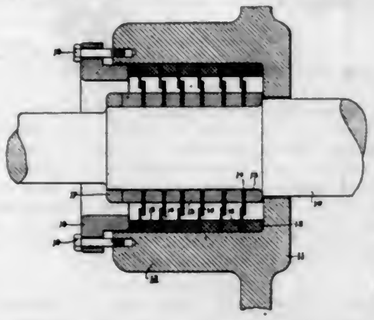
1. The combination of two switch units each having a thermostatic member and a spring for automatically opening its own circuit, a single crank for closing the circuit through both units and means whereby the automatic opening of one switch opens the other.

1,626,234. CAR-HEATING SYSTEM. EGBERT H. GOLD, Chicago, Ill. Filed Apr. 4, 1922, Serial No. 549,383. Renewed Oct. 22, 1925. 23 Claims. (Cl. 237—6.)



4. In combination with a railway car, a radiator comprising two sections, valves to control the circulation through said sections separately, a conduit to contain air under pressure, and means responsive to increase and decrease of pressure in said conduit provided with operating connections with said valves whereby at decreased air pressure one of the valves is held open and the other valve held closed, while at high air pressure both valves are free for manipulation in either direction.

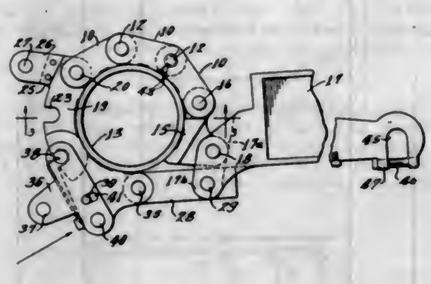
1,626,235. METHOD OF APPLYING A GETTER TO VACUUM DEVICES. DANIEL SNYDER GUSTIN, Newark, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Sept. 12, 1922. Serial No. 587,654. 2 Claims. (Cl. 176—2.)



1. The method of applying powdered clean-up-agent material to a vacuum device which comprises dipping a portion of the internal structure of said device into such material.

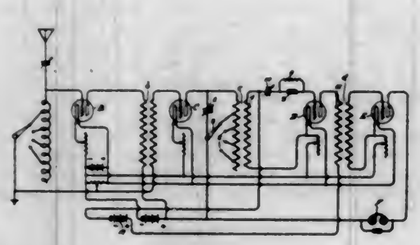
1,626,236. MEANS AND METHOD OF ELEVATING FLUIDS. CHARLES O. HASKELL, Hollywood, Calif. Filed May 11, 1925. Serial No. 29,520. 15 Claims. (Cl. 103—232.)

1. An apparatus of the class described including a delivery tube, fluid jet means disposed within the said tube, and means actuated by the pressure of fluid issuing from the jet to prevent the discharge orifice of said fluid jet means from becoming fouled.



1,626,237. TURBINE GLAND. FRANCIS HODGKINSON, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 2, 1921. Serial No. 482,284. 2 Claims. (Cl. 286—10.)

1. A labyrinth packing comprising a rotatable shaft, a series of annular packing discs carried by the shaft, a casing member, a series of annular packing discs carried by the casing member and interleaving with the packing discs carried by the shaft, the distances intervening between the nearest adjacent interleaving packing discs increasing progressively in the direction of steam flow, and means for varying the distances intervening between the nearest adjacent interleaving packing discs.

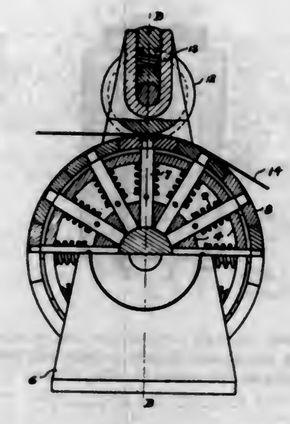


1,626,238. CHAIN PIPE WRENCH. WILLIAM G. HUGHES, Downey, Calif. Filed Dec. 17, 1925. Serial No. 75,971. 5 Claims. (Cl. 81—66.)

1. A chain pipe-wrench comprising a lever having a slotted head and nose, grip links rockably mounted in said head, said point of mounting being below the center of the pipe when the wrench is positioned for use, a chain composed of links connected at one end to the grip links, latch links connected to the other end of the chain, said latch links having outwardly opening recesses in their outer edges, connector bars mounted in the nose of the lever, said point of mounting being below the point of grip link mounting, latch links connected to the other ends of said connector bars, said last latch links having outwardly opening recesses in their outer edges and being adapted to be received between the latch links con-

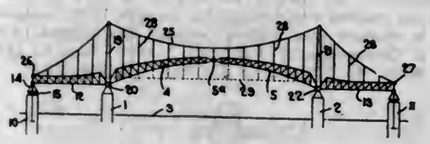
nected to the chain and thereby register the recesses of both sets of latch links, and a lock bar rockably mounted on one of said sets of latch links, said bar being adapted to be swung into the recesses in the latch links and lock the links together when the wrench is on a pipe.

1,626,239. RECEIVING CIRCUIT. LEROY D. KELLOGG, Deerfield, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 6, 1922. Serial No. 592,681. 4 Claims. (Cl. 250—27.)



2. A receiving circuit for high frequency oscillations including a tuned circuit upon which the oscillations are impressed, a tube with filament, grid and plate, said filament connected to one terminal of said circuit and said grid connected to another terminal thereof, and a conductor leading from the plate and connected to the conductor leading from said grid to said other terminal and operatively connected to said filament only through the terminals of said circuit in series, said conductor including between the point that it is connected to said plate and to the grid circuit a translating winding and a source of potential.

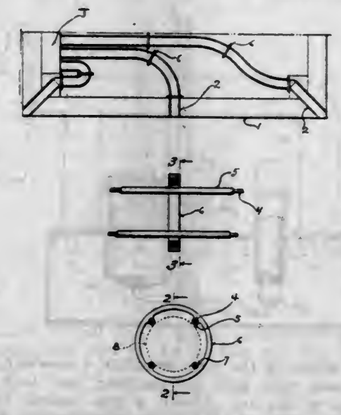
1,626,240. EXPANSIBLE PULLEY OR THE LIKE. WILHO A. KOSKEN, Boston, Mass., assignor to Steadylite Motion Picture Machine Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 30, 1917, Serial No. 382,822. Renewed Aug. 18, 1922. 3 Claims. (Cl. 64—8.)



1. The combination with a suitable support of a wheel or pulley journalled for rotation in said support, said wheel or pulley comprising radially movable parts, and an adjusting spindle having threaded engagement with the support to permit longitudinal adjustment of the spindle, said spindle including a tapered rim adjusting

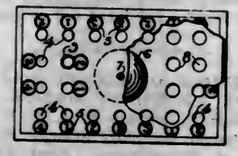
portion adapted to be normally stationary and having slidable engagement with said radially movable parts

which circumferentially traverse the periphery of the tapered portion during rotation of the wheel.



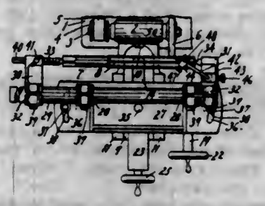
1,626,241. COMBINED SUSPENSION AND ARCH BRIDGE. GREGORY G. KRIVOSHEIN, Prague, Czechoslovakia, assignor of one-half to John R. Freeman, Providence, R. I. Filed July 26, 1926. Serial No. 124,795. 15 Claims. (Cl. 14—18.)

1. A combined suspension and arch bridge comprising two piers, an arch having a fixed bearing on one pier and a sliding bearing on the other pier, fixed tower bearings on the piers, towers pivotally mounted on the tower bearings, abutments at the ends of the bridge, vertically anchored sliding bearings on the abutments, side strut members pivotally connected to the ends of the arch and to the respective sliding bearings on the abutments, a chain extending over and depending between the towers, the ends of the chain being connected to the ends of the respective strut members, and a plurality of vertical stress members connecting the arch and strut members and the chain at regular intervals.



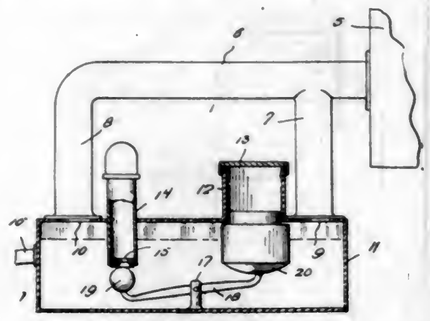
1,626,242. DUCTILE-WIRE TROUGH FOR BILLIARD TABLES. FRANK LANZA, Philadelphia, Pa. Filed Aug. 25, 1926. Serial No. 131,389. 1 Claim. (Cl. 273—11.)

A flexible trough for billiard tables adapted to be bent to the desired shape to correspond to the requirements of a billiard table, said trough comprising a plurality of spaced parallel ductile wires covered with a protecting sheath of soft material and a plurality of ring-like spacing members surrounding said wires and having inwardly projecting regularly spaced ears provided with recesses in which the wires are received, whereby said wires are



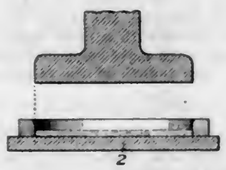
held against shifting in said ring-like spacing members and are also held projected radially inwardly of said ring-like spacing members.

1,626,243. GAME. JAMES I. LEE, Washington, D. C. Filed Sept. 20, 1926. Serial No. 136,644. 4 Claims. (Cl. 273—134.)



1. A game apparatus including an indicating device having a bell inclosed within a box, which when shaken produces a sound by the contact of a loose ball; which ball when at rest indicates the extent of the move of a pawn on a game board with surface devised to represent a variety of moves, each move being determined by indicia corresponding to the indicia of the indicating device.

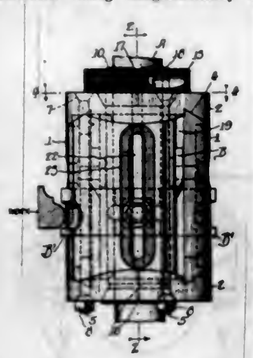
1,626,244. GRINDING ATTACHMENT FOR REAMERS. ARTHUR C. LINDHOLM, Springfield, Mass. Filed Dec. 27, 1922. Serial No. 609,321. 3 Claims. (Cl. 51—225.)



1. The combination, in an attachment of the class described, with a bed, a vertical grinding-wheel stand mounted on said bed, and a horizontal support attachable at one end to the front side of said stand above said bed, and extending outwardly from said stand clear of and otherwise unsupported by the grinder, of work-holding means movably mounted on said support, in operative position relative to the grinding-wheel.

1,626,245. SEPARATOR. WILLIAM M. LITTLE and JESSE L. SHERMAN, Norphlet, Ark. Filed Sept. 4, 1925. Serial No. 54,551. 1 Claim. (Cl. 210—54.)

In a device of the class described, a reservoir, a tank at a lower level than the reservoir, said tank having openings in the top thereof, a pipe leading from the reservoir and having branches communicating with the said openings, a cylindrical extension provided at the top of the tank between the branches, a cap for the extension, a pipe extending through the top of the tank between the branches, a valve seat in the inner end of the second pipe, a post rising from the bottom of the tank, a rocker arm pivoted intermediate its ends to said post, a valve on one end of the rocker arm for association with the valve seat, a float on the other end of the rocker arm having a reduced portion slidable in the cylindrical extension, and a drain pipe at one end of the tank above the level of the inner end of the second pipe.



1,626,246. ARTICLE OF BONDED GRANULAR MATERIAL AND METHOD OF MAKING THE SAME. HARRY C. MARTIN, Niagara Falls, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Filed Nov. 13, 1924. Serial No. 749,773. 19 Claims. (Cl. 51—280.)

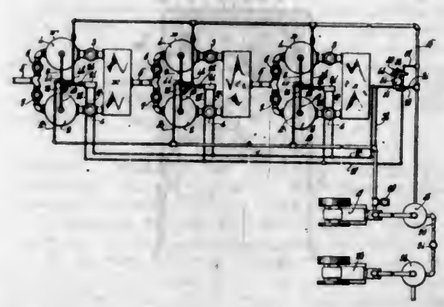
1. An article of bonded granular material, formed from a mixture comprising a synthetic resin and grains having their surfaces moistened with a resin solvent, substantially as described.

1,626,247. HIGH-SPEED SAFETY CUTTER HEAD. LOUIS T. MEDHOLDT, Rockford, Ill., assignor to Mattison Machine Works, Rockford, Ill., a Corporation of Illinois. Filed Feb. 24, 1925. Serial No. 11,059. 9 Claims. (Cl. 144—230.)

1. A sectional cutter head for wood-working machines having, in combination, two end sections and a plurality of side sections, said side sections having beveled ends and the end sections having upon their inner sides correspondingly beveled surfaces similar in number to the number of side sections; bolts extending through said end sections to clamp the end sections and side sections together, each side section having upon its inner side a groove through which one of the bolts extends, space being provided between adjacent side sections to form knife-receiving slots; knives lying in said slots, each of said side sections being longitudinally slotted, and a

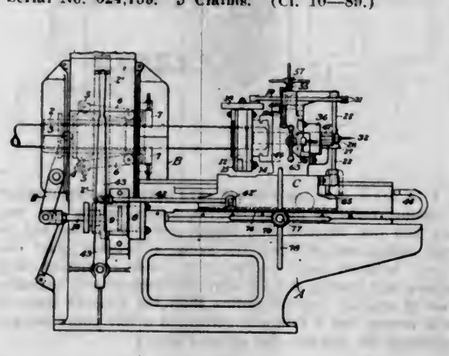
bolt extending through each of the last mentioned slots and through one of said knives to hold said knife against the inner side of the adjacent side section.

1,626,248. ALLOY. PAUL D. MERICA, Westfield, and JAMES S. VANICK, Elizabeth, N. J., assignors to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 26, 1925. Serial No. 58,739. 5 Claims. (Cl. 75—1.)



1. As a new article of manufacture, a corrosion resistant cast iron containing carbon within the usual ranges for cast iron and containing nickel from 5% to 35% and chromium from 2% to 15%, nickel being present in greater percentage than the chromium substantially as described.

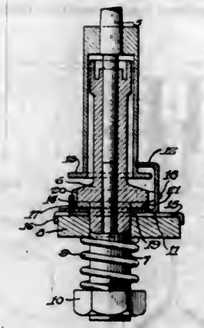
1,626,249. ROTARY CORE DRILL. ROBERT B. MORAN and ARTHUR F. SPENGLER, Los Angeles, Calif., assignors to Spengler Core Drilling Company, Los Angeles, Calif., a Corporation of California. Filed July 1, 1924. Serial No. 723,454. 9 Claims. (Cl. 255—72.)



1. A rotary core drill having a core receiving bore provided with annular toothlike shoulders upon which cuttings may pack during the operation of the drill, said drill including a hollow tool carrying shoe, a hollow tool securing bushing mounted on the lower end of the shoe, and an end mill secured in the lower end of said bushing.

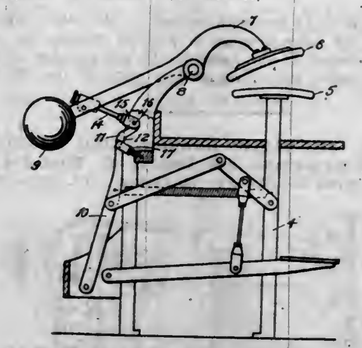
1,626,250. PUMPING SYSTEM. JOHN OLIPHANT, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 8, 1922. Serial No. 559,395. 17 Claims. (Cl. 105—239.)

1. In a displacement pumping system, a plurality of displacement pumping units each comprising at least two displacement tanks, means for supplying and exhausting fluid to said tanks including separate control valves for each of said units, separate servo-motors each controlling one of said controlling valves, and a common pilot valve for controlling said several servo motors.



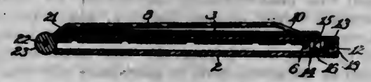
1,626,251. PIPE-THREADING MECHANISM. HARLEY D. PENNINGTON, Pittsburgh, Pa., assignor to United Engineering and Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 13, 1923. Serial No. 624,759. 5 Claims. (Cl. 10—89.)

4. In pipe-threading mechanism, a bed having a pair of parallel tracks, a threading die, a carriage for said die having a plurality of anti-friction rollers in engagement with each of said tracks, a bearing portion for each of said rollers carried by said carriage, and a member supported by said bed adjacent each of said tracks and substantially co-extensive in length therewith, said member having a downwardly facing shoulder above and parallel to the corresponding track, the bearing portions of the rollers engaging the corresponding track slidably engaging said shoulder, substantially as described.



1,626,252. SPINDLE RETAINER. JAMES ROSE, Olean, N. Y. Filed Apr. 3, 1926. Serial No. 99,603. 4 Claims. (Cl. 118—65.)

1. The combination with a spindle of a bolster on which said spindle is journaled, a retainer movable into and out of operative position for holding said spindle on said bolster, an offset pin about which said retainer is eccentrically movable with relation to said bolster, a stop on said bolster for determining the operative posi-

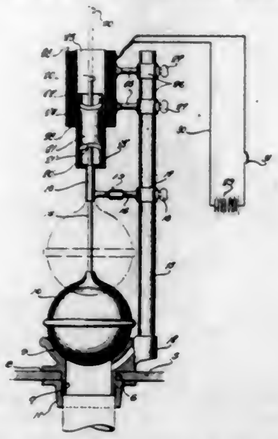


tion of said retainer and a slot in said bolster adapted to cooperate with said pin for holding said stop against movement.

1,626,253. PRESSING APPARATUS. MORRIS ROSENBLUM, Pittsfield, Mass. Filed Jan. 5, 1927. Serial No. 159,173. 2 Claims. (Cl. 68—9.)

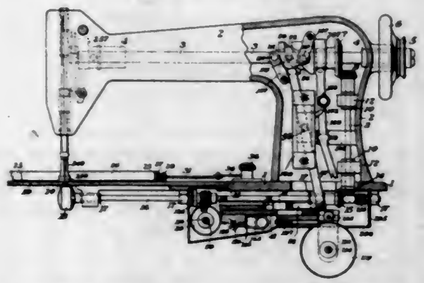
1. In pressing apparatus, the combination with a bed and a head movable toward and from the same, a swinging arm supporting the head, operating means for the head, including a toggle lever and a link connecting the lever and arm, a stop for the toggle lever, said lever having a recessed portion that receives the stop, and an abutment member adjustably mounted on the lever and projecting into the recessed portion thereof, said abutment member being adapted to engage the stop.

1,626,254. HAIR CURLING AND WAVING DEVICE. AUGUSTUS H. SEXTON, Philadelphia, Pa., assignor to David L. Short, Philadelphia, Pa. Filed Feb. 18, 1926. Serial No. 89,099. 6 Claims. (Cl. 132—41.)



1. A hair curling and waving device including a curler rod, a head rotatively connected to one end of the rod, a clamp bar hinged to the rod adjacent to the head, and a pair of retaining rods hingedly connected to the head and provided with a latch device to rotatively engage the opposite end of the curler rod.

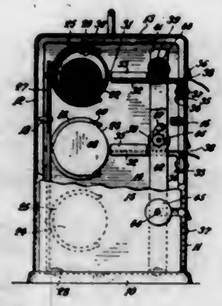
1,626,255. PLUMBING FIXTURE. HERMAN ROTH, Wauwatosa, Wis. Filed Apr. 16, 1925. Serial No. 23,560. 10 Claims. (Cl. 4—67.)



1. In a device of the character described, an outlet, a valve member normally closing the outlet, a solenoid

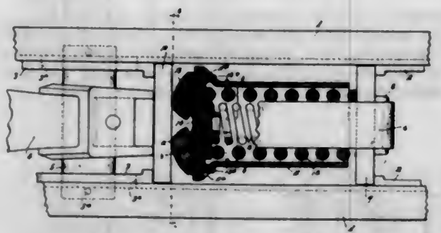
disposed above the outlet, an armature normally resting in an inactive position and adapted to be attracted to the solenoid upon energization thereof, and a connection between the valve member and armature permitting a lim-

ited movement of one with respect to the other, whereby, with the valve member in position closing the outlet, a movement of the armature by energization of the solenoid moves the valve member with it free of the outlet.



1,626,256. AUTOMATIC EMBROIDERING MACHINE. LEON SCHWARZMANN, New York, N. Y. Filed Nov. 2, 1921. Serial No. 512,184. 69 Claims. (Cl. 112—102.)

1. An embroidering machine, comprising a needle, a bed plate, a power shaft, means for holding the fabric to be embroidered in stretched condition, a fabric feeding mechanism for moving the stretched fabric variable amounts in any desired direction radially of the needle, a feed predetermining mechanism, a pattern cooperating with said feed predetermining mechanism for limiting the movement thereof in one direction, means for positively moving the feeding mechanism, and means separate from the pattern for setting the feed predetermining mechanism by the power shaft in accordance with the pattern, substantially as described.



1,626,257. BANDAGE-DISPENSING DEVICE. JOHN A. SWANSON, Waltham, Mass., and ARNOLD A. POLLAK, Waterbury, Conn. Filed Oct. 27, 1924. Serial No. 745,995. 2 Claims. (Cl. 211—83.)

1. In a bandage-dispensing device, a casing having a slot in one side, a holder in said casing, a removable hollow supporting container carried by said holder for loosely carrying a bandage roll, said container having a slot in alinement with the slot in said casing, a horizontal guiding platen located between said supporting container and said casing, and a manually-operated roller

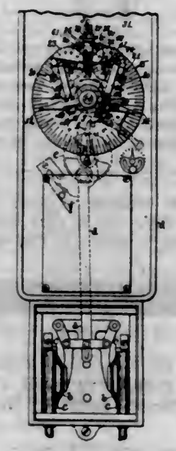
pressing against said platen for propelling a strip of bandage along said platen and out through the slot in said casing.

1,626,258. LEVER DRAFT GEAR. EDWIN C. WASHBURN, Englewood, N. J. Filed July 2, 1921. Serial No. 482,037. 9 Claims. (Cl. 213—27.)

1. A draft gear for railway cars having in combination a casing, resilient means therein, levers having one convex and one concave side loosely pivoted at one end to said casing and abutting the same, a follower plate disposed between said means and levers abutting said means and having convex surfaces respectively engaging and of slightly smaller radius than the concave sides of said levers, and a follower plate and a flat plane surface engaging the convex side of said levers.

1,626,259. SECTIONAL PARTITION OR PANEL STRUCTURE. FRANK B. WHEAT, Los Angeles, Calif. Filed Dec. 10, 1926. Serial No. 153,977. 9 Claims. (Cl. 20—4.)

1. A sectional partition or panel structure comprising two juxtaposed sections, a pilaster separable from the sections and overlying the joint between said sections, and means for securing said pilaster to said sections, said means also serving as a lock for securing said two sections together.

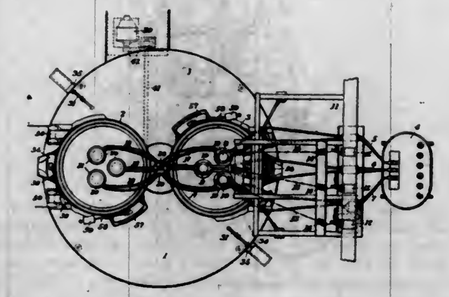


1,626,260. METHOD OF PRODUCING FIRED CERAMIC BLOCKS. PAUL G. WILLETTS, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Sept. 23, 1926. Serial No. 137,388. 5 Claims. (Cl. 25—157.)

1. The method of producing a fired ceramic block having substantially equal opposite faces, from material that tends to shrink unequally during firing, which method comprises placing the block upon a support of material which, during firing, will shrink at least as much as said block, and subjecting the said block and said support to a temperature at which said block tends to shrink unequally.

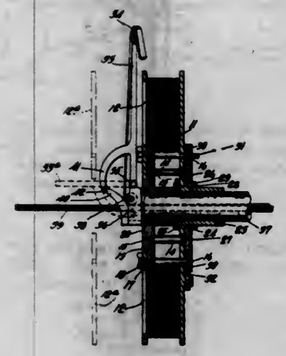
1,626,261. METHOD OF MAKING REFRACTORY BLOCKS. PAUL G. WILLETTS, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Oct. 13, 1926. Serial No. 141,428. 4 Claims. (Cl. 25—157.)

1. In the manufacture of refractory blocks which during firing, shrink unequally at top and bottom, the process of producing such a block having equal opposite faces that comprises making one of such faces smaller than the opposite face, and firing the block upon a substantially non-shrinking support with said smaller face down.



1,626,262. TIME SWITCH. JOHAN M. ANDERSEN, Boston, Mass., assignor to Albert & J. M. Anderson Manufacturing Company, Boston, Mass., a Corporation of Maine. Filed May 16, 1922. Serial No. 561,426. 7 Claims. (Cl. 161—1.)

7. A selective mechanism for time operated devices, comprising a rotatable time indicating dial, a screw shaft carried by said dial, a gear carried by said dial and cooperating with said screw shaft to be rotated thereby, a crank carried by said gear and adjustable thereon to lengthen and shorten the same, a rotatable device and a link connecting the latter with said crank to positively rotate said rotatable device by said gear.

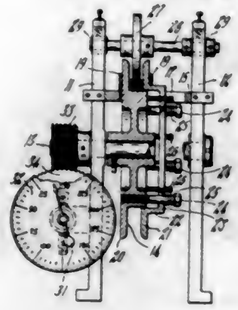


1,626,263. FURNACE AND METHOD OF OPERATING THE SAME. FRANK W. BROOKE, Pittsburgh, Pa., assignor to William Swindell and Brothers, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 11, 1922. Serial No. 593,793. 24 Claims. (Cl. 204—64.)

1. The method of operating electrical furnaces which consists in melting down the charge in one furnace and refining a similar charge in another furnace in substantially the same length of time, and maintaining at

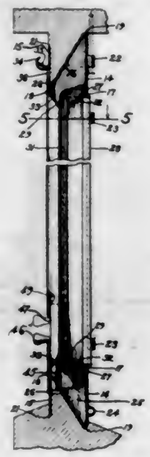
all times a predetermined atmosphere in said furnaces, substantially as described.

1,626,264. SPOOL OR REEL. HENRY E. BRYANT, Providence, R. I., assignor to Tubular Woven Fabric Company, Pawtucket, R. I., a Corporation of Rhode Island. Original application filed Aug. 6, 1923, Serial No. 655,945. Divided and this application filed Oct. 16, 1925. Serial No. 62,760. 6 Claims. (Cl. 117—42.)



1. A spool for holding strip material, said spool having a detachable head, and centering means adapted to occupy the interior of such roll, said centering means comprising rotatable shafts having eccentric portions adjacent to the inner circumference of such roll and being so rotatable as to apply outward pressure to the roll.

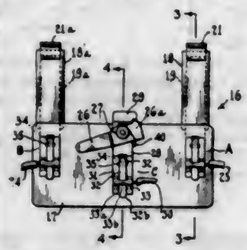
1,626,265. LINEAR-MEASURING MACHINE. HENRY E. BRYANT, Providence, R. I., assignor to Tubular Woven Fabric Company, Pawtucket, R. I., a Corporation of Rhode Island. Filed Oct. 16, 1925. Serial No. 62,761. 10 Claims. (Cl. 33—134.)



1. A linear measuring apparatus comprising a rotatable wheel or disc having means surrounding its axis at a uniform distance from such axis for engagement with the article to be measured, said wheel also having complemental means arranged to grip the sides of the article,

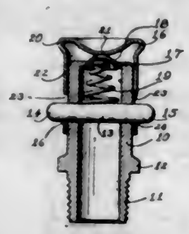
which complemental means are adjustable relatively toward and away from one another to accommodate arti-

cles of different widths, and means coupled with said wheel for indicating the travel thereof.



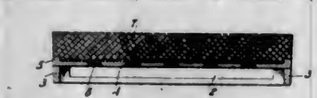
1,626,266. WINDOW STRUCTURE. OTTO W. L. BUSS, Minneapolis, Minn. Filed Oct. 27, 1924. Serial No. 746,226. 11 Claims. (Cl. 189—69.)

1. A window frame having an intermediate inclined portion terminated at opposite ends respectively by acute angularly related flanges inner and outer, the first extending downwardly and the other upwardly to form inner and outer frame faces, the size of the opening defined by the inner flange being of greater area than that defined by the outer flange, and a sash pivoted to the inner flange and having portions sealingly engageable with the flanges to close both openings, all sides of the frame being cross-sectionally identical.



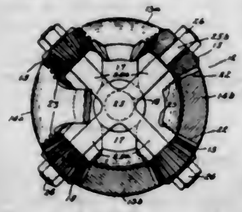
1,626,267. TOY ELECTRIC RAILWAY. LOUIS CARUSO, Irvington, N. J., assignor to The Lionel Corporation, a Corporation of New York. Filed Oct. 24, 1925. Serial No. 64,646. 4 Claims. (Cl. 191—29.)

1. A binding plate for a toy electric railway track comprising a base portion, a pair of spaced arms extending from said portion, and separate current carrying means on each arm, said portion adapted to releasably



engage with the track rails for connecting the plate into the rail circuit.

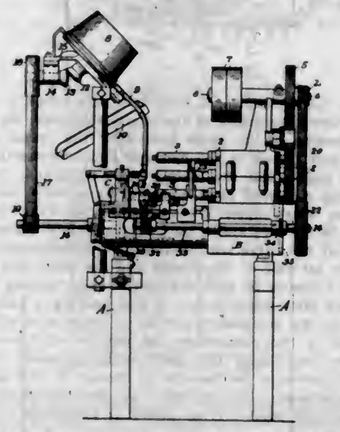
1,626,268. DUST CAP FOR LUBRICATING APPARATUS. MORTON R. CHIPMAN, Waterbury, Conn. Filed Nov. 12, 1925. Serial No. 68,696. 5 Claims. (Cl. 184—88.)



1. In a lubricating apparatus, an inlet nipple having a spring-pressed valve closure, and a detachable cup-shaped dust-excluding cap slidably fitted over the end of said nipple, said cap having a depression in its head to engage said valve closure and said cap being removable only by moving it downwardly to force said closure inwardly.

1,626,269. PAVING BLOCK. ERNEST CLARK, Rio de Janeiro, Brazil. Filed Oct. 6, 1922, Serial No. 592,838, and in Brazil June 8, 1922. 19 Claims. (Cl. 94—12.)

1. An article of the character described comprising, a hard base portion having downwardly projecting flanges of skeleton formation, and a resilient top portion secured to the base portion.

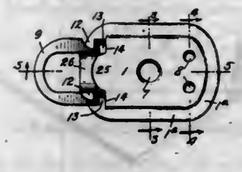


1,626,270. POWER-TRANSMISSION DEVICE. NOEL E. CRAUN, Bogota, N. J. Filed Aug. 16, 1924. Serial No. 732,383. 8 Claims. (Cl. 64—92.)

1. In a power transmitting device, a universal coupling joint comprising a drive shaft, a driven shaft, gear members, each having a non-continuous series of teeth secured

to said shafts, a plurality of gears meshing with said teeth and means to hold said gears and members in mesh for coupling said shafts and for interlocking said members against separation.

1,626,271. THREAD CUTTER FOR TUBE-WORKING MACHINES. WALTER T. DAVIS, Wheeling, W. Va., assignor to Wheeling Stamping Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Apr. 20, 1923. Serial No. 633,443. 5 Claims. (Cl. 82—5.)

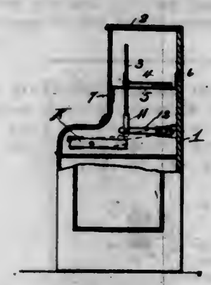


1. In a collapsible tube-working machine, tube-supporting and rotating means, a lever fulcrumed intermediate its ends and mounted for bodily movement in the direction of its pivotal axis, a cutter mounted upon an arm of said lever and adapted to be moved thereby into and out of operative position with respect to the neck of a tube on said supporting means, a lead-screw, follower means carried by the other arm of said lever and adapted to engage the threads of said lead-screw to cause a bodily movement of said lever in the direction of its pivotal axis, said lever normally maintaining said cutter in inoperative position, and said follower means out of engagement with said lead-screw, and means for rocking said lever into a position in which said cutter is in operative position and in which said follower means is in engagement with said lead-screw and for maintaining said lever in said position during a threading operation, substantially as described.

1,626,272. HAT. JAMES J. DEAMOND, South Norwalk, Conn. Filed June 17, 1926. Serial No. 116,564. 2 Claims. (Cl. 2—193.)

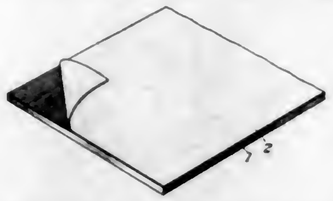
1. In a hat, of straw or the like, a crown, a brim, and a flexible section extending into the crown and brim and composed of a circumferentially-wound overlapped braid, a stitching for securing the circumferential windings of the braid to one another, said stitching comprising stitches overlying the top outer finished edge of the windings and extending into the adjacent underlying windings whereby to avoid gaping between the superposed windings at the right edges.

1,626,273. SELF-LOCKING SEAL. EMIL DIETZE, New York, N. Y., assignor to American Casting and Manufacturing Corporation, Brooklyn, N. Y., a Corporation of New York. Filed May 14, 1926. Serial No. 109,033. 4 Claims. (Cl. 292—321.)



1. In a seal device of the class described, the combination with a casing composed of two parts seated one within the other and spaced apart to provide an inner cavity, one part being turned over at one end on itself and split to provide two diverging spring fingers, and the other parts of the casing having an inner projection struck up therefrom to lie between the spring fingers and also a pair of other struck up projections to keep the inner ends of the shackle in proper position, said casing having an opening therein, of a shackle having arms adapted to enter and completely fill said opening, said shackle arms being irremovably engaged and locked by the said diverging spring arms.

1,626,274. PLIERS. PATRICK JOSEPH DUFFY, Holyoke, Mass. Filed Mar. 30, 1926. Serial No. 968,582. 3 Claims. (Cl. 81—206.)



1. A plier for cutting armored cable and the like, comprising pivotally connected handles having cutting jaws, and a cable holding hook carried thereby and extending beyond the cutting jaws.

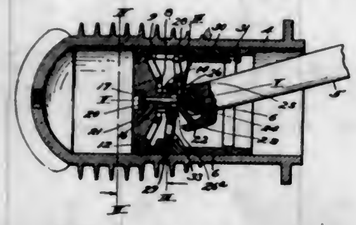
1,626,275. TOY PIANO. GEORGE H. ECKSTEIN, Los Angeles, Calif. Filed Aug. 18, 1924. Serial No. 732,736. 5 Claims. (Cl. 84—99.)

1. In a piano, a music disc provided with spaced projecting picks upon one face thereof, a keyboard, a swinging bar mounted to extend thereover, said bar being provided with a pawl, and the circumferential edge of said disc being provided with ratchet teeth for engagement by said pawl.

1,626,276. PROTECTING COVERING FOR RUBBER SHEETS. GUSTAVUS J. ESSELEN, Jr., Swampscott, Mass. Filed Mar. 29, 1924. Serial No. 702,771. 8 Claims. (Cl. 154—50.)

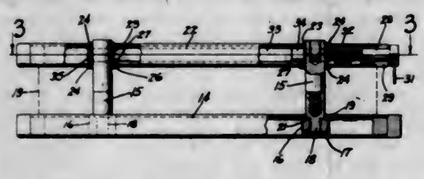
1. The combination with a sheet of rubber, of a readily separable protecting sheet of smooth surfaced glassine paper, substantially as described.

1,626,277. ROCK-DRILLING DEVICE. ELMER G. GARTIN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 14, 1922. Serial No. 529,165. 1 Claim. (Cl. 121—10.)



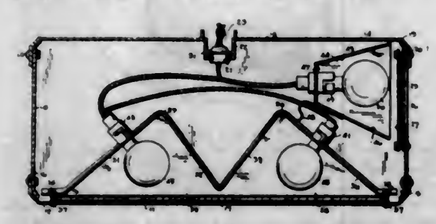
External fluid supply connections for a rock drilling mechanism having internal fluid conducting means, comprising coaxial gaseous and cleansing liquid pressers supply lines, manifold members arranged at each end of said coaxial supply lines, and branch connections communicating with each of said manifold members and with said internal fluid conducting means and the source of supply respectively.

1,626,278. METHOD OF MAKING DOOR HANDLES. JOSEPH GOODMAN, Whitneyville, Conn., assignor to The Mt. Carmel Mfg. Co., Mount Carmel, Conn., a Corporation of Connecticut. Filed Dec. 31, 1924. Serial No. 759,033. 1 Claim. (Cl. 18—59.)



The method of making a door handle or the like which consists in forming the handle with a groove in its face with flanges on the opposite sides of said groove, providing in the groove a heated slab of a material which is hard at ordinary temperatures and plastic when heated, pressing the flanges against the opposite side edges of the plastic slab by pressure directed edgewise of the slab only, and allowing the slab to harden by cooling.

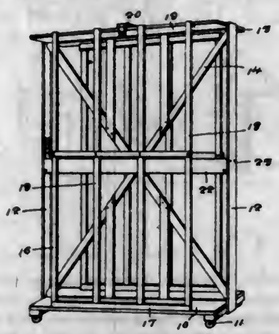
1,626,279. INTAKE VALVE. JASON E. HARRIS, Howard, Kans. Filed Jan. 4, 1926. Serial No. 79,149. 4 Claims. (Cl. 123—47.)



1. The combination of a shaft having a crank, a crank-case enclosing the crank of the shaft, a cylinder rigid and communicating at its inner end with the crank-case, a reciprocatory piston in the cylinder and a connecting rod pivotally connecting the piston and said crank, the piston having a ported head constituting a valve seat; an oscillatory valve upon said seat and provided with a chamber in its face and a port to register at times, with the port of the valve seat to establish communication between the interior of the piston and the head end of the cylinder, a piston in said chamber, means tending to advance said last-named piston, a link bearing a fulcrumed relation to the last-named piston, a rocker-arm pivotally connected to the connecting rod and to said link, and means for oscillating the valve under pressure applied by the rocker-arm incident to a change in the angular relation between the cylinder and the connecting rod when the said valve-carried piston is advanced.

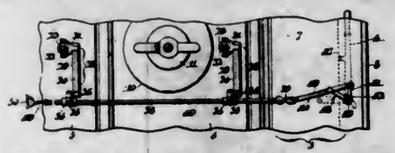
1,626,280. LOOSE-LEAF BINDER. BERNARD W. JAPS, Minneapolis, Minn. Filed Apr. 17, 1926. Serial No. 102,705. 13 Claims. (Cl. 129—12.)

1. In a loose-leaf binder the combination with a bar having spaced posts mounted thereon, of a hollow clamping member having sleeves passing therethrough and adapted to receive said posts, and means within the clamping member for substantially simultaneously engaging each sleeve at one side, and contracting the same to grip said posts.



1,626,281. PASSING LIGHT. EMILE ALEXANDRE JEANNOTTE, Montreal, Quebec, Canada. Filed Jan. 28, 1926. Serial No. 84,408. 3 Claims. (Cl. 240—8.2.)

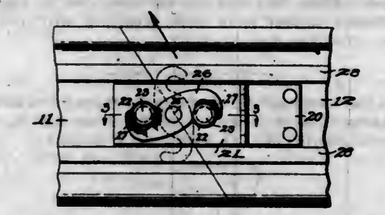
1. In a passing light for automobiles the combination with a board or plate, on the passing side, forming a step or support of a side lighting member having a rectagular



form of casing closed at one side by an elongated lens parallel with the longitudinal direction of said steps and having a double angular reflector forming a plurality of side light pockets and a cup-shaped reflector forming an end light pocket, a socket in said cup-shaped reflector, a lamp in said socket, sockets in said side pockets, lamps in the latter sockets, a lens closing in said cup-shaped reflector in the end wall and electrical connections to the rear of said pockets in said casing.

1,626,282. MATTRESS-DISPLAY RACK. J CLAUD JENNINGS, Winnsboro, Tex. Filed Apr. 10, 1926. Serial No. 101,169. 2 Claims. (Cl. 211—14.)

1. A mattress display rack comprising top and bottom members, a vertically arranged member connected therewith, a gate member hinged at its lower end upon the bottom member, means for securing the upper end of the gate member with respect to the top member, and a shelf hingedly mounted within the intermediate portion of the rack upon said vertical member and equipped with means for maintaining it in horizontal position whereby to subdivide the interior of the rack into relatively small compartments.

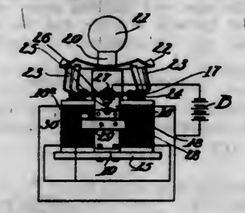


1,626,283. EMERGENCY-VALVE-CONTROL SYSTEM FOR TANK VEHICLES. JAMES A. JENSEN, Philadelphia, Pa., assignor to Quaker City Iron Works, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 29, 1924. Serial No. 734,860. 4 Claims. (Cl. 221—67.)

1. In a tank structure composed of a number of separate sub-divisions each provided with a spring influenced emergency valve, and a storage compartment having an access door; the combination of valve operating mechanism including a toggle means, which, when moved in one direction past dead center holds the emergency valves open, and when moved in the reverse direction by a projection on the compartment door permits the automatic closure of said valves under the action of their respective springs.

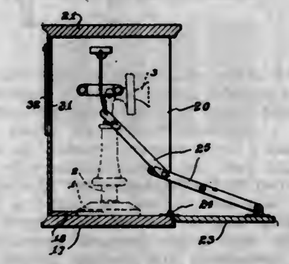
1,626,284. CONNECTER FOR TWO-PART DEMOUNTABLE RIMS. ALVIN L. JOHNSON, Worcester, Mass., assignor, by mesne assignments, to Robert W. Robinson, jr., Worcester, Mass., and Walter C. Watson, Leicester, Mass. Filed May 17, 1920. Serial No. 382,135. 4 Claims. (Cl. 301—31.)

3. The combination with a transplit rim, of a bridge plate attached to one end and projecting beyond said split and having an opening in said projecting portion, a stud carried by the other end of the rim and fitting into



said opening in the bridge plate, and a latch pivoted to the bridge plate and engaging the stud to prevent radial separation of said plate and stud.

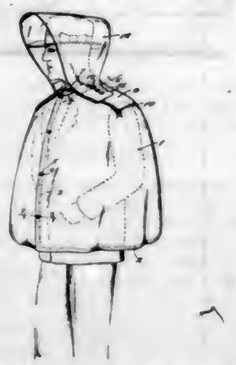
1,626,285. METHOD OF TREATING TRAFFIC RAILS. HEINRICH KARL, Jersey City, N. J. Original application filed July 19, 1923, Serial No. 652,531. Divided and this application filed Oct. 28, 1925. Serial No. 65,480. 1 Claim. (Cl. 291—1.)



In a method for treating traffic rails that serve also as electric conductors, crushed coke deposited on top of the traffic rails for preventing the train wheels from sliding and permitting the transmission of the electric impulses from the train to the trackside or vice versa, as set forth.

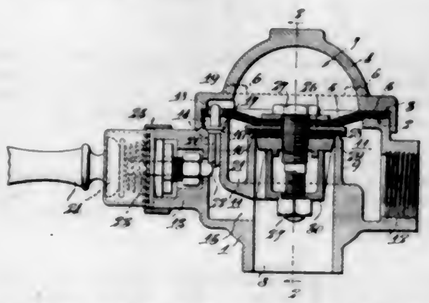
1,626,286. ILLUMINATED SIGN. CHARLES G. KEENAN, Ojai, Calif. Filed June 21, 1923. Serial No. 646,821. 6 Claims. (Cl. 40—139.)

1. An advertising device comprising an artificial source of light, a concaved mirror reflector disposed about and behind said source of light, and electro-magnetic means for quickly vibrating or trembling said reflector.



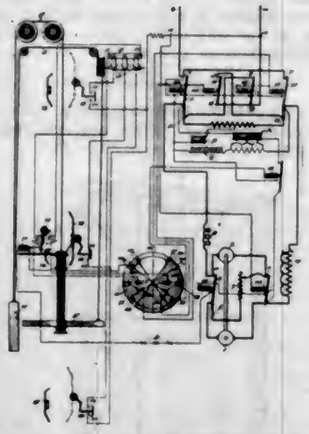
1,626,287. DEVICE FOR USE WITH TELEPHONES. CHARLES BLAINE KINKEAD, Huntington, W. Va. Filed June 7, 1926. Serial No. 114,261. 2 Claims. (Cl. 179—185.)

1. In combination a telephone cabinet, a movable door closing the front of said cabinet, a telephone within the cabinet, an antiseptic container suspended within the cabinet, means to raise and lower the container when the door is opened and closed respectively, said means comprising a mechanical connection with the said door,



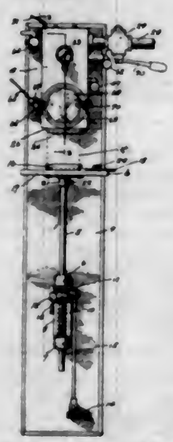
the point of rest of the container when the door is closed being fixed, and a locating member within the cabinet guiding and locating the telephone so that the mouthpiece thereof is in close proximity with the container when the door is closed.

1,626,288. COMBINED CAPE AND HAT PROTECTOR. ALEXIS T. LANE, New York, N. Y. Filed May 25, 1926. Serial No. 111,603. 1 Claim. (Cl. 2—84.)



The combination with a cape having shoulder portions, of a hat protecting member comprising a flexible sheet body having a relatively wide intermediate portion and narrower end portions, one of the said end portions being permanently connected with one of the shoulder portions of the cape, and coacting means upon the other end portion of the said member and the other shoulder portion of the cape for adjustably connecting the parts together.

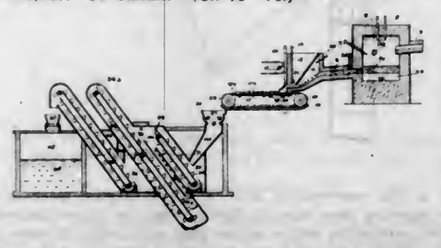
1,626,289. FLUSH VALVE. JOHN J. LANGDON, Hartford, Conn. Filed June 23, 1926. Serial No. 118,041. 2 Claims. (Cl. 137—93.)



2. A valve of the class described comprising a hollow body having an inlet and an outlet, an upstanding neck in which said outlet is formed and terminating in a valve seat, a diaphragm dividing the hollow body into an upper and a lower pressure chamber, the latter surrounding said neck and communicating with the inlet, a valve carried by the diaphragm and adapted normally to seat on said neck to close the outlet, a bleed duct communicating between the upper and lower chambers for normally maintaining balanced pressures therein, means for overcoming said pressure balance to effect a lifting of the diaphragm and an opening of the valve, said valve having a depending skirt guided in the neck and having interrupted spiral vanes to impart a swirling motion to water passing through the valve, said valve having a gasket for seating on the neck, and a tapered washer snugly fitting the neck for the purposes specified.

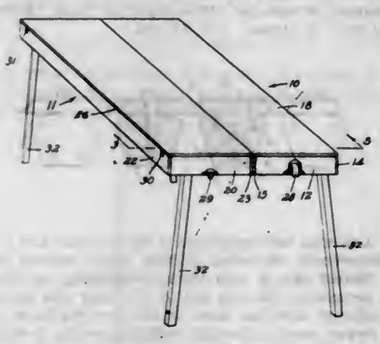
1,626,290. ELEVATOR-LEVELING CONTROL. ARTHUR J. LIEBENBERG, Cincinnati, Ohio, assignor to The Warner Elevator Manufacturing Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Dec. 13, 1924. Serial No. 755,791. 12 Claims. (Cl. 172—152.)

1. In an electric elevator, the combination with a car, an electric hoisting motor therefor, said motor having a double wound armature and commutator for said armature winding, electro-magnetically operated switch devices for alternately connecting the winding in series or parallel to obtain a variation in motor speed, a manually operable car switch for normal elevator hoisting motor control controlling the electric circuit to said magnetically operated switch device, and rendering the same effective in the active controlling positions of said car switch for obtaining a normal running speed of the motor and alternately for obtaining an auxiliary running speed of the motor, and switch devices operable by the elevator car for controlling the motor with the elevator car in landing zone for bringing the car to a level with the landing.



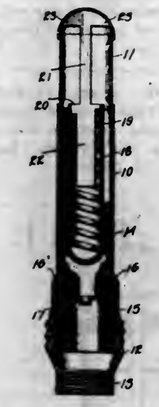
1,626,291. APPARATUS FOR VACUUMIZING AND SEALING CANS. ANDREW E. LINDSTROM, San Francisco, Calif. Filed Mar. 15, 1926. Serial No. 94,980. 6 Claims. (Cl. 113—82.)

1. A vacuumizing machine comprising a vacuum chamber open at one end, said chamber having a sealing gasket at its open end, means for advancing a can against the gasket to bring one of its heads across the open end



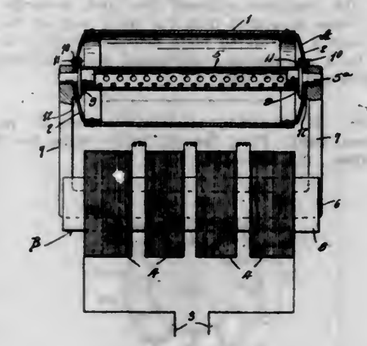
of the chamber in sealed contact with said gasket, means for inducing suction in the chamber, axially movable soldering mechanism within the chamber, and a movably mounted puncturing device within the chamber adapted to be moved to axially coincide with the soldering mechanism and to be advanced lengthwise of the can and relatively of the open end of the chamber, so as to form a hole in the adjacent head of the can prior to the operation of advancing the soldering mechanism into sealing relation to the can, and means for shifting the position of the puncturing device to a point laterally of the path of movement of the soldering mechanism.

1,626,292. PROCESS OF AND APPARATUS FOR MAKING OF FLUXING MATERIALS. JOEL LUND, San Francisco, Calif. Filed Oct. 23, 1920. Serial No. 418,947. 20 Claims. (Cl. 75—76.)



1. The process which consists in heating in a blast furnace materials which will, when molten, produce a slag containing a carbonate of the alkali metals and molten iron, conducting molten iron and slag from said furnace into a heated chamber, forcing superheated steam and air onto said molten slag as it floats on said molten iron to purify the same and withdrawing said purified molten slag.

1,626,293. CAMP TABLE. LEON O. MASON, Los Angeles, Calif., assignor of one-half to Alice Willock, Los Angeles, Calif. Filed Feb. 28, 1925. Serial No. 12,306. 2 Claims. (Cl. 190—12.)

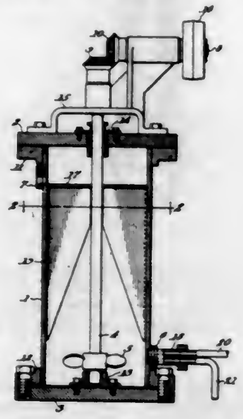


1. A collapsible camp table having a box part and a cover part, said parts being substantially identical, the box part having two end members and two side members, there being grooves across the lower surfaces of the end members near their ends and there being notches in the side members to register with the grooves, there being a bottom secured upon the lower surfaces of the end members and side members covering the grooves, thus providing a passage extending through the end members and side members, the cover part having ends, sides, grooves and notches, the cover part having a top corresponding to the bottom of the box part, the grooves and notches in the box part registering with the grooves and notches in the cover part, the cover part fitting upon the box part and the parts having suitable fastening means to form a closed box, and rails adapted to be inserted through the passages when the parts are side by side as in forming a table top, thereby securing the parts together.

1,626,294. COMBINATION DUST CAP AND TIRE GAUGE. HARRY L. MCPHERSON, Memphis, Tenn., assignor, by direct and mesne assignments, to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Filed Dec. 22, 1921, Serial No. 524,227. Renewed May 7, 1926. 7 Claims. (Cl. 73—111.)

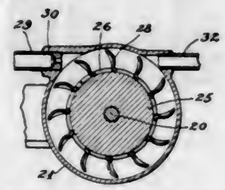
1. A tire pressure gauge comprising a casing having a compressible packing therein adjacent the lower end thereof adapted to embrace the nipple of a valve casing and a tire valve depressor carried solely by the packing.

1,626,295. ELECTRIC HEATER FOR STEAM BOILERS AND SUPERHEATERS, ETC. WALTER A. PATSCHEIDER, Auburndale, Mass. Filed Mar. 27, 1924. Serial No. 702,381. 1 Claim. (Cl. 219—47.)



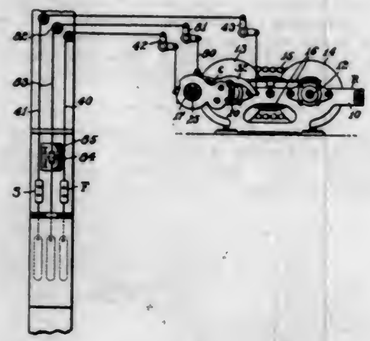
A heater comprising a drum, a hollow perforated resistance element located within the drum and provided with terminal plugs extending beyond the drum, and a step down transformer having the leads of its low tension circuit provided with openings to receive the outer ends of said plugs.

1,626,296. SEPARABLE BUTTON. JOHN V. PILCHER, Louisville, Ky. Filed July 8, 1925, Serial No. 42,246. Renewed Mar. 3, 1927. 2 Claims. (Cl. 24—110.)



1. In a separable button, a female or head member having a sheet metal body provided with a tapered portion having an outwardly overturned lower edge forming an external annular bead, a male member having a stud to enter the opening defined by said annular bead, said stud having an annular rebate, and a key piece having legs lying between the lower end of said tapered portion and the reduced portion of the stud, with means for operating the key piece.

1,626,297. AGITATOR. ALEXANDER S. RAMAGE, Detroit, Mich., assignor to Frank F. Beall, Alexander S. Ramage, and Benjamin Briscoe, trustees, Detroit, Mich. Filed Nov. 3, 1924, Serial No. 747,640. Renewed Sept. 23, 1925. 2 Claims. (Cl. 259—8.)



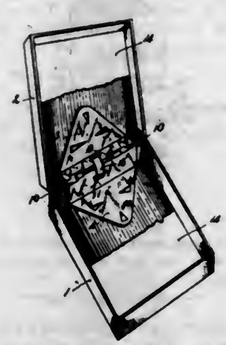
1. In a fluid mixer, the combination of a container having a fluid inlet and an outlet in the bottom and top portion thereof, respectively, a stirring device mounted within the container adjacent the inlet, inwardly projecting vanes supported from the inner wall of the container, and a perforated plate disposed within the container in a substantially horizontal plane intermediate the outlet and the vanes.

1,626,298. HYDRAULIC MOTOR. JOSEPH F. RAMBO, Pomona, Calif. Filed Jan. 15, 1925. Serial No. 2,537. 3 Claims. (Cl. 253—136.)

1. A water motor comprising a housing, means providing an inlet and outlet to and from the housing, a wheel rotatable in the housing, and a sheet metal band mounted upon the periphery of the wheel, said sheet metal band having portions struck out of its body providing buckets adapted to be struck by the stream entering the housing to rotate the wheel.

1,626,299. CONTROLLER FOR VARIABLE-SPEED TRANSMISSION. MILTON O. REEVES, Columbus, Ind., assignor to Reeves Pulley Company, Columbus, Ind., a Corporation of Indiana. Filed May 19, 1925. Serial No. 31,449. 6 Claims. (Cl. 64—8.)

1. The combination with a speed varying mechanism comprising two pairs of friction cones, a connecting belt, two controlling levers acting upon said pairs of cones to variably position the same relative to the belt, a threaded shaft, and a pair of nuts carried by said shaft and engaging said levers to variably position the same, of friction means for rotating said threaded shafts, and adjustable means cooperating with said nuts for limiting the movement thereof, said means comprising a floating rod associated with the nuts, and adjustable elements on said rod cooperating with the nuts in opposite directions relative to the rod.

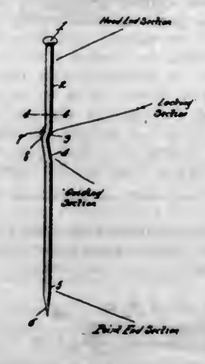


1,626,300. SPLICE BLOCK FOR V-SHAPED TRANSMISSION. PAUL B. REEVES, Columbus, Ind., assignor to Reeves Pulley Company, Columbus, Ind., a Corporation of Indiana. Filed Apr. 12, 1926. Serial No. 101,291. 2 Claims. (Cl. 74—64.)

1. A driving belt comprising a flexible band and a series of transversely extending friction blocks secured on one face thereof one of said blocks comprising two sections each secured to the free end of the band and having on the adjacent abutting faces thereof interdigitated fingers and means passing through said fingers for locking the sections together.

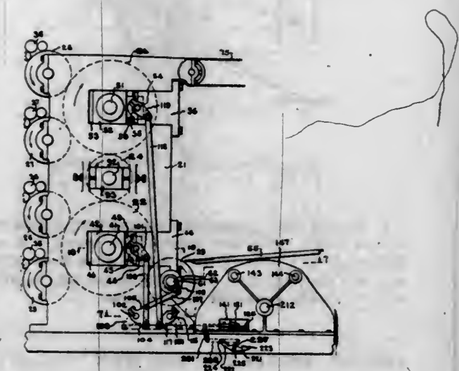
1,626,301. JEWELRY-BOX HINGE. RUSSELL I. RHODES, North Attleboro, Mass. Filed Nov. 25, 1924. Serial No. 752,174. 2 Claims. (Cl. 16—128.)

1. A hinge for jewelry boxes and the like comprising a pair of pivoted hinge members, each member having a metal base plate of a length to cover a substantial part of the bottom portion or cover portion of the box respectively, and designed to be secured thereto by means penetrating said portions respectively, and a leaf integral with the base plate and extending at substantially right angles therefrom, the edges of said leaves each having at least one outstanding portion bent to form a hinge knuckle and another outstanding ductile portion arranged to be bent over the edge of the box portion to which it



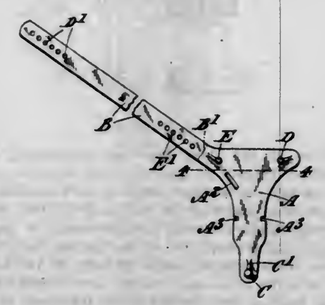
is affixed to provide a fastening means at that point which does not penetrate the material of said portion.

1,626,302. PLAYING BALL. ROBERT W. ROST, Newark, N. J., assignor of one-half to Andrew F. Bigger, New York, N. Y. Filed Feb. 12, 1925. Serial No. 8,857. 8 Claims. (Cl. 273—62.)



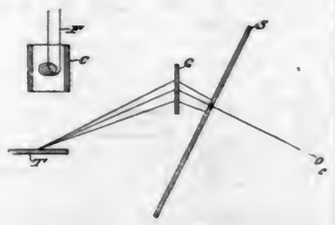
1. A playing ball having a core of tensioned windings of thin strips of unvulcanized coagulum rubber inherently cohered.

1,626,303. PIN. HUGO KARL SAKOWSKI, New York, N. Y. Filed July 14, 1926. Serial No. 122,397. 2 Claims. (Cl. 24—155.)



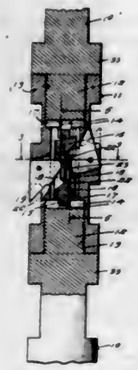
1. A pin, embodying a shank which is bent to form head end and point end sections having a common axis, a single locking section extending outwardly at an obtuse angle from the foot of the head end section, and a single guiding section extending inwardly at an angle from the foot of the locking section to the top of the point end section; the guiding section being relatively long as compared with the locking section.

1,626,304. TRIPPING MECHANISM FOR PRINTING MACHINERY. STEWART L. SHARPLESS, Milwaukee, Wis. Filed Oct. 28, 1925. Serial No. 65,353. 30 Claims. (Cl. 101—184.)



1. In tripping mechanism for a printing press, the combination with a cylinder forming a member of a printing couple, of operating means for moving said cylinder for distance relation with another member of said printing couple and operable throughout a short angle of movement of said cylinder for shifting said cylinder, control means for said operating means, and means distancing said control means from said operating means during shifting movements of said cylinder.

1,626,305. GARMENT SUSPENDER. ROBERT STEPHENSON, Blackburn, England. Filed May 1, 1926, Serial No. 106,041, and in Great Britain May 22, 1925. 2 Claims. (Cl. 24—245.)

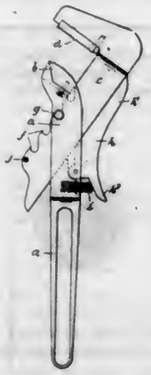


1. In a garment suspender the combination of a resilient tag having lateral slots therein, a stud on the face of the tag and a separable clip member comprising a loop portion adapted to cooperate with the stud and having arms to engage the slots in the tag in a removable manner so as to constitute pivots about which the clip can then pivot as set forth.

1,626,306. METHOD OF PRODUCING HOMOGENEOUS X RAYS AND APPARATUS THEREFOR. ANCEL ST. JOHN, Brooklyn, N. Y., assignor to Union Carbide & Carbon Research Laboratories, Inc., a Corporation of New York. Filed July 18, 1923. Serial No. 652,394. 4 Claims. (Cl. 250—34.)

1. Method of producing substantially homogeneous X-rays which comprises dispersing a beam of X-rays by diffraction in a material rich in the atom from which the rays are emitted; and selectively screening the divergent rays to absorb undesired wave-lengths.

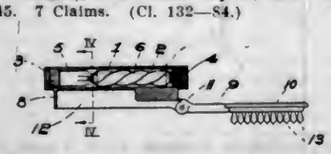
1,626,307. SUCKER ROD AND LOCK. HAROLD L. SULLINS and JOHN E. MUSTAIN, Taft, Calif.; said Mustain assignor of one-fourth to said Sullins and one-fourth to W. D. Gray. Filed Apr. 18, 1925. Serial No. 24,274. 6 Claims. (Cl. 287—117.)



6. A device of the class described comprising a sub, latches slidable therein in opposite directions for engagement with sucker rod sections, each latch having an offset portion arranged centrally of the bore of the sub, expansive spring means abutting the inner ends of the offset portions and urging projection of the latches, said latches having slots therethrough, levers pivoted to the sub and extending into the slots and thereby preventing displacement of the latches, and the sub being interiorly enlarged into ribs for guiding the latches during sliding movement.

1,626,308. TOILET-PAPER RECEPTACLE. MILO E. THATCHER, Los Angeles, Calif. Filed Aug. 11, 1924, Serial No. 731,498. Renewed Feb. 14, 1927. 5 Claims. (Cl. 4—247.)

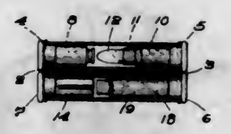
1. In combination a toilet bowl having a seat and a cover hingedly mounted on the bowl, the cover having a receptacle formed in the back face, the front face of the cover having a slot positioned adjacent the hinged mounting of the cover, and means to mount a roll of paper in the receptacle with the free end of the paper extending through the slot.



1,626,309. ADJUSTABLE SINGLE-LEVER PIPE AND NUT WRENCH WITH RATCHETLIKE CONTROL. ARTHUR JAMES THURLEY, London, England. Filed Mar. 13, 1924, Serial No. 698,992, and in Great Britain Apr. 26, 1923. 2 Claims. (Cl. 81—110.)

1. A wrench comprising a slotted handle, a pin projecting across the slot, an inner jaw carried by the slotted handle, an outer cooperating jaw, a shank-carrying said outer jaw and having notches therein adapted to selectively engage with the pin in said slotted handle, and a double armed lever carried pivotally by said handle, but extending for its major portion wholly aside from the slot and plane of the handle, said lever having an elongated arm extending in contact with one edge of said shank throughout an extensive area thereof, said lever having a short arm situated close to the handle and substantially parallel therewith to admit of being depressed by the hand in the act of holding the handle, and yieldable means for urging said short arm away from the handle and the long arm against said shank.

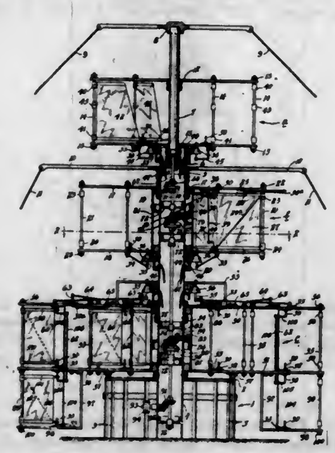
1,626,310. DENTAL COMPACT. EDNA SIBLEY TIPTON, Jackson Heights, N. Y. Filed July 27, 1926. Serial No. 125,245. 7 Claims. (Cl. 132—84.)



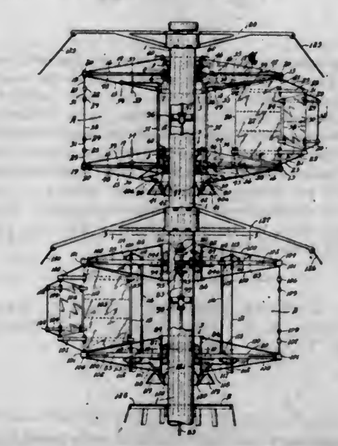
1. A dental compact comprising a tubular body, a closure element for each end of the bore of said body each of which is adapted to carry a dental accessory, said body having a lateral extension disposed longitudinally thereof comprising a receptacle and means for the hinged mounting of a tooth brush, and a tooth brush having a portion thereof hinged to said means arranged so as to have its bristles disposed within said receptacle when in one of its positions provided for by said hinged mounting.

1,626,311. BEAUTY COMPACT. EDNA SIBLEY TIPTON, New York, N. Y. Filed Dec. 24, 1926. Serial No. 156,811. 4 Claims. (Cl. 132—79.)

1. In a beauty compact, the combination of a casing formed at opposite ends with openings, a plurality of parallel tubular chambers in the casing and communicating with the openings therein, said chambers being spaced from two opposite sides of the casing to form receptacles closed at their ends by the end walls of the casing, and adapted to carry beauty accessories, a closure member for each open end of the tubular chambers, said members being provided with inwardly facing sockets to carry beauty accessories, complementary to those carried in the receptacles, and hinged lids on opposite sides of the casing to form closures for the receptacles.



1,626,312. BEAUTY COMPACT. EDNA SIBLEY TIPTON, New York, N. Y. Filed Dec. 24, 1926. Serial No. 156,812. 3 Claims. (Cl. 132—79.)

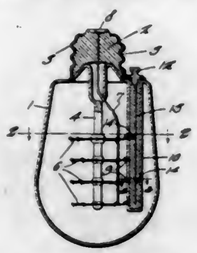


1. In a beauty compact, the combination of a casing having formed therein a plurality of tubular parallel barrels, each barrel being open at both ends, a closure for each open end of the barrels, each closure comprising a flanged head and an inwardly extended flange to fit in the bore of the barrel, a beauty aid receptacle fitted in and supported by each inwardly extended flange whereby to house beauty aids within the barrels.

1,626,313. AIR MOTOR. EDSON N. TUCKEY, Minneapolis, Minn. Filed June 28, 1923. Serial No. 648,176. 21 Claims. (Cl. 170—23.)

1. A wind-operated device having in combination, a plurality of spaced revoluble motors, each comprising a revoluble frame carrying a plurality of revoluble sail carrying members, and means for holding said members in position with the sails against the wind during a portion of the revolution of said frame so as to revolve said frame, a common driving means to which all of said frames are connected permitting independent movements of said frames, separably operable automatic means rendering said first mentioned means of each motor inoperative, and means for actuating said automatic means manually at will.

1,626,314. AIR MOTOR. EDSON NEWTON TUCKEY, Minneapolis, Minn. Filed Oct. 31, 1923. Serial No. 671,867. 25 Claims. (Cl. 170—20.)

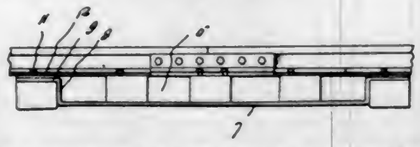


1. A wind motor having in combination, a revoluble frame, a propelling sail carried thereby, a second sail carried by said sail and revoluble about an axis parallel with the axis of said sail, and means for holding said sails against the wind during a portion of the revolution of said frame.

1,626,315. ELECTRIC LAMP. GUILLERMO VENTURINI, Santiago, Chile. Filed Jan. 14, 1925, Serial No. 2,372. Renewed Mar. 16, 1927. 1 Claim. (Cl. 176—27.)

A lamp of the class described comprising a bulb, a stem therein, a plurality of filaments supported by the stem independently of each other, a conductor connecting all the filaments to one contact of the lamp, a tubular member projecting into the bulb and formed therewith, said member being parallel with the stem, a plurality of terminals carried thereby, each terminal being connected

with a filament, a post formed of insulating material and rotatably mounted in the tubular member, a rod carried by the post, spring contacts carried by the post and arranged to engage the terminals as the post is rotated,

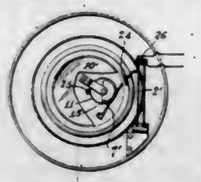


the springs of the contact engaging the rod, said rod being electrically connected with the second contact of the lamp, a handle connected with the post and indicating means for indicating the position of the spring contacts.

1,626,316. PROCESS FOR BAKING PIES. FRANK MERWIN WAKEMAN, Lisbon Falls, Me. Filed Nov. 12, 1924. Serial No. 749,575. 2 Claims. (Cl. 107—54.)

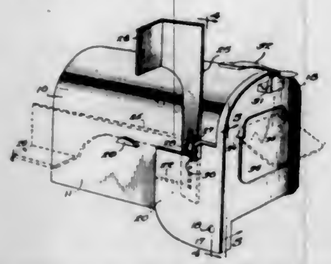
1. The process of forming a juice retaining dam around the edge of a pie or the like, which consists in passing a strip of paper, which has been previously wetted and thereby elongated, tightly around the pie in contact with the edge thereof, with a portion of the paper upstanding above the pie and with its ends overlapping, and attaching said ends together to hold said strip upstanding around said pie during the subsequent baking of the pie so that the shrinkage of the strip, consequent upon its drying, will effect its tight engagement with the edge of the pie and make it leak-proof.

1,626,317. RAIL-TIE SUPPORT. LYMAN L. WEBSTER, Franklinville, N. Y. Filed Aug. 5, 1926. Serial No. 127,365. 1 Claim. (Cl. 238—105.)



In a structure of the class described, in combination, a railway track including a plurality of rail supporting ties disposed in usual spaced relation, rail ends supported upon said ties and having their adjacent ends in approximate abutting relationship, a rail joint between said ends; and a support comprising an elongated plate under the intermediate ones of said plurality of ties and having its end portions directed upwardly at right angles to provide shoulders for abutting the end ones of said plurality of ties and having its extremities disposed at right angles to said shoulders to form attaching ears to be engaged with said end ones of said plurality of ties on the tops thereof, said ears being provided with apertures for passage of retaining spikes.

1,626,318. METHOD OF MAKING REENFORCED BUILDING ELEMENTS. KAREL WEITSTEIN, Brux, Czechoslovakia. Filed July 18, 1924. Serial No. 726,797. 14 Claims. (Cl. 25—154.)

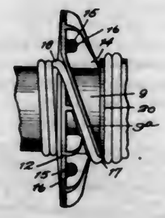


1. The method of making reenforced building elements, which comprises placing the reenforcements in the mould spaced from its sides, then forcing and holding the reenforcements against the mould sides and pouring the plastic material.

1,626,319. TIME SWITCH FOR PARKING LAMPS. WILLIAM F. WINTERLING, Cambridge, Md., assignor of one-fifth to William Grason Winterbottom, sr., one-fifth to Levi B. Phillips, sr., one-fifth to Albanus Phillips, sr., and one-fifth to Charles L. Janney. Filed Oct. 23, 1922. Serial No. 596,370. 1 Claim. (Cl. 200—35.)

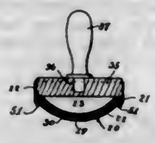
A switch operating device comprising a time piece, a spring member therein having a part projecting therefrom for engaging a switch, a toothed wheel in the time piece, a cam thereon for engaging the spring member to cause the same to actuate the switch and means for giving the toothed wheel a step by step movement from the minute arbor of the time piece.

1,626,320. MAIL BOX. JOHN A. ALMS, Joplin, Mo. Filed May 4, 1926. Serial No. 106,744. 4 Claims. (Cl. 232—35.)



1. A device of the character described comprising a box having a side wall and an open forward end, a door hinged at its lower edge to said box and normally closing the open end thereof, a signal arm arranged against the side wall of said box and provided with an elongated slot, a pivot pin arranged in said slot and secured to said side wall, said signal arm being adapted to assume a vertical operative position with the lower end thereof projecting a substantial distance beneath said pivot pin, and an operating member carried by said door and provided with a vertically extending recess adapted to receive the lower end of said signal arm when the latter is in operative position, said recess having a rear wall adapted to engage the lower end of said signal arm to swing the upper end thereof rearwardly away from operative position when said door is opened.

1,626,321. PROCESS FOR THE PREPARATION OF CUCURBOCITRIN. IRVING SYDNOR BARKSDALE, Greenville, S. C. Filed July 8, 1926. Serial No. 121,277. 5 Claims. (Cl. 167—4.)

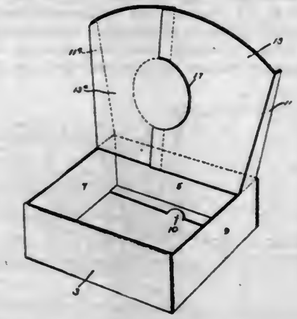


1. A process for producing a drug from water melon seeds which comprises reducing the seeds to a powder, mixing the powdered seeds with distilled water at a temperature of 60 degrees centigrade, the water being slightly alkaline to form an infusion, concentrating said infusion, adding lead subacetate, passing hydrogen sulphid through the liquid, filtering the solution and then adding ethyl ether and dehydrated ethyl alcohol in excess to form a precipitate, removing the liquid from the precipitate, and drying the same.

1,626,322. FLANGE FOR BULL WHEELS. GEORGE FRANCIS BELL, Tulsa, Okla. Filed Mar. 24, 1926. Serial No. 97,045. 12 Claims. (Cl. 242—117.)

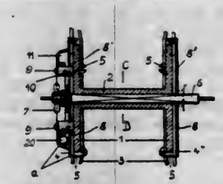
1. In combination, a shaft, a cable to be coiled on said shaft, spaced flanges mounted on said shaft, one of said flanges being formed with a guideway for said cable, said guideway extending from one side of said flange to the other and its bottom surface being spaced from said shaft an equal distance substantially throughout its entire length.

1,626,323. PRINTING STENCIL AND METHOD OF MAKING SAME. SIDNEY S. BENDICK, New York, N. Y. Filed Sept. 21, 1925. Serial No. 57,748. 21 Claims. (Cl. 101—125.)



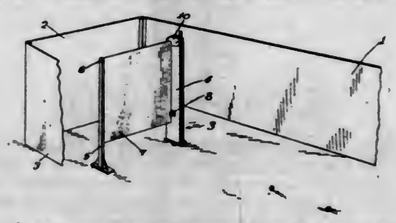
1. In combination, a pad inker; and a stencil sheet cooperating with the pad inker and having cup-like perforations.

7. In combination, a stencil bed; a stencil sheet cooperating with said bed; and means appurtenant to the ends of the stencil bed engaging the surface to be stenciled for preventing during stenciling operation movement of said bed and stencil sheet on said surface in the longitudinal line of said bed.



1,626,324. BOX OR CARTON. WILLIAM G. BOOTH, West Somerville, Mass., assignor to Forbes Lithograph Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 8, 1924. Serial No. 748,604. 7 Claims. (Cl. 206—44.)

1. A box having a flap hingedly associated with an edge thereof and adapted to overlie the top of the box in collapsed position and being itself foldable along a line between its ends and at an intermediate point along

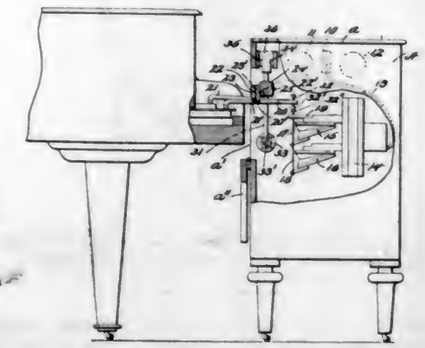


said edge to provide a display portion to extend in standing position across the top transverse to said edge.

1,626,325. YARN REEL. XAVER BRÖGGER, Horgen, Switzerland. Filed July 22, 1925, Serial No. 45,344, and in Switzerland Aug. 9, 1924. 4 Claims. (Cl. 242—110.)

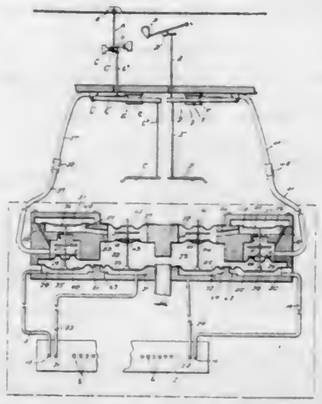
4. A yarn reel comprising a shaft, a flanged nave fixed thereon having spokes pivoted alternately in opposite sides of said flanges, an arcuately slotted guide plate on the exterior face of each flange having slotted lugs, in the slots of which said spokes are guided, a corrugated ball carrier secured to said nave through the arcuate slots of said plate to permit relative movement of plate to said carrier and nave, said balls lying against said plate.

1,626,326. GOLF PRACTICE DEVICE AND GAME. WALTER M. CHASE, Los Angeles, Calif. Filed May 19, 1926. Serial No. 110,124. 15 Claims. (Cl. 273—35.)



1. A golf practice device comprising in combination a movable curtain mounted to be shifted when struck by a golf ball, and means actuated by the curtain to give an indication of some effect of the ball, said means being vertically movable to additively indicate such effects.

1,626,327. CABINET PLAYER. TOLBERT F. CHEEK, New York, N. Y., assignor to Welte-Mignon Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 20, 1923. Serial No. 663,829. 21 Claims. (Cl. 84—110.)

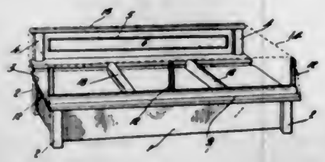


1. A cabinet piano player comprising a casing having an opening, striker pneumatics and their striker rods,

a rail mounted within the casing and extending across the same and formed of complementary members one of which is mounted to swing relatively to the remainder of the rail in an inward and downward direction and in an outward and upward direction, and a series of key operating levers pivotally connected between their ends to the swinging member of the rail and movable bodily

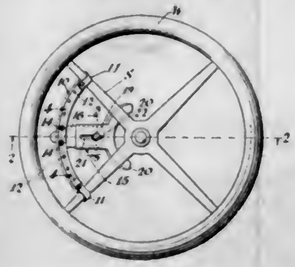
therewith and inwardly in a downward direction to position them within the confines of the casing and outwardly in an upward direction to position them with their ends protruding from the casing, the inner ends of the levers when in the latter position being in operative relation with the striker rods, and fastening means to hold the swinging member of the rail releasable in its raised position.

1,626,328. MEANS TO OPERATE PIANO PEDAL MECHANISMS UNDER CONTROL OF A RECORD. TOLBERT F. CHEEK, New York, N. Y., assignor to Welte-Mignon Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 25, 1923. Serial No. 664,707. 12 Claims. (Cl. 84—108.)



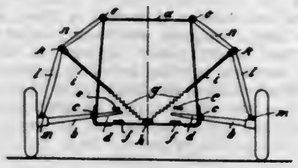
1. A piano player of the outside or cabinet type, movable into and out of operative relation with a piano and including a casing, a series of strike levers movable with the casing and into position to operate directly upon the keys of a piano, a tracker and pedal control means operative under control of a record; in combination with power members arranged outside the player, connections between said power members and pedal control means and means under control of the power members to operate the pedal mechanisms of the piano.

1,626,329. THREAD CUTTER FOR SEWING MACHINES. SAM CORTESE, Dunsmuir, Calif. Filed June 3, 1926. Serial No. 113,507. 2 Claims. (Cl. 112—252.)



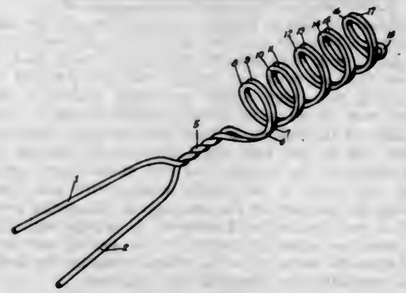
1. A thread-cutting attachment for sewing machines comprising a plate provided adjacent its ends with needle openings, means for pivoting the said plate upon the shuttle arm of a sewing machine, means to be engaged with one end of the plate and the shuttle arm of the sewing machine to prevent movement of the plate, and knives at the ends of the plate disposed transversely thereof.

1,626,330. DISPLAY STAND. ARTHUR COSSINS, Nettlestead, near Maidstone, England. Filed Apr. 3, 1926, Serial No. 99,621, and in Great Britain June 4, 1925. 2 Claims. (Cl. 211—24.)



1. In a display stand, a rectangular box form base, a marble slab supported on its upper surface, an upright back along one edge, a door in the upright back, a strip along the front edge of the slab, projecting pins thereon which engages in holes in the slab to detachably secure the strip in position, uprights pivotally connected to the strip, a gauze cover, snap button fastenings to secure the cover to the upright back and an elastic strip to hold its lower edge close around the front and sides of the slab.

1,626,331. AUTOMOBILE STEERING KNEE CONTROL. JOHN H. CRESMER, Riverside, Calif. Filed Feb. 11, 1926. Serial No. 87,592. 5 Claims. (Cl. 74—39.)

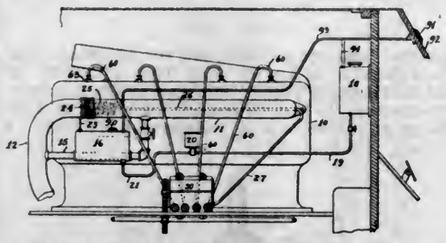


1. A device of the class described comprising a member having attaching parts at its ends permitting it to be attached to the spokes of a steering wheel, an arm hingedly and adjustably connected to said member so as to be capable of being swung downwardly into a position capable of being engaged by the lower limbs of the driver or to be swung upwardly into a position adjacent the spokes, and means for positively locking said arm in either of said positions.

1,626,332. LANDING CHASSIS FOR FLYING MACHINES. CLAUDIUS DORNIER, Friedrichshafen, Germany, assignor of one-half to Dornier-Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed Aug. 17, 1925, Serial No. 50,875, and in Germany Aug. 30, 1924. 3 Claims. (Cl. 244—2.)

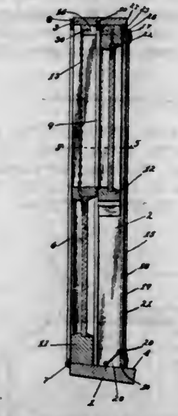
1. Landing gear for aircraft comprising a fuselage, a wheel arranged on each side of said fuselage for vertical motion relative thereto, a pair of toggle levers inserted between each wheel and said fuselage for movement away from and in a plane substantially at right angles to the longitudinal axis of said fuselage, and resilient means extending between said fuselage and said levers and arranged to counteract such outward movement.

1,626,333. FISHING-ROD APPLIANCE. FRANK E. FAIN and ROBERT W. SPRIGG, Oklahoma City, Okla. Filed June 10, 1926. Serial No. 115,051. 1 Claim. (Cl. 248—37.)



A device of the character described, comprising a doubled metallic resilient wire coiled at the outer end so as to form a plurality of loops with a space between each set; a medial stem formed integrally of said wires twisted tightly together and in the opposite direction to the twisting of said coils; two prongs formed of the ends of said wires and flared outwardly from the end of said stem farthest from said coils.

1,626,334. KEY CHAIN. MORRIS FALK, Fitchburg, Mass., assignor to Independent Lock Company, Fitchburg, Mass., a Corporation of Massachusetts. Filed May 29, 1926. Serial No. 112,669. 1 Claim. (Cl. 59—97.)



As an article of manufacture, a key chain having a separate device for dividing the chain into two parts, consisting of a piece of sheet metal bent into two hollow cylindrical portions, each having a passage therethrough for receiving the chain and allowing it to move freely therein and the two sides of the slide being bent inwardly toward each other substantially in contact between the two strands of the chain.

1,626,335. SCAVENGING, FUEL HUMIDFYING, AND VOLATILIZING PROCESS AND APPARATUS FOR INTERNAL-COMBUSTION ENGINES. JAMES P. FARNHAM, New York, N. Y. Filed Apr. 26, 1923. Serial No. 634,915. 18 Claims. (Cl. 123—25.)

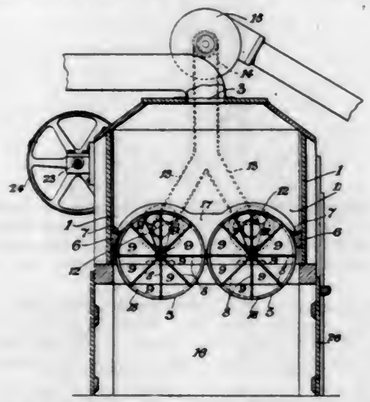
1. In combination, a multicylinder internal combustion engine having an exhaust manifold extending longitudinally rearwardly of the cylinders and then downwardly; a boiler beneath the manifold; a valved shunt heating pipe passing from the mid part of the manifold, thence through the lower part of the boiler and then to the downwardly bent part of the manifold, whereby water in the boiler is heated and boiled by the heat from the exhaust gases passing through the shunt pipe; a raised reservoir tank for supplying water to the boiler; a distributing valve receiving the steam from the boiler; and distributing pipes conducting steam from the distributing valve to the cylinders.

1,626,336. WINDOW SASH AND SCREEN. ABRAHAM W. GOLDMAN, Los Angeles, Calif. Filed Jan. 19, 1926. Serial No. 82,201. 4 Claims. (Cl. 20—52.)

1. A window comprising in combination a window framing, an inner and outer sliding sash mounted therein, a bead separating said sashes and a screen fitting directly against one of the sashes and holding same in position.

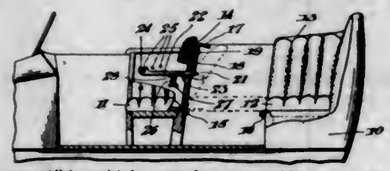
1,626,337. MEANS FOR ATTACHING BUTTONS TO CARDS. ARTHUR HAENICKE, Berlin-Tempelhof, Germany. Filed May 25, 1925, Serial No. 32,829, and in Germany May 30, 1924. 2 Claims. (Cl. 112—265.)

2. As an article of manufacture, a plurality of buttons attached to a card by means of a single thread, each button being singly detachable and attached to the card



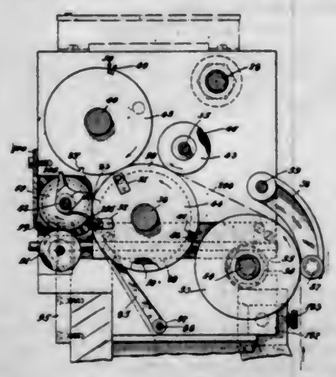
by a stitch consisting of a pair of single loops passing through two holes in each button, the first loop passing over the button from the one hole to the other and being drawn through the second loop and pulled into the second hole and pressed upon the card thus having in the second hole six thicknesses of thread.

1,626,338. AMPULLA COMPOSED OF SEVERAL COMPARTMENTS ADAPTED FOR THE PURPOSE OF RADIOTHERAPEUTICS. WILHELM OSKAR HEUBLEIN, Frankfort-on-the-Main, Germany. Filed Jan. 28, 1926, Serial No. 84,306, and in Germany Jan. 12, 1925. 6 Claims. (Cl. 174—177.)



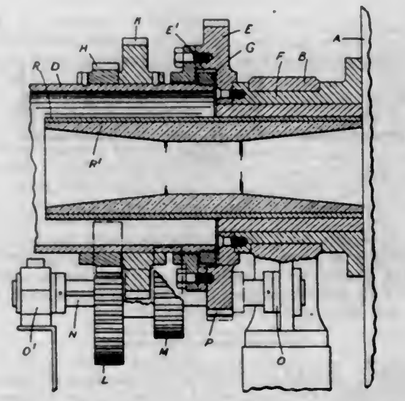
1. An ampulla composed of several compartments adapted for the purposes of radiothereapeutics, comprising in combination a lower compartment containing an absorbent for radio emanation consisting of bodies retaining radioactive substances, an upper compartment containing a liquid which contains for instance free, dissolved carbonic acid, a partition separating the said two compartments, and means for destroying said partition to make said compartments communicate with one another so that the liquid flowing from the upper compartment into the lower compartment forms directly radium emanations.

1,626,339. MEANS FOR EXTRACTING DUST FROM AND SETTLING FUR, HAIR, AND THE LIKE MATERIAL. STANLEY WILLIAM HOWARTH, Stockport, England. Filed Apr. 5, 1926, Serial No. 99,960, and in Great Britain Feb. 17, 1926. 4 Claims. (Cl.19—156.)



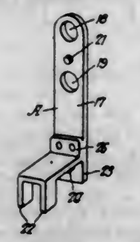
1. Means for extracting dust from and settling fur, hair and the like material comprising a receiving chamber for the material, a pair of drum-like members projecting partly into the said chamber, means for rotating the said drum-like members in directions which cause those parts situated in the chamber to travel towards each other, sieve-like peripheries on the said drum-like members, partitions within the said drum-like members dividing the interior into a plurality of independent and separate compartments each bounded on one side by a part of the sieve-like periphery, openings in the said chamber adapted to communicate with the said compartments which are in the said chamber, and means for preventing the passage of air from the said chamber between it and the drum-like members, whereby the material entering the chamber is caught by those parts of the sieve-like drum peripheries which are passing through the chamber and the dust passes through the said parts and the said openings, and the drum-like members carry the said material outside the chamber as the compartments pass from the chamber into communication with the atmosphere and cause the material to unite to form a single web which falls by gravity from the drums.

1,626,340. CONVERTIBLE VEHICLE SEAT. GEORGE DRYSDALE HOWITH, Ottawa, Ontario, Canada. Filed June 15, 1925. Serial No. 37,265. 1 Claim. (Cl. 155—7.)



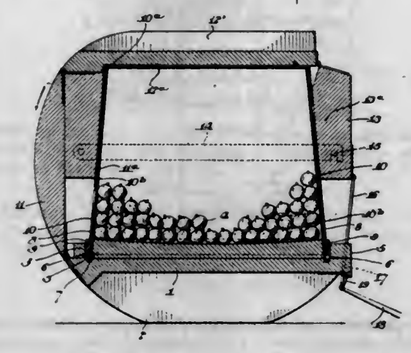
A convertible vehicle seat for automobiles and the like comprising a hingedly mounted back, vertically extending rods spaced from and slidably mounted on said back, a cross-rod integral with the vertical rods and adapted to form a rug rail, right angled extensions formed on the vertical rods, a series of spaced pins arranged in the side walls of the vehicle, a latch arm pivotally mounted on each side of the seat and connected at one end to said extensions, the unconnected end of said arm being formed with teeth to individually engage with said pins, a bracket on the side of the seat and a coil spring positioned on said bracket and adapted to engage with the latch arm to normally retain it in locked position, whereby, on the cross-rod being pulled upwardly the latch arm is automatically disengaged or unlocked.

1,626,341. PAPER FOLDING, CUTTING, AND DELIVERING MACHINE. JOHN O. HUNT, Brooklyn, N. Y., assignor to Independent Paper Mills Inc., Brooklyn, N. Y., a Corporation of New York. Filed June 21, 1924. Serial No. 721,388. 14 Claims. (Cl. 270—71.)



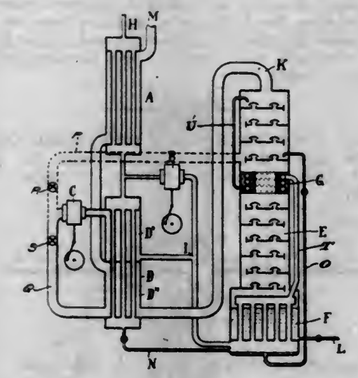
3. In a paper feeding, cutting and delivering machine, cylinders for moving and cutting a paper web into sections of predetermined length, delivery cylinders, a clamp device associated with one of the delivery cylinders, means for operating the clamp device from one of said cylinders for moving and cutting the web, and a device also associated with one of the cylinders for moving the web for engaging each web section and inserting the same into the said clamp device.

1,626,342. METAL-POURING APPARATUS FOR CENTRIFUGAL CASTING MACHINES. JAMES EDGAR HURST and EDMUND BRUCE BALL, Kilmarnock, Scotland, assignors to Centrifugal Castings Limited, Kilmarnock, Scotland, a Company of Great Britain. Filed Aug. 24, 1925, Serial No. 52,202, and in Great Britain Mar. 9, 1925. 3 Claims. (Cl. 22—65.)



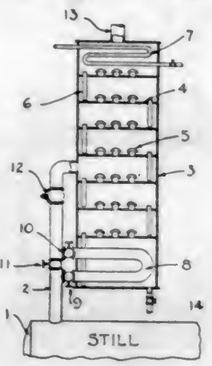
1. In metal pouring apparatus for centrifugal casting machines the combination of a pouring trough having a weir edge varying in height along the trough, a reservoir adapted to deliver molten metal into the trough, means for rotating the trough, mechanism for simultaneously tipping the reservoir to an extent dependent upon the speed at which the trough is rotated and means for varying the ratio of these interdependent speeds.

1,626,343. MIXING-VALVE SUPPORT FOR LAUNDRY TRAYS. SAMUEL KERSTEN, Chicago, Ill. Filed July 18, 1924. Serial No. 726,881. 5 Claims. (Cl. 4—193.)



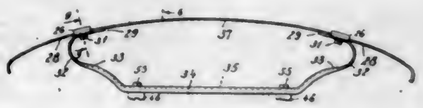
1. A mixing valve support for laundry trays comprising a vertical standard having openings therein through which supply necks for the valve pass and whereby the valve is secured to the standard, a claw foot for the standard for embracing the walls of the tray, and means for clamping the foot to the tray walls.

1,626,344. ART OF PACKING. MATHIAS R. KONDOLF, Cynwyd, Pa., assignor to Boxboard Products Company, Philadelphia, Pa., a Corporation of Delaware. Filed Oct. 17, 1924. Serial No. 744,193. 3 Claims. (Cl. 226—17.)



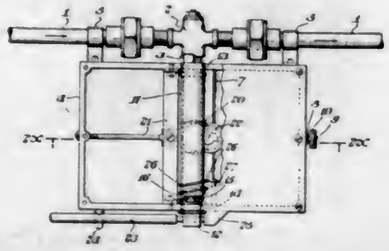
1. The improvement in the art of packing which comprises a rocking base having a retainer seat, a curved block hinged to said base, a link hinged to said block, a block hinged to said link, and means for detachably connecting said last named block and base together.

1,626,345. METHOD OF SEPARATING GASEOUS MIXTURES. JEAN LE ROUGE, Boulogne, France, assignor to Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude), Paris, France. Filed Feb. 1, 1923, Serial No. 616,804, and in France Mar. 16, 1922. 13 Claims. (Cl. 183—115.)



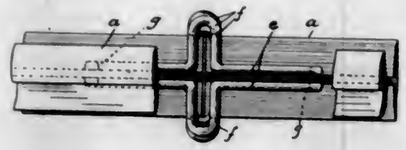
1. The method of separating the constituents of gaseous mixtures, which comprises subjecting a portion of the compressed gaseous mixture before liquefaction to a partial expansion with external work and further expanding with external work a portion of the partly expanded mixture.

1,626,346. DISTILLATION APPARATUS. WARREN K. LEWIS, Newton, Mass., assignor to Standard Development Company, a Corporation of Delaware. Filed Dec. 5, 1923. Serial No. 678,730. 6 Claims. (Cl. 196—139.)



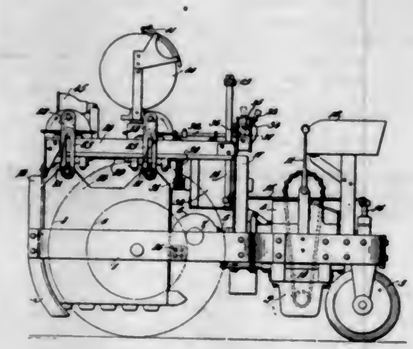
4. Apparatus of the character described, which comprises a heating vessel, a fractionating tower, a connection from said heating vessel to a point of discharge above the bottom of the tower, and heating means at the bottom of the tower in circuit with said connection.

1,626,347. AUTOMOBILE BUFFER AND ATTACHMENT THEREFOR. GEORGE ALBERT LYON, Philadelphia, Pa. Filed May 10, 1923. Serial No. 637,934. 20 Claims. (Cl. 293—55.)



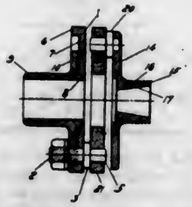
14. The automobile buffer supporting member of angular sectioned steel having a flanged portion adapted to extend between the frame ends of the automobile and having outwardly projecting flattened and widened ends to form vertically wide connector end portions adapted to support a buffer front.

1,626,348. COIN-CONTROLLED DISPENSING APPARATUS. JOHN MCGRANIGHAN, Roxborough, Pa. Filed May 8, 1922. Serial No. 559,132. 1 Claim. (Cl. 194—87.)



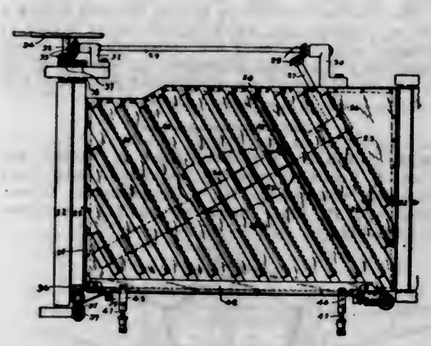
The combination with a rotary valve, of control mechanism therefor comprising relatively revoluble members consisting of a shaft having a rod therein, one of said members being connected with said rotary valve and the other of said members having a handle connected therewith, said members having a coin slot extending diametrically entirely therethrough, a coin support below said slot and relatively to which said members are revoluble to remove a coin from said support, and a pin and slot connection between said revoluble members whereby one of said members is movable by the other upon the operation of said handle in one direction and said last named member is movable independently of the other by the movement of the handle in the opposite direction.

1,626,349. RAIL JOINT. DAVID B. MOISSELLE, Philadelphia, Pa. Filed Nov. 4, 1926. Serial No. 146,119. 14 Claims. (Cl. 238—164.)



1. In a rail joint, the combination with the rails, of a plurality of spaced apart bars extending longitudinally of and welded to the rails and provided between their ends with flexible sections, said joint engaging both the web and base portions of the rail.

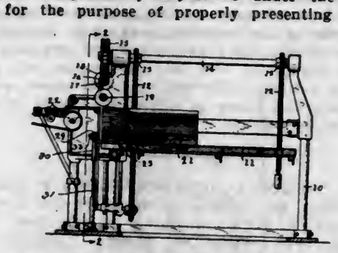
1,626,350. PIG-LEAD TRUCK. WILLIAM E. NEWNAM, Collinsville, Ill., assignor to National Lead Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 4, 1923. Serial No. 660,885. 7 Claims. (Cl. 254—2.)



1. A truck of the character described comprising a chassis, traction wheels on the front of said chassis and adapted to straddle the load, a steering wheel on the rear of said chassis, a motor for driving said traction wheels to propel the truck, an elevating carriage between said traction wheels and adapted for vertical elevation to carry the load, elevating mechanism for said carriage adapted to raise and lower the same in a vertical line comprising oppositely moving cranks on said chassis and arranged along said carriage, a motor for said elevating mechanism and automatic means positively connected to said motor for stopping said mechanism when the carriage reaches a predetermined position.

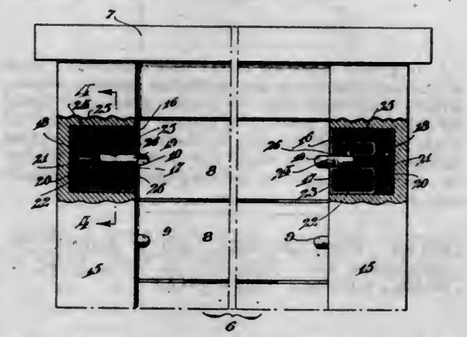
1,626,351. FLEXIBLE ADJUSTABLE COUPLING. EDWARD B. NOWOSIELSKI, Bloomfield, N. J., assignor to Splitdorf Electrical Company, Newark, N. J. Filed Feb. 9, 1923. Serial No. 617,944. 4 Claims. (Cl. 64—90.)

1. In a device of the class described, in combination with driving and driven members longitudinally spaced apart, with the driven member on a shaft, each member having parts projecting toward the other and a disc of flexible material carried on said projecting parts, a flanged member adapted to be drivingly attached to an operating shaft and having a part extending through the driving member whereby the flange is seated directly against a wall of the driving member, said driving member having an annular rim of substantially the same diameter as said disc extending outwardly substantially flush with the outer surface of said flange, studs extending outwardly from the driving member between the rim and said flange and a plurality of means carried on said studs independently and separably operable for gripping directly the rim and flange for the purpose described.



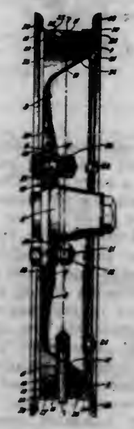
1,626,352. FEED TABLE. ANDREW OLSON, Cleveland, Ohio, assignor to The Cleveland Folding Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 3, 1925. Serial No. 20,413. 6 Claims. (Cl. 271—52.)

1. In feed tables, the combination of means for advancing a sheet along said table and to one side thereof, an endless belt arranged along said side so as to engage one edge of the sheet and move therewith, means for driving said belt, and means for adjusting the position of said belt transversely of said table independently of said driving means.



1,626,353. PAPER FEEDER. ANDREW OLSON, Cleveland, Ohio, assignor to The Cleveland Folding Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 21, 1925. Serial No. 63,883. 4 Claims. (Cl. 271—62.)

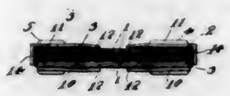
1. In feeders, the combination of a pile table, means for moving said table, means for delivering sheets from a pile on said table, one or more members carried by said table and independently adjustable under the pile of sheets for the purpose of properly presenting the top



sheet of the pile to said delivering means, and means cooperating with said members to automatically adjust them as the pile is depleted.

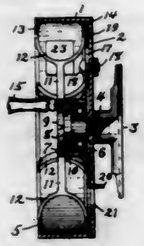
1,626,354. DRAWER STOP. RAPHAEL ANGELO PILLA, Philadelphia, Pa. Filed July 13, 1926. Serial No. 122,103. 4 Claims. (Cl. 45—7.)

1. A drawer stop including a casing; a lock bolt slidably positioned in said casing; means for normally holding said bolt in an extended position; a catch positioned in said casing and adapted to normally abut against said bolt, said bolt being adapted to engage said catch.



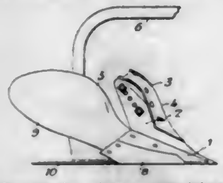
1,626,355. WHEEL. SYDNEY I. PRESCOTT, New York, N. Y., and FRANCIS J. RUMMLER, Lyndhurst, N. J. Filed Nov. 16, 1921. Serial No. 515,465. 21 Claims. (Cl. 301—63.)

12. A wheel comprising a motor-vibrated hub, a road-vibrated rim, and a vibration-damping body on said hub and supporting said rim, said body including a disc having



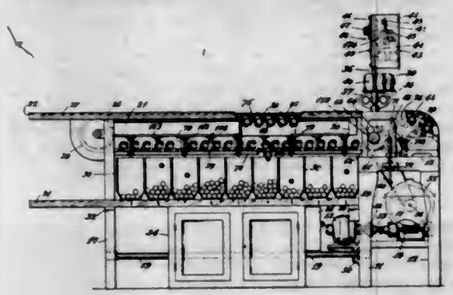
a central mounting section and a mid-section both behind the plane of impact and having a concavo-convex rim section crossing and recrossing said plane, an odd number of rim holding and vibration-damping nuts in the concavity of and united with said rim section, and a corresponding number of rim holding thrust screws working in said nuts and acting to subject the united nuts and rim section to pressure.

1,626,356. FIXED CONDENSER. LEWIS T. RHOADES, Mont Clare, Pa., assignor to New York Coil Company, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1925. Serial No. 26,896. 7 Claims. (Cl. 175—41.)



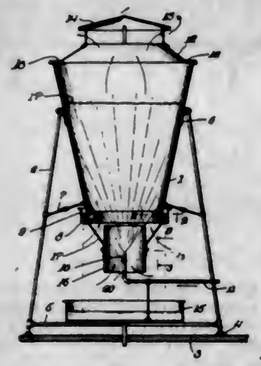
1. In a fixed condenser of the class described; a stack of alternate insulating and conducting sheets interposed between rigid outer sheets of insulating material; means for automatically maintaining uniform pressure upon the stack, said means consisting of resilient clamping plates engaging a face of the stack, and means passing through the stack for holding the clamping plates in engagement with said face.

1,626,357. FISHLINE REEL. GUY S. RINEBOLT, Sr., Huntington, Ind. Filed Apr. 3, 1926. Serial No. 99,526. 5 Claims. (Cl. 242—84.5.)



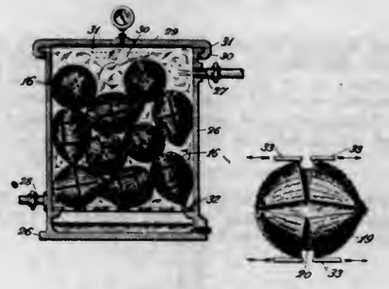
1. A fishline reel comprising a cylindrical housing having a head at one end and being entirely open at the opposite end; a base; a screw extending through the head of the housing into said base; a bearing within the housing supported on said screw; a reel rotatably mounted on said bearing, said reel having forked spokes and a pair of spaced annular guards integral respectively with the corresponding arms of said forked spokes and forming the respective end perimeters of said reel; a plate on the inner face of the head of said housing having limited sliding movement thereon, the top of said plate being shaped in the form of an arc with a tapering marginal edge, which edge has frictional engagement with the corresponding guard on said reel, one end of said plate being bent and extended through said head to form a thumb-piece, there being an elongated opening in said head admitting of movement of said thumb-piece therein; and an operating handle in connection with said reel, the cylindrical wall of said housing having a guide opening therein for the fishline.

1,626,358. ATTACHMENT FOR PLOWS. HEINRICH RÖWER and FRITZ RÖWER, Blender, Germany. Filed Dec. 22, 1926, Serial No. 156,326, and in Germany Dec. 21, 1925. 2 Claims. (Cl. 97—134.)



1. An attachment for plows comprising, in combination, a coulter, and a supplemental moldboard mounted on said coulter, said supplemental moldboard having a share portion and a convex moldboard portion.

1,626,359. COLOR-SORTING MACHINE. RUPERT E. RUNDELL, Rockville Center, N. Y., assignor to Photometric Products Corporation, a Corporation of Delaware. Filed July 31, 1926. Serial No. 126,200. 32 Claims. (Cl. 209—111.)

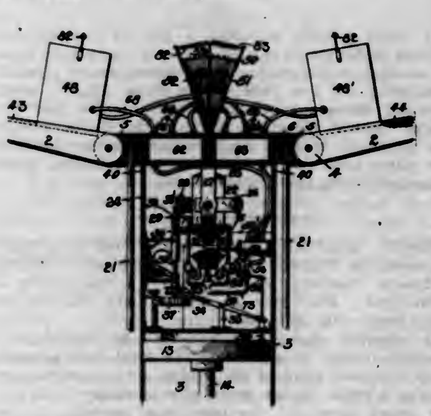


1. The combination with an endless conveyor having a series of grippers into which objects to be sorted in accordance with their color are indiscriminately loaded, of electrically controlled mechanism for examining the color of said objects and for causing said grippers to sort and deliver them in accordance therewith.

1,626,360. SPRAY COOLING. BERT R. SAUSEN and HARRY D. BINKS, Chicago, Ill., assignors to Binks Spray Equipment Co., Chicago, Ill., a Corporation of Illinois. Filed Sept. 19, 1921. Serial No. 501,742. 8 Claims. (Cl. 261—116.)

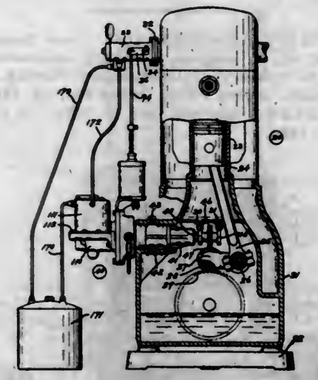
1. A spray cooling appliance comprising an upright casing open at its bottom and having a ventilating opening in the upper portion thereof, upwardly directed spraying means disposed below the casing, a pair of concentric collars through which the spray is consecutively projected upwardly into the casing, and a drip chamber having the larger of the two collars as its inner wall, the casing having its bottom opening larger in diameter than the said wall and overhanging the drip chamber.

1,626,361. METHOD OF SHELLING COCONUTS. FRANK R. SCHMITT, Brooklyn, N. Y., assignor to American Machine and Foundry Company, a Corporation of New Jersey. Filed June 5, 1926. Serial No. 113,950. 6 Claims. (Cl. 146—219.)



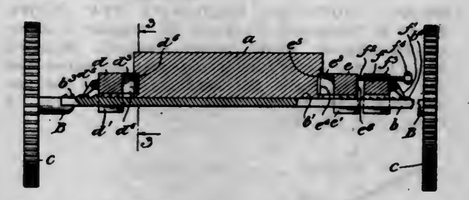
1. The method of shelling a coconut, which consists in weakening a part of its shell to control subsequent breakage, then steaming said shell to loosen it from the nut, and then removing said shell by breaking it at its weakened part.

1,626,362. OXIDIZED PINE OIL FOR PIGMENTS. JOHN K. SPEICHER, Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del., a Corporation of Delaware. Filed July 20, 1926. Serial No. 123,793. 4 Claims. (Cl. 134—39.)



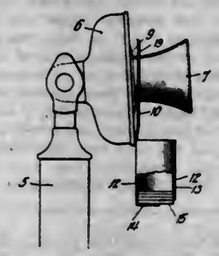
1. The method of preparing pigments for paints, varnishes, lacquers, enamels and other uses, which comprises grinding the pigment in admixture with oxidized pine oil.

1,626,363. GRAVITY BOMB. ELMER A. SPERRY, Brooklyn, N. Y. Filed Oct. 14, 1921. Serial No. 507,591. 32 Claims. (Cl. 102—2.)



8. In combination, a gravity bomb, and means positioned outside of the bomb proper for stabilizing the latter in azimuth.

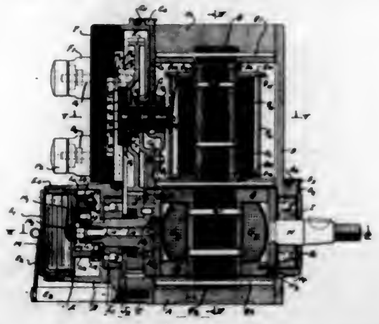
1,626,364. ENGINE. FRANK F. STARR, Dayton, Ohio, assignor to Delco-Light Company, Dayton, Ohio, a Corporation of Delaware. Filed Jan. 24, 1924. Serial No. 688,323. 12 Claims. (Cl. 123—195.)



1. An internal combustion engine comprising, in combination, a frame; an engine driven shaft projecting through said frame; an ignition timer having a housing extending through the frame and providing a bearing for said shaft, and means covering the housing and including a pump operated by said shaft.

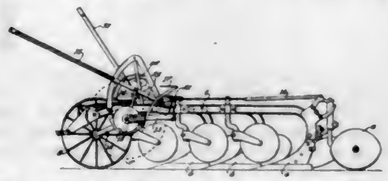
1,626,365. VENEER-CUTTING MACHINE. CHRISTOPHER STRAUB, East Elmhurst, N. Y., assignor, by mesne assignments, to Astoria Importing and Manufacturing Co. Inc. Filed Feb. 5, 1925. Serial No. 6,917. 11 Claims. (Cl. 144—214.)

1. In a half round rotary veneer cutting machine, the combination with a stay-log operatively rotatable about its own axis, of means slidable on the stay-log to secure a half round flitch thereto and means cooperating with the stay-log to adjustably position the first named means.



1,626,366. COIN-HOLDER. THOMAS J. SUGHRUE, Chicago, Ill. Filed Mar. 25, 1922. Serial No. 546,928. 2 Claims. (Cl. 133—6.)

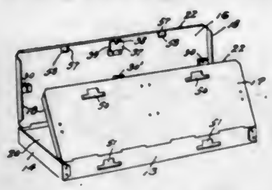
2. In a coin holder, a body portion having a relatively large opening therein, an elongated tab depending therefrom and a tubular coin holding portion aligned with



said tab and supported thereby, said coin holding portion having an open end adjacent said tab and opening, and having a coin supporting flange at the opposite end thereof, said tubular portion being narrower than said body portion.

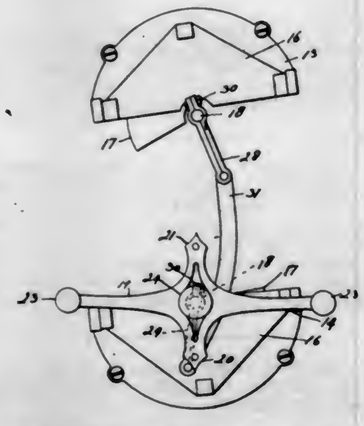
1,626,367. MAGNETO GENERATOR. OLOF THOMPSON, New York, N. Y., assignor, by mesne assignments, to Splitdorf-Bethlehem Electrical Company, Newark, N. J., a Corporation of New Jersey. Filed Feb. 15, 1919, Serial No. 277,229. Renewed June 18, 1923. 12 Claims. (Cl. 123—149.)

1. A device of the type specified including means for producing a permanent magnetic field, a single winding therein designed to generate an electric current, a separate winding therein for deriving an induced current from the first winding, and means adapted to rotate one of said windings while the other remains stationary.



1,626,368. ADJUSTING MECHANISM FOR PLOWS. HARRY R. TRAPHAGEN, Rockford, Ill., assignor to Emerson-Brantingham Manufacturing Company, Rockford, Ill., a Corporation of Illinois. Original application filed Jan. 19, 1920, Serial No. 352,287. Divided and this application filed Apr. 24, 1922. Serial No. 556,139. 1 Claim. (Cl. 97—103.)

In a plow, in combination, a plow frame, supporting wheels, a forward and a rearward crank axle for said wheels mounted on the frame, an upstanding arm fixed to the pivot portion of each crank axle, a notched segment pivotally attached to the upper end of the forward arm, a horizontal link disposed below the pivotal connection of the segment and its supporting arm, said link being attached at its forward end to said segment and having a sliding connection at its opposite end with the upstanding rear arm, a lever pivoted on said link concentric with said segment and having a latch cooperating with the notched portion thereof, a link pivotally connecting the lever and the rear arm, and means operative between the forward upstanding arm and the link for holding the latter from lateral displacement.

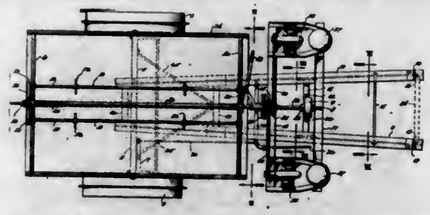


1,626,369. FOLDING SHIPPING CASE. JOHN S. WILLIAMSON, Seattle, Wash. Filed May 5, 1925. Serial No. 28,042. 2 Claims. (Cl. 220—6.)

1. In a folding shipping-case, a tray base-member, side and end sections hinged to said base-member, bracket devices secured to the respective side sections, a two-part partition having one of its parts hingedly connected to said base-member, means connecting the partition parts with each other for relative sliding movements, means carried by said end sections and by the partition for de-

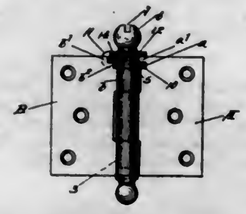
tachably securing the same to the side sections in substantially right angular relations with the latter and also with respect to the floor of the base member, and a tie-rod rotatably connected to one of the partition parts, said tie-rod having bent ends engageable with the bracket devices of both of said side sections.

1,626,370. RADIORECEIVER. HENRY F. WORNER, Philadelphia, Pa. Filed Aug. 21, 1924. Serial No. 733,315. 1 Claim. (Cl. 175—41.5.)



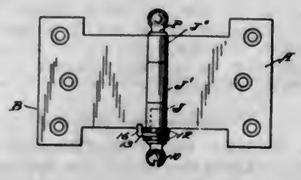
A radio receiver including a pair of variable condensers having rotors carried by shafts, clamp arms loosely mounted on the shafts of the rotors, means pivotally connecting the free ends of the clamp arms a predetermined distance apart, means securing the shaft engaging ends of the clamp arms to the shafts whereby the rotors can be freed for adjustment independently of the clamp arms and one another, and operating means connected to the shaft of one rotor.

1,626,371. SPRAYING ATTACHMENT FOR TRACTORS. NORMAN A. WRIGHT, Pontiac, Mich., assignor to Pontiac Tractor Company, Pontiac, Mich., a Corporation of Michigan. Filed May 25, 1923. Serial No. 641,332. 1 Claim. (Cl. 299—45.)



A spraying apparatus adapted to be applied to a Fordson tractor by separating the front axle assembly from the power plant of the tractor, said apparatus comprising a frame having means of connection to the tractor power plant and the front axle assembly, a tank on the front end of said frame, a shaft extending through said tank and having at its rear end means for coupling it to the crank shaft of the tractor, whereby said tank shaft may be used for starting said power plant when

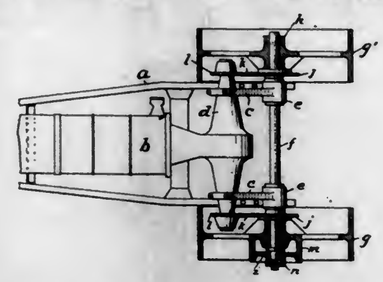
the spraying apparatus is attached to the tractor, a pump supported from the side of said frame at the rear of said tank, said pump being operatively connected to said



tank and to said tank shaft, an agitator in said tank, and driving connections between said agitator and said tank shaft.

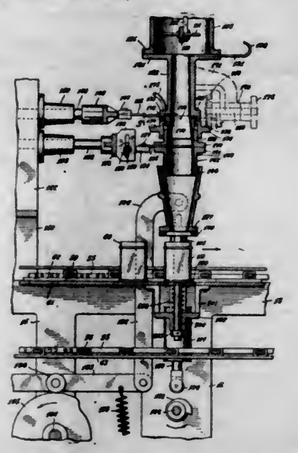
1,626,372. HINGE. GEORGE W. ZABEL, Sherman, Calif. Filed Aug. 25, 1926. Serial No. 131,415. 4 Claims. (Cl. 16—141.)

1. A friction clamp for hinges including a pintle for the hinge leaves, spaced clamp plates one of which is rigid on the pintle and the other being movable, a friction member between the plates and turnable on the pintle, and means for closing the plates against the member; said plates immovably engaging one leaf and the member immovably engaging the other leaf.



1,626,373. HINGE CLUTCH. GEORGE W. ZABEL, Sherman, Calif. Filed Oct. 14, 1926. Serial No. 141,506. 4 Claims. (Cl. 16—139.)

1. A friction clutch for a hinge, including a journal key stud element having a screw stem, mutual clamp members one of which is turnable between others, and means for clamping the members together; the turnable member having means to interlock with one hinge leaf.

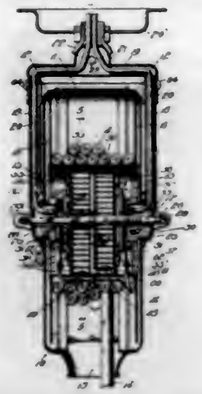


1,626,374. DIFFERENTIAL LOCK FOR TRACTORS. GEORGE C. ABBE, Kennett Square, Pa., assignor to American Road Machinery Company, Inc., Kennett Square, Pa., a Corporation of Delaware. Filed July 18, 1925. Serial No. 44,500. 3 Claims. (Cl. 74—100.)

1. In a tractor, in combination, a pair of wheels, a one piece axle extending through the hubs of both wheels, one of which is rotatably mounted on said axle and the other of which is fixedly mounted thereon, means for driving said wheels including a differential gearing having a two part shaft, driving connections between the axle and one part of the shaft, driving connections between the other part of the shaft and the wheel ro-

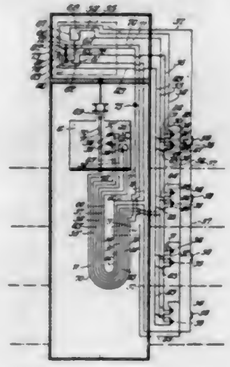
tatably mounted on the axle, and means adapted to afford a connection between said axle and said wheel rotatably mounted thereon.

1,626,375. APPARATUS FOR FILLING CANS OR OTHER RECEPTACLES. CHARLES A. ALEXANDERSON, New York, N. Y., assignor to Eugene W. Durkee, New York, N. Y. Filed Feb. 27, 1926. Serial No. 91,037. 9 Claims. (Cl. 226—95.)



1. In a machine for filling receptacles, and in combination, a tank provided with an opening in its bottom, a tube connected to said tank and depending therefrom in register with said opening, means for closing such opening, an adjustable measuring chamber connected to the lower end of said tube and communicating therewith, a discharge tube connected with the bottom of said measuring chamber, means for shutting off communication between said measuring chamber and said first tube, and between said measuring chamber and discharge tube, a hopper into which the lower end of said discharge tube extends, means for supporting the hopper, and means for admitting intermittent currents of compressed air tangentially to said measuring chamber, all in vertical alignment.

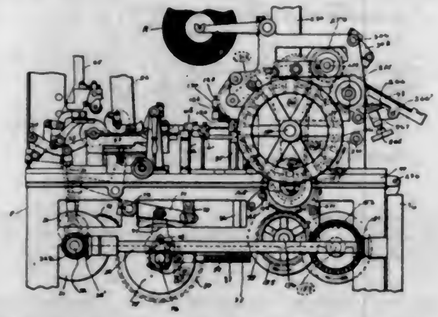
1,626,376. REWINDING REEL. ERNST G. K. ANDERSON, Chicago, Ill., assignor, by mesne assignments, to Appleton Electric Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 14, 1919. Serial No. 317,399. 8 Claims. (Cl. 173—367.)



1. A rewinding reel, comprising an open ended cylinder constituting a spool, annular disks surrounding and

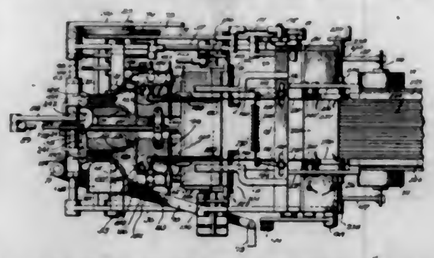
exteriorly fixed to the ends of said spool and forming flanges therefor in a manner to leave the spool open at

its ends, spring barrels disposed within said spool, and a fixed shaft extending through said spool and barrels, the ends of the spool overhanging said barrels.



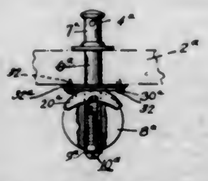
1,626,377. ELEVATOR-CONTROL SYSTEM. JOHN C. A. ANDERSON, Wilmette, Ill., assignor to Reliance Elevator Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 19, 1925. Serial No. 16,709. 5 Claims. (Cl. 187—29.)

5. In a device of the character described an elevator car, and means for controlling the operation of said car comprising a manually movable device which when in one position causes said car to move and in another position causes it to stop and means mechanically connected with said car for indicating the position of said car mounted adjacent said device, said indicating means comprising a movable pointer and a dial having adjustable floor level indicating means thereon.



1,626,378. WRAPPING MACHINE. HARRY YARRINGTON ARMSTRONG, Syracuse, N. Y., assignor, by mesne assignments, of one-half to American Machine and Foundry Company, a Corporation of New Jersey. Filed Dec. 2, 1922. Serial No. 604,582. 32 Claims. (Cl. 93—7.)

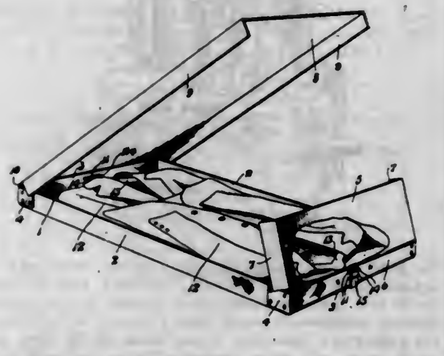
2. A machine for wrapping and grouping individual gum sticks and for wrapping and sealing said groups, comprising two mechanisms for independently wrapping individual sticks and grouping them, a single mechanism to wrap and seal the groups, and means to transport separately wrapped groups to said single wrapping and sealing mechanism, said wrapping and grouping mech-



anism operating to synchronously group the individual sticks, and transporting means operating to non-synchronously transport groups from the grouping mechanisms to the wrapping and sealing mechanism.

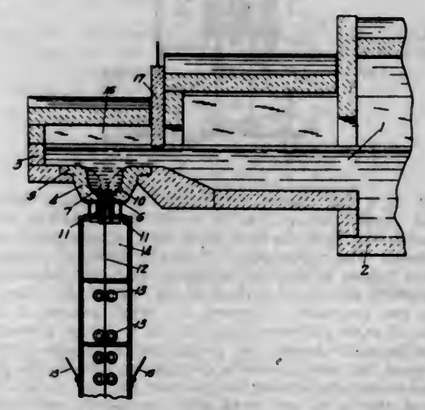
1,626,379. WRAPPING MACHINE. HARRY Y. ARMSTRONG, Syracuse, N. Y., assignor, by mesne assignments, of one-half to American Machine and Foundry Company, a Corporation of New Jersey. Filed Mar. 26, 1924. Serial No. 702,007. 40 Claims. (Cl. 93—2.)

1. A wrapping machine comprising mechanism to fold a wrapper circumferentially about an article, and mechanism to form and fold end flaps on the article when the article and its wrapper are moved through the same, means for moving the article and its wrapper through said mechanism combined with equalizer means to maintain the article in its movement through the end folding mechanism centralized with respect to said mechanisms.



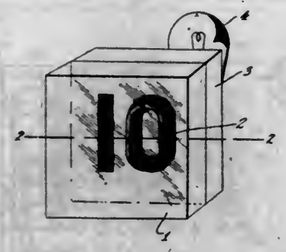
1,626,380. TUNING PEG FOR STRINGED INSTRUMENTS. U SHERMAN AVERY, Union Hill, and ALBERT K. TROUT, Bradley Beach, N. J., assignors to Waverly Novelty Co., Inc., New York, N. Y., a Corporation of New York. Filed July 26, 1922. Serial No. 577,653. 6 Claims. (Cl. 84—305.)

6. In a tuning peg for musical instruments having a shaft adapted to be supported in an aperture in the head of the instrument, said shaft having a shoulder to



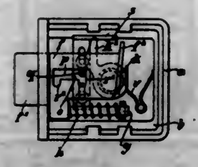
limit endwise movement thereof in the aperture in one direction, and having throughout a portion of its length a flattened surface, a thumb piece rotatably mounted on said shaft, an interponent member slidably supported on said shaft and having an aperture with a flattened side adapted to engage the correspondingly flattened surface of the shaft, means for holding said thumb piece against rotation relatively to said interponent member said means comprising a transversely disposed recess in one of said elements, and securing the other of said elements in said recess.

1,626,381. SHIPPING BOX FOR CLOTHING. WALTER H. BATTS, Grand Rapids, Mich. Filed Mar. 22, 1926. Serial No. 96,387. 11 Claims. (Cl. 206—7.)



11. In combination a receptacle having an aperture in one end, a garment hanger located within the receptacle and having a hook extending through said aperture, means located outside of the receptacle to engage and retain said hook, and means to hold said hook in close engagement with said retaining means.

1,626,382. FORMING SHEET GLASS. JAMES C. BLAIR, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Feb. 18, 1924. Serial No. 693,501. 16 Claims. (Cl. 40—3.)

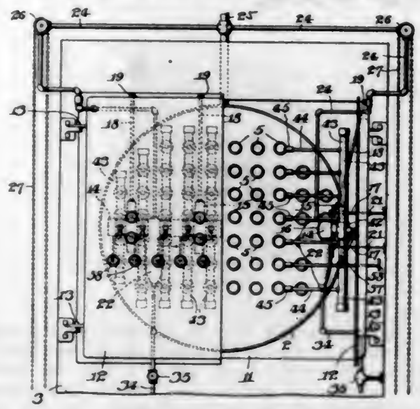


1. The method of forming sheet glass, wherein glass flows downwardly through an elongated orifice, whose end portions are narrower than the central portion.

1,626,383. ILLUMINATED SIGNAL FOR ELEVATOR INSTALLATIONS. FRANZ A. BOEDTCHER, Bergenfield, N. J. Filed May 22, 1924. Serial No. 715,014. 1 Claim. (Cl. 40—135.)

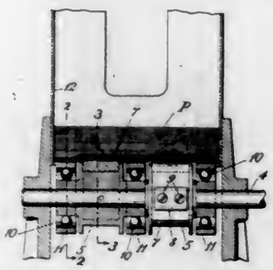
A signal embodying a transparent front plate provided in its rear face with a depression constituting signaling indicia, translucent coloring matter coating said depression to impart the desired color thereto, a translucent back plate positioned in facial engagement with the rear of the front plate to cover and close the depression in the rear of the front plate and which back plate can be seen through the front plate and forms a background for the indicia, and a lamp positioned rearwardly of the back plate, for illuminating both the back plate and the indicia, and the colored indicia appearing as in relief.

1,626,384. LATCH LOCK. ADOLF BOGE, Solingen, Germany. Filed Sept. 12, 1924. Serial No. 737,285, and in Germany Sept. 12, 1923. 13 Claims. (Cl. 70—46.)



7. In a lock, a latch bolt, a second bolt movable transversely of the latch bolt and having a pair of spaced projections, one of said projections being movable into and out of locking engagement with the latch bolt, and a pair of bolt actuating devices, each normally operative independently of the other for bolt projecting and retracting actions, each bolt actuating device having an arm movable between the contacts of said second bolt for respectively projecting and retracting the same, the other of said projections and the arms of the actuating devices being so relatively constructed as to render one of said bolt actuating devices ineffective for bolt releasing actions upon the projection of the bolts by the other bolt actuating device and while said bolts are under the control of the latter.

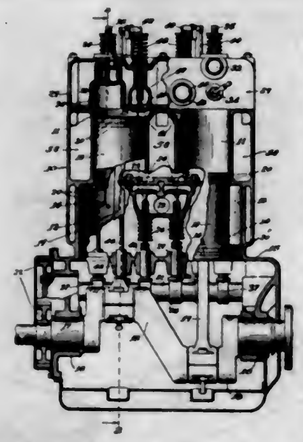
1,626,385. BOILER-CLEANING DEVICE. MARION R. BOWE, Philadelphia, Pa., assignor of one-half to William D. Harris, Philadelphia, Pa. Filed Mar. 3, 1922. Serial No. 540,684. 6 Claims. (Cl. 122—391.)



1. The combination of a fire tube boiler, a housing enclosing the same and providing a passage for products of combustion leading from the fire tubes, and a tube cleaning device within said passage in front of the discharge end of said tubes and comprising a steam header, pipes connected to the header and provided with steam

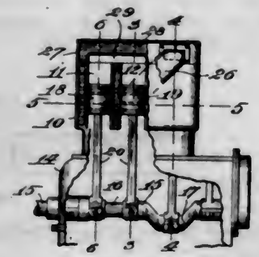
discharging nozzles directed toward the open ends of said tubes, a steam separator within said passage in front of the discharge end of said tubes and communicating with

the header, a steam supply pipe leading to the separator, and valves for controlling the discharge of steam from the nozzles.



1,626,386. PAPER-FEEDING ROLL. WILHELM B. BRONANDER, Montclair, N. J., assignor to American Machine & Foundry Company, a Corporation of New Jersey. Filed Apr. 7, 1926. Serial No. 100,262. 4 Claims. (Cl. 271—41.)

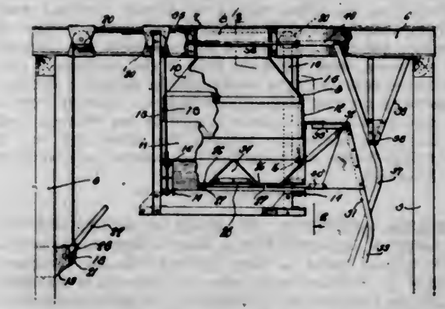
1. A roll for successively feeding sheets of paper from a pack, comprising a rotating shaft, means carried and rotated by said shaft and intermittently engaging said pack to successively feed sheets therefrom, and ball bearings carried by said shaft with their outer races in constant engagement with said pack and constantly exerting a slight feeding strain on the sheet to be fed out.



1626,387. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Co., Los Angeles, Calif., a Voluntary Trust. Filed Jan. 4, 1923. Serial No. 610,699. 3 Claims. (Cl. 123—59.)

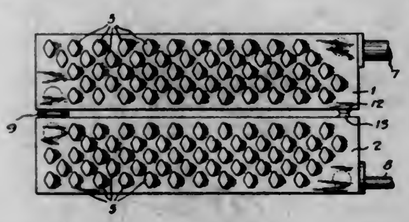
2. An internal combustion engine having two cylinders, each provided with a chamber having two diameters, the smaller diameter chamber constituting a combustion chamber and the larger diameter chamber constituting a gaseous fuel precompression chamber, a poppet valve for controlling the admission of gaseous fuel into each precompression chamber, a two diameter piston arranged for operation within each cylinder, a removable head for said cylinders, said head having two valve seats formed directly above each combustion chamber, one seat being located within a pocket that extends inwardly from the face of the head, ignition means seated in the head and extending into said pocket, a duct extending from the pocket above the valve seat therein to the upper portion of the precompression chamber in the other one of the two cylinders forming the engine unit, a poppet valve normally resting on the last mentioned valve seat, the other one of the two poppet valve seats being formed on the face of

the head, a valve normally resting on the latter seat, an exhaust duct leading through said head from a point above said last mentioned valve leading to the precompression chambers, a crank shaft to which the pistons of the engine are connected, a cam shaft driven from said crank shaft, and valve unseating means arranged to be actuated by the cams on said cam shaft.



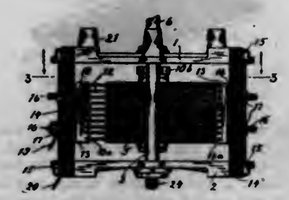
1,626,388. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Co., Los Angeles, Calif., a Voluntary Trust. Filed Feb. 28, 1924. Serial No. 695,723. 2 Claims. (Cl. 123—58.)

2. In a two stroke cycle internal combustion engine unit, three cylinders, two of which are adapted to combustion and joined at their head ends by a common compression and combustion clearance chamber, exhaust ports formed in the wall of one of said two combustion cylinders, inlet ports formed in the wall of the other of the two combustion cylinders, the third cylinder of the unit of three cylinders being adapted to charge pumping, a crank shaft having two crank throws, pistons within each of the three cylinders, connections between the pistons in the two combustion cylinders and one of the two crank throws of said crank shaft, a separate connection between the piston within the third cylinder and the other one of the two crank throws of the crank shaft, said last mentioned crank throw being arranged in relation to the crank throw to which the two pistons of the two combustion cylinders are connected, so as to cause the



piston within the pumping cylinder to reach head end dead center at the time the piston within the combustion cylinder having the inlet ports arranged in its wall has moved sufficiently past crank end dead center to close said inlet ports, the head end of the chamber in the pump cylinder having a lateral extension, there being a fuel charge admission port at the outer end of said lateral extension, an admission poppet valve normally closing said admission port, means whereby the said poppet valve is opened mechanically immediately after the piston within the pumping cylinder has reached head end dead center and held open during the period of each suction stroke of the pumping cylinder piston and a charge volume transfer duct leading from the upper or head end of the pumping chamber to the inlet ports in one of the combustion chambers.

1,626,389. MATERIAL-HANDLING EQUIPMENT. MORGAN R. BUTLER, Waukesha, Wis. Filed May 26, 1923. Serial No. 641,703. 3 Claims. (Cl. 221—111.)

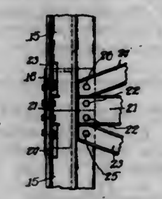


1. In a device of the class described, the combination of a supporting member and a two-part adjustable hopper connected thereto, guide elements secured to said supporting member and between which said hopper is positioned, a control valve and its operating means carried by the movable part of said hopper, said movable part being movable with respect to said guide elements, and said movable part bearing against said guide elements and being retained in alignment with its stationary part during the movement of the valve to its opening position.

1,626,390. RADIATOR FOR HEATING AND VENTILATING UNITS. MICHAEL J. CALLAHAN, New York, N. Y. Filed Sept. 4, 1925. Serial No. 54,579. 2 Claims. (Cl. 257—149.)

2. A radiator comprising a plurality of tubular, rectangular units of uniform size from end-to-end grouped in tiers horizontally, one tier being arranged above another; tubular coupling means for the units, certain of the coupling means also acting to support units one on the other; and the other coupling means extending laterally between the units; fluid inlet means coupled to one of the units at its extreme end; and fluid outlet means coupled to another of the units at its extreme end.

1,626,391. VARIABLE AIR CONDENSER. ALLEN D. CARDWELL, Rockville Center, N. Y., assignor to The Allen D. Cardwell Manufacturing Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 26, 1922. Serial No. 590,576. 11 Claims. (Cl. 175—41.5.)

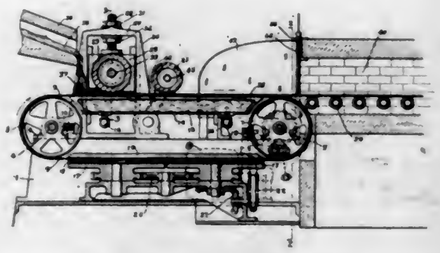


1. A variable air condenser comprising a conducting frame including spaced metal end plates, a rotor element journaled therein and comprising a series of spaced conducting plates, a stator element, conducting blocks electrically connected to and supporting the stator element, and insulating means extending in a direction across the plane of the stator element and secured to said end plates, said conducting blocks being secured to and supported by said insulating means.

1,626,392. PROCESS OF MAKING BENZANTHRONE. ROBERT G. CASWELL and ELLSWORTH G. MARSHALL, Wilmington, Del., assignors to E. I. du Pont du Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed July 31, 1920. Serial No. 400,492. 5 Claims. (Cl. 260—61.)

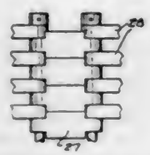
1. A process of producing benzanthrone which comprises treating anthraquinone dissolved in concentrated sulphuric acid with freshly precipitated copper at a temperature of about 38—42° C., until solution of the copper in the sulphuric acid is substantially complete, gradually adding glycerol and water, and then gradually raising the temperature of the solution to about 120° C. and maintaining it at about this point until the reaction is completed.

1,626,393. FRAME STRUCTURE. WILLIAM H. CATER, Chicago, Ill. Filed Mar. 10, 1924. Serial No. 697,990. 3 Claims. (Cl. 189—13.)



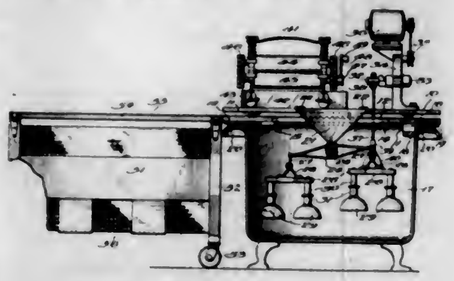
3. In the demountable framework of the character described comprising a plurality of superposed sections, the combination in each said section of corner-post units each of angle bar cross-section having internally a reversely-disposed smaller angle-bar with the margins of its flanges secured to the inner faces of the flanges of the main angle-bar of the corner-post unit, such smaller angle-bars of the post units of each section resting on the ends of the corresponding angle-bars of the next lower section, and means to hold said sections together in the relation specified.

1,626,394. INCUBATOR TRAY. FRANK E. COATSWORTH, Lincoln, Nebr. Filed June 29, 1926. Serial No. 119,380. 7 Claims. (Cl. 119—44.)



1. An egg tray, a median longitudinal strap secured to said egg tray on the under side thereof, a pair of reticulated bottoms for said egg tray, said bottoms being slidably secured to said median strap and on opposite sides thereof, means for preventing the eggs from falling from the ends of the bottom sections and means pivotally secured to said median strap for simultaneously moving said bottoms in opposite directions.

1,626,395. DRAWING SHEET GLASS. JOSEPH P. CROWLEY, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed July 14, 1922. Serial No. 574,883. 3 Claims. (Cl. 49—33.)

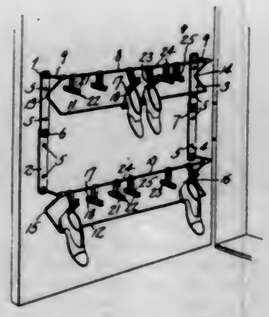


1. An apparatus for producing sheet glass, comprising an endless metal belt, supporting means for the belt including a stationary water-cooled table within the belt loop having a flat horizontal upper surface supporting the upper run of the belt, polishing means acting on the outer surface of the belt during its lower run, a metallic water-cooled roller having a polished surface adjustably mounted above the upper run of the belt, means constantly feeding a stream of molten glass upon the upper polished surface of the belt, and means for driving the belt to draw the glass from the stream under the roller and carry it away in sheet form.

1,626,396. SHEET-GLASS-DRAWING APPARATUS. JOHN L. DRAKE, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Aug. 2, 1926. Serial No. 126,602. 11 Claims. (Cl. 49—17.)

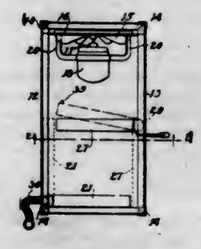
11. In sheet glass apparatus, a draw table including a plurality of links closely associated to provide a substantially solid surface and a plurality of spaced links arranged alternately with the closely associated links.

1,626,397. CLOTHES-WASHING APPARATUS. HUGH G. DUGAN, Hinsdale, Ill. Filed Oct 19, 1925. Serial No. 63,220. 3 Claims. (Cl. 68—19.)



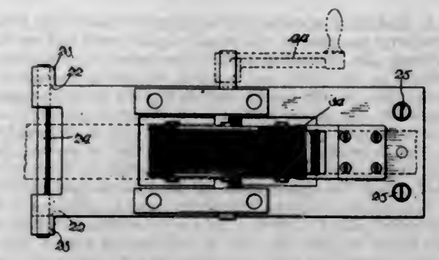
1. In a washing apparatus in combination with a tub, a removable trackway extending across the tub and supported upon the edges thereof, a platform provided with rollers adapted to run upon said trackway, a pair of hangers hingedly mounted on said platform and adapted to be turned down below the level of the platform, a pair of spaced dash boards, a walking beam mounting therefor removably pivoted between said hangers, dashers carried by said dash boards, a motor carried by the platform, and a detachable connection between the motor and one of said dash boards for actuating the dashers, substantially as described.

1,626,398. PROCESS OF MAKING POLYHYDROXY CARBON COMPOUNDS. HARRY ESSEX, Syracuse, N. Y., and ALGER L. WARD, Upper Darby, Pa., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Original application filed Nov. 22, 1919, Serial No. 340,073. Divided and this application filed May 25, 1926. Serial No. 111,635. 4 Claims. (Cl. 260—156.5.)



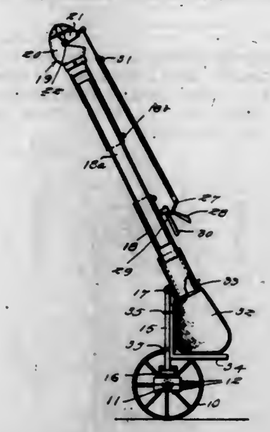
1. The process of producing a polyhydroxy carbon compound which comprises causing a carbon compound containing a pair of doubly linked carbon atoms and an oxygen-containing substituent to combine with hypohalous acid in the presence of an alkali-forming metal carbonate to form a halohydrin, and heating the reaction mixture containing an alkali-forming metal carbonate to hydrolyze the halohydrin.

1,626,399. RACK FOR BOOTS AND SHOES. CHARLES FISCHER, New York, N. Y. Filed Aug. 21, 1926. Serial No. 130,656. 7 Claims. (Cl. 211—14.)



1. A shoe rack comprising in combination, a pair of side bars, a projecting crossbar, a wire frame pivotally mounted upon said crossbar and provided with a back stop to limit its backward movement, said wire frame having a cross member adapted to engage the heel of a shoe, and a plurality of clips, swinging about said crossbar and each adapted to engage the top portion of the back of the shoe.

1,626,400. UNIT FOR HEATING AND VENTILATING SYSTEMS. JOHN M. FRANK, Chicago, Ill., assignor to Ilg Electric Ventilating Company, Chicago, Ill., a Corporation of Louisiana. Filed Dec. 22, 1923. Serial No. 682,163. 7 Claims. (Cl. 257—137.)

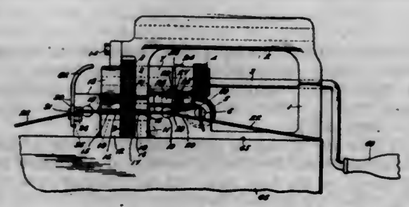


6. In a heating and ventilating unit, the combination of a substantially rectangular casing open at front and rear, a propeller fan mounted in the front end of said casing, steam and electric radiators pivotally mounted at one vertical edge thereof within and adjacent to the side walls of said casing, and means for swinging said radiators between positions crosswise of said casing and parallel with and adjacent to the side walls thereof.

1,626,401. PRINTING MACHINE. CHARLES T. FRANTZ, Los Angeles, Calif., assignor to Recording Thermometer Company, Los Angeles, Calif., a Corporation of Washington. Filed June 26, 1925. Serial No. 39,672. 12 Claims. (Cl. 33—37.)

1. In an apparatus for cutting and printing a sheet of material, printing means for operating upon said sheet; cutting means operating upon the portion of said sheet within opposed marginal edges to sever said marginal edges therefrom and define the sheet and means for coordinating said printing and cutting means to cause the same to operate synchronously in unvarying predetermined relation with respect to each other and to said sheet during operation thereupon.

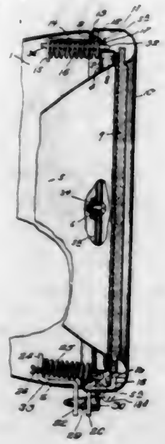
1,626,402. FRUIT PICKER. NANCY FRYMAN, Indianapolis, Ind. Filed Apr. 24, 1926. Serial No. 104,425. 3 Claims. (Cl. 56—334.)



1. A device of the class described comprising a tube, picker means carried thereby, a wheeled body, a post rotatably supported on said body and on which said tube is mounted, and means on said post to support a receptacle to catch fruit falling through the tube.

1,626,403. FRICTION LINING AND METHOD OF FORMING SAME. THOMAS L. GATKE, Oak Park, Ill. Filed Aug. 15, 1923. Serial No. 657,590. 11 Claims. (Cl. 188—259.)

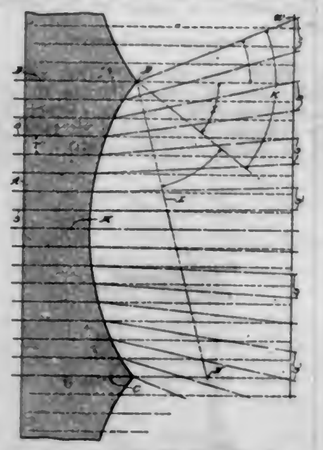
6. A strip of friction lining composed of a plurality of relatively non-flexible portions of a friction material connected by a plurality of flexible webs of wire mesh covered with the friction material.



1,626,404. WIRE-TWISTING MACHINE. ALEC J. GERRARD and PARVIN WRIGHT, Chicago, Ill.; said Wright assignor to said Gerrard. Filed Apr. 5, 1920. Serial No. 371,368. 32 Claims. (Cl. 140—119.)

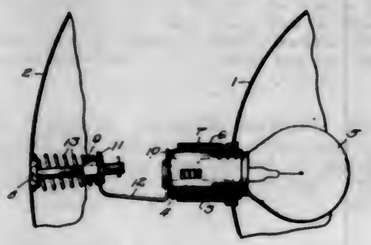
1. In a wire tying machine, the combination of a frame; an operating shaft; a wire tensioning means; a wire twisting means; and connections between said

shaft and said wire tensioning, and wire twisting means, whereby upon turning said shaft in one direction the wire will be tightened and by reversing the motion of said shaft the wire will be twisted, substantially as described.



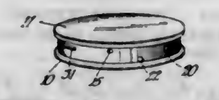
1,626,405. LAMP-DOOR FASTENING. CHARLES E. GODLEY, Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company, a Corporation of Michigan. Filed Apr. 12, 1926. Serial No. 101,368. 4 Claims. (Cl. 240—41.)

1. In a lamp, a forwardly open body having its mouth end contracted to afford a tubular part connected to the main portion of the lamp body by a radial flange, the body also having a shelf extending radially inward from the forward end of the said tubular part; a door having a rim portion contracted at its rear end to afford a rear end part sleeved upon the said tubular body part and engaging the said radial flange, the said tubular part having an aperture adjacent to the contracted rear end rim portion of the door; a latching member comprising a latching finger extending through the said aperture substantially radially of the lamp in front of the said rear end rim portion, a shank extending rearwardly from the inner end of the latching finger, and a thrust arm extending radially of the lamp body from the rear end of the said shank; a compression spring interposed between the said shelf and the thrust arm of the latching member for continuously urging the latching member rearwardly so as to cause the latching finger to draw the said rear end rim portion of the door against the said radial flange; and retaining means interposed between the latching member and the shelf for retaining the latching member in its said disposition.



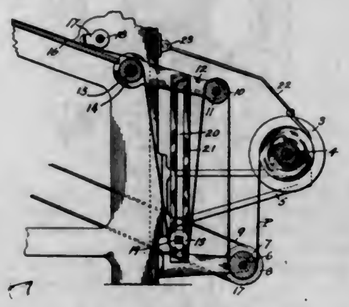
1,626,406. FLUTED LAMP LENS. CHARLES E. GODLEY, Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company, a Corporation of Michigan. Filed May 6, 1926. Serial No. 107,096. 3 Claims. (Cl. 240—48.4.)

1. A lens for spreading light laterally within a limiting angle from the direction of parallel rays directed perpendicularly to the lens from the rear thereof; the lens having a face thereof provided with vertical grooves, the transverse section of each groove being a portion of an ellipse which has its major axis parallel to the rear lens face and its foci along the lines on which the said rays respectively reach the opposite edges of the groove, the ellipse being of such a curvature that the angle between the direction on which the ray reaching each groove section end along one of the said lines and the bisector of the angle between straight lines connecting the said end



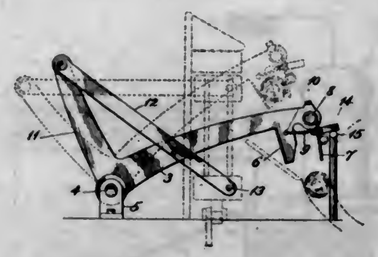
with the foci of the ellipse is equal to one half of the last named angle multiplied by the refractive index of the glass of which the lens is made.

1,626,407. FOCUSING DEVICE. CHARLES E. GODLEY, Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company, a Corporation of Michigan. Filed June 17, 1926. Serial No. 116,691. 3 Claims. (Cl. 240—44.)



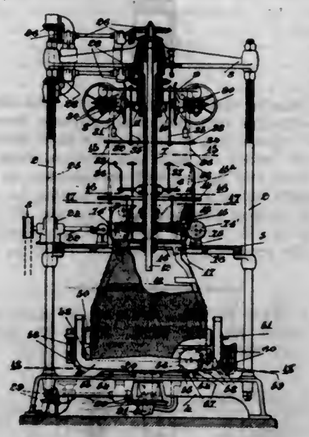
1. In a lamp, a casing having a perforation in its back, a reflector mounted in the casing, a guide tube fast on the reflector and extending toward the back, a lamp-socket slidable in the guide tube, a screw extending through the perforation in the casing and having its head engaging the outer face of the said back; a thrust member having a forward part secured to the socket, a rear part threaded on the screw, and an intermediate portion connecting the said forward and rear parts and adapted to bend more easily than the connections of the intermediate portion to the said forward and rear parts; means associated with the socket and the guide tube for preventing rotation of the socket in the tube, and a compression spring interposed between the rear end of the thrust member and the back of the casing; the thrust member being resilient to permit a flexing of the same for adjusting to differences of direction between the axes of the screw and the socket, and being substantially rigid axially of the socket; the disposition of the said casing back perforation with respect to the axis of the socket and the shape in which the thrust member is formed being such that the assembling of the aforesaid elements distorts the shape of the thrust member and produces a strain in the thrust member to tilt the axis of the socket forwardly, upward and into firm engagement with the upper part of the forward end of the bore of the guide tube.

1,626,408. SAVINGS BANK. HARRY S. GOODMAN, Chicago, Ill. Filed July 17, 1925. Serial No. 44,234. 6 Claims. (Cl. 232—4.)



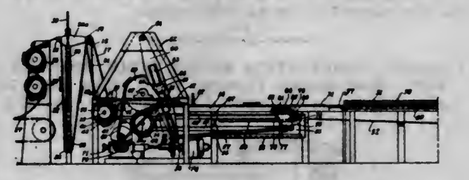
1. A savings bank having two separable sections, one of which constitutes a base and shell section, and the other of which constitutes a cap section, said cap section having inwardly extending portions, and interacting cut metal edges provided upon said portions and the shell portion of said first aforesaid section intermediate the ends thereof, said edges being adapted, when said sections are juxtaposed and relatively rotated, to interengage to prevent longitudinal separation of said sections.

1,626,409. PAPER-FEED MECHANISM. GEORGE W. GWINN, Hewlett, N. Y., assignor to American Machine & Foundry Company, a Corporation of New Jersey. Filed Dec. 8, 1925. Serial No. 74,077. 5 Claims. (Cl. 271—2.3.)



1. In a mechanism for feeding waxed paper, the combination with a reel for supporting a strip of said paper, of a brake for said reel, a pulley for continuously pulling said strip from said reel, and means beyond said pulley and coacting with said brake to produce the required tension on said strip to cause it to be frictionally driven by said pulley without marring the waxed surface of the paper.

1,626,410. TRANSFERRING DEVICE FOR CIGAR MACHINES. JOHN FREDRIK HALSTEAD, Brooklyn, N. Y., assignor to International Cigar Machinery Company, a Corporation of New Jersey. Filed Nov. 13, 1925. Serial No. 68,871. 4 Claims. (Cl. 131—39.)



1. A bunch transferring device for cigar machines comprising an arm, a bunch holder supported by the free end of said arm, and adapted to receive a bunch from above and discharge it below and having a fixed wall and a co-acting spring-held movable wall, means for swinging said arm from bunch receiving position downwardly to bunch discharging position, and means in the path of said holder for opening said holder at the lower end of its movement.

1,626,411. LOOM FOR WEAVING. JOANNY BARTHELEMY JABOULEY, Lyon, France, assignor to Jabouley & Co., (Firm) Lyon, France. Filed Feb. 21, 1925, Serial No. 10,911, and in France Feb. 25, 1924. 4 Claims. (Cl. 139—13.)

1. In a circular loom, means for supporting a rotary cylindrical series of warps, one or more shuttles, a table supporting the shuttles, means to form a shed for each shuttle, means for opening and closing the shed continuously in timed relation with the shuttle, and rotating elements journalled outside the outer shed and reaching through it into engagement with said shuttles, said elements having grooves to receive individual warps.

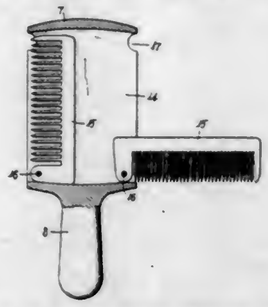
1,626,412. TUBE-MAKING METHOD AND APPARATUS. JAMES V. JAMES, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Apr. 21, 1925. Serial No. 24,778. 10 Claims. (Cl. 154—5.)

1. The method of manipulating tacky sheet material in strip form which comprises feeding a continuous strip thereof onto a support while moving said support at substantially equal speed with the feeding movement of the material, severing from said continuous strip a length thereof lying upon said support, stepping forward the severed length to space it determinately from the rest of the strip by movement of said support, and so repeating the said operations as to deposit successive lengths of said material in determinate space-apart relation on said support.

7. Tube-making apparatus comprising a conveyor belt adapted to feed a continuous strip of material longitudinally from its delivery end, means for driving said belt in determinate, intermittent movement, a second conveyor belt adapted to receive the strip material from the

first belt, and means for driving the second belt in intermittent movements of the same speed as those of the first belt but each so timed as to start before and continue concurrently with a movement of the first belt.

1,626,413. VANITY-CASE-COMPACT HOLDER AND CATCH. WILLIAM G. KENDALL, Newark, N. J. Filed June 22, 1926. Serial No. 117,809. 3 Claims. (Cl. 132—83.)



1. In a vanity case having a body formed with a substantially annular wall having an aperture therein and a lid having a projection, a catch and a substantially circular compact holder for said case stamped from a single piece of metal and formed with corrugations on diametrically opposite sides, a pressed out portion at one point adapted to project through said aperture so as to act as a press button, and an apertured extension arranged adjacent the pressed out portion for receiving said projection.

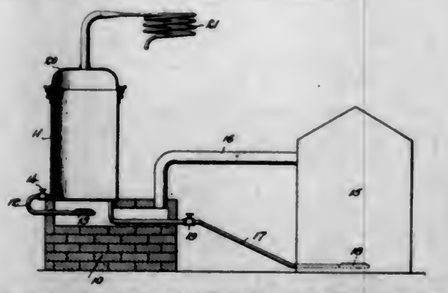
1,626,414. END GATE. SPENCER E. KLUCAS, Barry, Minn. Filed July 28, 1926. Serial No. 125,437. 1 Claim. (Cl. 296—55.)

A wagon end gate of the character described, comprising a pair of sections hingedly secured in end opposed relation, a reinforcing frame comprising a pair of members arranged in spaced relation longitudinally of the gate and a connecting member connecting the members together at one end of the frame, the other ends of the members being secured to a gate section, a latch carried by the other gate section adjacent the free end thereof and adapted to engage over said connecting member to lock the gate in operative position, and an actuating handle forming a part of said latch, said handle being designed to be sprung outwardly to pass over and frictionally engage one of said pair of members, to hold the latch against accidental displacement.

1,626,415. COMBINATION BRUSH, COMB, AND MIRROR. MIKE KOSKE, Proberta, Calif. Filed June 7, 1926. Serial No. 114,338. 2 Claims. (Cl. 132—87.)

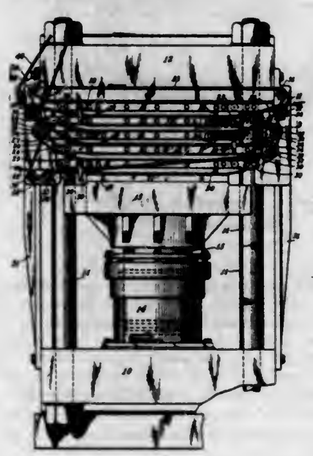
1. A device of the character described comprising a comb having a back with a handle and bristles, said back having a slot extending from one edge thereof to the opposite edge, and a pair of combs movable into and out of said slot at the opposite edges of the back and pivoted to said back adjacent to the handle.

1,626,416. CHAIN. WILHELM KUEHNER, Providence, R. I. Filed June 18, 1926. Serial No. 116,869. 5 Claims. (Cl. 59—80.)



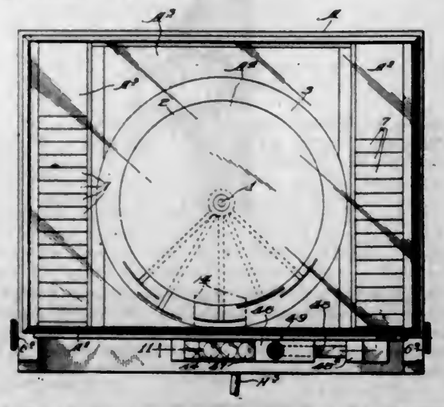
1. In combination with a continuous flexible support, a series of boxes threaded over the support, said boxes having compressed parts which latter frictionally engage the support so as to hold the boxes against movement in both directions lengthwise of the support.

1,626,417. RUBBER BOOT. LESLIE H. L'HOLLIER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Apr. 21, 1925. Serial No. 24,763. 5 Claims. (Cl. 36—4.)



1. A rubber boot of the wading type having a strap attached thereto and provided with means for supporting the leg of the boot at full length by attachment to the clothing of the wearer at a point above the top of the boot, and means for binding the strap about the boot when in cuffed or drawn-down position.

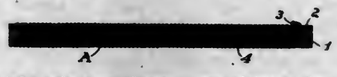
1,626,418. PROCESS AND APPARATUS FOR MANUFACTURING AMORPHOUS CARBON, ETC. JOEL W. MACDONALD, Little Rock, Ark., assignor to Winfred L. Rucker, Los Angeles, Calif. Filed Dec. 14, 1925. Serial No. 75,320. 4 Claims. (Cl. 134—60.)



1. Apparatus for manufacturing amorphous carbon, lamp black or carbon black from ozokerite, paraffin, distillates and similar substances, comprising a melting pot, means for heating said pot, an enclosed housing, a valved pipe having one end connected with the interior of the pot and its other end extending into the said housing, and a burner on the last named end of said pipe.

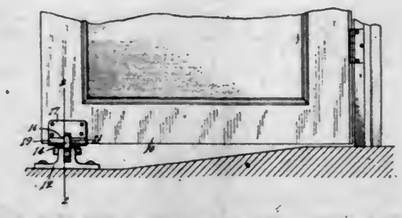
1,626,419. STRIP-VULCANIZING APPARATUS AND METHOD. TOD J. MELL, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Mar. 24, 1925. Serial No. 17,930. 6 Claims. (Cl. 18—17.)

1. The method of vulcanizing strip material which comprises looping the material back and forth to bring zones thereof into close proximity, simultaneously vulcanizing said zones without vulcanizing intermediate zones, and then vulcanizing said intermediate zones while holding them in close proximity.



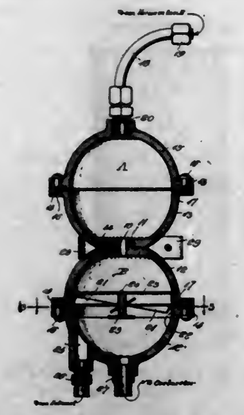
1,626,420. TOY RACE COURSE. MORTIMER B. MILLS, Chicago, Ill. Filed Apr. 14, 1926. Serial No. 101,935. 83 Claims. (Cl. 273—86.)

1. In a toy race course, the combination of a plurality of concentric tubular shafts journaled one within another, racers actuated through the medium thereof, and spring-actuated means for actuating said shafts.



5. In a toy race course, the combination of a series of racers, spring-actuated racer-spinning devices, and a permutation stop device controlling the stopping of the racers at the conclusion of the race.

1,626,421. VARIABLE HIGH-RESISTANCE ELEMENT AND METHOD OF MAKING THE SAME. LESLIE F. MUTER, Chicago, Ill. Filed Apr. 3, 1926. Serial No. 99,519. 6 Claims. (Cl. 201—48.)



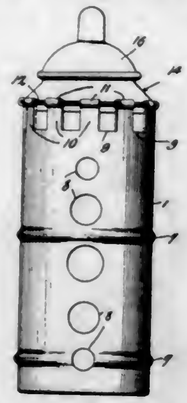
6. A high resistance element comprising a flexible fiber core, a plurality of strips impregnated with carbon to form a high resistance, the said resistance strips lying adjacent one surface of said core, the combined ohmage of said strips giving the desired ohmage and the cross section of said strips providing a relatively high current carrying capacity, a wire spirally wound about the said core and said resistance strips for tightly holding the said resistance strips to each other and to said core, the wire embedded in the outer surface and upper and lower edges of said core, the turns of said wire being slightly spaced from each other, and a portion of each turn being removed.

1,626,422. LATCH. CHARLES A. MUTISPAUGH, Plant City, Fla. Filed May 19, 1925. Serial No. 31,361. 1 Claim. (Cl. 292—216.)

A device for the purpose indicated comprising, in combination with a swinging door, a swinging member having a pivotal point below the lower edge of the door, and a forward nose and adjacent throat and a tail plate for terminal abutting engagement with the rear face of the door, and a plate mounted on the forward face of the door and of a cross sectional contour corresponding with said throat and engaging the latter in the closed position of the door.

1,626,423. GAS MIXER. SIDNEY OSTROFF, Lowell, Mass. Filed July 8, 1925. Serial No. 42,202. 2 Claims. (Cl. 48—180.)

1. A fuel volatilizer comprising a primary chamber constructed substantially as a sphere with polar conduits communicating therewith, one of which is adapted for

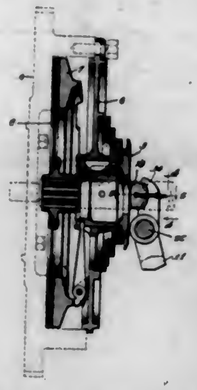


connection to a carbureter, a mechanical agitator within said chamber moving upon an axis coinciding with the pole of the sphere, an inlet conduit for heated gases communicating with the chamber at a tangent and at an inclination to the equatorial plane, a second chamber communicating with the first mentioned chamber through one of the polar conduits, and means to introduce liquid fuel into the last mentioned chamber.

1,626,424. PROPELLER. WIN WITHERS PAGET, Virginia City, Nev. Filed May 11, 1926. Serial No. 108,332. 4 Claims. (Cl. 170—172.)

1. In a propeller, radially related blades each having therein a longitudinal duct and lateral passageways leading from the leading to the trailing edge of each blade and ducts leading from the longitudinal duct of each blade to the corresponding lateral passageways, said lateral passageways being open to the atmosphere.

1,626,425. NURSING-BOTTLE PROTECTOR. TERESA GREEN PELSUE, Wentworth, Mo. Filed Nov. 10, 1925. Serial No. 68,132. 1 Claim. (Cl. 215—11.)

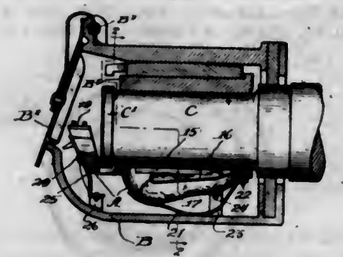


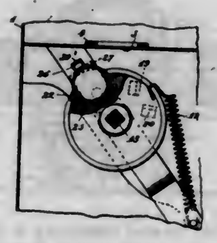
In a device of the class described, a casing, a packing in the bottom of the casing and having an upstanding flange, a nursing bottle comprising a body resting on the packing and within the flange, to space the body from the casing, a nipple on the body and outstanding beyond the sides of the body, the casing being provided at its upper end with spaced tongues, which are yieldable, and means for drawing the tongues inwardly, into contact with the nipple, the nipple and the tongues constituting means for spacing the upper portion of the body from the upper portion of the casing.

1,626,426. BOOT OR SHOE. JOHN B. PIOTROWSKI, Chippewa Falls, Wis. Filed Feb. 18, 1926. Serial No. 89,123. 2 Claims. (Cl. 36—77.)

1. A shoe of the class described comprising a toe box composed of resilient material of sufficient rigidity to withstand substantial impacts and extending across the top of the shoe above the region of the toes at the toe portion of the shoe in substantially spaced relation to the foot opening thereof so as to leave an intermediate free flexing zone for the toes, said box having a rearward extension toward the shank covering the top and sides of the toes at the outside of the foot.

1,626,427. FRICTION CLUTCH. HAROLD V. REED, Chicago, Ill., assignor to The Borg & Beck Company, Chicago, Ill., a Corporation of Illinois. Filed May 15, 1926. Serial No. 109,224. 6 Claims. (Cl. 192—110.)





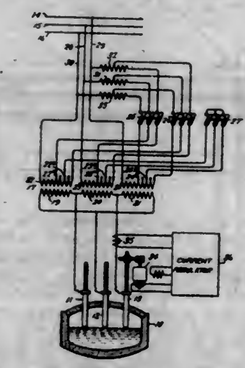
1. In a friction clutch, the combination of a release sleeve, a release yoke having a finger, and a bearing mounted on said finger to engage said sleeve, said bearing being resiliently held in position and automatically adjustable relative to the finger.

1,626,428. LUBRICATOR FOR RAILWAY JOURNAL BOXES. CHARLES B. ROYAL, Chicago, Ill. Filed Aug. 21, 1926. Serial No. 130,618. 13 Claims. (Cl. 308—88.)

1. In a lubricator for railway journal boxes, an oil reservoir adapted to pass into and out of a journal box with the journal in place therein, an oil transmitting pad adapted to contact the underside of the journal and secured to said reservoir so as to close the top of the same, a spring means for yieldably pressing said reservoir upwardly, and yieldable means within the reservoir for pressing said pad into contact with the underside of the journal.

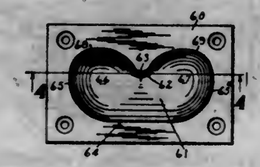
1,626,429. VENDING MACHINE. FREDERICK RUOFF, Irvington, N. J., assignor to H. N. Smith, New York, N. Y. Filed May 20, 1926. Serial No. 110,499. 2 Claims. (Cl. 194—63.)

1. In a vending machine a coin control mechanism including a stationary bar, a sliding catch formed with a projection extending through said bar, a pair of rotatable disks, one disk having a coin guiding flange, the second mentioned disk having a coin receiving notch, means for supporting the coin in said notch so that it will project beyond the disk, the first mentioned disk having an abutment adapted to strike the sliding catch when the disk is rotated, said notch being so positioned that when a coin of the proper size is positioned therein the coin will act as a cam for moving said catch out of the way of said abutment and permit the disk to rotate, manually actuated means for moving the disks in one direction, and spring means for moving the disks in the opposite direction.



1,626,430. ELLIPSOGRAPH. ALLEN CAMPELL SANDERS, Erie, Pa. Filed May 25, 1925. Serial No. 32,679. 9 Claims. (Cl. 33—30.)

2. An instrument of the character described comprising a non-revoluble pivot leg, a drawing leg having a scriber, means carrying the drawing leg and being revoluble in a plane at right angles to the axis of the pivot leg thereby to describe a circle, and means pivoted on said pivot leg and associated with said revoluble means for rocking said



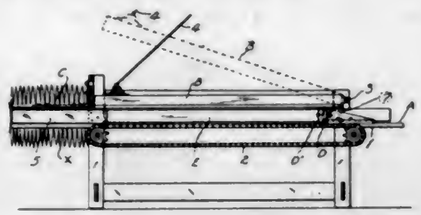
revoluble means in respect to said right angular plane thereby distorting the motion of the drawing leg about the pivot leg to describe an ellipse.

1,626,431. ELECTRIC FURNACE. JOHN A. SEEDE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 24, 1925. Serial No. 77,587. 7 Claims. (Cl. 204—64.)

1. The method of melting and refining metals in an electrode furnace which consists in regulating the positions of the electrodes to maintain predetermined currents of different values while applying a high voltage during the initial stage of the melting down period, an intermediate lower voltage to complete the melting down period, and a low voltage for the refining period.

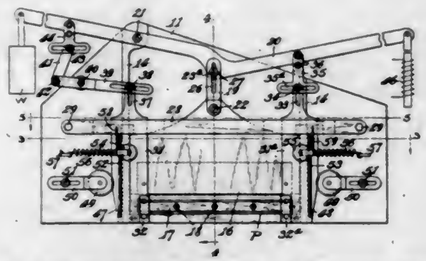
1,626,432. STRIKE PLATE. JOHN H. SHAW, New Haven, Conn., assignor to Sargent & Company, New Haven, Conn. Original application filed Aug. 29, 1923, Serial No. 659,956. Divided and this application filed Apr. 8, 1926. Serial No. 100,543. 6 Claims. (Cl. 292—340.)

1. A strike plate having a strike opening therein constituted by an upwardly facing recess, said recess having



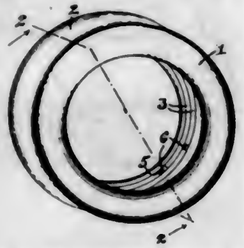
a closed periphery whereby it is entirely surrounded by a part of the body of the plate, and an abutment projecting into the said recess from one edge thereof, the latter extending on three sides of the abutment.

1,626,433. HEADBAND. RAYMOND K. SINER, Philadelphia, Pa., assignor to North American Lace Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 8, 1925. Serial No. 35,627. 1 Claim. (Cl. 132—46.)



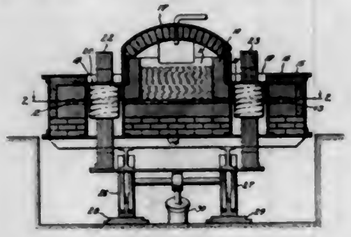
As a new article of manufacture, a head band made of elastic fabric, having a V-shaped incision at each end, the two edges opening at the incision being stitched together so as to form a single ply; a fastening device at each end of the band for securing the ends together when said band is used.

1,626,434. MATTRESS-FILLING MACHINE. HUBERT C. SMITH, St. Louis, Mo. Filed Nov. 27, 1925. Serial No. 71,689. 2 Claims. (Cl. 226—45.)



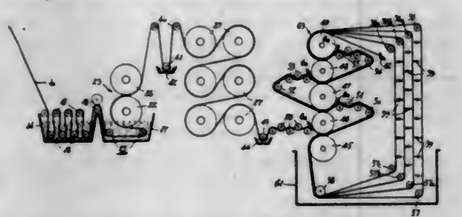
1. A mattress filling machine, comprising a bed adapted to receive material which is to be used to fill a mattress tick, means for compressing or compacting said material, a discharge spout that is adapted to be inserted in the open end of said tick, a means for introducing the material into said tick, a removable dividing bar adapted to be arranged on said bed so as to divide the bed into two zones, and spout members on said dividing bar arranged in spaced relation and adapted to be positioned in said spout so as to divide the interior of same into two portions.

1,626,435. SCRAPER FOR ROLLED PLATES. DANIEL T. SPRING and SAMUEL E. SPRING, Wheeling, W. Va., assignors of two-thirds to Henry D. Scott, Wheeling, W. Va. Filed Aug. 10, 1926. Serial No. 128,498. 10 Claims. (Cl. 29—81.)



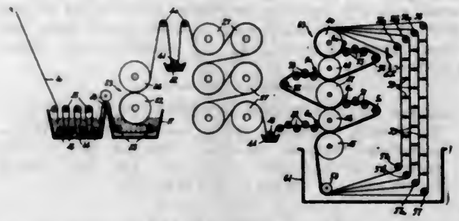
5. A scraper apparatus comprising a supporting plate, a scraper, guides for said scraper, an actuating lever pivotally connected to said plate, and connections between said guides and said lever on opposite sides of said pivotal connection of the lever of the plate, said connections comprising means whereby movement of said actuating lever will actuate movement of both of said guides in the same direction.

1,626,436. ASBESTOS CROWN-TYPE PACKING. ELMER E. SWITZER, Beaumont, Tex. Filed Jan. 26, 1926. Serial No. 83,910. 3 Claims. (Cl. 288—1.)



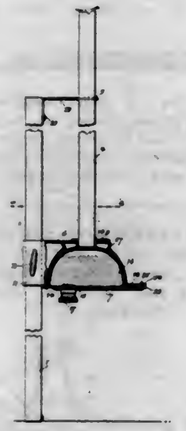
1. In a device of the class described, the combination of a circular asbestos body, rings embedded in said body and having their inner faces contacting throughout their length, each ring comprising segments curved throughout their length, and portions of said asbestos body between the contiguous ends of the segments in each ring.

1,626,437. INDUCTION FURNACE. MAGNUS UNGER, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Dec. 31, 1925. Serial No. 78,668. 7 Claims. (Cl. 204—64.)



1. An induction furnace comprising a crucible forming a reservoir for the charge and a looped channel communicating therewith at its periphery, and a primary winding for inducing heating currents in a liquid charge in said channel, said channel having a greater cross-sectional dimension in a direction at right angles to its axis to provide for increased circulation of the charge by electromagnetic repulsion.

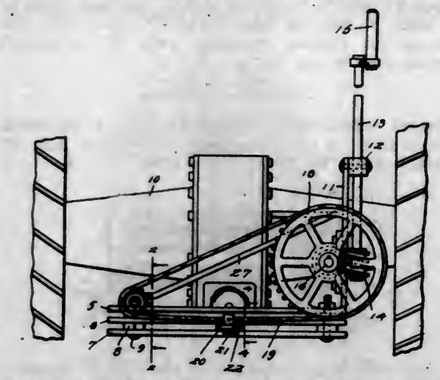
1,626,438. METHOD OF TREATING TEXTILES. FREDERICK BENEDICT VOEGELI, Easton, Pa. Filed June 11, 1925. Serial No. 36,558. 12 Claims. (Cl. 8—20.)



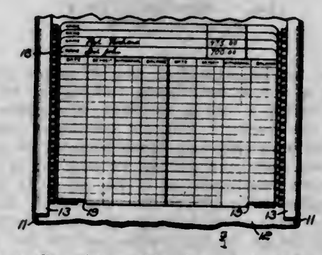
1. The steps in the method of mercerizing textile goods comprising subjecting the goods to hot caustic and cold caustic baths in succession and cooling the goods.

1,626,439. APPARATUS FOR TREATING TEXTILES. FREDERICK B. VOEGELI, Easton, Pa. Original application filed June 11, 1925, Serial No. 36,558. Divided and this application filed Aug. 19, 1925. Serial No. 51,140. 7 Claims. (Cl. 8—20.)

1. An apparatus for treating textile goods including a mangle, stretchers arranged for stretching the goods prior to passing through the mangle, and means for guiding the goods back after leaving the mangle for return through the mangle and stretchers in a plurality of layers.



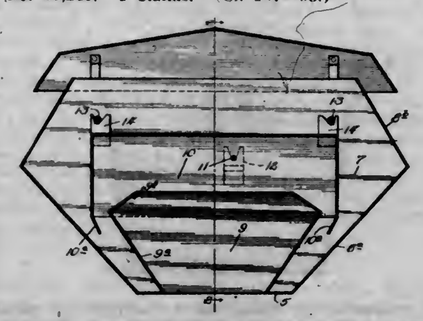
1,626,440. MARKING DEVICE. RUDOLF WASSERMAN, New York, N. Y. Filed June 18, 1926. Serial No. 116,921. 7 Claims. (Cl. 33—9.)



1. A marking device, including a scale bar, a receptacle adjustably secured on the scale bar and adapted to contain powder, said receptacle having an outlet therefrom, an inverted resilient cup in the receptacle and means for compressing the cup to discharge the powder.

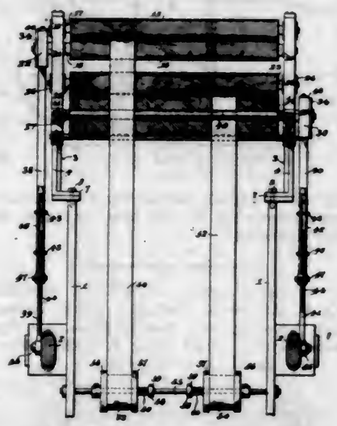
1,626,441. TRACTOR HITCH. JOHN C. WENNER, Carrollton, Ohio. Filed Aug. 6, 1925. Serial No. 48,614. 1 Claim. (Cl. 280—33.5.)

In a tractor hitch, a plurality of guiding plates in superimposed relation, one of said plates having an upwardly projecting portion forming a standard, a shaft rotatably mounted vertically of the said standard, a worm on said shaft, a shaft rotatably mounted approximately horizontally on said standard, a worm wheel thereon meshing with the aforesaid worm, a sprocket wheel on the said shaft, a draw-bar adapted to be pivotally connected to a tractor and being guided near its outer end with relation to the plates, a block secured to the draw-bar, a chain operating over the aforesaid sprocket wheel connected to the said block, a sprocket sheave, a member on which the said sheave is rotatably mounted, a base carrying said member anchored on one of the aforesaid plates, the said sheave constituting a guide and engaging member for the sprocket chain, and a brace connected to the base and the standard and suitably anchored.



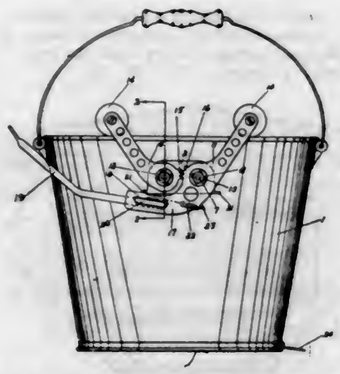
1,626,442. FILING AND INDEXING EQUIPMENT. CHARLES E. ATTWOOD, Wollaston, Mass., assignor to Postindex Company, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Dec. 3, 1925. Serial No. 72,947. 26 Claims. (Cl. 129—16.)

20. In a file, the combination of a series of sheets having overlapping margins, a series of supporting bars associated with said sheets, respectively, a series of signals also supported by said bars, respectively, and a mounting for said bars.



1,626,443. SEAL. HAROLD V. ATWELL, Whiting, Ind., assignor to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Filed Nov. 2, 1925. Serial No. 66,245. 4 Claims. (Cl. 137—53.)

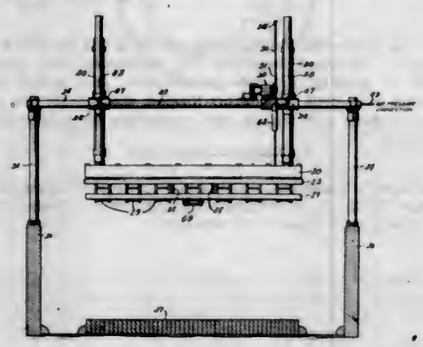
1. A seal comprising an open conduit member having outwardly diverging walls, a pan surrounding said conduit member and provided also with outwardly diverging



walls, an inverted cup over said conduit member, said cup having its center of area offset from its center of gravity, means for pivotally supporting said cup in alignment with its center of gravity, the lower ends of the walls of said cup being adapted to enter the space between the adjacent diverging walls of the conduit member and the pan.

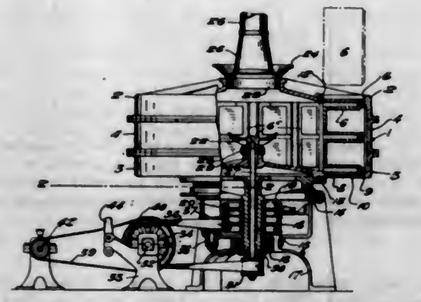
1,626,444. ATTACHMENT FOR PRINTING PRESSES. WALTER D. BARNES, Lancaster, Pa. Filed Aug. 13, 1926. Serial No. 129,052. 9 Claims. (Cl. 41—7.)

1. A leaf feeding mechanism for use in hot stamping comprising a pair of superposed feed rollers for intermittently feeding a leaf in the form of a ribbon for a portion of its length, a sectional lengthwise adjustable reciprocatory rack bar, and means mounted on one end of said lower roller and engaged by said bar to provide for the intermittent operation of the rollers to feed the leaf, the adjustability of said bar controlling the duration of the drive of said means thereby providing for varying the length of that portion of the leaf fed by the rollers.



1,626,445. MOP WRINGER. WALTER F. BAZEWICK, Binghamton, N. Y. Filed Aug. 3, 1926. Serial No. 126,875. 5 Claims. (Cl. 15—262.)

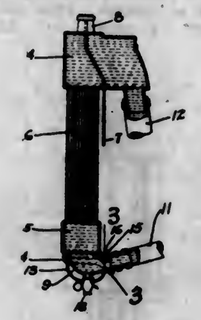
1. A mop wringer comprising in combination a vessel, supporting brackets secured thereto, jaws pivoted on said brackets and carrying rollers at their upper ends, means for rocking said jaws on their pivots for bringing said rollers together, comprising an operating member resiliently and removably engaged with said jaws.



2. A mop wringer comprising in combination a vessel, supporting brackets secured thereto, bearings on said brackets, the inner faces of said brackets and said bearings being curved to conform to the shape of said vessel and both engaging therewith, jaws pivoted on said bearings and carrying rollers at their upper ends, and means engaging said jaws for bringing said rollers together.

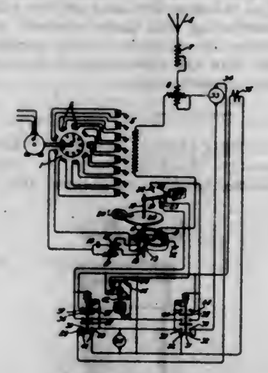
1,626,446. MACHINE FOR SETTING TENPINS. JOSEPH W. BISHOP, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 18, 1925. Serial No. 16,332. 35 Claims. (Cl. 273—42.)

1. A bowling alley pin setter comprising a vertically movable receiving frame having an upper and a lower deck spaced apart, and a setting frame intermediate of said decks and movable vertically conjointly with and independently of said receiving frame.



1,626,447. CONCRETE-BLOCK MOLDING AND SETTING MACHINE AND METHOD OF MOLDING. EDWIN FULTON BRAMIN, Balboa Heights, Canal Zone, Panama. Filed Mar. 25, 1926. Serial No. 97,389. 34 Claims. (Cl. 25—41.)

1. The method of molding and setting concrete blocks which comprises revolving a mold for such blocks and concurrently projecting concrete in a path which moves back and forth across the cavity of the mold to charge it with concrete.



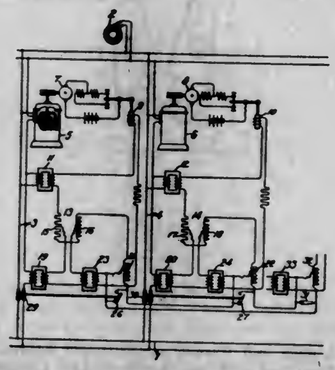
1,626,448. ATTACHMENT FOR GAS-ENGINE COOLING SYSTEMS. EMIL M. BREMER, Glenville, Minn. Filed Jan. 21, 1925. Serial No. 3,819. 3 Claims. (Cl. 137—72.)

1. In combination with a radiator, including an overflow pipe and outlet connection, a bulging, flexible pendant jacket surrounding and detachably secured along its upper periphery only to the connection and forming a

steam chamber therebeneath, said jacket having a flexible conduit connected with the overflow pipe, and having a discharge opening at its lowermost point.

1,626,449. AUTOMATIC ANTENNA REGULATION. WILLIAM W. BROWN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 29, 1925. Serial No. 78,201. 12 Claims. (Cl. 250—17.)

1. In combination, an antenna, means including a relay for maintaining the tuning of the antenna substantially constant, said relay including a field winding and an armature cooperating therewith, said armature having a plurality of windings, means for supply currents having a substantially constant frequency, but differing in phase, to said armature windings, and means for supplying to said field winding a current having a phase relation to the other currents which varies with variations in the capacity of the antenna.

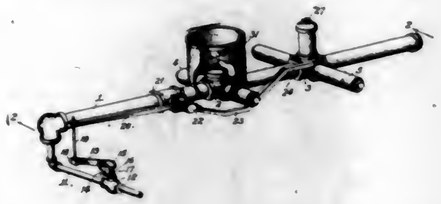


1,626,450. BURIAL GARMENT. JOHN W. CANNON, Birmingham, Ala. Filed Sept. 15, 1925. Serial No. 56,502. 2 Claims. (Cl. 2—64.)

1. In a burial garment, a coat element formed of two sections, each consisting of a half collar having an inner and an outer fold, a front formed with a lapel providing a continuation of the outer fold of the half collar, a back, a sleeve and a shoulder, said front, shoulder and back forming continuations of the inner fold of the half collar, flexible means secured to one face and extending from the free end of the half collar for connecting one section to the other, a fastener element secured to the inner face of the inner fold of the half collar near the free end of such fold for securing a section against the rear face of the back of the collar of a vest, and a fastener member arranged on the inner face of the front in

proximity to the point of mergence of the inner fold of the half collar with the front for securing the latter to one side of the upper portion of the front of the vest.

1,626,451. SYSTEM OF ELECTRIC DISTRIBUTION. FRANKLIN J. CHAMPLIN, Dalton, Mass., assignor to General Electric Company, a Corporation of New York. Filed July 6, 1925. Serial No. 41,595. 6 Claims. (Cl. 171—119.)



1. In a system of electric distribution, a source of alternating current, a distribution circuit, a plurality of parallel feeders connecting said source to said distribution circuit, voltage modifying means associated with each feeder for controlling the voltage impressed on said distribution circuit, a voltage responsive device associated with each feeder for controlling the associated voltage modifying means, a circuit for each voltage responsive device, transforming means associated with each feeder, each transforming means having a primary winding connected so that the current therein varies with the current in the associated feeder, and an impedance connected directly across a secondary winding of each of said transforming means and connected in the circuit of the associated voltage responsive device, said secondary windings of said transformers being connected together for circulating currents.

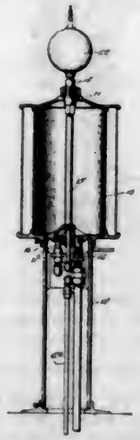
1,626,452. CAN STEAMER. JOSEPH COOK, Chicago, Ill., assignor to Blue Valley Creamery Company, Chicago, Ill., a Corporation of Delaware. Filed Sept. 24, 1925. Serial No. 58,464. 3 Claims. (Cl. 141—7.)

1. Can steaming means comprising a pipe for removable support upon a receptacle, said pipe being provided with an upwardly directed nozzle and a lateral pipe com-

municating with the first-named pipe to form a support for a receptacle, a pipe extending into the first-named pipe and connected with a source of steam, and a system

of pivoted connected levers connecting said valve and actuated by the weight of said last named receptacle for opening and closing said valve.

1,626,453. PIPE WRENCH. FLOYD COX, Sheridan, Wyo., assignor of one-fifth to Earnest W. Swan, Sheridan, Wyo. Filed July 12, 1926. Serial No. 121,989. 2 Claims. (Cl. 81—179.)

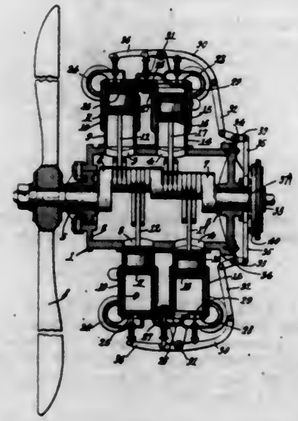


1. An open end wrench comprising a handle provided at its front end with two flat forwardly projecting arms having straight forwardly diverging inner edges, one of said arms having a slot parallel with said inner edge thereof, two substantially duplicate toothed jaws contacting with said inner edges of said arms and each having parallel side flanges contacting with opposite sides of said arms, a fastener passing through the side flanges of one jaw and through the slot of said one arm to slidably connect said one arm and jaw, another fastener passing through the side flanges of the other jaw and through the intervening arm to secure them together, and a coiled compression spring confined in said slot by the flanges of said one jaw, said spring engaging the rear end of the slot and the first named fastener to normally move said one jaw forwardly to its extreme position.

1,626,454. MANUFACTURE OF ARTIFICIAL SILK AND THE LIKE FROM VISCOSE SOLUTIONS. WILLIAM PORTER DREAPER, London, England. Filed Apr. 18, 1925, Serial No. 24,268, and in Great Britain May 2, 1924. 4 Claims. (Cl. 18—54.)

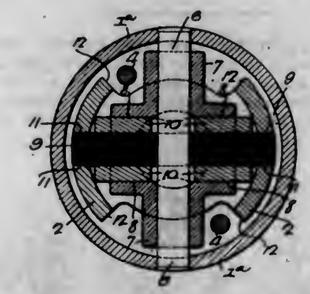
1. In the manufacture of finer denier artificial filaments from viscose solutions, the extrusion of the solution from the spinning jet into an acid-salt precipitating bath containing not less than four per cent and not more than ten per cent of a zinc salt and substantially twenty-one per cent of sodium sulphate.

1,626,455. SUCTION-OPERATED LIQUID-DISPLACING APPARATUS. HERMAN J. ENGBRECHT, Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Filed May 11, 1925. Serial No. 29,477. 9 Claims. (Cl. 221—80.)



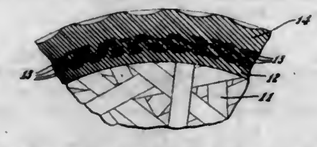
1. In a liquid displacing apparatus, the combination of a receptacle for receiving the liquid, means for producing flow of liquid to the receptacle and involving in its operation the exhausting of fluid under pressure, a fluid-pressure-driven motor associated with said receptacle and in communication with the exhausting fluid, and a display device actuated by said motor.

1,626,456. LUBRICATING SYSTEM. ERNEST HAYWARD FAIRBANKS, Merchantville, N. J. Filed Jan. 31, 1927. Serial No. 164,994. 15 Claims. (Cl. 221—47.4.)



1. In a lubricating system, the combination of means for supplying lubricant under pressure having a discharge outlet, a coupling connected with said discharge outlet, a valve seat in said coupling, having a throat leading therefrom, an automatic downwardly seating valve also in said coupling, a horizontally disposed sealing chamber wider than said throat and positioned below said valve, a horizontally disposed sealing member in said chamber having a central port therethrough, and an expansion chamber closed at its outer periphery and open to pressure from said lubricant supplying means from within said coupling, and a stem depending from said valve in alignment with the port in said sealing member and having its lower end positioned in said port, and disconnected from said sealing disk, whereby the latter is prevented from dislodgement.

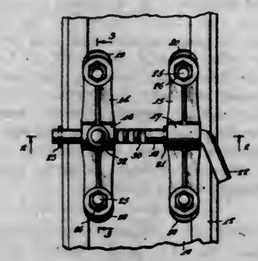
1,626,457. ENGINE. NEWTON F. FONER, Pittsburgh, Pa. Filed Aug. 20, 1925. Serial No. 51,419. 8 Claims. (Cl. 123—55.)



1. An internal combustion engine comprising a compression cylinder and a combustion cylinder, a transfer valve controlling the flow from the compression cylinder to the combustion cylinder, an intake valve controlling the flow to the compression cylinder, an exhaust valve controlling the flow from the combustion cylinder, pistons operating in the cylinders, a crank shaft, pitmans connecting the pistons with the crank shaft, means for operating one of the valves, and means for operating the other two of the valves, both of said means being operated independently, but in properly timed relation, by the crank shaft.

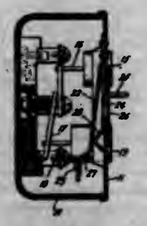
1,626,458. FLEXIBLE COUPLING. WILLIAM J. FRANCKE, New Brunswick, N. J., assignor, by mesne assignments, to John Waldron Corporation, New Brunswick, N. J., a Corporation of New Jersey. Filed Oct. 21, 1922. Serial No. 595,982. 1 Claim. (Cl. 64—26.)

A flexible coupling comprising a pair of coupling members adapted respectively to be attached to the adjacent ends of two shafts, one of said members having aligned slots extending in an axial direction, a cylindrical pin extending transversely across the other of said members, an element journaled on the pin and having a through cylindrical opening transverse to the pin axis, a flat flexible element extending through the said opening and having a central aperture for passage of the pin, the ends of said flexible element entering the slots on the coupling member first named, and keepers on opposite sides of the flexible element, having curved outer faces conforming with the cylindrical opening and neatly fitted to the latter.



1,626,459. GOLF BALL AND METHOD OF MAKING THE SAME. WILLIAM C. GEER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Mar. 5, 1924. Serial No. 696,997. 7 Claims. (Cl. 154—17.)

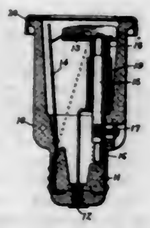
4. The method of making a golf ball which comprises enclosing a wrapped center in a layer of cover material, so winding a thread thereon as to provide interstices between the adjacent turns of the winding, enclosing the structure thus formed in a tough outer layer of cover material, and by heat and pressure uniting the two layers of cover material through the interstices of the intervening thread winding.



7. A golf ball comprising a core, a tense rubber winding thereon, a tough, molded, outer cover and a softer inner cover on said winding and a winding of rubber thread completely imbedded in said inner cover.

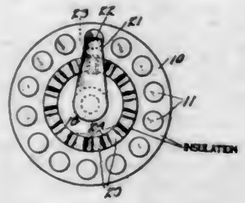
1,626,460. TIRE SPREADER. VERNON R. GOELLER, Boonton, N. J. Filed Nov. 12, 1926. Serial No. 148,046. 7 Claims. (Cl. 152—27.)

1. A tire spreading tool including a spindle, a pair of parallel arms mounted for relative sliding movement toward or away from each other on the spindle, tire bead engaging means carried by the arms, and means for automatically locking the arms against relative advance as they are forcibly separated against the action of a tire to be expanded.



1,626,461. PUSH-BUTTON SWITCH. ROBERT W. GOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 9, 1924. Serial No. 754,851. 4 Claims. (Cl. 200—159.)

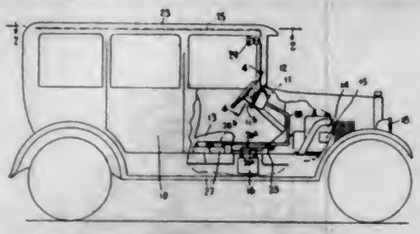
1. A push button switch having a casing, a movable switch member within the casing, the said switch member being biased to one position, a push button projecting from said casing for operating the switch member to a second position against the bias thereof, a resilient member secured within said casing and arranged to hold said switch member in the second position thereof and nor-



mally biased out of cooperative relation therewith, and an operating member for forcing the said resilient member against the bias thereof into holding relation with said switch member, the said operative member being yieldingly held within the casing by said resilient member and having a portion thereof extending from the casing for operating the same.

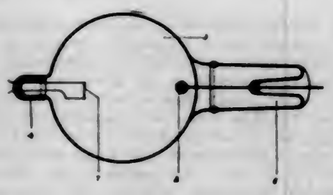
1,626,462. ELECTRIC CUT-OUT. CHESTER I. HALL, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed Aug. 8, 1924. Serial No. 730,984. 2 Claims. (Cl. 200—122.)

1. A thermal electric cut-out comprising an enclosing base, a pair of terminals secured to said base, a support of heat conducting material mounted within said base, a movable bi-metallic thermal responsive element having one end secured to said support and electrically connected to one of said terminals to be heated in accordance with the current in the circuit controlled by the cut-out, a spring contact secured to said base and electrically connected to the other of said terminals, said contact being arranged to be flexed into latching engagement with the free end of said element to complete a circuit between said terminals, and an electrical heater connected in said circuit for heating said support to supply heat to said thermal responsive element and thereby cause the free end of said thermal element to move and thereby release said spring contact member.



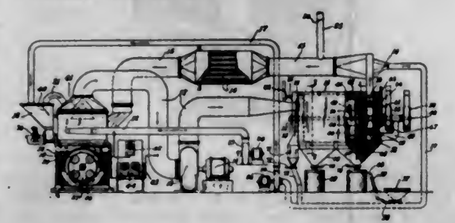
1,626,463. SWITCH. JESSE F. HARRINGTON, Memphis, Tenn. Filed Dec. 31, 1923. Serial No. 683,757. 2 Claims. (Cl. 200—11.)

1. A switch comprising a disk of insulating material having an integrally formed annular extension at one side said extension being provided with a corrugated end surface, contacts located around the periphery of said disk outwardly of said corrugated extension, a shaft extending through said disk concentrically of said extension, an arm on said shaft extending across said extension and having its outer end inturned for engagement with said contacts; said arm having its under portion directly engaging the corrugations on the extension to cause the arm to ride up or down as the inturned end portion passes from one contact to another substantially as set forth.



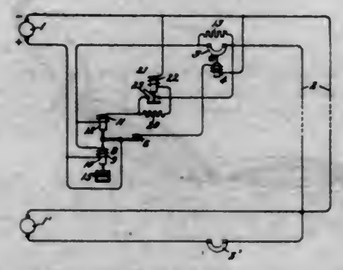
1,626,464. PORTABLE RADIO APPARATUS. WILLIAM M. HEINA, Bronx, N. Y., assignor to Heina Radio Corporation, a Corporation of New York. Filed Sept. 16, 1926. Serial No. 135,823. 8 Claims. (Cl. 250—14.)

1. In a portable radio device, the combination with the dashboard of a motor vehicle of a casing extending behind the dashboard and spaced a substantial distance from the floor-board of the vehicle, and a radio apparatus



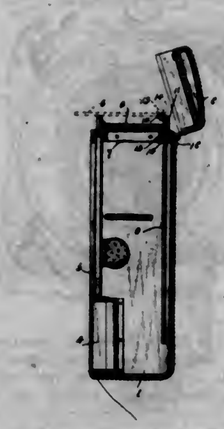
housed in said casing having its control members extending therefrom through said dashboard to the front thereof.

1,626,465. X-RAY TUBE. GILLES HOLST and ALBERT BOUWERS, Eindhoven, Netherlands, assignors to Naamloose Vennootschap Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Filed Nov. 6, 1923. Serial No. 673,166, and in the Netherlands Dec. 6, 1922. 12 Claims. (Cl. 250—35.)



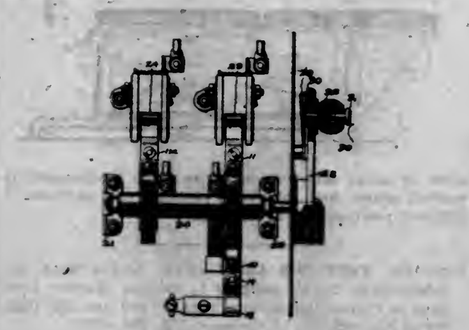
1. An X-ray tube comprising a cathode within a high vacuum vessel, said vessel consisting partly of metallic material and forming a part of the envelope of the tube, an anticathode insulated from said vessel by an insulation capable of resisting the operating voltage between the cathode and the anticathode, the metal vessel having a portion adjacent the anticathode so shaped and arranged relatively to the anticathode that the cathode-rays are caused to strike only a limited surface of the anticathode.

1,626,466. GRINDING AND SEPARATING APPARATUS. WILLIAM C. HOOVER, ROY D. FRITZ, and EDWARD FRANK CAHILL, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Nov. 21, 1923. Serial No. 676,074. 7 Claims. (Cl. 18—2.)



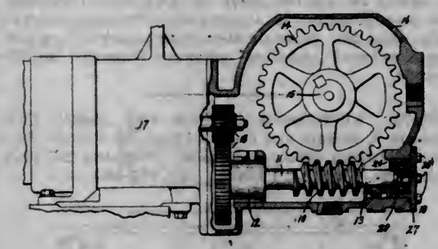
1. Grinding and separating apparatus comprising an enclosed mill, a conduit leading from the enclosure of said mill and adapted to conduct therefrom a gaseous current charged with ground material, a chamber into which said conduit discharges, a rotary screen mounted in said chamber in position to receive said current from said conduit, and means for impelling the gaseous current through the mill, conduit and chamber said screen having an open end adjacent said conduit to receive the current therefrom, the opposite end of the screen being substantially closed, and said screen being internally provided with means adapted to cause coarser particles of the material to progress toward said open end as the screen is rotated.

1,626,467. AUTOMATIC RECLOSING-CIRCUIT-BREAKER SYSTEM. BENJAMIN W. JONES, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 20, 1921. Serial No. 523,768. 19 Claims. (Cl. 175—294.)



1. In an automatic reclosing circuit breaker system, the combination with a supply circuit, a load circuit connected to said supply circuit, a circuit breaker adapted to control the connection between said supply circuit and said load circuit, and closing means for said circuit breaker, of means controlled by the difference between the voltages across said two circuits when said circuit breaker is open for controlling the said closing means, and means arranged to be affected by a condition of said load circuit for determining the predetermined voltage difference at which said last mentioned means responds to effect the energization of said closing coil.

1,626,468. IRONING-BOARD ATTACHMENT FOR WARDROBE TRUNKS. GEORGE D. JONES, Petersburg, Va. Filed May 2, 1923, Serial No. 636,150. Renewed Mar. 5, 1926. 6 Claims. (Cl. 190—13.)

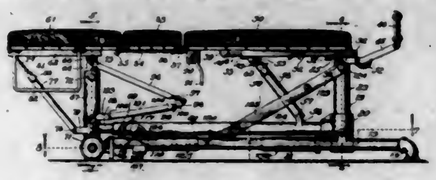


1. In a wardrobe trunk having a clothes section having a hinged top, an ironing board adapted to be placed in storage position within the trunk when not required for service and adapted when adjusted for service to extend across the top of the clothes section and supported thereby, and means for rigidly securing the rear end of the ironing board to the clothes section in either of the two mentioned positions.

1,626,469. ELECTRIC SWITCH. GEORGE S. LEDDICK, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 2, 1923. Serial No. 610,097. 4 Claims. (Cl. 200—5.)

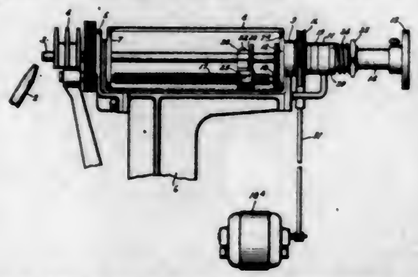
1. The combination in an electric switch of two relatively movable switch members, means for biasing the first of the switch members to the closed position, a pivotal support for the second switch member, and a cam connected with the second switch member for holding the first switch member in the open position, releasing the same to close when the second switch member is moved toward a predetermined position, and then opening the first switch member before the second switch member reaches the said predetermined position.

1,626,470. THRUST BEARING. SAM H. LIBBY, East Orange, N. J., assignor to General Electric Company, a Corporation of New York. Filed Sept. 22, 1923. Serial No. 664,327. 1 Claim. (Cl. 308—233.)



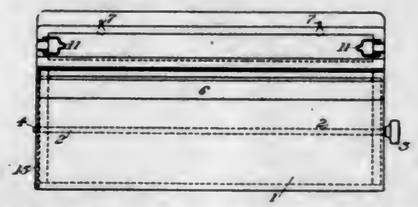
A plug thrust bearing unit comprising a pair of coaxial rings of substantially rectangular cross section, each having a circular race in a radial surface and in opposing relation, a plurality of balls between said race rings, a plug having a cylindrical chamber to receive said rings and balls, removable means for retaining said rings and balls in said chamber, said plug having a thrust receiving boss in the bottom of said chamber of circular form and of a mean diameter substantially the same as that of the said races, and said plug being provided with means for securing the plug in an aperture to sustain the end thrust of a revolving shaft through the said boss, race rings and balls.

1,626,471. TREATING TABLE. OTIS A. MILLER, Davenport, Iowa, assignor to A. G. Bush, Davenport, Iowa. Filed Mar. 12, 1921. Serial No. 451,681. 28 Claims. (Cl. 128—73.)



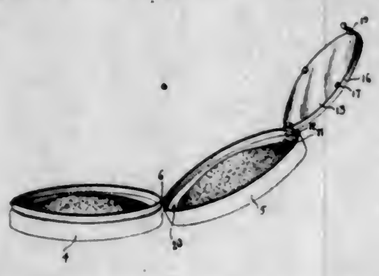
1. A table comprising a base member, a second member supported thereon to be movable in a substantially vertical plane into and out of a substantially horizontal

position, a table-top formed of sections, posts carrying said sections and vertically movable on said second member, said sections being pivoted respectively to said



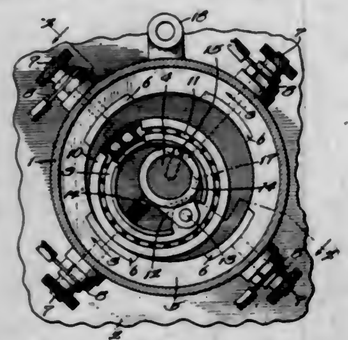
posts to adapt said sections to swing in a substantially vertical plane, and means for holding said sections in adjusted positions about their pivots.

1,626,472. FEED FOR ARC LAMPS. PETER MOLE, Jr., Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 30, 1923. Serial No. 635,543. 5 Claims. (Cl. 176—66.)



1. In an arc lamp an electrode, a main gear having its axis coincident with the axis of the electrode and a satellite gear in engagement with the main gear, a motor for driving the satellite about its axis to feed the electrode longitudinally and at the same time about the axis of the main gear to rotate the electrode, whereby a continuous rotation and feed motion is imparted to the electrode.

1,626,473. RECORDING DEVICE FOR FARM USE. GEORGE A. MORRIS and CHARLES SPENCER PALLOT, Port Haney British Columbia, Canada. Filed Aug. 23, 1926. Serial No. 130,978. 1 Claim. (Cl. 281—6.)

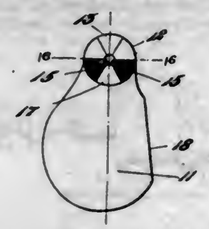


In a farmer's recording device consisting of a record carrying cylinder revolvable in a casing on which is fixed a partial and corresponding record the combination comprising, a semicircular front on the said casing, the said front being divided horizontally by a hinge on a horizontal plane passing through the axis of the same semicircle, the upper part of said front forming a movable quadrant, the said quadrant carrying a flat tangential member adapted to act as a wrist support, the rearward top of said casing being hinged to the casing along its rear edge and also hinged intermediately and parallel to the rear edge so that the front portion may be folded to assume a nearly vertical position and to then act as a card holder, the two said hinge members being adapted to open out sufficiently to permit the said cylinder to be removed from the said casing, a flange on one end of said cylinder, notches on the periphery of said flange, a downwardly projecting pin on the under side of said wrist support and adapted to engage one of said notches by pressure of said wrist.

1,626,474. DOUBLE-SWINGING-MIRROR COMPACT CASE. SIMON MORRISON, Brooklyn, N. Y. Filed Nov. 23, 1922. Serial No. 602,678. 1 Claim. (Cl. 132—83.)

A vanity case comprising a body for receiving a toilet compact, a lid hinged to said body and having a ring for receiving and retaining a toilet compact, a double-faced mirror pivotally supported on said ring and a fastening element at the opposite side of the mirror from its supporting pivot adapted to project through said ring and hold the mirror in closed position, said mirror being adapted to swing at an angle to the swing of the other of said members and adapted to form a closure for the lid being adapted to fold over the bottom so that access may be had to the contents of the lid at the time the mirror is used, substantially as set forth.

1,626,475. TIMING SWITCH. JOHN H. NELSON, Chicago, Ill., assignor, by mesne assignments, to Ecco Manufacturing Company. Filed Mar. 10, 1920. Serial No. 364,690. 4 Claims. (Cl. 200—26.)

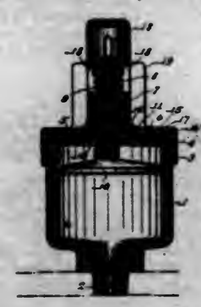


2. A device of the class described, constructed as set forth in claim 1, and further characterized by the fact that the spring is of helical form the collar and the inner race having studs which receive the ends of the spring.

1,626,476. GOLF-CLUB SHAFT. GILBERT E. NICHOLLS, Edgewood, R. I., assignor to The Swingrite Co., Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 11, 1927. Serial No. 174,469. 5 Claims. (Cl. 273—80.)

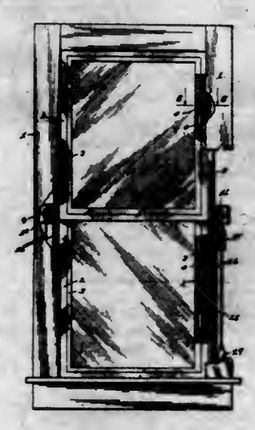
1. A shaft for golf clubs comprising a plurality of sections of wood of two different degrees of resiliency

cemented together, all of those sections to the rear of the transverse axis through the shaft being of the wood of relatively greater resiliency and a portion of those sec-



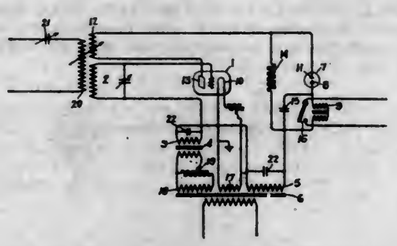
tions forward of said transverse axis being of relatively less resiliency, the sections of said two different woods having adjacent surfaces in planes passing substantially thru the axis of the shaft.

1,626,477. GOLF-CLUB SHAFT. GILBERT E. NICHOLLS, Edgewood, R. I., assignor to The Swingrite Co., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 11, 1927. Serial No. 174,470. 4 Claims. (Cl. 273—80.)



1. A shaft for golf clubs comprising a plurality of sections of bamboo and a single section of wood of a different texture all cemented together, the said single section being positioned on the front center line of the shaft, the sections of said two different woods having adjacent surfaces in planes passing substantially thru the axis of the shaft.

1,626,478. LUBRICATING APPARATUS. WILLIAM R. E. NORSE, New York, N. Y. Filed Oct. 23, 1926. Serial No. 143,650. 5 Claims. (Cl. 184—38.)

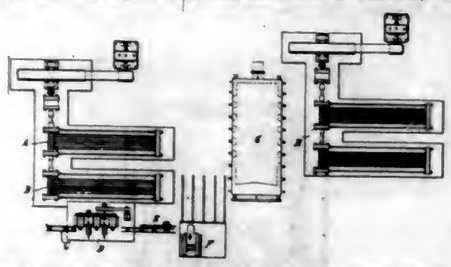


1. A lubricating apparatus, including a receptacle, a removable cap on the receptacle, a screw threaded plunger rod mounted to move through the cap and held by the cap against rotary movement, a plunger connected to the rod within the cup, and an internally screw threaded bonnet engaging the plunger rod and coupled to turn on the cap.

1,626,479. WINDOW. VITTORIO PASTRENGO, San Francisco, Calif. Filed Dec. 10, 1924. Serial No. 755,003. 2 Claims. (Cl. 16—195.)

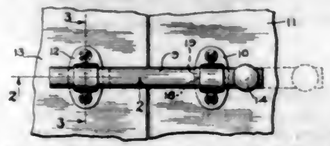
1. A counterbalancing means for window sashes comprising racks mounted upon the outer sides of upper and lower sashes slidably mounted within a casement; gears mounted within the casement in meshing relation with the racks; sprockets mounted in connection with the gears; chains mounted over said sprockets, said chains having their ends hanging freely within the casement; and counterweights mounted upon one end of each chain to counterbalance the sashes within the casement.

1,626,480. AMPLIFYING SYSTEM. LUCIUS J. PERKINS, Los Angeles, Calif., assignor to General Electric Company, a Corporation of New York. Filed Nov. 10, 1924. Serial No. 748,874. 18 Claims. (Cl. 179—171.)



I. The combination in an amplifying system of a three-electrode electron discharge device having plate and grid circuits, means for supplying an alternating potential to both of said circuits, a rectifying device included in the plate circuit which is non-conducting until the voltage supplied thereto exceeds a predetermined value, and means for automatically varying said voltage to render the rectifier conducting.

1,626,481. METHOD OF ROLLING TUBES. JULIUS ROEDER and WILHELM WELLMANN, Witten, Germany. Filed Jan. 11, 1927, Serial No. 160,483, and in Germany Jan. 7, 1926. 1 Claim. (Cl. 80—62.)



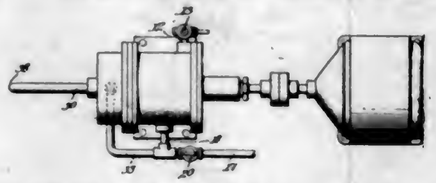
A process for rolling tubes comprising passing the hollow body to be rolled successively through a blooming mill over a mandrel, through a roughing mill over a man-

drel, through a reducing mill, without employing a mandrel, and through a finishing mill over a mandrel, the

interposition of the reducing mill between the roughing mill and the finishing mill serving to reduce the number of passes required at the finishing mill.

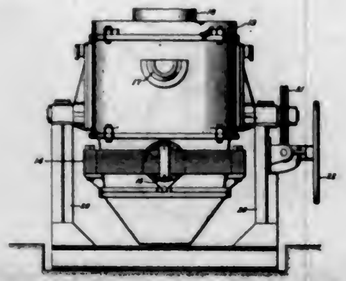
1,626,482. SLIDING BOLT. EDWARD R. SARGENT, New Haven, Conn., assignor to Sargent & Company, New Haven, Conn. Filed June 22, 1921. Serial No. 479,632. 11 Claims. (Cl. 292—145.)

11. A guide for a bolt half round in cross section, comprising a base portion having a semi-circlar loop portion secured thereto to embrace said bolt, and upwardly springing means disposed across each of the open ends of said loop beneath said bolt to engage the flat under surface thereof at two points in its length to urge the bolt into contact with the inner surface of said loop throughout the length thereof, whereby said bolt will be retained in parallel with the plane of said base while being moved through said loop.



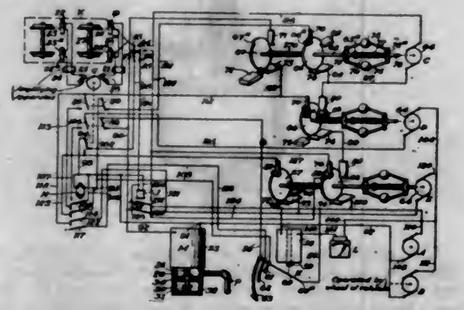
1,626,483. MEANS FOR ELASTICALLY CONNECTING LANDING GEAR TO AIRCRAFT. HUGH OSWALD SHORT, Rochester, England. Filed Jan. 3, 1927. Serial No. 158,671, and in Great Britain Mar. 29, 1926. 7 Claims. (Cl. 244—2.)

1. In apparatus for elastically connecting landing gear to aircraft, in which the lower portion or landing gear moves relatively to the upper portion or main structure of the aircraft; elastic connections comprising torsion members such as metal tubes, means for fixing and preventing from rotation one part of the said torsion members, bearings on one portion of the aircraft for holding the torsion members on the said portion, cranks on the torsion members located adjacent to such bearings, and pivoted connections between the free ends of said cranks and the other portion of the aircraft.



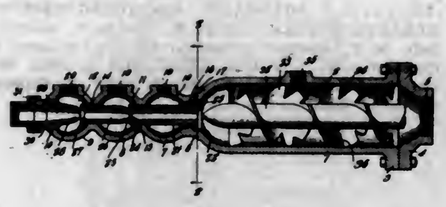
1,626,484. PUMP. WILLIAM J. SMITH, Philadelphia, Pa., assignor to R. James McCaffrey, Philadelphia, Pa. Filed Nov. 24, 1926. Serial No. 150,480. 5 Claims. (Cl. 261—28.)

1. A pump of the kind described comprising an air compression chamber having therein an eccentric rotary piston provided with radially disposed slidable vanes, a compression chamber having therein an eccentric rotary piston provided with slidable radially disposed vanes, a conduit connecting the chambers, an injector having air and oil passages located in the conduit, an oil supply



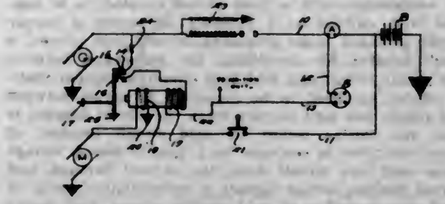
pipe connected to the oil passages, a connection between the air passage and the air compression chamber, and a receiving chamber communicating with the compression chamber, and automatically operated means for withdrawing precipitated oil from the receiving chamber.

1,626,485. INDUCTION FURNACE. MAGNUS UNGER, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Feb. 16, 1921. Serial No. 445,514. 6 Claims. (Cl. 204—64.)



1. An electric induction furnace comprising a furnace body providing a main chamber adapted to contain a pool, a plurality of open looped channels located side by side on a common winding axis communicating at their ends with said chamber and communicating with each other at their bends, and means for inducing a heating current in a charge contained in said channels.

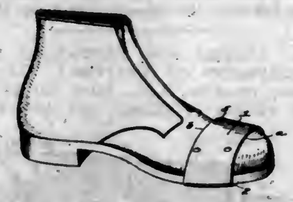
1,626,486. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. HERBERT A. WALLACE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 20, 1923. Serial No. 669,738. 44 Claims. (Cl. 246—63.)



1. In combination on a vehicle, a generator adapted to supply a constant electro-motive force, a second generator adapted to supply an electro-motive force the magnitude of which increases in response to increases in the speed of the vehicle, a plurality of normally closed contacts, means responsive to the difference between the electro-motive forces of said generators for successively opening said contacts as the speed of the vehicle increases, and governing means for the vehicle controlled by said contacts.

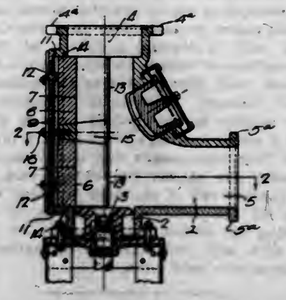
1,626,487. EMULSIFIER. DAVID WARREN, Lewiston, Me. Filed Jan. 10, 1924. Serial No. 685,467. 1 Claim. (Cl. 259—4.)

An emulsifier of the class described including a mixing chamber having an inlet and an outlet in the respective ends thereof, a non-rotatable spindle extending longitudinally within said chamber and having a tapered end terminating close to the center of the inlet, a spiral blade fixedly mounted on the spindle and attached to the wall of the mixing chamber to provide a spiral passage extending around the spindle from the inlet to the outlet, there being angular notches in the peripheral portion of the spiral blade, and means for feeding material under pressure through the inlet and against the tapered end of the spindle, said tapered end constituting a spreader for the material.



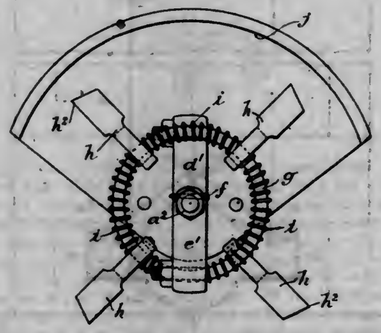
1,626,488. STORAGE-BATTERY SYSTEM. OSCAR CHARLES WIEDERHOLD, Philadelphia, Pa. Filed Sept. 14, 1926. Serial No. 135,473. 6 Claims. (Cl. 290—37.)

1. The combination with the electrical systems of vehicles which include generator and starting motor circuits having a common storage battery, the starting motor circuit being normally open, of means rendered operative only by the closing of the starting motor circuit when the storage battery is substantially fully charged for shunting the storage battery in the generator circuit and means for retaining the operativeness of the first named means when the starting motor circuit is again opened.



1,626,489. FOOT SHIELD. FRANK JOE WOJCIK, Lowell, Ariz. Filed Aug. 30, 1926. Serial No. 132,592. 4 Claims. (Cl. 36—72.)

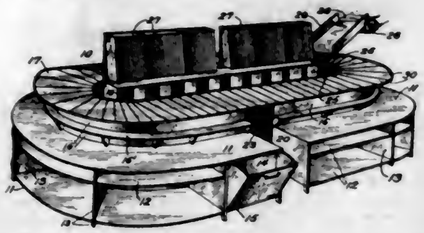
1. A foot shield to be worn over the forepart of a shoe comprising an elongated strip bent transversely on an arc forming an arched shield open at its ends, the terminal portions of said strip forming inwardly extending flanges, said shield having bendable means on the ends



thereof adapted to be extended into the material of the shoe upper for maintaining the same in position with respect thereto.

1,626,490. ASH CONVEYER AND EJECTOR. CHARLES WOTRUBA, Fort Washington, Pa., assignor to Charles L. Bachman and Eugene Hahn, Philadelphia, Pa., composing the Copartnership Victor Engineering Co. Filed Aug. 21, 1922. Serial No. 583,234. 9 Claims. (Cl. 137—75.)

1. A duct having a liner so established therein as to constitute a section of the duct wall, said liner comprising a plurality of sections placed end to end longitudinally of the duct, shoulders on said duct abutting the ends of the liner, and a wedge-shaped key disposed intermediate adjacent ends of the sections and adapted to hold the sections in place between the said shoulders.

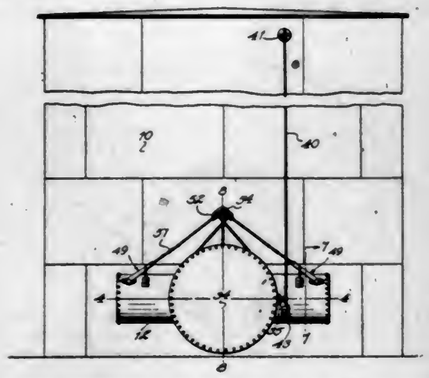


1,626,491. ROTARY TOOL FOR CLEANING, CHIPPING, OR SCALING SURFACES. WILLIAM BRUCE WRIGHT, Custom House, London, England. Filed Oct. 9, 1924, Serial No. 742,733, and in Great Britain Nov. 29, 1923. 3 Claims. (Cl. 15—104.14.)

1. A rotary tool for cleaning surfaces comprising a driving shaft mounted for rotation, a helix secured to

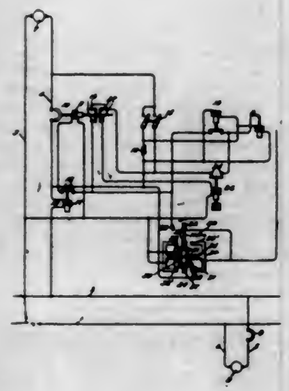
and arranged coaxially of said shaft for rotation therewith, a series of centrifugally acting hammer elements loosely pivotally engaged with said helix and springs interposed between the adjacent hammer elements.

1,626,492. SYSTEM FOR PREPARING PACKAGES FOR SHIPMENT OR DELIVERY. ALEXANDER C. YOUNGSON, Brooklyn, N. Y. Filed July 14, 1926. Serial No. 122,449. 4 Claims. (Cl. 198—19.)



2. In a unit of the class described, a conveyor comprising a continuous track having curves therein, a plurality of overlapping plates, traction means on the underside of said plates movable over said track, and means connecting said plates to facilitate of the different angular positions of the plates when passing the curves in said track, rack bars carried on the underside of said plates and normally disposed in alignment when the plates are moving in the straight portion of said track to provide a continuous rack, each of said rack bars having one of their ends convex and their opposite end concave, whereby the convex end of one rack bar co-acts with the concave end of the next adjacent rack bar for permitting of the relative movements of said plates when passing the curves in said track, and driven gears co-acting with said rack bars for imparting movement to said plates over said track.

1,626,493. ADHESIVE. WILLIAM F. ZIMMERLI, Akron, Ohio, and CARLISLE H. BIBB, New Brunswick, N. J., assignors to Johnson & Johnson, New Brunswick, N. J., a Corporation of New Jersey. Filed Nov. 6, 1924. Serial No. 748,194. 3 Claims. (Cl. 87—17.)

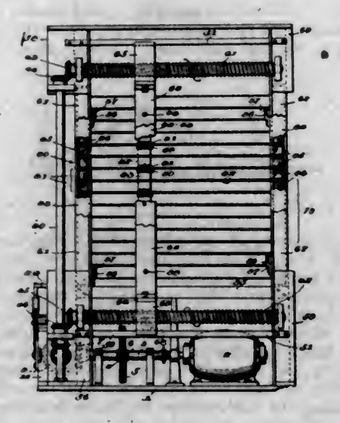


1. A surgical dressing adhesive, consisting of a sterilized rubber latex emulsion containing a stabilizing agent.

1,626,494. OIL-SAVING DEVICE. EARNEST AKERS, CHARLEY C. MIMS, FRED L. MOUTRAY, and LENARD P. MILLER, Huntsville, Tex. Filed Feb. 2, 1924. Serial No. 690,285. 6 Claims. (Cl. 220—89.)

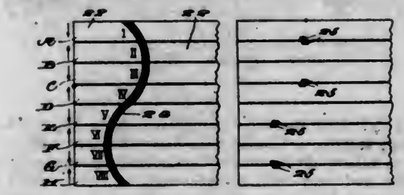
1. The combination with a tank having a discharge opening therein, of a casing secured to the tank over said opening, said casing being provided with an opening to establish communication with the interior of the tank, an outlet for the casing, a plurality of radially disposed pivotally mounted arms operatively associated with the closure for holding the latter in closed position, thermostatically controlled axially movable arm engaging means for closing the discharge opening of the tank, a normally open closure for the casing outlet and thermostatically controlled means for regulating the operation of the last mentioned closure.

1,626,495. AUTOMATIC RECLOSING-CIRCUIT-BREAKER SYSTEM. ARVID E. ANDERSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 5, 1922, Serial No. 566,601. Renewed May 7, 1925. 14 Claims. (Cl. 175—294.)



2. In an automatic reclosing circuit breaker system, the combination with a load circuit adapted to be supplied with current at a plurality of points, a supply circuit arranged to be connected to said load circuit, a circuit breaker for controlling the connection between said supply circuit and said load circuit, a current limiting device arranged to be connected in series between said supply and load circuits when the circuit breaker is open, and closing means for said circuit breaker, of means operative in response to a predetermined voltage across said load circuit when the current through said current limiting device exceeds a predetermined value to effect the operation of said closing means, and means operative in response to the current through said current limiting device when said current is less than said first mentioned predetermined value to effect the operation of said closing means.

1,626,496. APPARATUS FOR DISPLAYING CHANGEABLE PICTURES. ALEXANDER ARCHIPENKO, New York, N. Y. Filed June 2, 1925. Serial No. 34,432. 23 Claims. (Cl. 88—16.)



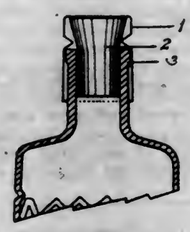
1. In a changeable picture display system, the combination with a supporting frame and driving mechanism therefor, of an interchangeable display unit comprising a plurality of movable aprons and guide supports therefor arranged to guide the aprons a portion at a time through a common picture plane, each apron having a support at the picture plane and one at the opposite end of the apron, and actuating means directly engaging said aprons

for moving the same and located intermediate the length thereof, said guide supports being arranged to be mounted in said supporting frame and said actuating

means being arranged to be coupled to said driving mechanism for transmitting motion from said mechanism to said movable aprons.

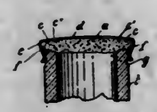
1,626,497. METHOD OF DECORATING CHANGEABLE DISPLAY APPARATUS. ALEXANDER ARCHIPENKO, New York, N. Y. Filed July 22, 1925. Serial No. 45,435. 17 Claims. (Cl. 40—32.)

1. The method of decorating the display bands of a machine for displaying changeable pictures, which method comprises decorating while in the machine both of two adjacent bands on a limited portion of each band, and which portion is to be displayed at any one time, then moving into new decorating position the bands a distance slightly less than said limited portion so as to leave visible an undecorated portion and only a remaining end of said decorated portion, and then decorating that new portion of said adjacent bands by adding to said remaining end.



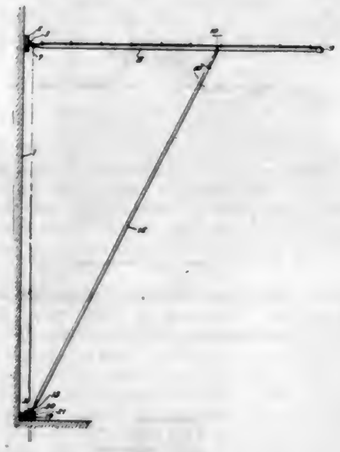
1,626,498. REFLECTOR. PERCY S. BAILEY, Marblehead, Mass., assignor to General Electric Company, a Corporation of New York. Filed Sept. 23, 1924. Serial No. 739,429. 4 Claims. (Cl. 240—104.)

1. A reflector having a pair of surfaces of revolution, each surface produced by rotating a conic about an axis crossing the central axis of the reflector, said surfaces connected on one side by a reflector having a series of corrugations each in the form of a focalizing surface generated about an axis, the axes of such corrugations making each the same angle with the axis of the reflector,



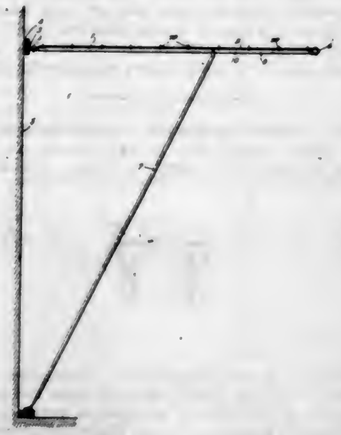
said surfaces being also connected on the opposite side by a reflector having a series of corrugations similar to those on the opposite side, the axes of said last corrugations also making each the same angle with the axis of the reflector.

1,626,499. BOTTLE CLOSURE. CARLOS BENETTI, Barcelona, Spain. Filed May 5, 1925, Serial No. 28,249. and in Spain Mar. 20, 1925. 1 Claim. (Cl. 215—37.)



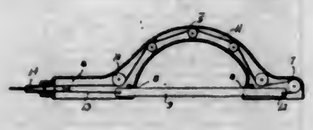
A closure for bottles comprising in combination a ball shaped cover, an annular rib in the upper portion of said cover provided by the pressing of an annular groove into the outer surface of said cover, and a conical stopper of suitable elastic material and held by said annular rib at its top part which is larger than the lower part so that said stopper as well as the bottle neck are protected by said cover from contact with foreign bodies.

1,626,500. CROWN STOPPER. CARLOS BENETTI, Barcelona, Spain. Filed May 5, 1925, Serial No. 28,250, and in Spain Mar. 15, 1925. 1 Claim. (Cl. 215—39.)



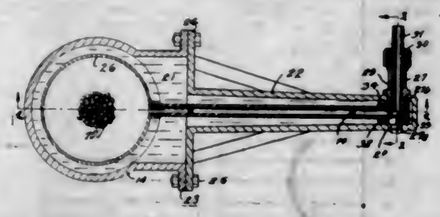
A bottle stopper comprising in combination a plain cork disk of slightly greater diameter than the upper end of the neck of the bottle to be closed, a metal cap having two concentric grooves in its top plate said grooves being in alignment with the outer and inner edges of the bottle neck, respectively and designed to increase the resistance to tension and the pressure exerted on the cork disk at the inner and outer circumference of the bottle neck and inwardly and upwardly directed flaps in the flange of said metal cap said flaps being produced by stamping and designed to securely fix said cork disk in said metal cap

1,626,501. DISPLAY RACK. HARRY SUMNER BEST, Galva, Ill., assignor to John H. Best & Sons, a Firm composed of Charlotte Sumner Best, Don Jewell Best, Leon Henson Best, nad Harry Sumner Best, Galva, Ill. Filed Oct. 18, 1924. Serial No. 744,313. 12 Claims. (Cl. 211—23.)



1. In a display rack, the combination of an arm, an extensible brace swiveled at its upper end to the arm, a support, and a swivel and pivot connection between the brace and the support, said pivot lying in a plane in front of the center of said swivel, said brace having its lower end secured adjacent the bottom of said support.

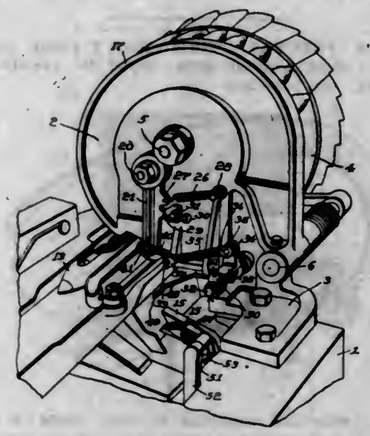
1,626,502. ARM. HARRY SUMNER BEST, Galva, Ill., assignor to John H. Best & Sons, a Firm composed of Charlotte Sumner Best, Don Jewell Best, Leon Henson Best, and Harry Sumner Best, Galva, Ill. Original application filed Oct. 18, 1924, Serial No. 744,313. Divided and this application filed May 25, 1925. Serial No. 32,611. 7 Claims. (Cl. 211—22.)



1. A display rack arm in the form of a T and formed of one piece of sheet material, the stem of said T being in the form of a U, the sides of said U being bent outwardly to form the head of said T, and one of said sides being longer than the other and bent upon itself and overlying the said other side and the material at the head between the sides of the U being depressed and in contact with the adjacent bends of the sides of the said U, the lateral portions of the material being in contacting relation with each other.

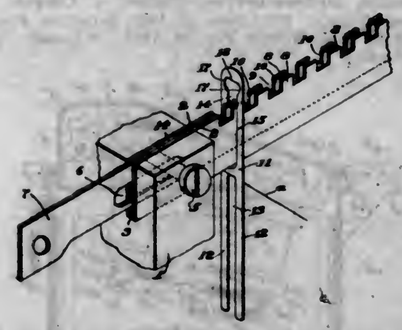
1,626,503. POWER-OPERATED HANDSAW. FELIX BJORKLUND, Fairport Harbor, Ohio. Filed Oct. 2, 1925. Serial No. 60,104. 3 Claims. (Cl. 143—63.)

3. An apparatus of the character described comprising a casing, a crank shaft journaled therein and having oppositely extending throws, a motor in the casing operatively connected with the crank shaft, a flexible tube extending from the casing, a saw holder associated with the end of the flexible tube, guide pulleys journaled in the saw holder, a pair of flexible elements connected to the throws and passing through the flexible tube, and said flexible elements being associated with the pulleys for reciprocating the saw through the instrumentality of the throws, and means carried by said saw holder for controlling the operation of the saw.



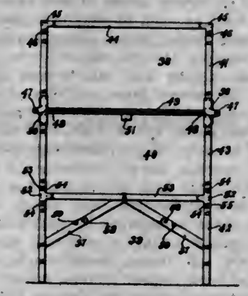
1,626,504. FLOAT CONTROL DEVICE. LYLE W. BROWNE, Marshalltown, Iowa, assignor to The Fisher Governor Company, Marshalltown, Iowa. Filed Jan. 21, 1925. Serial No. 3,766. 1 Claim. (Cl. 137—104.)

In a device of the class described, a float cage, a hollow float therein, a tubular float arm connected with said float, a hollow pivot member supported on the wall of the cage and projecting therethrough at right angles to the said arm having its interior arranged in communication with the interior of said arm, and means for connecting said pivot member at a point outside the cage with an operative mechanism, such as a valve, said last means including a fitting mounted on the outer end of said pivot member for closing the end thereof, means for fixing said fitting on the pivot member, and an arm mounted on said fitting.



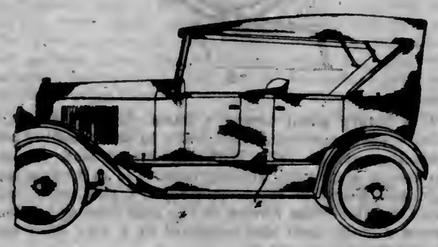
1,626,505. FILLING-CONTROL MECHANISM FOR FILLING REPLENISHING LOOMS. EDWARD C. BURNHAM and HARRY A. DAVIS, Hopedale, Mass., assignors to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Sept. 17, 1926. Serial No. 136,101. 6 Claims. (Cl. 139—267.)

1. In a filling replenishing loom, the combination of a hopper and a hopper stand, a spring actuated swinging arm mounted on the hopper stand and provided with a guiding support for the filling carrier to be transferred, an adjustable stop for varying the operative position of the guiding support, an independent rocker mounted for rocking movement frontward of the guiding support, a thread parter for parting the filling of the outgoing carrier, a thread parter actuator extending rearwardly from the independent rocker, and a spring connection be-



tween the swinging arm and rocker for operating the parter only on displacement of the swinging arm during transfer.

1,626,506. WARP STOP MECHANISM FOR LOOMS. HARRY H. BURTON, New Bedford, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed July 21, 1926. Serial No. 123,969. 1 Claim. (Cl. 139—365.)



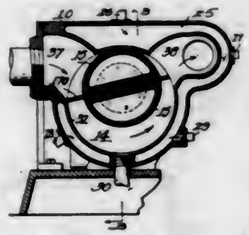
In a mechanical warp stop motion for looms, the combination of a detector bar and detector bar holder each having rectangular teeth with straight upper supporting surfaces and rectangular spaces between, a series of drop wires each provided with an elongated detector slot having parallel side walls between which the detector bar and detector bar holder extend, and a top opening communicating with the detector slot and having upwardly diverging side walls, a straight top wall connecting the upper portion of the diverging side walls of said top opening and of a straight length greater than the combined thickness of the detector bar and detector bar holder that the straight top wall of the opening may engage and be supported by the straight upper supporting surfaces of the rectangular teeth of either the detector bar or detector bar holder upon the occurrence of a warp fault, and an opening independent of the top opening in drop wires for sustaining the drop wires upon the warp threads.

1,626,507. HOUSEHOLD ARTICLE. JAMES HARRISON CAMPER, Huntington, W. Va. Filed Apr. 28, 1923. Serial No. 635,292. 1 Claim. (Cl. 68—34.)

A collapsible clothes rack comprising a pair of spaced parallel frames each frame comprising a top section, a bottom section and an intermediate section, means hingedly connecting said sections, the hinged connections of the top and intermediate sections being each formed with an opening, a brace for each frame extending freely through said openings and being provided at its ends with oppositely disposed arms, said top and intermediate sections being movable inwardly relatively to said brace and being limited in outward movement by said arms, oppositely inclined collapsible braces each pivotally connected at opposite ends to the intermediate and lower sections and rungs extending between said frames.

1,626,508. SURFACING FOR AUTOMOBILE PARTS AND THE LIKE. JOSEPH C. CARLSON, Tulsa, Okla. Filed Jan. 4, 1926. Serial No. 79,240. 1 Claim. (Cl. 41—36.)

An ornamented object comprising a material having thickness, a cementitious coating applied to a surface of said material, and a layer of surfacing elements of substantially uniform geometric contour and greater diameter than the depth of the coating, said elements having minor portions embedded in the coating and contacting with the outer face of said material and said elements projecting from the said coating an appreciable extent and having their adjacent side portions contacting with each other.

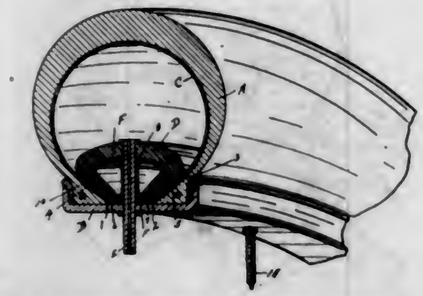


1,626,509. BOAT FORM. CHARLES E. CHANCE, Annapolis, Md. Filed June 4, 1926. Serial No. 113,816. 1 Claim. (Cl. 9—6.5.)

A form of the character described comprising a plurality of juxtaposed longitudinally arranged and relatively spaced bed timbers, pairs of opposed base pieces

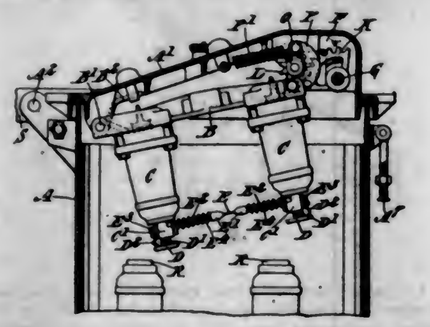
received upon said timbers, cradle blocks carried upon the inner portions of the upper surfaces of certain of said base pieces, sub base pieces rigidly supported upon the upper portions of certain others of said base pieces, frame side forms carried by each of said base pieces, the inner surfaces of said forms being curved inwardly to conform to the required traverse curvature of the boat ribs to be received thereby and said curved inner surfaces joining with the curved inner surfaces of adjacent portions of said cradle blocks and sub base pieces, the inner ends of said base pieces and said sub base pieces being relatively spaced whereby to provide a keel receiving pocket therebetween, bracing means connected to the inner extremities of said sub base pieces and the corresponding portions of their respective base pieces adjacent said keel receiving space, a plurality of longitudinally disposed transversely spaced stringers received upon the inner surfaces of said side forms, cradle blocks and sub base pieces and fixed with respect thereto, means for relatively bracing and interconnecting the various frame side forms arranged upon the juxtaposed bed timbers, and means for securing base pieces against relative movement upon their respective bed timbers at certain times.

1,626,510. ROTARY PUMP. EARLE M. CHASE, Springfield, Mass., assignor to Universal Candy and Chocolate Machinery Company, Inc., Springfield, Mass., a Corporation of Massachusetts. Filed Aug. 18, 1925. Serial No. 51,051. 5 Claims. (Cl. 103—137.)



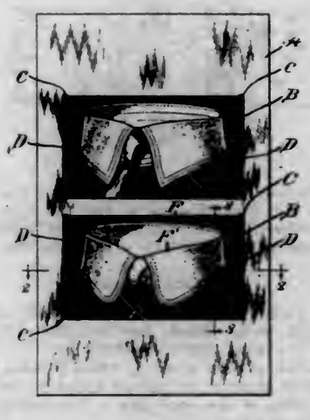
1. A rotary pump having a pump chamber, a rotary valve support mounted eccentrically in said chamber and contacting at one point with the curved wall of said chamber, a plate valve slidable radially in said valve support, and means to rotate said support and valve, said pump chamber being formed of two semi-circular portions spaced slightly apart and connected by a very short portion having straight walls.

1,626,511. VEHICLE TIRE. JOHN T. CLARK, Provo, Utah. Filed Mar. 8, 1926. Serial No. 93,112. 3 Claims. (Cl. 152—20.)



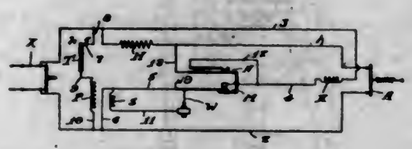
1. A vehicle tire comprising an outer casing having a soft rubber filler and an inner liner cemented to form a casing; flanged edges on said inner liner; an inner casing concentric with said outer casing and carried therein; edges on said inner casing adapted to fill the space between the flanged edges of said inner liner and the main body of said liner; a soft rubber liner, a portion of which is cemented to the inner wall of said inner casing, and having overlapping edges thereon; an inner tube within said inner casing; and means to inflate both of said casings.

1,626,512. PNEUMATIC TIRE. JOHN T. CLARK, Provo, Utah. Filed June 26, 1926. Serial No. 118,619. 3 Claims. (Cl. 152—20.)



1. A vehicle tire comprising an outer casing; a liner secured therein, having its edges free from the edges of the casing; an inner casing concentric with said outer casing and carried therein; edges on said inner casing bent back upon themselves and adapted to fit between the edges of the liner and the edges of the outer casing; an inner tube within said inner casing; and means to inflate both of said casings.

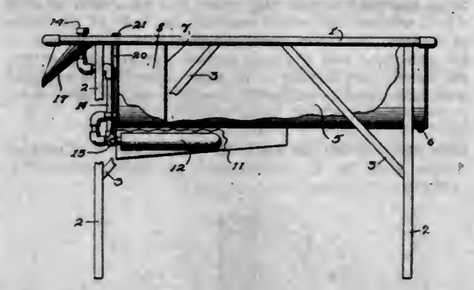
1,626,513. OIL-IMMERSED ELECTRIC SWITCH. FRANK COATES, Cleadon, and JAMES MIRREY, East Boldon, England, assignors to A. Reyrolle & Company, Limited, Hebburn-on-Tyne, England, a Company of Great Britain. Filed June 27, 1925, Serial No. 40,015, and in Great Britain Aug. 30, 1924. 9 Claims. (Cl. 200—50.)



3. In an electric switch box having an inner and an outer lid the combination with a fuse member carried by the inner lid of fixed contacts within the box with which the fuse member makes connection when the inner lid is closed, a rotatable spindle mounted on the outer lid, a fastening device for the outer lid carried on said rotatable spindle, a toothed quadrant also carried on the rotatable spindle, a second spindle mounted on the outer lid, a gear wheel carried by this second spindle and engaging the toothed quadrant, a crank member mounted on the same spindle as the gear wheel and a link connecting the crank member with the inner lid so that the movement of the fastening device to release or to fasten the outer lid raises or lowers the inner lid.

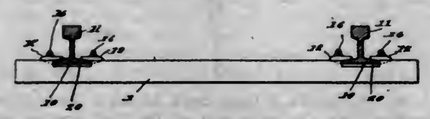
1,626,514. COLLAR-DISPLAY DEVICE. CHARLES M. CONNOLLY, Troy, N. Y., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y., a Corporation of New York. Filed Sept. 4, 1925. Serial No. 54,454. 5 Claims. (Cl. 40—126.)

1. A display device comprising a light card having spaced slots extending therethrough, and a dark card bridging the space between said slots and having its ends anchored in said slots with light slits at said ends, the exposed face of the dark card being wholly framed by the light card and being convex and bearing an embossed replica of a collar and tie ensemble, whereby the device presents the optical illusion of an opening in the light card and a real collar and tie in a dark space back of the opening.



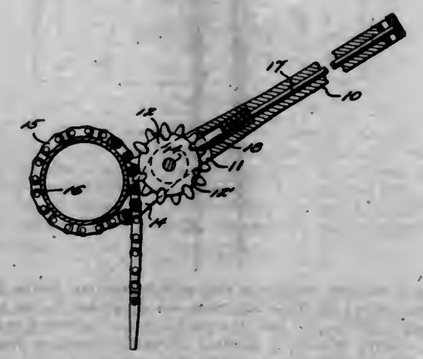
1,626,515. TEMPERATURE CONTROL FOR FOLDING MACHINES, ETC. ORVILLE E. COOK, Troy, N. Y., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y., a Corporation of New York. Filed Nov. 14, 1925. Serial No. 69,002. 13 Claims. (Cl. 219—20.)

1. Apparatus for controlling an electric heater comprising a circuit closer for connection in circuit with the heater, a magnet for actuating said circuit closer, a thermostat responsive to said heater for controlling the closer, and means for preventing momentary opening and closing of said thermostat from affecting said magnet.



1,626,516. CAN WASHER AND STEAMER. BESSIE E. CRAMER, Garnett, Kans. Filed Aug. 2, 1926. Serial No. 126,605. 2 Claims. (Cl. 141—7.)

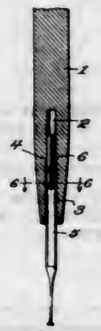
1. A combined can washer and steamer of the character described comprising a frame, a trough depending from said frame and being of substantially semi-circular formation in cross section, legs for said frame, braces between said legs and frame, a partition in said trough and providing a water tank, a steam generator disposed below said trough and tank respectively, means for admitting water to one end of the generator in predetermined quantities, steam conveying means extending and rising from the opposite end of said generator, a platform supported by said frame and having an opening therein through which said last mentioned means projects and a



cone shaped drain extending at a downward inclination from the lower edges of said opening for the purpose specified.

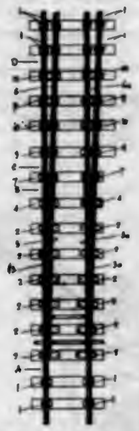
1,626,517. RAIL TIE. CHARLES D. CUBAY, Henryetta, Okla. Filed May 19, 1926. Serial No. 110,291. 3 Claims. (Cl. 238—338.)

1. A metal tie for railway rails, impinging flanges in the lower face thereof, said tie having its upper face at points adjacent its ends, formed with aligning grooves, outstanding lugs at the opposite sides of the groves and having their inner edges partly covering said grooves, the space between the grooves designed to provide a rest for railway rails, clamps disposed over the lugs, bolt members having their heads let in the grooves and their shanks passing between the lugs and through the clamps, and nuts screwed on the clamps for holding the latter in rail engagement.



1,626,518. CHAIN WRENCH. NEALE DOUGLASS, Brooklyn, N. Y. Filed June 11, 1926. Serial No. 115,328. 1 Claim. (Cl. 81—67.)

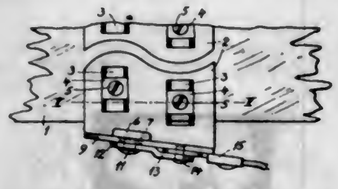
A wrench of the character described comprising a handle bifurcated at one end, a toothed wheel journaled in said bifurcated end of the handle, spaced parallel members projecting from said end of the handle, and each terminating to provide obliquely disposed portions adapted to engage the work, said members being arranged at the opposite sides of said wheel and pivoted on the



axis thereof, a chain having one end secured between the corresponding extremities of the oblique portions of said members and adapted to be passed around the work to be gripped between the latter and the teeth of said wheel, whereby the wheel engages the links of the chain to tighten the latter upon movement of the handle in one direction, and a spring-pressed rod arranged within the handle and having a tapered extremity cooperating with said wheel to afford the handle a ratchet movement.

1,626,519. DENTAL CHUCK. WILLIAM F. DUNLOP, New York, N. Y. Filed Mar. 20, 1926. Serial No. 96,329. 2 Claims. (Cl. 32—15.)

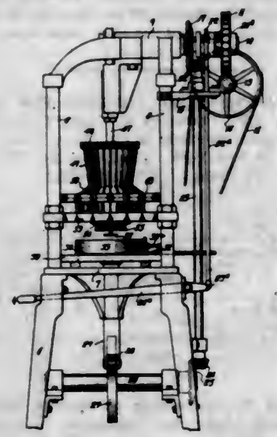
1. In combination with a chuck having a bore of two diameters with the large part of the bore opening out at the end of the chuck, a removable bit having resilient prongs for entering the bore, the prongs being pressed together when they enter the small part of the bore.



1,626,520. RAILWAY SWITCH. HERBERT JEFFREY DYKE, St. Lambert, Quebec, Canada. Filed Oct. 18, 1926. Serial No. 142,399. 9 Claims. (Cl. 246—453.)

2. A railway switch having rail supporting plates by means of which the stock rails are supported in an inclined position, the switch rails in vertical position, and the closure rails in a position gradually changing from a vertical position to an inclined position.

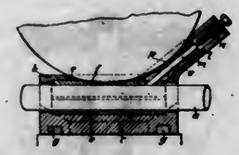
1,626,521. SKI TIE. EMIL MARIUS ERIKSEN, Oslo, Norway. Filed Sept. 4, 1925, Serial No. 54,574, and in Norway Sept. 11, 1924. 6 Claims. (Cl. 208—184.)



1. In a ski tie, toe irons including horizontal attaching portions and vertical supporting portions, inwardly projecting tongues vertically adjustable on the vertical portions, the horizontal portion of each iron being provided with slots the wall of which are inclined, and clamping irons mounted in the slots for securing the attaching portions to the upper surface of the ski and having the side edges inclined so that the upper surface lies flush with the upper surface of the horizontal attaching portions, substantially as and for the purposes set forth.

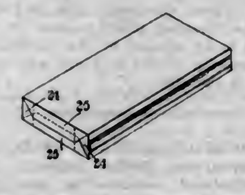
1,626,522. COLOR PRINTING. STANLEY B. FREIBERG, Cincinnati, Ohio. Filed Jan. 9, 1926. Serial No. 80,359. 6 Claims. (Cl. 101—211.)

1. A process of color printing, which consists in applying successive imprints in register for each color, among which imprints is one employing a transparent varnish or size also in register.



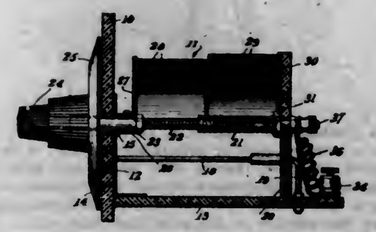
1,626,523. ARTIFICIAL-FLOWER-CURLING MACHINE. OTTAVIO GANIO, GIUSEPPE AVONDOGLIO, and ONORATO GRASSIS, New York, N. Y. Filed June 16, 1925. Serial No. 37,521. 7 Claims. (Cl. 41—2.)

1. A curling machine of the class described comprising a frame, a work receiver, means for elevating said work receiver, a plurality of curling members operable in unison means for operating said curling members across the work in said work receiver, means for urging the work receiver from beneath the curling members, and a catch for retaining the work receiver in position under the curling members when the receiver is in elevated position.



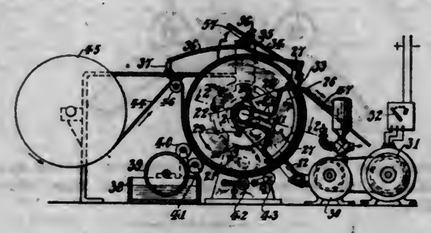
1,626,524. DEVICE FOR THE ELECTRICAL WELDING OF SEAMED TUBES. PAUL GEDIEN, Cologne-Braunsfeld, and KARL SCHWADE, Cologne-Lindenthal, Germany. Filed Oct. 28, 1926, Serial No. 144,900, and in Germany Oct 30, 1923. 3 Claims. (Cl. 219—6.)

1. A device for the continuous electrical welding of seamed tubes, comprising in combination separate adjustable complementary pressure exerting members for bringing together the edges of the tube, a rotary welding electrode and means for advancing the tube between



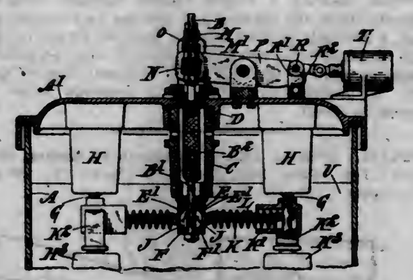
the said members, said members between them embracing the tube except for a slot provided for the passage of the electrode.

1,626,525. PACKING OF GOODS. DAVID GEORGE, Lyndal, Westcross, Wales. Filed Aug. 26, 1926, Serial No. 131,756, and in Great Britain Apr. 16, 1925. 4 Claims. (Cl. 220—1.)



1. A shipping and storing package for goods including in combination, a hermetically sealed and waterproof metallic casing for containing the goods, a relatively light metallic protective casing for receiving the hermetically sealed casing, reinforcing strips secured to the inner surface of the protective casing, and a reinforced cover for said protective casing.

1,626,526. CONDENSER. GEORGE A. GILLEN, Jersey City, N. J., assignor to Gillen, Kimmey, Baker Syndicate Inc., Elmhurst, N. Y., a Corporation of N. Y. Filed May 7, 1924. Serial No. 711,582. 1 Claim. (Cl. 175—41.5.)

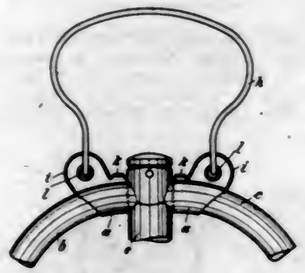


A condenser comprising a base, spaced parallel guide bars on the base, a rear end plate slidable on the guide bars, transversely arcuate plates carried on the forward face of the rear end plate, a screw for adjusting the end plate longitudinally of the base, a bracket at the forward end of the base, a sleeve rotatable through the bracket, a fan shaped plate at the inner end of the sleeve, transversely arcuate plates extending rearwardly from the fan shaped plate and adapted to enter the spaces between first named arcuate plates, means for rotating the sleeve, and independent means for rotating the screw whereby the plates may be relatively adjusted.

1,626,527. PROCESS AND MECHANISM FOR MAKING CRINKLED PAPER. NICHOLAS M. GOODLETT, New York, N. Y., assignor to Arkell Safety Bag Company, New York, N. Y., a Corporation of New York. Filed Dec. 19, 1918. Serial No. 267,430. 63 Claims. (Cl. 92—69.)

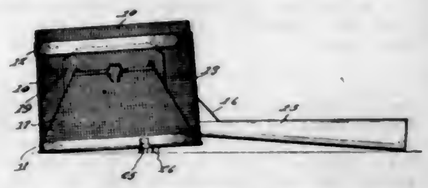
1. In an apparatus for making crinkled paper, a supporting surface for the paper and crinkle forming means to strip the paper from said surface and thereby crinkle it, in combination with means for applying pressure to the paper immediately in advance of said crinkle forming means to limit the stripping action thereof.

1,626,528. ELECTRIC CIRCUIT BREAKER. RICHARD WALTER GREGORY, Hexham-on-Tyne, England, assignor to Electric Improvements Limited, Newcastle-upon-Tyne, England. Filed July 22, 1925, Serial No. 45,373, and in Great Britain Sept. 24, 1924. 5 Claims. (Cl. 200—150.)



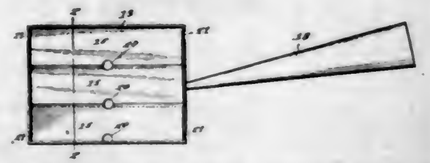
1. In an electric circuit-breaker adapted to give a quick break and a long gap the combination of a movable spindle, a retaining contact mounted on said spindle, a spring-operated contact normally held against the action of its spring by said retaining contact, and means for moving the spindle to release said spring-operated contact.

1,626,529. BAIL-SECURING MEANS. MAX HÄNEL, Schlettau, Germany. Filed Jan. 26, 1924, Serial No. 688,814, and in Germany Oct. 31, 1923. 1 Claim. (Cl. 240—52.)



A guard for storm lanterns comprising a combination, a curved tube, a central tube, two curved tubular pieces one on either side of said central tube, a connecting piece of sheet iron to be placed from below over said curved tube and having a central aperture for said central tube, flaps one at each corner of said connecting piece said flaps being perforated, the flaps at one side of the sheet iron connecting piece being larger than

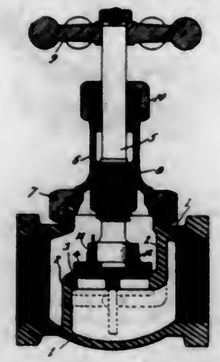
those at the other side so that when the flaps on the opposite sides are pressed together the projecting flanges of the larger flaps can be folded over the edges of the



other flaps, and a bail handle attached in the eyes formed by the perforations of every two flaps folded together.

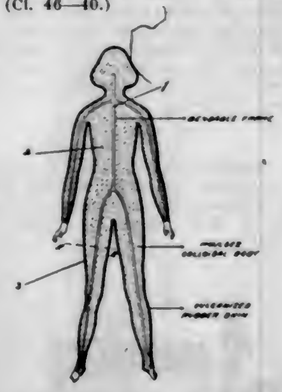
1,626,530. FLYTRAP. RAYMOND J. HARRIS, Houston, Tex. Filed Jan. 23, 1926. Serial No. 83,271. 6 Claims. (Cl. 43—34.)

1. An insect trap comprising a receptacle having an entrance opening, a hollow tapered member extending inwardly from the opening and defining an entrance passage, a reversely tapered member movable within the passage to close the inner end thereof and cooperating means included in the hollow and reversely tapered members to provide relatively small openings when the passage is closed.



1,626,531. INSECT TRAP. RAYMOND J. HARRIS, Houston, Tex. Filed Feb. 19, 1926. Serial No. 89,424. 6 Claims. (Cl. 43—134.)

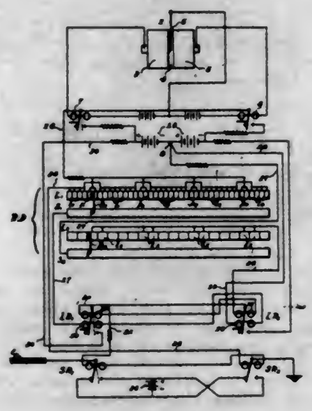
6. An insect trap comprising a receptacle having an opening therein, a plurality of pivotally mounted panels arranged to close the opening when the receptacle is held in one position and means to hold the panels substantially parallel with and spaced from one another when the receptacle is held in another position.



1,626,532. VALVE. FREDERICK H. HEHEMANN, Cincinnati, Ohio, assignor to The Lunkenheimer Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Apr. 4, 1923. Serial No. 629,756. 1 Claim. (Cl. 251—46.)

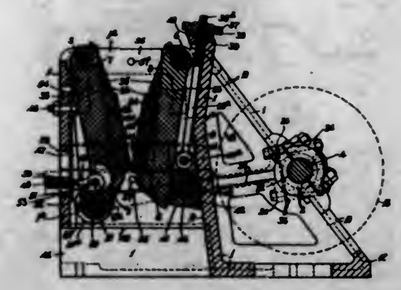
In a valve construction, the combination with the valve stem, of a retaining plug rotatively mounted on said valve stem, said plug having an upper flanged portion and a threaded lower portion, a valve disc threaded on said threaded portion of the plug and abutting the flanged portion, a lock pin for securing the plug and the disc together, said plug having an aperture in its upper flanged portion to tightly receive the pin and sup-

port it against lateral movement, and said aperture extending into the threaded lower portion in the portion thereof adapted to be engaged by the threads of the disc whereby the insertion of the lock pin will cut a groove in the threads of the disc.



1,626,533. FIGURE OF ANIMATE OBJECTS. KATHARINA HEGENSHAUSEN, Berlin, Germany, assignor to the Firm Mittelland Gummiwerke Aktiengesellschaft, Hanover-Linden, Germany. Filed Dec. 9, 1925. Serial No. 74,407, and in Germany Dec. 12, 1924. 2 Claims. (Cl. 46—40.)

1. In combination a figure of an animate object comprising a moulded core of gelatinous material, a flexible framework embedded therein with which said gelatinous material makes homogenous contact and capable of assuming a "set" when bent and a coat of flexible rubber covering the surface of the gelatinous material.



1,626,534. REGENERATIVE ROTARY REPEATER. ALBERT H. HOWARD, Bay Roberts, Newfoundland, assignor to The Western Union Telegraph Company, New York, N. Y., a Corporation of New York. Filed Aug. 14, 1925, Serial No. 50,206, and in Canada Aug. 5, 1925. 7 Claims. (Cl. 178—71.)

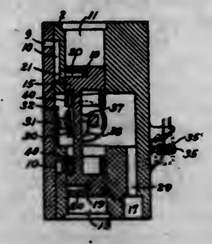
1. In a synchronous telegraph system, means for receiving or retransmitting the signals, comprising a rotary distributer operating synchronously with the received signal impulses, and three pairs of normally biased oppositely-poled polar relays operatively associated therewith, the first pair of said relays acting to receive another pair, to store and the third pair to retransmit the

signal impulses, said distributer operating to cause the impulses to be stored during the reception of the impulses and to be retransmitted for a period ending at a predetermined time, the storing relay being maintained in energized condition throughout the reception and retransmission periods.

1,626,535. MACHINE FOR BREAKING ORE AND OTHER MINERALS. RALPH HUSH, Johannesburg, Transvaal, South Africa. Filed Feb. 12, 1925, Serial No. 8,815, and in the Union of South Africa Feb. 18, 1924. 3 Claims. (Cl. 83—53.)

1. A machine for breaking ore and other minerals, including a crushing chamber, an adjustable stationary jaw and a swinging jaw, means for directly actuating the swinging jaw to co-operate with the stationary jaw, and means for adjusting the stationary jaw comprising a block arranged between the back of the stationary crushing jaw and the wall of the crushing chamber, one face of said block being constructed with a concave surface, a part arranged between the concave surface of the block and the wall of the chamber and having a convex surface corresponding to and co-acting with the concave surface of the block with which it contacts, and means for raising and lowering the adjusting block, as set forth.

1,626,536. BEARING FOR MOVEMENTS AND DRIVING GEARS. OTTO JANZEN, Berlin, Germany. Filed Nov. 27, 1926, Serial No. 151,226, and in Germany Dec. 9, 1925. 1 Claim. (Cl. 308—159.)



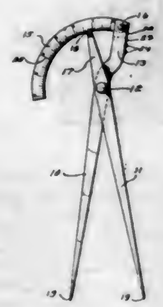
A bearing for movements and driving gears which is several times reinforced by stamped out flaps having holes and bent over, in which said flaps are hollow and bear with their concave sides on the plate so that between the plate and the flap an oil chamber is formed in which the oil is retained by the capillary effect.

1,626,537. VARIABLE CONDENSER. BOHUMIL JIROTKA, Berlin, Germany, assignor to the Firm, Dr. Otto Sprenger, Patentverwertung Jirotka mit beschränkter Haftung, Vaduz, Lichtenstein. Filed Apr. 15, 1926, Serial No. 102,271, and in Germany Apr. 25, 1925. 4 Claims. (Cl. 175—41.5.)

1. A variable condenser comprising a vessel partially filled with a conducting liquid and having closed ends terminating into necks, an electrode passed through one of said necks and submerged in said conducting liquid and a metallic coating for a predetermined portion of the exterior surface of said vessel.

1,626,538. FLUID METER. GEORGE KARL VILHELM JOHANSON, Stockholm, Sweden, assignor to Svenska Aktiebolaget Gasaccumulator, Stockholm, Sweden. Filed Dec. 22, 1921, Serial No. 524,284, and in Sweden Jan. 13, 1921. 2 Claims. (Cl. 73—30.)

1. A fluid meter, comprising in combination a casing having a circular arcuate fluid supply channel and a plurality of similar cylinder chambers with two ports therein, said ports being connected by channels to the circular arcuate supply channel and the outer port of the next adjacent cylinder chamber respectively, a plurality of pairs of pistons, having passages therethrough, slidable in said cylinder chambers, a positive connection between the pistons of each pair, means provided on said positive connections locking the respective pairs of pistons from moving until another pair has reached the end of its stroke, the passage in each piston registering at the end of its inward stroke with the said two ports in its respective cylinder chamber to conduct the fluid under pressure from said annular channel to the outer end of the next adjacent cylinder chamber, a rotatable shaft, a

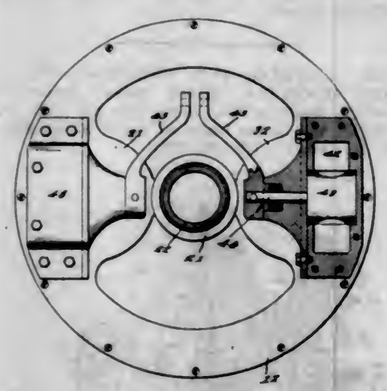


crank mounted upon said shaft, a disc mounted upon said shaft, a disc mounted upon said crank adapted to be actuated by the pistons at each stroke, and means for registering the revolutions of said shaft, as set forth.

1,626,539. TELEPHONE HOLDER. EDWARD E. JONES, Rockford, Ill. Filed July 28, 1926. Serial No. 125,524. 1 Claim. (Cl. 248—6.)

An adjustable support for a telephone, comprising a tubular upright, a weight movably arranged therein, a slotted tube, clamps for connecting the tube to the upright, a weight slidably arranged in the tube, a cable connecting the weights together, a guiding pulley on the upright for the cable, a supporting bracket for the telephone and clamps for connecting the bracket to the weight in the tube, said weight having grooves therein for receiving portions of the clamps.

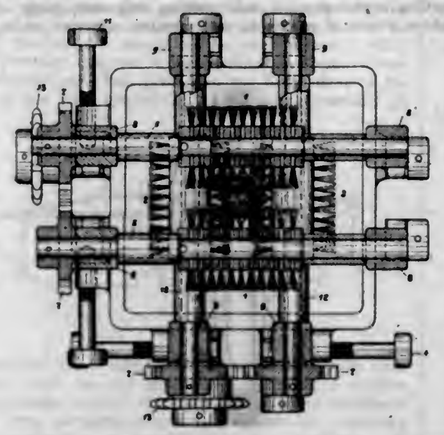
1,626,540. PIVOTED-TYPE COMPASS. LAWRENCE YASUKICHI KIMURA, Richmond, Calif. Filed June 18, 1924. Serial No. 720,863. Renewed Sept. 29, 1926. 2 Claims. (Cl. 33—148.)



1. A measuring instrument comprising a pair of legs pivotally connected intermediate their ends, an arcuate scale arm pivotally connected at one end to the upper end of one of said legs in concentric relation to the pivot thereof, said scale arm being provided at its pivotal end with a major end face and a minor end face in angular relation to one another, yieldable means acting upon said major and minor end faces for retaining the scale arm in an operative concentric position or in collapsed overlying relation respectively with said legs, and an indicator arm formed at the upper end of the companion leg adapted to move in an arcuate path over the scale arm when in an operative position, for indicating the distance between the measuring points of the legs.

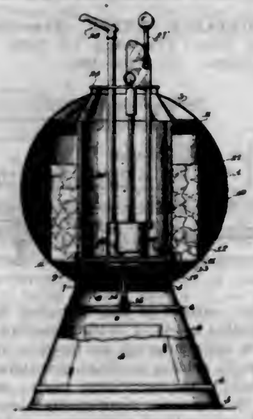
1,626,541. SWIMMING DEVICE. JOHN P. LA ROSA, Port Chester, N. Y. Filed May 21, 1926. Serial No. 110,756. 2 Claims. (Cl. 9—21.)

2. A device of the class described comprising a block of substantially triangular shape, means for fastening the base of the block to the foot of a swimmer, a pair of wings, hinges connecting the wings to the small end of the block, each wing having a beveled inner end for engaging the inclined sides of the block and one of the hinge parts having a projection for engaging the other hinge part for limiting the rearward movement of the wings.



1,626,542. HYDRAULIC BRAKE. ELVIN L. LARSON, Aberdeen, Wash. Filed Apr. 30, 1926. Serial No. 105,803. 4 Claims. (Cl. 188—92.)

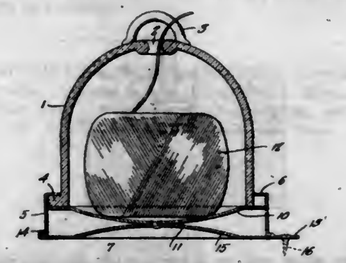
1. In a device of the class described, a rotatable gear ring having internal teeth, a housing for mounting the gear ring and providing an annular channel, chambers communicating with the channel, pinions mounted in the chambers and meshing with the gear ring, valve casings having ports communicating with the chambers on opposite sides of the axis of each pinion, and a valve within each valve casing and adapted to control the passage of material thru the chambers and valve casings, incident to the rotation of the gear ring and pinions.



1,626,543. WRAPPING DEVICE FOR IRREGULARLY-SHAPED DELICATE OBJECTS. OTTO LAUENSTEIN, Wernigerode, Harz, Germany. Filed Aug. 25, 1925, Serial No. 52,411, and in Germany Aug. 29, 1924. 9 Claims. (Cl. 93—5.)

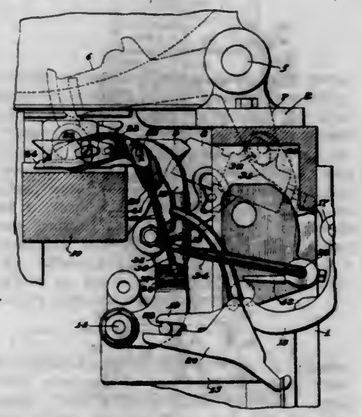
5. In a wrapping device in combination, movable guiding means for the object to be wrapped, means for placing a flexible wrapper on the object, while on the guiding means, pairs of rockably and yieldably mounted rollers

rotating in opposition to the guiding means and having a coating of bristles thereon adapted to gently force and smooth the wrapper into close contact with the object.



1,626,544. BEVERAGE DISPENSER. DANES LORANT, Shreveport, La. Filed June 28, 1926. Serial No. 119,130. 1 Claim. (Cl. 242—146.)

A dispensing apparatus of the character described comprising a base, a container supported upon said base, said container comprising a sheet metal spherical jacket, a cylindrical partition arranged within said jacket and insulated therefrom, forming a cooling chamber, a bottom for said cooling chamber and insulated from said jacket, a perforated flange formed with said bottom, said bottom adapted to support a beverage containing jar, a double wall cover for said jacket having an air space therein adapted to communicate with said chamber, a dispensing device supported by said cover and adapted to extend within the jar arranged within said cooling chamber, and a drain pipe leading from the lower end of said chamber and adapted to extend within said base substantially as and for the purpose specified.

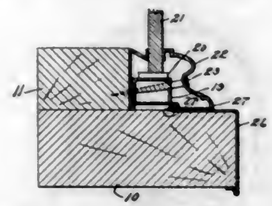


1,626,545. TWINE HOLDER. CARL MARCH, Chicago, Ill. Filed July 10, 1926. Serial No. 121,700. 4 Claims. (Cl. 211—7.)

3. A ball twine holder including a circular base, having an upper inwardly directed flange which is notched, and which flange, is outwardly bulged to provide an inner depression, a transparent dome having its lower edge provided with outturned fingers to be received in the notches and to be likewise received in the depressions when the

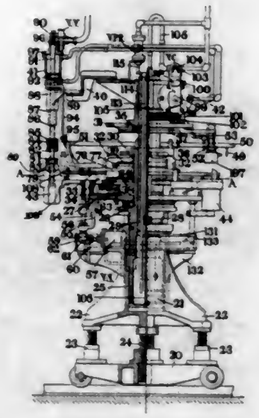
dome is turned on the base, a disc freely received in the base, said disc having a central dished portion, and an arched spring member connected with the base and centrally engaging the disc for urging the same into frictional contact with the fingers of the dome.

1,626,546. SHUTTLE-FEELER THREAD PARTER AND CLAMP. FREDERICK W. MATHIS, Lynchburg, Va., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 27, 1926. Serial No. 144,462. 6 Claims. (Cl. 139—267.)



1. In a filling replenishing loom, the combination of the transferrer, a rock shaft connected to and actuated by movement of the transferrer, a shuttle feeler thread parter and clamp, an arm extending from the rock shaft and connections secured to the arm and thread parter and clamp acting positively to open the parter and clamp as the shuttle feeler moves to thread parting and clamping position and acting yieldingly to close the parter and clamp to part and clamp the filling extending from the outgoing filling carrier upon transfer of filling.

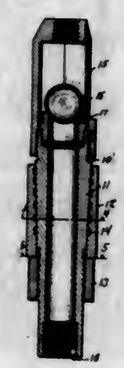
1,626,547. VENTILATING SASH. EDWARD FRANCIS MCHUGH, Kingston, Pa. Filed Feb. 25, 1925. Serial No. 11,569. 2 Claims. (Cl. 20—56.4.)



1. A ventilating window sash, a back member secured to the window backing stop, a raised cushion portion horizontally disposed and formed with the lower edge of the back member, said cushion portion terminating at its forward edge in a crimped downwardly extending supporting leg and also with a supporting leg at its juncture with the back member, a sill covering for the sash and receiving the forward supporting leg of the cushion portion, a substantially inverted U-shaped setting block mounted upon the cushion portion, resilient means car-

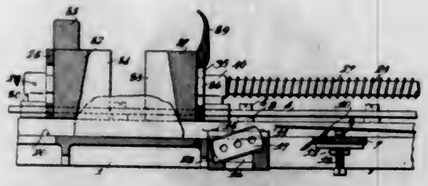
ried by said block and adapted for receiving the lower edge of a plate glass, and an outer moulding secured to the backing stop and mounted upon the sill covering in a manner whereby the upper portion of said moulding en-

gages the glass, and its lower portion disposed relatively with the crimped downwardly extending supporting leg to prevent upward and rear movement of the lower portion.



1,626,548. MACHINE FOR MAKING BOTTLES OR OTHER ARTICLES OF GLASS. ALEXANDER MCNISH, London, England, assignor of one-half to The Automatic Bottle Machine Corporation, Limited, London, England. Filed Apr. 15, 1926, Serial No. 102,261, and in Great Britain Apr. 6, 1925. 12 Claims. (Cl. 49—5.)

1. A machine for making bottles or other articles of glass of the character described, comprising a support, a table mounted for rotatable and vertical sliding movement on the support, a plurality of parison and blow moulds mounted on the table, means for effecting a gathering of glass in the desired parison mould, cooperative clutch members mounted respectively on the table and on the upper part of the support, and valve controlled pressure operable means for raising the table on the support to effect engagement of the clutch members so that the table may be partially rotated when elevated.

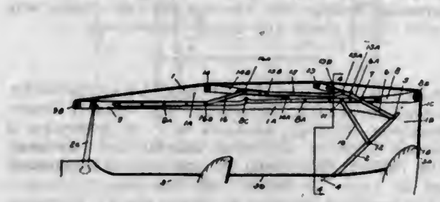


1,626,549. STANDING VALVE. ARTHUR N. MILLER, Henryetta, Okla. Filed May 17, 1926. Serial No. 109,763. 2 Claims. (Cl. 103—229.)

1. A standing valve for fluid pumps comprising a tubular open ended body having a check valve member for controlling the passage of fluid therethrough and provided with a portion of external tapered form, and a metallic packing ring having a tapered bore and fitted on the tapered portion of the body whereby longitudinal movement of the packing ring relative to said tapered portion of the body will cause expansion of said packing ring into engagement with the surrounding wall of a working barrel opening, said packing ring comprising an endless sleeve of relatively soft metallic material having

a series of circumferentially extending annular internal grooves for reducing friction between the packing ring and the tapered body portion and weakening the packing ring to facilitate its expansion.

1,626,550. VEGETABLE CUTTER. FREDERICK H. MILLER Portland, Oreg. Filed Aug. 13, 1926. Serial No. 129,017. 6 Claims. (Cl. 146—168.)

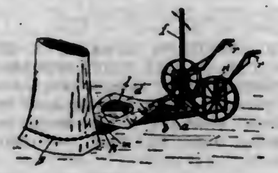


1. In vegetable cutters of the character described, a base frame including a bed, a cutting mechanism carried by the bed, slide rails mounted on the base frame above the bed, a vegetable holding carriage operatively mounted on the slide rails and comprising means continuously tending to feed the vegetable downwardly toward the base to be engaged by the cutting mechanism, said last named means comprising a sectional holding block having inclined walls and yieldable means for forcing said blocks toward each other with the vegetable between them.

1,626,551. COLLAPSIBLE VEHICLE TOP. HAROLD GORDON MILLER, Homer, N. Y., assignor to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed Dec. 30, 1925. Serial No. 78,352. 7 Claims. (Cl. 296—116.)

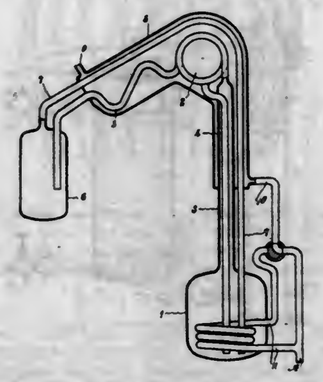
2. In a collapsible top frame for vehicle bodies and the like, the combination of a bipartite main bow comprising an outrigger hoop section and a cantilever hoop section, the latter having a pair of side-rails pivotally adjoined to the legs of the outrigger hoop and adapted to extend in substantial alignment therewith when raised over the body; a set of support standards pivotally connected to the respective sides of the body, the upper ends of the standards being kept below and spaced from the raised side-rails; a guide-link for each side-rail which link is pivoted to its respective rail intermediate the

rail ends and projects upwardly beyond said raised rail to serve as an extension, while another portion of the guide-link is pivotally connected to the end portion of its support standard; a brace-link for each side-rail which link is pivotally attached to its adjacent standard between the aforesaid guide-link pivot and the body pivot of the standard and also pivoted to its side-rail forwardly of



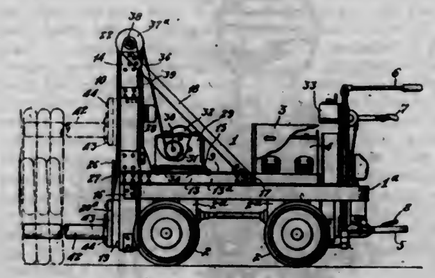
the guide-link pivot, said guide and brace links with their respective side rail and standard constituting a polygon type of linkage adapted to conjointly guide the cantilever section into collapsed position alongside its respective support standard; a supplemental bow bridging said side-rails, the legs of said bow being pivotally connected to the respective extensions; and link means interconnecting the supplemental bow with the outrigger section.

1,626,552. FOUNTAIN SOLDERING IRON. WRIGNOL E. QUILLEN, Pittsburgh, Pa., assignor of one-third to Frances Spitz, Pittsburgh, Pa. Filed July 10, 1925. Serial No. 42,804. 2 Claims. (Cl. 113—109.)



1. In a soldering iron, a head provided with a reservoir for reception of molten solder and with an outlet duct communicating with said reservoir, the head having a neck extending from its upper end and forming a continuation of said reservoir, the upper end of said neck being countersunk to form a valve seat, a barrel secured about the neck and provided with an opening adjacent the upper end of the neck and inclined downwardly and inwardly of the same, a valve slidable in the barrel toward and away from the neck and adapted for seating therein, and means for moving said valve into and out of operative position.

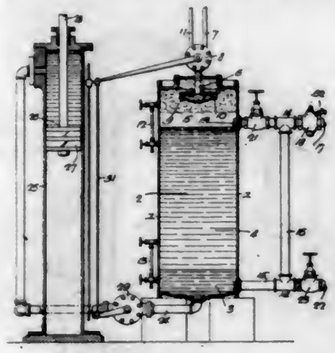
1,626,553. PORTABLE TREE-FELLING SAW. ALBERT RADTKE, Berlin, Germany. Filed June 3, 1924, Serial No. 717,505, and in Germany May 5, 1923. Renewed Dec. 14, 1926. 1 Claim. (Cl. 143—69.)



A portable tree-felling saw of the type described comprising in combination with the movable frame and with the saw blade having a large aperture, two arms hingedly mounted under said saw frame, a spring for pulling said arms together, a spring above said arms, a bag attached to said last mentioned spring and bows for holding said bag, said last mentioned spring being pressed by said arms against the tree to be felled.

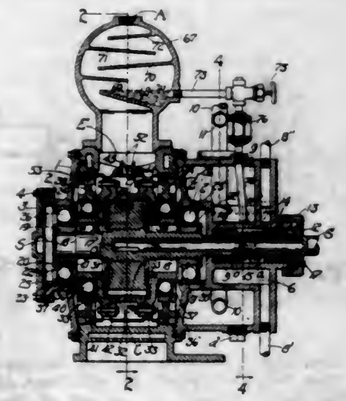
1,626,554. ABSORPTION REFRIGERATOR. LUDWIG REEHSING, Bremen, Germany, assignor to Bror Pålsson, Malmo, Sweden. Filed Apr. 19, 1926, Serial No. 103,087, and in Germany Mar. 3, 1926. 7 Claims. (Cl. 62—118.)

1. In a valveless absorption refrigerating apparatus, comprising a closed circulation system having a generator-absorber, separator, condenser and evaporator, the combination of a vapor discharge conduit leading from said generator-absorber to said separator and a water condensate drain conduit leading from said separator to said generator-absorber, said conduits for a part of their length arranged to form a heat interchanger, the water condensate being warmed therein prior to its return to the generator-absorber and the vapor discharge conduit being cooled for effecting preliminary separation of a part of the water in the vapor from said generator-absorber discharged through said conduit.



1,626,555. INDUSTRIAL TRUCK. EDWARD H. REMDE, Cleveland, Ohio, assignor to The Baker-Raulang Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 11, 1921, Serial No. 451,622. Renewed Jan. 27, 1927. 6 Claims. (Cl. 214—65.)

1. In apparatus of the class described, the combination with a truck frame and wheels for said frame, of a pair of vertical guides disposed at one end of the frame, an elevating member slidably supported by said guides and provided on its face with seats, a lifting device comprising a base member removably secured to said seats and a relatively long narrow element secured at one end to

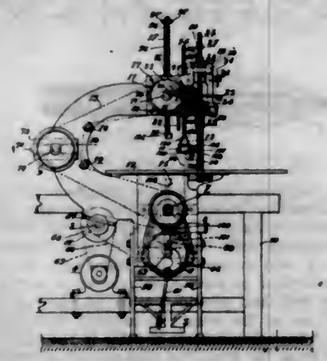


said base member and extending in an endwise direction therefrom for projection into or through a hollow body, and mechanism for raising and lowering said elevating member.

1,626,556. STEAM HYDRAULIC SYSTEM. WILLIAM H. RIDGWAY, Coatesville, Pa., assignor to William H. Ridgway and Ellis B. Ridgway, Coatesville, Pa. Filed June 1, 1923. Serial No. 642,800. 8 Claims. (Cl. 138—14.)

1. In combination, a vertically positioned cylinder adapted to have superposed layers of water and oil leaving a space between the upper surface of the oil and the upper end of the cylinder, an overflow-pipe extending from the portion of said tank containing said water upwardly to the desired level of the upper surface of said oil, a valve controlled pipe containing a fluid medium under pressure opening into said space, and a spring loaded check valve positioned in said over-flow pipe and operable to close the same only when said fluid medium is admitted to said space.

1,626,557. AIR COMPRESSOR OR PUMP. WALTER G. E. ROLAFF, Belleville, Ill., assignor, by direct and mesne assignments, to Rotary Compressor Company, Belleville, Ill., a Corporation of Illinois. Filed Mar. 13, 1918. Serial No. 222,126. 28 Claims. (Cl. 230—30.)



1. In a compressor of the character described, a rotary piston, a rotary cylinder therefor mounted eccentrically thereto and having a portion of its inner wall engaging a portion of the peripheral wall of the piston, the remaining portions of said walls being spaced apart to form a compressing chamber between them, suitable members carried by the cylinder at opposite ends thereof, and means interposed between said members and the adjacent ends of the cylinder and piston and operating under a differential of gas pressure for closing the ends of the compressing chamber and effecting gas tight joints with the ends of the piston and cylinder respectively.

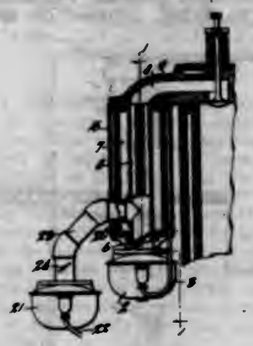
1,626,558. ART OF MAKING BISALKYL-XANTHOGENS. ALBERT ROTHMANN, Heidelberg, and HELMUT STEIN, Mannheim, Germany, assignors to C. F. Boehringer & Soehne G. m. b. H., Mannheim-Waldhof, Germany. Filed Dec. 12, 1924, Serial No. 755,555, and in Germany Jan. 28, 1924. 10 Claims. (Cl. 260—16.)

1. The process of purifying an impure bisalkyl xanthogen which consists in passing a current of an indifferent gaseous agent through the same.

10. As a new chemical product, purified bisethylxanthogen which is odorless, readily soluble in ether, carbontetrachlorid and benzene, difficultly soluble in cold alcohol and whose melting point is between 31° and 33°, and approximating 32°, centigrade.

1,626,559. UNIVERSAL WOODWORKING MACHINE FOR CARPENTERS, JOINERS, AND CABINET-MAKERS. HONORÉ ROZIER, Marseille, France. Filed Nov. 2, 1925, Serial No. 66,352, and in France Nov. 10, 1924. 5 Claims. (Cl. 144—1.)

1. A wood-working machine comprising, in combination, a foot or power-propelled speed gear having a driven pulley thereon, a second pulley combined with a tensioning device, a third pulley, said pulleys having rubber bands thereon, and jockey-pulleys whereby a driving belt travelling over said pulleys is kept clear of the work-supporting table and over which pulleys, excepting the jockey-pulleys, a bandsaw can run; there being a saw greasing device situated adjacent the saw.



1,626,560. TRANSMITTING APPARATUS UTILIZING THE PRINCIPLE OF THE WHEATSTONE BRIDGE. EUGÈNE SCHNEIDER, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint Stock Company of France. Filed Jan. 4, 1922, Serial No. 526,984, and in France June 15, 1921. 6 Claims. (Cl. 177—337.)

1. A transmitting system based on the principle of the Wheatstone bridge comprising transmitting and receiving station bridge resistances forming the arms of said bridge, connections between said stations to complete said bridge including a bridge wire having an indicator therein, compensating resistances in said bridge wire, and indicating means at each station including means for varying the

relation of the resistances in the bridge arms and for changing the amount of compensating resistance in said bridge wire in accordance therewith to cause the deviations of the indicator to remain proportional to the displacements between the indicating means of the transmitting and receiving stations.

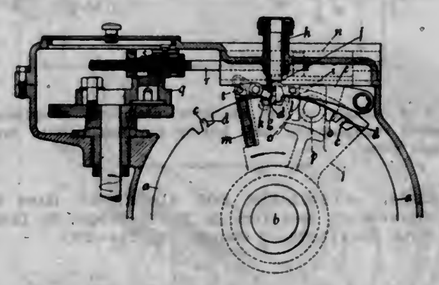
1,626,561. HEAVY-OIL VAPORIZER. DAVID T. SCOTT, Mitchells Island, Vancouver, Canada. Filed Mar. 13, 1924, Serial No. 699,088, and in Canada Dec. 24, 1923. 3 Claims. (Cl. 123—122.)

1. In an internal combustion engine, the combination with a carburetter, of a chamber through which the exhaust from the engine is passed, said chamber having a jacket space surrounding it and a compartment within the chamber, which compartment is connected by tubes to the jacket space and to the air inlet of the carburetter, means for admitting air to the jacket space, means for heating oil in the jacket space of the chamber, and means for delivering the gaseous mixture of oil vapor and air from the carburetter separately through the chamber to the engine intake.

1,626,562. PROCESS FOR MAKING THERAPEUTIC MATERIALS. ERNST SILTEN, Berlin, Germany. Filed Dec. 5, 1924. Serial No. 754,197. 28 Claims. (Cl. 167—7.)

1. Process for the production of products available for therapeutical purposes, which comprises dissolving derivatives of 2-arylcinnoline 4-carboxylic acid anhydrides in a solution of hexamethylene tetramine in such proportions that there is present in the product more than one molecule of hexamethylene tetramine to each molecule of acid anhydride.

18. A new product suitable for therapeutical use and especially for intravenous application, being an aqueous solution comprising a hexamethylene tetramine derivative of 2-arylcinnoline 4-carboxylic acid containing substantially six molecules of hexamethylene tetramine for each molecule of acid present.

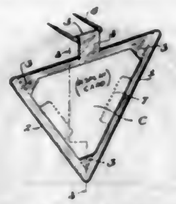


28. A new product suitable for therapeutical use and especially for intravenous application, being an aqueous solution comprising a hexamethylene tetramine derivative of phenylcinchophenic acid containing substantially six molecules of hexamethylene tetramine for each molecule of acid present, the proportion of water by weight relatively to the hexamethylene tetramine being as 73 is to 27.

1,626,563. PARACHUTE. FRIEDRICH SIMON, Freiburg-Breisgau, Germany. Filed Oct. 1, 1925, Serial No. 59,874, and in Germany Nov. 12, 1924. 1 Claim. (Cl. 244—21.)

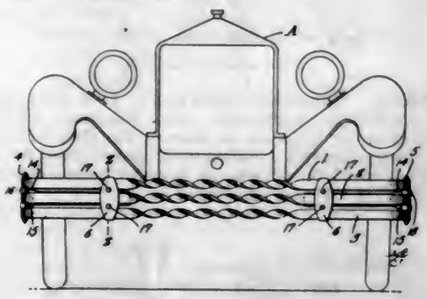
A parachute comprising a pneumatic tyre fixed on the edge of the parachute and filled with compressed air to such an extent that the moderately inflated tyre may be folded up to adapt itself to the closed parachute.

1,626,564. INDEXING MECHANISM FOR GRINDING AND OTHER MACHINES. JOHN WILDSMITH SHARRY, Birmingham, England, assignor to The Gear Grinding Company Limited, Birmingham, England. Filed Jan. 2, 1926, Serial No. 79,046, and in Great Britain May 25, 1925. 3 Claims. (Cl. 90—56.)



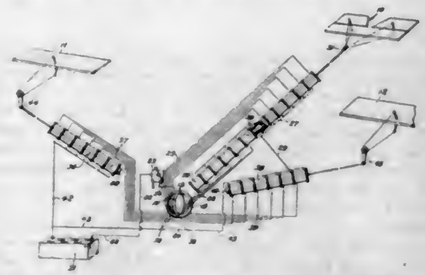
1. In indexing or dividing mechanism for grinding and other machines, the combination of an indexing or dividing plate formed with a toothed periphery, one face in each tooth being disposed radially to the centre of the plate, a spindle on which the plate is mounted, a positioning pawl formed with a flat end adapted to coact with the radial face of each of the teeth, a stationary pivot for the positioning pawl, a stop which limits the extent to which the positioning pawl can move into engagement with any tooth, an oscillatory arm carrying an actuating pawl adapted to move the plate from one position to the next, means for reciprocating the arm, said means including a spring which enables the actuating pawl to press the plate with definite pressure against the positioning pawl, and a cam for intermittently disconnecting the positioning pawl from the plate, substantially as described.

1,626,565. MARKING EXHIBITOR. EDWARD FRAGLER STANTON, Los Angeles, Calif. Filed July 9, 1926. Serial No. 121,464. 2 Claims. (Cl. 40—17.)



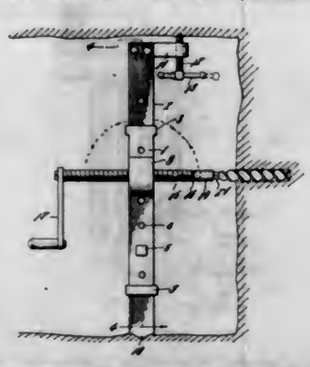
1. A device of the character described comprising a frame tapered towards one end thereof, webs integral with and spanning the corner portions of the frame, ears integral with the inner marginal portions of the frame sides and arranged laterally and inwardly of said webs

adapted to have supporting engagement with adjacent sides of a card, a flange upon the normally upper and remaining side of the frame bent inwardly whereby to lock



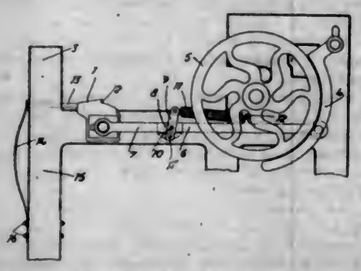
the card received between the webs and ears against longitudinal displacement from the frame, and attaching means connected to the normally upper side of the frame.

1,626,566. BUMPER. CHARLES EDWARD STEIN, Brea, Calif. Filed July 26, 1926. Serial No. 125,031. 4 Claims. (Cl. 293—55.)



1. A bumper of the character described, comprising spaced superimposed bars having portions twisted into auger form.

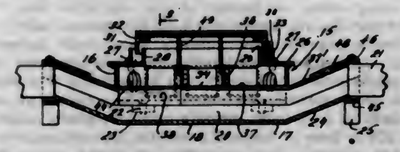
1,626,567. STABILIZER FOR AIRCRAFT. HANS S. STEINBRECHT, New York, N. Y. Filed May 26, 1926. Serial No. 111,829. 2 Claims. (Cl. 244—29.)



1. In combination with the elevator of an aircraft, actuating means therefor, a hollow annular ring adapted to be mounted in axial alignment with the center of gravity of an aircraft, two sets of contacts carried by said ring and insulated therefrom, each set being respectively provided on opposite sides of the axial center of said ring, two sets of solenoids arranged in axial alignment with each other and arranged in electric circuits with the respective sets of contacts, a sliding core normally positioned between the sets of solenoids and operatively connected with said actuating means, and a conductor element movable within said hollow ring and responsive to a longitudinal deviation of said ring with respect to its axial center for closing the circuits to energize the respective solenoids to move said core into the center of the magnetic field set up by the energized solenoids, a pair of ailerons, individual actuating means for each of said ailerons, a second annular ring stationarily mounted at right angle to the axis of said first ring, two sets of contacts on said ring and forming a unitary body therewith, each disposed on opposite sides of its axial center and insulated therefrom, a set of axially aligned solenoids arranged in an electric circuit with each set of contacts, a sliding core movable through the solenoids of each set and respectively connected with the individual actuating mechanism, and conductor elements movable within said last hollow ring on opposite sides of its axial center for engagement with the contacts of the respective sets for closing the circuits to energize the respective solenoids whereby to move the respective cores into the center of the magnetic field set up by the energized solenoids substantially as and for the purpose specified.

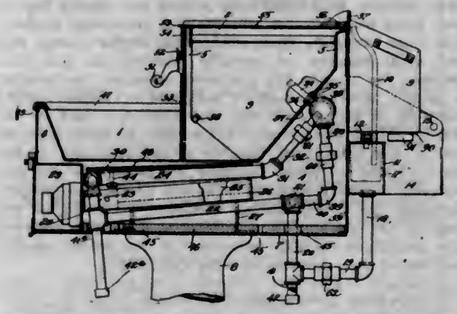
1,626,568. COAL DRILL OR BORING MACHINE. WILLIAM JAMES THOMAS, Coverdale, Pa. Filed Feb. 24, 1926. Serial No. 90,383. 1 Claim. (Cl. 255—46.)

A boring machine comprising a telescopic, upright, means for holding the parts of the upright in adjusted position, means for clamping the upright between the floor and ceiling of a tunnel, a bracket having a threaded hole therein, means for rotatably connecting the bracket with the upright, such means also permitting vertical adjustment of the bracket on the upright, a screw shaft engaging the threaded hole in the bracket, said shaft having each end square, a handle having square holes therein for receiving either end of the shaft, a bit having a square stem and a coupling having a square bore for fitting over the stem of the drill and either square end of the screw shaft.



1,626,569. LOOM. JACINTO VENDRELL, Barcelona, Spain. Filed May 29, 1924, Serial No. 716,728, and in Spain Mar. 7, 1924. 2 Claims. (Cl. 139—346.)

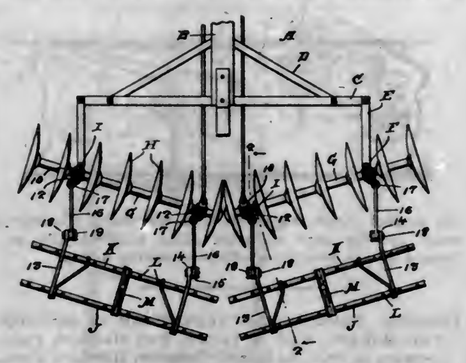
1. In looms having fixed reeds, a crank shaft, and a frog adapted to be engaged by a stop rod dagger or finger to actuate the stopping mechanism, the combination of



stopping mechanism comprising a brake shoe, means such as a fly wheel mounted upon the crank shaft of the loom to cooperate with the said brake shoe, a draw rod connecting said frog and said brake shoe, the said draw rod consisting of two parts movable longitudinally with respect to one another, means of connection between the parts of the said draw rod providing lost movement between the said parts, and means comprising a spring by which the relative movement of the parts of the said draw rod causes the gradual application of pressure by the brake shoe until the lost movement between the parts of the draw rod is taken up, substantially as hereinbefore described.

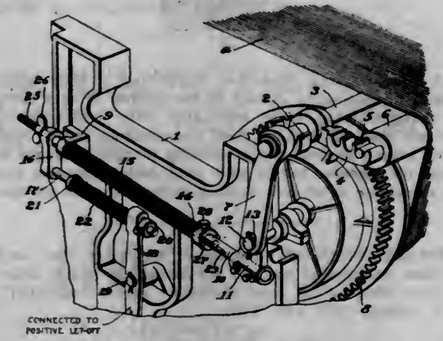
1,626,570. ELECTRICAL WIRING SYSTEM. HERVEY S. WALKER, Ardmore, Pa. Filed May 15, 1926. Serial No. 109,248. 22 Claims. (Cl. 247—3.)

1. A concealed wiring system for installation in the floor of a concrete building, comprising a network of ducts extending in different directions and lying within the floor at substantially the same level, boxes at the intersections of the ducts, each box having a body with openings for entrance of respective ducts and a neck opening substantially to the finished surface of the floor, and means including a cover for the neck and portions within the box body and neck forming transverse enclosed channels between the respective duct entrances whereby the channels have a cross-section substantially as great as the respective ducts and the over-all height of the box body is substantially less than twice the height of a single duct.



1,626,571. SHOE-BOTTOM-FILLING MACHINE. NORMAN J. WESTHAVER, Cambridge, Mass., assignor to George H. Maxwell, Phoenix, Ariz. Filed July 1, 1924. Serial No. 723,574. 30 Claims. (Cl. 18—1.)

1. In a machine of the kind described, the combination with a filler softening reservoir adapted to handle shoe-bottom filler which prior to use is normally self-sustaining but sluggishly fluid under moderate heat, of a heating unit or source of heat, a closed steam generator in the influence of said unit, said generator being formed of separate pipes, and means for delivering the steam from said generator into the filler within said reservoir.

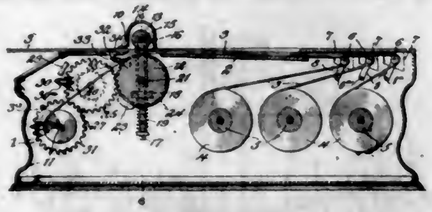


1,626,572. DRAG ATTACHMENT FOR DISK CULTIVATORS OR HARROWS. JOHN D. WIESE, Manson, Iowa. Filed Dec. 22, 1925. Serial No. 77,058. 2 Claims. (Cl. 97—8.)

1. In combination with a disk harrow including sets of disks adapted to be arranged at an angle, toothed harrows trailing behind the disk harrows in parallel relation thereto, the toothed harrows including forwardly extending arms having head portions at their forward ends, other arms vertically pivotally adjustably connected with

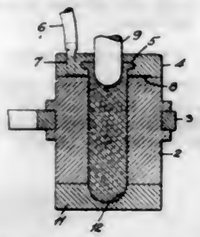
the heads at the forward ends of the first named arms, links carried by the second named arms, and connecting hooks mounted on the disk harrow structure and detachably engaged by the links.

1,626,573. LET-OFF MECHANISM FOR LOOMS. HARRY A. DAVIS, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Aug. 17, 1926. Serial No. 129,671. 7 Claims. (Cl. 139—110.)



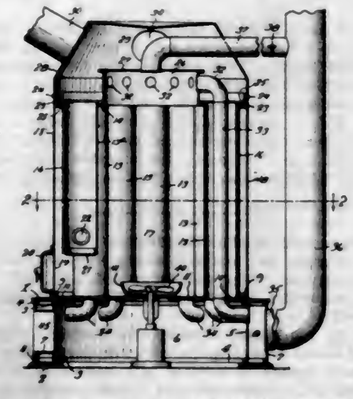
1. In a positive let-off mechanism for looms, the combination of a rocking whip roll carrier having an arm, and means between said arm and the let-off mechanism for controlling the rate of let-off, comprising, a tubular tension rod connected thereto, a movable abutment on the tension rod, a tension spring for said tension rod, a spring tension adjusting rod within the tubular tension rod having a part engaging the movable abutment, and means for adjusting the spring tension adjusting rod.

1,626,574. AUTOMATIC REGISTER. PHILIP A. JACKSON, Atlanta, Ga., assignor to The Egry Register Company, Dayton, Ohio, a Corporation of Ohio. Filed Feb. 16, 1922. Serial No. 537,079. 2 Claims. (Cl. 282—16.)



1. In an autographic register for feeding a plurality of paper sheets having spaced series of perforations, feeding rollers, means to actuate said rollers to feed said sheets, means to separate said rollers to interrupt the feeding of said sheets, means to automatically align said sheets comprising pins to receive the perforations in the sheets after they have passed through the feeding rollers

and rollers adapted to draw the sheets back against said pins during the separation of said feeding rollers, the several steps in the operation consisting of feeding



the desired length of sheets and realigning the sheets ready for the next operation being automatically performed by one revolution of the actuating means.

1,626,575. FABRICATING GLASSWARE IN SUCTION-FED MOLDS. KARL E. PEILER, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Oct. 14, 1925. Serial No. 62,334. 5 Claims. (Cl. 49—5.)

1. Glass-working apparatus comprising a body mold, means for producing suction in the interior of said mold, a charge-severing knife associated with said mold, a bottom mold adapted to close the charging end of said mold after charging, and a pressing plunger arranged to close the opposite end of said mold during charging and to thereafter enter said mold to press the glass therein.

1,626,576. FURNACE. GEORGE C. WEIDEMAN, Cleveland, Ohio, assignor of one-half to Thomas J. Smith, Cleveland, Ohio. Filed June 18, 1924. Serial No. 720,717. 4 Claims. (Cl. 126—116.)

1. A furnace of the character set forth comprising a combustion chamber including a plurality of conduits each adapted to conduct a fluid to be heated, the upper ends of said conduits being connected with a distributing chamber and the lower ends thereof being connected with a fluid supply chamber, a discharge chamber adjacent said fluid supply chamber and having an outlet, a plurality of pipes communicating with the upper portion of said combustion chamber and disposed within said conduits and connected to said discharge chamber, said pipes being adapted to conduct the heat and products of combustion from the upper portion of said combustion chamber downwardly through said conduits and into said discharge chamber whereby to supply heat to the interior of said conduits and means for heating the exterior of said conduits.

1,626,577. ARTIFICIAL STONE OR MARBLE. LON EDWARD WELCH, Memphis, Tenn. Filed Aug. 17, 1926. Serial No. 129,863. 1 Claim. (Cl. 106—29.)

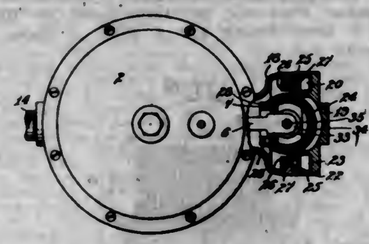
A composition of matter of the character described comprising the reaction product of magnesium oxide and a filler mixed with an aqueous acetic acid including liquid composition containing magnesium chloride and zinc sulphate in substantially the proportions that would result from mixing substantially 1¾ gallons of substantially 2.1 specific gravity zinc sulphate solution with 100 gallons of 1.8 to 2.4 specific gravity magnesium chloride solution, the proportion of liquid composition being sufficient to wet the magnesium oxide.

1,626,578. ENVELOPE. JOSEPH C. WALTERS, Waterbury, Conn. Filed Feb. 16, 1926. Serial No. 88,656. 1 Claim. (Cl. 229—85.)

An envelope including a body portion open at one end and composed of a pair of body members, one of said body members having an extension at the open end of the body, a closure flap integrally joined upon a transverse fold line with the outer end of said extension and adapted to be folded onto the adjacent end of the other body member, an adhesive for joining the closure flap to said other body member when folded, transverse perforation lines extending from side to side of the closure flap and said extension at opposite sides of the fold line between the closure flap and said extension for forming a quickly detachable section composed of folded similar members of the closure flap and extension, and an inwardly folded and return bent tongue integral with an end of said other body member at the open end of the body of the envelope arranged to assume a position between the body members inwardly of the line of perforations for preventing an inclosure contained in the body of the envelope from shifting to a position between the detachable member composed of the folded similar sections of the extension and the closure flap.

1,626,579. PROCESS FOR OBTAINING A CULTURE MIXTURE FOR FERTILIZER PRODUCTION. CARL ARTHUR BAUMGARTEN-CRUSIUS, Dresden, Germany. Filed Feb. 12, 1926, Serial No. 87,942, and in Germany Jan. 23, 1923. 1 Claim. (Cl. 71—10.)

A process of obtaining a culture mixture for fertilizer production, which comprises subjecting a separate lot of decomposing farm soil, horse manure, forest soil and the like to a temperature of approximately 60° centigrade for a period of about 20 minutes in order to completely or partially destroy undesired bacteria, thereupon dividing said separate lot into two portions, sterilizing one of said portions, dividing the second of said portions into two separate parts, maintaining one of said parts under anaerobic conditions and the other part under

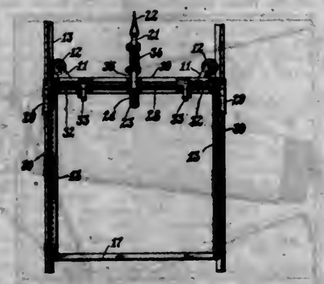


aerobic conditions at a temperature favorable to the development of bacteria, thereupon lixiviating said two parts, adding the resulting liquid to the sterilized portion of said lot, mixing the thus inoculated portions together and adding said mixture to a mixture which contains food for the bacteria, and consists of farm soil, horse manure, beech leaves and peat.

1,626,580. ATTACHING PLUG. THOMAS D. FINIZIO, Yorktown Heights, N. Y. Filed Aug. 11, 1921. Serial No. 491,400. 5 Claims. (Cl. 173—332.)

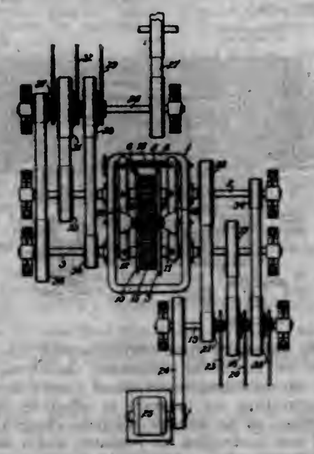
1. A device of the character described comprising a rigid plate having a longitudinal groove therein, guides extending upwardly from the opposite edges of said plate, a movable plate having a longitudinal groove therein registering with the groove in said rigid plate, projections on the opposite edges of said movable plate and working within said guides, and a spring secured at one end to said rigid plate and having its free end engaging said movable plate at a point about midway between the ends of said movable plate, substantially as specified.

1,626,581. GAS REGULATOR. FLOYD GAUNT, MYRON B. REYNOLDS, and RALPH C. HUGHES, Anderson, Ind., assignors to Reynolds Gas Regulator Co., Anderson, Ind., a Corporation of Indiana. Filed Nov. 12, 1926. Serial No. 147,926. 5 Claims. (Cl. 50—26.)



3. In a pressure regulator having a casing provided with a valve housing having an opening in its end wall, a removable cover for said opening, a pressure responsive element, a valve operating lever operatively and detachably connected with said pressure responsive element, a yoke support between the free ends of which the lever is pivoted, said support being detachably mounted in said housing and removable through the opening in the wall thereof.

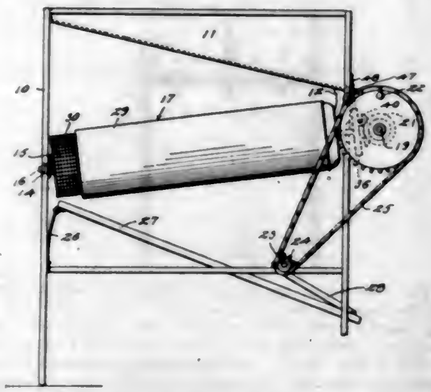
1,626,582. DETACHABLE METAL BUTTON. WARREN F. KAYNOR, Waterbury, Conn., assignor to Waterbury Button Company, Waterbury, Conn., a Corporation of Connecticut. Filed Feb. 20, 1926. Serial No. 89,627. 4 Claims. (Cl. 24—113.)



1. In a hollow button, a shell member having perforations in its top surface, a disc visible through said perforations, said disc having a color matching the garment upon which the button is to be worn, said button being open in its bottom and adapted to be detachably mounted on a common solid button sewed to said garment, said common button lying in contact with said disc and holding it against the perforated top of said hollow button.

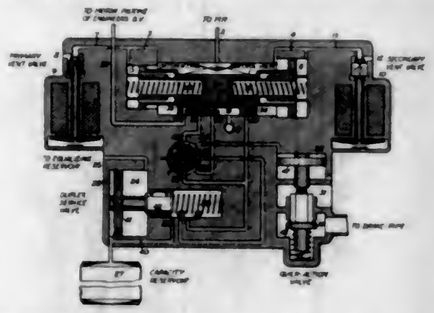
1,626,583. ELEVATOR SAFETY STOP. GERGELY ORDOG, Ellis Island, N. Y. Filed Nov. 24, 1924. Serial No. 751,737. 1 Claim. (Cl. 187—83.)

In a device of the class described, an elevator car, shafts mounted thereon, pawls fixed to the outer end of the shafts, racks fixed adjacent the elevator car, the said pawls being engageable with the racks, a cable connected to the elevator car for operating purposes, means associated with the cable and the elevator car for engaging the pawls against the racks upon the breaking of the cable, arms fixed to the said shafts, and springs co-axial on the shafts, one end of each spring being fixed to a stationary part of the elevator car, and the other end to each arm, the said springs normally helping to urge the pawls into engagement with the racks.



1,626,584. METHOD CONTROLLING THE SPEED OF DRIVEN MEMBERS. PAUL B. REEVES, Columbus, Ind., assignor to Reeves Pulley Company, Columbus, Ind., a Corporation of Indiana. Filed Apr. 5, 1924. Serial No. 704,395. 1 Claim. (Cl. 74—57.)

The method of operating a driven shaft from a driving shaft, having interposed between them a speed changing mechanism including a pair of power shafts, which consists in driving one of said power shafts at a predetermined minimum speed and driving the driven shaft from the second shaft of the transmission, operating said transmission to increase the speed of the second power shaft, then driving said second power shaft direct from

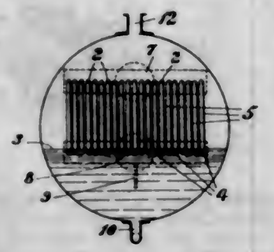


the driven shaft at said increased speed, then driving said driven shaft from the first power shaft of the transmission and operating the transmission to increase the speed of the first power shaft.

1,626,585. GRAIN SEPARATOR. NAFORD B. SANDVIG, Grafton, N. Dak. Filed Dec. 21, 1925. Serial No. 76,760. 2 Claims. (Cl. 209—287.)

1. A driving means including a driven shaft, a peripherally notched wheel fixed on the driven shaft, a gear loosely mounted on the driven shaft, a spring connecting the wheel and gear, projections on the wheel and gear for causing positive driving connection therebetween, and a resiliently held member engaged in the notched wheel for imparting forward increased rotative impulses and stopping movements to the driven shaft.

1,626,586. AUTOMATIC BRAKE-CONTROL APPARATUS. FRANK DESMOND SPRAGUE, Brooklyn, N. Y. Filed Nov. 20, 1923. Serial No. 675,853. 29 Claims. (Cl. 303—18.)



3. In an automatic train control system, the combination with an air brake equipment embodying a brake pipe and an equalizing reservoir, of a vent device to reduce a controlling air pressure to effect an application of the brakes, an air storage reservoir charged from the source of said controlling air pressure, and a vent device having a piston with a connection from one side of the piston to the said storage reservoir, a connection from the other side of the piston to the source of said controlling air pressure and a third connection to the said vent device, and valve means actuated by the piston to control communication between said vent device and that side of the piston which communicates with the said source of controlling air pressure.

1,626,587. ARCTIC OR GAITER. GEORGE C. THOMAS, Malden, Mass., assignor to Converse Rubber Shoe Co., a Corporation of Massachusetts. Filed May 10, 1924. Serial No. 712,346. 5 Claims. (Cl. 36—50.)

1. In a gaiter, the combination with a foot portion, of an instep covering portion extended upwardly to form a bellows tongue, side flaps to which the bellows tongue is attached, foldable over the bellows tongue, a cuff turned downwardly from the upper edges of the side flaps, securing means, carried by one of the flaps and detachably secured to the other flap, for holding the side flaps folded over each other and over the bellows tongue, and a second securing means positioned underneath the cuff for imposing a circumferential restricting force around the upper part of the gaiter, underneath the cuff.

1,626,588. DISTILLATION OF TAR AND THE LIKE. WILLIAM BROWN DAVIDSON, ARTHUR CUMMING MICHIE, and ERNEST WALTER MUDDIMAN, Newcastle-on-Tyne, England. Filed Apr. 23, 1926, Serial No. 104,168, and in Great Britain Apr. 1, 1925. 1 Claim. (Cl. 196—5.)

Apparatus for distilling liquids which froth when heated, comprising a liquid container having an inlet pipe near the bottom, an outlet pipe for maintaining a predetermined liquid level within the container, whereby a vapor space is maintained within the container above the level of the liquid, a plurality of froth disintegrating heating tubes within said vapor space, a plurality of liquid heating tubes positioned slightly below the normal liquid level, each of said heating tubes being directly connected with one of the froth disintegrating tubes, said froth disintegrating tubes having no connections within the container but being connected with a common inlet header exteriorly of the container and said liquid heating tubes having no connections within the container but being connected by a common outlet header exteriorly thereto, whereby a supply of heating fluid may be caused to circulate through said froth disintegrating tubes and also through said immersed heating tubes, the supply of heat being temporarily retarded upon engagement of froth with the froth disintegrating tubes and the heating fluid being discharged from each of said immersed tubes through the common outlet header.

Apr. 5, 1927

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Ointment. Deloney & Company. 243,088; Apr. 5.
Perfume essence, Synthetic. Societe Anonyme Parora. 244,796; Apr. 5.
Perfumes. A. Pillet. 242,064–5; Apr. 5.
Pharmaceutical preparations. Ranier Pharmaceutical Products Co. 243,788; Apr. 5.
Plasters, Corn. N. L. Haas. 244,430; Apr. 5.
Powder, cold cream, rouge, etc., Face and bath. June Days, Incorporated. 244,939; Apr. 5.
Powder, Skin. G. S. Heyer. 241,483; Apr. 5.
Powders, creams, and packs, toilet waters, rouges, etc., Face. Le Maire Perfumeur, Inc. 242,542; Apr. 5.
Powders, Teething. John Steedman & Company. 244,449; Apr. 5.
Remedies for treatment of rheumatism, sciatic, etc., Internal. Pinus Medicine Company. 227,472; Apr. 5.
Salts and buffing compound. Metals Protection Corporation. 243,871; Apr. 1.
Shampoo, hair rinse, hair tonic, etc. Sunland Laboratories Inc. 244,894; Apr. 5.
Soda. Los Angeles Soap Company. 244,164; Apr. 5.
Spasmodic used in the treatment of tabes, pseudotabes, etc. J. D. Riedel Aktiengesellschaft. 242,801; Apr. 5.
Toilet preparations. Lawrence, Incorporated. 242,676; Apr. 5.
Tonic, Hair. R. Martorano. 241,019; Apr. 5.

CLASS 8.

Humidors, ash receivers, and trays, etc. Buckley, Newhall Company. 241,081–2; Apr. 5.

CLASS 10.

Fertilizers. International Agricultural Corporation. 244,303; Apr. 5.

CLASS 11.

Inking ribbons and carbon paper. F. S. Webster Company. 244,585; Apr. 5.

CLASS 12.

Asphalt compound. Pioneer Paper Company. 243,965. Apr. 5.
Asphalt emulsion. Sterling Products Company. 243,509; Apr. 5.
Building blocks, tile, etc. Atlantic Gypsum Products Company. 243,639; Apr. 5.
Building felts. Lockport Paper Company. 244,161; Apr. 5.
Cement. Standard Fuel Engineering Company. 243,566; Apr. 5.
Cement. West Penn Cement Company. 242,552; Apr. 5.
Doors, trim moldings, etc. Cadwallader-Gibson Co. 228,593; Apr. 5.
Lumber. Darling-Singer Lumber Co. 243,689; Apr. 5.
Lumber. W. L. Kann. 242,786; Apr. 5.
Lumber and planing-mill products. Weyerhaeuser Forest Products. 242,073; Apr. 5.
Plastic material. Sterling Products Company. 243,508; Apr. 5.
Structural-steel members. American Finance & Commerce Company. 243,680; Apr. 5.
Wall and plaster board and joint-filling material. Pennsylvania Gypsum Company. 241,835; Apr. 5.

CLASS 13.

Faucets, Wooden. N. Zohman. 244,643; Apr. 5.
Traps, Drum. Wensley Metal Products Company. 243,676; Apr. 5.
Tubing, gutter hangers, rivets, etc., Brass and copper. John H. Heimbuecher Metals Co. 243,057; Apr. 5.

CLASS 14.

Lead, roof flanges, solder, etc., Pig. Eagle-Picher Lead Company. 241,704–6; Apr. 5.

CLASS 15.

Candles. Smith & Nichols, Incorporated. 244,575; Apr. 5.
Candles. Smith & Nichols, Incorporated. 244,577; Apr. 5.
Gasoline, kerosene, lubricating oil, etc. Mayflower Oil Company. 226,816; Apr. 5.
Motor fuel oils. Lemont Refining Company. 243,058; Apr. 5.
Oils, Cutting. E. F. Houghton & Co. 244,401; Apr. 5.

CLASS 16.

Lacquers and paint enamels. H-O Lacquer Mfg. Co. 240,855; Apr. 5.
Paint. Victor Engineering Corporation. 244,037; Apr. 5.
Paint, Semigloss enamel-finish. Wadsworth-Howland Company. 242,401; Apr. 5.
Paints and paint thinner, etc, Textile. G. Reis & Bro., Inc. 244,242; Apr. 5.
Paints, paint enamels, lacquers, paint oils. V. C. Wogoman. 244,906; Apr. 5.
Paints, varnishes, stains, and paint enamels. Roberts, Glazebrook & Co. Ltd. 234,872; Apr. 5.

CLASS 19.

Automobiles, Passenger-carrying. Falcon Motors Corporation. 243,802; Apr. 5.

Automobiles, Passenger-carrying. Willys-Overland Company. 243,837; Apr. 5.
Car doors and fixtures therefor, Steel. Youngstown Steel Door Co. 238,936; Apr. 5.
Wheelbarrows and concrete carts, Tubular and contractors'. Akron Barrow Company. 224,269; Apr. 5.

CLASS 21.

Batteries, battery chargers, and parts thereof, Storage. Automotive Battery Corp. 236,190; Apr. 5.
Battery terminals, plugs, screws, and bushings, Storage-. Imperial Brass Manufacturing Company. 235,303; Apr. 5.
Electrical fittings. Erie Malleable Iron Company. 226,481; Apr. 5.
Electrical transformers and equipment therefor. Westinghouse Electric & Manufacturing Company. 233,341; Apr. 5.

CLASS 22.

Game, Card. National Golf Service Co. 244,087; Apr. 5.
Games, Card. Associated Educators Syndicate. 243,917; Apr. 5.
Golf ball. Druggists' Supply Corporation. 244,856–8; Apr. 5.
Golf balls. Arlington Rubber Company. 243,188; Apr. 5.
Golf balls. Draper-Maynard Company. 244,606; Apr. 5.
Golf clubs, balls, bags, golf irons, etc. Donaldson Manufacturing Co. 239,798; Apr. 5.
Toy figure, Mechanical. Miller-Smith, Inc. 244,173; Apr. 5.
Toy miniature lumber. Johnson Lumber Company. 243,762; Apr. 5.
Toys, Computing. Dayton Friction Toy Company. 244,056; Apr. 5.

CLASS 23.

Mail-inserting machines. Insertograph Co. 244,936; Apr. 5.
Plows and harrows. Emerson-Brantingham Corporation. 244,682; Apr. 5.
Razor blades, Safety-. R. H. Macy & Co. 239,257; Apr. 5.
Sawmill and mining machinery, accessories, and parts thereof. Prescott Company. 239,379; Apr. 5.
Sharpener, Magnetic razor-blade. Everkeen Corporation. 244,993; Apr. 5.
Steel dies and bronze molds. P. Cricchio. 242,709; Apr. 5.
Tractors, road graders, etc. Hadfield-Penfield Steel Company. 243,757; Apr. 5.
Transmission units, Hydraulic. Oilgear Company. 244,511; Apr. 5.

CLASS 27.

Clocks. H. S. Benedikt Company. 244,208; Apr. 5.
Mainsprings for clocks and watches. Louis Perret et Fils. 221,766; Apr. 5.
Watches, clocks, and their movements. M. M. Mirabeau. 244,711; Apr. 5.
Watches, watch movements and parts of the same. S. Weissman Co. 242,932; Apr. 5.

CLASS 29.

Brushes. John L. Whiting-J. J. Adams Company. 226,404–5; Apr. 5.

CLASS 31.

Refrigerators and refrigerating machinery. Sanat Refrigerating Company. 243,727; Apr. 5.
Refrigerators and refrigerator parts. Leonard Refrigerator Company. 234,961; Apr. 5.
Refrigerators, refrigerating apparatus and ice making machines, and parts thereof. B. Pilsson. 241,633; Apr. 5.

CLASS 32.

Bed springs. E. Lieberman. 243,275; Apr. 5.
Cushions, Leather. Moroccan Estates. 239,818; Apr. 5.

CLASS 33.

Glass, Sheet. Western Glass Company. 228,878; Apr. 5.
Glass, silvered and unsilvered, Flat. Williamsport Mirror and Glass Company. 231,223; Apr. 5.
Glassware. Grasfabriken und raffinieren Josef Inwald A. G. 242,229; Apr. 5.

CLASS 34.

Burners and apparatus associated therewith, Liquid-fuel. L. B. Hertzig. 244,866; Apr. 5.
Burners and heaters, Oil. Super Oil Heater Company. 226,797; Apr. 5.
Lanterns, and the burners and metal parts thereof, Oil-burning. R. E. Dietz Company. 244,550; Apr. 5.
Ranges. Tennessee Stove Works. 244,033; Apr. 5.
Ranges, plates, heaters, and stoves, Gas. Geo. D. Roper Corporation. 219,912; Apr. 5.

CLASS 35.

Belting, transmission and brake lining, Woven. Scandinavia Belting Company. 243,174; Apr. 5.
Piston rings. Wilkening Manufacturing Company. 244,841; Apr. 5.

CLASS 36.

Sound recording and reproducing machinery and appurtenances thereto and parts thereof, etc. Victor Talking Machine Company. 242,360; Apr. 5.
Talking machines, Reproducers and needles for. Everybody's Talking Machine Company. 242,716; Apr. 5.
Talking machines, Springs for. Everybody's Talking Machine Company. 242,715; Apr. 5.
Violin and cello strings. Simpson & Frey, Inc. 243,025; Apr. 5.

CLASS 37.

Bank supplies. Continental Bank-Supply Company. 228,744; Apr. 5.
Paper, Italian handmade and handlaid writing. Japan Paper Company. 215,209; Apr. 5.

CLASS 38.

House organ. Pacific Egg Producers Cooperative, Inc. 244,367; Apr. 5.
House organs. Gilmour, Rothery & Co. 244,497; Apr. 5.
Magazine. Dell Publishing Company. 242,416; Apr. 5.
Magazine. Glen-Kel Publishing Co. 244,150; Apr. 5.
Magazine. Macfadden Publications Incorporated. 244,165; Apr. 5.
Magazine. L. W. Peabody. 244,569; Apr. 5.
Magazine. Pro Distributors Publishing Company. 243,109; Apr. 5.
Magazine. Smith Brothers Publishers, Inc. 244,030; Apr. 5.
Magazine. Union Publishing Company. 244,521; Apr. 5.
Newspaper. W. E. Boyd. 243,746; Apr. 5.
Periodical. Garfield National Bank. 239,407; Apr. 5.
Periodical. E. T. Maples. 244,507; Apr. 5.
Periodical. Methodist Book Concern. 244,361; Apr. 5.
Publication. Exhibitors Review Publishing Corporation. 244,351; Apr. 5.
Publication. Loyless Publishing Company. 244,358; Apr. 5.
Publication. Rand McNally and Company. 244,471; Apr. 5.
Publication and magazine, Periodical. Wheeler Reid Publications, Inc. 238,526; Apr. 5.
Publication, Periodical. Textile Publicating Company. 241,797; Apr. 5.
Publications. White Company. 244,902–3; Apr. 5.

CLASS 39.

Blouses, suits, overcoats, and men's lumber jackets, Boys'. M. Freezer. 244,223; Apr. 5.
Coats, fur neck pieces, and dresses, Fur and spring. Keyser & Co. 243,951; Apr. 5.
Coats, vests, trousers, knickerbockers, topcoats, etc. J. Schoeneman, Incorporated. 243,973; Apr. 5.
Corset belt. W. G. Weber. 244,260; Apr. 5.
Dresses. F. R. Wright. 243,990; Apr. 5.
Hosiery. Florsheim Bros. Dry Goods Co. Ltd. 242,531; Apr. 5.
Hosiery. Real Silk Hosiery Mills. 244,181; Apr. 5.
Overshoes. L. M. Radway. 243,110; Apr. 5.
Shirts, Men's. Jacob Miller's Sons Co. 241,778; Apr. 5.
Shoes, Leather. Edmonds Shoe Company. 190,771–2; Apr. 5.
Suits, Bathing. Greenhill & Daniel. 244,069; Apr. 5.
Underwear and night wear, Men's. Sexton Mfg. Co. 227,477; Apr. 5.

CLASS 40.

Barrettes, hairpins, combs, and toilet sets. Behr & Hirtenstein. 242,566; Apr. 5.
Fabrics stamped with embroidery patterns, Textile. John R. Lankenau Co. 226,776; Apr. 5.

CLASS 42.

Cotton piece goods. F. U. Stearns & Company. 244,479; Apr. 5.
Cotton, silk, artificial silk, wool, etc. Imperial Silk House. 243,761; Apr. 5.
Fabric in the piece, Elastic. Narrow Fabric Co. 228,126; Apr. 5.
Fabrics. John B. Ellison & Sons. 229,951; Apr. 5.
Fabrics made from wool, worsteds, or mixtures thereof. John B. Ellison & Sons. 216,898; Apr. 5.
Handkerchiefs. Penn Handkerchief Co. 243,878; Apr. 5.
Silk fabrics. Emshelmer & Sahlein. 244,005; Apr. 5.
Silk goods in the piece. C. K. Eagle & Co. 242,824; Apr. 5.
Silk piece goods. Albert Godde, Bedin, Inc. 244,591; Apr. 5.
Silk piece goods. M. Spivak. 244,798; Apr. 5.
Silk piece goods. Susquehanna Silk Mills. 225,628; Apr. 5.
Silk piece goods. Wollman Silk Corporation. 241,310; Apr. 5.

Woolen and worsted fabrics. Detmer, Bruner & Mason, Inc. 244,395; Apr. 5.
Woolen piece goods. Forstmann & Huffmann Company. 234,116; Apr. 5.
Woolen piece goods. Yund, Kennedy & Yund. 244,843; Apr. 5.

CLASS 44.

Sanitary napkins. Acme Cotton Products Co. 243,795; Apr. 5.
Sanitary napkins. Hospital Specialty Co. 235,818–19; Apr. 5.
Sanitary napkins. Hospital Specialty Co. 235,822; Apr. 5.
Sanitary napkins. Hospital Specialty Co. 235,827; Apr. 5.
Sanitary napkins. Narrow Fabric Co. 244,086; Apr. 5.
Therapeutic apparatus. Gish-Fortney Co. Inc. 243,541; Apr. 5.
Trusses and suspensories. Cincinnati Truss Company. 244,603; Apr. 5.

CLASS 45.

Beverage and sirup for making same. C. M. Pitt & Sons Company. 243,230; Apr. 5.
Beverages and concentrates for making same. Sethness Company. 244,790; Apr. 5.
Beverages, soft drinks, Maltless. Electrified Water Co. 229,223; Apr. 5.
Beverages sold as soft drinks. Fitger Company. 227,118; Apr. 5.
Water, Drinking. Sparkletts Artesian Water Co. 244,797; Apr. 5.

CLASS 46.

Apples, Fresh. L. E. Birmingham. 211,516; Apr. 5.
Bread, coffee cakes, rolls, etc. Borck & Stevens Incorporated. 242,061; Apr. 5.
Butter. Debow & Co. 244,855; Apr. 5.
Butter and eggs. A. Getz. 240,971; Apr. 5.
Cake. General Baking Company. 244,924–5; Apr. 5.
Cake comprising a wheat product and milk chocolate. Two in One Confection Company. 215,717; Apr. 5.
Candies. W. P. Chase Candy Corp. 241,926; Apr. 5.
Candies, Bar. S. R. Serocky. 242,752; Apr. 5.
Candy. N. P. Damianakes. 227,114; Apr. 5.
Candy. Voneiff-Drayer Co. 244,195; Apr. 5.
Candy and candy bars. Curtiss Candy Company. 244,672; Apr. 5.
Candy bar. Shotwell Mfg. Co. 237,290; Apr. 5.
Candy, chocolate, cocoa, etc. J. G. McDonald Chocolate Co. 240,613; Apr. 5.
Candy in the form of chocolate wafers. Van Houten, Inc. 226,827; Apr. 5.
Canned fish. Seacoast Canning Company. 219,772; Apr. 5.
Canned fruits, vegetables, pork and beans, salmon, coffee, tea, cheese, etc. John Sexton and Company. 230,266; Apr. 5.
Cheese. Hulseberg & Krudener, Inc. 244,012; Apr. 5.
Cheese. Kraft Cheese Company. 243,708; Apr. 5.
Coffee. Dwight Edwards Company. 241,401; Apr. 5.
Coffee. Great Atlantic & Pacific Tea Co. 244,927; Apr. 5.
Coffee extract, Liquid. Magic Coffee Company. 243,767; Apr. 5.
Dates, figs, citron, ginger, etc. Black Palm, Inc. 233,165–6; Apr. 5.
Feed for livestock. Universal Mills. 244,581; Apr. 5.
Feeds, Prepared dairy. Chapin & Company. 244,543; Apr. 5.
Flavoring. David Michael & Co. 244,172; Apr. 5.
Flour, mill feed and corn meal, Wheat. Cain Bros. Milling Co. 243,345; Apr. 5.
Flour, Pie and cake. Paxton Flour & Feed Co. 241,957; Apr. 5.
Flour, Wheat. Eagle Roller Mill Co. 241,332; Apr. 5.
Flour, Wheat. Fisher Flouring Mills Company. 244,762; Apr. 5.
Flour, Wheat. Fremont Mills. 244,687; Apr. 5.
Flour, Wheat. Kansas Flour Mills Corporation. 240,715; Apr. 5.
Flour, Wheat. Wm. Pollock Milling & Elevator Co. 244,719; Apr. 5.
Flour, Wheat. Schultz, Baujan & Co. 244,724; Apr. 5.
Flour, wheat grits, bran and bread, Wheat. C. Holser. 234,397; Apr. 5.
Food, Dog. Old Trusty Dog Food Company. 244,092; Apr. 5.
Food, Dog. Old Trusty Dog Food Company. 244,094; Apr. 5.
Food, Dog. Spratt's Patent (America) Limited. 244,727; Apr. 5.
Fruit jams. C. G. Romano. 242,621; Apr. 5.
Jams, jellies, jelly concentrate, etc. Jelmarvl Co. 244,871; Apr. 5.
Lards, butter, hams, bacon, sausage, etc. Wm. Schluderberg-T. J. Kurdle Co. 239,681; Apr. 5.
Lettuce, Fresh. Tremaine Alfalfa Ranch & Milling Company. 244,801; Apr. 5.
Mushrooms, mushroom catchup, apples, potatoes, ducks, chickens, turkeys, etc. W. F. Crosby. 228,178; Apr. 5.
Oleomargarine and lard. St. Louis Indepedent Packing Company. 226,173; Apr. 5.
Oranges, lemons, and grapefruit. S. E. Fusco. 234,117; Apr. 5.
Pickle relish. Ackerman and Company. 243,185; Apr. 5.
Pie fillings and puddings, Preparation for making. Good Luck Food Co. 237,101; Apr. 5.
Tea and coffee. Delano, Potter & Co. 244,547; Apr. 5.
Vegetables, Fresh. Johnson & Derby. 233,555; Apr. 5.

CLASS 48.

Malt sirup. Better Health Malt Syrup Co. 243,583; Apr. 5.
Malt sirup. S. L. Goldman. 243,266; Apr. 5.
Malt sirup. H. Hirsh. 244,770; Apr. 5.

CLASS 50.

Waterproof fabric and cotton duck. Wm. E. Hooper & Sons Co. 243,270; Apr. 5.
Waterproof fabric and waterproof cotton duck. Wm. E. Hooper & Sons Co. 243,945; Apr. 5.
Waterproof fabric and waterproof cotton duck. Wm. E. Hooper & Sons Co. 243,947–8; Apr. 5.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 5TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbey, Charles J., Skowhegan, Me. Blower for saws. 1,623,859; Apr. 5.
Abercrombie, David T., Brooklyn, N. Y. Tent pole. 1,623,153; Apr. 5.
Abercrombie, David T., Brooklyn, N. Y. Tent. 1,623,154; Apr. 5.
Acheson, George W., Newark, N. J. Preparing rubber compositions. 1,623,517; Apr. 5.
Adams, Oscar H., Keokuk, Iowa. Pipe wrench. 1,623,770; Apr. 5.
Addressograph Company. (See Duncan, Joseph S., assignor.)
Aeolian Company, The. (See Starkie, John W., assignor.)
Agnew, James G., and R. K. Pond, assignors, by mesne assignments, to F. L. Olmsted, trustees, Annapolis, Md. Badge or similar article. Des. 72,339; Apr. 5.
Akers, Milton K., assignor to The Hobart Manufacturing Company, Troy, Ohio. Hopper for coffee grinders or the like. Des. 72,340; Apr. 5.
Alexander, John E., Port Edwards, Wis., and S. A. Staege, Pittsburgh, Pa.; said Staege assignor to said John E. Alexander. Automatic circuit breaker for drying machines and the like. 1,623,611; Apr. 5.
Alexander, Robert, Oakland, Calif. Painting on velvet or other cut pile fabric. 1,623,771; Apr. 5.
All Clear Windshields, Inc. (See Demand, Joseph, assignor.)
Allen, George B., Atlanta, Ga. Golf game. 1,623,518; Apr. 5.
Allied Process Corporation. (See Weidmann, Hans, assignor.)
Allwill, Stephen S., Auckland, New Zealand. Carburetor. 1,623,899; Apr. 5.
Alterman, Joseph. (See Joseph, F., and Creamer, assignor.)
Aluminum Seal Corporation. (See Nordstrom Elof, assignor.)
Alvarado, Alberto M., Durango, Mexico. Violin bridge. 1,623,900; Apr. 5.
Amann, August, and E. Fonrobert, Wiesbaden, assignors to the Firm Chemische Fabriken Dr. Kurt Albert G. m. b. H., Amoneburg, near Bierbrich-on-the-Rhine, Germany. Improvement of natural resins. 1,623,901; Apr. 5.
Ambler Asbestos Company. (See Applin, Harry, assignor.)
Ambler Asbestos Company. (See Mattison, Richard V., assignor.)
Amende, Lewis W., Casper, Wyo. Shock absorber. 1,623,081; Apr. 5.
American Can Company. (See Hothersall, John M., assignor.)
American Can Company. (See Widell, Magnus E., assignor.)
American Chain Company. (See Fageol, Rollie B., assignor.)
American Chain Company. (See Goetz, Oscar H., assignor.)
American Coalinoil Corporation. (See Greenstreet, Charles J., assignor.)
American Dressler Tunnel Kilns, Inc. (See Crawford, George E., assignor.)
American Gasaccumulator Company. (See Dalen, Gustaf, assignor.)
American Monorail Company, The. (See Harris, Frank C., assignor.)
American Multigraph Company, The. (See Osborn, Henry C., assignor.)
American Specialty Co. (See Coley, George F., assignor.)
American Telephone and Telegraph Company. (See Crisson, G., and Silent, assignors.)
American Telephone and Telegraph Company. (See Jacobsen, Emil, assignor.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
American Wiremold Company, The. (See Frederickson, Otto A., assignor.)
Ames, Charles F., et al. (See Frederick, Rheuel H., assignor.)
Ames, Charles F., Brooklyn, assignor of one-fifth to A. H. E. Berchem and one-fifth to H. S. Schanck, New York, N. Y. Centrifugal pump. 1,623,082; Apr. 5.
Ames, Charles F., Brooklyn, assignor of one-fifth to A. H. E. Berchem and one-fifth to H. S. Schanck, New York, N. Y. Vacuum-producing apparatus. 1,623,083; Apr. 5.
Andersen, Fred C., and E. C. Madson, Bayport, and G. A. Chapman, Minneapolis, assignors to Andersen Lumber Company, Bayport, Minn. Casement sash frame. 1,623,772; Apr. 5.
Andersen Lumber Company. (See Andersen, F. C., Madson, and Chapman, assignors.)
Anderson, Carl M., assignor of one-half to M. Chonkich, Baltimore, Md. Cooling system for motor vehicles. 1,623,902; Apr. 5.
Anderson, Gustaf A., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Truck side frame. 1,623,036; Apr. 5.
Anderson, Gustaf A., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Car-truck side frame. 1,623,037; Apr. 5.
Anderson, Gustaf A., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Truck side frame. 1,623,570; Apr. 5.
Anderson, John N. (See Colby, Lawrence W., assignor.)
Anderson, Robert D., Shreveport, La. Exhaust fan or blower. 1,623,650; Apr. 5.
Anderson, Oscar O., Sioux Rapids, Iowa. Float valve. 1,623,374; Apr. 5.
Andrew, Howard E., Vancouver, Wash. Automobile lock. 1,623,455; Apr. 5.
Angel International Corporation. (See Reilly, Rodolphe K., assignor.)
Apollo Piano Co. (See Rauworth, Edwin S., assignor.)
Applin, Harry, Ambler, Pa., assignor to Ambler Asbestos Company. Shingle machine. 1,623,612; Apr. 5.
Arndt, Max M., Manitowoc, Wis. Flying machine. 1,623,613; Apr. 5.
Arnstein, Karl, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Airship frame. 1,623,951; Apr. 5.
Arnstein, Karl, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Stabilizing apparatus for rigid airships. 1,623,952; Apr. 5.
Asmus, Hugo C., Kansas City, Mo. Ice pick. 1,623,375; Apr. 5.
Athey, Isaac H., assignor to Athey Truss Wheel Co., Chicago, Ill. Vehicle. 1,623,456; Apr. 5.
Athey, Isaac H., assignor to Athey Truss Wheel Co., Chicago, Ill. Vehicle. 1,623,457; Apr. 5.
Athey, Isaac H., assignor to Athey Truss Wheel Co., Chicago, Ill. Vehicle. 1,623,458; Apr. 5.
Athey Truss Wheel Co. (See Athey, Isaac H., assignor.)
Augustine Automatic Rotary Engine Co. (See Augustine, Benjamin F., assignor.)
Augustine, Benjamin F., assignor to Augustine Automatic Rotary Engine Company, Buffalo, N. Y. Two-cycle gas engine. 1,623,286; Apr. 5.
Austin, George C., Seattle, Wash., assignor, by mesne assignments, of one-half to S. C. Carter Co., Inc., Los Angeles, Calif. Piston. 1,623,328; Apr. 5.
Auth, Charles, New York, assignor to E. L. Auth, Brooklyn, N. Y. Annunciator drop. 1,623,376; Apr. 5.
Auth, Emma L. (See Auth, Charles, assignor.)
Automatic Electric Inc. (See Bellamy, John I., assignor.)
Automatic Electric Inc. (See Smith, Arthur B., assignor.)
Automotive Valves Co., The. (See Burtnett, Everett R., assignor.)
Ayres, Harry T., Durango, Colo. End connection and shock absorber for vehicle springs. 1,623,651; Apr. 5.
Babbitt, Edwin V., Fairhaven, Mass. Baseball-game apparatus. 1,623,038; Apr. 5.
Babbitt, Edwin V., Fairhaven, Mass. Sailor toy. 1,623,039; Apr. 5.
Bach, Oscar B., New York, N. Y. Console table. Des. 72,338; Apr. 5.
Bach, Oscar B., New York, N. Y. Torchère. Des. 72,341; Apr. 5.
Bach, Oscar B., New York, N. Y. Table. Des. 72,342; Apr. 5.
Bach, Oscar B., New York, N. Y. Highboy. Des. 72,343; Apr. 5.
Bach, Oscar B., New York, N. Y. Table. Des. 72,344; Apr. 5.
Bach, Oscar B., New York, N. Y. Torchère. Des. 72,345; Apr. 5.
Bach, Oscar B., New York, N. Y. Lamp. Des. 72,346; Apr. 5.

Bacon, Alfred M., Arlington, Mass. Tire carrier. 1,623,377; Apr. 5.

Baer, Samuel, New York, N. Y. Playing card. 1,623,035; Apr. 5.

Baker, George R., and W. E. Prescott, London, and C. W. Gilderdale, New Earswick, assignors to Rowntree and Company Limited, York, England. Method and apparatus for grading solid materials. 1,623,040; Apr. 5.

Baker, Milo A., Los Angeles, Calif. Drilling apparatus. 1,623,084; Apr. 5.

Baker, Oscar H., New York, N. Y. Milk bottle. 1,623,459; Apr. 5.

Baker-Raulang Company, The. (See Remde, Edward H., assignor.)

Baker-Vawter Company. (See Steenrod, William J., assignor.)

Ballamos, Elizabeth. (See Reason, Walter M., assignor.)

Ballard, Harrie A., Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Channeling machine. 1,623,225; Apr. 5.

Ballard, Harrie A., Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Channeling machine. 1,623,226; Apr. 5.

Balsley, Frederick M., Madison, Wis. Marker for pavements. 1,623,297; Apr. 5.

Bang, Henry, assignor of two-fifths to T. Carstensen, Chicago, Ill. Freight-car door. 1,623,652; Apr. 5.

Bansley, William M. (See Booty, Philip C. P., assignor.)

Barbarou, Marius J. B., Paris, France. Valve gear in internal-combustion engines. 1,623,041; Apr. 5.

Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co. Paper-cup-forming machine. 1,623,329; Apr. 5.

Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Cup-machine carton-loading attachment. 1,623,330; Apr. 5.

Barker, Benjamin F., El Paso, Tex., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,623,042; Apr. 5.

Barnay, Antoine, Paris, France. System for transmitting electrical impulses. 1,623,714; Apr. 5.

Barney, Ernest E. (See Gegenheimer, W., and Barney.)

Bartels, Amendus, and O. Miech, Harburg-on-the-Elbe, Germany. Manufacture of shaped articles of casein. 1,623,085; Apr. 5.

Bartsch, Herbert E., Chicago, Ill., assignor to Universal Draft Gear Attachment Co. Brake mechanism. 1,623,227; Apr. 5.

Bates, Adelmer M., G. P. Dorr, and J. E. Dancker, assignors to Bates Valve Bag Company, Chicago, Ill. Method of and apparatus for severing and valving bag tubes. 1,623,228; Apr. 5.

Bates Valve Bag Company. (See Bates, A. M., Dorr, and Dancker, assignors.)

Baumberger, William J. (See Yerk, H. H., and Baumberger.)

Baumeister, Hans, Stuttgart, Wilhelm E. Dörr, Friedrichshafen, Bodensee, Germany, and Karl Hürttle, Akron, Ohio, assignors to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Gas-inflated airship. 1,623,653; Apr. 5.

Bavington, Walter W., Okmulgee, Okla. Compressor. 1,623,378; Apr. 5.

Baybutt, Richard, and E. S. Farrow, jr., assignors to Eastman Kodak Company, Rochester, N. Y. Bleaching cellulose acetate. 1,623,519; Apr. 5.

Beaumont, William M. (See King, R. E., and Beaumont.)

Beaver, Byron R., Ulysses, Nebr. Wrench. 1,623,379; Apr. 5.

Beck, Riley, Dows, Iowa. Water circulator and air moistener for water-cooled internal-combustion engines. 1,623,229; Apr. 5.

Becker, George J., Annandale, N. Y. Piano key. 1,623,331; Apr. 5.

Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Combination oven. 1,623,460; Apr. 5.

Beckwith, Harry H. (See Swett, Charles E., assignor.)

Beesl, Peter, Durand, Mich. Blotter device for pens. 1,623,614; Apr. 5.

Bednarz, Edward, Everett, Wash. Signal for vehicles. 1,623,903; Apr. 5.

Bee, May P., New York, N. Y. Handkerchief. Des. 72,347; Apr. 5.

Beebe, Paul, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Apparatus for and making articles from a fibrous composition. 1,623,933; Apr. 5.

Beebe, Robert H., Seattle, Wash. Brake. 1,623,380; Apr. 5.

Beezley, Reginald R., Memphis, Tenn. Storage-battery terminal. 1,623,332; Apr. 5.

Belden, Edward H., assignor, by mesne assignments, to The Willys-Overland Company, Toledo, Ohio. Lubrication system for internal-combustion engines. 1,623,461; Apr. 5.

Belden, Edward H., assignor to The Willys-Overland Company, Toledo, Ohio. Internal-combustion engine. 1,623,462; Apr. 5.

Bell, Frank M., assignor to R. G. Thompson and E. B. Simmonds, Muncie, Ind. Truck. 1,623,298; Apr. 5.

Bell, John E. (See Isom, E. W., and Bell.)

Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Oil still. 1,623,773; Apr. 5.

Bell, Paul, Mexico City, Mexico. Holding device for wild animals. 1,623,774; Apr. 5.

Bell Telephone Laboratories, Incorporated. (See King, R. E. and Beaumont, assignors.)

Bellamore, David H., New York, N. Y., assignor to The Mosler Safe Company, Hamilton, Ohio. Metallic structure. 1,623,155; Apr. 5.

Bellamy, John I., Brookfield, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,623,230; Apr. 5.

Bellman, Edward T., assignor of one-third to J. J. Raney, Rockford, Ill. Circuit-closing device. 1,623,571; Apr. 5.

Beloit Iron Works. (See Berry, Earl E., assignor.)

Bender, Frederick C., Mineola, N. Y. Musical instrument. 1,623,381; Apr. 5.

Bendix Brake Company. (See Nelson, Emil A., assignor.)

Bennington, Albert P., Philadelphia, Pa. Cleaning head for blackboard renovators. 1,623,520; Apr. 5.

Bennington, Albert P., Philadelphia, Pa. Cleaning head for blackboard renovators. 1,623,521; Apr. 5.

Benson, Davisson A., assignor to Standard Arch Company, Frostburg, Md. Furnace-roof structure. 1,623,860; Apr. 5.

Bent, Walter G., Harrow, England, assignor to Eastman Kodak Company, Rochester, N. Y. Coated paper. 1,623,522; Apr. 5.

Berchem, Alphonse H. E., et al. (See Ames, Charles F., assignor.)

Berchem, Alphonse H. E., et al. (See Frederick, Rheuel H., assignor.)

Berg, Harold F., Clinton, Iowa. Milk-can steaming and water-heating system. 1,623,156; Apr. 5.

Berger, Ollie J., assignor to Chicago Forging & Manufacturing Company, Chicago, Ill. Hinge. 1,623,572; Apr. 5.

Berkowitz, Aaron, New York, N. Y. Hat box. 1,623,715; Apr. 5.

Berrenberg, Reinhold A. (See McCann, C. F., and Berrenberg.)

Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Paper-making machine. 1,623,157; Apr. 5.

Bessette, Elzear H., Leominster, Mass. Vehicle signal-lamp casing. 72,348; Apr. 5.

Bird & Son, Inc. (See Hale, William E., assignor.)

Bittick, Halton A., Taylor, Tex. Manually-carried transporting device for electrical conductors. 1,623,823; Apr. 5.

Blackston, Edward A., assignor to L. R. Gilbert, Raleigh, N. C. Filling replenishing mechanism for looms of more than one shuttle. 1,623,861; Apr. 5.

Blakely, W. W. (See Sternbergh, Harry S., assignor.)

Blanchard, Frederick C., Detroit, Mich. Lubricating device. 1,623,775; Apr. 5.

Blatherwick, Harold, Chicago, Ill. Oil can. 1,623,904; Apr. 5.

Blevin, Frederick L., Jersey City, N. J., and A. D. Ferguson, Brooklyn, N. Y. Cardboard-box knife. 1,623,158; Apr. 5.

Bloomfield-Holmes Corporation. (See Holmes, Frank E., assignor.)

Blydenburgh, Harold L. (See Jandus, H. S., and Blydenburgh.)

Bock, Richard W., River Forest, Ill. Illuminated ornamental device. 1,623,086; Apr. 5.

Bona, Stephen, Bridgeport, Conn. Rope clamp. 1,623,615; Apr. 5.

Bondeson, John A., and A. F. Hunt, San Francisco, Calif. Combined punch and file. 1,623,824; Apr. 5.

Booty, Philip C. P., assignor to W. M. Bansley, Chicago, Ill. Regulating device for controlling the operation of valves or the like. 1,623,616; Apr. 5.

Borden, Edmund G., Queens, assignor to Doherty Research Company, New York, N. Y. Calorimeter. 1,623,299; Apr. 5.

Borg & Beck Company, The. (See Gamble, David E., assignor.)

Borglum, Miller, Bakersfield, Calif. Vehicle signal. 1,623,905; Apr. 5.

Boss, Frank N., Cranston, R. I. Electric candle. 1,623,716; Apr. 5.

Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Externally-operated safety switch. 1,623,573; Apr. 5.

Bourgon, Joseph H., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Vehicle closure. 1,623,934; Apr. 5.

Bourke, Lester L., Lewbeach, N. Y. Golf club. 1,623,523; Apr. 5.

Bovard, William P., assignor to The Ohio Brass Company, Mansfield, Ohio. Apparatus used in bonding rails and its application. 1,623,654; Apr. 5.

Bowen, David R., Ansonia, and C. F. Schnuck, New Haven, assignors to Farrel Foundry & Machine Company, Ansonia, Conn. Machine for mixing or masticating rubber and like material. 1,623,159; Apr. 5.

Bowers, Walter G., and C. A. Smith, Akron, Ohio. Brake lock. 1,623,382; Apr. 5.

Bowling, Clarence B., and H. Bulman, Detroit, Mich. Floss holder. 1,623,231; Apr. 5.

Boyd, Alexander G., Toronto, Ontario, Canada. Furnace. 1,623,087; Apr. 5.

Boyer, Albert L., Marion, Ind. Loose-leaf binder. 1,623,524; Apr. 5.

Brandes Laboratories, Inc. (See Gerns, William H., assignor.)

Brady, Ellen, Bloomfield, N. J., assignor to Henry Brady, Inc. Package-wrapping device. 1,623,300; Apr. 5.

Brady, Henry, Inc. (See Brady, Ellen, assignor.)

Brady, Henry, Inc. (See Hilsinger, Adin W., assignor.)

Braun, Carl F., Pasadena, Calif. Condenser, cooler, and absorber. 1,623,617; Apr. 5.

Brenner, Ralph F., assignor to H. C. Fry Glass Company, Rochester, Pa. Heat-resisting glass. 1,623,801; Apr. 5.

Bridgeport Brass Company. (See Oakley, Erastus G., assignor.)

Briggs Manufacturing Company. (See Lehman, Walter J., assignor.)

Briggs Manufacturing Company. (See Williams, Clifford J., assignor.)

Briggs, Stephen F., and E. N. Jacobi, assignors, by mesne assignments, to Briggs & Stratton Corporation, Milwaukee, Wis. Oil gange. 1,623,333; Apr. 5.

Briggs & Stratton Corporation. (See Briggs, S. F., and Jacobi, assignors.)

Brilliant Glass Products, Inc. (See Frolking, Stanley A., assignor.)

Brooks, Desmond B., Haxtun, Colo. Novelty. 1,623,906; Apr. 5.

Brousseuse, Fernand L., assignor to P. J. Leboucher, Paris, France. Automatic clutch. 1,623,862; Apr. 5.

Brown, Carl A., East Cleveland, and F. B. Van Sickle, Wickliffe, Ohio, assignor to General Electric Company. Bulb-feeding apparatus. 1623,825; Apr. 5.

Brown, Edgar F., Salisbury, Md. Speed-governing device. 1,623,635; Apr. 5.

Brown, Everett, Hardy, Ky. Valve-operating mechanism 1,623,043; Apr. 5.

Brown, Frederick W., York, England. Wheel for vehicles. 1,623,656; Apr. 5.

Brown, Luther E., assignor of one-half to S. Caprito, Breckenridge, Tex. Apparatus for eliminating dents in tubes or pipes. 1,623,657; Apr. 5.

Bryant, William L., Springfield, Vt. Micrometer gauge. 1,623,574; Apr. 5.

Buck, Arthur. (See Sears, F. W., and Buck.)

Buda Company, The. (See Gormley, Frank L., assignor.)

Buerger, Charles B., assignor to Gulf Oil Burner Company, Pittsburgh, Pa. Safety valve for oil burners and the like. 1,623,160; Apr. 5.

Buerger, Charles B., assignor to Gulf Oil Burner Company, Pittsburgh, Pa. Safety valve for oil burners and the like. 1,623,161; Apr. 5.

Buffington, Joseph, Pittsburgh, assignor of one-half to Charles J. Kirk, New Castle, Pa. Catch. 1,623,302; Apr. 5.

Bulman, Hubert. (See Bowling, C. B., and Bulman.)

Burke, John C., Middlesboro, Ky. Clock. 1,623,907; Apr. 5.

Burkholder, George A., Shoal Lake, Manitoba, Canada. Automobile ventilator. 1,623,383; Apr. 5.

Burleson, Joseph F., Scottsdale, Ariz. Poppet valve. 1,623,826; Apr. 5.

Burnett, Richard W., Chicago, Ill. Railway car. 1,623,303; Apr. 5.

Burns, Dana B., Asheville, N. C. Valve mechanism for internal-combustion engines. 1,623,525; Apr. 5.

Burpee Can Sealer Company. (See Burpee, Frank W., assignor.)

Burpee, Frank W., assignor to Burpee Can Sealer Company, Chicago, Ill. Machine for cutting green corn from the cob. 1,623,088; Apr. 5.

Burpee, Frank W., assignor to Burpee Can Sealer Company, Chicago, Ill. Green-vegetable cutter. 1,623,089; Apr. 5.

Burpee, John H., and D. E. Lain, Bellingham, Wash. Engine piston. 1,623,717; Apr. 5.

Burr, George D., Seattle, Wash. Reinforced concrete paving. 1,623,090; Apr. 5.

Burritt, William H., St. Louis, Mo. Vehicle wheel. 1,623,162; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engines. 1,623,384; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,385; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,386; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,387; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Inlet manifold for internal-combustion engines. 1,623,388; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,389; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,390; Apr. 5.

Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,623,391; Apr. 5.

Butcher, John E., and H. B. Harris, Garber, Okla. Wire-cable cutter. 1,623,044; Apr. 5.

Butt, Herbert G., Winthrop, Mass. Pipe vise. 1,623,045; Apr. 5.

Byrne, Harry, et al. (See Comerford, John, assignor.)

C. G. Spring & Bumper Company, The. (See Dunston, Wayne, E., assignor.)

C. G. Spring & Bumper Company, The. (See Girl, Christian, assignor.)

C. G. Spring & Bumper Company, The. (See Jandus, Herbert S., assignor.)

C. G. Spring & Bumper Company, The. (See Jandus, H. S., and Blydenburgh, assignors.)

Cadwell, Thomas H., Newcastle, Wash. Valve rocker arm attachment. 1,623,863; Apr. 5.

Cady, Walter H. (See Kirschbraun, L., and Cady.)

Cahn, Sam A. (See Le Compte, O. P., and Cahn.)

Callison, Claud, Loyal, Okla. Milk box. 1,623,827; Apr. 5.

Camp, Percy B., Maywood, and J. Wilson, Chicago, Ill., assignors to Universal Draft Gear Attachment Co. Brake mechanism for railway cars. 1,623,304; Apr. 5.

Campbell, Charles E., assignor to Campbell Electric Company, Lynn, Mass. X-ray apparatus. 1,623,575; Apr. 5.

Campbell Electric Company. (See Campbell, Charles E., assignor.)

Campbell, George E., assignor to The Wheland Company, Chattanooga, Tenn. Chain-drive belt feed works for sawmills. 1,623,908; Apr. 5.

Campbell, Wallace W., Denver, Colo. Dry-steam sleeve-finishing board. 1,623,091; Apr. 5.

Cannaday, Charles E., Washington, D. C. Inside-door protector and gang board. 1,623,776; Apr. 5.

Caprito, S. (See Brown, Luther E., assignor.)

Carbell, Louis R., Savanna, Ill. Wrench. 1,623,945; Apr. 5.

Carpenter, Warren W., Queens, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,623,777; Apr. 5.

Carr, Matthew, Berwyn, assignor to Joseph C. Carry, Chicago, Ill. Refrigerator car. 1,623,305; Apr. 5.

Carr, Paul, Miami, Fla. Shoe. 1,623,092; Apr. 5.

Carroll, Fred M., assignor to The Tabulating Machine Company, Endicott, N. Y. Card-controlled printing machine. 1,623,163; Apr. 5.

Carroll, Fred M., assignor to The Tabulating Machine Company, Endicott, N. Y. Sensing means for perforated record cards. 1,623,164; Apr. 5.

Carry, Joseph C. (See Carr, Matthew, assignor.)

Carstensen, Theodore. (See Bang, Henry, assignor.)

Carter, S. C., Co. (See Austin, George C., assignor.)

Cassidy, Willis W., assignor to Sweet Candy Company, Salt Lake City, Utah. Candy jumping jack. 1,623,165; Apr. 5.

Castagnaro, Dominick. (See Chapin, P. P., and Kupec, assignors.)

Caswell, Fred C., assignor of one-half to L. F. Fagerstrom, Minneapolis, Minn. Combination lamp and loud speaker. 1,623,935; Apr. 5.

Cavalli, Tito L., Benicia, Calif. Pasteurizer. 1,623,909; Apr. 5.

Central Commercial Company. (See Stone, Frederick W., assignor.)

Chadwick, Charles, Brooklyn, N. Y. Tone-sustaining mechanism. 1,623,232; Apr. 5.

Champion Auto Equipment Company. (See Larson, Jonas E., assignor.)

Chandler, Homer P., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor support. 1,623,658; Apr. 5.

Chandler, Milton E., assignor to Stromberg Motor Devices Co., Chicago, Ill. Fuel control. 1,623,166; Apr. 5.

Chapin, Philip P., and W. J. Kupec, assignors of one-third to D. Castagnaro, New York, N. Y. Automatic egg boiler. 1,623,093; Apr. 5.

Chapman, George A. (See Andersen, F. C., Madson, and Chapman.)

Chase Foundry and Manufacturing Company, The. (See Chase, Sherwood M., assignor.)

Chase, Philip H., Bala, and W. Foster, Philadelphia, Pa.; said Foster assignor to said Chase. Rack. 1,623,864; Apr. 5.

Chase, Sherwood M., assignor to The Chase Foundry and Manufacturing Company, Columbus, Ohio. Transfer car. 1,623,828; Apr. 5.

Chattanooga Implement & Mfg. Co. (See Lancaster, Harry V., assignor.)

Chemische Fabriken Dr. Kurt Albert G. m. b. H. (See Amann, A., and Fonrobert, assignors.)

Chicago Forging & Manufacturing Company. (See Berger, Ollie J., assignor.)

Chilton, Roland, Keyport, N. J., assignor to Healey-Aeromarine Bus Company, Inc. Transmission. 1,623,306; Apr. 5.

Chipman, Andrew L., et al. (See Chipman, Harry E., assignor.)

Chipman, Harry E., Springfield, Mass., assignor to W. A. and A. L. Chipman, New York, N. Y. Talking-picture transfer mechanism. Re16,586; Apr. 5.

Chipman, William A., et al. (See Chipman, Harry E., assignor.)

Chonkich, Michael. (See Anderson, Carl M., assignor.)

Christiansen, Julius H. A., Ricketts, Iowa. Paperhanger's table. 1,623,167; Apr. 5.

Clapp, Joseph E., Auburndale, Mass. Electrical apparatus comprising a slow-wave generator. 1,623,829; Apr. 5.

Clarke, Edgar W., Hamilton, Ontario, assignor to Mercury Mills, Limited, Hamilton, Canada. Knotting mechanism for knitting machines. 1,623,233; Apr. 5.

Clarke, René, New York, N. Y., assignor to W. H. & A. E. Margerison & Co., Philadelphia, Pa., a firm composed of W. H. Margerison and A. E. Margerison. Towel. Des. 72,349; Apr. 5.

Claus, Emil L. and W. E., assignors to Milwaukee Gas Specialty Company, Milwaukee, Wis. Oven heat-control device. 1,623,576; Apr. 5.

Claus, Walter E. (See Claus, Emil L. and W. E.)

Cleveland, William, et al. (See McCarthy, Joseph P., assignor.)

Clipper Belt Lacer Company. (See Diamond, James K., assignor.)

Coe, Samuel, Jersey City, N. J. Striping machine. 1,623,577; Apr. 5.

Cofrin, Austin E., Green Bay, Wis. Method and apparatus for making paper. 1,623,526; Apr. 5.

Cohn, Irwin, assignor to Irwin & Company, Inc., New York, N. Y. Toy trumpet. 1,623,168; Apr. 5.

Colby, Lawrence W., assignor of one-half to J. N. Anderson, Methuen, Mass. Glass cover for automobiles. 1,623,718; Apr. 5.

Coley, George F., assignor to American Specialty Co., Oklahoma City, Okla. Radius-rod attachment. 1,623,046; Apr. 5.

Coleman, Robert C., Wind Gap, Pa. Tire rim. 1,623,307; Apr. 5.

Colley, Fred, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Bale-tearing machine. 1,623,936; Apr. 5.

Collins, Cassius M., Bakersfield, Calif. Inclinometer. 1,623,463; Apr. 5.

Columbia Phonograph Company. (See Hadley, Walter C., assignor.)

Combustion Engineering Corporation. (See Lundgren, Edwin, assignor.)

Comerford, John, New York, assignor of one-third to M. J. Martley, Bronxville, and one-third to H. Byrne, New York, N. Y. Vent cap for soil pipes. 1,623,659; Apr. 5.

Conklin, Roscoe D. (See Rowntree, H., and Conklin.)

Connecticut Electric Manufacturing Company, The. (See Both, Tonjes A., assignor.)

Conover, Arthur V., assignor to Interflash Signal Corporation, New York, N. Y. Gas jet and igniting same. 1,623,464; Apr. 5.

Convertible Wagon Trailers Inc. (See Cooke, William H., assignor.)

Conveyors Corporation of America. (See Zimmermann, Carl F., assignor.)

Cook, L. D., Minneapolis, Minn. Adjustable frame for poster boards. 1,623,047; Apr. 5.

Cooke, William H., assignor to Convertible Wagon Trailers Inc., Buffalo, N. Y. Street flusher. 1,623,778; Apr. 5.

Cook, William J., assignor to Wheeling Steel Corporation, Wheeling, W. Va. Producing galvanized corrugated metal pipe. 1,623,618; Apr. 5.

Cooley, Floyd S. and F. A., McHenry, Ill. Block wall and constructing same. 1,623,094; Apr. 5.

Cooley, Frederick A. (See Cooley, Floyd S. and F. A.)

Copeman Laboratories Company. (See Sherman, George B., assignor.)

Coulston, Earl V., Rock Island, Ill. Metal door construction. 1,623,334; Apr. 5.

Cowell, George H. (See Webb, Edward C., assignor.)

Crain, Robert S. (See Wilson, Robert J., assignor.)

Crawford, George E., Trenton, N. J., assignor to American Dressler Tunnel Kilns, Inc., Cleveland, Ohio. Kiln for glass melting and like purposes. 1,623,779; Apr. 5.

Creamer, Isaac P. (See Joseph, F., and Creamer.)

Creamery Package Mfg. Company, The. (See Williams, G. W., and Walstrom, assignors.)

Crescent Stove Works. (See Pape, Edwin W., assignor.)

Crisson, George, East Orange, N. J., and H. C. Silent, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company. Multiway connection. 1,623,095; Apr. 5.

Crocker, Clarence T., Schenectady, N. Y., assignor to General Electric Company. Fluid-pressure-operated device. 1,623,780; Apr. 5.

Cropp, Claude J., Detroit, Mich. Vehicle cab. 1,623,830; Apr. 5.

Crosby, J. D., Co. (See Crosby, Justin D., assignor.)

Crosby, Justin D., assignor to J. D. Crosby Co., Pawtucket, R. I. Finishing cold-rolled steel. 1,623,048; Apr. 5.

Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Lighting-fixture bracket. Des. 72,350; Apr. 5.

Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Lighting-fixture strap. Des. 72,351; Apr. 5.

Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Lighting-fixture bracket. Des. 72,352; Apr. 5.

Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Lighting-fixture strap. Des. 72,353; Apr. 5.

Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Lighting-fixture backplate. Des. 72,354; Apr. 5.

Curtis, George A., Framingham, Mass. Clinching wire nail. 1,623,465; Apr. 5.

Curtis, Harry D., Oshkosh, Wis. Snow remover. 1,623,910; Apr. 5.

Curtiss Aeroplane and Motor Company. (See Mummert, Harvey C., assignor.)

Cutter, Charles W., Long Beach, Calif. Grade indicator. 1,623,234; Apr. 5.

Cyclone Fence Company. (See Harter, Noah S., assignor.)

Dahlberg, Charles L., Des Moines, Iowa. Notebook holder. 1,623,235; Apr. 5.

Dahlstrom Metallic Door Company, The. (See Johnson, Axel Z., assignor.)

Dailey, John A., and L. W. Gerth, Burlington, Iowa. Railroad-grade crossing. 1,623,911; Apr. 5.

Dalen, Gustaf, Lidington, Stockholm, Sweden, assignor to American Gasaccumulator Company, Elizabeth, N. J. Porous mass for storing explosive gases and process of making same. 1,623,169; Apr. 5.

Dalkner, Frank, Allentown, Pa. Coat. 1,623,781; Apr. 5.

Dancker, Johann E. (See Bates, A. M., Dorr, and Dancker.)

Davidson, James, Montreal, Quebec, Canada. Draining rack for containers. 1,623,392; Apr. 5.

Davies, David B., and C. J. Thomas, Green Bay, Wis. Slice for paper machines. 1,623,096; Apr. 5.

Davis, Merritt J., Wellsburg, W. Va. Bag-valve-forming mechanism. 1,623,170; Apr. 5.

Day, J. H., Company, The. (See Moores, Joel, assignor.)

Day, L. B. (See Scott, Nelson H., assignor.)

Day, Thurman L., Indianapolis, Ind. Headlight glare-shield. 1,623,831; Apr. 5.

Dayton Paper Novelty Company, The. (See Neumann, Theodore L., assignor.)

Dayton Scale Company. (See Strachan, Thomas H., assignor.)

Dayton-Wright Company. (See Kettering, Charles F., assignor.)

Dean, James S., Sacramento, Calif. Convertible auditorium. 1,623,619; Apr. 5.

De Bonis, Michael, Abbotsford, British Columbia, Canada. Staple. 1,623,335; Apr. 5.

De Corse, Charles F. (See Gocke, J. B., and De Corse.)

De Doory, Ladislaus, New York, N. Y. Shirt board. Des. 72,355; Apr. 5.

Deer, Atlee C., Chattanooga, Tenn. Discharging device for rotary cylinders. 1,623,527; Apr. 5.

De Felice, Frank. (See Lenhardt, Lawrence, assignor.)

De Grahl, Gustav, Berlin-Zehlendorf-West, Germany. Feed valve for locomotives. 1,623,660; Apr. 5.

De Loache, George W., assignor to The Larkin Automotive Parts Company, Dayton, Ohio. Fitting for quick-detachable coupling. 1,623,097; Apr. 5.

Demand, Joseph, New York, N. Y., assignor, by mesne assignments, to All Clear Windshields, Inc., Boston, Mass. Windshield wiper. 1,623,308; Apr. 5.

De Moos, Charles, Fort Lee, N. J., assignor to Eastman Kodak Company, Rochester, N. Y. Process and apparatus for treating film. 1,623,528; Apr. 5.

Dent, Leonard M. E., and A. Mackenzie, London, and J. White, Sunningdale, England. Golf tee. 1,623,782; Apr. 5.

Denver Rock Drill Manufacturing Company. (See Gustafson, Hjalmer C., assignor.)

De Olaneta, Harold, assignor to Winchester Repeating Arms Company, New Haven, Conn. Dry cell. 1,623,719; Apr. 5.

De Roo, William C., assignor to The Dreses Machine Tool Company, Cincinnati, Ohio. Friction clutch. 1,623,236; Apr. 5.

Detroit Dental Manufacturing Company. (See Kerr, Robert M., assignor.)

Deverall, Charles N., Buffalo, assignor to Rudolph Wurlitzer Manufacturing Company, North Tonawanda, N. Y. Contact block for electric organs and the like. 1,623,098; Apr. 5.

Dewey & Almy Chemical Company. (See Dewey, B., and Miller, assignors.)

Dewey, Bradley, Cambridge, Mass., and T. T. Miller, Orange, N. J., assignors to Dewey & Almy Chemical Company, Cambridge, Mass. Apparatus for applying lining material to covers. 1,623,529; Apr. 5.

Diamond Expansion Bolt Company. (See Hubener, William A., assignor.)

Diamond, James K., assignor to Clipper Belt Lacer Company, Grand Rapids, Mich. Fastener-setting machine. 1,623,783; Apr. 5.

Diamond State Fibre Company. (See Taylor, John M., assignor.)

Dicely, Lee W., Richmond, assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Can pairing and incasing machine. 1,623,393; Apr. 5.

Diener, Geo. W., Mfg. Co. (See Waggoner, Albert E., assignor.)

Dieter, William, Newark, N. J. Automobile torpedo. 1,623,099; Apr. 5.

Di Martino, Carmelo, and E. Lindquist, Paterson, N. J. Coin-controlled mechanism. 1,623,466; Apr. 5.

Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,356; Apr. 5.

Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,357; Apr. 5.

Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,358; Apr. 5.

Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,359; Apr. 5.

Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,360; Apr. 5.

District of Columbia Paper Manufacturing Company. (See Smith, D. A., and Stirling, assignors.)

Dodd, James A., Lexington, Ky. Gate. 1,623,394; Apr. 5.

Dodge, Waldo C., Winthrop, Mass. Smoking appliance. 1,623,661; Apr. 5.

Dodman, Alfred C., jr., Summit, N. J. Preparing wall covering. 1,623,620; Apr. 5.

Doherty Research Company. (See Borden, Edmund G., assignor.)

Dolan, Francis M., St. Paul, Minn. Slicing board. 1,623,100; Apr. 5.

Dominick, Theodore, Wenatchee, Wash. Subsoil ditcher. 1,623,530; Apr. 5.

Donay, Joseph, Cleveland, Ohio. Combination curtain and shade holder. 1,623,578; Apr. 5.

Doncheff, Demetre, East St. Louis, Ill. Airship. 1,623,805; Apr. 5.

Dorr, George P. (See Bates, A. M., Dorr, and Dancker.)

Dörr, Wilhelm E. (See Baumeister, H., Dörr, and Hürtle.)

Dorsey, Farnum F., assignor to North East Electric Company, Rochester, N. Y. Fuel-supply system. 1,623,049; Apr. 5.

Dorton, John M., Bonner Springs, Kans. Dirigible headlight. 1,623,395; Apr. 5.

Doser, Theodore, St. Anthony, Iowa. Collapsible roost. 1,623,171; Apr. 5.

Dover, George W., Longmeadow, R. I., assignor to The Montgomery Tool and Machinery Company. Knurling tool. 1,623,662; Apr. 5.

Dowling, Francis J., New York, N. Y. Doorlock. 1,623,579; Apr. 5.

Draver, Emil R., Richmond, Ind. Exhaust cut-out. 1,623,580; Apr. 5.

Dreses Machine Tool Company, The. (See De Roo, William C., assignor.)

Dubilier Condenser Corporation. (See Warren, Robert M., assignor.)

Dubilier, William, New York, N. Y. Method and apparatus for interrupting electrical circuits. 1,623,531; Apr. 5.

Dudas, Andrew, and A. P. Wasil, Homestead, Pa. Safety pin. 1,623,532; Apr. 5.

Dudas, Andrew, and A. P. Wasil, Homestead, Pa. Safety pin with bayonet point. 1,623,533; Apr. 5.

Duhamel, Francois X A., Ottawa, Ontario, Canada. Camera. 1,623,534; Apr. 5.

Dunbar, Francis W., Chicago, Ill., assignor, by mesne assignments, to Kellogg Switchboard & Supply Co. Telephone system. 1,623,336; Apr. 5.

Dunbar, Francis W., Chicago, Ill., assignor, by mesne assignments, to Kellogg Switchboard & Supply Company. Telephone-exchange system. 1,623,337; Apr. 5.

Duncan, Joseph S., assignor to Addressograph Company, Chicago, Ill. Printing machine. 1,623,396; Apr. 5.

Dunlap, Ralph S., Chicago, Ill. Saucepan. 1,623,397; Apr. 5.

Dunn, Patrick P., and G. Shoenfeld, Great Falls, Mont. Typewriter-key remover. 1,623,912; Apr. 5.

Dunnock, John L., and C. R. Nixon, Baltimore, Md. Apparatus for removing waste glass from blowpipes. 1,623,581; Apr. 5.

Dunston, Wayne E., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper. 1,623,398; Apr. 5.

Du Pont, E. I., de Nemours & Company. (See Jacobs, Charles B., assignor.)

Durant, John D., assignor to The Schaap-Durant Control Corporation, New York, N. Y. Indicator for fuel supply tanks and the like. 1,623,832; Apr. 5.

Duro Company, The. (See Eisenhauer, Charles P., assignor.)

Dürr, Ludwig, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Gas-cell protection for airships. 1,623,663; Apr. 5.

Dwight, Ralph W. (See Frick, C. A., and Dwight.)

Dyer, Harry W., New York, N. Y. Child's vehicle. Des. 72,361; Apr. 5.

Eastman Kodak Company. (See Baybutt, R., and Farrow, assignors.)

Eastman Kodak Company. (See Bent, Walter G., assignor.)

Eastman Kodak Company. (See De Moos, Charles, assignor.)

Eastman Kodak Company. (See Meyering, Bernard H., assignor.)

Eastman Kodak Company. (See Sheppard, S. E., and Punnett, assignors.)

Eastman Kodak Company. (See Sheppard, S. E., and Sweet, assignors.)

Eastman Kodak Company. (See Tessier, Julien, assignor.)

Eastman Kodak Company. (See Wittel, Otto, assignor.)

Eberle, Anton. (See Jones, W. H., and Eberle.)

Eckart, George F., Cincinnati, Ohio, assignor, by mesne assignments, to J. M. Zane, Chicago, Ill. Flexible coupling. 1,623,582; Apr. 5.

Eckles, Noble, assignor of three-fourths to L. W. Rhode, San Diego, Calif. Vacuum fuel system for carburetors. 1,623,237; Apr. 5.

Echols, Francis G., assignor to Greenfield Tap and Die Corporation, Greenfield, Mass. Rotary cutting tool. 1,623,953; Apr. 5.

Econom, Louis G., North Plainfield, N. J. Portable reciprocating power saw. 1,623,309; Apr. 5.

Edwards, Donald V., Troy, N. Y., assignor to Pittsburgh Transformer Company. Corrugating machine. 1,623,467; Apr. 5.

Egenhoff, William D., Maricopa, Calif. Pressure-relief mechanism for wells. 1,623,866; Apr. 5.

Eisenberg, M., & Son. (See Crumley, Le Roy A.)

Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Water-softening apparatus. 1,623,399; Apr. 5.

Electric Vacuum Cleaner Company. (See Lang, Henry T., assignor.)

Ellett, Luther S., Milburn, Okla. Spark plug. 1,623,468; Apr. 5.

Elliott, Elizabeth S. G., New York, N. Y., assignor to W. H. & A. E. Margerison & Co., Philadelphia, Pa., a firm composed of W. H. and A. E. Margerison. Towel. Des. 72,362; Apr. 5.

Ellis, J. William. (See Ferguson, Lyman H., assignor.)

Ellis, Stuart, Fredericksburg, Va. Irrigated and ventilated flower box. 1,623,720; Apr. 5.

Emrick, Frank W., Buchanan, Iowa. Chain. 1,623,172; Apr. 5.

Englund, Edwin H. L., assignor of one-third to S. M. Peterson and one-third to H. M. Peterson, Muskegon Heights, Mich. Tricycle. 1,623,400; Apr. 5.

Erickson, Albert O., assignor of one-half to K. Wold, Jasper, Minn. Spring tool. 1,623,401; Apr. 5.

Ernst, Harry J., assignor to The D. T. Williams Valve Company, Cincinnati, Ohio. Valve structure and locking device. 1,623,867; Apr. 5.

Erskine-Danforth Corporation. (See Erskine, Ralph C., assignor.)

Erskine, Ralph C., Stamford, Conn., assignor to Erskine-Danforth Corporation. Table. Des. 72,363; Apr. 5.

Eschbach, Wilhelm, Troisdorf, Germany. Explosive cap. 1,623,664; Apr. 5.

Etablissements Poulenc Frères. (See Vigreux, Charles, assignor.)

Evalet, Emil, Alliance, Ohio. Swing. 1,623,913; Apr. 5.

Evans, Edward S. (See Harry, Earl L., assignor.)

Everist, Charles T. (See Sieber, Jacob, assignor.)

Fageol, Rollie B., Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Parallel-bar bumper. 1,623,583; Apr. 5.

Fageol, Rollie B., Los Angeles, Calif., assignor to American Chain Company, Inc. Spacer clamp for bumpers. 1,623,584; Apr. 5.

Fagerstrom, Lawrence F. (See Caswell, Fred C., assignor.)

Fahrenwald, Frank A., Chicago Heights, Ill. Metallurgical furnace. 1,623,469; Apr. 5.

Farrel Foundry & Machine Company. (See Bowen, D. R., and Schnuck, assignors.)

Farrow, Edward S., jr. (See Baybutt, R., and Farrow.)

Fay, Carl J., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Waffle iron. Des. 72,364; Apr. 5.

Fay, Richard D., Nahant, and E. Wolf, assignors, by mesne assignments, to H. V. Hayes, trustee, Boston, Mass. Method and apparatus for producing alternating currents. 1,623,665; Apr. 5.

Fayle, Charles E., Montreal, Quebec, assignor to J. E. Ward, Montreal, Canada. Sign. 1,623,585; Apr. 5.

Feltenstein, Harry M. (See Crumley, Le Roy A., assignor.)

Ferguson, Andrew D. (See Blevin, F. L., and Ferguson.)

Ferguson, Charles, Spokane Wash. Attachment for beverage mixers. 1,623,535; Apr. 5.

Ferguson, Lyman H., Ithaca, assignor to J. W. Ellis, Buffalo, N. Y. Combined tire carrier and rim remover. 1,623,914; Apr. 5.

Ferkel, Karl A., Los Angeles, Calif. Temperature-indicating means. 1,623,666; Apr. 5.

Finch, Edward R. (See Smith, E. A., and Finch.)

Finckh, Dr., Apparate-Gesellschaft m. b. H. (See Ritter, Heinrich, assignor.)

Fischer, Hermann, New York, N. Y. String musical instrument. 1,623,667; Apr. 5.

Fischer, Joseph, assignor to F. Meyer, Redelm, S. Dak. Marine propeller. 1,623,868; Apr. 5.

Fisher, John W., Blackpool, England. Carburetor. 1,623,668; Apr. 5.

Fisher, Oliver W., East Baton Rouge, La. Lubricant pump. 1,623,101; Apr. 5.

Fisk Rubber Company, The. (See Hennessy, Daniel E., assignor.)

Fletcher, Archie R. (See Smyser, Elmer D., assignor.)

Flexo-Industrie-Gesellschaft m. b. H. (See Sauveur, Harry, assignor.)

Florey, Edward C., assignor of one-half to C. E. Sturges, San Jose, Calif. Air intake for internal-combustion engines. 1,623,721; Apr. 5.
Fonda, Gorton R., Schenectady, N. Y., assignor to General Electric Company. Incandescent filament. 1,623,784; Apr. 5.
Fonrobert, Ewald. (See Amann, A., and Fonrobert.)
Forfar, Donald, Minneapolis, Minn. Backwater valve. 1,623,586; Apr. 5.
Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Electrically-controlled door-operating apparatus. 1,623,173; Apr. 5.
Forman, Paris R., Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y. Door-operating system for one-man cars. 1,623,174; Apr. 5.
Fossen, Arthur B., Spokane, Wash. Roof construction. 1,623,102; Apr. 5.
Foster, Charles E., Letchworth, England. Measuring instrument. 1,623,915; Apr. 5.
Foster Machine Company. (See McKean, John O., assignor.)
Foster, William. (See Chase, P. H., and Foster.)
Frank, John G., Buffalo, N. Y. Magnet-power-transmission gearing. 1,623,669; Apr. 5.
Frankenfeld, Leo, Hoboken, N. J. Exercising apparatus. 1,623,670; Apr. 5.
Frankenfeld, Leo, Hoboken, N. J. Exercising apparatus. 1,623,671; Apr. 5.
Franklin, William S., Cambridge, Mass. Pump and internal-combustion engine therefor. 1,623,402; Apr. 5.
Frantz Manufacturing Company. (See Frantz, Peter, assignor.)
Frantz, Peter, assignor to Frantz Manufacturing Company, Sterling, Ill. Padlock-hasp device. 1,623,050; Apr. 5.
Fraser, Frank, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Multiple-sheet-flowing apparatus. 1,623,051; Apr. 5.
Frederick, Rheuel H., Irvington, N. J., assignor of two-fifths to C. F. Ames, Brooklyn, and one-fifth to A. H. E. Berchem, New York, N. Y. Vacuum-producing apparatus. 1,623,103; Apr. 5.
Frederick, Rheuel H., Irvington, N. J., assignor of two-fifths to C. F. Ames, Brooklyn, and one-fifth to A. H. E. Berchem, New York, N. Y. Centrifugal pump. 1,623,104; Apr. 5.
Frederickson, Otto A., Wethersfield, assignor to The American Wiremold Company, Hartford, Conn. Outlet box. 1,623,587; Apr. 5.
Frick, Chester A., assignor to Glascock Brothers Manufacturing Company, Muncie, Ind. Corrugating machine. 1,623,916; Apr. 5.
Frick, Chester A., assignor to Glascock Brothers Mfg. Company, Muncie, Ind. Bottle refrigerator. 1,623,947; Apr. 5.
Frick, Chester A., and R. W. Dwight, assignors to Glascock Brothers Manufacturing Company, Muncie, Ind. Automobile body. 1,623,946; Apr. 5.
Friedel, Otto B., Obersachsenberg, Germany. Musical instrument. 1,623,175; Apr. 5.
Friedrich, Robert F., assignor to Weber & Friedrich, Inc., Philadelphia, Pa. Stocking. Des. 72,365; Apr. 5.
Friel, John J., Tulsa, Okla. Oil saver. 1,623,403; Apr. 5.
Frilli, Ugo. (See Pintacuda, C., and Frilli.)
Fristad, Carl G., Mandan N. Dak. Sickle holder. 1,623,536; Apr. 5.
Frolking, Stanley A., Cleveland, assignor to Brilliant Glass Products, Inc., Brilliant, Ohio. Bathroom fixture. Des. 72,366; Apr. 5.
Frolking, Stanley A., Cleveland, assignor to Brilliant Glass Products, Inc., Brilliant, Ohio. Bathroom fixture. Des. 72,367; Apr. 5.
Frost, Thomas H., and P. Heymans, Brookline, Mass. Dynamometer gauge. 1,623,238; Apr. 5.
Fry, H. C., Glass Company. (See Brenner, Ralph F., assignor.)
Fuller, Frederick L., Ilion, N. Y., assignor to Remington Arms Company, Inc. Cash register. 1,623,722; Apr. 5.
Fuller, Truman S., Schenectady, N. Y., assignor to General Electric Company. Nickel alloy. 1,623,948; Apr. 5.
Funderburk, Otis C., Boston, Mass. Valve for internal-combustion engines. 1,623,176; Apr. 5.
Funderburk, Otis C., Boston, Mass. Valve for internal-combustion engines. 1,623,177; Apr. 5.
Galbreath, Edwin B., Long Beach, Calif. Hydraulic pump and system. 1,623,239; Apr. 5.
Gamble, David E., assignor to The Borg & Beck Company, Chicago, Ill. Friction clutch. 1,623,470; Apr. 5.
Garey, Raymond M. (See Henwood, Abraham, assignor.)
Garrard, Charles G., London, England. Transmission of power. 1,623,052; Apr. 5.
Gaudian, William F., Dallas, Tex. Wall construction. 1,623,917; Apr. 5.
Gearhart, Lewis E., Marietta, Ohio. Building-block mold. 1,623,178; Apr. 5.
Gegenheimer, William, Baldwin, and E. E. Barney, Port Washington, N. Y. Apparatus for cleaning cylinders of offset and other presses. 1,623,723; Apr. 5.
Geis, Walter A., Midvale, Ohio. Pipe-cutting device. 1,623,833; Apr. 5.
General Electric Company. (See Brown, C. A., and Van Sickle, assignors.)
General Electric Company. (See Crocker, Clarence T., assignor.)
General Electric Company. (See Fonda, Gorton R., assignor.)
General Electric Company. (See Fuller, Truman S., assignor.)
General Electric Company. (See Gräner, Ladislaus P., assignor.)
General Electric Company. (See Hilliard, John D., assignor.)
General Electic Company. (See Hoxie, Charles A., assignor.)
General Electric Company. (See Hundt, Albert, assignor.)
General Electric Company. (See King, Terry T., assignor.)
General Electric Company. (See Murphy, Edwin J., assignor.)
General Electric Company. (See Paul, William E., assignor.)
General Electric Company. (See Skaupy, Franz, assignor.)
General Electric Company. (See Van Amburg, Otto H., assignor.)
General Electric Company. (See Way, Alva O., assignor.)
General Electric Company. (See Wilkinson, James, assignor.)
General Fire Extinguisher Company. (See Hoffman, Herbert E., assignor.)
General Motors Corporation. (See Himes, Howard P., assignor.)
General Motors Corporation. (See Minch, Walter B., assignor.)
General Motors Corporation. (See Taub, Alex, assignor.)
Germain, Albert A., et al., trustees. (See Germain, Edward F., assignor.)
Germain, Edward F., et al., trustees. (See Germain, Edward F., assignor.)
Germain, Edward F., Saginaw, Mich., assignor to L. Germain, jr., A. A. Germain, and J. Heidenkamp, Pittsburgh, Pa., and E. F. Germain, Saginaw, Mich., trustees. Making fibrous composition and articles produced therefrom. 1,623,588; Apr. 5.
Germain, Louis, jr., et al., trustees. (See Germain, Edward F., assignor.)
Gerns, William H., East Orange, assignor to Brandes Laboratories, Inc., Newark, N. J. Cone type loud speaker. Des. 72,368; Apr. 5.
Gerth, Lewis W. (See Dailey, J. A., and Gerth.)
Giardino, Joachim, West New York, N. J. Tension device for the harness of looms. 1,623,105; Apr. 5.
Giblin, Marc A. (See Rodgers, T. T., Giblin, and Moore.)
Gibson, Earl S. (See Williams, S. B., and Gibson.)
Gilbert, Lovic R. (See Blackston, Edward A., assignor.)
Gilderdale, Charles W. (See Baker, G. R., Prescott, and Gilderdale.)
Gildersleeve, John H., Corona, N. Y. Demountable interlocking rim for vehicle tires. 1,623,834; Apr. 5.
Gillen, George A., Jersey City, N. J., assignor to Gillen Laboratories Corporation, Elmhurst, N. Y. Sound-reproducer mounting. 1,623,785; Apr. 5.
Gillen Laboratories Corporation. (See Gillen, George A., assignor.)
Gilman, Arthur S. (See Strawn, Ervin E., assignor.)
Giraldi, Armando, East Braintree, Mass. Muscle exerciser. 1,623,869; Apr. 5.
Girard, Henry A., Hartford, Conn. Automotive tool. 1,623,786; Apr. 5.
Giri, Christian, assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Automobile bumper. 1,623,404; Apr. 5.
Gizewski, John, assignor of one-half to J. J. Klimoski, Denver, Colo. Headlight-control switch. 1,623,937; Apr. 5.
Glascock Brothers Mfg. Company. (See Frick, Chester A., assignor.)
Glascock Brothers Manufacturing Company. (See Frick, Chester A., assignor.)
Glascock Brothers Manufacturing Company. (See Frick, C. A., and Dwight, assignors.)
Glenister, Annie, Epsom, England. Spring roller for blinds and screens. 1,623,835; Apr. 5.
Gocke, James B., and C. F. De Corse, Los Angeles, Calif.; said De Corse, assignor to said Gocke. Pipe straightener. 1,623,405; Apr. 5.
Goetz, Oscar H., Springfield, Mass., assignor to American Chain Company, Inc. Automobile bumper. 1,623,471; Apr. 5.
Goldberg, Samuel, New York, N. Y. Horn. 1,623,106; Apr. 5.
Goldsmith Metal Lath Company, The. (See Goldsmith, William M., assignor.)
Goldsmith, William M., assignor to The Goldsmith Metal Lath Company, Cincinnati, Ohio. Tie and spacing means for plastic construction. 1,623,338; Apr. 5.
Goldstein, Charles, Chicago, Ill. Binder. 1,623,339; Apr. 5.
Goodgame, Allen, Rexford, Mont. Fishhook. 1,623,870; Apr. 5.
Goodrich, Coy C., San Francisco, Calif. Lubricating system. 1,623,240; Apr. 5.
Goodyear Tire & Rubber Company, The. (See Beebe, Paul, assignor.)

Goodyear Tire & Rubber Company, The. (See Colley, Fred, assignor.)
Goodyear Tire & Rubber Company, The. (See Kraft, Herman T., assignor.)
Goodyear Tire & Rubber Company, The. (See Stephens, William, assignor.)
Goodyear Tire & Rubber Company, The. (See Zimmerman, Charles H., assignor.)
Goodyear-Zeppelin Corporation. (See Klemperer, Wolfgang B., assignor.)
Goodyear's Metallic Rubber Shoe Company, The. (See Randall, C. J., and Wurtenberg, assignors.)
Goodykoontz, Albert M., Harlingen, Tex. Gasoline receptacle. 1,623,107; Apr. 5.
Gormley, Frank L., Brookline, Mass., assignor to The Buda Company, Harvey, Ill. Operating mechanism for lifting jacks. 1,623,108; Apr. 5.
Gould, George, Olney, Ill. Mop. 1,623,672; Apr. 5.
Granath, Joseph D., Chicago, Ill. Internal-combustion engine. 1,623,589; Apr. 5.
Gräner, Ladislaus P., New York, N. Y., assignor, by mesne assignments, to General Electric Company. Metal cap for electric incandescent lamps and its manufacture. 1,623,836; Apr. 5.
Grasselli Dyestuff Corporation. (See Herz, R., and Müller, assignors.)
Grasselli Dyestuff Corporation. (See Herz, R., and Schulte, assignors.)
Grebe, Alfred H., Hollis, N. Y. Radio receiving apparatus. 1,623,918; Apr. 5.
Green, Arthur, Coventry, England. Refrigeration and cold storage. 1,623,871; Apr. 5.
Greenfield Tap and Die Corporation. (See Echols, Francis G., assignor.)
Greenstreet, Charles J., Chicago, Ill., assignor to American Coalinoil Corporation, New York, N. Y. Fuel and producing same. 1,623,241; Apr. 5.
Greer, Edward R., assignor to Trail-It Company, Minneapolis, Minn. Tractor hitch. 1,623,179; Apr. 5.
Greiwe, Hugo F. (See Kelley, E. H., Greiwe, and Hoskin.)
Griscom-Russell Company, The. (See Sebald, Leslie E., assignor.)
Groove-Lock Co. (See Zeindlhofer, Anton, sr., assignor.)
Grose, Frank E., Coburg, Victoria, Australia. Jig-saw machine. 1,623,673; Apr. 5.
Gruber, Joseph, Sioux Falls, S. Dak. Heater and purifier. 1,623,242; Apr. 5.
Gubelmann, Ivan, H. J. Weiland, and O. Stallman, South Milwaukee, Wis., assignors to The Newport Company. Making guaiacol. 1,623,949; Apr. 5.
Gulf Oil Burner Company. (See Buerger, Charles B., assignor.)
Gunnison, John H., Madison, Wis. Mixer. 1,623,590; Apr. 5.
Gurney, Erving R., Beechhurst, assignor to International Motor Company, New York, N. Y. Indicating device. 1,623,472; Apr. 5.
Gurney, Erving R., Beechhurst, assignor to International Motor Company, New York, N. Y. Cushion support for radiators. 1,623,473; Apr. 5.
Gustafson, Charles J., assignor to Stromberg Motor Devices Company, Chicago, Ill. Carburetor. 1,623,180; Apr. 5.
Gustafson, Hjalmer C., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Tool retainer. Re16,587; Apr. 5.
Gutierrez, Alphonso J., Detroit, Mich. Movable-sign exhibitor. 1,623,837; Apr. 5.
Haas, Philip, Dayton, Ohio. Flushing-valve mechanism. 1,623,109; Apr. 5.
Hadley, Walter C., New York, N. Y., assignor, by mesne assignments, to Columbia Phonograph Company, Inc., Bridgeport, Conn. Phonograph record. Re16,588; Apr. 5.
Hage, Rudolf A., Gottenborg, Sweden. Coupling. 1,623,110; Apr. 5.
Hagen, Louis, Jersey City, N. J. Supporting attachment for clotheslines. 1,623,919; Apr. 5.
Hagestedt, Henry, Chicago, Ill. Cashier's robbery protector. 1,623,674; Apr. 5.
Hale, William E., Walpole, assignor to Bird & Son, Inc., East Walpole, Mass. Roofing. 1,623,474; Apr. 5.
Hall, Richard E., assignor to Seaman Container Manufacturing Corporation, Olean, N. Y. Pulp-pressing head. 1,623,111; Apr. 5.
Hall, William H., assignor to The Pedlar People Limited, Oshawa, Canada. Corrugated pipe or culvert. 1,623,112; Apr. 5.
Hammond, John H., jr. (See Murray, Albert F., assignor.)
Hammond, John H., jr., Gloucester, Mass. Detonator-control mechanism. 1,623,475; Apr. 5.
Hancock, William L., assignor to The Murray Company, Dallas, Tex. Huller and opener. 1,623,181; Apr. 5.
Hand, Erle H., New Britain, Conn. Height-measuring device. 1,623,406; Apr. 5.
Hanna, Clinton R. (See Slepian, J., and Hanna.)
Hansen, Edward R. (See Hawkins, B. H., and Hansen.)
Hanson, Bengt M. W., deceased, Hartford, Conn.; E. A. Hanson and C. E. Whitney, executors. Apparatus for and method of truing abrasive screws. 1,623,113; Apr. 5.
Hanson, Einar A., et al., executors. (See Hanson, Bengt M. W.)
Hanson, Hugo H., assignor to Tarratine Manufacturing Co. Inc., Bangor, Me. Soap compound and making the same. 1,623,340; Apr. 5.
Hare, Charles N., Lima, Ohio. Ocean compressed-air power. 1,623,341; Apr. 5.
Harrington, John H., Baie D'Urfe, Quebec, assignor of one-third to G. W. Robb, Montreal, Quebec, Canada. Treatment of water. 1,623,342; Apr. 5.
Harris, Frank C., Brighton, Mass., assignor to The American Monorail Company, Cleveland, Ohio. Electrified monorail system. 1,623,920; Apr. 5.
Harris, Howard B. (See Butcher, J. E., and Harris.)
Harrod, Lewis C., Long Island, N. Y. Self-adjusting packing for pistons. 1,623,407; Apr. 5.
Harry, Earl L., Pontiac, assignor to E. S. Evans, Detroit Mich. Motor-vehicle transmission mechanism. 1,623,724; Apr. 5.
Harry, Earl L., Pontiac, assignor to E. S. Evans, Detroit Mich. Transmission mechanism for motor vehicles. 1,623,725; Apr. 5.
Hart, Harry S., Chicago, Ill. Car construction. 1,623,591; Apr. 5.
Hart, Harry S., Chicago, Ill. Car construction. 1,623,592; Apr. 5.
Harter, Noah S., assignor to Cyclone Fence Company, Waukegan, Ill. Coating wire fabric. 1,623,593; Apr. 5.
Harter, Sherman, assignor to The New Method Stov Company, Mansfield, Ohio. Oven-door structure. 1,623,408; Apr. 5.
Hartmann Trunk Company. (See Rasmussen, Martin, assignor.)
Harvey, Arthur R., Middletown, Ohio. Device for determining moisture percentage in a web, and roll construction therefor. 1,623,675; Apr. 5.
Harvey, Redge, and A. P. Washlake, Detroit, Mich. Dishwashing machine. 1,623,182; Apr. 5.
Haskell, Parker B., et al. (See Pohle, Walter B., assignor.)
Haug, Anton J., Nashua, N. H. Method of and apparatus for working paper stock. 1,623,676; Apr. 5.
Haugland, Richard C., Jackson, Minn. Harrow. 1,623,114; Apr. 5.
Hawkins, Bert H., Royal Oak, and E. R. Hansen, Detroit, assignors to McCord Radiator & Mfg. Co., Detroit, Mich. Machine for beading radiator fins. 1,623,594; Apr. 5.
Hayes, Hammond V., trustee. (See Fay, R. D., and Wolf, assignors.)
Haynes, Charles V., Ardmore, Pa., assignor to Hoffman Specialty Company, Waterbury, Conn. Steam-impelled motive apparatus. 1,623,243; Apr. 5.
Haynes, Bessie E., Washington, D. C. Hair waver. 1,623,838; Apr. 5.
Healey-Aeromarine Bus Company. (See Chilton, Roland, assignor.)
Heidenkamp, Joseph, et al., trustees. (See Germain, Edward F., assignor.)
Heintz, James C., Lakewood, Ohio. Vulcanizing apparatus. 1,623,677; Apr. 5.
Hempen, Fred J., and O. Lipsmeier, Aviston, Ill. Receptacle and handle therefor. 1,623,409; Apr. 5.
Hemphill Co. (See Lawson, Robert H., assignor.)
Hennessy, Daniel E., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Vulcanization. 1,623,183; Apr. 5.
Hensley, Kellis S., Wanego, W. Va. Electrically-controlled cut-out. 1,623,115; Apr. 5.
Henwood, Abraham, Cynwyd, assignor, by mesne assignments, to R. M. Garey, Willow Grove, Pa. Preparation of hydrogen sulphide. 1,623,942; Apr. 5.
Herds, Edwin, New York, N. Y. Motor vehicle. 1,623,726; Apr. 5.
Herz, Richard, and F. Schulte, Frankfort-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Producing 1.8-hydroxynaphthoic acid. 1,623,678; Apr. 5.
Herz, Richard, Frankfort-on-the-Main, and J. Müller, Hanau-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Green blue to green vat dyestuffs of the thioindigo series. 1,623,410; Apr. 5.
Heuring, Fred H., Niagara, Wis. Grinder shaft. 1,623,116; Apr. 5.
Heyman, Fred M. (See Wishnevsky, Leo B., assignor.)
Heymans, Paul. (See Frost, T. H., and Heymans.)
Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Combined bag clasp and catch. 1,623,595; Apr. 5.
Higgins, John J. (See Madden, H. D., and Higgins.)
Hill, Luther, Los Angeles, Calif. Antirattle window lock. 1,623,343; Apr. 5.
Hill, William W., Duquesne, Pa. Apparatus for treating steel. 1,623,537; Apr. 5.
Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,623,787; Apr. 5.
Hills, Harry B., assignor to Steward Davit & Equipment Corporation, New York, N. Y. Drain device for lifeboats. 1,623,727; Apr. 5.
Hilsinger, Adin W., Orange, N. J., assignor to Henry Brady, Inc. Paper-box guiding and conveying mechanism. 1,623,310; Apr. 5.
Himes, Howard P., assignor of one-half to General Motors Corporation, Detroit, Mich. Electric arc-welding apparatus. 1,623,344; Apr. 5.

Hinde, James J., Sandusky, Ohio. Manufacturing insulating and plaster board from cornstalks. 1,623,184; Apr. 5.

Hinde, James J., Sandusky, Ohio. Railway tie. 1,623,185; Apr. 5.

Hobart Manufacturing Company. (See Akers, Milton K., assignor.)

Hochriem, Gustav F., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill. Coin selector. 1,623,186; Apr. 5.

Hodecker, Wilhelm, Ilmenau, Germany. Manufacturing double-walled glass vessels. 1,623,311; Apr. 5.

Hoffman, Herbert E., assignor to General Fire Extinguisher Company, Providence, R. I. Automatic mixing and discharging system for plural liquids. 1,623,476; Apr. 5.

Hoffman, Michael, Los Angeles, Calif. Transmission-band-operating device. 1,623,312; Apr. 5.

Hoffman Specialty Company. (See Haynes, Charles V., assignor.)

Holland, Frank, Poplar Bluff, Mo. Plotting square. 1,623,117; Apr. 5.

Holmes, Frank E., assignor to Bloomfield-Holmes Corporation, Pasadena, Calif. Compressor. 1,623,596; Apr. 5.

Holmes, Harry A., Aurelia, Iowa. Mechanical movement. 1,623,872; Apr. 5.

Holmes, Ralph C., assignor to The Texas Company, New York, N. Y. Treating hydrocarbon oils. 1,623,729; Apr. 5.

Hooper, John E., Milford, Mass. Shoe rack. 1,623,244; Apr. 5.

Hooton, Gordon B., Grand Rapids, Mich. Oil-purifying system. 1,623,728; Apr. 5.

Hoover Company, The. (See Hoover, Howard E., assignor.)

Hoover, Howard E., Chicago, Ill., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Suction sweeper. Re16,585; Apr. 5.

Hopkins, Nevil M., New York, N. Y., assignor to National Carbon Company, Inc. Electrical apparatus and core therefor. 1,623,345; Apr. 5.

Hopkins, Roy S., Parkersburg, W. Va. Automatically-focusing camera. 1,623,538; Apr. 5.

Horni, Paul P., Newark, N. J. Closure. 1,623,477; Apr. 5.

Horten, Alphons, Berlin Wilmersdorf, Germany. Apparatus for forming concrete pipes. 1,623,539; Apr. 5.

Horton, Ralph, New York, N. Y. Milk transfer system. 1,623,313; Apr. 5.

Hoskin, Fred E. (See Kelley, E. H., Greiwe, and Hoskin.)

Hosier, Grace B., Reedsburg, Wis. Hot-dish lifter. 1,623,679; Apr. 5.

Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Closing containers. 1,623,245; Apr. 5.

Howard, Frank A., and J. R. Wright, Elizabeth, N. J., assignors to Standard Development Company, New York, N. Y. Controlling combustion in internal-combustion engines. 1,623,053; Apr. 5.

Howell, George M., Northumberland, Pa. Automatic control for motor vehicles. 1,623,921; Apr. 5.

Hoxie, Charles A., Schenectady, N. Y., assignor to General Electric Company. Photographic-developing apparatus. 1,623,788; Apr. 5.

Hruska, Frank J., assignor to Le Febure Ledger Company, Cedar Rapids, Iowa. Loose-leaf binder. 1,623,314; Apr. 5.

Hubener, William A., assignor to Diamond Expansion Bolt Company, New York, N. Y. Toggle and method. 1,623,789; Apr. 5.

Hudson, John, Brooklyn, N. Y. Air-circulating system for cargo vessels. 1,623,922; Apr. 5.

Huebsch, Joseph, Milwaukee, Wis. Universal ironing machine. 1,623,187; Apr. 5.

Hueckler, Rudolf. (See Sears, F. W., and Buck, assignors.)

Hilerttle, Karl, Akron, Ohio, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Bodensee, Germany. Outer cover of rigid airships. 1,623,681; Apr. 5.

Hughes, H. E., et al. (See Johnson, Albert, assignor.)

Hughes, L. V., et al. (See Johnson, Albert, assignor.)

Hulshizer, George W., Stewartsville, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J. Friction head for rifle bars. 1,623,411; Apr. 5.

Humphrey, David, deceased, Cleveland, Ohio; H. J. Humphrey, executor. Beverage-dispensing device. 1,623,597; Apr. 5.

Humphrey, H. J., executor. (See Humphrey, David.)

Hundt, Albert, Karlshorst, Germany, assignor to General Electric Company. Control of choke coil with switching-in tap transformer. 1,623,839; Apr. 5.

Hunt, Allan F. (See Bondeson, J. A., and Hunt.)

Hunt, Charles J., assignor of thirty-five per cent to E. G. Infield, Barnsdall, Okla. Drying apparatus. 1,623,540; Apr. 5.

Hupp Motor Car Company. (See McDowell, Lamont A., assignor.)

Hurst, James D., assignor to Schumann Piano Company, Rockford, Ill. Truss structure for upright piano cases. 1,623,188; Apr. 5.

Hürttle, Karl. (See Baumeister, H., Dörr, and Hürttle.)

Hürttle, Karl, Akron, Ohio, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Outer cover on rigid airships. 1,623,680; Apr. 5.

Hutchens, Edward, Milwaukee, Wis. Pulp-forming press. 1,623,731; Apr. 5.

Hutchens, Edward, Milwaukee, assignor to Utility Manufacturing Co., Cudahy, Wis. Horizontal bead flipper. 1,623,730; Apr. 5.

Hutson, Roy D., Rosendale, Mo. Tool brace. 1,623,541; Apr. 5.

Infield, Earl G. (See Hunt, Charles J., assignor.)

Ingersoll Milling Machine Company, The. (See Johnson, John R., assignor.)

Ingersoll-Rand Company. (See Hulshizer, George W., assignor.)

Ingersoll-Rand Company. (See Lee, Gordon, assignor.)

Ingersoll-Rand Company. (See Naab, Julius, assignor.)

Ingersoll-Rand Company. (See Redfield, Snowden B., assignor.)

Interflash Signal Corporation. (See Conover, Arthur V., assignor.)

International Business Machines Corporation. (See Peirce, John R., assignor.)

International Motor Company. (See Gurney, Erving R., assignor.)

International Nickel Co., The. (See Lellep, Otto, assignor.)

International Paper Company. (See Peschl, Frank A., assignor.)

International Postal Supply Company. (See Jahn, Raymond F., assignor.)

Irwin & Company. (See Cohn, Irwin, assignor.)

Isom, Edward W., Winnetka, Ill., and J. E. Bell, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Condensation of hydrocarbons. 1,623,790; Apr. 5.

Jackson, Charles K., Columbus, Ohio. Fencing construction. 1,623,873; Apr. 5.

Jackson, John A., and P. Swanson, Invercargill, New Zealand. Carburetor. 1,623,682; Apr. 5.

Jackson, William E. (See Reynolds, W. B., and Jackson.)

Jacobi, Edward N. (See Briggs, S. F., and Jacobi.)

Jacobs, Charles B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Carbon catalyst and making it. 1,623,598; Apr. 5.

Jacobs, Charles B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Removing cyanides from masses containing the same. 1,623,599; Apr. 5.

Jacobs, Richard D., Detroit, Mich. Mechanical movement. 1,623,732; Apr. 5.

Jacobsen, Emil, Port Washington, N. Y., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,623,118; Apr. 5.

Jahn, Raymond F., assignor to International Postal Supply Company, Brooklyn, N. Y. Printing-die structure. 1,623,478; Apr. 5.

Jahnke, Albert A., San Francisco, Calif. Electrolytic cell. 1,623,246; Apr. 5.

Jammer, Jacob S., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission regulation. 1,623,600; Apr. 5.

Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Automobile bumper. 1,623,412; Apr. 5.

Jandus, Herbert S., and H. L. Blydenburgh, assignors to The C. G. Spring and Bumper Company, Detroit, Mich. Bumper. 1,623,413; Apr. 5.

Jennings, John T., Birmingham, England. Carburetor. 1,623,683; Apr. 5.

Jepson, John W., Elizabeth, N. J. Brake. 1,623,733; Apr. 5.

Jensen, Thomas C., assignor to Scandinavian Export Agency, Ltd., Copenhagen, Denmark. Automatic weighing scale. 1,623,414; Apr. 5.

Johnson, Albert, assignor of one-fourth to L. V. and H. E. Hughes, Los Angeles, Calif. Draft control for locomotives. 1,623,054; Apr. 5.

Johnson, Axel Z., assignor to The Dahlstrom Metallic Door Company, Jamestown, N. Y. Doorframe. 1,623,874; Apr. 5.

Johnson, Clarence L., Littleton, Colo. Tire boot and fastener therefor. 1,623,923; Apr. 5.

Johnson, Edward E., St. Paul, Minn. Screen coupling. 1,623,055; Apr. 5.

Johnson, Fred H., and S. R. Lathrop, Sapulpa, Okla. Conveyer for leer-charging apparatus. 1,623,247; Apr. 5.

Johnson, John E., assignor to The Speedaumatic Company, Chicago, Ill. Addressing machine. 1,623,542; Apr. 5.

Johnson, John R., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Feed mechanism for machine tools. 1,623,346; Apr. 5.

Jones & Laughlin Steel Corporation. (See Rendleman, Norman C., assignor.)

Jones, William H., Fellows, and A. Eberle, Taft, Calif. Ball catcher. 1,623,543; Apr. 5.

Joseph, Frederick, and I. Creamer, assignors of one-third to J. Alterman, New York, N. Y. Faucet attachment. 1,623,248; Apr. 5.

Joy, Vernon A., New York, N. Y. Hairpin box. 1,623,684; Apr. 5.

Kahn, Julius, Youngstown, Ohio. Electric-welding machine. 1,623,249; Apr. 5.

Kain, Clifford H., San Carlos, Calif. Rotary internal-combustion engines. 1,623,875; Apr. 5.

Kain, Clifford H., San Carlos, Calif. Rotary pump and motor. 1,623,924; Apr. 5.

Kara-Joseph, Kalil, Philadelphia, Pa. Renovating clothing. 1,623,791; Apr. 5.

Karlitzky, John, Garwood, assignor to H. B. Newhall, Plainfield, N. J. Cable clamp and bridle ring. 1,623,792; Apr. 5.

Kasey, Charles, West Newton, Pa. Chicken feeder. 1,623,840; Apr. 5.

Kearney, Graham, Lisbon, Ohio. Tee for golf balls. 1,623,119; Apr. 5.

Kelley, Earl H., H. F. Greiwe, and F. E. Hoskin, Portland, Oreg. Carburetor. 1,623,347; Apr. 5.

Kelley, Victor H., assignor to Madison Tool and Stamping Works, Madison, Wis. Gauge for mortising machines. 1,623,621; Apr. 5.

Kellner, Walter H. (See Miller, A. B., and Kellner.)

Kellogg Switchboard & Supply Co. (See Dunbar, Francis W., assignor.)

Kenan, John J. W., Orange, N. J. Acid-proof valve. 1,623,056; Apr. 5.

Kennedy, Thomas H., Alta Loma, Tex. Heater. 1,623,415; Apr. 5.

Kern, Andrew J., Paris, Ky. Cultivator. 1,623,120; Apr. 5.

Kern, Ludwig, Baltimore, Md. Making cement. 1,623,876; Apr. 5.

Kerr, Robert M., assignor to Detroit Dental Manufacturing Company, Detroit, Mich. Dental case. 1,623,793; Apr. 5.

Kettering, Charles F., assignor, by mesne assignments, to Dayton-Wright Company, Dayton, Ohio. Control apparatus. 1,623,121; Apr. 5.

Kiefer, Karl, Cincinnati, Ohio. Ellipsograph. 1,623,348; Apr. 5.

Kieffer, Martin, Olean, N. Y. Attachment for silk doubling and twisting machines. 1,623,685; Apr. 5.

King, Charles D., Rutherford, N. J. Apparatus for drilling and the like. 1,623,250; Apr. 5.

King, Clifford F., New Orleans, La. Double-acting trap. 1,623,841; Apr. 5.

King, Ralph E., East Orange, and W. M. Beaumont, Summit, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,623,734; Apr. 5.

King, Terry T., Fort Wayne, Ind., assignor to General Electric Company. Automatic pressure regulator. 1,623,842; Apr. 5.

Kingsley, Charles B., Clairton, Pa., assignor to Mississippi Glass Company. Batch feeding to glass tanks. 1,623,057; Apr. 5.

Kinney, Justus R., Jamaica Plain, Mass. Relief valve for rotary pumps. 1,623,316; Apr. 5.

Kinney, Justus R., Jamaica Plain, assignor to Kinney Manufacturing Co., Boston, Mass. Vacuum pump. 1,623,315; Apr. 5.

Kinney Manufacturing Co. (See Kinney, Justus R., assignor.)

Kinzer, Sam C., Estill, Ky. Trap. 1,623,925; Apr. 5.

Kirk, Charles J. (See Buffington, Joseph, assignor.)

Kirschbraun, Lester, Chicago, Ill., and W. H. Cady, Boston, Mass. Waterproof product. 1,623,189; Apr. 5.

Kjetsaa, Chester E., Philadelphia, Pa. Toilet box. 1,623,877; Apr. 5.

Klamroth, Wilfried, New York, N. Y. Running-board luggage carrier for vehicles. 1,623,794; Apr. 5.

Klein, Stanley, assignor to The Mendel-Drucker Company, Cincinnati, Ohio. Trunk-lock structure. 1,623,190; Apr. 5.

Klemperer, Wolfgang B., assignor to Goodyear-Zeppelin Corporation, Akron, Ohio. Flanged fin. 1,623,938; Apr. 5.

Klimoski, Joseph J. (See Gizewski, John, assignor.)

Klinck, Harry W., Logansport, Ind. Puddle plug. 1,623,843; Apr. 5.

Klinke, Oscar, assignor to Smith & Crosby, a copartnership composed of A. D. and G. H. Crosby, Attleboro, Mass. Bracelet. Des. 72,369; Apr. 5.

Kloneck, August J., New York, N. Y. Multiplex signaling. 1,623,479; Apr. 5.

Knowlton, Eugene W., assignor to John E. Smith's Sons Co., Buffalo, N. Y. Attachment for meat-cutting machines. 1,623,795; Apr. 5.

Knutsen, John B. M., Elizabeth Bay, near Sydney, New South Wales, Australia. Electric lift machine and the like. 1,623,349; Apr. 5.

Koehring Company. (See Koehring, Philip A., assignor.)

Koehring, Philip A., assignor to Koehring Company, Milwaukee, Wis. Twin-mixer concrete-paving machine. 1,623,622; Apr. 5.

Koenitz, Arthur C. (See Wappler, F. H., and Koenitz.)

Kogstrom, Alex W., Upper Darby, assignor of one-half to A. F. H. Scott, Philadelphia, Pa. End connection for vehicle springs. 1,623,844; Apr. 5.

Kogstrom, Axel W., Upper Darby, assignor of one-half to A. F. H. Scott, Philadelphia, Pa. End connection for vehicle springs. 1,623,845; Apr. 5.

Kohler, Jack D., Miami, Fla. Holder for confections and napkins. 1,623,926; Apr. 5.

Kollock, Lemuel E., Boston, Mass. Pipe-joint filling spout. 1,623,058; Apr. 5.

Kolodge, Louis P., New Kensington, Pa. Geometrical instrument. 1,623,623; Apr. 5.

Kolthoff, Helge G. L., Vanersborg, Sweden. Self-locking nut. 1,623,686; Apr. 5.

Konrad, Otto, Oshkosh, Wis. Reenforcing concrete floors. 1,623,252; Apr. 5.

Konrad, Otto, assignor to Three C Davenport Company, Oshkosh, Wis. Foldable bed couch. 1,623,251; Apr. 5.

Koppers Company, The. (See Becker, Joseph, assignor.)

Koury, Michael G., Cairo, Ill. Double-acting internal-combustion engine. 1,623,416; Apr. 5.

Krafft, Herman T., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Constructing columns 1,623,930; Apr. 5.

Krag, Franz K. (See Nelson, John V., assignor.)

Kramer, Andrew A., Kansas City, Mo. Liquid level indicator. 1,623,122; Apr. 5.

Kuhn, John J., Elizabeth, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Transmission system. 1,623,480; Apr. 5.

Kund, Wendell J., Bedford, Pa. Toe-in gauge. 1,623,878; Apr. 5.

Kupec, William J. (See Chapin, P. P., and Kupec.)

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,623,481; Apr. 5.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,623,482; Apr. 5.

Kushner, William M., Brooklyn, N. Y. Adapter for vacuum bottles. 1,623,544; Apr. 5.

Kutter, Herman L., Hamilton, Ohio. Bearing. 1,623,624; Apr. 5.

Lage, Ernst A., Hamburg, Germany. Producing colored photographs (positive prints on paper or the like). 1,623,123; Apr. 5.

La Hodny, William, assignor to Standard Mirror Company, Buffalo, N. Y. Mirror bracket. 1,623,483; Apr. 5.

Lain, David E. (See Burpee, J. H., and Lain.)

Lake, Simon, Milford, Conn. Concrete-molding apparatus. 1,623,625; Apr. 5.

Lambert, Oswald, Tamise, Belgium. Cop-winding frame. 1,623,191; Apr. 5.

Lammme, Theodor, Cologne, Koln-Mulheim, Germany. Manufacturing seamless wrought-iron annealing boxes. 1,623,059; Apr. 5.

Lancaster, Harry V., Louisville, Ky., assignor to Chattanooga Implement & Mfg. Co., Chattanooga, Tenn. Fireplace grate. Des. 72,370; Apr. 5.

Lancaster, Harry V., Louisville, Ky., assignor to Chattanooga Implement & Mfg. Co., Chattanooga, Tenn. Fireplace grate. Des. 72,371; Apr. 5.

Lancaster, Harry V., Louisville, Ky., assignor to Chattanooga Implement & Mfg. Co., Chattanooga, Tenn. Fireplace grate. Des. 72,372; Apr. 5.

Lancaster, Harry V., Louisville, Ky., assignor to Chattanooga Implement & Mfg. Co., Chattanooga, Tenn. Fireplace grate. Des. 72,373; Apr. 5.

Lang, Henry T., assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio. Dynamo-electric machine. 1,623,846; Apr. 5.

Lange, William L., New York, N. Y. Banjo. 1,623,735; Apr. 5.

Lanham, Frank V., Dallas, Tex. Pavement. 1,623,417; Apr. 5.

Larkin Automotive Parts Company, The. (See De Loache, George W., assignor.)

Larson, Jonas E., assignor to Champion Auto Equipment Company, Hammond, Ind. Automobile body. Des. 72,374; Apr. 5.

Larvex Corporation, The. (See Stiriss, Jacob, assignor.)

Larzelere, Charles F., and C. H. Neumeyer, Flint, Mich. Vaporizing fuel. 1,623,253; Apr. 5.

Lathrop, Sherman R. (See Johnson, F. H., and Lathrop.)

Laub, Adolf, Basel, assignor to the Firm Progression S. A., La Chaux-de-Fonds, Switzerland. Change-speed gearing. 1,623,418; Apr. 5.

Lauchin, George Y., Green Bay, Wis. Motor vehicle lamp. 1,623,687; Apr. 5.

Laufe, Henry C., New York, N. Y. Massage and shampooing apparatus. 1,623,124; Apr. 5.

Lauver, George A., Ponca City, Okla., assignor, by mesne assignments, to W. A. Morgan, Buffalo, N. Y. Draining means for splash troughs of internal-combustion engines. 1,623,254; Apr. 5.

Lawson, Robert H., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Reverse plating by action of casting off mechanism. Re16,584; Apr. 5.

Lawton, Thomas W., Taunton, Mass. Top-roll saddle. 1,623,688; Apr. 5.

Laznovsky, Lillian, Chicago, Ill. Hair-waving device. 1,623,736; Apr. 5.

Leahy, Edward W., Albany, N. Y. Motor vehicle heater. 1,623,879; Apr. 5.

Leake, Richard M. (See Price, J. W., and Leake.)

Leboucher, Paul J. (See Broussouse, Fernand L., assignor.)

Le Compte, Oliver P., Baltimore County, and S. A. Cahn, assignors to Miller Safe Company, Baltimore, Md. Safe. 1,623,255; Apr. 5.

Lee, Gordon, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Rock drill. 1,623,419; Apr. 5.

Le Febure Ledger Company. (See Hruska, Frank J., assignor.)
Lehigh Coal and Navigation Co., The. (See Wagel, Srinivas R., assignor.)
Lehman, Walter J., assignor to Briggs Manufacturing Company, Detroit, Mich. Fixture for riveting machines. 1,623,796; Apr. 5.
Lehon Company, The. (See Moone, Albert E. F., assignor.)
Leinweber, Curtis H., et al. (See Leinweber, William H., assignor.)
Leinweber, Victor H., et al. (See Leinweber, William H., assignor.)
Leinweber, William H., assignor of one-third to V. H. Leinweber, and one-third to C. H. Leinweber, Chicago, Ill. Propeller. 1,623,420; Apr. 5.
Lellep, Otto, Egypt, Pa., assignor to The International Nickel Company, New York, N. Y. Converting nickel-containing matte. 1,623,797; Apr. 5.
Lenhardt, Lawrence, Spencerport, assignor of one-half to F. De Felice, Rochester, N. Y. Milling tool. 1,623,927; Apr. 5.
Leshin, Alex R., Seattle, Wash. Shoe and manufacturing the same. 1,623,350; Apr. 5.
Le Tourneau, Robert G., Stockton, Calif. Scarifier. 1,623,317; Apr. 5.
Levine, Hyman, Englewood, Colo. Anatomical restraining appliance. 1,623,125; Apr. 5.
Levitan, Morris, New York, N. Y. Electric-lighting wall fixture. Des. 72,375; Apr. 5.
Lewellen, Lewis J., and O. C. Willis, Cotton Valley, La. Rod grip. 1,623,928; Apr. 5.
Lewis, Frank D., Denver, Colo. Centrifugal amalgamator and concentrator. 1,623,421; Apr. 5.
Libbey-Owens Sheet Glass Company, The. (See Fraser, Frank, assignor.)
Lienhard, Richard B., Newington, assignor to The Taplin Manufacturing Company, New Britain, Conn. Egg beater. 1,623,256; Apr. 5.
Limont, Alexander W., jr., Bridgeport, assignor to The Norwalk Company, South Norwalk, Conn. Multistage fluid compressor. 1,623,798; Apr. 5.
Lind, Mathilde and W. C., New Orleans, La. Button. 1,623,847; Apr. 5.
Lind, Sebert A., Alameda, Calif. Tool. 1,623,689; Apr. 5.
Lind, Werner C. (See Lind, Mathilde and W. C.)
Lindgren, Hugo T., Moline, Ill., assignor, by mesne assignments, to Moline Implement Company. Beet puller. 1,623,737; Apr. 5.
Lindquist, Edward. (See Di Martino, C., and Lindquist.)
Lintern, William, Cleveland, Ohio. Vehicle ventilator. 1,623,738; Apr. 5.
Lipsmeier, Oscar. (See Hempen, F. J., and Lipsmeier.)
Littell, Nelson, Brooklyn, N. Y. Molding machine. 1,623,257; Apr. 5.
Little, Robert H., Ritta, Fla. Dispensing device. 1,623,690; Apr. 5.
Little, William M., and J. L. Sherman, Norphlet, Ark. Oil-separating apparatus. 1,623,691; Apr. 5.
Livingston, George D., Anoka, Minn. Mensuring device. 1,623,192; Apr. 5.
Lockwood, Harry A., assignor to The Lockwood Manufacturing Company, Cincinnati, Ohio. Baking pan. 1,623,692; Apr. 5.
Lockwood Manufacturing Company, The. (See Lockwood, Harry A., assignor.)
Loeffler, William, Sheboygan, Wis. Mortising machine. 1,623,626; Apr. 5.
Loewenbach, Erwin B., Milwaukee, Wis. Shoe-display carton. 1,623,545; Apr. 5.
Logan, Charles W., Kenmore, N. Y., assignor to Markel Electric Products, Inc., Buffalo, N. Y. Arm for electric light fixtures. Des. 72,376; Apr. 5.
Logan, Harry C., Portland, Oreg. Interchangeable emblem. 1,623,693; Apr. 5.
Loomis, Howard S., Kasson, Minn. Governor. 1,623,193; Apr. 5.
Lorber, Charles, Louisville, Ky. Key case. 1,623,627; Apr. 5.
Louden Machinery Company, The. (See Straban, James L., assignor.)
Love, Herbert. (See Petrie, Alexander T., assignor.)
Lovejoy Development Corporation. (See Lovejoy, Dimmitt R., assignor.)
Lovejoy, Dimmitt R., assignor to Lovejoy Development Corporation, New York, N. Y. Combined A battery trickle charger and B supply. 1,623,628; Apr. 5.
Lovejoy, Ralph M., Boston, Mass. Torque-absorbing spring construction for vehicles. 1,623,422; Apr. 5.
Lowenstein, M., & Sons, Inc. (See Mack, Joseph H., assignor.)
Loyd, Joseph, Broken Bow, Nebr. Steering by driving means for vehicles. 1,623,929; Apr. 5.
Lucas, Jonathan, Savannah, Ga., assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Loom. 1,623,258; Apr. 5.
Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Baumeister, H., Dörr, and Hilrttle, assignors.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Dürr, Ludwig, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Hürttle, Karl, assignor.)
Lundahl, Fred A., Moline, Ill. Toy truck. Des. 72,377; Apr. 5.
Lundgren, Edwin, Frederick, Md., assignor to Combustion Engineering Corporation, New York, N. Y. Automatic stoker. 1,623,060; Apr. 5.
Lundgren, Edwin, Frederick, Md., assignor to Combustion Engineering Corporation, New York, N. Y. Underfeed stoker. 1,623,423; Apr. 5.
Lundgren, Edwin, Frederick, Md., assignor to Combustion Engineering Corporation, New York, N. Y. Stoker. 1,623,424; Apr. 5.
Lyons, Fred D., Kansas City, Mo., assignor to I. M. Lyons. Oil burner. 1,623,930; Apr. 5.
Lyons, Izora M. (See Lyons, Fred D., assignor.)
Macfarlane, Robert F., London, England. Machine for husking almonds and other kernels or the like. 1,623,739; Apr. 5.
Mack, Joseph H., Passaic, N. J., assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Printed fabric. Des. 72,378; Apr. 5.
MacKay, Alfred, Philadelphia, Pa. Drier-heating system. 1,623,425; Apr. 5.
Mackenzie, Aleck. (See Dent, L. M. E., Mackenzie, and White.)
MacRae, Duncan, East Orange, and H. K. Richardson, Newark, N. J., assignors to Westinghouse Lamp Company. Getter and the application thereof. 1,623,351; Apr. 5.
Madden, Harry D., Newark, and J. J. Higgins, East Orange, N. J., assignors to Westinghouse Lamp Company. Automatic cut-tube-sorting machine. 1,623,352; Apr. 5.
Mader, Joseph M., Belleville, Ill. Internal-combustion-engine attachment. 1,623,940; Apr. 5.
Madison Tool and Stamping Works. (See Kelley, Victor H., assignor.)
Madson, Ernest C. (See Andersen, F. C., Madson, and Chapman.)
Mallory, Marion, Toledo, Ohio. Induction coil for ignition systems. 1,623,426; Apr. 5.
Mann, Richard E., New Brighton, N. Y. Thermometer. Des. 72,379; Apr. 5.
Mannel, Elise, San Francisco, Calif. Doll. Des. 72,380; Apr. 5.
Manrock, Frank J., Newark, N. J. Gravity table. 1,623,427; Apr. 5.
Mansbendel, Fritz P., Brooklyn, N. Y., assignor, by mesne assignments, to The Sunfast Hats, Incorporated, Danbury, Conn. Fur-weighing machine. 1,623,029; Apr. 5.
Mansfield Tire & Rubber Co. (See Ober, Philip H., assignor.)
Margerison, W. H. & A. E., & Co. (See Clarke, René, assignor.)
Margerison, W. H. & A. E., & Co. (See Elliott, Elizabeth S. G., assignor.)
Margerison, W. H. & A. E., & Co. (See Wilson, Edward A., assignor.)
Markel Electric Products, Inc. (See Logan, Charles W., assignor.)
Marosky, Joseph. (See McWilliams, J. L., and Marosky.)
Marshall, Francis C., Green Bay, Wis. Excavating machine. 1,623,194; Apr. 5.
Maršík, Augustin, Prague, Czechoslovakia. Direction-indicating device especially for vehicles. 1,623,880; Apr. 5.
Martin, George C., Los Angeles, Calif. Shock absorber. 1,623,428; Apr. 5.
Martin, Jean M. (See Martin, Thomas J. and J. M.)
Martin, Thomas J. and J. M., New York, N. Y. Hairdressing appliance. 1,623,630; Apr. 5.
Martinson, P. Hilbert, Wenatchee, Wash. Fly book. 1,623,429; Apr. 5.
Martley, Michael J., et al. (See Comerford, John, assignor.)
Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor support. 1,623,694; Apr. 5.
Mattison, Richard V., Ambler, Pa., assignor to Ambler Asbestos Company. Method and apparatus for producing plastic articles. 1,623,631; Apr. 5.
Maxner, George E., Somerville, Mass. Apparatus for piling sheets of paper. 1,623,195; Apr. 5.
Mayer, John, Schenectady, N. Y. Game. 1,623,881; Apr. 5.
McBee Binder Company, The. (See Welk, Nelson S., assignor.)
McCaig, Thomas E., Chicago, Ill. Insertable fire brick. 1,623,632; Apr. 5.
McCann, Clyde F., and R. A. Berrenberg, San Francisco, Calif., assignors to Panama Lamp & Commercial Company. Lock attachment for electric-lamp sockets. 1,623,740; Apr. 5.
McCarthy, John W., Lockport, N. Y., assignor, by mesne assignments, to Vortex Mfg. Co., Chicago, Ill. Cup dispenser. 1,623,353; Apr. 5.
McCarthy, Joseph P., assignor of one-third to W. Cleveland and one-third to P. Sawick, Utica, N. Y. Pistoning tool. 1,623,799; Apr. 5.
McCord Radiator & Mfg. Co. (See Hawkins, B. H., and Hansen, assignors.)

McDonald, Leslie R., Westmount, Quebec, Canada. Variable electrical condenser. 1,623,741; Apr. 5.
McDonald, Leslie R., Westmount, Quebec, Canada. Variable electrical condenser. 1,623,742; Apr. 5.
McDowell, Lamont A., assignor to Hupp Motor Car Company, Detroit, Mich. Front-seat support. 1,623,800; Apr. 5.
McGaugh, Jesse L., Los Angeles, Calif. Luggage carrier. 1,623,484; Apr. 5.
McGregor, Donald B. (See McGregor, Herman C. and D. B.)
McGregor, Herman C. and D. B., Berkeley, Calif. Demountable seat. 1,623,259; Apr. 5.
McGuiness, Thomas F., Portland, Me. Machine for distributing sand and the like. 1,623,743; Apr. 5.
McKean, John O., assignor to Foster Machine Company, Westfield, Mass. Creel. 1,623,546; Apr. 5.
McLaughlin, John J., assignor to H. L. Warner, Brooklyn, N. Y. Turnstile. 1,623,744; Apr. 5.
McMakin, Julius G., Chicago, Ill. Trolley control. 1,623,430; Apr. 5.
McVoy, Vincen P., Mobile, Ala. Combined cylinder cock and relief valve. 1,623,431; Apr. 5.
McWilliams, Joseph L., and J. Marosky, San Francisco, Calif. Floor-laying device. 1,623,882; Apr. 5.
Meiling, Herman W., Jackson, Mich. Milling machine. 1,623,801; Apr. 5.
Mendel-Drucker Company, The. (See Klein, Stanley, assignor.)
Mercury Mills, Limited. (See Clarke, Edgar W., assignor.)
Mergott, J. E., Co. (See Hiering, William C., assignor.)
Messenger, Otis G., Elizabeth, N. J., assignor to Standard Development Company. Treating hydrocarbons. 1,623,061; Apr. 5.
Messer, Vladimir V., Douglaston, N. Y. Machine for cutting bias strips. 1,623,354; Apr. 5.
Meyer, Fred. (See Fischer, Joseph, assignor.)
Meyering, Bernard H., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic film package. 1,623,486; Apr. 5.
Michelin, André J., Paris, France. Manufacturing seamless rims and wheel disks. 1,623,883; Apr. 5.
Micro Machine Company. (See York, H. H., and Baumberger, assignors.)
Miech, Otto. (See Bartels, A., and Miech.)
Mietz, Herman F., Franklinville, N. J. Banjo resonator. 1,623,884; Apr. 5.
Miller, Albert B. and W. H. Kellner, Green Bay, Wis. Gas heater. 1,623,487; Apr. 5.
Miller Company. (See Wolter, Herman H., assignor.)
Miller Safe Company. (See Le Compte, O. P., and Cahn, assignors.)
Miller, Theodore T. (See Dewey, B., and Miller.)
Milwaukee Gas Specialty Company. (See Claus, Emil L. and W. E., assignors.)
Minch, Walter B., Jackson, assignor to General Motors Corporation, Detroit, Mich. Wheel. 1,623,355; Apr. 5.
Minneapolis Knitting Works. (See Rambo, James H., assignor.)
Minnesota Wax Paper & Envelope Co. (See Nienhauser, Bernard A., assignor.)
Mironuck, Andrew, Max, N. Dak. Grain sifter. 1,623,356; Apr. 5.
Mississippi Glass Company. (See Kingsley, Charles B., assignor.)
Mitchell, William M., Grenada, Miss. Speed-change mechanism. 1,623,695; Apr. 5.
Mitton, Robert E., Salt Lake City, Utah. Diaphragm valve. 1,623,126; Apr. 5.
Mohn, John, Detroit, Mich. Siphon starter and automatic shut-off. 1,623,260; Apr. 5.
Moline Implement Company. (See Lindgren, Hugo T., assignor.)
Montgomery, Gustavus A., Titusville, Pa. Casing slip. 1,623,885; Apr. 5.
Montgomery Tool and Machinery Company, The. (See Dever, George W., assignor.)
Moone, Albert E. F., assignor to The Lehon Company, Chicago, Ill. Roofing. 1,623,127; Apr. 5.
Moore, Francis K. (See Rodgers, T. T., Giblin, and Moore.)
Moore, Frank J., North Tonawanda, N. Y. Method and machine for shredding wood. 1,623,261; Apr. 5.
Moore, George T. (See Rodgers, T. T., Giblin, and Moore.)
Moores, Joel, assignor to The J. H. Day Company, Cincinnati, Ohio. Transfer device. 1,623,357; Apr. 5.
Morberg, Emil, Oslo, Minn. Colter. 1,623,488; Apr. 5.
Morgan, Howard H., Hollywood, Calif. Mechanical toy. 1,623,886; Apr. 5.
Morgan, Susanna. (See Reynolds, W. B., and Jackson, assignors.)
Morgan, William A. (See Lauver, George A., assignor.)
Morinelli, Thomas, Philadelphia, Pa. Shock absorber. Re16,582; Apr. 5.
Morris, George M., Richmond, Calif. Bow guide for violins and the like. 1,623,633; Apr. 5.
Morton, Theodore S., St. Louis, Mo. Refrigerator. 1,623,802; Apr. 5.
Mosler Safe Company, The. (See Bellamore, David H., assignor.)
Mottier, Walter F., El Campo, Tex. Hayrake. 1,623,062; Apr. 5.
Muir, Wellington W., Lockport, N. Y. Cooling system for internal-combustion engines. 1,623,803; Apr. 5.
Muir, Wellington W., Lockport, N. Y. Cooling system for internal-combustion engines. 1,623,804; Apr. 5.
Mulholland, James F., Columbus, Ohio. Toy balloon. Des. 72,381; Apr. 5.
Müller, Jens. (See Herz, R., and Müller.)
Mummert, Harvey C., Hollis, assignor, by mesne assignments, to Curtiss Aeroplane and Motor Company, Inc., Garden City, N. Y. Temperature-regulating system for aeronautical motors. 1,623,128; Apr. 5.
Munsingwear Corporation, The. (See Spilsbury, Beulah G., assignor.)
Murphy, Edwin J., Schenectady, N. Y., assignor to General Electric Company. Arc lamp. 1,623,848; Apr. 5.
Murphy, Gerald H., Flushing, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,623,063; Apr. 5.
Murray, Albert F., Boston, Mass., assignor to J. H. Hammond, jr., Gloucester, N. J. Transmitting system for radiant energy. 1,623,745; Apr. 5.
Murray Company, The. (See Hancock, William L., assignor.)
Murray, Thomas E., Brooklyn, N. Y. Furnace and cooling device. 1,623,746; Apr. 5.
Myers, Robert C., Hutchinson, Kans. Spark plug. 1,623,432; Apr. 5.
Naab, Julius, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Compressor unloader. 1,623,489; Apr. 5.
Napier, James W., McKeesport, Pa. Coupling and making the same. 1,623,064; Apr. 5.
National Carbon Company. (See Hopkins, Nevil M., assignor.)
National Pneumatic Company. (See Forman, Paris R., assignor.)
National Pneumatic Company. (See Rowntree, H., and Conklin, assignors.)
Neahr, Jacob E., Hartsdale, assignor to Underwood Typewriter Company, New York, N. Y. Typewriter stand. 1,623,196; Apr. 5.
Neeley, George S., Wood River, Ill. Leather-treating process and apparatus for same. 1,623,943; Apr. 5.
Nelis, Joseph J., Brooklyn, assignor to Power Specialty Company, New York, N. Y. Superheater boiler. 1,623,805; Apr. 5.
Nelson, Emil A., Detroit, Mich., assignor to Bendix Brake Company, Chicago, Ill. Brake-operating means. 1,623,262; Apr. 5.
Nelson, John V., Maywood, assignor to F. K. Krag, Chicago, Ill. Swivel-head drill holder. 1,623,747; Apr. 5.
Neumann, Theodore L., Dayton, Ohio, assignor to The Dayton Paper Novelty Company. Paper box for golf clubs and the like. 1,623,547; Apr. 5.
Neumeyer, Charles H. (See Larzelere, C. F., and Neumeyer.)
Newhall, Henry B. (See Karitzky, John, assignor.)
Newhall, Henry B., Plainfield, and H. W. Pleister, Westfield, N. J.; said Pleister assignor to said Newhall. Cabinet amplifier. 1,623,065; Apr. 5.
New Haven Clock Co., The. (See Porter, Wilson E., assignor.)
New Method Stove Company, The. (See Harter, Sherman, assignor.)
Newport Company, The. (See Gubelmann, I., Weiland, and Stallman, assignors.)
Newton, George F., assignor to United States Fire Protection Company, Providence, R. I. Automatic sprinkler. 1,623 887; Apr. 5.
Newton, Herbert B., Brookline, Mass. Lawn mower. 1 623,433; Apr. 5.
Nichols, Paul F., assignor to Sun Maid Raisin Growers of California, Fresno, Calif. Apparatus and method for determining the moisture content of raisins and the like. 1,623,263; Apr. 5.
Nienhauser, Bernard A., assignor to Minnesota Wax Paper & Envelope Co., St. Paul, Minn. Tissue-paper package. 1,623,806; Apr. 5.
Niesen, Joseph H., Grafton, Wis. Washing machine. 1,623,548; Apr. 5.
Nitchie, John A., Elm Creek, Nebr. Power-transmission device for pumps. 1,623,490; Apr. 5.
Nixon, Clarence R. (See Dunnock, J. L., and Nixon.)
Nordstrom, Elof, East Orange, N. J., assignor, by mesne assignments, to Aluminum Seal Corporation, New York, N. Y. Article-feeding mechanism. 1,623,066; Apr. 5.
North East Electric Company. (See Dorsey, Farnum F., assignor.)
Norton, James G., Eltingville, N. Y. Process and apparatus for making cups. 1,623,197; Apr. 5.
Norwalk Company, The. (See Limont, Alexander W., jr., assignor.)
Nosan, Anton, Cleveland, Ohio. Aircraft variable-pitch propeller and blade mounting. 1,623,549; Apr. 5.
Nourse, Walter H. (See Ofner, F. P., and Nourse.)
Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Spark plug. 1,623,129; Apr. 5.
Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Rheostat. 1,623,198; Apr. 5.
Nugent, Bennie C., Taft, Calif. Sucker-rod twister. 1,623,696; Apr. 5.

Oakley, Erastus G., Southport, assignor to Bridgeport Brass Company, Bridgeport, Conn. Socket cap and making the same. 1,623,067; Apr. 5.

Oakley, Erastus G., Southport, assignor to Bridgeport Brass Company, Bridgeport, Conn. Making flash-light casings. 1,623,807; Apr. 5.

Ober, Philip H., assignor to The Mansfield Tire & Rubber Co., Mansfield, Ohio. Automobile tire. Des. 72,382; Apr. 5.

Oberdorfer, Henry D., Champaign, Ill. Portable bleacher. 1,623,068; Apr. 5.

O'Brien, Frank J., assignor to Southern Can Company, Baltimore, Md. Outturned-edge-can closure. 1,623,808; Apr. 5.

Ofner, Frank P., and W. H. Nourse, Portland, Oreg. Pipe-welding apparatus. 1,623,434; Apr. 5.

O'Grady, Frederick T., assignor to H. V. O'Grady, Flushing, N. Y. Motion-picture projector. 1,623,435; Apr. 5.

O'Grady, Helen V. (See O'Grady, Frederick T., assignor.)

Ohio Brass Company, The. (See Bovard, William P., assignor.)

Ohio Brass Company, The. (See Chandler, Homer P., assignor.)

Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)

Olin, Fred C., Buffalo, N. Y. Spike-forming machine. 1,623,264; Apr. 5.

Olmsted, Frederick L. (See Agnew, J. G., and Pond, assignors.)

Olsen, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Magnetic speedometer. 1,623,550; Apr. 5.

Orrick, Charles F., Mount Vernon, Ill. Safety wheel guard. 1,623,849; Apr. 5.

Osborn, Henry C., assignor to The American Multigraph Company, Cleveland, Ohio. Addressing machine. 1,623,265; Apr. 5.

Ostler, Ernest S., assignor to Stromberg Electric Company, Chicago, Ill. Noiseless clock mechanism. 1,623,266; Apr. 5.

Otis, Howard S., Janesville, Wis. Barber shears. 1,623,130; Apr. 5.

Oubridge, William A., Coventry, England. Lapping machine. 1,623,697; Apr. 5.

Ouellette, Alphonse, Fall River, Mass. Intermittent feeler mechanism for looms. 1,623,491; Apr. 5.

Owens Bottle Company, The. (See Rule, John F., assignor.)

Owens, Dabney P., Lake Worth, Fla. Universal joint. 1,623,199; Apr. 5.

Owens, Dabney P., Lake Worth, Fla. Fixed housing for universal connections. 1,623,200; Apr. 5.

Owens, Dabney P., Lake Worth, Fla. Cutter. 1,623,201; Apr. 5.

Page, Herbert E., Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Garment-pressing machine. 1,623,358; Apr. 5.

Pako Corporation. (See Passman, James W., assignor.)

Palm Brothers Decalcomania Company, The. (See Walz, Ludwig, assignor.)

Palm, Max J., jr., Cincinnati, Ohio. Plate or similar article. Des. 72,383; Apr. 5.

Palm, Max J., jr., Cincinnati, Ohio. Plate or similar article. Des. 72,384; Apr. 5.

Panama Lamp & Commercial Company. (See McCann, C. F., and Berrenberg, assignors.)

Pape, Edwin W., St. Louis, Mo., assignor to Crescent Stove Works, Vanderburgh County, Ind. Air-circulation control for inclosed stoves. 1,623,634; Apr. 5.

Pasini, Jerome, New York, N. Y. Ship. 1,623,888; Apr. 5.

Passman, James W., Newark, Ohio, assignor to Pako Corporation, Minneapolis, Minn. Photoglazing method and apparatus. 1,623,202; Apr. 5.

Patenaude, Julien, Waterbury, Conn. Kitchen table. 1,623,850; Apr. 5.

Patterson, John F., Warren, Ohio. Dishwasher. 1,623,203; Apr. 5.

Patterson, Robert H., Atlanta, Ga. Bottle. Des. 72,385; Apr. 5.

Paul, William E., Schenectady, N. Y., assignor to General Electric Company. Circuit interrupter. 1,623,851; Apr. 5.

Pearsall, William A., jr., Detroit, Mich. Running-board lamp. 1,623,131; Apr. 5.

Pedlar People Limited, The. (See Hall, William H., assignor.)

Peelle Company, The. (See Peellee, Robert S., assignor.)

Peelle, Robert S., Hollis, assignor to The Peelle Company, Brooklyn, N. Y. Electric interlock for elevator doors. 1,623,267; Apr. 5.

Peirce, John R., assignor to International Business Machines Corporation, New York, N. Y. Tabulating apparatus. 1,623,204; Apr. 5.

Pelkey, Oliver E., Springfield, Mass. Support. 1,623,749; Apr. 5.

Pennell, Reginald H. L., Windsor, and A. W. Wylie, Chobham, England. Apparatus for mixing and delivering liquids. 1,623,132; Apr. 5.

Perfecto Gear Differential Co. (See Starr, Charles E., assignor.)

Pericaud, Baptiste M., Limoges, France. Heel-seat-cutting machine. 1,623,551; Apr. 5.

Peschl, Frank A., Jackson Heights, N. Y., assignor to International Paper Company. Moisture-testing means for paper-making machines. 1,623,436; Apr. 5.

Peterson, Hans M., et al. (See Englund, Edwin H. L., assignor.)

Peterson, Sophus M., et al. (See Englund, Edwin H. L., assignor.)

Peterson, Theodore P., Greeley, Nebr. Electric-current regulator. 1,623,492; Apr. 5.

Petrie, Alexander T., assignor to H. Love, Brooklyn, N. Y. Spinning device. 1,623,133; Apr. 5.

Pfannenstiehl, Harry, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphs. 1,623,748; Apr. 5.

Pfannenstiehl, Harry, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphs. 1,623,809; Apr. 5.

Pfannenstiehl, Harry, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphy. 1,623,810; Apr. 5.

Phelps, James W., Chicago, Ill. Electric receptacle. 1,623,205; Apr. 5.

Phillips, Wendell L., Bonair, Iowa. Traffic signal. 1,623,889; Apr. 5.

Phonograph Company, The. (See Seabolt, Frank J., assignor.)

Pike, Oscar G., De Kalb, Ill. Swimming device. 1,623,852; Apr. 5.

Pingree Patents, Incorporated. (See Pingree, Samuel J., assignor.)

Pingree, Samuel J., assignor to Pingree Patents, Incorporated, St. Louis, Mo. Apparatus for supplying fuel to internal-combustion engines. 1,623,750; Apr. 5.

Pintacuda, Carlo, and U. Frilli, Florence, Italy. Device for determining pressure in vehicle shock absorbers. 1,623,069; Apr. 5.

Pittsburgh Transformer Company. (See Edwards, Donald V., assignor.)

Pleister, Henry W. (See Newhall, H. B., and Pleister.)

Poeter, E., & Company. (See Poeter, Edward, assignor.)

Poeter, Edward, assignor to E. Poeter & Company, Irvington, N. J. Hand-bag frame. Des. 72,386; Apr. 5.

Poeter, Edward, assignor to E. Poeter & Company, Irvington, N. J. Hand-bag frame. Des. 72,387; Apr. 5.

Poeter, Edward, assignor to E. Poeter & Company, Irvington, N. J. Hand-bag frame. Des. 72,388; Apr. 5.

Pohle, Walter B., Lynn, assignor of one-third to P. B. Haskell, Lynn, and one-third to S. V. Russell, Chelsea, Mass. Sediment collector. 1,623,437; Apr. 5.

Pollard, John D., Chicago, Ill. Diathermy ear applicator. 1,623,552; Apr. 5.

Pond, Reed K. (See Agnew, J. G., and Pond.)

Porter, Wilson E., New Haven, Conn., assignor to The New Haven Clock Co., New Haven, Conn. Intermittent-alarm clock. 1,623,698; Apr. 5.

Postlethwait, Columbus E., Wallace, W. Va. Adjustable steering post. 1,623,493; Apr. 5.

Potter, Cushman, Houston, Minn. Fluid-transmission mechanism. 1,623,206; Apr. 5.

Potts, Helen, Chicago, Ill. Cigarette holder and the like. 1,623,635; Apr. 5.

Poulsen, Oscar, Alameda, Calif. Shaft bearing. 1,623,207; Apr. 5.

Pownall, Henry D., Canton, Ohio. Liquid-level regulating and controlling apparatus. 1,623,811; Apr. 5.

Power Specialty Company. (See Nells, Joseph J., assignor.)

Prefontaine, Harry F., Brooklyn, N. Y. Gas safety plate. 1,623,812; Apr. 5.

Prescott, William E. (See Baker, G. R., Prescott, and Gilderdale.)

Price, John W., and R. M. Leake, Laramie, Wyo. Pump. 1,623,208; Apr. 5.

Price, William E., Hartsdale, N. Y. Lantern. 1,623,699; Apr. 5.

Priestley, Willard J., South Sioux City, Nebr. Air heater and moistener for carburetors. 1,623,438; Apr. 5.

Procter, Harry C., Manchester, England. Electric-lighting apparatus for motor vehicles. 1,623,700; Apr. 5.

Progression, S. A. (See Laub, Adolf, assignor.)

Prokop, Josef, Parbudice, Czechoslovakia. Feeding and discharging apparatus for machines for material treatment. 1,623,701; Apr. 5.

Proulx, Amie G., St. Paul, Minn. Steering-gear attachment. 1,623,751; Apr. 5.

Pullcican Manufacturing Corporation. (See Trinks, William W., assignor.)

Punnett, Reuben F. (See Sheppard, S. E., and Punnett.)

Q & C Company. (See Young, Charles D., assignor.)

Quigg, James R. (See Shipley, R. C., and Quigg.)

R. K. M. Mfg. Company. (See Rosenman, Leo, assignor.)

Racine Radiator Company. (See Young, Fred M., assignor.)

Radio Corporation of America. (See Young, A. M., and Simpson, assignors.)

Rainey, Edward E., Denver, Colo. Valve lifter. 1,623,752; Apr. 5.

Rambo, James H., assignor to Minneapolis Knitting Works, Minneapolis, Minn. Child's sleeping garment. 1,623,753; Apr. 5.

Ramer, Philip W., River Falls, Wis. Spraying machine. 1,623,702; Apr. 5.

Randall, Chester J., Woonsocket, R. I., and C. Wurtenberg, Union City, assignors to The Goodyear's Metallic Rubber Shoe Company, Naugatuck, Conn. Machine for stripping vulcanized articles. 1,623,208; Apr. 5.

Raney, James J. (See Bellman, Edward T., assignor.)

Randolph, Oliver W., Toledo, Ohio. Coal drying. 1,623,553; Apr. 5.

Rasmussen, Martin, assignor to Hartmann Trunk Company, Racine, Wis. Trunk lock. 1,623,318; Apr. 5.

Rauworth, Edwin S., assignor to Apollo Piano Company, De Kalb, Ill. Apparatus for leveling piano keys. 1,623,359; Apr. 5.

Rawlings, William E., Santa Clara County, Calif. Ant trap. 1,623,439; Apr. 5.

Ray, Joseph V., Greensboro, N. C. Auto wheel puller. 1,623,440; Apr. 5.

Reason, Walter M., assignor to Elizabeth Ballamos, Pontiac, Mich. Automobile transmission lock. 1,623,319; Apr. 5.

Redfield, Snowden B., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Centralizer interlocking control for multistage compressors. 1,623,494; Apr. 5.

Reed, Charles E. (See Schultz, Herman A., assignor.)

Reilly, Rodolphe R., Port Washington, assignor to Angel International Corporation, New York, N. Y. Died-out blank for receptacles. 1,623,269; Apr. 5.

Reinhardt, Louis W., Brockton, Mass. Display form and making the same. 1,623,931; Apr. 5.

Reiniger, Gebbert & Schall Aktiengesellschaft. (See Zacher, Frans, assignor.)

Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Steerable wheel construction. 1,623,554; Apr. 5.

Remington Arms Company. (See Fuller, Frederick L., assignor.)

Remy, Benjamin P., Indianapolis, Ind. Magneto. 1,623,270; Apr. 5.

Rendleman, Norman C., Dormont, Pa. Manufacture of flanged beams with thin webs. 1,623,272; Apr. 5.

Rendleman, Norman C., Dormont, Pa. Rolling flanged beams. 1,623,273; Apr. 5.

Rendleman, Norman C., Dormont, assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Manufacture of flanged beams. 1,623,271; Apr. 5.

Reynolds, Moore M., Dawmont, W. Va. Gas-separating apparatus. 1,623,636; Apr. 5.

Reynolds, William B., and W. E. Jackson, Fort Worth, assignors of one-tenth to S. Morgan, Greenville, Tex. Paper cutter. 1,623,495; Apr. 5.

Rhoads, Harry E., assignor to The Willys-Overland Company, Toledo, Ohio. Fuel heater for internal-combustion engines. 1,623,441; Apr. 5.

Rhode, Lewis W. (See Eckles, Noble, assignor.)

Rhodes, Arnold N., Rocky Point, N. C. Door-locking mechanism. 1,623,853; Apr. 5.

Rhodes-Hochriem Manufacturing Co. (See Hochriem, Gustav F., assignor.)

Rice, M., Company. (See Shoch, Robert, assignor.)

Richardson, Henry K. (See MacRae, D., and Richardson.)

Ritter, Heinrich, Esslingen, assignor to the Firm Dr. Finckh Apparate-Gesellschaft m. b. H., Stuttgart, Germany. Food preserving jar. 1,623,754; Apr. 5.

Robb, George W. (See Harrington, John H., assignor.)

Roberts, Ellis, East Palestine, Ohio. Building block. 1,623,442; Apr. 5.

Roberts, John G., Dobbs Ferry, assignor to Western Electric Company, Incorporated, New York, N. Y. Loaded signaling conductor. 1,623,555; Apr. 5.

Robertshaw, George A., Greensburg, Pa. Thermostat. 1,623,755; Apr. 5.

Robinson, Lula H., Dallas, Tex. Adjusting and holding device for shade and drapery supports. 1,623,274; Apr. 5.

Rodgers Radio Corporation. (See Rodgers, T. T., Giblin, and Moore, assignors.)

Rodgers, Thomas T., M. A. Giblin, and F. K. and G. T. Moore, Milwaukee, Wis., assignors to Rodgers Radio Corporation, West Allis, Wis. Condenser. 1,623,360; Apr. 5.

Rooney, John H., Susanville, Calif. Sawmill-carriage offset. 1,623,854; Apr. 5.

Rosenman, Leo, Newark, N. J., assignor to R. K. M. Mfg. Company. Fastener strip or fly for garments. 1,623,361; Apr. 5.

Rosenstein, Ludwig, San Francisco, Calif. Removing sulphur dioxide and compounds from food products. 1,623,070; Apr. 5.

Rosenthal, Abraham, New York, N. Y. Woman's undergarment. 1,623,637; Apr. 5.

Rouleau, Wilfred J., Quincy, Mass. Computing scale. 1,623,134; Apr. 5.

Rowntree and Company Limited. (See Baker, George R., Prescott, and Gilderdale, assignors.)

Rowntree, Harold, Scarsdale, N. Y., and R. D. Conklin, Rahway, N. J., assignors to National Pneumatic Company, New York, N. Y. System for operating the exit and trap doors of railway coaches. 1,623,556; Apr. 5.

Ruff, Israel P., Connellsville, Pa. Kitchen utensil. 1,623,703; Apr. 5.

Rule, John F., assignor to The Owens Bottle Company, Toledo, Ohio. Forming and delivering charges of molten glass. 1,623,362; Apr. 5.

Rupp, Charles, assignor to J. S. Thorn Company, Philadelphia, Pa. Window frame. 1,623,496; Apr. 5.

Rurup, Walter F., Santa Ana, Calif. Tree-shaking device. 1,623,497; Apr. 5.

Russell, Susan V., et al. (See Pohle, Walter B., assignor.)

Ruttle, John H., Carsonville, Mich. Bean-separating machine. 1,623,275; Apr. 5.

Rybeck, Adolph W., assignor to The T. L. Smith Company, Milwaukee, Wis. Valve. 1,623,557; Apr. 5.

Sacia, Charles F., assignor to Western Electric Company, Incorporated, New York, N. Y. Recording and reproducing of sounds. 1,623,756; Apr. 5.

Saklatwalla, Byramji D., Crafton, Pa. Manufacture of chromium iron alloys. 1,623,757; Apr. 5.

Sandbeck, Gustaf E., New York, N. Y. Slicing board. 1,623,498; Apr. 5.

Santurello, Peter, Columbus, Ohio. Hair-curling apparatus. 1,623,758; Apr. 5.

Sargent, Howard R., Bridgeport, Conn. Indicating device. 1,623,950; Apr. 5.

Sauveur, Harry, Berlin-Lankwitz, Germany, assignor to the Firm: Flexo-Industrie-Gesellschaft m. b. H., Vienna, Austria. Chuck. 1,623,705; Apr. 5.

Savitzky, Morris, New York, N. Y. Embroidered lace medallion. Des. 72,389; Apr. 5.

Savitzky, Morris, New York, N. Y. Embroidered lace medallion. Des. 72,390; Apr. 5.

Savitzky, Morris, New York, N. Y. Embroidered lace medallion. Des. 72,391; Apr. 5.

Sawick, Peter et al. (See McCarthy, Joseph P., assignor.)

Scandinavian Export Agency Ltd. (See Jensen, Thomas C., assignor.)

Schaap, Alexander K., jr., Brooklyn, assignor to The Schaap-Durant Control Corporation, New York, N. Y. Liquid-level gauge. 1,623,855; Apr. 5.

Schaap-Durant Control Corporation, The. (See Durant, John D., assignor.)

Schaap-Durant Control Corporation, The. (See Schaap, Alexander K., jr., assignor.)

Schanck, Harry S., et al. (See Ames, Charles F., assignor.)

Schaper, Harry C., assignor to The Weight-O-Graph Company, St. Louis, Mo. Weighing device. 1,623,276; Apr. 5.

Schell, David, Myerstown, Pa. Combination fixture support and base. 1,623,813; Apr. 5.

Schmidt, Charles D., Jamaica, N. Y. Brake or clutch. 1,623,706; Apr. 5.

Schnuck, Carl F. (See Bowen, D. R., and Schnuck.)

Schroeder, Simon E., Oak Park, Ill. Safety wringer mechanism. 1,623,707; Apr. 5.

Schulte, Fritz. (See Herz, R., and Schulte.)

Schultz, Herman A., Chicago, assignor to C. E. Reed, township of McHenry, Ill. Copying lathe. 1,623,638; Apr. 5.

Schumann Piano Company. (See Hurst, James D., assignor.)

Schuster, Frank, Richmond Hill, N. Y. Electric melting pot. 1,623,209; Apr. 5.

Schwanke, Albert F., Grey Eagle, Minn. Cream-separator-bowl washer. 1,623,363; Apr. 5.

Schweisthal, Fred G., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Speedometer-magnet compensator. 1,623,558; Apr. 5.

Scott, Allison F. H. (See Kogstrom, Axel W., assignor.)

Scott, David J., et al., executors. (See Scott, Walter C., assignor.)

Scott, Isabella, et al., executors. (See Scott, Walter C., assignor.)

Scott, Nelson H., assignor of one-half to L. B. Day, La Fayette, Ga. Split sprocket. 1,623,814; Apr. 5.

Scott, Phillip L., Chicago, Ill., assignor to Super-Diesel Tractor Corporation, La Porte, Ind. Apparatus for and method of creating turbulence. 1,623,704; Apr. 5.

Scott, Walter, & Company. (See Scott, Walter C., assignor.)

Scott, Walter C., deceased, assignor to I. Scott and D. J. Scott, executors, doing business as Walter Scott & Company, Plainfield, N. J. Uninterruptedly feeding a web of flexible material while changing from one web roll to another. 1,623,277; Apr. 5.

Seabolt, Frank J., Schenectady, N. Y., assignor to The Phonograph Company. Phonograph. 1,623,559; Apr. 5.

Seaman Container Manufacturing Corporation. (See Hall, Richard E., assignor.)

Sears, Fred W., and A. Buck; said Buck assignor to R. Hueckler, Three Rivers, Mich. Water deckle for paper-making machines. 1,623,278; Apr. 5.

Sebald, Leslie E., Ridgewood, N. J., assignor to The Griscom-Russell Company, New York, N. Y. Low-heat-level evaporator system. 1,623,941; Apr. 5.

Seelman, John J., Milwaukee, Wis. Dispensing device. 1,623,708; Apr. 5.

Seely, Thomas H., Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting machine. 1,623,135; Apr. 5.

Seely, Thomas H., Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting machine. 1,623,279; Apr. 5.

Seguy, Jean D., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus of dephlegmation. 1,623,136; Apr. 5.

Setz, Bertha E., administratrix. (See Setz, Hans R., assignor.)

Setz, Hans R., deceased, Upper Darby Township, Philadelphia County, Pa.; B. E. Setz, administratrix. Cylinder structure for internal-combustion engines. 1,623,639; Apr. 5.
Sewell, Benjamin F. B., Chula, Va. Tractor attachment. 1,623,815; Apr. 5.
Seymour, Burton W., sr., Jamestown, N. Y. Treating oil wells. 1,623,890; Apr. 5.
Shafer, James A., Buffalo, N. Y. Hopper freight car. 1,623,071; Apr. 5.
Shearer, William H., Rand, Colo. Fastener. 1,623,891; Apr. 5.
Sheppard, Samuel E., and R. F. Punnett, assignors to Eastman Kodak Company, Rochester, N. Y. Photographic emulsion and material and process used in the preparation thereof. 1,623,499; Apr. 5.
Sheppard, Samuel E., and S. S. Sweet, assignors to Eastman Kodak Company, Rochester, N. Y. Photographic film and base therefor. 1,623,500; Apr. 5.
Sherman, George B., assignor, by mesne assignments, to Copeman Laboratories Company, Flint, Mich. Molding apparatus. 1,623,560; Apr. 5.
Sherman, Jessie L. (See Little, W. M., and Sherman.)
Shewry, William M., Chicago, Ill. Coaster wagon. 1,623,443; Apr. 5.
Shinn, Luther G., Holdenville, Okla. Inclination indicator. 1,623,759; Apr. 5.
Shipley, Richard C., and J. R. Quigg, Kansas City, Mo. Axle-box-wedge mechanism. 1,623,640; Apr. 5.
Shlick, Leo, Montreal, Quebec, Canada. Heating engine. 1,623,364; Apr. 5.
Shoch, Robert, assignor to M. Rice Company, Philadelphia, Pa. Flower holder. 1,623,856; Apr. 5.
Shoenfeld, Gustav. (See Dunn, P. P., and Shoenfeld.)
Sieber, Jacob, London, assignor to C. T. Everist, Forest Hill, London, England. Carburetor for internal-combustion engines. 1,623,760; Apr. 5.
Silent, Harold C. (See Crisson, G., and Silent.)
Simmonds, Eugene B., et al. (See Bell, Frank M., assignor.)
Simpson, Norman W. (See Young, A. M., and Simpson.)
Sinclair Refining Company. (See Bell, John E., assignor.)
Sinclair Refining Company. (See Isom, E. W., and Bell, assignors.)
Sixta, Emil C., La Habra, Calif. Structure building card. 1,623,641; Apr. 5.
Sjöö, Arvid M., Stockholm, Sweden. Automatic regulator. 1,623,444; Apr. 5.
Skaupy, Franz, Berlin, Germany, assignor to General Electric Company. Electric lamp. 1,623,761; Apr. 5.
Slepian, Joseph, and C. R. Hanna, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Acoustic horn. 1,623,561; Apr. 5.
Smith, Arthur B., Evanston, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,623,320; Apr. 5.
Smith, Benjamin C., Westfield, assignor to Standard Motor Construction Company, Jersey City, N. J. Internal-combustion engine. 1,623,501; Apr. 5.
Smith Brothers. (See Smith, Delos H., assignor.)
Smith, Charles A. (See Bowers, W. G., and Smith.)
Smith & Crosby. (See Klinke, Oscar, assignor.)
Smith, Daniel A., Chevy Chase, Md., and C. P. Stirling, Washington, D. C., assignors to District of Columbia Paper Manufacturing Company, Washington, D. C. Decorated paper and making same. 1,623,280; Apr. 5.
Smith, Daniel A., Chevy Chase, Md., and C. P. Stirling, Washington, D. C., assignors to District of Columbia Paper Manufacturing Company, Washington, D. C. Machine for making decorated paper. 1,623,281; Apr. 5.
Smith, Delos H., assignor to Smith Brothers, Port Washington, Wis. Making caviar. 1,623,601; Apr. 5.
Smith, Dudley, Oakland, Calif. Bedpan shield. 1,623,602; Apr. 5.
Smith, Evander A., and Edward R. Finch, Houston, Tex. Agricultural implement. 1,623,321; Apr. 5.
Smith, Harry B., Albany, N. Y. Dyeing textile materials. 1,623,709; Apr. 5.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,623,445; Apr. 5.
Smith, Rufus W., Toronto, Ontario, Canada. Nut lock. 1,623,365; Apr. 5.
Smith, T. L., Company, The. (See Rybeck, Adolph W., assignor.)
Smithey, Marvin, Lawrenceville, Va. Meter. 1,623,562; Apr. 5.
Smith's, John E., Sons Co. (See Knowlton, Eugene W., assignor.)
Smyser, Elmer D., Fellows, Calif., assignor of one-half to A. R. Fletcher, Breckenridge, Tex. Engine. 1,623,502; Apr. 5.
Sobray, Leonard, New York, N. Y. Scaffold shoe. 1,623,892; Apr. 5.
Southern Can Company. (See O'Brien, Frank J., assignor.)
Spaulding, Milo H., Bozeman, Mont. Initiating apparatus. 1,623,282; Apr. 5.
Speedaumatic Company, The. (See Johnson, John E., assignor.)
Spencer, John R., Kingsford, Mich. Saw-crack punch. 1,623,816; Apr. 5.
Spilsbury, Beulah G., assignor to The Munsingwear Corporation, Minneapolis, Minn. Nightgown. 1,623,072; Apr. 5.
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sprague, Linus K. (See Thompson, A. G., and Sprague.)
Springthorpe, Isaac, Philadelphia, assignor, by mesne assignments, to Springthorpe Textile Machine Company, Philadelphia, Pa. Warp-knitting machine. 1,623,603; Apr. 5.
Springthorpe Textile Machine Company. (See Springthorpe, Isaac, assignor.)
Staege, Stephen A. (See Alexander, J. E., and Staege.)
Stahl, August H., Grafton, Nebr. Horse-collar cushion. 1,623,210; Apr. 5.
Stallman, Otto. (See Gubelmann, I., Weiland, and Stallman.)
Stancliff, Clifton L., Bakersfield, Calif. Torch mechanism for welding machines. 1,623,503; Apr. 5.
Standard Arch Company. (See Benson, Davisson A., assignor.)
Standard Development Company. (See Howard, F. A., and Wright, assignors.)
Standard Development Company. (See Messenger, Otis G., assignor.)
Standard Mirror Company. (See La Hodny, William, assignor.)
Standard Motor Construction Company. (See Smith, Benjamin C., assignor.)
Standard Oil Company of California. (See Dicely, Lee W., assignor.)
Starkie, John W., East Elmhurst, N. Y., assignor to The Aeolian Company. Keyboard for organs and the like. 1,623,211; Apr. 5.
Starr, Charles E., Oakland, Calif., assignor to Perfecto Gear Differential Co., Seattle, Wash. Transmission mechanism. 1,623,212; Apr. 5.
Starr, Charles E., Oakland, Calif., assignor to Perfecto Gear Differential Company, Seattle, Wash. Transmission gearing. 1,623,213; Apr. 5.
Steenrod, William J., assignor to Baker-Vawter Company, Benton Harbor, Mich. Locking mechanism for loose-leaf binders. 1,623,283; Apr. 5.
Stephens, William, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Machine for testing porosity of inflatable articles. 1,623,932; Apr. 5.
Sternbergh, Harry S., assignor to W. W. Blakely, Detroit, Mich. Hold-down device. 1,623,762; Apr. 5.
Steward Davit & Equipment Corporation. (See Hills, Harry B., assignor.)
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stewart-Warner Speedometer Corporation. (See Schweisthal, Fred G., assignor.)
Stewart-Warner Speedometer Corp. (See Sussin, Victor, assignor.)
Stiriss, Jacob, New York, assignor to The Larvex Corporation, Brooklyn, N. Y. Atomizer. 1,623,504; Apr. 5.
Stirling, Charles P. (See Smith, D. A., and Stirling.)
Stoddart, Edwin W., New York, N. Y. Game target plate. 1,623,284; Apr. 5.
Stoker, Hiram. (See Taylor, J. G., and Stoker.)
Stone, Frederick W., Montreal, Quebec, Canada, assignor to Central Commercial Company. Sound record. 1,623,285; Apr. 5.
Stone, George F. A., London, England. Electrical condenser. 1,623,563; Apr. 5.
Storey, Norman C., Passaic, N. J. Vehicle. 1,623,214; Apr. 5.
Strachan, Thomas H., assignor to Dayton Scale Company, Dayton, Ohio. Shipping attachment for weighing scales. 1,623,137; Apr. 5.
Strahan, James L., assignor to The Louden Machinery Company, Fairfield, Iowa. Air control for ventilating systems. 1,623,286; Apr. 5.
Straight, Halver R., Adel, Iowa. Continuous pugging wet pan. 1,623,287; Apr. 5.
Strawn, Ervin E., assignor to A. S. Gilman, Cleveland, Ohio. Duplicating device. 1,623,366; Apr. 5.
Stromberg Electric Company. (See Ostler, Ernest S., assignor.)
Stromberg Motor Devices Co. (See Chandler, Milton E., assignor.)
Stromberg Motor Devices Company. (See Gustafson, Charles J., assignor.)
Studebaker Corporation, The. (See Bourgon, Joseph H., assignor.)
Sturges, Charles E. (See Florey, Edward C., assignor.)
Sullivan, Elizabeth. (See Suvan, Betty, assignor.)
Sullivan, Francis W., Los Angeles, Calif. Valve action for organs and the like. 1,623,367; Apr. 5.
Sunfast Hats, Incorporated. (See Mansbendel, Fritz P., assignor.)
Sun Maid Raisin Growers of California. (See Nichols, Paul F., assignor.)
Super-Diesel Tractor Corporation. (See Scott, Philip L., assignor.)
Superheater Company, The. (See Thom, R. A. and J., assignors.)
Sussin, Victor, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Car heater. 1,623,215; Apr. 5.
Sutherland, Andrew E., Madrid, Iowa. Plow hitch. 1,623,642; Apr. 5.
Suvan, Betty, Chicago, Ill., assignor to Elizabeth Sullivan, Detroit, Mich. Stationery holder. 1,623,604; Apr. 5.
Swanson, Patrick. (See Jackson, J. A., and Swanson.)

Swartz, Niles P., Dalton, Pa. Brake. 1,623,817; Apr. 5.
Sweet Candy Company. (See Cassidy, Willis W., assignor.)
Sweet, Sterling S. (See Sheppard, S. E., and Sweet.)
Swett, Charles E., Boston, assignor to H. H. Beckwith, Brookline, Mass. Box toe. 1,623,073; Apr. 5.
Swiatecki, Wladyslaw, Lublin, Poland. Device for dropping bombs from aircraft. 1,623,893; Apr. 5.
Swift, Frank, Toronto, Ontario, Canada. Tape measure. 1,623,138; Apr. 5.
Symington Company, The. (See Anderson, Gustaf A., assignor.)
Szepesi, Eugene, Boston, Mass. Instrument for graphic control. 1,623,216; Apr. 5.
Tabulating Machine Company, The. (See Carroll, Fred M., assignor.)
Tainton, Urlyn C., Johannesburg, Transvaal, South Africa, Pump. 1,623,605; Apr. 5.
Taplin Manufacturing Company, The. (See Lienhard, Richard B., assignor.)
Tapp, John C., Broomfield, Colo. Gauge. 1,623,643; Apr. 5.
Tarratine Manufacturing Co. Inc. (See Hanson, Hugo H., assignor.)
Tartrais, Eugène H., Maisons-Laffitte, France. Fuel-supply means for heavy-oil engines. 1,623,074; Apr. 5.
Tate, James R., Lowell, Ariz. Spring-clip hanger. 1,623 368; Apr. 5.
Taub, Alex, assignor to General Motors Corporation, Detroit, Mich. Baffle plate in valve chamber. 1,623,322; Apr. 5.
Taylor, Harvey B., Philadelphia, Pa. Impulse turbine. 1,623,446; Apr. 5.
Taylor, John G., and H. Stoker, Lovelock, Nev. Hay loader. 1,623,447; Apr. 5.
Taylor, John M., assignor to Diamond State Fibre Company, Bridgeport, Pa. Mechanical element and making same. 1,623,894; Apr. 5.
Teel, Raymond A., East Bangor, Pa. Flexible coupling. 1,623,857; Apr. 5.
Teetor, Daniel C., Tipton, Ind. Piston ring. 1,623,710; Apr. 5.
Telautograph Corporation. (See Van Nostrand, Arleigh N., assignor.)
Tessier, Julien, assignor to Eastman Kodak Company, Rochester, N. Y. Motion-picture apparatus. 1,623,505; Apr. 5.
Texas Company, The. (See Holmes, Ralph C., assignor.)
Thayer, Fred I., Farmington, N. H. Knot supporter for four-in-hand neckties. 1,623,448; Apr. 5.
Theurich, Paul, Dresden, assignor to the Firm Wezel & Naumann Aktiengesellschaft, Leipzig, Germany. Advertising panel or decorative wall covering. 1,623,564; Apr. 5.
Thieme, Otto, Hartford, Conn., assignor to Underwood Computing Machine Company, New York, N. Y. Typewriting machine. 1,623,217; Apr. 5.
Thingren, Edward, Popotla, Mexico. Music stand. 1,623,565; Apr. 5.
Thom, James. (See Thom, Robert A. and J.)
Thom, Robert A., Bearsden, near Glasgow, and J. Thom, Aberdeen, Scotland, assignors to The Superheater Company, New York, N. Y. Steam generator. 1,623,944; Apr. 5.
Thomas, Benjamin J., Shamokin, Pa. Self-adjusting valve lifter. 1,623,506; Apr. 5.
Thomas, Chester L., Denver, Colo. Presser foot. 1,623,075; Apr. 5.
Thomas, Commadore J. (See Davies, D. B., and Thomas.)
Thomas Elevator Company. (See Wilson, Alexander H., assignor.)
Thompson, Arthur G., New York, N. Y., and L. K. Sprague, assignors to The Henry G. Thompson & Son Company, New Haven, Conn. Metal-cutting machine. 1,623,449; Apr. 5.
Thompson, Henry G., & Son Company, The. (See Thompson, A. G., and Sprague, assignors.)
Thompson, John L., Waterbury, Conn. Shoe-polishing machine. 1,623,218; Apr. 5.
Thompson, Robert G., et al. (See Bell, Frank M., assignor.)
Thorn, J. S., Company. (See Rupp, Charles, assignor.)
Three C Davenport Company. (See Konrad, Otto, assignor.)
Thurtle, Fred E., Butte, Mont. Folding tent. 1,623,507; Apr. 5.
Tichota, August, Dodge, Nebr. Adjustable seat. 1,623,818; Apr. 5.
Till, Henry, Los Angeles, Calif. Creating a hydraulic head. 1,623,369; Apr. 5.
Tolmach, Samuel, New York, N. Y. Vehicle signal. 1,623,219; Apr. 5.
Toniolo, Carlo, Milan, Italy. Manufacture of nitric acid. 1,623,606; Apr. 5.
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,623,139; Apr. 5.
Topinka, Joseph F., Cleveland, and O. J. Weichart, East Cleveland, Ohio. Cheese cutter. 1,623,288; Apr. 5.
Tovalin, Angel, Monterey, Mexico. Thermoglue vessel. 1,623,763; Apr. 5.
Trail-It Company. (See Greer, Edward R., assignor.)
Travis, Berma A., Sacramento, Calif. Extinguisher for cigarettes and the like. 1,623,140; Apr. 5.
Tremaine, Glenville S., Westfield, N. J. Combination clock and calendar. 1,623,076; Apr. 5.
Trimmer, John W., Cleveland, Ohio. Treating reflectors for headlights, etc. 1,623,711; Apr. 5.
Trinks, William W., assignor to Pulilean Manufacturing Corporation, Bridgeport, Conn. Laundering machine. 1,623,077; Apr. 5.
Tufts, John L., Westboro, Mass. Separation of liquid mixtures and device suitable therefor. 1,623,508; Apr. 5.
Turnbaugh, Ora W., Cambridge, Ohio. Wheel chock. 1,623,895; Apr. 5.
Tvedt, Thomas T., Brooklyn, N. Y. Plane. 1,623,644; Apr. 5.
Twombly, Willard I., New York, N. Y., assignor, by mesne assignments, to The Wilcolator Company, Newark, N. J. Thermostatic control. 1,623,566; Apr. 5.
Underwood Computing Machine Company. (See Thieme, Otto, assignor.)
Underwood Typewriter Company. (See Barker, Benjamin F., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Murphy, Gerald H., assignor.)
Underwood Typewriter Company. (See Neahr, Jacob E., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
United Shoe Machinery Corporation. (See Ballard, Harrie A., assignor.)
United Shoe Machinery Corporation. (See Seely, Thomas H., assignor.)
United States Fire Protection Company. (See Newton, George F., assignor.)
United States Hoffman Machinery Corporation. (See Page, Herbert E., assignor.)
Universal Draft Gear Attachment Co. (See Bartsch, Herbert E., assignor.)
Universal Draft Gear Attachment Co. (See Camp, P. B., and Wilson, assignors.)
Universal Draft Gear Attachment Co. (See Wilson, Jack, assignor.)
Universal Oil Products Company. (See Seguy, Jean D., assignor.)
Utility Manufacturing Co. (See Hutchens, Edward, assignor.)
Van Amburg, Otto H., Bridgeport, Conn., assignor to General Electric Company. Fuse plug. 1,623,819; Apr. 5.
Van Daam, Gerrit, Buffalo, N. Y. Automobile wheel. 1,623,645; Apr. 5.
Van Gale, Louis, Astoria, N. Y. Automobile signal device. 1,623,450; Apr. 5.
Van Nostrand, Arleigh N., Flushing, assignor to Telautograph Corporation, New York, N. Y. Telautograph system. 1,623,220; Apr. 5.
Van Sickle, Frank B. (See Brown, C. A., and Van Sickle.)
Van Voorhis, Cletus C., Princeton, N. J., assignor to Westinghouse Lamp Company. Introducing volatile matter into lamps and the like. 1,623,323; Apr. 5.
Verdery, Horace H., Philadelphia, Pa. Flowerpot trellis. 1,623,646; Apr. 5.
Vetter, Ignatius J., New York, N. Y. Phonograph. 1,623,451; Apr. 5.
Vezzani, Alberto, Genoa, Italy. Cartridge for fire extinguishers. 1,623,289; Apr. 5.
Vigreux, Charles, Balesmes, assignor to Etablissements Poulenc Frères, Paris, France. Apparatus for industrial culture of ferments, yeasts, microbes, and the like. 1,623,896; Apr. 5.
Vivaudou, Victor, New York, N. Y. Cosmetic container. 1,623,509; Apr. 5.
Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)
Vortex Mfg. Co. (See McCarthy, John W., assignor.)
Wagel, Srinivas R., New York, N. Y., assignor to The Lehigh Coal and Navigation Company. Briquetting bituminous coal. 1,623,764; Apr. 5.
Waggoner, Albert E., Glenview, assignor to Geo. W. Diener Mfg. Co., Chicago, Ill. Fire extinguisher. 1,623,510; Apr. 5.
Wallnsky, Ossip J., Sea Gate, N. Y., assignor to White Luggage Co. Inc., New York, N. Y. Suitcase. Des. 72,392; Apr. 5.
Walker, Murphy E., Austin, Tex. Meat grinder. 1,623,141; Apr. 5.
Walkup, George M., Minneapolis, Minn. Window structure. 1,623,078; Apr. 5.
Walsh, Cornelius S., Los Angeles, Calif. Device for finishing concrete surfaces. 1,623,142; Apr. 5.
Walstrom, Axel M. (See Williams, G. W., and Walstrom.)
Walz, Ludwig, Cincinnati, Ohio, assignor to The Palm Brothers Decalcomania Company, Norwood, Ohio. Plate or similar article. Des. 72,393; Apr. 5.
Wappat, Fred W., Pittsburgh, Pa. Portable saw. 1,623,290; Apr. 5.
Wappler Electric Company. (See Wappler, F. H., and Koenitz, assignors.)
Wappler, Frederick H., Elmhurst, and A. C. Koenitz, New York, N. Y. assignors to Wappler Electric Company, Inc. Attachment for X-ray tables. 1,623,567; Apr. 5.

Ward, Joseph E. (See Fayle, Charles E., assignor.)
Warner, Harold L. (See McLaughlin, John J., assignor.)
Warren, Alvah H., jr., St. Paul, Minn. Power take-off device. 1,623,765; Apr. 5.
Warren, Robert M., East Orange, N. J., assignor to Dubilier Condenser Corporation. Radiofrequency transformer. 1,623,143; Apr. 5.
Washlake, Adolph P. (See Harvey, R., and Washlake.)
Wasil, Albert P. (See Dudas, A., and Wasil.)
Watkins, John and W. E., Milmay, N. J. Swing-operated fan. 1,623,607; Apr. 5.
Watkins, William E. (See Watkins, John and W. E.)
Way, Alva O., Schenectady, N. Y., assignor to General Electric Company. Coil former. 1,623,766; Apr. 5.
Wayman, Fred, Binghamton, N. Y. Device for controlling the operation of workmen's time clocks. 1,623,370; Apr. 5.
Webb, Edward C., assignor of one-half to G. H. Cowell, London, England. Cigarette case and like container. 1,623,512; Apr. 5.
Weber & Friedrich, Inc. (See Friedrich, Robert F., assignor.)
Weichart, Otto J. (See Topinka, J. F., and Weichart.)
Weidmann, Hans, Frankfort-on-the-Main, Germany, assignor, by mesne assignments, to Allied Process Corporation, New York, N. Y. Preparation of lithium carbonate. 1,623,513; Apr. 5.
Weight-O-Graph Company. (See Schaper, Harry C., assignor.)
Weiland, Henry J. (See Gubelmann, I., Weiland, and Stallman.)
Weimer, Robert, Apple Creek, Ohio. Combined auto truck and sprayer. 1,623,221; Apr. 5.
Weiss, Leo L., New York, N. Y. Self-propelling toy. 1,623,144; Apr. 5.
Welk, Nelson S., assignor to The McBee Binder Company, Athens, Ohio. Binder for loose-leaf files. 1,623,145; Apr. 5.
Wepplo, Henry J., Minneapolis, Minn. Air pump. 1,623,647; Apr. 5.
Werder, John F., Cleveland, Ohio. Abrasive compound. 1,623,222; Apr. 5.
Werst, Willard C., Pendleton, Oreg. Doorknob spindle. 1,623,324; Apr. 5.
West, James, Jamaica Plain, Mass. Marking device. 1,623,291; Apr. 5.
West, Roger R., Norwood, London, England. Automatic weighing machine. 1,623,820; Apr. 5.
Western Electric Company. (See Carpenter, Warren W., assignor.)
Western Electric Company. (See Jammer, Jacob S., assignor.)
Western Electric Company. (See Kuhn, John J., assignor.)
Western Electric Company. (See Pfannenstiehl, Harry, assignor.)
Western Electric Company. (See Roberts, John G., assignor.)
Western Electric Company. (See Sacia, Charles F., assignor.)
Western Electric Company. (See Williams, S. B., and Gibson, assignors.)
Western Electric Company. (See Wood, Ernest B., assignor.)
Westfield, William P., Park City, Utah. Fire escape. 1,623,821; Apr. 5.
Westinghouse Electric and Manufacturing Company. (See Fay, Carl J., assignor.)
Westinghouse Electric and Manufacturing Company. (See Slepian, J., and Hanna, assignors.)
Westinghouse Lamp Company. (See MacRae, D., and Richardson, assignors.)
Westinghouse Lamp Company. (See Madden, H. D., and Higgins, assignors.)
Westinghouse Lamp Company. (See Van Voorhis, Cletus C., assignor.)
Wetmore, Charles P., assignor to Wetwore-Gibbons Co., Milwaukee, Wis. Making spuds. 1,623,325; Apr. 5.
Wetmore-Gibbons Co. (See Wetmore, Charles P., assignor.)
Wetmore, William O., U. S. Army, Honolulu, Hawaii. Oil liberator. 1,623,371; Apr. 5.
Wetzel, Arno, Milwaukee, Wis. Yarn-tensioning device. 1,623,608; Apr. 5.
Wetzell, Clare A., Sterling, Ill. Toy. Des. 72,394; Apr. 5.
Wetzell, Clare A., Sterling, Ill. Toy. Des. 72,395; Apr. 5.
Wetzell, Clare A., Sterling, Ill. Toy. Des. 72,396; Apr. 5.
Wetzell, Clare A., Sterling, Ill. Toy. Des. 72,397; Apr. 5.
Wetzell, Clare A., Sterling, Ill. Toy. Des. 72,398; Apr. 5.
Weyandt, Claude, Claysburg, Pa. Radiator cap. 1,623,511; Apr. 5.
Wezel & Naumann Aktiengesellschaft. (See Theurich, Paul, assignor.)
Whalen, James, Omaha, Nebr. Electric switch. 1,623,326; Apr. 5.
Wheeling Steel Corporation. (See Cook, William J., assignor.)
Wheland Company, The. (See Campbell, George E., assignor.)
White, John. (See Dent, L. M. E., Mackenzie, and White.)
White Luggage Co. Inc. (See Wallusky, Ossip J., assignor.)
Whitney, Clarence E., et al., executors. (See Hanson, Bengt M. W.)
Whittier, Albert E., Bristol, Conn. Thermostatic circuit control. 1,623,568; Apr. 5.
Widdows, Anna M., Akron, Ohio. Hair-cutting comb. 1,623,292; Apr. 5.
Widell, Magnus E., Cincinnati, Ohio, assignor to American Can Company, New York, N. Y. Scoring machine. 1,623,223; Apr. 5.
Wiemann, Herbert O., Chesterton, Ind. License indicator. Re16,583; Apr. 5.
Wight, Jarvis S., Brooklyn, N. Y. Vaporizer. 1,623,452; Apr. 5.
Wilber, William R., Los Angeles, Calif. Underreamer. 1,623,453; Apr. 5.
Wilcolator Company, The. (See Twombly, Willard I., assignor.)
Wilder, Clinton E., Irvine, Pa. Pipe mold for centrifugal casting machines. 1,623,146; Apr. 5.
Wilkinson, James, Lynnfield, Mass., assignor to General Electric Company. Emergency governor. 1,623,822; Apr. 5.
Williams, Clifford J., assignor to Briggs Manufacturing Company, Detroit, Mich. Door buffer. 1,623,767; Apr. 5.
Williams, D. T., Valve Company, The. (See Ernst, Harry J., assignor.)
Williams, George W., Oak Park, Ill., and A. M. Walstrom, Minneapolis, Minn., assignors to The Creamery Package Mfg. Company, Chicago, Ill. Soldering machine. 1,623,293; Apr. 5.
Williams, George W., Oak Park, Ill., and A. M. Walstrom, Minneapolis, Minn., assignors to The Creamery Package Mfg. Company, Chicago, Ill. Soldering machine. 1,623,294; Apr. 5.
Williams, John L., Du Bois, Pa. Fisherman's hat. 1,623,768; Apr. 5.
Williams, Ruffin, Wakefield, N. C. Rule. 1,623,897; Apr. 5.
Williams, Samuel B., Brooklyn, N. Y., and E. S. Gibson, Ridgewood, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,623,769; Apr. 5.
Willis, Orris C. (See Lewellen, L. J., and Willis.)
Willys-Overland Company, The. (See Belden, Edward H., assignor.)
Willys-Overland Company, The. (See Rhoads, Harry E., assignor.)
Wilson, Alexander H., Oak Park, assignor to Thomas Elevator Company, Chicago, Ill. Hoisting machine. 1,623,147; Apr. 5.
Wilson, Edward A., Jackson Heights, N. Y., assignor to W. H. & A. E. Margerison & Co., Philadelphia, Pa., a firm composed of W. H. and A. E. Margerison. Towel. Des. 72,399; Apr. 5.
Wilson, Harry S., High Rock, Pa. Rescuing device for sunken ships. 1,623,148; Apr. 5.
Wilson, Jack. (See Camp, P. B., and Wilson.)
Wilson, Jack, Chicago, Ill., assignor to Universal Draft Gear Attachment Co. Brake mechanism. 1,623,295; Apr. 5.
Wilson, Peter M., Niagara Falls, N. Y. Eyewash bottle. 1,623,454; Apr. 5.
Wilson, Robert J., Rochester, assignor of one-half to R. S. Crain, Buffalo, N. Y. Rotary gang plow. 1,623,149; Apr. 5.
Winchester Repeating Arms Company. (See de Olaneta, Harold, assignor.)
Winesburg, William, Bristow, Okla. Oil and water well pump. 1,623,150; Apr. 5.
Winnett, Alfred H., Meridian, Tex. Cotton chopper. 1,623,898; Apr. 5.
Wishnevsky, Leo B., Brooklyn, assignor to F. M. Heyman, New York, N. Y. Demountable rim. 1,623,372; Apr. 5.
Wittel, Otto, assignor to Eastman Kodak Company, Rochester, N. Y. Photographic film and reel therefor. 1,623,514; Apr. 5.
Wohl, Paul J., Frankfort-on-the-Main, Germany. Treatment of gut. 1,623,858; Apr. 5.
Wojciechowski, Frank M., North Attleboro, Mass. Vanity case. Des. 72,400; Apr. 5.
Wold, Knute. (See Erickson, Albert O., assignor.)
Wolf, Ezekiel. (See Fay, R. D., and Wolf.)
Wolff, Karl, Munich, Germany. Motor-vehicle ignition and lighting system. 1,623,648; Apr. 5.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Lighting fixture. Des. 72,401; Apr. 5.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Lighting fixture. Des. 72,402; Apr. 5.
Wood, Ernest B., Chatham, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Regulating and recording device. 1,623,712; Apr. 5.
Workman, John E., York, Pa. Trap. 1,623,515; Apr. 5.
Wright, James R. (See Howard, F. A., and Wright.)
Wurlitzer, Rudolph, Manufacturing Company. (See Deverall, Charles N., assignor.)
Wurtenberg, Charles. (See Randall, C. J., and Wurtenberg.)

Wustholz, Fred, Claytonville, Ill. Concrete form. 1,623,151; Apr. 5.
Wylie, Adrian W. (See Pennell, R. H. L., and Wylie.)
Xippas, Socrates A., Pittsburgh, Pa. Fan blade and center. 1,623,373; Apr. 5.
Yale, Charles E., Santa Monica, Calif. Key-holding device. 1,623,224; Apr. 5.
Yerk, Henry H., and W. J. Baumberger, Davenport, assignors to Micro Machine Company, Bettendorf, Iowa. Collapsible box. 1,623,609; Apr. 5.
Young, Arthur M., Brentwood, and N. W. Simpson, Bolton, England, assignors to Radio Corporation of America. Radio apparatus. 1,623,152; Apr. 5.
Young, Charles D., Philadelphia, Pa., assignor to Q & C Company, New York, N. Y. Guard-rail structure. 1,623,713; Apr. 5.
Young, Fred M., assignor to Racine Radiator Company, Racine, Wis. Assembling radiators. 1,623,327; Apr. 5.
Zacher, Franz, Erlangen, assignor to the Firm Reiniger, Gebbert & Schall Aktiengesellschaft, Bavaria, Germany. Apparatus for supplying electric current to vacuum tubes. 1,623,569; Apr. 5.
Zane, John M. (See Eckart, George F., assignor.)
Zeindlhofer, Anton, sr., Vienna, Austria, assignor to Groove-Lock Co., Inc., New York, N. Y. Fastening device. 1,623,610; Apr. 5.
Zimmerman, Charles H., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Airship nose batten. 1,623,649; Apr. 5.
Zimmermann, Carl F., assignor to Conveyors Corporation of America, Chicago, Ill. Wash vent for ash-conveyer systems. 1,623,079; Apr. 5.
Zlock, Edward J., Rockford, Ill. Method of and apparatus for finishing knitted articles. 1,623,080; Apr. 5.
Zoelly, Heinrich, Zurich, Switzerland. Railway vehicle. 1,623,516; Apr. 5.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 5TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A battery trickle charger and B supply, Combined. D. R. Lovejoy. 1,623,628; Apr. 5.
Abrasive compound. J. F. Werder. 1,623,222; Apr. 5.
Acid, Manufacture of nitric. C. Toniolo. 1,623,606; Apr. 5.
Acid, Producing 1.8-hydroxynaphthoic. R. Herz and F. Schulte. 1,623,678; Apr. 5.
Addressing machine. J. E. Johnson. 1,623,542; Apr. 5.
Addressing machine. H. C. Osborn. 1,623,265; Apr. 5.
Adjustable seat. A. Tichota. 1,623,818; Apr. 5.
Advertising panel and decorative wall coverings. P. Theurich. 1,623,564; Apr. 5.
Agricultural implement. E. A. Smith and E. R. Finch. 1,623,321; Apr. 5.
Aircraft variable-pitch propeller and blade mounting. A. Nosan. 1,623,549; Apr. 5.
Airship. D. Donchetf. 1,623,865; Apr. 5.
Airship frame. K. Arnstein. 1,623,951; Apr. 5.
Airship, Gas-inflated. H. Baumeister, W. E. Dörr, and K. Hürttle. 1,623,653; Apr. 5.
Airship nose batten. C. H. Zimmerman. 1,623,649; Apr. 5.
Airships, Gas-cell protection for. L. Dürr. 1,623,663; Apr. 5.
Airships, Outer cover on rigid. K. Hürttle. 1,623,680–1; Apr. 5.
Airships, Stabilizing apparatus for rigid. K. Arnstein. 1,623,952; Apr. 5.
Alloy, Nickel. T. S. Fuller. 1,623,948; Apr. 5.
Alloys, Manufacture of chromium iron. B. D. Saklatwalla. 1,623,757; Apr. 5.
Amalgamator and concentrator, Centrifugal. F. D. Lewis. 1,623,421; Apr. 5.
Amplifier, Cabinet. H. B. Newhall and H. W. Pleister. 1,623,065; Apr. 5.
Anatomical restraining appliance. H. Levine. 1,623,125; Apr. 5.
Annunciator drop. C. Auth. 1,623,376; Apr. 5.
Ant trap. W. E. Rawlings. 1,623,439; Apr. 5.
Article-feeding mechanism. E. Nordstrom. 1,623,066; Apr. 5.
Ash-conveyer systems, Wash vent for. C. F. Zimmerman. 1,623,079; Apr. 5.
Atomizer. J. Stiriss. 1,623,504; Apr. 5.
Auditorium, Convertible. J. S. Dean. 1,623,619; Apr. 5.
Auto truck and sprayer, Combined. R. Welmer. 1,623,221; Apr. 5.
Auto wheel puller. J. V. Ray. 1,623,440; Apr. 5.
Automatic regulator. A. M. Sjöö. 1,623,444; Apr. 5.
Automatic sprinkler. G. F. Newton. 1,623,887; Apr. 5.

Outlet box. O. A. Frederickson. 1,623,587; Apr. 5.
Oven, Combination. J. Becker. 1,623,460; Apr. 5.
Oven-door structure. S. Harter. 1,623,408; Apr. 5.
Package-wrapping device. E. Brady. 1,623,300; Apr. 5.
Padlock hasp device. P. Frantz. 1,623,050; Apr. 5.
Painting on velvet or other cut pile fabric. R. Alexander. 1,623,771; Apr. 5.
Pan: *See*—
Baking pan. Pugging wet pan.
Paper and making same, Decorated. D. A. Smith and C. P. Stirling. 1,623,280; Apr. 5.
Paper, Coated. W. G. Bent. 1,623,522; Apr. 5.
Paper cutter. W. B. Reynolds and W. E. Jackson. 1,623,495; Apr. 5.
Paper-hanger's table. J. H. A. Christiansen. 1,623,167; Apr. 5.
Paper, Machine for making decorated. D. A. Smith and C. P. Stirling. 1,623,281; Apr. 5.
Paper machines, Slice for. D. B. Davies and C. J. Thomas. 1,623,096; Apr. 5.
Paper-making machine. E. E. Berry. 1,623,157; Apr. 5.
Paper-making machines, Moisture-testing means for. F. A. Peschl. 1,623,436; Apr. 5.
Paper-making machines, Water deckle for. F. W. Sears and A. Buck. 1,623,278; Apr. 5.
Paper, Method and apparatus for making. A. E. Cofrin. 1,623,526; Apr. 5.
Paper package, Tissue. B. A. Nienhauser. 1,623,806; Apr. 5.
Paper stock, Method of and apparatus for working. A. J. Haug. 1,623,676; Apr. 5.
Pasteurizer. T. L. Cavalli. 1,623,909; Apr. 5.
Pavement. F. V. Lanham. 1,623,417; Apr. 5.
Pens, Blotter device for. P. Becsi. 1,623,614; Apr. 5.
Phonograph. F. J. Seabolt. 1,623,559; Apr. 5.
Phonograph. I. J. Vetter. 1,623,451; Apr. 5.
Phonograph record. W. C. Hadley. Re16,588; Apr. 5.
Photoglazing method and apparatus. J. W. Passman. 1,623,202; Apr. 5.
Photographic developing apparatus. C. A. Hoxie. 1,623,788; Apr. 5.
Photographic emulsion and material and process used in the preparation thereof. S. E. Sheppard and R. F. Punnett. 1,623,499; Apr. 5.
Photographic film and base therefor. S. E. Sheppard and S. S. Sweet. 1,623,500; Apr. 5.
Photographic film and reel therefor. O. Wittel. 1,623,514; Apr. 5.
Photographic film package. B. H. Meyering. 1,623,486; Apr. 5.
Photographs (positive prints on paper or the like), Producing colored. E. A. Lage. 1,623,123; Apr. 5.
Piano cases, Truss structure for upright. J. D. Hurst. 1,623,188; Apr. 5.
Piano key. G. J. Becker. 1,623,331; Apr. 5.
Piano keys, Apparatus for leveling. E. S. Rauworth. 1,623,359; Apr. 5.
Picture apparatus, Motion-. J. Tessier. 1,623,505; Apr. 5.
Picture projector, Motion-. F. T. O'Grady. 1,623,435; Apr. 5.
Picture-transfer mechanism, Talking-. H. E. Chipman. Re16,586; Apr. 5.
Pin: *See*—
Safety pin.
Pin with bayonet point, Safety. A. Dudas and A. P. Wasil. 1,623,533; Apr. 5.
Pipe: *See*—
Metal pipe.
Pipe-cutting device. W. A. Geis. 1,623,833; Apr. 5.
Pipe-joint filling spout. L. E. Kollock. 1,623,058; Apr. 5.
Pipe or culvert, Corrugated. W. H. Hall. 1,623,112; Apr. 5.
Pipe straightener. J. B. Gocke and C. F. De Corse. 1,623,405; Apr. 5.
Pipe wrench. O. H. Adams. 1,623,770; Apr. 5.
Pipes, Apparatus for forming concrete. A. Horten. 1,623,539; Apr. 5.
Pipes, Vent cap for soil. J. Comerford. 1,623,659; Apr. 5.
Piston. G. C. Austin. 1,623,328; Apr. 5.
Piston, Engine. J. H. Burpee and D. E. Lain. 1,623,717; Apr. 5.
Piston ring. D. C. Teetor. 1,623,710; Apr. 5.
Piston-ring tool. J. P. McCarthy. 1,623,799; Apr. 5.
Pistons, Self-adjusting packing for. L. C. Harrod. 1,623,407; Apr. 5.
Plane. T. T. Tvedt. 1,623,644; Apr. 5.
Plastic articles, Method and apparatus for producing. R. V. Mattison. 1,623,631; Apr. 5.

Plate or similar article. M. J. Palm, jr. Des. 72,383–4; Apr. 5.
Plate or similar article. L. Walz. Des. 72,393; Apr. 5.
Plating by action of casting off mechanism, Reverse. R. H. Lawson. Re16,584; Apr. 5.
Plow hitch. A. E. Sutherland. 1,623,642; Apr. 5.
Plow, Rotary gang. R. J. Wilson. 1,623,149; Apr. 5.
Porous masses for storing explosive gases and making same. G. Dalen. 1,623,169; Apr. 5.
Post: *See*—
Steering post.
Poster boards, Adjustable frame for. L. D. Cook. 1,623,047; Apr. 5.
Pot: *See*—
Melting pot.
Power: *See*—
Ocean compressed-air power.
Power take-off device. A. H. Warren. 1,623,765; Apr. 5.
Power transmission. C. G. Garrard. 1,623,052; Apr. 5.
Preserving jar, Food-. H. Ritter. 1,623,754; Apr. 5.
Press: *See*—
Pulp-forming press.
Pressing machine, Garment-. H. E. Page. 1,623,358; Apr. 5.
Presser foot. C. L. Thomas. 1,623,075; Apr. 5.
Presses, Apparatus for cleaning cylinders of offset and other. W. B. Gegenheimer and E. E. Barney. 1,623,723; Apr. 5.
Pressure regulator, Automatic. T. T. King. 1,623,842; Apr. 5.
Printing-die structure. R. F. Jahn. 1,623,478; Apr. 5.
Printing machine, Card-controlled. F. M. Carroll. 1,623,163; Apr. 5.
Propeller. W. H. Leinweber. 1,623,420; Apr. 5.
Propeller, Marine. J. Fischer. 1,623,868; Apr. 5.
Puddle plug. H. W. Klinck. 1,623,843; Apr. 5.
Pugging wet pan, Continuous-. H. R. Straight. 1,623,287; Apr. 5.
Puller: *See*—
Auto wheel puller. Beet puller.
Pulp-forming press. E. Hutchens. 1,623,731; Apr. 5.
Pulp-pressing head. R. E. Hall. 1,623,111; Apr. 5.
Pump. J. W. Price and R. M. Leake. 1,623,268; Apr. 5.
Pump. U. C. Tainton. 1,623,605; Apr. 5.
Pump, Air. H. J. Weppio. 1,623,647; Apr. 5.
Pump and internal-combustion engine therefor. W. S. Franklin. 1,623,402; Apr. 5.
Pump and motor, Rotary. C. H. Kain. 1,623,924; Apr. 5.
Pump and system, Hydraulic. E. B. Galbreath. 1,623,239; Apr. 5.
Pump, Centrifugal. C. F. Ames. 1,623,082; Apr. 5.
Pump, Centrifugal. R. H. Frederick. 1,623,104; Apr. 5.
Pump, Lubricant. O. W. Fisher. 1,623,101; Apr. 5.
Pump, Oil and water well. W. Winesburg. 1,623,150; Apr. 5.
Pump, Vacuum. J. R. Kinney. 1,623,315; Apr. 5
Pumps, Power-transmission device for. J. A. Nitchie. 1,623,490; Apr. 5.
Pumps, Relief valve for rotary. J. R. Kinney. 1,623,316; Apr. 5.
Punch and file, Combined. J. A. Bondeson and A. F. Hunt. 1,623,824; Apr. 5.
Rack: *See*—
Shoe rack.
Rack. P. H. Chase and W. Foster. 1,623,864; Apr. 5.
Radiant energy, Transmitting system for. A. F. Murray. 1,623,745; Apr. 5.
Radiator cap. C. Weyandt. 1,623,511; Apr. 5.
Radiator fins, Machine for bending. B. H. Hawkins and E. R. Hansen. 1,623,594; Apr. 5.
Radiators, Assembling. F. M. Young. 1,623,327; Apr. 5.
Radiators, Cushion support for. E. R. Gurney. 1,623,473; Apr. 5.
Radio apparatus. A. M. Young and N. W. Simpson. 1,623,152; Apr. 5.
Radiofrequency transformer. R. M. Warren. 1,623,143; Apr. 5.
Radio receiving apparatus. A. H. Grebe. 1,623,918; Apr. 5.
Radius-rod attachment. G. F. Coley. 1,623,046; Apr. 5.
Railroad-grade crossing. J. A. Dailey and L. W. Gerth. 1,623,911; Apr. 5.
Rails and its application, Apparatus used in bonding. W. P. Bovard. 1,623,654; Apr. 5.
Railway tie. J. J. Hinde. 1,623,185; Apr. 5.
Railway vehicle. H. Zoelly. 1,623,516; Apr. 5
Raisins and the like, Apparatus and method for determining the moisture content of. P. F. Nichols. 1,623,263; Apr. 5.
Rake: *See*—
Hay rake.
Receptacle and handle therefor. F. J. Hempen and O. Lipsmeier. 1,623,409; Apr. 5.
Receptacles, Died-out blank for. R. R. Reilly. 1,623,269; Apr. 5.
Refrigeration and cold storage. A. Green. 1,623,871; Apr. 5.
Refrigerator. T. S. Morton. 1,623,802; Apr. 5.
Refrigerator, Bottle. C. A. Frick. 1,623,947; Apr. 5.
Register: *See*—
Cash register.
Regulating and recording device. E. B. Wood. 1,623,712; Apr. 5.
Regulator: *See*—
Automatic regulator. Pressure regulator.
Electric-current regulator.
Renovating clothing. K. Kara-Joseph. 1,623,791; Apr. 5.
Resins, Improvement of natural. A. Amann and E. Fonrobert. 1,623,901; Apr. 5.
Rheostat. E. B. Nowosielski. 1,623,198; Apr. 5.
Rifle bars, Friction head for. G. W. Hulshizer. 1,623,411; Apr. 5.
Rim, Demountable. L. B. Wishnevsky. 1,623,372; Apr. 5.
Rims and wheel disks, Manufacturing seamless. A. J. Michelin. 1,623,883; Apr. 5.
Ring: *See*—
Piston ring.
Riveting machines, Fixture for. W. J. Lehman. 1,623,796; Apr. 5.
Rock drill. G. Lee. 1,623,419; Apr. 5.

Toe-in gauge. W. J. Kund. 1,623,878; Apr. 5.
Toggle and method. W. A. Hubener. 1,623,789; Apr. 5.
Toilet box. C. E. Kjetsaa. 1,623,877; Apr. 5.
Tone-sustaining mechanism. C. Chadwick. 1,623,232; Apr. 5.
Tool. S. A. Lind. 1,623,689; Apr. 5.
Tool brace. R. D. Hutson. 1,623,541; Apr. 5.
Tool retainer. H. C. Gustafson. Re16,587; Apr. 5.
Torchère. O. B. Bach. Des. 72,341; Apr. 5.
Torchère. O. B. Bach. Des. 72,345; Apr. 5.
Towel. R. Clarke. Des. 72,349; Apr. 5.
Towel. E. S. G. Elliott. Des. 72,362; Apr. 5.
Towel. E. A. Wilson. Des. 72,399; Apr. 5.
Toy. C. A. Wetzell. Des. 72,394–8; Apr. 5.
Toy balloon. J. F. Mulholland. Des. 72,381; Apr. 5.
Toy, Mechanical. H. H. Morgan. 1,623,886; Apr. 5.
Toy, Sailor. E. V. Babbitt. 1,623,039; Apr. 5.
Toy, Self-propelling. L. L. Weiss. 1,623,144; Apr. 5.
Toy truck. F. A. Lundahl. Des. 72,377; Apr. 5.
Toy trumpet. I. Cohn. 1,623,168; Apr. 5.
Tractor attachment. B. F. B. Sewell. 1,623,815; Apr. 5.
Traffic signal. W. L. Phillips. 1,623,889; Apr. 5.
Trailer hitch. E. R. Greer. 1,623,179; Apr. 5.
Transfer design. J. Moores. 1,623,357; Apr. 5.
Transmission. R. Chilton. 1,623,306; Apr. 5.
Transmission-band-operating device. M. Hoffman. 1,623,312; Apr. 5.
Transmission lock, Automobile. W. M. Reason. 1,623,319; Apr. 5.
Transmission mechanism. C. E. Starr. 1,623,212; Apr. 5.
Transmission mechanism, Fluid-. C. Potter. 1,623,206; Apr. 5.
Transmission mechanism, Motor-vehicle. E. L. Harry. 1,623,724; Apr. 5.
Transmission regulation. J. S. Jammer. 1,623,600; Apr. 5.
Transmission system. J. J. Kuhn. 1,623,480; Apr. 5.
Trap: *See*—
Ant trap. Double-acting trap.
Trap. S. C. Kinzer. 1,623,925; Apr. 5.
Trap. J. E. Workman. 1,623,515; Apr. 5.
Tree-shaking device. W. F. Rurup. 1,623,497; Apr. 5.
Trellis, Flowerpot. H. H. Verdery. 1,623,646; Apr. 5.
Tricycle. E. H. L. Englund. 1,623,400; Apr. 5.
Trolley control. J. G. McMakin. 1,623,480; Apr. 5.
Truck. F. M. Bell. 1,623,298; Apr. 5.
Truck side frame. G. A. Anderson. 1,623,036; Apr. 5.
Truck side frame. G. A. Anderson. 1,623,570; Apr. 5.
Trunk lock. M. Rasmussen. 1,623,318; Apr. 5.
Trunk-lock structure. S. Klein. 1,623,190; Apr. 5.
Tube-sorting machine, Automatic cut-. H. D. Madden and J. J. Higgins. 1,623,352; Apr. 5.
Tubes, Method of and apparatus for severing and valving bag. A. M. Bates, G. P. Dorr, and J. E. Dancker. 1,623,228; Apr. 5.
Tubes or pipes, Apparatus for eliminating dents in. L. E. Brown. 1,623,657; Apr. 5.
Turbine, Impulse. H. B. Taylor. 1,623,446; Apr. 5.
Turbulence, Apparatus for and method of creating. P. L. Scott. 1,623,704; Apr. 5.
Turnstile. J. J. McLaughlin. 1,623,744; Apr. 5.
Typewriter-key remover. P. P. Dunn and G. Shoenfeld. 1,623,912; Apr. 5.
Typewriter stand. J. E. Neahr. 1,623,196; Apr. 5.
Typewriting machine. B. F. Barker. 1,623,042; Apr. 5.
Typewriting machine. A. G. F. Kurowski. 1,623,481–2; Apr. 5.
Typewriting machine. J. A. B. Smith. 1,623,445; Apr. 5.
Typewriting machine. O. Thieme. 1,623,217; Apr. 5.
Typewriting machines. G. H. Murphy. 1,623,063; Apr. 5.
Undergarment, Women's. A. Rosenthal. 1,623,637; Apr. 5.

Underreamer. W. R. Wilber. 1,623,453; Apr. 5.
Universal joint. D. P. Owens. 1,623,199; Apr. 5.
Vacuum-producing apparatus. C. F. Ames. 1,623,083; Apr. 5.
Vacuum-producing apparatus. R. H. Frederick. 1,623,103; Apr. 5.
Valve. A. W. Rybeck. 1,623,557; Apr. 5.
Valve, Acid-proof. J. J. W. Kenan. 1,623,056; Apr. 5.
Valve, Backwater. D. Forfar. 1,623,586; Apr. 5.
Valve, Combined cylinder cock and relief. V. P. McVoy. 1,623,431; Apr. 5.
Valve, Diaphragm. R. E. Mitton. 1,623,126; Apr. 5.
Valve, Float. O. O. Anderson. 1,623,374; Apr. 5.
Valve for oil burners and the like, Safety. C. B. Buerger. 1,623,160–1; Apr. 5.
Valve for locomotives, Feed. G. de Grahl. 1,623,660; Apr. 5.
Valve-forming mechanism, Bag-. M. J. Davis. 1,623,170; Apr. 5.
Valve lifter. E. E. Rainey. 1,623,752; Apr. 5.
Valve lifter, Self-adjusting. B. J. Thomas. 1,623,506; Apr. 5.
Valve mechanism, Flushing-. P. Haas. 1,623,109; Apr. 5.
Valve-operating mechanism. E. Brown. 1,623,043; Apr. 5.
Valve, Poppet-. J. F. Burleson. 1,623,826; Apr. 5.
Valve rocker-arm attachment. T. H. Cadwell. 1,623,863; Apr. 5.
Valve structure and locking device. H. J. Ernst. 1,623,867; Apr. 5.
Valves or the like, Regulating device for controlling the operation of. P. C. P. Booty. 1,623,616; Apr. 5.
Vanity case. F. M. Wojciechowski. Des. 72,400; Apr. 5.
Vaporizer. J. S. Wight. 1,623,452; Apr. 5.
Vegetable cutter, Green-. F. W. Burpee. 1,623,089; Apr. 5.
Vehicle. I. H. Athey. 1,623,456–8; Apr. 5.
Vehicle. N. C. Storey. 1,623,214; Apr. 5.
Vehicle cab. C. J. Cropp. 1,623,830; Apr. 5.
Vehicle, Child's. H. W. Dyer. Des. 72,361; Apr. 5.
Vehicle closure. J. H. Bourgon. 1,623,934; Apr. 5.
Vehicle heater, Motor-. E. W. Leahy. 1,623,879; Apr. 5.
Vehicle, Motor-. E. Herds. 1,623,726; Apr. 5.
Vehicle signal. M. Borglum. 1,623,905; Apr. 5.
Vehicle signal. S. Tolmach. 1,623,219; Apr. 5.
Vehicle springs, End connection and shock absorber for. H. T. Ayres. 1,623,651; Apr. 5.
Vehicle springs, End connection for. A. W. Kogstrom. 1,623,844–5; Apr. 5.
Vehicle ventilator. W. Lintern. 1,623,738; Apr. 5.
Vehicle wheel. W. H. Burritt. 1,623,162; Apr. 5.
Vehicles, Automatic control for motor. G. M. Howell. 1,623,921; Apr. 5.
Vehicles, Cooling system for motor. C. M. Anderson. 1,623,902; Apr. 5.
Vehicles, Direction-indicating device especially for. A. Marăik. 1,623,880; Apr. 5.
Vehicles, Electric-lighting apparatus for motor. H. C. Procter. 1,623,700; Apr. 5.
Vehicles, Running-board luggage carrier for. W. Klamroth. 1,623,794; Apr. 5.
Vehicles, Signal for. E. Bednarz. 1,623,903; Apr. 5.
Vehicles, Steering by driving means for. J. Loyd. 1,623,929; Apr. 5.
Vehicles, Torque-absorbing spring construction for. R. M. Lovejoy. 1,623,422; Apr. 5.
Vehicles, Transmission mechanism for motor. E. L. Harry. 1,623,725; Apr. 5.
Vehicles, Wheel for. F. W. Brown. 1,623,656; Apr. 5.
Ventilating systems, Air control for. J. L. Strahan. 1,623,286; Apr. 5.
Ventilator: *See*—
Automobile ventilator. Vehicle ventilator.
Vessels, Air-circulating system for cargo. J. Hudson. 1,623,922; Apr. 5.
Violin bridge. A. M. Alvarado. 1,623,000; Apr. 5.
Violins and the like, Bow guide for. G. M. Morris. 1,623,633; Apr. 5.
Vise, Pipe. H. G. Butt. 1,623,045; Apr. 5.
Volatile matter into lamps and the like, Introducing. C. C. Van Voorhis. 1,623,323; Apr. 5.
Vulcanization. D. E. Hennessy. 1,623,183; Apr. 5.
Vulcanized articles, Machine for stripping. C. J. Randall and C. Wurtenberg. 1,623,208; Apr. 5.
Vulcanizing apparatus. J. C. Heintz. 1,623,677; Apr. 5.
Waffle iron. C. J. Fay. Des. 72,364; Apr. 5.
Wall and constructing same, Block. F. S. and F. A. Cooley. 1,623,094; Apr. 5.
Wall construction. W. F. Gaudian. 1,623,917; Apr. 5.
Wall covering, Preparing. A. C. Dodman, jr. 1,623,620; Apr. 5.
Warp-knitting machine. I. Springthorpe. 1,623,603; Apr. 5.
Washer: *See*—
Separator-bowl washer.
Washing machine. J. H. Niesen. 1,623,548; Apr. 5.
Watchcase. J. Dinhofer. Des. 72,356–60; Apr. 5.
Water-softening apparatus. C. P. Eisenhauer. 1,623,399; Apr. 5.
Water, Treatment of. J. H. Harrington. 1,623,342; Apr. 5.
Waterproof product. L. Kirschbraun and W. H. Cady. 1,623,189; Apr. 5.
Web of flexible material while changing from one web roll to another, Uninterruptedly feeding a. W. C. Scott. 1,623,277; Apr. 5.
Weighing device. H. C. Schaper. 1,623,276; Apr. 5.
Weighing machine, Automatic. R. R. West. 1,623,820; Apr. 5.
Weighing machine, Fur-. F. P. Mansbendel. 1,623,629; Apr. 5.
Welding apparatus, Electric arc. H. P. Himes. 1,623,344; Apr. 5.
Welding apparatus, Pipe-. F. P. Ofner and W. H. Nourse. 1,623,434; Apr. 5.
Welding machine, Electric. J. Kahn. 1,623,249; Apr. 5.
Welding machines, Torch mechanism for. C. L. Stancliff. 1,623,503; Apr. 5.
Wells, Pressure-relief mechanism for. W. D. Egenhoff. 1,623,866; Apr. 5.
Wheel: *See*—
Automobile wheel. Vehicle wheel.
Wheel. W. B. Minch. 1,623,355; Apr. 5.
Wheel chock. O. W. Turnbaugh. 1,623,895; Apr. 5.
Wheel construction, Steerable. E. H. Remde. 1,623,554; Apr. 5.
Wheel guard, Safety. C. F. Orrick. 1,623,849; Apr. 5.
Window frame. C. Rupp. 1,623,496; Apr. 5.
Window lock, Antirattle. L. Hill. 1,623,343; Apr. 5.
Window structure. G. M. Walkup. 1,623,078; Apr. 5.
Windshield wiper. J. Demand. 1,623,308; Apr. 5.
Wire-cable cutter. J. E. Butcher and H. B. Harris. 1,623,044; Apr. 5.
Wire fabric, Coating. N. S. Harter. 1,623,593; Apr. 5.
Wood, Method and machine for shredding. F. J. Moore. 1,623,261; Apr. 5.
Wrench: *See*—
Pipe wrench.
Wrench. B. R. Beaver. 1,623,379; Apr. 5.
Wrench, L. R. Carbell. 1,623,945; Apr. 5.
Wringer mechanism, Safety S. E. Schroeder. 1,623,707; Apr. 5.
X-ray apparatus. C. E. Campbell. 1,623,575; Apr. 5.
X-ray tables, Attachment for. F. H. Wappler and A. C. Koenitz. 1,623,567; Apr. 5.
Yarn-tensioning device. A. Wetzel. 1,623,608; Apr. 5.

CLASSIFICATION OF PATENTS

ISSUED APRIL 5, 1927.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 6: 1,623,279
49.4: 1,623,783
2— 73: 1,623,072
83: 1,623,733
98: 1,623,781
185: 1,623,768
205: 1,623,361
4— 67: 1,623,109
112: 1,623,902
5— 53: 1,623,251
8— 2: 1,623,519
5: 1,623,709
8: 1,623,791
19: 1,623,080
9— 21: 1,623,852
10— 59: 1,623,264
12— 2: 1,623,135
17: 1,623,551
27: 1,623,225
1,623,226
15— 32: 1,623,218
100: 1,623,528
158: R. 16,585
228: 1,623,672
253: 1,623,308
16— 86: 1,623,767
128: 1,623,572
18— 2: 1,623,159
1,623,208
1,623,936
18: 1,623,677
47.5: 1,623,085
1,623,588
53: 1,623,183
56: 1,623,894
19— 36: 1,623,181
137: 1,623,688
20—1.123: 1,623,619
21: 1,623,776
27: 1,623,652
45: 1,623,078

Oils and greases, Lubricating. E. A. Meyer. 227,664; Apr. 12.
Oils, gasoline, and wax. Empire Oil Works Inc. 243,043; Apr. 12.

CLASS 16.

Lacquers. Morgan Company. 245,155; Apr. 12.
Lead, White. Carter White Lead Company. 241,866; Apr. 12.
Paint and paint enamel. Wadsworth Howland & Co. 241,799; Apr. 12.
Paint, Mixed. J. F. Kurfees Paint Company. 244,829–30; Apr. 12.
Paints. Elco Paint Products, Inc. 238,257; Apr. 12.
Paints. Super Paint & Varnish Company. 226,574; Apr. 12.
Paints, varnishes, enamels, etc. T. H. Downward. 195,222; Apr. 12.

CLASS 17.

Cigarettes. L. Berberian. 244,975; Apr. 12.
Cigarettes. S. S. Pierce Co. 245,106; Apr. 12.
Stogies. C. J. Cheney. 244,742; Apr. 12.

CLASS 19.

Automobiles. Lincoln Motor Company. 240,728; Apr. 12.

CLASS 21.

Battery eliminator. Kellogg Switchboard and Supply Co. 208,522; Apr. 12
Cables with nonmetallic protective covering. American Circular Loom Company. 232,240; Apr. 12.
Electric conductors, wires, and cables. Boston Insulated Wire & Cable Company. 244,653; Apr. 12.
Electric fire alarms, Automatic. M. C. Kroeger. 241,730; Apr. 12.
Electrical cabinets, switches, switch boxes, etc. Square D Company. 172,616; Apr. 12.
Electrical equipment. Hub-Way Manufacturing Company. 242,588; Apr. 12.
Fans, Electric. Hunter Fan & Motor Co. 244,158; Apr. 12.
Fans, Electrical. Piqua Electric Service Co. 241,436; Apr. 12.
Generating plants, Wind-driven. Perkins Corporation. 239,822; Apr. 12.
Wire terminals and cables. K-E-M Manufacturing & Sales Co. 243,812; Apr. 12.

CLASS 22.

Baits, Artificial. James Heddon's Sons. 242,125; Apr. 12.
Dolls. A. A. Gerling. 245,263; Apr. 12.
Tennis rackets, baseball bats, skis, and golf clubs. H. W. Hall. 242,373; Apr. 12.

CLASS 23.

Machinery and fixtures therefor, Experimental. Peco Manufacturing Company. 244,240; Apr. 12.
Saw blades. J. F. Gleason. 243,488; Apr. 12.

CLASS 24.

Drying and dry-cleaning machines. American Laundry Machinery Co. 243,839; Apr. 12.

CLASS 26.

Camera, projector, tripod, film, etc., Cinematographic. Pathex, Inc. 240,362; Apr. 12.
Photographic papers, Sensitized. I. G. Farbenindustrie Aktiengesellschaft. 242,177–8; Apr. 12.

CLASS 27.

Clocks. B. D. Colen. 208,743; Apr. 12.
Watchcases. L & L Watch Case Company. 243,096; Apr. 12.

CLASS 28.

Precious stones and imitation precious stones. "Cristallo" A. G. 243,142; Apr. 12.
Vanity boxes. Napier Co. 242,435; Apr. 12.

CLASS 29.

Brushes, Painters'. Marcus Brush Co. 230,556; Apr. 12.

CLASS 31.

Refrigerating apparatus. General Refrigeration Company. 232,131; Apr. 12.

CLASS 32.

Cabinets, tables, cupboards, etc. Wasmuth-Endicott Company. 243,027; Apr. 12.
Chairs, tables, and desks, Children's. F. Wissig. 242,327; Apr. 12.
Chairs, tables, desks, beds, etc. G. S. Hunt. 242,589; Apr. 12.
Davenports, chairs, benches, etc. Dunbar Furniture Manufacturing Company. 240,410; Apr. 12.
Davenports, chairs, stools, and benches. Standard Mattress and furniture, Inc. 243,670; Apr. 12.
Mirrors, pillows, bassinets, mattresses, etc. Best & Co., 242,467; Apr. 12.

CLASS 33.

Glass, Figured sheet. Western Glass Company. 228,879; Apr. 12.
Glass globes and reflectors. Miller Company. 227,956–7; Apr. 12.

CLASS 34.

Heaters, Air-circulating room. Tennessee Stove Works. 244,032; Apr. 12.
Stoves and parts thereof. O. K. Stove & Range Co. 243,064; Apr. 12.

CLASS 35.

Packing, Stuffing-box. Walker and Forbes. 243,632; Apr. 12.
Patches for rubber tires. Beckham Tire and Rubber Company. 234,020; Apr. 12.
Inner-tube repair kits. Ceylon Rubber Company. 237,148; Apr. 12.
Tires and inner tubes therefor, Pneumatic. B. F. Goodrich Company. 241,999; Apr. 12.

CLASS 36.

Accordions and mouth harmonicas. Sears, Roebuck and Co. 243,563; Apr. 12.
Musical instruments. Tonk Bros. Company. 227,542; Apr. 12.

CLASS 37.

Blotting paper. Rochester Paper Co. 244,321; Apr. 12.
Cardboards. Hurlock Bros. Company. 244,445–6; Apr. 12.
Form, Blank. Howes Fahnestock. 242,833; Apr. 12.
Wadding made of paper stock, Absorbent. Kimberly-Clark Company. 244,502; Apr. 12.

CLASS 38.

Periodical. Referee Publishing Co. 244,320; Apr. 12.
Publication. W. H. Cousins. 242,097; Apr. 12.
Publication. National Register Publishing Co. 243,659; Apr. 12.
Publication. J. Henry Schroder Banking Corporation. 241,637; Apr. 12.
Publications. Austin Flint Association, Inc. 244,737; Apr. 12.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

CLASS 39.

Brassières and bust supporters. Rosenberg & Hertz. 239,519; Apr. 12.
Brassières, corset brassières, etc. Weingarten Bros., Inc. 244,524; Apr. 12.
Brassières, corsets, vests, etc. Imperial Manufacturing Company. 244,771; Apr. 12.

Fountains, Poultry. American Steel Products Co. 243,742; Apr. 12.
Water-repellent mildew-resistant fabric. C. A. Boyle & Co. 241,807; Apr. 12.
Waterproof fabric and waterproof cotton duck. Wm. E. Hooper & Sons Co. 243,949; Apr. 12.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 12TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abbott, Charles M., Watertown, assignor to Samuel Cabot, Inc., Boston, Mass. Method and apparatus for dipping shingles. 1,624,379; Apr. 12.

Abbott, Lyle S., assignor to Chicago Fire Brick Company, Chicago, Ill. Fire-box arch block. 1,624,198; Apr. 12.

Abbott, Lyle S., assignor to Chicago Fire Brick Company, Chicago, Ill. Sectional fire-box arch. 1,624,199; Apr. 12.

Abbott, Lyle S., assignor to Chicago Fire Brick Company, Chicago, Ill. Fire receiving wall. 1,624,200; Apr. 12.

Abelt, Ernst, Karnap, near Essen-on-the-Ruhr, Germany, assignor to The Libbey Glass Company, Toledo, Ohio. Device for cutting glass tubes or rods. 1,624,197; Apr. 12.

Ackley, Amos. (See Plum, S. H., 2d, and Ackley.)

Acme Knitting Machine & Needle Company. (See Stroud, P. G., and Simond, assignors.)

Adams, Ash, assignor to Lamore Tile Machine Company, Crawfordsville, Ind. Pneumatic core for block machines. 1,624,704; Apr. 12.

Adams, George W., San Antonio, Tex. Concrete, mortar, and plaster mixer. 1,624,705; Apr. 12.

Adams, Lloyd S., et al. (See Bobbitt, Conrad E., assignor.)

Adams, Thomas, Sheboygan, Wis. Safety device for wringers. 1,624,706; Apr. 12.

Adams, William J., Irvington, N. Y., and A. Haddock, East Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Shielding and balancing means. 1,624,459; Apr. 12.

Adler, Harry, Melville, Johannesburg, assignor of one-third to F. A. Baker, Melrose, Johannesburg, South Africa. Dividing and spacing instrument. 1,624,031; Apr. 12.

Agate, Charlton S., Chelmsford, and P. W. Willans, London, England, assignors to Radio Corporation of America. Radiosignaling. 1,624,201; Apr. 12.

Air Reduction Company. (See Walker, George L., assignor.)

Airubber Corporation. (See Anderson, Arvid E., assignor.)

Airubber Corporation. (See Kennedy, William, assignor.)

Aktiebolaget Baltic. (See Risberg, Johannes V. M., assignor.)

Aktiebolaget Ljungströms Angturbin. (See Eriksson, Erik O., assignor.)

Aladdin Hydraulic Jack Company. (See Shevlin, Joseph P., assignor.)

Aldeen, Wilhelm G., assignor to National Lock Co., Rockford, Ill. Countersinking machine. 1,624,648; Apr. 12.

Aldendorff, Fritz, Wilmersdorf, near Berlin, Germany. Electrical switch. 1,624,202; Apr. 12.

Aldrich, John P., and H. A. Morris, assignors to The Automat Molding & Folding Company, Toledo, Ohio. Package-wrapping machine. 1,624,203; Apr. 12.

Alfieres, Emanuel J., New York, N. Y. Form for setting vault lights. 1,624,304; Apr. 12.

Alland, Maurice, Atlantic City, N. J. Razor. 1,624,707; Apr. 12.

Allen, Jacob G., Belvidere, Ill. Cigarette display and dispensing cabinet. 1,624,883; Apr. 12.

Allmänna Svenska Elektriska Aktiebolaget. (See Ytterberg, Arle, assignor.)

Aluminium Welding Works Ltd. (See Winter, Paul, assignor.)

Amdyco Corporation. (See Dunlap, F. L., and Ewer, assignors.)

American Can Company. (See Magill, Donald G., assignor.)

American Coating Mills. (See Colbert, C. C., and Preston, assignors.)

American Manganese Steel Company. (See Mullally, Walter J., assignor.)

American Motor Body Corporation, The. (See Wetzel, Edward A., assignor.)

American Protein Corporation. (See Bunker, John W. M., assignor.)

American Telephone and Telegraph Company. (See McKown, F. W., and Dietz, assignors.)

American Telephone and Telegraph Company. (See Strieby, M. E., and Fetter, assignors.)

American Typefounders Company. (See Plum, S. H., 2d, and Ackley, assignors.)

American Wiremold Company, The. (See Frederickson, Otto A., assignor.)

Amiot, Felix, Colombes, France. Connecting member. 1,623,956; Apr. 12.

Amsler-Morton Company, The. (See Amsler, Walter O., assignor.)

Amsler, Walter O., assignor to The Amsler-Morton Company, Pittsburgh, Pa. Recuperator. 1,624,128; Apr. 12.

Amster, Samuel, Richmond, Ky. Tobacco wax and producing the same. 1,624,155; Apr. 12.

Andersen, Johan M., assignor to Albert & J. M. Anderson Manufacturing Company, Boston, Mass. Railway signaling system. 1,624,087; Apr. 12.

Anderson, Albert & J. M., Manufacturing Company. (See Andersen, Johan M., assignor.)

Anderson, Arvid E., assignor, by mesne assignments, to Airubber Corporation, Chicago, Ill. Heat retaining garment. 1,623,993; Apr. 12.

Anderson, Edgar W., assignor to Invincible Metal Furniture Company, Manitowoc, Wis. Safe deposit vault. 1,624,305; Apr. 12.

Anderson, Raymond W., Maplewood, N. J. Apparatus for directing the sighting of guns. 1,624,523; Apr. 12.

Andrews, Charles B., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Inner disk for disk crusher. 1,624,032; Apr. 12.

Antossi, Adolph, Brooklyn, N. Y. Air suppy for tumblers. 1,624,650; Apr. 12.

Angus, Arthur R., Westminster, London, England. Control of trains. 1,624,524; Apr. 12.

Anker-Werke Aktiengesellschaft. (See Hennig, Albert, assignor.)

Ansingh, Herman K., Murraysville, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical switch. 1,623,954; Apr. 12.

Ansingh, Herman K., Toronto, Ontario, Canada, assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism, 1,623,955; Apr. 12.

Antoonian, Eunice M., Boston, Mass. Garment. 1,624,570; Apr. 12.

Apex Spring Cover Company, The. (See Skok, Lawrence, assignor.)

Aram, Otto, Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Stoker. 1,624,651; Apr. 12.

Arkell Safety Bag Company. (See Robinson, Francis T., assignor.)

Armstrong, George W., Fremont, Ohio, assignor to National Carbon Company, Inc. Depolarizer for primary batteries. 1,624,460; Apr. 12.

Arndt, Franklin E., assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio. Road-grader axle assembly. 1,624,127; Apr. 12.

Ashton, Sidney C., Kansas City, Mo. Oil-well pump. 1,624,821; Apr. 12.

Atkinson, Thomas M., assignor to The Royston Paper Company, Militown, N. J. Colored sheet material and producing the same. 1,624,652; Apr. 12.

Atwood Machine Company. (See Chase, Herbert C., assignor.)

Aubert, Jean M. L. A., Paris, France. River dam. 1,624,571; Apr. 12.

Automat Molding & Folding Company, The. (See Aldrich, J. P., and Morris, assignors.)

Automatic Electric Inc. (See Gardner, John E., assignor.)

Automatic Electric Inc. (See Obergfell, Herbert F., assignor.)

Automatic Electric, Inc. (See Ray, A. J., Madsen and Obergfell, assignors.)

Automatic Motion Picture Display Co. (See Burnett, John P., assignor.)

Automatic Transmission Company. (See Gensmer, Theodore, assignor.)

Automotive Valves Co., The. (See Burtnett, Everett R., assignor.)

Autostrop Patents Corporation. (See Gaisman, Henry J., assignor.)

Avery, True M., Glens Falls, assignor to Union Bag & Paper Corporation, Hudson Falls, N. Y. Machine for stapling handles on bags. 1,624,854; Apr. 12.

Babcock & Wilcox Company, The. (See Coleman, John, assignor.)

Babcock & Wilcox Company, The. (See Jacobus, D. S., and Pratt, assignors.)

Bagby, Ralph B., assignor to J. G. Cherry Company, Cedar Rapids, Iowa. Flush valve for Pasteurizers. 1,624,572; Apr. 12.

Bagby, Ralph B., assignor to J. G. Cherry Company, Cedar Rapids, Iowa. Pasteurizing apparatus. 1,624,573; Apr. 12.

Bally, Thaddeus F., Alliance, Ohio. Annealing machine. 1,624,204; Apr. 12.
Baker & Company. (See Brainin, Clement S., assignor.)
Baker, Frank A. (See Adler, Harry, assignor.)
Barndat, Claudio. (See Lleo, A., and Baradat.)
Barber-Colman Company. (See Ransome, Stafford M., assignor.)
Barber-Greene Company. (See Barber, Harry H., assignor.)
Barber, Harry H., assignor to Barber-Greene Company, Aurora, Ill. Digging member for ditching machines. 1,623,957; Apr. 12.
Barker, Hubert C., Houston, Tex. 1,624,855; Apr. 12.
Barker, Percy E., Cleveland, assignor, by mesne assignments, of one-half to A. B. Betz, Shaker Heights Village, Ohio. Dishwashing machine. 1,624,380; Apr. 12.
Barker, Percy E., Cleveland, Ohio, assignor of one-half to A. B. Betz. Dishwashing machine. 1,624,381; Apr. 12.
Barker, Percy E., Cleveland, assignor by mesne assignments of one-half to A. B. Betz, Shaker Heights Village, Ohio. Dishwashing machine. 1,624,461; Apr. 12.
Barnard, Wilbur D., Neenah, Wis. Weed killer. 1,624,033; Apr. 12.
Barrett, William, assignor to G. A. Reach, Philadelphia, Pa. Leg guard for athletes. 1,624,129; Apr. 12.
Barrows, Allan S., Los Angeles, Calif. Car door. 1,624,306; Apr. 12.
Barrows, Donald S., Rochester, N. Y., assignor, by mesne assignments, to The Symington Company. Journal box. 1,624,708; Apr. 12.
Barter, Andrew. (See Buckthorpe, F. T., and Barter.)
Barth, Friedrich F., Radeberg, Germany. Spool for sewing machines. 1,624,884; Apr. 12.
Bartlett, Kent W., Hammond, Ind. Water-softening apparatus. 1,624,382; Apr. 12.
Batchelder, Asa F., Scotia, N. Y., assignor to General Electric Company. Locomotive or car. 1,624,709; Apr. 12.
Batles-Lite Co., The. (See Smith, Rensselaer J., assignor.)
Bauer, Adolph, assignor to R. C. Jenkinson, doing business as R. C. Jenkinson & Co., Newark, N. J. Combined air purifier or humidifier and radiator vent valve. 1,624,774; Apr. 12.
Bauer, Jacob, assignor of one-third to C. L. Johnson and one-third to L. W. Johnson, Youngstown, N. Y. Inverting packages. 1,623,958; Apr. 12.
Bauman, Arthur E., Akron, Ohio. Resilient tire. 1,624,856; Apr. 12.
Beach, Milo D., Litchfield, Conn. Braking motor vehicles. 1,624,525; Apr. 12.
Beach, Milo D., Litchfield, Conn. Braking motor vehicles. 1,624,574; Apr. 12.
Beauprie, Arthur W. (See Taylor, Mark, assignor.)
Beck, Edward, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mercury arc rectifier. 1,624,383; Apr. 12.
Becker, Edmund H. (See Martus, M. L., Becker, and Ross.)
Beckwith, James, Eugene, Oreg. Carbonized article and making same. 1,624,710. Apr. 12.
Bedard, Frank, Flint, Mich. Telescope air jet. 1,624,384; Apr. 12.
Beggs, Thomas R., Hartford, Conn. Flush valve. 1,624,130; Apr. 12.
Behrman, Abraham S., assignor by mesne assignments to General Zeolite Company, Chicago, Ill. Water softening reagent and process of preparing same. 1,624,711; Apr. 12.
Beldam, George W., Ealing, England. Cricket, hockey, and like ball. 1,624,822; Apr. 12.
Bell & Howell Company. (See Howell, Albert S., assignor.)
Bell Telephone Laboratories, Inc. (See Clokey, Allison A., assignor.)
Bement, John W., Venice, Calif. Luggage carrier for automobiles. 1,624,462; Apr. 12.
Bendix Brake Company. (See Dodge, Adiel Y., assignor.)
Bendix, Vincent. (See Jacker, Edward G., assignor.)
Bennington, Earl T., Cleveland Heights, assignor to The Cleveland Crane and Engineering Company, Wickliffe, Ohio. Suspended carrier. 1,624,205; Apr. 12.
Bergen, Harold E., Berkeley, Calif. Apparatus for recovering solids from press liquids. 1,624,385; Apr. 12.
Bergstein, Samuel, and A. C. E. Lindner, assignors to The Interstate Folding Box Company, Middletown, Ohio. Machine and making paper boxes. 1,624,885; Apr. 12.
Berridge, Harold, South Kensington, London, England. Contractible and expansible supporting means suitable for use in the construction of pipes, tunnels, bridges, and other bodies or structures. 1,624,712; Apr. 12.
Bethlehem Steel Company. (See Shimer, William R., assignor.)
Betts, Anson G., Kinderhook, N. Y. Making a metallic reenforced refractory article. 1,624,386; Apr. 12.
Betz, Arthur B. (See Barker, Percy E., assignor.)
Beveridge Paper Company. (See Ross, Harry M., assignor.)
Biddle, Arthur, Trenton, N. J., assignor to United Products Corporation of America. Composition of gum chicle dispersed in an aqueous colloid. 1,624,088; Apr. 12.
Biddle, Arthur, Trenton, N. J., assignor to United Products Corporation of America. Insect lime and making the same. 1,624,089; Apr. 12.
Biddle, Arthur, Trenton, N. J., assignor to United Products Corporation of America. Galvanoplasty. 1,624,575; Apr. 12.
Biebel, Herman M., Oakmont, Pa., assignor to Westinghouse Electric & Manufacturing Company. Indicating fluid-circuit interrupter. 1,624,463; Apr. 12.
Bigelow, Milton E., Warren, Ariz. Motive-fluid generator. 1,624,464; Apr. 12.
Bishop, Joseph E. (See Turner, G., and Bishop.)
Bixby, Walter. (See Mason, H., Bixby, and Bogan.)
Bjerregaard, August P., Okmulgee, Okla., assignor to Doherty Research Company, New York, N. Y. Extracting hydrocarbons from gas. 1,624,206; Apr. 12.
Black, Lee J., Beaumont, Tex. Gate valve. 1,624,465; Apr. 12.
Black, Lee J., and E. E. Swope, Beaumont, Tex. Screw pump. 1,624,466; Apr. 12.
Blaine, James G., Compton, and C. B. Patton, Los Angeles, Calif. Stretcher. 1,624,090; Apr. 12.
Blakeslee, Raymond I. (See Lyndon, L., and Blakeslee.)
Blaw-Knox Company. (See Venable, William M., assignor.)
Bleam, Albert, Clarksville, Mich. Seed-cleaning machine. 1,624,034; Apr. 12.
Boardman, Charles H., Columbus, Ohio. Top support for cribs. 1,624,467; Apr. 12.
Bobbitt, Conrad E., assignor of one-half to L. S. Adams and J. D. Senter, Humboldt, Tenn. Battery case. 1,624,131; Apr. 12.
Boberg, Teofron. (See Söderlund, O., Boberg, and Testrup.)
Boddie, Clarence A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,624,387; Apr. 12.
Bodholdt, Aksel K., et al., trustees. (See Speer, Alexander S., assignor.)
Boelter, Hugo. (See Koegle, John G., assignor.)
Bogan, Hugh L., jr. (See Mason, H., Bixby, and Bogan.)
Bohmsack, Harry C., assignor of one-half to H. W. Passer, Fort Atkinson, Wis. Oil filter. 1,624,526; Apr. 12.
Bonsall, Charles D., assignor to P. H. Murphy Company, New Kensington, Pa. Car roof. 1,624,207; Apr. 12.
Boosey, Edward W. N., Detroit, Mich. Water-closet bend. 1,624,653; Apr. 12.
Borton, George W., Philadelphia, Pa., assignor to Pennsylvania Crusher Company, New York, N. Y. Screen bar for crushing machinery. 1,624,886; Apr. 12.
Boucherot, Paul M. J., Paris, France. High-frequency signaling. 1,624,208; Apr. 12.
Bound Brook Oil-Less Bearing Company. (See Claus, Carl, assignor.)
Bournonville, Eugene M., Jersey City, N. J. Internal-combustion-engine rotary valve member. 1,624,388; Apr. 12.
Bovard, Fritz, Bern, assignor to the Firm: Sport S. A. Bienne, Canton of Bern, Switzerland. Lighting magneto for vehicles. 1,624,775; Apr. 12.
Bower, Elmer E., Rochester, Minn. Automobile signal. 1,624,468; Apr. 12.
Bowers, Frank, assignor, by mesne assignments, to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,624,576; Apr. 12.
Bowman, John G., assignor of one-half to W. C. Haseltine, Kansas City, Mo. Lining for brake bands and shoes. 1,624,035; Apr. 12.
Bowser, S. F., and Company. (See Fries, Jalmar W. G., assignor.)
Boyd, Harold A. (See Boyd, Thomas A. and H. A.)
Boyd, Thomas A. and H. A., Glasgow, Scotland. Spindle of spinning, twisting, and like frames. 1,624,713; Apr. 12.
Brainin, Clement S., Glen Ridge, N. J., assignor to Baker & Company, Inc. Alloy. 1,624,857; Apr. 12.
Bratton, John N., and W. N. Bryant, Chase City, Va. Shook-sorting machine. 1,624,389; Apr. 12.
Brett, William P., Decatur, Ill. Pumping mechanism. 1,624,527; Apr. 12.
Brett, William P., Decatur, Ill. Deep-well pumping mechanism. 1,624,577; Apr. 12.
Brewster, Percy D., East Orange, N. J., assignor to Wyko Projector Corporation. Film projector. 1,624,156; Apr. 12.
Bridgeport Brass Company. (See Brown, G. A., and Dennison, assignors.)
Bridgeport Brass Company. (See Robinson, Thomas T., assignor.)
Briggs Manufacturing Company. (See Maise, Herman C., assignor.)
Briggs Manufacturing Company. (See Marshall, William, assignor.)
Briggs Manufacturing Company. (See Westrope, Fred J., assignor.)

Bristol, Edgar H., assignor to The Foxboro Company, Foxboro, Mass. Measuring and controlling instrument. 1,624,887; Apr. 12.
Brittain, Richard J., jr., Newark, N. J., assignor to General Motors Corporation, Detroit, Mich. Gauge. 1,624,654; Apr. 12.
Broome, William J., Los Angeles, Calif., assignor to Kunkel Stamping & Manufacturing Co. Folding bed. 1,624,807; Apr. 12.
Brown, Allan V. (See Thompson, Theodore, assignor.)
Brown, Archie E., El Paso, Tex. Cotton picker. 1,624,308; Apr. 12.
Brown Engineering Corporation. (See Brown, James W., assignor.)
Brown, George A., and F. G. Dennison, assignors to Bridgeport Brass Company, Bridgeport, Conn. Pump. 1,624,209; Apr. 12.
Brown, George E., Los Angeles, Calif. Game board. 1,624,469; Apr. 12.
Brown, James W., assignor to Brown Engineering Corporation, Minneapolis, Minn. Gas-control appliance. 1,624,132; Apr. 12.
Brown, Oscar H., Salem, assignor to The Turner Tanning Machinery Company, Peabody, Mass. Work support for leather-working machines. 1,624,309; Apr. 12.
Brown, Sidney G., North Acton, England. Production or reproduction of sound or like vibrations. 1,624,823; Apr. 12.
Brown, Stewart, et al. (See Wood, Joseph E., assignor.)
Brown, William E., Sacramento, Calif. Cuspidor cover. 1,624,824; Apr. 12.
Brown, William T. S., East Point, Ga. Fastener for containers. 1,624,825; Apr. 12.
Bruce, Alfred W., New York, N. Y. Locomotive boiler. 1,624,655; Apr. 12.
Bruce, William E., Mirando City, Tex. Fertilizer distributor. 1,624,210; Apr. 12.
Brune, Edward H., St. Louis, Mo. Magnetic separator. 1,624,528; Apr. 12.
Bryan, Benjamin B., jr., New York, N. Y. Utilizing the surplus energy exerted in operating revolving doors, turnstiles, and the like. 1,624,656; Apr. 12.
Bryant, Walter N. (See Bratton, J. N., and Bryant.)
Bryant, William L., Springfield, Vt. Multispindle internal-grinding machine. 1,624,211; Apr. 12.
Buchsbaum, Herbert. (See Buchsbaum, Samuel and H.)
Buchsbaum, Samuel and H., Chicago, Ill. Vanity box. 1,623,994; Apr. 12.
Buckle, Horace L. T., Yiewsley, England, assignor to Victor Talking Machine Company. Sound-reproducing machine. 1,624,578; Apr. 12.
Buckley, Oliver E., Maplewood, N. J.; assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling conductor system and method of operation. 1,624,470; Apr. 12.
Buckthorpe, Frederick T., and A. Barter, London, England. Box, cigarette, and like case. 1,624,858; Apr. 12.
Budd Wheel Company. (See Nelson, Emil A., assignor.)
Buel, Hillhouse, Seattle, Wash., assignor of one-half to W. P. Hammond, Scarsdale, N. Y. Forming articles from comminuted material. 1,624,471; Apr. 12.
Buescher, Ferdinand A., Elkhart, Ind. Slide trombone. 1,624,310; Apr. 12.
Buffington, George L., and E. H. Hopson, assignors to Ex-Cell-O Tool & Manufacturing Co., Detroit, Mich. Rotary motor. 1,624,529; Apr. 12.
Bulley, George W., assignor to The Miller Rubber Company, Akron, Ohio. System of making treads. 1,624,826; Apr. 12.
Bullock, Calvin, Denver, Colo. Trunk. 1,624,714; Apr. 12.
Bunce, Robert M., Portland Oreg., assignor to Hancock Bros., San Francisco, Calif. Baggage-check holder. 1,624,472; Apr. 12.
Bunker, John W. M., Belmont, assignor to American Protein Corporation, Boston, Mass. Producing an edible protein product. 1,624,036; Apr. 12.
Bunting, James H., Clifton, N. J., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,404; Apr. 12.
Bunting, James H., Clifton, N. J., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,405; Apr. 12.
Bunting, James H., Clifton, N. J., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,406; Apr. 12.
Bunting, James H., Clifton, N. J., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,407; Apr. 12.
Burdick, Charles L., London, and J. D. Whiteman, Wallington, England. Liquid-forcing apparatus. 1,624,827; Apr. 12.
Burge, Henry O., executor. (See Mitchell, Alfred H.)
Burke Electric Company. (See Stoeltzlen, Charles L., assignor.)
Burkholder, John C., West End, N. C., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,624,579; Apr. 12.
Burnett, John P., assignor to Automatic Motion Picture Display Co., Chicago, Ill. Continuous moving-picture machine. 1,624,580; Apr. 12.
Burtis, Ira E. (See Kings, Thomas W., assignor.)
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,624,581; Apr. 12.
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,624,582; Apr. 12.
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,624,583; Apr. 12.
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,624,584; Apr. 12.
Burton, Leroy E. (See Dempsey, J. E., and Burton.)
Bush, George B. (See Hoff, H. J., and Bush.)
Busch-Sulzer Bros.-Diesel Engine Company. (See Hawks, Arthur S., assignor.)
Buschmann, Theodor E., Chemnitz-Kappel, assignor to Wanderer-Werke, vorm. Winklhofer & Jaenicke Akt.-Ges., Schonau, near Chemnitz, Saxony, Germany. Apparatus for driving typewriters provided with calculating mechanism. 1,623,995; Apr. 12.
Bushong, Grover C., Whittier, Calif. Tubing bleeder. 1,624,811; Apr. 12.
Butcher, John P., Canton, Ohio. Collapsible crate. 1,624,212; Apr. 12.
Butler, Edward A., Buffalo, assignor to Colloidal Equipment Corporation, New York, N. Y. Apparatus for deflocculating and emulsifying. 1,624,037; Apr. 12.
Buxton, Inc. (See Buxton, Warner R., assignor.)
Buxton, Warner R., Longmeadow, assignor to Buxton, Incorporated, Springfield, Mass. Key case. 1,623,959; Apr. 12.
Byerlein, Arthur A., assignor to The Toledo Machine and Tool Company, Toledo, Ohio. Drawing press. 1,623,960; Apr. 12.
Cabot, Samuel, Inc. (See Abbott, Charles M., assignor.)
California Card Manufacturing Company. (See Young, Julius, assignor.)
California Cyanide Company. (See Poindexter, R. W., and Dolley, assignors.)
Cameron Can Machinery Company. (See Cameron, William, assignor.)
Cameron, William, assignor to Cameron Can Machinery Company, Chicago, Ill. Can-body-making machine. 1,624,213; Apr. 12.
Caminita, Santi, St. Louis, Mo. Automobile direction signal switch. 1,624,828; Apr. 12.
Cannon Electric Development Company. (See Cannon, James H., assignor.)
Cannon, James H., assignor to Cannon Electric Development Company, Los Angeles, Calif. Broiler. 1,624,214; Apr. 12.
Carlson, Anthony E., Los Angeles, Calif. Rock drill. 1,624,312; Apr. 12.
Carlson, Peet, Manor, Tex. Cotton harvester. 1,624,313; Apr. 12.
Carothers, Robert M., Schenectady, N. Y., assignor to General Electric Company. Regulating system. 1,624,715; Apr. 12.
Carpenter, Carroll E. (See Little, A. D., and Carpenter.)
Carroll, Charles P. (See Carroll, James O., assignor.)
Carroll, James O., Pittsfield, Ill., assignor of fifty-one per cent to C. P. Carroll, Kansas City, Mo. Baling-wire tier. 1,624,157; Apr. 12.
Carter, Alva J., assignor to Carter Radio Company, Chicago, Ill. Rheostat. 1,624,038; Apr. 12.
Carter, Philip S., New Brunswick, N. J., assignor to Radio Corporation of America. Radio transmission system. 1,623,996; Apr. 12.
Carter Radio Company. (See Carter, Alva J., assignor.)
Carter, Ray M., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Making ester condensation products. Re16,591; Apr. 12.
Caruso, Romeo O., assignor of one-third to D. Mastrolia and one-third to A. F. Ferrainolo, Reading Pa. Screw driver. 1,624,530; Apr. 12.
Cary Manufacturing Company. (See Cary, Spencer C., assignor.)
Cary, Spencer C., Brooklyn, assignor to Cary Manufacturing Company, New York, N. Y. Wire tie for bundles of various kinds. 1,624,531; Apr. 12.
Case Research Laboratory Incorporated. (See Case, Theodore W., assignor.)
Case, Theodore W., assignor to Case Research Laboratory Incorporated, Auburn, N. Y. Electrical apparatus. 1,624,314; Apr. 12.
Cassel, John K., Ainsworth, Nebr. File jacket. 1,624,776; Apr. 12.
Castleton, W. E. (See Dawn, Richard W., assignor.)
Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Cord-guiding device. 1,624,532; Apr. 12.
Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Cord-guiding device. 1,624,533; Apr. 12.
Catlin, Joseph P., Bridgeport, Conn., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Casting curved and flat stereotype plates. 1,623,997; Apr. 12.
Caudle, Thomas W., Dayton, Tenn. Dry-pipe valve. 1,624,315; Apr. 12.
Cavin, Walter H. (See Van Sickle, D. L., and Cavin.)
Central Alloy Steel Corporation. (See Orr, William S., assignor.)
Central Alloy Steel Corporation. (See Schlafly, Julius H., assignor.)
Central Trust Company of Illinois et al., trustees. (See Speer, Alexander S., assignor.)
Cerbo, Ferdinando, Providence, R. I. Urethoscope. 1,624,716; Apr. 12.

Chaney, Newcomb K. (See Heise, G. W., Thompson, and Chaney.)
Charpentier, Paul, assignor to Forges & Ateliers de Constructions Electriques de Jeumont, Societe Anonyme, Paris, France. Electrical control system. 1,624,158; Apr. 12.
Chase, Herbert C., assignor to Atwood Machine Company, Stonington, Conn. Reel mill. 1,624,585; Apr. 12.
Chellis, Lawrence T., Corvallis, Oreg. Sleeve-pressing form. 1,624,777; Apr. 12.
Cheney, Charles W., Boston, Mass. Massage appliance. 1,624,133; Apr. 12.
Cheney, Charles W., Birmingham, England. Fastening for attaché cases, boxes, bags, and such like. 1,624,859; Apr. 12.
Cherry, J. G., Company. (See Bagby, Ralph B., assignor.)
Chewning, James A., Sikeston, Mo. Window screen. 1,624,534; Apr. 12.
Chicago Electric Manufacturing Co. (See Gough, James J., assignor.)
Chicago Fire Brick Company. (See Abbott, Lyle S., assignor.)
Chicago Pneumatic Tool Company. (See Penberthy, Ernest, assignor.)
Chicago Railway Equipment Company. (See Rissler, Albin P., assignor.)
Christians, Christian B., jr., San Antonio, Tex. Road-repairing machine. 1,624,390; Apr. 12.
Christianson, Christ A., Ulen, Minn. Stair square. 1,624,535; Apr. 12.
Christopher, Arthur J., assignor to Western Electric Company, Incorporated, New York, N. Y. Inductance device. 1,624,536; Apr. 12.
Chritton, George A., et al., trustees. (See Curtis, Lewis E., assignor.)
Clark, Edgar H., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Testing device for testing register senders. 1,624,540; Apr. 12.
Clark, George H., Brooklyn, N. Y., assignor to Radio Corporation of America. Radio signaling system. 1,624,215; Apr. 12.
Claus, Carl, Plainfield, assignor to Bound Brook Oil-Less Bearing Company, Boundbrook, N. J. Method of and apparatus for forming bodies by pressure. 1,624,904; Apr. 12.
Clausen, Henry P., Mamaroneck, assignor to Western Electric Company, Incorporated, New York, N. Y. Electric switch. 1,624,391; Apr. 12.
Cleary, William F., Hawthorne, N. J., and W. J. Wagener, New York, N. Y. Electrical heater for the air-supply pipes of carburetors. 1,624,216; Apr. 12.
Clement, Lewis M., assignor to Western Electric Company, Incorporated, New York, N. Y. High-frequency signaling system. 1,624,473; Apr. 12.
Cleveland Crane and Engineering Company, The. (See Bennington, Earl T., assignor.)
Cleverly, Edwin G., London, England. Fixing for rods, poles, and the like. 1,624,392; Apr. 12.
Clipperton, John H., Windom, Minn. Grass and weed destroyer. 1,624,474; Apr. 12.
Clokey, Allison A., Rutherford, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telegraph system. 1,624,393; Apr. 12.
Coats, Henry B. (See Holmes, A. W., Jaques, and Coats.)
Cocks, Harry J., Des Moines, Iowa. Fender brace. 1,624,860; Apr. 12.
Coe, Leonard F., Veradale, Wash. Flying machine. 1,624,475; Apr. 12.
Colbert, Charles C., and G. E. Preston, assignors to American Coating Mills, Elkhart, Ind. Coated paper board. 1,624,091; Apr. 12.
Coleman, John, Lakewood, Ohio, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Liquids-separating device. 1,624,092; Apr. 12.
Colloidal Equipment Corporation. (See Butler, Edward A., assignor.)
Colpitts, Edwin H., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation generator. 1,624,537; Apr. 12.
Combintaion Machine Company. (See Thom, James C., assignor.)
Constant, Louis H. (See McEntee, B. C., and Constant.)
Continental Optical Corporation. (See Devine, Edward P., assignor.)
Cook, Charles L., assignor to C. Lee Cook Manufacturing Company, Louisville, Ky. Piston packing. 1,624,159; Apr. 12.
Cook, C. Lee, Manufacturing Company. (See Cook, Charles L., assignor.)
Cook, Harris J., assignor to The Stanley Works, New Britain, Conn. Work rest. 1,624,888; Apr. 12.
Cook, Stanley S. (See Parsons, C. A., and Cook.)
Cooke, Hereward L., Princeton, N. J., assignor to Cooke Patents Incorporated, New York, N. Y. Photographic shutter. 1,623,998; Apr. 12.
Cooke Patents Incorporated. (See Cooke, Hereward L., assignor.)
Cope, Frank T., assignor to The Electric Furnace Company, Salem, Ohio. Electric furnace. 1,624,217; Apr. 12.
Copland, Alexander W., Detroit, Mich. Dough-depositing machine. 1,624,316; Apr. 12.
Cord Tire Machine Company, The. (See Morris, Howard L., assignor.)
Cossey, John C. G. (See Mitchell, J., and Cossey.)
Couch, Frederick F., New Brunswick, assignor to Federated Engineers Development Corporation, Jersey City, N. J. Valve. 1,624,218; Apr. 12.
Cowdrey, Charles F., Fitchburg, assignor to Muther Manufacturing Company, Boston, Mass. Brake-testing instrument. 1,624,219; Apr. 12.
Craig, Robert, Dayton, Ohio. Hydraulic press. 1,624,160; Apr. 12.
Crain, Harry G., assignor of one-half to J. P. Lair, Canisteo, N. Y. Magnetic stencil and work holder. 1,624,538; Apr. 12.
Cremo, Aristide L. N., and A. J. Gordon, assignors of one-third to J. E. Gaynor, Attleboro, Mass. Electric time switch for automobile lights. 1,624,539; Apr. 12.
Cresson-Morris Company. (See Stone, Edward N., assignor.)
Cribben & Sexton Company. (See Harter, Augustus F., assignor.)
Crocker-Wheeler Electric Manufacturing Company. (See Spencer, Millard C., assignor.)
Crompton Company. (See Nichols, John F., assignor.)
Cronk, David J., Poughkeepsie, N. Y. Netting handler. 1,624,394; Apr. 12.
Cross Paper Feeder Company. (See Hallstream, Henning, assignor.)
Cross, Roy, Kansas City, Mo., assignor to Gasoline Products Company, New York, N. Y. Process and apparatus for converting petroleum hydrocarbons. 1,624,778; Apr. 12.
Cross, Walter M., Kansas City, Mo., assignor, by mesne assignments, to Gasoline Products Company. Method of treating hydrocarbons. 1,624,889; Apr. 12.
Crownover, Charles E., Yakima, Wash. Irrigation hydrant. 1,624,317; Apr. 12.
Cummings, George C., Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Contact device. 1,624,476; Apr. 12.
Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,624,395; Apr. 12.
Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Submarine signaling system. 1,624,396; Apr. 12.
Curtis, Lewis E., Warren, Ohio, assignor, by mesne assignments, to A. C. Paul, Minneapolis, Minn., and G. A. Chritton, River Forest, Ill., trustees. Corner bead. 1,624,541; Apr. 12.
Curtis, Lewis E., Milwaukee, Wis., assignor, by mesne assignments, to A. C. Paul, Minneapolis, Minn., and G. A. Chritton, River Forest, Ill., trustees. Apparatus for expanding metal corner beads. 1,624,542; Apr. 12.
Curtis, Lewis E., Milwaukee, Wis., assignor, by mesne assignments, to A. C. Paul, Minneapolis, Minn., and G. A. Chritton, River Forest, Ill., trustees. Apparatus for expanding metal lath. 1,624,543; Apr. 12.
Cyclo Corporation. (See Honig, Frank, assignor.)
Czakó, László, Budapest, Hungary. Holding films in spaced coil forms. 1,624,586; Apr. 12.
Dahne, Harry. (See Weistock, A. E., and Dahne.)
Dalton Adding Machine Company, The. (See Landsiedel, Harry, assignor.)
Dalton, Michael P. (See Owen, T. M., and Dalton.)
Dalzell, John P. (See Lowe, Harry W., assignor.)
Dana, Leslie, St. Louis, Mo. Automatic regulator. 1,624,039; Apr. 12.
Davidson, James L., Los Angeles, Calif. Support. 1,624,657; Apr. 12.
Davis, Augustine, jr., Cincinnati, Ohio. Measuring bucket or vessel. 1,624,477; Apr. 12.
Davis, David C., Chester, Pa., assignor to Westinghouse Electric and Manufacturing Company. Auto-stop governor. 1,624,093; Apr. 12.
Davis Lumber Co., The. (See Hall, Bernard E., assignor.)
Davis, Norris K., San Francisco, Calif. Apparatus for treating fiber-bearing materials. 1,624,717; Apr. 12.
Dawn, Richard W., assignor to W. E. Castleton, Deer Lodge, Mont. Attachment for steam boards. 1,624,829; Apr. 12.
Day, Jacob, Duluth, Minn. Spirit level. 1,624,161; Apr. 12.
Day, Salisbury M., Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y. Universal A. C. relay. 1,624,478; Apr. 12.
De Boer, Jan H., assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Converting hafnium and zirconium phosphates. 1,624,162; Apr. 12.
De Camp, Alfred J. (See De Camp, Louis C. and A. J.)
De Camp, Louis C. and A. J., Molina, Colo. Measuring tape. 1,624,779; Apr. 12.
Decot, Theodore, Sauk City, Wis. Siren. 1,624,587; Apr. 12.
Degener, Gustavo O., Brooklyn, assignor to Royal Typewriter Company, Inc., New York, N. Y. Adding attachment for typewriting machines. 1,624,318; Apr. 12.
Degener, Gustave O., Brooklyn, assignor to Royal Typewriter Company, Inc., New York, N. Y. Adding attachment for typewriting machines. 1,624,819; Apr. 12.
De Graaf, Martin. (See Sealock, J. W., and De Graaf.)
Demmer, George, Herndon, Kans. Butcher's gambrel. 1,624,320; Apr. 12.
Delahanty, Harland K., et al. (See Wood, Joseph E., assignor.)

Delaize, Paul C., New York, N. Y. Box or similar container. Des. 72,408; Apr. 12.
Delaize, Paul C., New York, N. Y. Box or similar container. Des. 72,409; Apr. 12.
Delaize, Paul C., New York, N. Y. Bottle or similar container. Des. 72,410; Apr. 12.
Delaize, Paul C., New York, N. Y. Bottle or similar container. Des. 72,411; Apr. 12.
Delany, Edward L., Brooklyn, N. Y. Mixing valve. 1,624,479; Apr. 12.
Delco-Remy Corporation. (See Norviel, Harry E., assignor.)
De Luca, Francisco, Santiago de Chile, Chile. Wheel. 1,624,780; Apr. 12.
Dempsey, James E., and L. E. Burton, Johnston City, Ill. Corn popper. 1,624,040; Apr. 12.
Dennis, Welcome C., Oakland, Calif. Ship governor. 624,718; Apr. 12.
Dennison, Frank G. (See Brown, G. A., and Dennison.)
Dequer, John H., Los Angeles, Calif. Electromagnetic therapeutic-compress-heating appliance. 1,624,397; Apr. 12.
Derrick, John P., Carmine, Tex. Plowing device. 1,624,041; Apr. 12.
Des Allimes, Carlos, Jerez de la Frontera, Spain. Sporting cartridge. 1,624,649; Apr. 12.
Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Fabric-feeding device for bead-wire-covering machines. 1,624,544; Apr. 12.
Deutsch, David. (See Dunnagan, Albert L., assignor.)
Devine, Edward P., Indianapolis, Ind., assignor, by mesne assignments, to Continental Optical Corporation, New York, N. Y. Lens-grinding machine. 1,624,658; Apr. 12.
Dewey, John, Perry, N. Y. Antikicking device. 1,624,861 Apr. 12.
Diamond Chain and Manufacturing Company. (See Kottlowski, Clarence P., assignor.)
Diamond Power Specialty Corporation. (See Bowers, Frank, assignor.)
Dickinson, Herbert. (See Lamont, John W. F., and Dickinson.)
Dickinson, Merian H., Seattle, Wash., assignor to Lidgerwood Manufacturing Company, New York, N. Y. Hoisting and conveying device. 1,624,545; Apr. 12.
Dictaphone Corporation. (See Lucarelle, J. M., and Frykman, assignors.)
Dieges, Charles J., Brooklyn, assignor to Dieges & Clust, New York, N. Y. Ring. Des. 72,412; Apr. 12.
Dieges & Clust. (See Dieges, Charles J., assignor.)
Dietze, Eginhard. (See McKown, F. W., and Dietze.)
Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,413; Apr. 12.
Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,414; Apr. 12.
Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,415; Apr. 12.
Dinhofer, Julius, New York, N. Y. Watchcase. Des. 72,416; Apr. 12.
Dixon, Paul, Atlanta, Ga. Card protector. 1,624,719; Apr. 12.
Dodelin, Emil A. (See Shetzline, S. R., jr., and Dodelin.)
Dodds, Samuel R., Pittsburgh, Pa. Differential driving mechanism. 1,624,589; Apr. 12.
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake-drum oil guard. 1,624,220; Apr. 12.
Doherty Research Company. (See Bjerregaard, August P., assignor.)
Dolbear, Samuel H., San Francisco, Calif., and B. L. Eastman, New York, N. Y., assignor, by mesne assignments, to Selective Treatment Company Limited, Montreal, Canada. Classifying crushed ore and the like. 1,624,134; Apr. 12.
Dolbear, Samuel H., and V. Zachert, San Francisco, Calif., assignor, by mesne assignments, to Selective Treatment Company Limited, Montreal, Canada. Concentrating fibrous materials. 1,624,163; Apr. 12.
D'Oller, William L., Philadelphia, Pa. Screen-cleaning apparatus. 1,624,221; Apr. 12.
Dolley, Paul T. (See Poindexter, R. W., and Dolley.)
Dormann, August, jr., et al. (See Wilson, John H., assignor.)
Doolan, James F. Manufacturing Corporation. (See Smith, Arthur J., assignor.)
Dornier, Claudius, Friedrichshafen-on-the-Bodensee, Germany, assignor to Firm Zeppelinwerk Lindau, Gesellschaft mit beschränkter Haftung, Lindau-Reutin, Germany. Landing gear for flying machines. 1,623,961; Apr. 12.
Dox, Arthur W., Windsor, Ontario, Canada, assignor to Parke Davis & Company, Detroit, Mich. Ethyl-normal-hexyl-barbituric acid. 1,624,546; Apr. 12.
Dreyer, Bruno W., Chicago, Ill. Folding seat for window cleaning. 1,623,962; Apr. 12.
Dritz, Arthur M., New York, N. Y. Racket string. 1,624,720; Apr. 12.
Dubin, Harry E., assignor, by mesne assignments, to H. A. Metz Laboratories, Inc., New York, N. Y. Edible-fat composition. 1,624,164; Apr. 12.
Duggins, Charles F., Richmond, Va. Radiator cover. 1,624,042; Apr. 12.
Duke, Charles A., New York, N. Y. Knockdown stand. 1,624,721; Apr. 12.
Duke, Charles A., New York, N. Y. Knockdown stand. 1,624,722; Apr. 12.
Dunn, James P., San Francisco, Calif. Shoe-shining cabinet. 1,624,480; Apr. 12.
Dunnagan, Albert L., Waco, Tex., assignor to D. Deutsch, New York, N. Y. Insect destroyer. 1,624,321; Apr. 12.
Dunlap, Frederick L., Chicago, Ill., and N. T. Ewer, Swarthmore, Pa., assignors to Amdyco Corporation, New York, N. Y. Fire-extinguishing composition. 1,624,398; Apr. 12.
Duplex Motor Company. (See Norwick, H. A., and Marchetti, assignor.)
Du Pont, E. I., de Nemours & Company. (See Elley, Harold W., assignor.)
Du Pont, E. I., de Nemours & Company. (See Elley, H. W., and Powers, assignors.)
Duquenne, Camille, Paris, France. Steam generator. 1,624,481; Apr. 12.
Dura Company, The. (See Graff, George, assignor.)
Durand, Eugène H. M. E., Paris, France. Circular-knitting machine. 1,624,482; Apr. 12.
Duval, William J., assignor to Smith & Davis Mfg. Co., St. Louis, Mo. Metal folding bed. 1,624,222; Apr. 12.
Dye, Glen M., Minneapolis, Minn. Method and apparatus for handling photoprints. 1,624,781; Apr. 12.
Eakin, Willard D., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Festooning rack. 1,624,223; Apr. 12.
Easterlin, Douglas L., assignor to Lincoln Rubber Key Company, New York, N. Y. Apparatus for making caps for typewriter keys and the like. 1,624,224; Apr. 12.
Eastman, Byron L. (See Dolbear, S. H., and Eastman.)
Economy Products Corporation. (See Voight, George F., assignor.)
Economy Vaporizer Company. (See May, Harry E., assignor.)
Electric Furnace Company, The. (See Cope, Frank T., assignor.)
Elevator Company of America. (See Rice, Joseph, assignor.)
Ellenbecker, John P., assignor to Granite City Electric Company, St. Cloud, Minn. Controlling switch. 1,624,483; Apr. 12.
Elley, Harold W., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Rubber composition and preparing same. 1,624,724; Apr. 12.
Elley, Harold W., and D. H. Powers, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Vulcanization accelerator and making same. 1,624,723; Apr. 12.
Elliot, John T., Irvington, N. J., assignor to M. Weiss Corporation. Table. 1,624,862; Apr. 12.
Elliott, Albert G. (See Royce, F. H., and Elliott.)
Elliott Core Drilling Company. (See Oliver, Fay, assignor.)
Ellis, Walter R., Wilkinson, Pa., assignor to Westinghouse Electric & Manufacturing Company. Clamping device. 1,624,399; Apr. 12.
Elters, William S., assignor to The Gem City Sheet Metal Company, Dayton, Ohio. Register hood. 1,624,225; Apr. 12.
Elters, William S., assignor to The Gem City Sheet Metal Company, Dayton, Ohio. Register hood. 1,624,226; Apr. 12.
Emerson, Alfred C., Omaha, Nebr. Oil burner. 1,624,165; Apr. 12.
Emerson Drug Company. (See Hindes, Joseph F., assignor.)
Emeley, Reuben F., Rocky River, Ohio. Container. 1,624,830; Apr. 12.
Enderes, Ernst, Albert Lea, Minn. Auxiliary reflector for automobile headlights. 1,624,166; Apr. 12.
England, Frank W. (See Olson, C. G., and England.)
Engleman, Charles W., Abilene, Kans. Fuse. 1,624,322; Apr. 12.
Erickson, Carl O., St. Paul, Minn. Carburetor-manifold heater. 1,624,863; Apr. 12.
Eriksson, Erik O., Lidingo-Brevik, assignor to Aktiebolaget Ljungströms Angturbin, Lidingo-Brevik, Sweden. Condenser for locomotives. 1,624,782; Apr. 12.
Essmann, Heinrich A., Altona-Ottenson, assignor to the Firm Ottensener Waagenfabrik Albert Essmann & Co., Altona, Germany. Weighing scale. 1,624,588; Apr. 12.
Evans Case Co. (See Radley, Samuel S., assignor.)
Evans, Robert D., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balance indicator. 1,624,484; Apr. 12.
Ewer, Nathaniel T. (See Dunlap, F. L., and Ewer.)
Ex-Cell-O Tool & Manufacturing Co. (See Buffington, G. L., and Hopson, assignors.)
Eynon, Thomas M., Philadelphia, Pa. Liquid-level indicator. 1,624,659; Apr. 12.
Fahrenwald, Frank A., Chicago, Ill. Furnace. 1,624,043; Apr. 12.
Famous Players-Lasky Corporation. (See Garbutt, Frank E., assignor.)
Farabee, Henry E. (See Fraser, John J., assignor.)

Farrand, Clair L., Forest Hills, N. Y., E. Ross, East Orange, and P. F. Godley, Upper Montclair, N. J.; said Ross and said Godley assignors to Farrand Mfg. Co. Inc., Long Island City, N. Y. Loud speaker. Des. 72,417; Apr. 12.
Farrand Mfg. Co. Inc. (See Farrand, C. L., Ross, and Godley, assignors.)
Federated Engineers Development Corporation. (See Couch, Frederick F., assignor.)
Feldmann, William, Chicago, Ill. Binder. 1,624,660; Apr. 12.
Fenton, Frank, assignor to The Miller Rubber Company, Akron, Ohio. Treating cured inner tubes for pneumatic tires. 1,624,725; Apr. 12.
Ferodo Limited. (See Frood, Herbert, assignor.)
Ferrainolo, Albert F., et al. (See Caruso, Romeo O., assignor.)
Ferrara, Louis, Brooklyn, N. Y. Sandpaper and rubbing machine. 1,624,400; Apr. 12.
Ferrari, Climaco, Newark, N. J. Safety gas valve. 1,624,044; Apr. 12.
Ferris, Howard J., Harvard, Ill., assignor to Hunt, Helm, Ferris & Company. Pipe protector. 1,624,485; Apr. 12.
Fetter, Charles H. (See Strieby, M. E., and Fetter.)
Fibroc Insulation Company. (See Frederick, Louis T., assignor.)
Fidelity Machine Company. (See Larkin, Walter, assignor.)
Fischer, Joseph B., Chicago, Ill. Balloting system and the like. 1,624,045; Apr. 12.
Fisher, Alfred B., New York, N. Y. Polishing composition. 1,624,783; Apr. 12.
Fisher, James B., assignor to Waukesha Motor Company, Waukesha, Wis. Governor control. 1,624,227; Apr. 12.
Fisk Rubber Company, The. (See Castricum, Martin, assignor.)
Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)
Fisk Rubber Company, The. (See Midgley, Thomas, assignor.)
Fleming, Edward E., Hagerstown, Md. Envelope opener. 1,624,590; Apr. 12.
Fleming, Rives, Richmond, Va. Cane. 1,624,501; Apr. 12.
Fletcher, Harvey, New York, N. Y., and L. J. Sivian, Bloomfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Binaural telephone system. 1,624,486; Apr. 12.
Fletcher, Otho H., and J. A. Tenney, Queens, W. Va. Saw-sharpening machine. 1,624,864; Apr. 12.
Flowers, Henry F., Findlay, Ohio. Dumping device. 1,624,323; Apr. 12.
Fluor, John S., Santa Ana, Calif. Atmospheric cooling tower. 1,624,324; Apr. 12.
Flürscheim, Bernhard J., Fleet, England. Brisant explosive. 1,624,401; Apr. 12.
Foersterling, Hans, Jamesburg, N. J. Making air gas. 1,624,046; Apr. 12.
Foisy, George A., Lowell, Mass., assignor, by mesne assignments, to Winchester Repeating Arms Company, New Haven, Conn. Heat-interchange apparatus. 1,624,487; Apr 12.
Folino, Arminio, Rochester, N. Y. Bridge construction. 1,624,325; Apr. 12.
Ford, George L., Java, Va. Dibble. 1,624,488; Apr. 12.
Ford, Henry, Dearborn, Mich. Crank-shaft formation. 1,624,228; Apr. 12.
Ford, Henry, Dearborn, Mich. Manifold construction for internal-combustion engines. 1,624,229; Apr. 12.
Foresman, Robert A., Moore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Refuse-discharge mechanism. 1,624,661; Apr. 12.
Forges & Ateliers de Constructions Electriques de Jeumont, Societe Anonyme. (See Charpentier, Paul, assignor.)
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Electrical heating apparatus. 1,624,402; Apr. 12.
Foster, Charles E., Letchworth, England. Electrical measuring instrument. 1,624,135; Apr. 12.
Foulds, Charles Y. (See Hutchinson, E. C., and Foulds.)
Foxboro, Company, The. (See Bristol, Edgar H., assignor.)
Franklin, H. H., Manufacturing Company. (See Wilkinson, John, assignor.)
Fraser, John J., assignor of 45 per cent to H. E. Farabee, Camden, Ark. Safe control and signal for pump-operating mechanism. 1,624,784; Apr. 12.
Frazier, John W., assignor to Uvalde Rock Asphalt Company, San Antonio, Tex. Treating rock asphalt for shipment and laying. 1,624,403; Apr. 12.
Frederick, Louis T., assignor to Fibroc Insulation Company, Valparaiso, Ind. Machine for and method of applying varnish to sheets of fibrous material. 1,624,094; Apr. 12.
Frederickson, Otto A., Wethersfield, assignor to The American Wiremold Company, Hartford, Conn. Electric-bracket outlet. 1,624,547; Apr. 12.
Freel, Francis E., Niles, Ohio. Tank-car-cleaning device. 1,624,865; Apr. 12.
Freeman, Louis G., Cincinnati, Ohio. Shank-beating and stitch-rubbing machine. 1,624,326; Apr. 12.
Freiberg-Simrall Company, The. (See Utz, Louis F., assignor.)
Frese, Fredrick W., Spokane, Wash. Internal-combustion engine. 1,624,404; Apr. 12.
Friedman, Benjamin, New York, N. Y. Needle mounting for hypodermic syringes. 1,624,327; Apr. 12.
Fries, Jalmar W. G., assignor to S. F. Bowser and Company, Incorporated, Fort Wayne, Ind. Meter. 1,624,095; Apr. 12.
Frood, Herbert, assignor to Ferodo Limited, Chapel-en-le-Frith, England. Stair tread. 1,624,405; Apr. 12.
Frushour, James R., Andrews, Ind. Automobile heater. 1,623,963; Apr. 12.
Frykman, Victor L. (See Lucarelle, J. M., and Frykman.)
Fuchs, David G., Pittsburgh, Pa. Spark plug. 1,624,785; Apr. 12.
G. & G. Atlas Systems, Inc. (See Stoetzel, Joseph J., assignor.)
Gaidies, Georg. (See Rüttenauer, A., and Gaidies.)
Gaisman, Henry J., New York, N. Y., assignor to Autostrop Patents Corporation, Dover, Del. Razor-stropping means. 1,624,328; Apr. 12.
Galion Iron Works & Mfg. Co., The. (See Arndt, Franklin E., assignor.)
Gallagher, George D., Phoenix, Ariz., assignor, by mesne assignments, of part interests to N. F. Hoose and R. B. Walten, Baltimore, Md., C. F. Moore, Washington, D. C., and J. M. Matthews, Baltimore County, Md. Blade-stropping device. 1,624,592; Apr. 12.
Gallagher, George D., Washington, D. C., assignor, by mesne assignments, of part interests to N. F. Hoose and R. B. Walten, Baltimore, Md., C. F. Moore, Washington, D. C., and J. M. Matthews, Baltimore County, Md. Safety-razor-blade stropper. 1,624,593; Apr. 12.
Garbutt, Frank E., Los Angeles, Calif., assignor to Famous Players-Lasky Corporation, New York, N. Y. Universal panoramic tripod. 1,624,096; Apr. 12.
Garcia, Marcelino Y., New York, N. Y. Cross game device. 1,624,167; Apr. 12.
Gardner, John E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,624,329; Apr. 12.
Gasoline Products Company. (See Cross, Roy, assignor.)
Gasoline Products Company. (See Cross, Walter M., assignor.)
Gasoline Products Company. (See Snelling, Walter O., assignor.)
Gaynor, Joseph E. (See Cremo, A. L. N., and Gordon, assignors.)
Geddes, David, Guadalajara, Jalisco, Mexico. Grain washing and drying machine. 1,624,831; Apr. 12.
Geldhof, Peter E., Syracuse, assignor, by mesne assignments, to United States Hoffman Machinery Corporation, New York, N. Y. Garment press. 1,624,726; Apr. 12.
Gem City Sheet Metal Company, The. (See Elters, William S., assignor.)
General Electric Company. (See Batchelder, Asa F., assignor.)
General Electric Company. (See Carothers, Robert M., assignor.)
General Electric Company. (See Graf, Georg, assignor.)
General Electric Company. (See Hilliard, John D., assignor.)
General Electric Company. (See Hutt, Leonard P., assignor.)
General Electric Company. (See Rüttenauer, A. and Gaidies, assignors.)
General Electric Company. (See Wayringer, Henry A., assignor.)
General Motors Corporation. (See Brittain, Richard J., jr., assignor.)
General Motors Research Corporation. (See Kettering, Charles F., assignor.)
General Railway Signal Company. (See Day, Salisbury M., assignor.)
General Zeolite Company. (See Behrman, Abraham S., assignor.)
Gensmer, Theodore, Portland, Oreg., assignor to Automatic Transmission Company. Automatic change-speed transmission apparatus. 1,624,097; Apr. 12.
Gerber, Bernhard, Stellingen, near Hamburg, Germany. Device for cleaning pipe lines. 1,624,786; Apr. 12.
Gerson Stewart Corporation Company, The. (See Goldrick, Albert R., assignor.)
Gerwick, Ben C., Berkeley, Calif. Coffer and making the same. 1,624,330; Apr. 12.
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Osnos, M., and Kasarnowsky, assignors.)
Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches. (See Osnos, Mendel, assignor.)
Geyser, Frank R., New York, N. Y. Vacuum tube. 1,624,331; Apr. 12.
Gibbs, Frederick H., Trustee. (See Purdy, Walter S., assignor.)
Gibson, John G., Ventnor, N. J. Water grate. 1,624,230; Apr. 12.
Gilg, Henry F. (See Heinle, Albert W., assignor.)
Gill, William E., Lake Geneva, Wis. Battery connection. 1,624,047; Apr. 12.
Gilling, Preston E., East Orange, N. J. Electrical condenser. 1,624,332; Apr. 12.
Gilling, Preston E., East Orange, N. J. Electrical condenser. 1,624,333; Apr. 12.
Gilling, Preston E., East Orange, N. J. Electrical condenser. 1,624,334; Apr. 12.
Ginsburg, Abe. (See Lerner, H., and Ginsburg.)

Giroux, Philip S., West Warren Mass. Stop motion for spinning machines. 1,623,964; Apr. 12.
Glasshoffer, Daniel, Roselle, N. J. Animal trap. 1,624,548; Apr. 12.
Gleason Works, The. (See Logue, Charles H., assignor.)
Glover, William C., Kansas City, Mo. Gasoline filter. 1,624,832; Apr. 12.
Godley, Paul F. (See Farrand, C. L., Ross, and Godley.)
Goldberg, Carl M., assignor to Schaffer & Goldberg, New York, N. Y. Sport visor cap. 1,624,727; Apr. 12.
Goldblatt, Henry, Kansas City, Mo. Cutting tool. 1,624,136; Apr. 12.
Goldrick, Albert R., assignor to The Gerson Stewart Corporation Company, Cleveland, Ohio. Liquid-soap dispenser. 1,624,231; Apr. 12.
Goldsmith, Bertram J., and E. Koeb, New York, assignors to Perfect Window Regulator Corporation, Long Island City, N. Y. Window regulator. 1,624,098; Apr. 12.
Goodell-Pratt Company. (See Hapgood, Oscar D., assignor.)
Goodrich, B. F., Company, The. (See Eakin, Willard D., assignor.)
Goodrich, B. F., Company, The. (See Richardson, C. M., and Sargisson, assignors.)
Gordon, Albert J. (See Cremo, A. L. N., and Gordon.)
Gough, James J., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Electric cigar lighter. Des. 72,418; Apr. 12.
Gould, Leslie J. and R., Toronto, Ontario, Canada. Compensating for unevenness in printer's type. 1,624,594; Apr. 12.
Gould, Robert. (See Gould, Leslie J. and R.)
Graf, Georg, Berlin-Pankow, Germany, assignor to General Electric Company. Protective device. 1,624,728; Apr. 12.
Graff, George, assignor to The Dura Company, Toledo, Ohio. Corner light. Des. 72,419; Apr. 12.
Graham, Adoniram J., and L. O. Tekell, Whittier, assignors to Gra-Kell Line-Spooler Company, Los Angeles, Calif. Line spooler. 1,624,232; Apr. 12.
Gra-Kell Line-Spooler Company. (See Graham, A. J., and Tekell, assignors.)
Granite City Electric Company. (See Ellenbecker, John P., assignor.)
Grant, George E., Derry, N. H. Jar opener. 1,624,833; Apr. 12.
Great Northern Paper Company. (See Whitcomb, William A., assignor.)
Greaves, Abillo M. de S., Cambridge, Mass. Portable fire alarm. 1,624,866; Apr. 12.
Greer, Butler F., San Francisco, Calif. Savings bank. 1,624,335; Apr. 12.
Griffin, George B., Pittsburgh, Pa. Container for artificial bait and the like. 1,624,233; Apr. 12.
Griffiths, Richard T. (See Steele, C. W., and Griffiths.)
Groff, William A., Philadelphia, Pa. Permanent-hair-waving device. 1,624,336; Apr. 12.
Groves, Walter P. (See Powell, H., and Groves.)
Gschwind, Herman A., El Paso, Tex. Cooling-system drain cock. 1,624,168; Apr. 12.
Guernsey, Charles O., Philadelphia, Pa. Gear-shifting mechanism. 1,624,867; Apr. 12.
Gulbransen Company. (See Morris, William L., assignor.)
Guzik, Edward W., Lorain, Ohio. Pen and blotter. 1,624,834; Apr. 12.
Haas, Walter G. (See Mumaw, J. H., Schnieders, and Haas.)
Haddock, Arthur. (See Adams, W. J., and Haddock.)
Haddock, Arthur, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Attachment to electric insulation. 1,624,595; Apr. 12.
Hafke, Charles, Washington, Ark. Tractor plow. 1,624,406; Apr. 12.
Haggenjos, John J., St. Louis, Mo. Memorial tablet. 1,624,048; Apr. 12.
Hahre, Martin J., Smithers, British Columbia, Canada. Saw gauge. 1,624,050; Apr. 12.
Haight, Hiram H., Milwaukee, Wis. Gear pump. 1,624,099; Apr. 12.
Hale, Pratt B., Albany, Ala. Flush-tank ball seat. 1,624,234; Apr. 12.
Halikman, Harris K., Beachmont, Mass. Antiglare goggle. 1,624,337; Apr. 12.
Hall, Bernard E., assignor to The Davis Lumber Co., Martinsville, Ind. Paper cutter. 1,624,235; Apr. 12.
Hallstream, Henning, Brockton, assignor to Cross Paper Feeder Company, Boston, Mass. Paper-feeding machine. 1,624,787; Apr. 12.
Halversen, Hans N., Vineland, N. J., assignor to Kimble Glass Company, Chicago, Ill. Multiple graduating machine. 1,624,549; Apr. 12.
Halvorsen, Fredrik, Seattle, Wash. Power drag or falling saw. 1,624,662; Apr. 12.
Hamilton, Albert G., assignor to J. T. and A. Hamilton Company, Pittsburgh, Pa. Glass bottle. Des. 72,420; Apr. 12.
Hamilton, James, Detroit, Mich. Flower holder and stand. 1,624,407; Apr. 12.
Hamilton, J. T. and A., Company. (See Hamilton, Albert G., assignor.)
Hammersley, Walter M., Dayton, Ohio. Vehicle signal. 1,624,236; Apr. 12.
Hammond, William P. (See Buel, Hillhouse, assignor.)
Hancock Bros. (See Bunce, Robert M., assignor.)
Hanley, Michael. (See Miller, J. T., and Hanley.)
Hanna, Clinton R., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Telephone receiver. 1,624,338; Apr. 12.
Hanna, David B., Park Ridge, Ill. Street-lighting equipment. 1,624,237; Apr. 12.
Hansen, A. L., Mfg. Co. (See Hansen, Augie L., assignor.)
Hansen, Augie L., assignor to A. L. Hansen Mfg. Co., Chicago, Ill. Lock and method of manufacture. 1,624,051; Apr. 12.
Hanson, Bengt M. W., deceased, Hartford, Conn.; E. A. Hanson and C. E. Whitney, executors. Metal-working machine. 1,624,868; Apr. 12.
Hanson, Einar A., et al., executors. (See Hanson, Bengt M. W.)
Hanson, Hans P., Chicago, Ill. Machine for preparing mossed frames for floral wreaths. 1,624,238; Apr. 12.
Hanson, Isaac E., Blackwell, Okla. Highway-marking device. 1,624,408; Apr. 12.
Hapgood, Oscar D., Montague, Mass., assignor to Goodell-Pratt Company, Greenfield, Mass. Level. 1,624,339; Apr. 12.
Harris, Howard C., Akron, Ohio. Pivotal connection. 1,624,239; Apr. 12.
Harry, Robert A. (See Springer, J. E., and Harry.)
Harter, Augustus F., assignor to Cribben & Sexton Company, Chicago, Ill. Stove or range. 1,624,550; Apr. 12.
Hartley, Ralph V. L., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling method and system. 1,624,596; Apr. 12.
Harwood, George. (See Harwood, William W. and G.)
Harwood, William W., Grannis, Ark., and G. Harwood, Dickinson, Tex. Insect destroyer. 1,624,240; Apr. 12.
Haseltine, William C. (See Bowman, John G., assignor.)
Hasselblatt, Paul A., Brooklyn, N. Y. Heat retainer. 1,624,241; Apr. 12.
Haswell, Arthur B. (See Ryding, H. C., and Haswell.)
Hatcher, Ernest C., Finchley, London, England. Variable-speed mechanism. 1,624,835; Apr. 12.
Hawkins, William W., Brooklyn, N. Y., assignor to Webster Electric Company, Racine, Wis. Interrupter mechanism. 1,624,100; Apr. 12.
Hawks, Arthur S., assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Internal-combustion engine. 1,624,101; Apr. 12.
Hawley, Jesse B., Wilmette, Ill. Sound-amplifying horn. 1,624,242; Apr. 12.
Hayward, John M. (See Moore, Charles R., and Hayward.)
Heathcote, Henry L., assignor to Rudge-Whitworth Limited, Coventry, England. Manufacturing ball-rolling disks. 1,624,597; Apr. 12.
Heddon, Charles, and J. T. Welch, assignors to James Heddon's Sons, Dowagiac, Mich. Reel seat for fishing rods. 1,624,052; Apr. 12.
Heddon's, James, Sons. (See Heddon, C., and Welch, assignors.)
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 72,421; Apr. 12.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 72,422; Apr. 12.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 72,423; Apr. 12.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 72,424; Apr. 12.
Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 72,425; Apr. 12.
Heinle, Albert W., Crafton, assignor of one-half to H. F. Gilg, Pittsburgh, Pa. Rolling hollow rounds. 1,624,340; Apr. 12.
Heinzelman, Edmund G., Belleville, Ill. Steering-wheel brake. 1,624,598; Apr. 12.
Heise, George W., Bayside, N. Y., H. H. Thompson, Cleveland, Ohio, and N. K. Chaney, Kew Gardens, N. Y., assignors to National Carbon Company, Inc. Dry cell and electrode therefor. 1,624,409; Apr. 12.
Hennes, Albert J., Cincinnati, Ohio. Broom protector and stand. 1,624,410; Apr. 12.
Hennig, Albert, assignor to Anker-Werke Aktiengesellschaft, Bielefeld, Germany. Thread tightener. 1,624,898; Apr. 12.
Herschede Hall Clock Company. (See Herschede, Walter J., assignor.)
Herschede, Walter J., assignor to The Herschede Hall Clock Company, Cincinnati, Ohio. Hall clock. Des. 72,426; Apr. 12.
Hickie, Arthur F., Lansing, Mich. Doorcheck. 1,624,836; Apr. 12.
Higgins, Daniel J., Adams, Mass. Loom picker. 1,624,870; Apr. 12.
Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Power system. 1,624,729; Apr. 12.
Hilton, Danesi M., executrix. (See Hilton, Robert W.)

Hilton, Robert W, deceased; D. M. Hilton, executrix, Cincinnati, Ohio, assignor to The Kemper-Thomas Company, Norwood, Ohio. Manufacture of fiber board. 1,624,599; Apr. 12.

Hindes, Joseph F., Relay, Md., assignor to Emerson Drug Company, Baltimore, Md. Commercial vehicle float. Des. 72,427; Apr. 12.

Hinrichsen, Edward E., New York, N. Y., assignor, by mesne assignments, to Western Electric Company, Incorporated. Semiautomatic telephone system. 1,624,341; Apr. 12.

Hitt, Thomas G., Seattle, Wash. Colored vapor signal. 1,624,600; Apr. 12.

Hodgkinson, Francis, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine. 1,623,999; Apr. 12.

Hoff, Henry J., and G. B. Bush, York, Pa. Vehicle wheel jack. 1,624,243; Apr. 12.

Hoffmann-La Roche Chemical Works, The. (See Preiswerk, Ernst, assignor.)

Hofmaister, Robert C., Bartlesville, Okla. Combination tool. 1,624,788; Apr. 12.

Hogan, George F., Chicago, Ill. Envelope. 1,624,137; Apr. 12.

Holland-Letz, Ludwig, Oak Park, Ill. Gear-changing mechanism. 1,624,244; Apr. 12.

Hollywood Chemical Company. (See Levy, Gaston J., assignor.)

Holmes, Arthur W., Veedersburg, D. E. Jaques, Thortown, and H. B. Coats, Veedersburg, Ind. System of feeding poultry and livestock. 1,624,245; Apr. 12.

Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Bearing. 1,624,837; Apr. 12.

Holt, Harold E. S., Farnborough, England. Landing light or flare for attaching to aircraft. 1,624,411; Apr. 12.

Honig, Frank, Oak Park, assignor to Cyclo Corporation, Chicago, Ill. Mechanism for and method of coiling wire or the like. 1,624,000; Apr. 12.

Hooper, John S., Wilkinsburg, Pa. Battery filler. 1,624,890; Apr. 12.

Hoos, Nannie F., et al. (See Gallagher, George D., assignor.)

Hoover Company, The. (See Hoover, Howard E., assignor.)

Hoover, Howard E., Chicago, Ill., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,624,246; Apr. 12.

Hoover, Howard E., Glencoe, Ill., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,624,247; Apr. 12.

Hopedale Manufacturing Company. (See O'Connell, John J., assignor.)

Hopkins Corporation. (See Hopkins, Marcus C., assignor.)

Hopkins, Marcus C., Washington, D. C., assignor to Hopkins Corporation, Jersey City, N. J. Loud speaker. Des. 72,428; Apr. 12.

Hopson, Edward H. (See Buffington, G. L., and Hopson.)

Horner, Glenn M., Minneapolis, Kans. Gate. 1,624,169; Apr. 12.

Horton, Joseph W., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Submarine signaling. 1,624,412; Apr. 12.

Horton, Joseph W., Bloomfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret communication. 1,624,601; Apr. 12.

Howard, Lemuel F., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 1,624,248; Apr. 12.

Howell, Albert S., assignor to Bell & Howell Company, Chicago, Ill. Motion-picture apparatus. 1,624,730; Apr. 12.

Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Film sprocket guide. 1,624,731; Apr. 12.

Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Motion-picture projecting machine. 1,624,732; Apr. 12.

Howitz, Alfred A., assignor to Sun Shipbuilding & Dry Dock Company, Chester, Pa. Retarding mechanism for internal-combustion engines. 1,624,342; Apr. 12.

Huber, Fritz, Mannheim, assignor, by mesne assignments, to Heinrich Lanz Aktiengesellschaft, Mannheim, Baden, Germany. 1,624,413; Apr. 12.

Hull, Matthew R, assignor to Rex Manufacturing Company, Connersville, Ind. Windshield. 1,624,170; Apr. 12.

Humbrecht, Jules, assignor to the Firm of Optische Anstalt C. P. Goerz Aktiengesellschaft, Friedenau, near Berlin, Germany. Periscope more particularly for submarines. 1,624,733; Apr. 12.

Hunt, Calvert R., Kansas City, Mo. Tamping and tamping machine. 1,624,734; Apr. 12.

Hunt, Helm, Ferris & Company. (See Ferris, Howard J., assignor.)

Hurley, George A., Rockland, Mass. Shank stiffener for shoes. 1,624,001; Apr. 12.

Hurxthal, Alpheus O., assignor to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Rack dryer for brake linings and other strip material. 1,624,735; Apr. 12.

Husted, Harry F., Shavertown, assignor of one-third to E. C. Wideman and one-third to H. D. Levy, Wilkes-Barre, Pa. Shade roller. 1,624,053; Apr. 12

Hutchinson, Ely C., and C. V. Foulds, Oakland, assignors to Pelton Water Wheel Company, San Francisco, Calif. Water-tight seating for butterfly valves and such. 1,624,891; Apr. 12.

Hutchinson, Job, Saugerties, N. Y. Liquid-fuel vaporizer. 1,624,239; Apr. 12.

Hutt, Leonard P., Schenectady, N. Y., assignor to General Electric Company. Valve. 1,624,736; Apr. 12.

Ihrig, Harry K. (See Wallace, G. W., and Ihrig.)

Illinois Tool Works. (See Olson, C. G., and England, assignors.)

Industrial Associates, Incorporated. (See Jones, Arthur B., assignor.)

Industrial Associates, Incorporated. (See Riley, Champlain L., assignor.)

Ingram, Harry, Brooklyn, N. Y. Vacuum sealing machine for jars and other containers. 1,624,869; Apr. 12.

International Harvester Company. (See Witte, Gustav W., assignor.)

Interstate Folding Box Company, The. (See Bergstein, S., and Lindner, assignors.)

Invincible Metal Furniture Company. (See Anderson, Edgar W., assignor.)

Ithaca Gun Company. (See Smith, Louis P., assignor.)

Jacker, Edward G., assignor of one-half to V. Bendix, Chicago, Ill. Hydraulic transmission. 1,624,663; Apr. 12.

Jacobus, David S., Jersey City, and A. D. Pratt, Short Hills, assignors to The Babcock & Wilcox Company, Bayonne, N. J. Method and apparatus for utilizing heat. 1,624,602; Apr. 12.

Jagenberg, Emil, Dusseldorf, Germany. Filling and packing machine. 1,624,664; Apr. 12.

Jammer, Jacob S., Cumberland, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Multiplex transmission. 1,624,551; Apr. 12.

Japolsky, Nicolas. (See Kostenko, M., and Japolsky.)

Jaques, Donald E. (See Holmes, A. W., Jaques, and Coats.)

Jenkinson, Richard C. (See Bauer, Adolph, assignor.)

Jenkinson, Richard C., & Co. (See Bauer, Adolph, assignor.)

Jensen, John, Houston, Tex. Tie holder. 1,624,737; Apr. 12.

Jesperson, Hans P., Sioux City, Iowa. Oil pump. 1,624,738; Apr. 12.

Johnson, Charles L., et al. (See Bauer, Jacob, assignor.)

Johnson, Emelyn O., Brooklyn, N. Y. Toe adjuster. 1,624,171; Apr. 12.

Johnson, Frank L., Akron, Ohio. Mold construction. 1,624,343; Apr. 12.

Johnson, Fred H., and S. R. Lathrop, Sapulpa, Okla. Leer-charging apparatus. 1,624,250; Apr. 12.

Johnson, Kenneth S., Jersey City, and T. E. Shea, Rutherford, N. J., assignors, by mesne assignments, to Western Electric Company, Incorporated. Wave filter. 1,624,665; Apr. 12.

Johnson, Lindley W., et al. (See Bauer, Jacob, assignor.)

Johnston, Clarence, Townsend, Mont. Weeder attachment for harrows. 1,624,789; Apr. 12.

Jones, Arthur B., Plainfield, N. J., assignor to Industrial Associates, Incorporated, New York, N. Y. Spray drying. 1,624,739; Apr. 12.

Jones, R. A., & Company. (See Jones, Ruel A., assignor.)

Jones, Ruel A., assignor to R. A. Jones & Company, Inc., Covington, Ky. Carton-feeding mechanism for carton folding and filling machine. 1,624,740; Apr. 12.

Jorgensen, Clarence H. (See Jorgensen, Peter J. and C. H.)

Jorgensen, Peter J. and C. H., Chicago, Ill. Oil gun. 1,624,138; Apr. 12.

Junge, Erich, Staten Island, N. Y. Internal-combustion engine. 1,624,489; Apr. 12.

Kadel, Byers W., Baltimore, Md., assignor to The Symington Company, New York, N. Y. Split-ring draft gear. 1,624,742; Apr. 12.

Karlsen, Eugene S., Chicago, Ill. Attachment for electric irons. 1,624,666; Apr. 12.

Kasarnowsky, Leo. (See Osnos, M., and Kasarnowsky.)

Kaser, William J., Chicago, Ill. Making pies. 1,624,490; Apr. 12.

Kaufmann, Charles F. L. and W. L., Santa Ana, Calif. Carburetor. 1,624,603; Apr. 12.

Kaufmann, Walter L. (See Kaufmann, Charles F. L. and W. L.)

Kearney, James R., Kansas City, Mo. Ground anchor. 1,624,871; Apr. 12.

Keefer, Walter L., assignor to H. G. Wolf, Chambersburg, Pa. Vacuum cleaner. 1,624,251; Apr. 12.

Keene, Alvin D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,624,344; Apr. 12.

Keene, Alvin D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Heating-unit terminal. 1,624,345; Apr. 12.

Kemp & Beatley, Inc. (See Kemp, Demetrius, assignor.)

Kemp, Demetrius, assignor to Kemp & Beatley, Inc., New York, N. Y. Bedspread. Des. 72,429; Apr. 12.

Kemper-Thomas Company, The. (See Hilton, Robert W., assignor.)

Kenerson, Joseph E., Saugus, assignor to Trimont Manufacturing Company, Roxbury, Mass. Pipe vise. 1,624,252; Apr. 12.

Kennedy, William, assignor to Airubber Corporation, Chicago, Ill. Swimming wing. 1,624,102; Apr. 12.

Kenward, Leo N., Lakewood, Ohio. Automobile headlight. 1,624,491; Apr. 12.

Kern, George H., Los Angeles, Calif., assignor to The Producers Pictures Corporation, St. Louis, Mo. Motion-picture machine. 1,624,667; Apr. 12.

Kettering, Charles F., assignor to General Motors Research Corporation, Dayton, Ohio. Fuel-supply device. 1,624,139; Apr. 12.

Kiefer, Karl, Cincinnati, Ohio. Collapsible tube. 1,624,140; Apr. 12.

Kienast, Ernst A., Los Angeles, Calif. Automatic hydraulic irrigation system. 1,624,744; Apr. 12.

Kilby, Angus M., Bangor, Me. Clasp. 1,624,253; Apr. 12.

Kimberlin, William H., Bismarck, N. Dak. Bow-facing oar. 1,624,743; Apr. 12.

Kimble Glass Company. (See Halversen, Hans N., assignor.)

Kings, Thomas W., Harvey, Ill., assignor to Ira E. Burtis, Beaver Dam, Wis. Carburetor. 1,624,604; Apr. 12.

Kingsbury, Edward J. and H. T., Keene, N. H. Automatic feeding device. 1,624,872; Apr. 12.

Kingsbury, Harry T. (See Kingsbury, Edward J. and H. T.)

Kirkegaard, Georg, Brooklyn, assignor to National Surety Company, New York, N. Y. Apparatus for making indelible imprints on sheet material. 1,624,552; Apr. 12.

Klaften, Berthold, Berlin-Grunewald, Germany. Thermostat. 1,624,790; Apr. 12.

Knopp, Rudolph, New York, N. Y. Combination motion-picture camera and display apparatus. 1,624,103; Apr. 12.

Knotts, Charles L., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer-cooling system. 1,624,346; Apr. 12.

Kochendorfer, Frederic S., River Forest, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for heat treating metals. 1,624,668; Apr. 12.

Koeb, Emil. (See Goldsmith, B. J., and Koeb.)

Koegle, John G., assignor of one-half to H. Boelter, Toledo, Ohio. Ladle. 1,624,553; Apr. 12.

Kostenko, Michael, and N. Japolsky, London, England. High-speed dynamo-electric machine for continuous current. 1,624,254; Apr. 12.

Kottlowski, Clarence P., assignor to Diamond Chain and Manufacturing Company, Indianapolis, Ind. Chain drive. 1,624,892; Apr. 12.

Kovács, Theodor, Berlin, Germany. Reservoir pen. 1,624,554; Apr. 12.

Kraxberger, Michael E., Buckingham, Colo. Insulated piston. 1,624,701; Apr. 12.

Kruckenberg, Franz, and C. Stedefeld, Heidelberg, Germany, said Stedefeld assignor to said Kruckenberg. Braking arrangement for high-speed suspension railways. 1,624,141; Apr. 12.

Kuhnast, Fredrick W., New York, N. Y. Combined cover and strainer. 1,614,745; Apr. 12.

Kuhne, Beat, Lewistown, Mont. Tooth-cleaning device. 1,624,054; Apr. 12.

Kumpmann, Karl, Ludenscheid, Germany. Automatic machine for making the heads of slotted wooden or iron screws. 1,624,746; Apr. 12.

Kunkel Stamping & Manufacturing Company. (See Broome, William J., assignor.)

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriting Company, New York, N. Y. Typewriting machine. 1,624,747; Apr. 12.

Kurtz-Hähnle, Carl, and H. Kurtz, Reutlingen, Germany. Wire netting for paper-making machine and making the same. 1,624,049; Apr. 12.

Kurtz, Hans. (See Kurtz-Hähnle, C., and Kurtz.)

Kuschel, Clemens J., Brown Valley, Minn. Babbitting frame. 1,624,605; Apr. 12.

Kuttruf, Wilhelm. (See Walter, A., and Kuttruf.)

Kyhl, Emil, Britt, Iowa. Starting switch for electric starting motors. 1,624,255; Apr. 12.

Lair, John P. (See Crain, Harry G., assignor.)

Lamont, John W. F., and Herbert Dickinson, London, England, said Dickinson assignor to said Lamont. Sighting indicator for firearms. 1,624,347; Apr. 12.

Lamore Tile Machine Company. (See Adams, Ash, assignor.)

Landis, Jeremish, Brookville, Ohio. Automatic drive gate. 1,624,256; Apr. 12.

Landis, Jesse A., Eaton, Ohio. Sound reflector. 1,624,873; Apr. 12.

Landis Machine Company. (See Schildknecht, Leo, assignor.)

Landsiedel, Harry, Norwood, Ohio, assignor to The Dalton Adding Machine Company, Cincinnati, Ohio. Adding machine. 1,624,104; Apr. 12.

Landsiedel, Walter W., Norwood, assignor to The Dalton Adding Machine Company, Cincinnati, Ohio. Calculating and recording machine. 1,624,105; Apr. 12.

Lane, Franklin E., Nacozari, Mexico. Coffeepot. 1,624,606; Apr. 12.

Lane, John D., Cambridge, Mass. Carton-end-closing device for packaging machines. 1,624,257; Apr. 12.

Lane, Victor E., Detroit, Mich. Nonoxidizing annealing furnace. 1,624,258; Apr. 12.

Langlais, Simon, Montreal, Quebec, Canada. Tool-grinding machine. 1,624,259; Apr. 12.

Lanz, Heinrich, Aktiengesellschaft. (See Huber, Fritz, assignor.)

Larkin, Walter, Norristown, assignor to Fidelity Machine Company, Philadelphia, Pa. Striping attachment for knitting machines. 1,624,792; Apr. 12.

Larson, Adolph S., North Lake, Wis. Lifting jack. 1,624,106; Apr. 12.

Lathrop, Sherman R. (See Johnson, F. H., and Lathrop.)

Lawrence Sperry Aircraft Company, The. (See Simon, Robert, assignor.)

Lee Rubber & Tire Corporation. (See Leopold, Frederick, jr., assignor.)

Lehwess, Edouard E., St. Cloud, near Paris, France. Projecting machine. 1,624,669; Apr. 12.

Leibovitz, Isidore, New York, N. Y. Belt for personal wear. Des. 72,432; Apr. 12.

Leiman Bros. (See Leiman, George W., assignor.)

Leiman, George W., Newark, N. J., assignor to Leiman Bros., New York, N. Y. Pump. 1,624,607; Apr. 12.

Leiser, William C., Philadelphia, Pa. Rail-fastening device. 1,624,555; Apr. 12.

Lenenberg, Jacob, Baltimore, Md. Dirt and grease cleaning composition. 1,624,055; Apr. 12.

Leopold, Frederick, jr., Harmonville, Pa., assignor to Lee Rubber & Tire Corporation, Conshohocken, Pa. Tire casing or similar article. Des. 72,431; Apr. 12.

Leppke, Louis A., and J. H. Scharf, Omaha, Nebr. Display device. 1,624,741; Apr. 12.

Lerner, Harry, Brooklyn, and A. Ginsburg, New York, N. Y. Casserole cover. Des. 72,430; Apr. 12.

Leuchtenberg, Wm. E. (See Raffloer, Emil, assignor.)

Levy, Gaston J., assignor to Hollywood Chemical Company, Los Angeles, Calif. Recovering metals from solutions. 1,624,172; Apr. 12.

Levy, Harry D., et al. (See Husted, Harry F., assignor.)

Libbey Glass Company, The. (See Abelt, Ernst, assignor.)

Libby, McNeill & Libby. (See Nevills, John J., assignor.)

Lidgerwood Manufacturing Company. (See Dickinson, Merian H., assignor.)

Liljegren, Karl F., Donna, Tex. Water gate. 1,624,748; Apr. 12.

Lilly, William J., Tacoma, Wash., and H. H. Logan, Chicago, Ill. Hoist control. 1,624,260; Apr. 12.

Lilly, William J., Tacoma, Wash., and H. H. Logan, Chicago, Ill. Hoisting-engine control. 1,624,261; Apr. 12.

Lincoln Meter Company. (See Paine, Louis A., assignor.)

Lincoln Rubber Key Company. (See Easterlin, Douglas L., assignor.)

Lindburg, Joseph, Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Fume disposal apparatus for workbenches. 1,624,107; Apr. 12.

Lindner, Arthur C. E. (See Bergstein, S., and Lindner.)

Lindquist, Philip W., Seattle, Wash. Fish-cleaning apparatus. 1,624,173; Apr. 12.

Linley, Alfred A., Fairfield, Conn. Separable cover for universal balljoint cases. 1,624,262; Apr. 12.

Linton, Walter L., Independence, Kans. Vending machine. 1,624,263; Apr. 12.

Lipinski, Zenon A., San Francisco, Calif. Humidifier. 1,624,838; Apr. 12.

Lippert, Samuel, Garfield Heights, assignor to The Outlook Company, Cleveland, Ohio. Motor-driven windshield cleaner. 1,624,264; Apr. 12.

Little, Arthur D., Brookline, and C. E. Carpenter, Melrose, assignors to Arthur D. Little, Inc., Boston, Mass. Paper manufacture. 1,624,492; Apr. 12.

Little, Arthur D., Inc. (See Little, A. D., and Carpenter, assignors.)

Lleo, Alberto, and C. Baradat, Barcelona, Spain, said Baradat assignor to said Lleo. Engine-cylinder structure. 1,624,002; Apr. 12.

Llewellyn, Lester M., and H. G. Pederson, Syracuse, N. Y., said Llewellyn assignor to said Pederson. Counterbalancing device. 1,624,414; Apr. 12.

Logan, Henry H. (See Lilly, W. J., and Logan.)

Logan, Henry H., Chicago, Ill. Shock absorber. 1,624,265 Apr. 12.

Logue, Charles H., Syracuse, assignor to The Gleason Works, Rochester, N. Y. Bevel-gear-testing machine. 1,624,415; Apr. 12.

Lombard, Samuel W., assignor to Lombard Traction Engine Co., Waterville, Me. Snowplow. 1,624,839; Apr. 12.

Lombard Traction Engine Co. (See Lombard, Samuel W., assignor.)

Long, Cornelia T. (See Taylor, A. B., Long, and Sohn.)

Long, William L. (See Scheffey, George B., assignor.)

Lowe, Harry W., deceased, Indianapolis, Ind.; M. W. Lowe, administrator, assignor to J. P. Dalzell, Minneapolis, Minn. Pulp-heating coil. 1,624,749; Apr. 12.

Lowe, Mark W., administrator. (See Lowe, Harry W.)

Lucarelle, Joseph M., and V. L. Frykman, assignors to Dictaphone Corporation, Bridgeport, Conn. Power-transmitting device. 1,624,174; Apr. 12.

Lucas, Jonathan, Savannah, Ga., assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Shuttle mechanism for looms. 1,624,108; Apr. 12.

Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)
Luder, Maude, Asbury Park, N. J. Ankle brace. 1,624,266; Apr. 12.
Lyndon, Lamar, New York, N. Y., and R. I. Blakeslee, Los Angeles, Calif. System and means for dispensing foods and commodities. 1,624,267; Apr. 12.
Macabee, Edward L. and F. E., Hayward, Calif. Brake gauge. 1,624,142; Apr. 12.
Macabee, Fabian E. (See Macabee, Edward L. and F. E.)
McFarland, Alvis M., Wilkinsburg, Pa., assignor to Westinghouse Gear and Dynamometer Company. Reduction gearing. 1,624,416; Apr. 12.
MacGahan, Paul, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Meter casing. 1,624,417; Apr. 12.
MacKaye, Henry D. (See Meikle, G. S., and MacKaye.)
Macleod, Arthur W., London, England. Measuring by volume petrol and other fluids. 1,624,750; Apr. 12.
MacRae, Duncan, East Orange, N. J., assignor to Westinghouse Lamp Company. Incandescent electric lamp. 1,624,109; Apr. 12.
Madsen, Fred T. (See Ray, A. J., Madsen, and Obergfell.)
Magill, Donald G., Brooklyn, assignor to American Can Company, New York, N. Y. Pouring-spout container. 1,624,268; Apr. 12.
Maise, Herman C., assignor to Briggs Manufacturing Company, Detroit, Mich. Window frame. 1,624,608; Apr. 12.
Maise, Herman C., assignor to Briggs Manufacturing Company, Detroit, Mich. Jig. 1,624,609; Apr. 12.
Malin, Ernest C., Fertile, Saskatchewan, Canada. Animal snare. 1,624,063; Apr. 12.
Mallinson, H. R., & Co. Inc. (See Heinke, Alfred J., assignor.)
Mallory, Harry C., deceased, by S. R. Mallory, administratrix, Bellport, N. Y. Expansible collapsible element. 1,624,348; Apr. 12.
Mallory, Sue R., administratrix. (See Mallory, Harry C.)
Malluk, Assad M., assignor to Yankee Lock Corporation, New York, N. Y. Lockable cover for automobile fuel tanks. 1,624,840; Apr. 12.
Maim, Walter R., San Francisco, Calif. Luggage carrier. 1,624,493; Apr. 12.
Mann, John J. and W. J., Oakland, Calif., and M. H. Van Coeverden, San Marcial, N. Mex. Wave motor. 1,624,349; Apr. 12.
Mann, Matthew D., jr., Roselle, and H. M. Weir, Newark, N. J. Contact apparatus. 1,624,793; Apr. 12.
Mann, William J. (See Mann, John J. and W. J., and Van Coeverden.)
Manwaring, Albert H., Noble, Pa. Hydraulic clutch. 1,624,841; Apr. 12.
Marchetti, Paul, San Francisco, Calif. Motor. 1,624,269; Apr. 12.
Marchetti, Paul J. (See Nordwick, H. A., and Marchetti.)
Marsden, John E., Philadelphia, Pa. Electric bread toaster. 1,624,593; Apr. 12.
Marsh, Wellington W., Long Beach, Wash. Collision shield for vehicles. 1,624,418; Apr. 12.
Marshall, Norman, Nashua, N. H., assignor to Remington Arms Company, Inc. Tube polishing or sizing machine. 1,623,965; Apr. 12.
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Pliers. 1,624,556; Apr. 12.
Martin, Albert, New York, N. Y. Ornamenting foodstuffs. 1,624,670; Apr. 12.
Martin, William A., Toronto, Ontario, Canada. Shade holder for electric-lamp sockets. 1,614,794; Apr. 12.
Martus, Martin L., Woodbury, and E. H. Becker and J. G. Ross, Waterbury, Conn. Battery holding and carrying means. 1,614,795; Apr. 12.
Maschinenfabrik Walter & Kuffer. (See Walter A., and Kuttruf, assignors.)
Mason, Howard, Framingham, and W. Bixby and H. L. Bogan, jr., Boston, assignors to Shawmut Engineering Company, Dorchester, Mass. Grinding mechanism. 1,624,494; Apr. 12.
Mastrolia, Daniel, et al. (See Caruso, Romeo O., assignor.)
Mathes, John A., San Diego, Calif. Kerosene vaporizer. 1,624,270; Apr. 12.
Mathes, Robert C., Wyoming, N. J., assignor by mesne assignments to Western Electric Company, Incorporated. Carrier-wave signaling. 1,624,495; Apr. 12.
Mathieu, Harry J., Oakland, Calif. Sound-receiving earpiece. 1,624,144; Apr. 12.
Matson, Oscar A., Chicago, Ill. Spading device. 1,624,610; Apr. 12.
Matthews, J. March, et al. (See Gallagher, George D., assignor.)
Watthews, William C., Palatka, Fla. Lamp for automobiles. 1,624,842; Apr. 12.
Mauser, Alfons, Cologne-Marienburg, Germany. Forming cover-holding ring seats for containers. 1,624,496; Apr. 12.
May, Harry E., assignor to Economy Vaporizer Company, Kansas City, Mo. Fuel vaporizer for internal-combustion engines. 1,624,271; Apr. 12.
McAllister, Ellis H., Moorestown, N. J. Automatic valve adjuster and silencer. 1,624,497; Apr. 12.
McCabe, Charles J., Brooklyn, and I. Schoenholz, Far Rockaway, assignors to McCabe and Schoenholz, Inc., New York, N. Y. Hand bag. 1,624,611; Apr. 12.
McCabe, Charles J., Brooklyn, and I. Schoenholz, Far Rockaway, assignors to McCabe and Schoenholz, Inc., New York, N. Y. Hand bag. 1,624,612; Apr. 12.
McCabe and Schoenholz, Inc. (See McCabe, C. J., and Schoenholz, assignors.)
McCaskill, Frankie L., Louisville, Ky. Pen and pencil holder. 1,623,966; Apr. 12.
McCoubrie, Robert L., Philadelphia, Pa. Clothes wringer attachment. 1,624,419; Apr. 12.
McEntee, Bernard C., and L. H. Constant, Wichita Falls, Tex. Shoe tongue and fastener. 1,624,143; Apr. 12.
McFall, Thurlow E., Sparta, Mich. Piston packing. 1,624,613; Apr. 12.
McGill, Chester T., assignor to Reiter Company, Elgin, Ill. Two-flow base-exchange water softener. 1,624,614; Apr. 12.
McKown, Frederick W., Englewood, and E. Dietze, Westfield, N. J., assignors to American Telephone and Telegraph Company. Telephone substation circuits. 1,624,056; Apr. 12.
McKown, Frederick W., Englewood, and E. Dietze, Westfield, N. J., assignors to American Telephone and Telegraph Company. Telephone substation circuits. 1,624,057; Apr. 12.
McMillan, Albert M., Riverdale, Md. Printing-press chase. 1,624,751; Apr. 12.
McQuinn, Thomas H., Preston, Melbourne, assignor of two-thirds to H. M. Sargood, Toorak, Victoria, Australia. Electric water heater. 1,624,843; Apr. 12.
Weikle, George S., and H. D. MacKaye, Detroit, Mich. Oil burner. 1,624,350; Apr. 12.
Menzies, William E., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Battery-charging system. 1,624,420; Apr. 12.
Mercier, Charles H., Pittsfield, Mass. Portable clothes-rack. 1,624,796; Apr. 12.
Metz, H. A., Laboratories, Inc. (See Dublin, Harry E., assignor.)
Meyer, Henry D., Milford, Ill. Road drag. 1,624,421; Apr. 12.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Making tire casings. 1,624,615; Apr. 12.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Beveling and sealing clamp. 1,624,616; Apr. 12.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Beveling and sealing clamp. 1,624,617; Apr. 12.
Miller, Charles F., Moore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Mechanical stoker. 1,624,004; Apr. 12.
Miller Company, The. (See Wolter, Herman H., assignor.)
Miller, John T., and M. Hanley, Chicago, Ill. Circuit-controlling mechanism. 1,624,059; Apr. 12.
Miller, Robert B., Jackson Heights, assignor to Western Electric Company, Incorporated, New York, N. Y. Dial-testing circuit. 1,624,422; Apr. 12.
Miller Rubber Company, The. (See Bulley, George W., assignor.)
Miller Rubber Company, The. (See Fenton, Frank, assignor.)
Miller Rubber Company, The. (See Steele, C. W., and Griffiths, assignors.)
Milton, Melvin L., Denver, Colo. Submerged pumping unit. 1,624,423; Apr. 12.
Mitchell, Alfred H., deceased, Plumstead, by H. O. Burge, executor, Brentwood, assignor to Henry Simon Limited, Manchester, England. Pneumatic elevator. 1,624,424; Apr. 12.
Mitchell, John, and J. C. G. Cossey, London, England. Brake-slack adjuster for vehicles. 1,624,752; Apr. 12.
Miyasaki, Yuske, Kansas City, Mo. Hand-brake mechanism for railway cars. 1,624,425; Apr. 12.
Mobley, George O., Heath Springs, S. C. Combined statement and ledger sheet. 1,624,618; Apr. 12.
Moffat, Henry E., Detroit, Mich. Water heater and purifier. 1,624,557; Apr. 12.
Mohr, Franklin, New York, N. Y., assignor, by mesne assignments, to Western Electric Company, Incorporated. Modulating system. 1,624,498; Apr. 12.
Monckmeier, Gustav C., Chicago, Ill., Wear-compensating bolt. 1,624,499; Apr. 12.
Moncreiffe, Malcolm, Big Horn, Wyo. Tractor. 1,624,110; Apr. 12.
Mongelli, Giuseppe A., Philadelphia, Pa. System of tailoring. 1,624,894; Apr. 12.
Monitor Controller Company. (See Whittingham, George H., assignor.)
Montfort, Adolph, Chicago, Ill. Stringed musical instrument. Des. 72,433; Apr. 12.
Moore, Callie F., et al. (See Gallagher, George D., assignor.)
Moore, Charles R., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone transmitter. 1,624,351; Apr. 12.
Moore, Charles R., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone transmitter. 1,624,352; Apr. 12.

Moore, Charles R., Maplewood, N. J., and J. M. Hayward, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y. Double-diaphragm transmitter. 1,624,353; Apr. 12.
Moore, Charles W. (See Ryder, P. H., and Moore.)
Moore, Lee R., Kansas City, Mo. Tire patch. 1,624,619; Apr. 12.
Moore, William D., Birmingham, Ala., assignor to Sand Spun Patents Corporation, Wilmington, Del. Method and apparatus for freeing centrifugally-cast castings from molds or flasks. 1,624,354; Apr. 12.
Morehouse, Samuel C., New Haven, Conn. Sleeping mat. 1,624,797; Apr. 12.
Moreno, Juan de D., San Francisco, Calif. Reversible comb. 1,624,758; Apr. 12.
Moross, Joseph A., Detroit, Mich. Producing imitation marble. 1,623,967; Apr. 12.
Morris, Guy T. (See Richard, C. D., and Morris.)
Morris, Howard A. (See Aldrich, J. P., and Morris.)
Morris, Howard I., Lakewood, assignor to Cord Tire Machine Company, Cleveland, Ohio. Apparatus for winding material. 1,624,272; Apr. 12.
Morris, William L., assignor to Gulbransen Company, Chicago, Ill. Reproduction of music. 1,623,968; Apr. 12.
Morse Chain Company. (See Morse, Frank L., assignor.)
Morse, Frank L., Ithaca, N. Y., assignor to Morse Chain Company. Power drive chain. 1,624,058; Apr. 12.
Mosher, George M., Jenkins Township, Mitchell County, Iowa. Combination power-transmission device. 1,624,145; Apr. 12.
Mueller, Moritz L., Seattle, Wash., assignor to Northwest Blower Kiln Company, Portland, Oreg. Drying system. 1,624,754; Apr. 12.
Mullally, Walter J., Chicago Heights, assignor to American Manganese Steel Company, Chicago, Ill. Heavy-tension lap-link chains. 1,624,111; Apr. 12.
Mumaw, John H., J. B. Schnieders, and W. G. Haas, assignors, by mesne assignments, to Universal Specialty Company, Dayton, Ohio. Brush holder. 1,624,426; Apr. 12.
Murdock, John C., Binghamton, N. Y. Paper holder. 1,624,427; Apr. 12.
Murphy, Daniel C., Scobey, Mont. Receptacle. 1,624,273; Apr. 12.
Murphy, Howard M., Philadelphia, Pa. Pipe-cleaning means. 1,624,755; Apr. 12.
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Murray, Albert L., Auburn, Ind. Composite rubber sole. 1,624,500; Apr. 12.
Murray, Thomas E. Brooklyn, N. Y. Wheel and brake drum. 1,624,112; Apr. 12.
Murray, Vincent J., jr., Philadelphia, Pa. Nursing-bottle holder. 1,624,355; Apr. 12.
Muther Manufacturing Company. (See Cowdrey, Charles F., assignor.)
Myers, Bon E., Sioux City, Iowa. Store-front construction. 1,624,620; Apr. 12.
Myrdal, John M., Trail, Ontario, Canada. Doweling machine. 1,614,274; Apr. 12.
N. V. Nederlandsche Installatie Maatschappij Therma. (See Petersen, Alfred O. H., assignor.)
Nabatedt, Arthur T., New Haven, Conn. Reversing gear. 1,624,756; Apr. 12.
Naito, Hide, Portland, Oreg. Hair clip. 1,624,428; Apr. 12.
Nanterme, Joseph, Lyon, France. Machine for inspecting a piece of tissue, measuring its length, and folding it. 1,624,060; Apr. 12.
National Carbon Company. (See Armstrong, George W., assignor.)
National Carbon Company. (See Heise, G. W., Thompson, and Chaney, assignors.)
National Carbon Company. (See Yngve, Victor, assignor.)
National Cash Register Company, The. (See Von Pein, Edward J., assignor.)
National Lock Co. (See Aldeen, Wilhelm G., assignor.)
National Surety Company. (See Kirkegaard, Georg, assignor.)
Naugatuck Chemical Company, The. (See Teague, Merwyn C., assignor.)
Naugle, Ingle R., Anna, Ohio. Ash tray. 1,624,621; Apr. 12.
Neher, Noah N., Los Angeles, Calif. Manifold cut-off for internal-combustion engines. 1,624,275; Apr. 12.
Neilson, Albert H., Tulsa, Okla. Packing for oil-well pumps. 1,624,798; Apr. 12.
Neilson, Albert H., Tulsa, Okla. Sucker-rod elevator. 1,624,799; Apr. 12.
Nelson, Christy, Square Butte, Mont. Sanitary cover and strainer for milk pails. 1,624,276; Apr. 12.
Nelson, Emil A., Detroit, Mich. Welding. 1,624,501; Apr. 12.
Nelson, Emil A., Abington, assignor to Budd Wheel Company, Philadelphia, Pa. Lifting lever for disk wheels. 1,624,356; Apr. 12.
Nelson, Horace O. (See Stokes, Thomas J., assignor.)
Nelson, Victor E., Redford, Mich. Packing ring. 1,624,671; Apr. 12.
Nesseler, Karl P., Elizabeth, N. J. Musical instrument. 1,624,061; Apr. 12.
Netter, Jacob, assignor to Theonett & Co., Chicago, Ill. Bottle. Des. 72,434; Apr. 12.

Nevills, John J., Sacramento, Calif., assignor to Libby McNeill & Libby, Chicago, Ill. Feeder. 1,624,175; Apr. 12.
New Departure Manufacturing Co., The. (See Vuilleumier, Albert, assignor.)
New Jersey Chain Corporation. (See Prestinari, Eugen, assignor.)
Newton, Albert E., Providence, assignor to Rhode Island Lace Works, Inc., West Barrington, R. I. Lace. Des. 72,435; Apr. 12.
Newton, Albert E., Providence, assignor to Rhode Island Lace Works, Inc., West Barrington, R. I. Lace. Des. 72,436; Apr. 12.
Newton, Albert E., Providence, assignor to Rhode Island Lace Works, Inc., West Barrington, R. I. Lace. Des. 72,437; Apr. 12.
Newton, Albert E., Providence, assignor to Rhode Island Lace Works, Inc., West Barrington, R. I. Lace. Des. 72,438; Apr. 12.
Nichols, John F., assignor to Crompton Company, Crompton, R. I. Pile fabric. Des. 72,439; Apr. 12.
Nichols, John F., assignor to Crompton Company, Crompton, R. I. Pile fabric. Des. 72,440; Apr. 12.
Nickerson, Gertrude L., assignor to The Warner Brothers Company, Bridgeport, Conn. Combination undergarment. 1,624,558; Apr. 12.
Nicolson, Alexander M., assignor to Western Electric Company, Incorporated, New York, N. Y. Phonic diaphragm. 1,624,357; Apr. 12.
Niederbayerische Cellulosewerke. (See Schneider, Adolf, assignor.)
Nilson, A. H., Machine Co., The. (See Olson, Mauritz, assignor.)
Nitardy, Ferdinand W., Brooklyn, assignor to E. R. Squibb and Sons, New York, N. Y. Preservation of oils. 1,624,358; Apr. 12.
Noga, Wladyslaw, Detroit, Mich. Silk and yarn thread tensioning and waxing devices. 1,624,844; Apr. 12.
Nordfors, Conrad. (See Wood, H. A. W., and Nordfors.)
Nordwick, Henry A., and P. J. Marchetti, Stockton, assignor to Duplex Motor Company, San Francisco, Calif. Internal-combustion engine. 1,624,277; Apr. 12.
Northrop, George E., assignor to Red Star Appliances, Inc., Stamford, Conn. Mailing machine. 1,624,899; Apr. 12.
Northwest Blower Kiln Company. (See Mueller, Moritz L., assignor.)
Novick, Abraham, Flushing, assignor to F. L. Smithe Machine Co., Inc., New York, N. Y. Liquid-level gauge. 1,624,359; Apr. 12.
Norviel, Harry E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Ignition apparatus. 1,624,113; Apr. 12.
Norviel, Harry E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Control fixture. 1,624,114; Apr. 12.
Nyberg, Herman D., Norrkoping, Sweden. Galvanic cell. 1,624,845; Apr. 12.
Obergfell, Herbert F. (See Ray, A. J., Madsen, and Obergfell.)
Obergfell, Herbert F., River Forest, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic switch mounting. 1,624,502; Apr. 12.
O'Connell, John J., assignor to Hopedale Manufacturing Company, Milford, Mass. Temple roll. 1,624,503; Apr. 12.
O'Connor, George B., New York, N. Y. Hair-waving comb. 1,624,757; Apr. 12.
O'Connor, Thomas E., Minneapolis, Minn. Burglar alarm. 1,624,176; Apr. 12.
Oil Appliance Manufacturing Corporation. (See Shipley, Marion R., assignor.)
Oliver, Fay, Whittier, Calif., assignor to Elliott Core Drilling Company. Core drill. 1,624,146; Apr. 12.
Oliver, Walter E., Woodcliff, N. J. Rotary printing press. 1,624,062; Apr. 12.
Olsen, Carl G., and F. W. England, assignors to Illinois Tool Works, Chicago, Ill. Hob-grinding machine. Re16,590; Apr. 12.
Olsen, Oscar, Boyceville, Wis. Axle attachment. 1,624,278; Apr. 12.
Olson, Mauritz, assignor to The A. H. Nilson Machine Co., Bridgeport, Conn. Chain-making machine. 1,624,063; Apr. 12.
O'Neill, Henry W., Elmhurst, assignor to Western Electric Company, Incorporated, New York, N. Y. Communication system. 1,624,672; Apr. 12.
O'Neill, Patrick S., Aicken's Township, Westland, New Zealand. Breaking-down saw. 1,624,064; Apr. 12.
Oppenheim, Ferdinand S., New York, N. Y. Container. 1,624,360; Apr. 12.
Optische Anstalt C. P. Goerz Aktiengesellschaft. (See Humbrecht, Jules, assignor.)
Orange Lighting Fixture Manufacturing Co. (See Siedell, Alfred P., assignor.)
Orr, William S., assignor, by mesne assignments, to Central Alloy Steel Corporation, Massillon, Ohio. Mechanism for operating ore-bin gates. 1,624,177; Apr. 12.
Ortiz-Escofet, Juan. (See Triana, André E. L. and R. J. A., and Ortiz-Escofet.)
Osborn, Lemon L., Los Angeles, Calif. Hydrodynamic power machine. 1,624,115; Apr. 12.
Osborn, Warren M., Chicago, Ill. Rail chair. Re16,592; Apr. 12.

Osnos, Mendel, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Circuit arrangement for high-frequency sending stations. 1,624,006; Apr. 12.

Osnos, Mendel, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Frequency changer for short waves. 1,624,065; Apr. 12.

Osnos, Mendel, and L. Kasarnowsky, assignors to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Wireless signaling. 1,624,005; Apr. 12.

Ottensener Waagenfabrik Albert Essmann & Co., The. (See Essmann, Heinrich A., assignor.)

Outlook Company, The. (See Lippert, Samuel, assignor.)

Ow, Joseph W. W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Lifting truck for circuit-breaker tanks. 1,624,361; Apr. 12.

Owen, Tom M., Wallace, and M. P. Dalton, Mullan, Idaho. Flotation apparatus. 1,624,559; Apr. 12.

P & M Company, The. (See Warr, Harold G., assignor.)

Packer, Eldredge H., San Francisco, Calif. Piston ring. 1,624,279; Apr. 12.

Paige, Arthur E., Philadelphia, Pa. Radiocommunication. 1,624,673; Apr. 12.

Paine, Louis A., assignor to Lincoln Meter Company, Limited, Toronto, Ontario, Canada. Alternating-current meter. 1,624,178; Apr. 12.

Palka, Andrew, Detroit, Mich. Radiator casing. Des. 72,441; Apr. 12.

Palmer, Elton J. (See Pectal, O. J., and Palmer.)

Palmer, Essie R., Savannah, Ga. Automobilist's glove. 1,624,429; Apr. 12.

Palmer, James A., assignor to Taunton Pearl Works, Inc., Taunton, Mass. Teething device for infants. 1,623,969; Apr. 12.

Parke Davis & Company. (See Dox, Arthur W., assignor.)

Parkersburg Rig & Reel Company, The. (See Schwemlein, William, assignor.)

Parkhurst, Karl C., Wichita, Kans. Traffic signal. 1,624,900; Apr. 12.

Parsons, Charles A., and S. S. Cook, Newcastle-on-Tyne, England, said Cook assignor to said Parsons. Device suitable for measuring the axial thrust of rotatable shafts. 1,624,430; Apr. 12.

Passer, Hugo W. (See Bohmsack, Harry C., assignor.)

Paterson, Dougald S., Philadelphia, Pa., and G. B. Petsche, Yonkers, N. Y. Filing machine. 1,624,846; Apr. 12.

Patton, Carl B. (See Blaine, J. G., and Patton.)

Paul, A. C., et al, trustees. (See Curtis, Lewis E., assignor.)

Payne, Edward B., Great Neck, assignor to Western Electric Company, Incorporated, New York, N. Y. Inductance coil and manufacturing the same. 1,624,560; Apr. 12.

Pectal, Oliver J., and E. J. Palmer, Philmont, N. Y. Multiple marker and spacer. 1,624,622; Apr. 12.

Pedersen, Herman, Bathbeach, N. Y. Supplying fuel to explosive engines. 1,624,623; Apr. 12.

Pederson, Harold G. (See Llewellyn, L. M., and Pederson.)

Pellow, Charles E., Detroit, Mich. Castellating machine. 1,624,180; Apr. 12.

Pelton Water Wheel Company. (See Hutchinson, E. C., and Foulds, assignors.)

Penberthy, Ernest, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Fluid-pressure tool. 1,624,179; Apr. 12.

Pennsylvania Crusher Company. (See Borton, George W., assignor.)

Percey, Earl E., Jerome, Idaho. Gas generator. 1,624,431; Apr. 12.

Perfect Window Regulator Corporation. (See Goldsmith, B. J., and Koch, assignors.)

Perry, John M., Vosburg, Miss. Check-controlled mechanism. 1,623,970; Apr. 12.

Petersen, Alfred O. H., Altona/Elbe, Germany, assignor to N. V. Nederlandsche Installatie Maatschappij Therma, Amsterdam, Netherlands. Condensing apparatus. 1,624,066; Apr. 12.

Petitclerc, Neri J., St. Louis, Mo. Fuel economizer. 1,624,067; Apr. 12.

Petri-Palmedo, Anna E. E., executor. (See Petri-Palmedo, David.)

Petri-Palmedo, David, deceased; A. E. E. Petri-Palmedo, executrix, Berlin-Charlottenburg, Germany, assignor to Standard Compositor Aktiengesellschaft; Berlin, Germany. Matrix-setting and line-casting machine. 1,623,971; Apr. 12.

Petsche, Gustav B. (See Paterson, D. S., and Petsche.)

Petteys, Willard A., Wilcox, Nebr. Dust and chaff collector for grain-elevator heads. 1,624,800; Apr. 12.

Pfarr, John H., Newark, N. J. Flower holder. 1,624,504; Apr. 12.

Philips', N. V., Gloeilampenfabrieken. (See de Boer, Jan H., assignor.)

Phipps, John M. (See Williams, Willard C., assignor.)

Pierce, Howard W., Butte, Mont., assignor to L. M. Stellmann, Onondaga County, N. Y. Piston and piston-pin construction. 1,623,972; Apr. 12.

Pierce, Josiah, executor. (See Pierce, Vinton U. D.)

Pierce, Vinton U. D., deceased, Asheville, N. C., J. Pierce, executor. Internal-combustion engine. 1,624,432; Apr. 12.

Pillet, Aglibert, Buenos Aires, Argentina. Hame for draft horses or mules. 1,624,624; Apr. 12.

Pillsbury, Franklin H., Arlington, N. J. Textile fabric. Des. 72,442; Apr. 12.

Pitman, Henry L., Westfield, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,624,068; Apr. 12.

Plum, Stephen H., 2d, Madison, and A. Ackley, Camden, N. J., assignors to American Typefounders Company. Sheet-feeding mechanism. 1,624,069; Apr. 12.

Poeppel, Emil O. H., Chicago, Ill. Radiator relief valve. 1,624,362; Apr. 12.

Poindexter, Robert W., jr., Los Angeles, and P. T. Dolley, Los Angeles County, Calif., assignors to California Cyanide Company, Incorporated, New York, N. Y. Preparing alkali metal cyanides. 1,624,147; Apr. 12.

Pollack, Essye K., New York, N. Y. Bust confiner. 1,623,973; Apr. 12.

Pollak, Alfred, Vienna, Austria. Producing lactic acid from sugar-containing raw materials by means of lactic-acid bacteria. 1,624,674; Apr. 12.

Pooley Company. (See Pooley, Edward F., assignor.)

Pooley, Edward F., assignor to The Pooley Company, Philadelphia, Pa. Radiocabinet. Des. 72,443; Apr. 12.

Pooley, Edward F., assignor to The Pooley Company, Philadelphia, Pa. Radiocabinet. Des. 72,444; Apr. 12.

Post, Claude L., Chicago, Ill. Clamping means for printing slugs and the like. 1,623,974; Apr. 12.

Post, Claude L., Chicago, Ill. Printing apparatus. 1,623,975; Apr. 12.

Post, Claude L., Chicago, Ill. Feeding mechanism. 1,623,976; Apr. 12.

Powell, Edwin L., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Signal receiving circuits. 1,624,148; Apr. 12.

Powell, Hezekiah, Kansas City, Mo., and W. P. Groves, Edwardsville, Kans. Electric shoe cleaning and polishing machine. 1,624,758; Apr. 12.

Powers, Donald H. (See Elley, H. W., and Powers.)

Pratt, Arthur D. (See Jacobus, D. S., and Pratt.)

Pratt, Ernest C., Minneapolis, Minn. Mining coal. 1,624,505; Apr. 12.

Preiswerk, Ernst, Basel, Switzerland, assignor to The Hoffmann-La Roche Chemical Works, New York, N. Y. O-O-Diacyl derivatives of diphenolisatine and manufacture of same. 1,624,675; Apr. 12.

Prestinari, Eugen, Pawtucket, R. I., assignor to New Jersey Chain Corporation, Newark, N. J. Bracelet hook. 1,624,561; Apr. 12.

Preston, Francis W. (See Taylor, W., and Preston.)

Preston, George E. (See Colbert, C. C., and Preston.)

Proctor & Schwartz, Incorporated. (See Hurxthal, Alpheus O., assignor.)

Producers Pictures Corporation, The. (See Kern, George H., assignor.)

Protectolite Co., The. (See Rosemier, George M., assignor.)

Pruden, Harold M., Wyoming, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave signaling system. 1,624,506; Apr. 12.

Purdy, Walter S., Huntington, W. Va., assignor to F. H. Gibbs, trustee, New York, N. Y. Mine car. 1,624,801; Apr. 12.

Putnam, Albert J., and J. W. Wilson, Kalispell, Mont. Artificial bait. 1,624,116; Apr. 12.

Quigan, Frank J., Brooklyn, N. Y. Vanity-case frame. 1,624,070; Apr. 12.

Radio Corporation of America. (See Agate, C. S., and Willans, assignors.)

Radio Corporation of America. (See Carter, Philip S., assignor.)

Radio Corporation of America. (See Clark, George H., assignor.)

Radio Corporation of America. (See Round, Henry J., assignor.)

Radley, Samuel S., Gardner, assignor to Evans Case Co., Attleboro, Mass. Loose-powder container. 1,624,874; Apr. 12.

Ramdor, Emil, Duisberg-on-the-Rhine, Germany, assignor of one-half to W. E. Leuchtenberg, New York, N. Y. Desulphurizing coal, water or mixed gases for illuminating or heating. 1,624,625; Apr. 12.

Rail, Joseph, and H. E. Sprow, Rockville, Ind. Automobile side light. 1,624,433; Apr. 12.

Ransome, Stafford M., assignor to Barber-Colman Company, Rockford, Ill. Nut and screw feed. 1,624,676; Apr. 12.

Rapp, William F., Chicago, Ill. Screen hanger. 1,624,181; Apr. 12.

Rasmusen, Andrew M., Montrose, Colo. T square. 1,624,280; Apr. 12.

Ray, Arthur J., Chicago, Ill.; F. T. Madsen, Green Bay, Wis.; and H. F. Obergfell, River Forest, Ill., assignors, by mesne assignments, to Automatic Electric, Inc., Chicago, Ill. Automatic telephone system. 1,624,007; Apr. 12.

Reach, George A. (See Barrett, William, assignor.)

Reap, Stephen J., Olyphant, Pa. Cage-locking means. 1,624,759; Apr. 12.

Rebell, Fred, North Fremantle, Australia. Concrete reenforcing bond and connecter. 1,624,802; Apr. 12.

Rebora, Stephen F., Chicago, Ill. Toaster. 1,624,182; Apr. 12.

Redfield, William C., Cincinnati, Ohio. Typographical machine. 1,624,434; Apr. 12.

Red Star Appliances, Inc. (See Northrop, George E., assignor.)

Redus, James E., Memphis, Tenn. Delinter. 1,624,435; Apr. 12.

Reeves, Milton O., assignor to Reeves-Pulley Company, Columbus, Ind. Variable-speed reduction gearing. 1,624,895; Apr. 12.

Reeves-Pulley Company. (See Reeves, Milton O., assignor.)

Reid, Fred A., St. Louis, Mo. Advertising-display device. 1,624,507; Apr. 12.

Reilly, Frank C., New York, N. Y. Wrench. 1,624,508; Apr. 12.

Reiter Company. (See McGill, Chester T., assignor.)

Remington Arms Company. (See Marshall, Norman, assignor.)

Rex Manufacturing Company. (See Hull, Matthew R., assignor.)

Rey, Augustin, Sains, France. Pump. 1,624,363; Apr. 12.

Reynolds Machine Company, The. (See Steen, James C., assignor.)

Rhode Island Lace Works, Inc. (See Newton, Albert E., assignor.)

Rice, Joseph, assignor to Elevator Company of America, Chicago, Ill. Elevator platform. 1,623,977; Apr. 12.

Richard, Charles D., West New Brighton, and G. T. Morris, assignors to Western Electric Company, Incorporated, New York, N. Y. Coil with multiple adjustments. 1,624,364; Apr. 12.

Richardson, Charles M., and Z. E. Sargisson, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Apparatus for reeling strip material. 1,624,183; Apr. 12.

Richardson, Henry K., East Orange, N. J., assignor to Westinghouse Lamp Company. Affixing coatings on incandescent-lamp filaments. 1,624,071; Apr. 12.

Ricker, Chester S., Indianapolis, Ind. Change-speed governor. 1,624,008; Apr. 12.

Riley, Champlain L., North Plainfield, N. J., assignor to Industrial Associates, Incorporated, New York, N. Y. Method and apparatus for atomization of fluids. 1,624,847; Apr. 12.

Riley, Robert S., assignor to S. Riley Stoker Corporation, Worcester, Mass. Furnace-wall construction. 1,624,009; Apr. 12.

Riley, Robert S., assignor to S. Riley Stoker Corporation, Worcester, Mass. Side-wall construction for furnaces. 1,624,803; Apr. 12.

Riley, S., Stoker Corporation. (See Riley, Robert S., assignor.)

Risberg, Johannes V. M., Sodertelje, assignor to Aktiebolaget Baltic, Stockholm, Sweden. Self-adjusting centrifugal bowl. 1,624,117; Apr. 12.

Rissler, Albin P., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake beam and constructing the same. 1,624,509; Apr. 12.

Ritchie, W. C., & Company. (See Stock, Julius A., assignor.)

Röber, Constantin F., assignor to "Universelle" Cigarettenmaschinenfabrik J. C. Muller & Co., Dresden, Germany. Device for intermittently driving cigarette-machine shafts. 1,623,978; Apr. 12.

Robinson, Francis T., Brooklyn, assignor to Arkell Safety Bag Company, New York, N. Y. Bag or lining. 1,624,626; Apr. 12.

Robinson, Thomas T., assignor to Bridgeport Brass Company, Bridgeport, Conn. Tube-bending machine. 1,624,804; Apr. 12.

Rollman, Michael A., Mount Joy, Pa. Food receptacle. 1,624,010; Apr. 12.

Rolls-Royce Limited. (See Royce, F. H., and Elliott, assignors.)

Romero, Alfredo L., San Francisco, Calif. Lanterns called personal character reader. 1,624,149; Apr. 12.

Rondi, Victor L., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,624,562; Apr. 12.

Rosemier, George M., assignor to The Protectolite Co., Inc., New York, N. Y. Automobile light. 1,624,436; Apr. 12.

Rosenberg, Abraham, Far Rockaway, N. Y. Producing apparel ornaments. 1,624,805; Apr. 12.

Ross, Ernest. (See Farrand, C. L., Ross, and Godley.)

Ross, Harry M., assignor of one-half to Beveridge Paper Company, Indianapolis, Ind. Mottling device for paper making. 1,624,184; Apr. 12.

Ross, James G. (See Martus, M. L., Becker, and Ross.)

Rossi, Angelo, Santa Rosa, Calif. Valve-operating structure for motor cycles. 1,624,365; Apr. 12.

Rothschild, Max, New York, N. Y., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,445; Apr. 12.

Rothschild, Max, New York, N. Y., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,446; Apr. 12.

Rothschild, Max, New York, N. Y., assignor to Susquehanna Silk Mills. Textile fabric. Des. 72,447; Apr. 12.

Round, Henry J., London, England, assignor to Radio Corporation of America. Wireless receiving circuits. 1,624,185; Apr. 12.

Roudanez, Georges, assignor, by mesne assignments, to L. J. Roudanez, Chicago, Ill. Bolt-locking device. 1,624,563; Apr. 12.

Roudanez, Lucille J. (See Roudanes, Georges, assignor.)

Rowley, James H., assignor to The Sykes Company, Chicago, Ill. Door structure. 1,624,760; Apr. 12.

Royal Typewriter Company. (See Degener, Gustavo O., assignor.)

Royce, Frederick H., and A. G. Elliott, West Wittering, near Chichester, assignors to Rolls-Royce Limited, Derby, England. Support of aero engines. 1,624,761; Apr. 12.

Royston Paper Company, The. (See Atkinson, Thomas M., assignor.)

Ruddick, John J., West Newton, Mass. Trolley switch. 1,624,011; Apr. 12.

Ruddick, John J., West Newton, Mass. Trolley switch. 1,624,012; Apr. 12.

Rudge-Whitworth Limited. (See Heathcote, Henry L., assignor.)

Rushton, Eugene R., Madison, Wis. Producing arsenic compounds. 1,624,281; Apr. 12.

Russell, Leon L., Livermore Falls, Me. Game. 1,624,282; Apr. 12.

Rüttenauer, Alfred, Charlottenburg, Berlin, and G. Galdies, Pankow, Berlin, Germany, assignors to General Electric Company. Reflector lamp. 1,624,762; Apr. 12.

Rutz, Frank C., Rockford, Ill. Hand brake for railway cars. 1,624,510; Apr. 12.

Ryan, John J., Chicago, Ill. Valve. 1,624,186; Apr. 12.

Ryder, Parmly H., and C. W. Moore, Bucyrus, Ohio, assignor to Smokeless Oil Burner Company. Oil burner. 1,624,806; Apr. 12.

Ryding, Herbert C., and A. B. Haswell, Birmingham, Ala. Heating furnace. 1,624,763; Apr. 12.

St. John, Ancel, Brooklyn, N. Y., assignor to Union Carbide & Carbon Research Laboratories, Inc. X-ray filter. 1,624,443; Apr. 12.

Sale, Burt, Riverside, Calif. Nut lock. 1,624,764; Apr. 12.

Salmi, Johan P., Chicago, Ill. Saw. 1,624,072; Apr. 12.

Sand Spun Patents Corporation. (See Moore, William D., assignor.)

Sargisson, Zaccheus E. (See Richardson, C. M., and Sargisson.)

Sargood, Harry M. (See McQuinn, Thomas H., assignor.)

Savio, Ignazio, Genoa, Italy. Dinner table on ships. 1,624,437; Apr. 12.

Schaap, Alexander K., jr., Brooklyn, assignor to The Schaap-Durant Control Corporation, New York, N. Y. Liquid-level gauge. Re16,589; Apr. 12.

Schaap-Durant Control Corporation. (See Schaap, Alexander K., jr., assignor.)

Schaeffer, Dorman, Helena, Mont. Riding toy. 1,624,627; Apr. 12.

Schaeffer, Dorman, Helena, Mont. Riding toy. 1,624,628; Apr. 12.

Schaffer & Goldberg. (See Goldberg, Carl M., assignor.)

Scharf, John H. (See Leppke, L. A. and Scharf.)

Scheffey, George B., Weehawken, N. J., assignor to W. L. Long, Roanoke Rapids, N. C. Labeling mechanism. 1,624,366; Apr. 12.

Scheffey, George B., Weehawken, N. J., assignor to W. L. Long, Roanoke Rapids, N. C. Cut-off mechanism. 1,624,367; Apr. 12.

Scherer, John, Marinette, Wis. Lumber gauge. 1,624,150; Apr. 12.

Schildknecht, Leo, assignor to Landis Machine Company, St. Louis, Mo. Stitch remover. 1,624,013; Apr. 12.

Schinner, Joseph A., Greenfield, Ohio. Pneumatic pad. 1,624,807; Apr. 12.

Schlafly, Julius H., Canton, Ohio, assignor to Central Alloy Steel Corporation, New York, N. Y. Metal-lath-attaching clip. 1,624,187; Apr. 12.

Schmeh, William C., Park Ridge, N. J. Target game. 1,624,765; Apr. 12.

Schnaier, Milton, New York, N. Y. Apparatus for freezing and molding confections. 1,624,678; Apr. 12.

Schnaier, Milton, New York, N. Y. Apparatus for freezing and molding confections. 1,624,679; Apr. 12.

Schneider, Adolf, assignor to Niederbayerische Cellulosewerke, Kelheim-on-the-Danube, Germany. Apparatus for vaporizing liquids. 1,624,014; Apr. 12.

Schneider, Hermann. (See Straub, F., and Schneider.)

Schnieders, John B. (See Mumaw, J. H., Schnieders, and Haas.)

Schoenholz, Irving. (See McCabe, C. J., and Schoenholz.)

Scholl, William T., Oakland City, Ind. Oral kit. 1,624,015; Apr. 12.

Scholten, George W., Muscatine, Iowa. Ham presser. 1,624,808; Apr. 12.

Schroder, William, Covington, Ky., assignor to The Sebastian Lathe Company, Cincinnati, Ohio. Fastening device. 1,624,766; Apr. 12.

Schroeder, Simon E., Oak Park, Ill. Wringer. 1,624,073; Apr. 12.

Schuck, Anthony G., Los Angeles, Calif. Ventilating apparatus. 1,624,016; Apr. 12.

Schussler, Charles, Blue Island, Ill. Car-door opening and closing mechanism. 1,624,680; Apr. 12.

Schwarber, Henry, Weehawken, N. J. Embroidered lace medallion. Des. 72,448; Apr. 12.

Schwarz, Ernest M., Philadelphia, Pa. Window screen. 1,624,368; Apr. 12.

Schwemlein, William, assignor to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Bolt. 1,624,767; Apr. 12.

Schweyer, Daniel H., Easton, Pa. Automatic train control. 1,624,118; Apr. 12.

Schwieger, Adolf, Hanover, Germany. Tin with tightly-closing cover. 1,624,901; Apr. 12.
Scott, Aaron A., Tigrett, Tenn. Incubator. 1,624,629; Apr. 12.
Scott, Guy F., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Inclosed receptacle. 1,624,438; Apr. 12.
Scott, Lewis L., St. Louis, Mo. Combined boiler and incinerator system. 1,624,681; Apr. 12.
Seaholm, Ernest W., Detroit, Mich. Radiator cap. Des. 72,449; Apr. 12.
Sealock, John W., and M. De Graaf, Grand Rapids, Mich., assignors to Wolverine Metal Specialties Co. Closure-swinging device. 1,624,677; Apr. 12.
Sears, Edward M., Yakima, Wash. Removing residual poisons from fruit. 1,624,074; Apr. 12.
Sebastian Lathe Company, The. (See Schroder, William, assignor.)
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture husk or similar article. Des. 72,450; Apr. 12.
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture arm. Des. 72,451; Apr. 12.
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Chandelier. Des 72,452; Apr. 12.
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Backplate for lighting fixture. Des. 72,453; Apr. 12.
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Lighting-fixture plate. Des. 72,454; Apr. 12.
Selective Treatment Company Limited. (See Dolbear, S. H., and Eastman, assignors.)
Selective Treatment Company Limited. (See Dolbear, S. H., and Zachert, assignors.)
Sell, Helmut, Berlin-Siemensstadt, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, Germany. Microphonic relay. 1,624,511; Apr. 12.
Senat, Herbert D., Glen Olden, Pa. 1,624,439; Apr. 12.
Senter, James D., et al. (See Bobbitt, Conrad E., assignor.)
Serra, Julius H., West New Brighton, N. Y. Concrete wall construction and block therefor. 1,624,369; Apr. 12.
Sewell, John B., Zanesfield, Ohio. Snow-clearing apparatus for automobiles. 1,624,809; Apr. 12.
Shackelton, William J., Scotch Plains, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Inductance device and manufacturing the same. 1,624,630; Apr. 12.
Shapiro, Philip C., assignor to Siegel Light Supply Company, Philadelphia, Pa. Smoking stand. Des. 72,455; Apr. 12.
Shardlow, Harry, assignor to Solar Lighting Fixture Co., Los Angeles, Calif. Lighting-fixture bracket. Des. 72,456; Apr. 12.
Shartle, Charles W., Middletown, Ohio. Stock beater. 1,624,875; Apr. 12.
Shawmut Engineering Company. (See Mason, H., Bixby, and Bogan, jr., assignors.)
Shea, Timothy E. (See Johnson, K. S., and Shea.)
Shea, Timothy E., Rutherford, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Electrical network. 1,624,682; Apr. 12.
Shetzline, Samuel R., jr., Philadelphia, Pa., and E. A. Dodelin, Moorestown, N. J. Shoe-lace fastener. 1,624,564; Apr. 12.
Shevlin, Joseph, P., assignor to Aladdin Hydraulic Jack Company, Denver, Colo. Hydraulic jack. 1,624,151; Apr. 12.
Shields, Carl E., Rock Island, Ill. Toaster. 1,624,017; Apr. 12.
Shields, George A., Columbus, Ohio. Apparatus for making transparent sheet glass. 1,624,283; Apr. 14.
Shimer, William R., Bethlehem, Pa., assignor to Bethlehem Steel Company. Steel of high-temperature stability. 1,624,075; Apr. 12.
Shipley, Elmer E., Washington, D. C., Window-cleaning device. 1,624,284; Apr. 12.
Shipley, Grant B., Pittsburgh, Pa. Wood-treating apparatus. 1,623,979; Apr. 12.
Shipley, Marion R., Manhattan Beach, assignor, by mesne assignments, to Oil Appliance Manufacturing Corporation, Los Angeles, Calif. High-pressure cock having automatic seating plug. 1,624,512; Apr. 12.
Short, William J., Heber Springs, Ark. Automatic carburetor adjustment. 1,624,631; Apr. 12.
Siders, Chauncy A., Twelve Mile, Ind. Log-loading truck. 1,624,285; Apr. 12.
Siegel Light Supply Company. (See Shapiro, Philip C., assignor.)
Siemens & Halske Aktiengesellschaft. (See Sell, Helmut, assignor.)
Simkins, Clifford E. J., San Francisco, Calif. Device for lifting assembly elevators. 1,624,119; Apr. 12.
Simmons, Frank L., assignor to The Taft-Peirce Manufacturing Company, Woonsocket, R. I. Magnetic bar pole chuck. 1,624,076; Apr. 12.
Simon, Henry, Limited. (See Mitchell, Alfred H., assignor.)
Simon, Robert, assignor to The Lawrence Sperry Aircraft Company, Farmingdale, N. Y. Device for launching and landing airplanes from and upon suspended positions. 1,624,188; Apr. 12.
Simond, Walter A. (See Stroud, P. G., and Simond.)
Simpson, Bryant, Washington, D. C. Tailor's measure. 1,624,768; Apr. 12.
Sivian, Leon J. (See Fletcher, H., and Sivian.)
Skok, Lawrence, assignor to The Apex Spring Cover Company, Cleveland, Ohio. Metal casing for leaf springs. 1,624,683; Apr. 12.
Slater, Harry, Hawthorne, Calif. Air-operated device. 1,624,018; Apr. 12.
Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Voltage regulator. 1,624,370; Apr. 12.
Slezak, Vincent, Chicago, Ill. Measuring and weighing device. 1,624,019; Apr. 12.
Small, John S., New York, N. Y. File. 1,623,980; Apr. 12.
Small, John S., Topeka, Kans. Paper file 1,623,981; Apr. 12.
Smith & Davis Mfg. Co. (See Duvall, William J., assignor.)
Smith, Andrew, Milwaukee, Wis. Clutch control. 1,624,513; Apr. 12.
Smith, Arthur J., Tappan, assignor to James F. Doolan Manufacturing Corporation, New York, N. Y. Tie Clasp. 1,624,514; Apr. 12.
Smith, Eugene W., New York, N. Y. Combination level. 1,624,684; Apr. 12.
Smith, George M., Cincinnati, Ohio. Spark intensifier for electric currents. 1,623,982; Apr. 12.
Smith, H. Leslie, et al. (See Wilson, John H., assignor.)
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Manifold-web-printing machine. 1,624,685; Apr. 12.
Smith, Louis P., assignor to Ithaca Gun Company, Ithaca, N. Y. Danger signal for firearms. 1,624,876; Apr. 12.
Smith, Louis P., assignor to Ithaca Gun Company, Ithaca, N. Y. Barrel-locking mechanism for break-down guns. 1,624,877; Apr. 12.
Smith, Louis P., assignor to Ithaca Gun Company, Ithaca, N. Y. Hammer-position indicator. 1,624,878; Apr. 12.
Smith, Louis P., assignor to Ithaca Gun Company, Ithaca, N. Y. Barrel-locking device for break-down guns. 1,624,879; Apr. 12.
Smith, Nevin B., Hamburg, Pa. Nipple-threading machine. 1,624,632; Apr. 12.
Smith, Rensselaer J., South Bethlehem, assignor to The Batles-Lite Co., Albany, N. Y. Flash light. 1,624,686; Apr. 12.
Smith, William H., Oakland Calif. Tank-filling means. 1,624,687; Apr. 12.
Smitham, James A., assignor to Valley Iron Works, San Juan, Tex. Head gate. 1,624,152; Apr. 12.
Smithe, F. L., Machine Co., The. (See Novick, Abraham, assignor.)
Smokeless Oil Burner Company. (See Ryder, P. H., and Moore, assignors.)
Snelling, Walter O., Allentown, Pa., assignor to Gasoline Products Company, Inc., New York, N. Y. Treatment of oils. 1,624,848; Apr. 12.
Society of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)
Söderlund, Olof, and T. Boberg, Clapham Park, and N. Testrup, Westminster, assignors to Techno-Chemical Laboratories, Limited, London, England. Removal of water from peat and the like. 1,624,769; Apr. 12.
Sohn, Archie C. (See Taylor, A. B., Long, and Sohn.)
Solar Lighting Fixture Co. (See Shardlow, Harry, assignor.)
Solomon, Samuel N. (See Warren, A., and Solomon.)
South Bend Watch Company. (See Zesinger, William R., assignor.)
Squibb, E. R., and Sons. (See Nitardy, Ferdinand W., assignor.)
Speer, Alexander S., Buffalo, N. Y., assignor, by mesne assignments, to Central Trust Company of Illinois and A. K. Bodhoidt, Evanston, Ill., trustees. Machine for making shingle strips. 1,623,983; Apr. 12.
Speicher, George J., Miners Mill, Pa. Cover for jars and the like. 1,624,440; Apr. 12.
Spencer, Millard C., East Orange, assignor to Crocker-Wheeler Electric Manufacturing Company, Ampere, N. J. Maintaining motors in definite speed relation. 1,624,880; Apr. 12.
Spencer, Philip L., Millbury, Mass., assignor to J. H. Williams Company, Utica, N. Y. Harness for looms. 1,624,515; Apr. 12.
Spencer, Philip L., Millbury, Mass., assignor to J. H. Williams Company, Utica, N. Y. Shuttle. 1,624,516; Apr. 12.
Spoerri, Eugene D., Omaha, Nebr. Measuring and reeling device. 1,624,633; Apr. 12.
Sport, S. A. Bienne. (See Bovard, Fritz, assignor.)
Sprick, Herbert, Leipzig, Germany. Nut-tapping machine. 1,624,902; Apr. 12.
Springer, John E., and R. A. Harry, Baltimore, Md. Electric switch. 1,624,120; Apr. 12.
Sproesser, William C., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Incandescent electric lamp. 1,624,077; Apr. 12.

Sprow, Henry E. (See Rall, J., and Sprow.)
Stacy, Eugene C., Tiffin, Ohio. Swivel link. 1,624,441; Apr. 12.
Staege, Stephen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Drying machine. 1,624,371; Apr. 12.
Stamp, Burnie A., assignor, by mesne assignments, to Stamp Rightway Conveyor Company, Brooklyn, N. Y. Poultry crate. 1,624,517; Apr. 12.
Stamp Rightway Conveyor Company. (See Stamp, Burnie A., assignor.)
Standard Compositor Aktiengesellschaft. (See Petri-Palmedo, David, assignor.)
Stanley Works, The. (See Cook, Harris J., assignor.)
Starr, Perl L., Chicago, Ill. Grinding tool. 1,624,634; Apr. 12.
Starr, Perl L., Chicago, Ill. Cylinder-grinding tool. 1,624,635; Apr. 12.
Stastny, Rudolph B., Wilber, Nebr. Dandelion grubber. 1,624,442; Apr. 12.
Stebbins, Albert H., Los Angeles, Calif. Air-blast classifier. 1,624,518; Apr. 12.
Stebbins, Albert H., Los Angeles, Calif. Air-blast classifier. 1,624,519; Apr. 12.
Stedefeld, Curt. (See Kruckenberg, F., and Stedefeld.)
Steel, Charles W., and R. T. Griffiths, assignors to The Miller Rubber Company, Akron, Ohio. Method of and apparatus for making hollow articles. 1,624,849; Apr. 12.
Steele, Edward J., Des Moines, Iowa. Valve. 1,624,850; Apr. 12.
Steen, James C., assignor to The Reynolds Machine Company, Massillon, Ohio. Screw-driving machine 1,624,189; Apr. 12.
Steilmann, Louis M. (See Pierce, Howard W., assignor.)
Stewart, Fred W., assignor to United States Glass Company, Pittsburgh, Pa. Light shade or similar article. Des. 72,457; Apr. 12.
Stock, Julius A., Cicero, assignor to W. C. Ritchie & Company, Chicago, Ill. Capping machine. 1,624,286; Apr. 12.
Stockmans, Charles, Antwerp, Belgium. Loose-leaf ledger. 1,624,020; Apr. 12.
Stoddard, Elliott J., Detroit, Mich. Radiator. 1,624,565; Apr. 12.
Stoetzel, Joseph J., Queens Village, assignor to G. & G. Atlas Systems, Inc., New York, N. Y. Pneumatic-tube apparatus. 1,624,078; Apr. 12.
Stoeltzlen, Charles L., Erie, Pa., assignor to Burke Electric Company. Switch lock. 1,624,372; Apr. 12.
Stokes, Thomas J., assignor of one-half to H. O. Nelson, Jefferson, Tex. Air valve. 1,624,021; Apr. 12.
Stoller, Hugh M., Mountain Lakes, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Control regulator. 1,624,566; Apr. 12.
Stone, Edward N., Ogden, Utah, assignor of one-half to Cresson-Morris Company, Philadelphia, Pa. Screen wall for centrifugal baskets. 1,624,287; Apr. 12.
Stone, Edward N., Ogden, Utah, assignor to Cresson-Morris Company, Philadelphia, Pa. Screen wall for centrifugal baskets. 1,624,288; Apr. 12.
Stouffer, Smith A., Kingview, Pa. Road machine. 1,623,984; Apr. 12.
Strand, Henry, Cleveland, Ohio. Portable honing or lapping machine. 1,624,636; Apr. 12.
Straub, Fritz, Basel, and Hermann Schneider, Riehen, near Basel, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuffs and making same. 1,624,637; Apr. 12.
Strecker, Andrew M., Phroso, Okla. Press-wheel boxing for grain drills. 1,624,022; Apr. 12.
Strieby, Maurice E., and C. H. Fetter, Millburn, N. J., assignors to American Telephone and Telegraph Company. Equalization of transmission. 1,624,023; Apr. 12.
Strong, Mildred, S. (See Strong, Robert L., assignor.)
Strong, Robert L., assignor to M. S. Strong, Louisville, Ky. Undergarment. 1,624,444; Apr. 12.
Stroud, Paul G., Belmont, and Walter A. Simond, Franklin, assignors to Acme Knitting Machine & Needle Company, Franklin, N. H. Knitting machine. 1,624,373; Apr. 12.
Strouse, Albert F., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Delivering coal to hoppers of continuous-fuel-feed stokers. 1,624,079; Apr. 12.
Stuart, Etta B., et al., executors. (See Stuart, Robert J.)
Stuart, Robert J., deceased, Poughkeepsie, N. Y.; E. B. Stuart and T. H. Stuart, executors. Table. 1,624,770; Apr. 12.
Stuart, Thomas H., et al., executors. (See Stuart, Robert J.)
Suida, Hermann, Modling, Austria. Concentration of dilute acetic acid. 1,624,810; Apr. 12.
Suida, Hermann, Modling, Austria. Concentration of dilute acetic acid. 1,624,811; Apr. 12.
Suida, Hermann, Modling, near Vienna, Austria. Concentrating dilute acetic acid. 1,624,812; Apr. 12.
Sullivan, Freda D., New York, N. Y. Heating device. 1,624,080; Apr. 12.
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sun Oil Company. (See Thomas, Henry, assignor.)
Sun Shipbuilding & Dry Dock Company. (See Howitz, Alfred A., assignor.)
Susquehanna Silk Mills. (See Bunting, James H., assignor.)
Susquehanna Silk Mills. (See Rothschild, Max, assignor.)
Sutherland, Ernest E., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Electric toaster and grill. 1,624,445; Apr. 12.
Svenson, Ferdinand K., Detroit, Mich. Pneumatic wheel. 1,624,688; Apr. 12.
Svensson, Gustaf. (See Svensson, Oskar and G.)
Svensson, Oskar and G., Daglosen, Sweden. Fuel-feeding device of internal-combustion engines. 1,624,024; Apr. 12.
Swanson, Carl W., Chicago, Ill. Washing-machine cabinet. Des. 72,458; Apr. 12.
Swearingen, Fred, Pueblo, Colo. Automatic gate. 1,624,813; Apr. 12.
Sweetland, Ernest J., Montclair, N. J. Lubricating system of internal-combustion engines. 1,624,689; Apr. 12.
Swoboda, Adolph R., Newark, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Switching device. 1,624,374; Apr. 12.
Swope, Ernest E. (See Black, L. J., and Swope.)
Sykes Company, The. (See Rowley, James H., assignor.)
Symington Company, The. (See Barrows, Donald S., assignor.)
Symington Company, The. (See Kadel, Byers W., assignor.)
Szalla, Dezső, North Tonawanda, N. Y. Automatically-operated garage door. 1,624,814; Apr. 12.
Taft-Peirce Manufacturing Company, The. (See Simmons, Frank L., assignor.)
Taunton Pearl Works, Inc. (See Palmer, James A., assignor.)
Taylor, Arch B., Charlotte, C. T. Long, Winston-Salem, N. C., and A. C. Sohn, Pittsburgh, Pa., assignors to Taylor-Long Company, Charlotte, N. C. Bottle. Des. 72,459; Apr. 12.
Taylor, Halsey W., Warren, Ohio. Drinking fountain. 1,624,081; Apr. 12.
Taylor, Leslie W., Bournemouth, England. Tobacco pipe. 1,624,690; Apr. 12.
Taylor-Long Company. (See Taylor, A. B., Long, and Sohn, assignors.)
Taylor, Mark, Gainesville, assignor of eleven-twentieths to A. W. Beauprie, Atlanta, Ga. Brace plate. 1,624,289; Apr. 12.
Taylor-Wharton Iron and Steel Company. (See Andrews, Charles B., assignor.)
Taylor, William, and F. W. Preston, Leicester, England. Method of and apparatus for polishing. 1,624,290; Apr. 12.
Teague, Merwyn C., Elmhurst, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Machine for dispersing various solids and liquids. 1,624,567; Apr. 12.
Techno-Chemical Laboratories, Limited. (See Söderlund, O., Boberg, and Testrup, assignors.)
Tefft, Ivan D., assignor to The Wahl Company, Chicago, Ill. Fountain pen. 1,624,190; Apr. 12.
Tekell, Louis O. (See Graham, A. J., and Tekell.)
Templeton, William R., Roslindale, Mass. Trap. 1,624,446; Apr. 12.
Tenney, James A. (See Fletcher, O. H., and Tenney.)
Terwilliger, Charles O., Beacon, assignor to F. v. Briesen, trustee, New York, N. Y. Resin and making the same. 1,624,082; Apr. 12.
Terwilliger, Charles O., Bacon, assignor to F. v. Briesen, trustee, New York, N. Y. Resin and making the same. 1,624,638; Apr. 12.
Teusky, Karl, Esslingen-on-the-Neckar, Germany. Clutch. 1,624,025; Apr. 12.
Testrup, Nils. (See Söderlund, O., Boberg, and Testrup.)
Theonett & Co. (See Netter, Jacob, assignor.)
Thiem, Herman C., Rochester, N. Y. Anchoring flange. 1,624,121; Apr. 12.
Thom, James C., Chicago, Ill., assignor to Combination Machine Company, New York, N. Y. Container opener. 1,624,375; Apr. 12.
Thoma, George J., Portland, Oreg. Instantaneous setting of glue between surfaces. 1,624,691; Apr. 12.
Thomas, Henry, Ridley Park, assignor to Sun Oil Company, Philadelphia, Pa. Manufacturing gasoline. 1,624,692; Apr. 12.
Thomas, I. P., & Son Company. (See Wedge, Utley, assignor.)
Thomasen, John T., Carlton, Oreg. Fruit drier. 1,624,639; Apr. 12.
Thompson, Burchard D., Cyclone, assignor of one-half to J. L. Yerdon, Bradford, Pa. Fuel-control means for internal-combustion engines. 1,624,693; Apr. 12.
Thompson, Harry H. (See Heise, G. W., Thompson, and Chaney.)
Thompson, Theodore, assignor of one-half to A. V. Brown, Ely, Minn. Razor-strop stretcher. 1,624,851; Apr. 12.
Tietz, Walter M., Newark, N. J. Razor-blade holder. 1,624,640; Apr. 12.
Toennissen, Ernst, Unterhausen, Germany. Four cylinder drawhead. 1,624,815; Apr. 12.
Toledo Machine and Tool Company. (See Byerlein, Arthur A., assignor.)
Tolhurst, William T. (See Weddell, A., and Tolhurst.)
Trautner, Nicholas W., St. Paul, Minn. Grease retainer. 1,624,852; Apr. 12.

Treviño, Abel C., San Antonio, Tex. Gas producer. 1,624,694; Apr. 12.
Triana, André E. L. and R. J. A., and J. Ortiz-Escofet, Paris, France. Device for projecting stationary or moving pictures in broad daylight. 1,624,816; Apr. 12.
Triana, Rodrigue J. A. (See Triana, André E. L. and R. J. A., and Ortiz-Escofet.)
Trimont Manufacturing Company. (See Kenerson, Joseph E., assignor.)
Troutman, Howard E., Chicago, Ill. Ventilator. 1,624,291 Apr. 12.
Tufenkjian, Andon, West New York, N. J. Nursing-bottle holder. 1,624,695; Apr. 12.
Turner, Archibald J., assignor to Wilson-Western Sporting Goods Co., Chicago, Ill. Baseball glove. 1,624,696; Apr. 12.
Turner, George, Parramatta, and J. E. Bishop, Mosman, near Sydney, New South Wales, Australia. Construction of wheels for road vehicles. 1,624,771; Apr. 12. 1,624,771; Apr .12.
Turner, George A., Stockton, Calif. Inductance-coil frame. 1,624,447; Apr. 12.
Turner Tanning Machinery Company, The. (See Brown, Oscar H., assignor.)
Twight, Edmund H., Fresno, Calif. Food product. 1,624,153; Apr. 12.
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Lindburg, Joseph, assignor.)
Underwood Typewriter Company. (See Pitman, Henry L., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. E., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
Ungerer, Karl F., Pforzheim, Germany. Rolling machine. 1,624,448; Apr. 12.
Union Bag & Paper Corporation. (See Avery, True M., assignor.)
Union Carbide & Carbon Research Laboratories, Inc. (See St. John, Ancel, assignor.)
Union Switch & Signal Company, The. (See Howard, Lemuel F., assignor.)
Union Switch & Signal Company, The. (See Wallace, Herbert A., assignor.)
United Products Corporation of America. (See Biddle, Arthur, assignor.)
United States Glass Company. (See Stewart, Fred W., assignor.)
United States Hoffman Machinery Corporation. (See Geldhof, Peter E., assignor.)
U. S. Industrial Alcohol Co. (See Carter, Ray M., assignor.)
Universal Specialty Company. (See Mumaw, J. H., Schnieders, and Haas, assignors.)
"Universelle" Cigarettenmaschinenfabrik J. C. Muller & Co. (See Röber, Constantin F., assignor.)
Upright, Charles H., Edmonton, Alberta, Canada. Gas burner. 1,624,292; Apr. 12.
Utz, Louis F., assignor to The Freiberg-Simrall Company, Hamilton, Ohio. Sterilizing and wasning machine. 1,624,026; Apr. 12.
Uvalde Rock Asphalt Company. (See Frazier, John W., assignor.)
V. Briesen, Fritz, trustee. (See Terwilliger, Charles O., assignor.)
Valley Iron Works. (See Smitham, James A., assignor.)
Van Coeverden, Marshall H. (See Mann, John J. and W. J., and Van Coeverden.)
Van Deusen, Henry M., Westfield, Mass. Mop. 1,624,641; Apr. 12.
Van Sickle, Della L., Cranford, and W. H. Cavin, Elizabeth, N. J. Barrette. 1,624,449; Apr. 12.
Van Yahres, George, Westbury, N. Y. Filling tree cavities and the filling itself. 1,624,820; Apr. 12.
Veitch, Alexander, McKeesport, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer-coil-spacing device. 1,624,896; Apr. 12.
Venable, William M., Pittsburgh, Pa., assignor to Blaw-Knox Company. Batching apparatus. 1,624,122; Apr. 12.
Venable, William M., Pittsburgh, Pa., assignor to Blaw-Knox Company. Batching apparatus. 1,624,376; Apr. 12.
Venzie, Frederick M., Philadelphia, Pa. Mold for cementitious conduits. 1,624,191; Apr. 12.
Vershbinsky, David, Brooklyn, N. Y. Educational appliance. 1,624,450; Apr. 12.
Victor Talking Machine Company. (See Buckle, Horace L. T., assignor.)
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Wall construction. 1,624,192; Apr. 12.
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Lath spacer. 1,624,193; Apr. 12.
Vollmer, Frederick, Cranford, N. J. Wire-drawing die. 1,624,027; Apr. 12.
Von 'Mach, Maximilian E., Jr., Detroit, Mich. Concrete-block composition. 1,623,985; Apr. 12.
Von Pein, Edward J., assignor, by mesne assignments to The National Cash Register Company, Dayton, Ohio. Cash register. 1,624,123; Apr. 12.
Von Pein, Edward J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Printer. 1,624,124; Apr. 12.
Vuilleumier, Albert, assignor to The New Departure Manufacturing Company, Bristol, Conn. Grinding machine. 1,624,642; Apr. 12.
Wadsworth, Frank L. O., Pittsburgh, Pa. Spring suspension for vehicles. 1,623,986; Apr. 12.
Wadsworth, Frank L. O., Pittsburgh, Pa. Elastic-support system for vehicles. 1,624,643; Apr. 12.
Wadsworth, James M., Fort Worth, Tex. Carbon-removing mechanism for stills. 1,624,083; Apr. 12.
Wagener, William J. (See Cleary, W. F. and Wagener.)
Wagner, Joseph F., South Bend, Ind. Land roller and pulverizer. 1,624,084; Apr. 12.
Wagoner, Todd L., Salina, Kans. Rug-renovating machine. 1,624,293; Apr. 12.
Wahl Clipper Corporation. (See Wahl, Leo J., assignor.)
Wahl Company, The. (See Tefft, Ivan D., assignor.)
Wahl Company, The. (See Wahl, John C., assignor.)
Wahl, John C., Chicago, Ill., assignor to The Wahl Company, Wilmington, Del. Fountain pen. 1,624,194; Apr. 12.
Wahl, Leo J., assignor to Wahl Clipper Corporation, Sterling, Ill. Vibrator. 1,623,987; Apr. 12.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,624,697; Apr. 12.
Wallinsky, Ossip J., Sea Gate, assignor to Whit Luggage Co. Inc., New York, N. Y. Hand bag. Des. 72,403; Apr. 12.
Wallinsky, Ossip J., Sea Gate, assignor to White Luggage Co. Inc., New York, N. Y. Luggage carrier. 1,624,897; Apr. 12.
Walker, George L., assignor to Air Reduction Company, Incorporated, New York, N. Y. Cutting tip or the like. 1,624,377; Apr. 12.
Wallace, George W., San Francisco, and H. K. Ihrig, Berkeley, Calif., said Ihrig assignor to said Wallace. Control system. 1,624,294; Apr. 12.
Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,624,125; Apr. 12.
Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,624,520. Apr. 12.
Wallenberg, Axel E. H., Vasterlosa, Sweden. Thrashing machine. 1,624,126; Apr. 12.
Walten, Ruth B., et al. (See Gallagher, George D., assignor.)
Walter, Arthur, Schweinfurt-on-the-Main, and W. Kutruf, Selingenstadt, near Wurzburg, assignor to Maschinenfabrik Walter & Kuffer, Schweinfurt-on-the-Main, Germany. Harrow. 1,624,521; Apr. 12.
Wanderer-Werke, vorm. Winklhofer & Jaenicke Akt.-Ges. (See Buschmann, Theodor E., assignor.)
Warner Brothers Company, The. (See Nickerson, Gertrude L., assignor.)
Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,624,028; Apr. 12.
Warren, Arthur, Kennington Cross, and S. N. Solomon, Westminster, London, England. Treasury-note cabinet. 1,624,772; Apr. 12.
Watkins, Owen C., Festus, Mo. Weather strip. 1,624,295; Apr. 12.
Watling, John B., Chicago, Ill. Coin-controlled apparatus. 1,624,881; Apr. 12.
Watts, Robert J., Benton Harbor, Mich. Doffer for ironing machines. 1,624,698; Apr. 12.
Waukesha Motor Company. (See Fisher, James B., assignor.)
Wayringer, Henry A., Schenectady, N. Y., assignor to General Electric Company. Silica receptacle and process of manufacture. 1,624,699; Apr. 12.
Weaver, Ross, Forrest City, Ark. Boll-weevil catcher. 1,624,773; Apr. 12.
Weber, Clifford A. M., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Alternating-current motor. 1,624,378; Apr. 12.
Webster Electric Company. (See Hawkins, William W., assignor.)
Weddell, Albert, and W. T. Tolhurst, Tipton, England. Pit tub, wagon, and the like. 1,624,700; Apr. 12.
Wedge, Utley, Ardmore, Pa., assignor to I. P. Thomas & Son Company, Camden, N. J. Producing phophate fertilizer. 1,624,195; Apr. 12.
Wegner, Julius, New York, N. Y. Mechanical movement. 1,624,085; Apr. 12.
Weicker, Herman G., trustee. (See Winckel, Max, assignor.)
Weinhart, Howard W., Elizabeth, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum tube. 1,624,451; Apr. 12.
Weir, Horace M. (See Mann, M. D., jr., and Weir.)
Weisenborn, George P. A., Kansas City, Mo. Churn, mixing machine, and beater. 1,624,701; Apr. 12.
Weiss, M., Corporation. (See Elliot, John T., assignor.)
Weistock, Alexander E., and H. Dahne, Baltimore, Md. Paper bag. 1,624,522; Apr. 12.
Welch, Jack T. (See Heddon, C., and Welch.)
Welle, Henry C., Crockett, Calif. Treating sugar. 1,624,296; Apr. 12.

Western Electric Company. (See Adams, W. J., and Haddock, assignors.)
Western Electric Company. (See Buckley, Oliver E., assignor.)
Western Electric Company. (See Burkholder, John C., assignor.)
Western Electric Company. (See Christopher, Arthur J., assignor.)
Western Electric Company. (See Clark, Edgar H., assignor.)
Western Electric Company. (See Clausen, Henry P., assignor.)
Western Electric Company. (See Clement, Lewis M., assignor.)
Western Electric Company. (See Colpitts, Edwin H., assignor.)
Western Electric Company. (See Cummings, George C., assignor.)
Western Electric Company. (See Curtis, Austen M., assignor.)
Western Electric Company. (See Fletcher, H., and Sivian, assignors.)
Western Electric Company. (See Haddock, Arthur, assignor.)
Western Electric Company. (See Hartley, Ralph V. L., assignor.)
Western Electric Company. (See Hinrichsen, Edward E., assignor.)
Western Electric Company. (See Horton, Joseph W., assignor.)
Western Electric Company. (See Jammer, Jacob S., assignor.)
Western Electric Company. (See Johnson, K. S., and Shea, assignors.)
Western Electric Company. (See Kochendorfer, Frederic S., assignor.)

Westinghouse Gear and Dynamometer Company. (See MacFarland, Allis M., assignor.)
Westinghouse Lamp Company. (See MacRae, Duncan, assignor.)
Westinghouse Lamp Company. (See Richardson, Henry K., assignor.)
Westinghouse Lamp Company. (See Sproesser, William C., assignor.)
Westrope, Fred J., assignor to Briggs Manufacturing Company, Detroit, Mich. Adjustable striker plate. 1,624,568; Apr. 12.
Wetzel, Edward A., Royal Oak, Mich., assignor to The American Motor Body Corporation, Philadelphia, Pa. Vehicle underbody construction. 1,624,903; Apr. 12.
Wheary, George H., assignor to Wheary Trunk Company, Racine, Wis. Baggage carrier. 1,624,297; Apr. 12.
Wheary Trunk Company. (See Wheary, George H., assignor.)
Whipple, Charles I., Denver, Colo. Pump. 1,624,702; Apr. 12.
Whitcomb, William A., Dedham, Mass., assignor to Great Northern Paper Company, Millinocket, Me. Paper making. 1,624,029; Apr. 12.
White Luggage Co. Inc. (See Wallnsky, Ossip J., assignor.)
White, Oscar, St. Louis, Mo. Stove. 1,624,298; Apr. 12.
Whitehead, George W., Vincennes, Ind. Windmill. 1,624,452; Apr. 12.
Whiteman, John D. (See Burdick, C. L., and Whiteman.)
Whitfield, Charles H., Penn Yan, N. Y. Bus body. 1,623,988; Apr. 12.
Whitney, Clarence E., et al., executors. (See Hanson, Bengt M. W.)
Whittingham, George H., assignor to Monitor Controller Company, Baltimore, Md. Self-locking switch. 1,624,882; Apr. 12.
Wideman, Edmond C., et al. (See Husted, Harry F., assignor.)
Wiehl, Alfred, Brooklyn, N. Y. Combined radio and phonograph loud speaker. 1,624,196; Apr. 12.
Wikkula, Viktor, Helsingfors, Finland. Ice concrete. 1,623,989; Apr. 12.
Wilcox, William D., Idaho Falls, Idaho. Making combustible gas. 1,624,644; Apr. 12.
Wilkinson, John, assignor to H. H. Franklin Manufacturing Company, Syracuse, N. Y. Cooling system for air-cooled motor-vehicle engines. 1,624,453; Apr. 12.
Wilkirson, Bert, Fort Worth, Tex. Vehicle wheel. 1,624,645; Apr. 12.
Willans, Peter W. (See Agate, C. S., and Willans.)
Willett, Benedict E., Dayton, Ohio. Stepladder. 1,624,569; Apr. 12.
Williams, J. H., Company. (See Spencer, Philip L., assignor.)
Williams, Roy H., Evansville, Ind. Fuse plug and receptacle. 1,624,030; Apr. 12.
Williams, Willard C., assignor of one-half to J. M. Phipps, Indianapolis, Ind. Dirigible spotlight. 1,624,818; Apr. 12.
Williamson, James, Chicago, Ill. Lighting fixture. 1,624,299; Apr. 12.
Willig, Hans, Santa Barbara, Calif. Lath nail. 1,624,817; Apr. 12.
Wilson, John H., assignor of one-half to H. L. Smith and one-half to A. Dormann, jr., Scottsbluff, Nebr. Internal-combustion engine. 1,624,454; Apr. 12.
Wilson, John W. (See Putnam, A. J., and Wilson.)
Wilson-Western Sporting Goods Co. (See Turner, Archibald J., assignor.)
Wily, James H., Bethlehem, Pa. Toy firearm. 1,624,086; Apr. 12.
Winchester Repeating Arms Company. (See Foisy, George A., assignor.)
Winckel, Max, Berlin, Germany, assignor to H. G. Weicker, trustee, Montclair, N. J. Vitamine preparation. 1,624,154; Apr. 12.
Winn, Sidney B., Lapeer, Mich. Tractor-trailer safety coupling device. 1,623,990; Apr. 12.
Winter, Paul, Zurich, assignor to Aluminium Welding Works, Ltd., Schlieren, Switzerland. Sheet-metal cutter. 1,624,853; Apr. 12.
Wired Radio, Inc. (See Powell, Edwin L., assignor.)
Witte, Gustav W., Chicago, Ill., assignor to International Harvester Company. Floating elevator for harvesters. 1,624,703; Apr. 12.
Wolf, Harry G. (See Keefer, Walter L., assignor.)
Wolfe, Wallace V., Corona, assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission system. 1,624,646; Apr. 12.

Wolford, William A., Ansley, Nebr. Adjustable sash holder. 1,624,819; Apr. 12.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Wall bracket for lighting fixtures. Des. 72,460; Apr. 12.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Backplate for lighting fixtures. Des. 72,461; Apr. 12.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Wall bracket for lighting fixtures. Des. 72,462; Apr. 12.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Wall bracket for lighting fixtures. Des. 72,463; Apr. 12.
Wolverine Metal Specialties Co. (See Sealock, J. W., and De Graaf, assignors.)
Wood, Henry A. W., assignor to The Wood Newspaper Machinery Corporation, New York, N. Y. Casting device for segmental plates. 1,623,991; Apr. 12.
Wood, Henry A. W., New York, N. Y., and C. Nordfors, Jersey City Heights, N. J., assignors to Wood Newspaper Machinery Corporation, New York, N. Y. Brake for web-roll tension devices. 1,623,992; Apr. 12.
Wood, Joseph E., assignor of one-half to H. K. Delahanty and one-half to S. Brown, Chicago, Ill. Reflector-jewel mounting. 1,624,300; Apr. 12.
Wood Newspaper Machinery Corporation. (See Catlin, Joseph P., assignor.)
Wood Newspaper Machinery Corporation, The. (See Wood, Henry A. W., assignor.)
Wood Newspaper Machinery Corporation, The. (See Wood, H. A. W., and Norfors, assignors.)
Wyko Projector Corporation. (See Brewster, Percy D., assignor.)
Yankee Lock Corporation. (See Malluk, Assad M., assignor.)
Yerdon, J. L. (See Thompson, Burchard D., assignor.)
Yngve, Victor, South Orange, N. J., assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry battery. 1,624,455; Apr. 12.
Yokoyama, Musaji, Setagaya-Mura, Japan. Electrically-operated automatic winding device. 1,624,801; Apr. 12.
York, Victor, Los Angeles, Calif. Long-stroke pumping apparatus. 1,624,647; Apr. 12.
Young, Julius, assignor to California Card Manufacturing Company, San Francisco, Calif. Easel mounting for photographs and the like. 1,624,302; Apr. 12.
Young, Nathaniel, Hickman, Ky. Fishing device. 1,624,456; Apr. 12.
Ytterberg, Arle, assignor to Allmänna Svenska Elektriska Aktiebolaget, Vasteras, Sweden. Testing electric machinery. 1,624,457; Apr. 12.
Zachert, Victor. (See Dolbear, S. H., and Zachert.)
Zeppelinwerk Lindau Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Zesinger, William R., assignor to South Bend Watch Company, South Bend, Ind. Mainspring tester for 12 and 16 size watches. 1,624,303; Apr. 12.
Zook, Samuel K., Lancaster, Pa. Jewelry. 1,624,458; Apr. 12.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 12TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acid, Concentrating dilute acetic. H. Suida. 1,624,812, Apr. 12.
Acid, Concentration of dilute acetic. H. Suida. 1,624,810; Apr. 12.
Acid, Ethyl-normal-hexyl-barbituric. A. W. Dox. 1,624,546; Apr. 12.
Acid from sugar containing raw materials by means of lactic acid bacteria, Producing lactic. A. Pollak. 1,624,674; Apr. 12.
Adding machine. H. Landsiedel. 1,624,104; Apr. 12.
Air-blast classifier. A. H. Stebbins. 1,624,518–19; Apr. 12.
Air gas, Making. H. Foersterling. 1,624,046; Apr. 12.
Air-operated device. H. Slater. 1,624,018; Apr. 12.
Airplanes from and upon suspended positions, Device for launching and landing. R. Simon. 1,624,188; Apr. 12.
Air purifier or humidifier and radiator vent valve, Combined. A. Bauer. 1,624,774; Apr. 12.
Alarm: *See*—
Burglar alarm. Fire alarm.
Alloy. C. S. Brainin. 1,624,857; Apr. 12.
Amplifying horn, Sound-. J. B. Hawley. 1,624,242; Apr. 12.
Anchor, Ground. J. R. Kearney. 1,624,871; Apr. 12.
Anchoring flange. H. C. Thiem. 1,624,121; Apr. 12.
Animal trap. D. Glasshoffer. 1,624,548; Apr. 12.
Ankle brace. M. Luder. 1,624,266; Apr. 12.
Annealing furnace, Nonoxidizing. V. E. Lane. 1,624,258; Apr. 12.
Annealing machine. T. F. Baily. 1,624,204; Apr. 12.
Antikicking device. J. Dewey. 1,624,861; Apr 12
Apparel ornaments, Producing. A. Roseberg. 1,624,805; Apr. 12.
Arsenic compounds, Producing.- E. R. Rushton. 1,624,281; Apr. 12.
Articles from comminuted material, Forming. H. Buel. 1,624,471; Apr. 12.
Assembly elevators, Device for lifting. C. E. J. Simkins. 1,624,119; Apr. 12.
Atmospheric cooling tower. J. S. Fluor. 1,624,824; Apr. 12.
Atomisation of fluids, Method and apparatus for. C. L. Riley. 1,624,847; Apr. 12.
Automatic gate. F. Swearingen. 1,624,813; Apr. 12.
Automatic regulator. L. Dana. 1,624,039; Apr. 12.
Automobile fuel tanks, Lockable cover for. A. M. Malluk. 1,624,840; Apr. 12.
Automobile heater. J. R. Frushour. 1,623,963; Apr. 12.
Automobile light. G. M. Rosemier. 1,624,436; Apr. 12.
Automobile lights, Electric time switch for. A. L. N. Cremo and A. J. Gordon. 1,624,539; Apr. 12.
Automobile side light. J. Rail and H. E. Sprow. 1,624,433; Apr. 12.
Automobile signal. E. E. Bower. 1,624,468; Apr. 12.
Automobiles, Luggage carrier for. J. W. Bement. 1,624,462; Apr. 12.
Axial thrust of rotatable shafts, Device suitable for measuring the. C. A. Parsons and S. S. Cook. 1,624,430; Apr. 12.
Axle assembly, Road-grader. F. E. Arndt. 1,624,127; Apr. 12.
Axle attachment. O. Olsen. 1,624,278; Apr. 12.
Babbitting frame. C. J. Kuschel. 1,624,605; Apr. 12.
Bag: *See*—
Hand bag. Paper bag.
Bag or lining. F. T. Robinson. 1,624,626; Apr. 12.
Bags, Machine for stapling handles on. T. M. Avery. 1,624,854; Apr. 12.
Baggage carrier. G. H. Wheary. 1,624,297; Apr. 12.
Baggage-check holder. R. M. Bunce. 1,624,472; Apr. 12.
Bait and the like, Container for artificial. G. B. Griffin. 1,624,116; Apr. 12.
Bait, Artificial. A. J. Putnam and J. W. Wilson. 1,624,233; Apr. 12.
Balance indicator. R. D. Evans. 1,624,484; Apr. 12.
Ball: *See*—
Cricket, hockey, and the like ball.
Ball-joint case, Separable cover for universal. A. A. Linley. 1,624,262; Apr. 12.
Balloting system and the like. J. B. Fischer. 1,624,045; Apr. 12.
Bank, Savings. B. F. Greer. 1,624,335; Apr. 12.
Barrette. D. L. Van Sickle and W. H. Cavin. 1,624,449; Apr. 12.
Batching apparatus. W. M. Venable. 1,624,122; Apr. 12.
Batching apparatus. W. M. Venable. 1,624,376; Apr. 12.
Batteries, Depolarizer for primary. G. W. Armstrong. 1,624,460; Apr. 12.
Battery: *See*—
Dry battery.
Battery case. C. E. Bobbitt. 1,624,131; Apr. 12.
Battery-charging system. W. E. Menzies. 1,624,420; Apr. 12.
Battery connection. W. E. Gill. 1,624,047; Apr. 12.
Battery filler. J. S. Hooper. 1,624,890; Apr. 12.
Battery holding and carrying means. M. L. Martus, E. H. Becker, and J. G. Ross. 1,624,795; Apr. 12.
Bead-wire-covering machines, Fabric-feeding device for. C. H. Desautels. 1,624,544; Apr. 12.
Bearing. M. P. Holmes. 1,624,837; Apr. 12.
Bed, Folding. W. J. Broome. 1,624,307; Apr. 12.
Bed, Metal folding. W. J. Duvall. 1,624,222; Apr. 12.
Bedspread. D. Kemp. Des. 72,429; Apr. 12.
Belt for personal wear. I. Leibovitz. Des. 72,432; Apr. 12.
Beveling and sealing clamp. T. Midgley. 1,624,616–17; Apr. 12.
Binder. W. Feldmann. 1,624,660; Apr. 12.
Block: *See*—
Fire-box arch block.
Block machines, Pneumatic core for. A. Adams. 1,624,704; Apr. 12.
Board: *See*—
Fiber board. Paperboard.
Game board.
Bodies by pressure, Method of and apparatus for forming. C. Claus. 1,624,904; Apr. 12.
Boiler: *See*—
Locomotive boiler.
Boiler and incinerator system, Combined. L. L. Scott. 1,624,681; Apr. 12.
Boiler cleaner. F. Bowers. 1,624,576; Apr. 12.
Boll-weevil catcher. R. Weaver. 1,624,773; Apr. 12.
Bolt: *See*—
Wear-compensating bolt.
Bolt. W. Schwemlein. 1,624,767; Apr. 12.
Bolt-locking device. G. Roudanez. 1,624,563; Apr. 12.
Bottle. J. Netter. Des. 72,434; Apr. 12.
Bottle. A. B. Taylor, C. T. Long, and A. C. Sohn. Des. 72,459; Apr. 12.
Bottle, Glass. A. G. Hamilton. Des. 72,420; Apr. 12.
Bottle holder, Nursing. A. Tufenkjian. 1,624,695; Apr. 12.
Bottle or similar container. P. C. Delaize. Des. 72,410–11; Apr. 12.
Bowl, Self adjusting centrifugal. J. V. M. Risberg. 1,624,117; Apr. 12.
Box: *See*—
Journal box. Vanity box.
Box. H. D. Senat. 1,624,439; Apr. 12.
Box, cigarette, and like case. F. T. Buckthorpe and A. Barter. 1,624,858; Apr. 12.
Box or similar container. P. C. Delaize. Des. 72,408–9; Apr. 12.
Boxes, Machine and method for making paper. S. Bergstein and A. C. E. Lindner. 1,624,885; Apr. 12.
Brace: *See*—
Ankle brace. Fender brace.
Brace plate. M. Taylor. 1,624,289; Apr. 12.
Bracelet hook. E. Prestinari. 1,624,561; Apr. 12.
Brake: *See*—
Steering-wheel brake.
Brake band and shoes, Lining for. J. G. Bowman. 1,624,035; Apr. 12.
Brake beam and constructing same. A. P. Rissler. 1,624,509; Apr. 12.
Brake drum oil guard. A. Y. Dodge. 1,624,220; Apr. 12.
Brake gauge. E. L. Macabee and F. E. Macabee. 1,624,142; Apr. 12.
Brake testing instrument. C. F. Cowdrey. 1,624,219; Apr. 12.
Bridge construction. A. Folino. 1,624,325; Apr. 12.
Broiler. J. H. Cannon. 1,624,214; Apr. 12.
Broom protector and stand. A. J. Hennes. 1,624,410; Apr. 12.
Brush holder. J. H. Mumaw, J. B. Schnieders, and W. G. Haas. 1,624,426; Apr. 12.
Bucket or vessel, Measuring. A. Davis, jr. 1,624,477; Apr. 12.
Burglar alarm. T. E. O'Connor. 1,624,176; Apr. 12.
Burner: *See*—
Gas burner. Oil burner.
Bus body. C. H. Whitfield. 1,623,988; Apr 12
Bust confiner. E. K. Pollack. 1,623,973; Apr. 12.
Cabinet, Cigarette display and dispensing. J. G. Allen. 1,624,883; Apr. 12.
Cabinet, Shoe-shining. J. P. Dunn. 1,624,480; Apr. 12.
Cabinet, Treasury-note. A. Warren and S. N. Solomon. 1,624,772; Apr. 12.

Cage-locking means. S. J. Reap. 1,624,759; Apr. 12.
Calculating and recording machine. W. W. Landsiedel. 1,624,105; Apr. 12.
Camera and display apparatus, Combination motion-picture. R. Knopp. 1,624,103; Apr. 12.
Can-body-making machine. W. Cameron. 1,624,213; Apr. 12.
Cane. R. Fleming. 1,624,591; Apr. 12.
Cap, Sport visor. C. M. Goldberg. 1,624,727; Apr. 12.
Capping machine. J. A. Stock. 1,624,286; Apr. 12.
Car door. A. S. Barrows. 1,624,306; Apr. 12.
Car-door opening and closing mechanism. C. Schussler. 1,624,680; Apr. 12.
Car, Mine. W. S. Purdy. 1,624,801; Apr. 12.
Car roof. C. D. Bonsall. 1,624,207; Apr. 12.
Cars, Hand brake for railway. F. C. Rutz. 1,624,510; Apr. 12.
Cars, Hand-brake mechanism for railway. Y. Miyasaki. 1,624,425; Apr. 12.
Carbonized article and making same. J. Beckwith. 1,624,710; Apr. 12.
Carburetor. C. F. L. and W. L. Kaufmann. 1,624,603; Apr. 12.
Carburetor. T. W. Kings. 1,624,604; Apr. 12.
Carburetor adjustment, Automatic. W. J. Short. 1,624,631; Apr. 12.
Carburetor-manifold heater. C. O. Erickson. 1,624,863; Apr. 12.
Carburetors, Electrical heater for the air-supply pipes of. W. F. Cleary and W. J. Wagener. 1,624,216; Apr. 12.
Card protector. P. Dixon. 1,624,719; Apr. 12.
Carrier: *See*—
Baggage carrier. Suspended carrier.
Luggage carrier.
Carton-feeding mechanism for carton folding and filling machines. R. A. Jones. 1,624,740; Apr. 12.
Cartridge, Sporting. C. des Allimes. 1,624,649; Apr. 12.
Case: *See*—
Battery case. Key case.
Box, cigarette, and like case.
Cases, boxes, bags, and such like, Fastening for attaché. C. W. Cheney. 1,624,859; Apr. 12.
Cash register. E. J. Von Pein. 1,624,123; Apr. 12.
Casserole cover. H. Lerner and A. Ginsburg. Des. 72,430; Apr. 12.
Castellating machine. C. E. Pellow. 1,624,180; Apr. 12.
Casting device for segmental plates. H. A. W. Wood. 1,623,991; Apr. 12.
Castings from molds or flasks, Method and apparatus for freeing centrifugally-cast. W. D. Moore. 1,624,354; Apr. 12.
Chain drive. C. P. Kottlowski. 1,624,892; Apr. 12.
Chain, Heavy-tension lap-link. W. J. Mullally. 1,624,111; Apr. 12.
Chain-making machine. M. Olson. 1,624,063; Apr. 12.
Chain, Power drive. F. L. Morse. 1,624,058; Apr. 12.
Chair: *See*—
Rail chair.
Chandelier. A. P. Seidell. Des. 72,452; Apr. 12.
Check-controlled mechanism. J. M. Perry. 1,623,970; Apr. 12.
Churn, mixing machine, and beater. G. P. A. Weisenborn. 1,624,701; Apr. 12.
Cigar lighter, Electric. J. J. Gough. Des. 72,418; Apr. 12.
Cigarette-machine shafts, Device for intermittently driving. C. F. Röber. 1,623,978; Apr. 12.
Circuit-controlling mechanism. J. T. Miller and M. Hanley. 1,624,059; Apr 12.
Circuit interrupter, Indicating fluid-. H. M. Biebel. 1,624,463; Apr. 12.
Clamp: *See*—
Beveling and sealing clamp.
Clamping device. W. R. Ellis. 1,624,390; Apr. 12.
Clasp: *See*—
Tie clasp.
Clasp. A. M. Ellby. 1,624,253; Apr. 12.
Cleaner: *See*—
Boiler cleaner. Vacuum cleaner.
Suction cleaner. Windshield cleaner.
Cleaning and polishing machine, Electric shoe. H. Powell and W. P. Groves. 1,624,758; Apr. 12.
Cleaning composition, Dirt and grease. J. Lenenberg. 1,624,055; Apr. 12.
Clip: *See*—
Hair clip. Metal-lath-attaching clip.
Clock, Hall. W. J. Herschede. Des. 72,426; Apr. 12.
Closure-swinging device. J. W. Sealock and M. De Graaf. 1,624,677; Apr. 12.
Clothesrack, Portable. C. H. Mercier. 1,624,796; Apr. 12.
Clothes-wringer attachment. R. L. McCoubrie. 1,624,419; Apr. 12.
Clutch. K. Tessky. 1,624,025; Apr. 12.
Clutch control. A. Smith. 1,624,513; Apr. 12.
Clutch, Hydraulic. A. H. Manwaring. 1,624,841; Apr. 12.
Cock having automatic seating plug, High-pressure. M. R. Shipley. 1,624,512; Apr. 12.
Coffee and making the same. B. C. Gerwick. 1,624,330; Apr. 12.
Coffeepot. F. E. Lane. 1,624,606; Apr. 12.
Coil, Pulp-heating. H. W. Lowe. 1,624,749; Apr. 12.
Coil-spacing device, Transformer-. A. Veitch. 1,624,896; Apr. 12.
Coil with multiple adjustments. C. D. Richard and G. T. Morris. 1,624,364; Apr. 12.
Coin-controlled apparatus. J. B. Watling. 1,624,881; Apr. 12.
Collapsible crate. J. P. Butcher. 1,624,212; Apr. 12.
Collapsible tube. K. Kiefer. 1,624,140; Apr. 12.
Colored-vapor signal. T. G. Hitt. 1,624,600; Apr. 12.
Comb: *See*—
Hair-waving comb. Reversible comb.
Combination tool. R. C. Hofmaister. 1,624,788; Apr. 12.
Communication system. H. W. O'Neill. 1,624,672; Apr. 12.
Concrete-block composition. M. E. Von Mach, jr. 1,623,985; Apr. 12.
Concrete, mortar, and plaster mixer. G. W. Adams. 1,624,705; Apr. 12.
Concrete-reenforcing bond and connecter. F. Rebell. 1,624,802; Apr. 12.
Condensing apparatus. A. O. H. Petersen. 1,624,066; Apr. 12.
Conduits, Mold for cementitious. F. M. Venzie. 1,624,191; Apr. 12.
Confections, Apparatus for freezing and molding. M. Schnaier. 1,624,678–9; Apr. 12.
Connecting member. F. Amfot. 1,623,956; Apr. 12.
Contact apparatus. M. D. Mann, jr., and H. M. Weir. 1,624,793; Apr. 12.
Contact device. G. C. Cummings. 1,624,476; Apr. 12.
Container. R. F. Emsley. 1,624,830; Apr. 12.
Container. F. S. Oppenheim. 1,624,360; Apr. 12.
Container opener. J. C. Thom. 1,624,375; Apr. 12.
Containers, Forming cover-holding ring seats for. A. Mauser. 1,624,496; Apr. 12.
Control regulator. H. M. Stoller. 1,624,566; Apr. 12.
Control system. G. W. Wallace and H. K. Ihrig. 1,624,294; Apr. 12.
Controlling switch. J. P. Ellenbecker. 1,624,483; Apr. 12.
Cooling system, Transformer-. C. L. Knotts. 1,624,346; Apr. 12.
Cord-guiding device. M. Castricum. 1,624,532–3; Apr. 12.
Core drill. F. Oliver. 1,624,146; Apr. 12.
Corn popper. J. E. Dempsey and L. E. Burton. 1,624,040; Apr. 12.
Corner bead. L. E. Curtis. 1,624,541; Apr. 12.
Corner beads, Apparatus for expanding metal. L. E. Curtis. 1,624,542; Apr. 12.
Corner light. G. Graff. Des. 72,419; Apr. 12.
Cotton picker. A. E. Brown. 1,624,308; Apr. 12.
Counterbalancing device. L. M. Llewellyn and H. G. Pederson. 1,624,414; Apr. 12.
Countersinking machine. W. G. Aldeen. 1,624,648; Apr. 12.
Cover and strainer, Combined. F. W. Kuhnast. 1,624,745; Apr. 12.
Crank-shaft formation. H. Ford. 1,624,228; Apr. 12.
Crate, Poultry. B. A. Stamp. 1,624,517; Apr. 12.
Cribs, Top support for. C. H. Boardman. 1,624,467; Apr. 12.
Cricket, hockey, and like ball. G. W. Beldam. 1,624,822; Apr. 12.
Crushed ore and the like, Classifying. S. H. Dolbear and B. L. Eastman. 1,624,134; Apr. 12.
Crushers, Inner disk for disk. C. B. Andrews. 1,624,032; Apr. 12.
Crushing machinery, Screen bar for. G. W. Borton. 1,624,886; Apr. 12.
Current meter, Alternating-. L. A. Paine. 1,624,178; Apr. 12.
Current motor, Alternating-. C. A. M. Weber. 1,624,378; Apr. 12.
Cuspidor cover. W. E. Brown. 1,624,824; Apr. 12.
Cut-off mechanism. G. B. Scheffey. 1,624,367; Apr. 12.
Cutter: *See*—
Paper cutter. Sheet-metal cutter.
Cutting tip or the like. G. L. Walker. 1,624,377; Apr. 12.
Cutting tool. H. Goldblatt. 1,624,136; Apr. 12.
Cyanides, Preparing alkali-metal. R. W. Poindexter, jr., and P. T. Dolley. 1,624,147; Apr. 12.
Cylinder structure, Engine-. A. Lieo and C. Baradat. 1,624,002; Apr. 12.
Dam, River. J. M. L. A. Aubert. 1,624,571; Apr. 12.
Deflocculating and emulsifying, Apparatus for. E. A. Butler. 1,624,037; Apr. 12.
Delinter. J. E. Redus. 1,624,435; Apr. 12.
Desulphurizing coal, water, or mixed gases for illuminating or heating. E. Raffloer. 1,624,625; Apr. 12.
Dial-testing circuit. R. B. Miller. 1,624,422; Apr. 12.
Diaphragm transmitter, Double. C. R. Moore and J. M. Hayward. 1,624,353; Apr. 12.
Dibble. G. L. Ford. 1,624,488; Apr. 12.
Die: *See*—
Wire-drawing die.
Differential driving mechanism. S. R. Dodds. 1,624,589; Apr. 12.
Dishwashing machine. P. E. Barker. 1,624,380; Apr. 12.
Dishwashing machine. P. E. Barker. 1,624,461; Apr. 12.
Disk wheels, Lifting lever for. E. A. Nelson. 1,624,356; Apr. 12.
Disks, Manufacturing ball rolling. H. L. Heathcote. 1,624,597; Apr. 12.

Display device. L. A. Leppke and J. H. Scharf. 1,624,741; Apr. 12.
Display device, Advertising. F. A. Reid. 1,624,507; Apr. 12.
Ditching machines, Digging member for. H. H. Barber. 1,623,957; Apr. 12.
Dividing and spacing instrument. H. Adler. 1,624,031; Apr. 12.
Doorcheck. A. F. Hickle. 1,624,836; Apr. 12.
Door structure. J. H. Rowley. 1,624,760; Apr. 12.
Doors, turnstiles, and the like, Utilizing the surplus energy exerted in operating revolving. B. B. Bryan, jr. 1,624,656; Apr. 12.
Dough-depositing machine. A. W. Copland. 1,624,316; Apr. 12.
Doweling machine. J. M. Myrdal. 1,624,274; Apr. 12.
Drag or falling saw, Power. F. Halvorsen. 1,624,662; Apr. 12.
Drain cock, Cooling-system. H. A. Gschwind. 1,624,168; Apr. 12.
Drawing press. A. A. Byerlein. 1,623,960; Apr. 12.
Drier: *See*—
Fruit drier.
Drier for linings and other strip material, Rack-. A. O. Hurxthal. 1,624,735; Apr. 12.
Drill: *See*—
Core drill. Rock drill.
Drills, Press-wheel boxing for grain. A. M. Strecker. 1,624,022; Apr. 12.
Drinking fountain. H. W. Taylor. 1,624,081; Apr. 12.
Drive gate, Automatic. J. Landis. 1,624,256; Apr. 12.
Dry battery. V. Yngve. 1,624,455; Apr. 12.
Dry cell and electrode therefor. G. W. Heise, H. H. Thompson, and N. K. Chaney. 1,624,409; Apr. 12.
Drying machine. S. A. Staege. 1,624,371; Apr. 12.
Drying system. M. L. Mueller. 1,624,754; Apr. 12.
Dumping device. H. F. Flowers. 1,624,323; Apr. 12.
Dyestuffs and making same. F. Straub and H. Schneider. 1,624,637; Apr. 12.
Educational appliance. D. Vershbinsky. 1,624,450; Apr. 12.
Electric-bracket outlet. O. A. Frederickson. 1,624,547; Apr. 12.
Electric currents, Spark intensifier for. G. M. Smith. 1,623,982; Apr. 12.
Electric furnace. F. T. Cope. 1,624,217; Apr. 12.
Electric furnace. A. D. Keene. 1,624,344; Apr. 12.
Electric machine for continuous current, High-speed dynamo-. M. Kostenko and N. Japolsky. 1,624,254; Apr. 12.
Electric machinery, Testing. A. Ytterberg. 1,624,457; Apr. 12.
Electric switch. H. P. Clausen. 1,624,391; Apr. 12.
Electric switch. J. E. Springer and R. A. Harry. 1,624,120; Apr. 12.
Electrical apparatus. T. W. Case. 1,624,314; Apr. 12.
Electrical condenser. P. E. Gilling. 1,624,332–4; Apr. 12.
Electrical control system. P. Charpentier. 1,624,158; Apr. 12.
Electrical measuring instrument. C. E. Foster. 1,624,135; Apr. 12.
Electrical network. T. E. Shea. 1,624,682; Apr. 12.
Electrical switch. F. Aldendorff. 1,624,202; Apr. 12.
Electrical switch. H. K. Ansingh. 1,623,954; Apr. 12.
Electrically-operated automatic winding device. M. Yokoyama. 1,624,301; Apr. 12.
Electromagnetic therapeutic-compress-heating appliance. J. N. De Quer. 1,624,397; Apr. 12.
Electron-discharge device. V. L. Ronci. 1,624,562; Apr. 12.
Elevator: *See*—
Pneumatic elevator. Sucker-rod elevator.
Engine: *See*—
Internal-combustion engine.
Engine control, Hoisting-. W. J. Lilly and H. H. Logan. 1,624,261; Apr. 12.
Engine rotary valve member, Internal-combustion. E. M. Bournonville. 1,624,388; Apr. 12.
Engines, Cooling system for air-cooled motor-vehicle. J. Wilkinson. 1,624,453; Apr. 12.
Engines, Fuel-admission device for heavy-oil. F. Huber. 1,624,413; Apr. 12.
Engines, Fuel-control means for internal-combustion. B. D. Thompson. 1,624,698; Apr. 12.
Engines, Fuel-feeding device of internal-combustion. O. and G. Svensson. 1,624,024; Apr. 12.
Engines, Fuel vaporizer for internal-combustion. H. E. May. 1,624,271; Apr. 12.
Engines, Lubricating system of internal-combustion. E. J. Sweetland. 1,624,689; Apr. 12.
Engines, Manifold construction for internal-combustion. H. Ford. 1,624,229; Apr. 12.
Engines, Manifold cut-off for internal-combustion. N. N. Neher. 1,624,275; Apr. 12.
Engines, Retarding mechanism for internal-combustion. A. A. Howitz. 1,624,342; Apr. 12.
Engines, Supplying fuel to explosive. H. Pedersen. 1,624,623; Apr. 12.
Engines, Support of aero. F. M. Royce and A. G. Elliott. 1,624,761; Apr. 12.
Envelope. G. F. Hogan. 1,624,137; Apr. 12.
Envelope opener. E. E. Fleming. 1,624,590; Apr. 12.
Ester condensation products, Making. R. M. Carter. Des. 16,591; Apr. 12.
Expansible collapsible element. H. C. Mallory. 1,624,348; Apr. 12.
Explosive, Brisant. B. J. Flürscheim. 1,624,401; Apr. 12.
Fastener for containers. W. T. S. Brown. 1,624,825; Apr. 12.
Fastening device. W. Schroder. 1,624,766; Apr. 12.
Fat composition, Edible-. H. E. Dubin. 1,624,164; Apr. 12.
Feeder. J. J. Nevills. 1,624,175; Apr. 12.
Feeding device, Automatic. E. J. and H. T. Kingsbury. 1,624,872; Apr. 12.
Feeding machine. C. L. Post. 1,623,976; Apr. 12.
Fender brace. H. J. Cocks. 1,624,860; Apr. 12.
Fertilizer distributor. W. E. Bruce. 1,624,210; Apr. 12.
Fertilizer, Producing phosphate. U. Wedge. 1,624,195; Apr. 12.
Festooning rack. W. D. Eakin. 1,624,223; Apr. 12.
Fiber-bearing materials, Apparatus for treating. N. K. Davis. 1,624,717; Apr. 12.
Fiber board, Manufacture of. R. W. Hilton. 1,624,599; Apr. 12.
Fibrous material, Machine for and method of applying varnish to sheets of. L. T. Frederick. 1,624,094; Apr. 12.
Fibrous materials, Concentrating. S. H. Dolbear and V. Zachert. 1,624,163; Apr. 12.
File. J. S. Small. 1,623,980; Apr. 12.
File jacket. J. K. Cassell. 1,624,776; Apr. 12.
Filling and packing machine. E. Jagenberg. 1,624,664; Apr. 12.
Filling machine. D. S. Paterson and G. B. Petsche. 1,624,846; Apr. 12.
Film projector. P. D. Brewster. 1,624,156; Apr. 12.
Film sprocket guide. A. S. Howell. 1,624,731; Apr. 12.
Films in spaced coil forms, Holding. L. Czako. 1,624,586; Apr. 12.
Filter, Gasoline. W. C. Glover. 1,624,832; Apr. 12.
Filter, Oil. H. C. Bohmsack. 1,624,526; Apr. 12.
Filter, Wave. K. S. Johnson and T. E. Shea. 1,624,665; Apr 12.
Fire alarm, Portable. A. M. de S. Greaves. 1,624,866; Apr. 12.
Fire-box arch block. L. S. Abbott. 1,624,198; Apr. 12.
Fire-box arch, Sectional. L. S. Abbott. 1,624,199; Apr. 12.
Fire-extinguishing composition. F. L. Dunlap and N. T. Ewer. 1,624,398; Apr. 12.
Fire-receiving wall. L. S. Abbott. 1,624,200; Apr. 12.
Firearms, Danger signal for. L. P. Smith. 1,624,876; Apr. 12.
Firearms, Sighting indicator for. J. W. F. Lamont and H. Dickinson. 1,624,347; Apr. 12.
Fish-cleaning apparatus. P. W. Lindquist. 1,624,173; Apr. 12.
Fishing device. N. Young. 1,624,456; Apr. 12.
Fishing rods, Reel seat for. C. Heddon and J. T. Welch. 1,624,052; Apr. 12.
Fixture, Control. H. E. Norviel. 1,624,114; Apr. 12.
Flash light. R. J. Smith. 1,624,686; Apr. 12.
Flotation apparatus. T. M. Owen and M. P. Dalton. 1,624,559; Apr. 12.
Flower holder. J. H. Pfarr. 1,624,504; Apr. 12.
Flower holder and stand. J. Hamilton. 1,624,407; Apr. 12.
Fluid generator, Motive-. M. E. Bigelow. 1,624,464; Apr. 12.
Fluid-pressure tool. E. Penberthy. 1,624,179; Apr. 12.
Flush-tank ball seat. P. B. Hale. 1,624,284; Apr. 12.
Flying machine. L. F. Coe. 1,624,475; Apr. 12.
Flying machines, Landing gear for C. Dornier. 1,623,961; Apr. 12.
Food product. E. H. Twight. 1,624,153; Apr. 12.
Foods and commodities, System and means for dispensing. L. Lyndon and R. I. Blakeslee. 1,624,267; Apr. 12.
Foodstuffs, Ornamenting. A. Martin. 1,624,670; Apr. 12.

Road machine. S. A. Stouffer. 1,623,984; Apr. 12.
Road-repairing machine. C. B. Christians, jr. 1,624,390; Apr. 12.
Rock asphalt for shipment and laying, Treating. J. W. Frazier. 1,624,403; Apr. 12.
Rock drill. A. E. Carlson. 1,624,312; Apr. 12.
Rods, poles, and the like, Fixing for. E. G. Cleverly. 1,624,392; Apr. 12.
Roller: *See*—
Shade roller.
Roller and pulverizer, Land. J. F. Wagner. 1,624,084; Apr. 12.
Rolling machine. K. F. Ungerer. 1,624,448; Apr. 12.
Rotary motor. G. L. Buffington and E. H. Hopson. 1,624,529; Apr. 12.
Rubber composition and preparing same. H. W. Elley. 1,624,724; Apr. 12.
Rug-renovating machine. T. L. Wagoner. 1,624,293; Apr. 12.
Sandpaper and rubbing machine. L. Ferrara. 1,624,400; Apr. 12.
Sash holder, Adjustable. W. A. Wolford. 1,624,819; Apr. 12.
Saw. J. P. Salmi. 1,624,072; Apr. 12.
Saw gauge. M. J. Hahre. 1,624,050; Apr. 12.
Saw, Breaking-down. P. S. O'Neill. 1,624,064; Apr. 12.
Saw-sharpening machine. O. H. Fletcher and J. A. Tenney. 1,624,864; Apr. 12.
Scale, Weighing. H. A. Essmann. 1,624,588; Apr. 12.

Screen: *See*—
Window screen.
Screen-cleaning apparatus. W. L. D'Olier. 1,624,221; Apr. 12.
Screenhanger. W. F. Rapp. 1,624,181; Apr. 12.
Screen wall for centrifugal baskets. E. N. Stone. 1,624,287–8; Apr. 12.
Screw driver. R. O. Caruso. 1,624,530; Apr. 12.
Screw-driving machine. J. C. Steen. 1,624,189; Apr. 12.
Seat: *See*—
Flush-tank ball seat.
Seat for window cleaning, Folding. B. W. Dreyer. 1,623,962; Apr. 12.
Secret communication. J. W. Horton. 1,624,601; Apr. 12.
Seed-cleaning machine. A. Bleam. 1,624,034; Apr. 12.
Self-locking switch. G. H. Whittingham. 1,624,882; Apr. 12.
Separator: *See*—
Magnetic separator.
Sewing machines, Spool for. F. F. Barth. 1,624,884; Apr. 12.
Shade roller. H. F. Husted. 1,624,053; Apr. 12.
Shank-beating and stitch-rubbing machine. L. G. Freeman. 1,624,326; Apr. 12.
Sheet-feeding mechanism. S. H. Plum, 2d, and A. Ackley. 1,624,069; Apr. 12.
Sheet material and producing the same, Colored. T. M. Atkinson. 1,624,652; Apr. 12.
Sheet-metal cutter. P. Winter. 1,624,853; Apr. 12.
Shielding and balancing means. W. J. Adams and A. Haddock. 1,624,459; Apr. 12.
Shingle strips, Machine for making. A. S. Speer. 1,623,983; Apr. 12.
Shingles, Method and apparatus for dipping. C. M. Abbott. 1,624,379; Apr. 12.
Ship governor. W. C. Dennis. 1,624,718; Apr. 12.
Shock absorber. H. H. Logan. 1,624,265; Apr. 12.
Shoe-lace fastener. S. R. Shetzline, jr., and E. A. Dodelin. 1,624,564; Apr. 12.
Shoe tongue and fastener. B. C. McEntee and L. H. Constant. 1,624,143; Apr. 12.
Shoes, Shank stiffener for. G. A. Hurley. 1,624,001; Apr. 12.
Shook-sorting machine. J. N. Bratton and W. N. Bryant. 1,624,389; Apr. 12.
Short waves, Frequency changer for. M. Osnos. 1,624,065; Apr. 12.
Shuttle. P. L. Spencer. 1,624,516; Apr. 12.
Signal: *See*—
Automobile signal. Traffic signal.
Colored-vapor signal. Vehicle signal.
Signal-receiving circuits. E. L. Powell. 1,624,148; Apr. 12.
Signal switch, Automobile direction. S. Caminita. 1,624,828; Apr. 12.
Signaling, Carrier-wave. R. C. Mathes. 1,624,495; Apr. 12.
Signaling conductor system and operation. O. E. Buckley. 1,624,470; Apr. 12.
Signaling, High-frequency. P. M. J. Boucherot. 1,624,208; Apr. 12.
Signaling method and system. R. V. L. Hartley. 1,624,590; Apr. 12.
Signaling system. J. C. Burkholder. 1,624,579; Apr. 12.
Signaling system. A. M. Curtis. 1,624,395; Apr. 12.
Signaling system, Carrier-wave. H. M. Pruden. 1,624,506; Apr. 12.
Signaling system, High-frequency. L. M. Clement. 1,624,473; Apr. 12.
Silica receptacle and process of manufacture. H. A. Wayringer. 1,624,699; Apr. 12.
Silk and yarn thread tensioning and waxing device. W. Noga. 1,624,844; Apr. 12.
Siren. T. Decot. 1,624,587; Apr. 12.
Sleeping mat. S. C. Morehouse. 1,624,797; Apr. 12.
Sleeve-pressing form. L. T. Chellis. 1,624,777; Apr. 12.
Smoking stand. P. C. Shapiro. Des. 72,455; Apr. 12.
Snare, Animal. E. C. Marlin. 1,624,003; Apr. 12.
Snow-clearing apparatus for automobiles. J. B. Sewell. 1,624,809; Apr. 12.
Snowplow. S. W. Lombard. 1,624,839; Apr. 12.
Soap dispenser, Liquid-. A. R. Goldrick. 1,624,231; Apr. 12.
Sole, Composite rubber. A. L. Murray. 1,624,500; Apr. 12.
Solids from press liquids, Apparatus for recovering. H. E. Bergen. 1,624,385; Apr. 12.
Sound or like vibrations, Production or reproduction of. S. G. Brown. 1,624,828; Apr. 12.
Sound-receiving earpiece. H. J. Mathieu. 1,624,144; Apr. 12.
Sound reflector. J. A. Landis. 1,624,873; Apr. 12.
Sound-reproducing machine. H. L. T. Buckle. 1,624,578; Apr. 12.
Spading device. O. A. Matson. 1,624,610; Apr 12.
Spark plug. D. G. Fuchs. 1,624,785; Apr. 12.
Speed transmission apparatus, Automatic change-. T. Gensmer. 1,624,097; Apr. 12.
Spinning machines, Stop motion for. P. S. Giroux. 1,623,964; Apr. 12.
Spinning, twisting and like frames, Spindle of. T. A. and H. A. Boyd. 1,624,713; Apr. 12.
Spotlight, Dirigible. W. C. Williams. 1,624,818; Apr. 12.
Spray drying. A. B. Jones. 1,624,739; Apr. 12.
Springs, Metal casing for leaf. L. Skok. 1,624,683; Apr. 12.
Stair square. C. A. Christianson. 1,624,535; Apr. 12.
Stair tread. H. Frood. 1,624,405; Apr. 12.
Stand: *See*—
Knockdown stand.
Statement and ledger sheet, Combined. G. O. Mobley. 1,624,618; Apr. 12.
Steam boards, Attachment for. R. W. Dawn. 1,624,829; Apr. 12.
Steam generator. C. Duquenne. 1,624,481; Apr. 12.
Steel of high-temperature stability. W. R. Shimer. 1,624,075; Apr. 12.
Steering-wheel brake. E. G. Heinzelman. 1,624,598; Apr. 12.
Stencil and work holder, Magnetic. H. G. Crain. 1,624,538; Apr. 12.
Stepladder. B. E. Willett. 1,624,569; Apr. 12.
Stereotype plates, Casting curved and flat. J. P. Catlin. 1,623,997; Apr. 12.
Sterilizing and washing machine. L. F. Utz. 1,624,026; Apr. 12.
Stills, Carbon-removing mechanism for. J. M. Wadsworth. 1,624,083; Apr. 12.
Stitch remover. L. Schildknecht. 1,624,013; Apr. 12.
Stock beater. C. W. Shartle. 1,624,875; Apr. 12.
Stoker. O. Aram. 1,624,651; Apr. 12.
Stoker, Mechanical. C. F. Miller. 1,624,004; Apr. 12.
Stokers, Delivering coal to hoppers of continuous fuel-feed. A. F. Strouse. 1,624,079; Apr. 12.
Store-front construction. B. E. Myers. 1,624,620; Apr. 12.
Stove. O. White. 1,624,298; Apr. 12.
Stove or range. A. F. Harter. 1,624,550; Apr. 12.
Stretcher. J. G. Blaine and C. B. Patton. 1,624,090; Apr. 12.
Striker plate, Adjustable. F. J. Westrope. 1,624,568; Apr. 12.
Strip material, Apparatus for reeling. C. M. Richardson and Z. E. Sargisson. 1,624,183; Apr. 12.
Stropping device, Blade. G. D. Gallagher. 1,624,592; Apr. 12.
Submarine signaling. J. W. Horton. 1,624,412; Apr. 12.
Submarine signaling system. A. M. Curtis. 1,624,396; Apr. 12.
Sucker-rod elevator. A. H. Neilson. 1,624,799; Apr. 12.
Suction cleaner. H. E. Hoover. 1,624,246–7; Apr. 12.
Sugar, Treating. H. C. Wells. 1,624,296; Apr. 12.
Support. J. L. Davidson. 1,624,657; Apr. 12.
Suspended carrier. E. T. Bennington. 1,624,205; Apr. 12.
Swimming wing. W. Kennedy. 1,624,102; Apr. 12.
Switch: *See*—
Controlling switch. Self locking switch.
Electric switch. Signal switch.
Electrical switch. Trolley switch.
Switch lock. C. L. Stoeltzlen. 1,624,372; Apr. 12.
Switch mechanism. H. K. Ansingh. 1,623,955; Apr. 12.
Switch mounting, Automatic. H. F. Obergfell. 1,624,502; Apr. 12.
Switching device. A. R. Swoboda. 1,624,374; Apr. 12.
Swivel link. E. C. Stacy. 1,624,441; Apr. 12.
Syringes, Needle mounting for hypodermic. B. Friedman. 1,624,327; Apr. 12.
T square. A. M. Rasmusen. 1,624,280; Apr. 12.
Table. J. T. Elliot. 1,624,862; Apr. 12.
Table. R. J. Stuart. 1,624,770; Apr. 12.
Table on ships, Dinner. I. Savio. 1,624,437; Apr. 12.
Tailoring, System of. G. A. Mongelli. 1,624,894; Apr. 12.
Tailor's measure. B. Simpson. 1,624,768; Apr. 12.
Tamping and tamping machine. C. R. Hunt. 1,624,734; Apr. 12.
Tank-car cleaning device. F. E. Freel. 1,624,865; Apr. 12.
Tank-filling means. W. H. Smith. 1,624,687; Apr. 12.
Teething device for infants. J. A. Palmer. 1,623,969; Apr. 12.
Telegraph system. A. A. Clokey. 1,624,393; Apr. 12.
Telephone receiver. C. R. Hanna. 1,624,338; Apr. 12.
Telephone substation circuits. F. W. McKown and E. Dietze. 1,624,056–7; Apr. 12.
Telephone system, Automatic. J. E. Gardner. 1,624,329; Apr. 12.
Telephone system, Automatic. A. J. Ray, F. T. Madsen, and H. F. Obergfell. 1,624,007; Apr. 12.
Telephone system, Binaural. H. Fletcher and L. J. Sivian. 1,624,486; Apr. 12.
Telephone system, Semiautomatic. E. E. Hinrichsen. 1,624,341; Apr. 12.
Telephone transmitter. C. R. Moore. 1,624,351–2; Apr. 12.
Telescope air jet. F. Bedard. 1,624,384; Apr. 12.
Temple roll. J. J. O'Connell. 1,624,503; Apr. 12.
Testing device for testing register senders. E. H. Clark. 1,624,540; Apr. 12.
Textile fabric. J. H. Bunting. Des. 72,404–7; Apr. 12.
Textile fabric. F. H. Pillsbury. Des. 72,442; Apr. 12.
Textile fabric. M. Rothschild. Des. 72,445–7; Apr. 12.
Textile fabric or similar article of manufacture. A. J. Heinke. Des. 72,421–5; Apr. 12.
Thermostat. B. Klaften. 1,624,790; Apr. 12.
Thrashing machine. A. E. H. Wallenberg. 1,624,126; Apr. 12.
Thread tightener. A. Hennig. 1,624,898; Apr. 12.

Threading machine, Nipple-. N. B. Smith. 1,624,632; Apr. 12.
Tie clasp. A. J. Smith. 1,624,514; Apr. 12.
Tie holder. J. Jensen. 1,624,737; Apr. 12.
Tin with tightly-closing cover. A. Schwieger. 1,624,901; Apr. 12.
Tire casing or similar article. F. Leopold, jr. Des. 72,431; Apr. 12.
Tire casings, Making. T. Midgley. 1,624,615; Apr. 12.
Tire patch. L. R. Moore. 1,624,619; Apr. 12.
Tire, Resilient. A. E. Bauman. 1,624,856; Apr. 12.
Tissue, measuring its length, and folding it, Machine for inspecting a piece of. J. Nanterme. 1,624,060; Apr. 12.
Toaster. S. F. Rebora. 1,624,182; Apr. 12.
Toaster. C. E. Shields. 1,624,017; Apr. 12.
Toaster and grill, Electric. E. E. Sutherland. 1,624,445; Apr. 12.
Toaster, Electric bread. J. E. Marsden. 1,624,893; Apr. 12.
Tobacco pipe. L. W. Taylor. 1,624,690; Apr. 12.
Tobacco wax and producing the same. S. Amster. 1,624,155; Apr. 12.
Toe adjuster. E. O. Johnson. 1,624,171; Apr. 12.
Tooth-cleaning device. B. Kuhne. 1,624,054; Apr. 12.
Toy. H. C. Barker. 1,624,855; Apr. 12.
Toy firearm. J. H. Wily. 1,624,086; Apr. 12.
Toy, Riding. D. Schaeffer. 1,624,627–8; Apr. 12.
Tractor. M. Moncreiffe. 1,624,110; Apr. 12.
Tractor-trailer safety coupling device. S. B. Winn. 1,623,990; Apr. 12.
Traffic-controlling apparatus, Railway-. H. A. Wallace. 1,624,520; Apr. 12.
Traffic signal. K. C. Parkhurst. 1,624,900; Apr. 12.
Train control. A. R. Angus. 1,624,524; Apr. 12.
Train control, Automatic. D. H. Schweyer. 1,624,118; Apr. 12.
Transmission, Equalization of. M. E. Strieby and C. H. Fetter. 1,624,023; Apr. 12.
Transmission, Hydraulic. E. G. Jacker. 1,624,663; Apr. 12.
Transmission, Multiplex. J. S. Jammer. 1,624,551; Apr. 12.
Transmission system. W. V. Wolfe. 1,624,646; Apr. 12.
Trap: *See*—
Animal trap.

Water from peat and the like, Removal of. O. Soderlund, T. Boberg, and N. Testrup. 1,624,769; Apr. 12.
Water gate. K. F. Liljegren. 1,624,748; Apr. 12.
Water heater, Electric. T. H. McQuinn. 1,624,843; Apr. 12.
Water softener, Two-flow base exchange. C. T. McGill. 1,624,614; Apr. 12.
Water-softening apparatus. K. W. Bartlett. 1,624,382; Apr. 12.
Water-softening reagent and preparing same. A. S. Behrman. 1,624,711; Apr. 12.
Wave motor. J. J. and W. J. Mann and M. H. Van Coeverden. 1,624,349; Apr. 12.
Wear-compensating bolt. G. C. Monckmeier. 1,624,499; Apr. 12.
Weather strip. O. C. Watkins. 1,624,295; Apr. 12.
Web-roll tension devices, Brake for. H. W. Wood and C. Nordfors. 1,623,992; Apr. 12.
Weed killer. W. D. Barnard. 1,624,033; Apr. 12.
Welding. E. A. Nelson. 1,624,501; Apr. 12.
Wheel: *See*—
Pneumatic wheel. Vehicle wheel.
Wheel. F. De Luca. 1,624,780; Apr. 12.
Wheel and brake drum. T. E. Murray. 1,624,112; Apr. 12.
Wheels for road vehicles, Construction of. G. Turner and J. E. Bishop. 1,624,771; Apr. 12.
Winding material, Apparatus for. H. I. Morris. 1,624,272; Apr. 12.
Windmill. G. W. Whitehead. 1,624,452; Apr. 12.
Window-cleaning device. E. E. Shipley. 1,624,284; Apr. 12.
Window frame. H. C. Maise. 1,624,608; Apr. 12.
Window regulator. B. J. Goldsmith and E. Koeb. 1,624,098; Apr. 12.
Window screen. J. A. Chewning. 1,624,534; Apr. 12.
Window screen. E. M. Schwarz. 1,624,368; Apr. 12.
Windshield. M. R. Hull. 1,624,170; Apr. 12.
Windshield cleaner, Motor-driven. S. Lippert. 1,624,264; Apr. 12.
Wire-drawing die. F. Vollmer. 1,624,027; Apr. 12.
Wire or the like, Mechanism for and method of coiling. F. Honig. 1,624,000; Apr. 12.
Wire tie for bundles of various kinds. S. C. Cary. 1,624,531; Apr. 12.
Wire tier, Bailing-. J. O. Carroll. 1,624,157; Apr. 12.
Wireless receiving circuits. H. J. Round. 1,624,185; Apr. 12.
Wireless signaling. M. Osnos and L. Kasarnowsky. 1,624,005; Apr. 12.
Wood-treating apparatus. G. B. Shipley. 1,623,979; Apr. 12.
Work rest. H. J. Cook. 1,624,888; Apr. 12.
Wrench. F. C. Reilly. 1,624,508; Apr. 12.
Wringer. S. E. Schroeder. 1,624,073; Apr. 12.
Wringers, Safety device for. T. Adams. 1,624,706; Apr. 12.
X-ray filter. A. St. John. 1,624,443; Apr. 12.

CLASSIFICATION OF PATENTS

ISSUED APRIL 12, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 2: 1,624,854
2— 12: 1,624,337
19: 1,624,696
22: 1,624,129
42: 1,623,973
73: 1,624,558
74: 1,624,570
78: 1,624,444
150: 1,624,737
162: 1,624,429
176: 1,624,727
278: 1,624,805
4— 57: 1,624,234
214: 1,624,016
285: 1,624,824
5— 114: 1,624,307
164: 1,624,222
344: 1,624,797

Perfumes, toilet waters, hair tonics, face lotions, etc. H. Huebschman. 226,718; Apr. 19; Serial No. 239,174; published Feb. 8, 1927.
Pharmaceutical and medical preparations. C. Leuffen & Cie. Kommanditgesellschaft. 226,860; Apr. 19; Serial No. 236,614; published Feb. 8, 1927.
Powder, Adhesive. Sealtite Chemical Co. 226,662; Apr. 19; Serial No. 237,120; published Feb. 8, 1927.
Preparation for the treatment of colds, catarrhal conditions, etc. W. E. Shore. 226,918; Apr. 19.
Preparations for the treatment of indigestion, constipation, etc.; laxative, diuretic, and eliminant preparations. M. S. Validejuli. 226,737; Apr. 19; Serial No. 236,667; published Dec. 14, 1926.
Preparations, Hair-dyeing. Actien-Gesellschaft für Anilin-Fabrikation. 62,674; renewed May 21, 1927.
Remedy for croup. Smoot Drug Co. 63,424; renewed June 18, 1927.
Remedy for reviving and promoting the better functioning of the organs and nerves, etc. B. Rottmar. 226,768; Apr. 19; Serial No. 241,960; published Feb. Apr. 19.
Salve and ointment and hand and face lotions, Scalp. A. Hastad. 226,785; Apr. 19; Serial No. 222,378; published Feb. 9, 1926.
Shampoo and corrective for dandruff. E. A. Zink. 226,861; Apr. 19; Serial No. 236,860; published Feb. 8, 1927.
Tablets, Soluble disinfectant. Creofloat Manufacturing Co. 226,733; Apr. 19; Serial No. 241,605; published Feb. 8, 1927.
Tonics, skin remedies, hairdressings, massage creams, etc., Hair. A. J. Krank. 226,816; Apr. 19; Serial No. 234,129; published Feb. 8, 1927.

CLASS 7.

Rope. Ajax Rope Company. 226,852; Apr. 19; Serial No. 239,456; published Feb. 8, 1927.
Rope and for goods of the nature of twine or rope, Sisal. Ajax Rope Company. 223,851; Apr. 19; Serial No. 239,455; published Feb. 8, 1927.
Rope, Manila. Ajax Rope Company. 226,853; Apr. 19; Serial No. 239,457; published Feb. 8, 1927.

CLASS 9.

Cartridges, loaded shells, caps, primers, and powder. Peters Cartridge Company. 63,613–17; renewed July 2, 1927.
Gun sights. Lyman Gun Sight Corporation. 64,526; renewed Aug. 13, 1927.

CLASS 11.

Carbon paper and typewriter ribbons. Corona Supply Co. 61,727; renewed Apr. 2, 1927.
Inks. Norddeutsche Wollkämmerei & Kammgarnspinnerei. 62,605; renewed May 14, 1927.
Inks, Marking and stenciling. Binney & Smith Company. 226,725; Apr. 19; Serial No. 238,158; published Feb. 8, 1927.

CLASS 12.

Shingles. Saginaw Timber Company. 226,871; Apr. 19.

CLASS 13.

Lavatories, flush tanks, hoppers, etc. Chicago Pottery Co. 226,740; Apr. 19; Serial No. 237,356; published Feb. 8, 1927.
Metal manufacturers. H. Mueller Manufacturing Company. 63,999; renewed July 16, 1927.
Metal railway-track braces, also known as gauge rods. T. H. Edelblute. 226,739; Apr. 19; Serial No. 236,122; published Feb. 8, 1927.
Pipe flanges, bands, and rings, Metal. Railway Steel-Spring Company. 58,958; renewed Dec. 25, 1926.
Valves and cocks and parts thereof. H. Mueller Manufacturing Company. 62,076; renewed Apr. 16, 1927.
Valves and cocks for steam, water, and gas distribution. H. Mueller Manufacturing Company. 64,609–11; renewed Aug. 13, 1927.
Valves, Regulating and balance. H. Mueller Manufacturing Company. 65,052; renewed Sept. 28, 1927.
Wire cloth. J. O'Neill. 226,894; Apr. 19.

CLASS 14.

Metal compounds for use in the process of welding metals. Goldschmidt Thermit Company. 61,880; renewed Apr. 9, 1927.
Steel. S. & C. Wardlow. 61,316; renewed Mar. 12, 1927.

CLASS 15.

Gasoline. Vacuum Oil Company. 226,707; Apr. 19; Serial No. 240,632; published Jan. 11, 1927.
Gasoline, kerosene, benzol, etc. Hamilton County Eureka Oil Company. 226,683; Apr. 19; Serial No. 226,526; published Jan. 25, 1927.
Naphtha, Rubber-solvent. Anderson-Prichard Oil Corporation. 226,782; Apr. 19; Serial No. 239,958; published Feb. 1, 1927.
Oils for axles and journal bearings, Lubricating. G. W. Gallaway. 63,623; renewed July 2, 1927.
Oils, Lubricating. F. B. Colgan. 226,891; Apr. 19.
Oils, Lubricating. General Petroleum Corporation. 226,686; Apr. 19; Serial No. 237,453; published Feb. 1, 1927.

CLASS 16.

Lead, White. National Lead Company. 62,136; renewed Apr. 23, 1927.
Paints, varnishes, and paint enamels. A. Solberg. 226,893; Apr. 19.
Polish, Furniture. L. M. Wolk. 226,914; Apr. 19.

CLASS 17.

Cigars. H. Fendrich, Incorporated. 226,846–7; Apr. 19; Serial Nos. 241,525–6; published Feb. 8, 1927.
Cigars. Fernandez, Pallcio y Cia. S. en C. 226,818; Apr. 19; Serial No. 234,469; published Feb. 8, 1927.

CLASS 19.

Aeroplanes. National Airways System. 226,731; Apr. 19; Serial No. 241,668; published Feb. 8, 1927.
Automobiles, comprising axles, wheels, etc., Structural elements and accessories for. F. Faudi G. m. b. H. 226,790; Apr. 19; Serial No. 206,949; published Feb. 8, 1927.
Bicycles. Supplee-Biddle Hardware Company. 226,734; Apr. 19; Serial No. 241,588; published Feb. 8, 1927.
Trucks, Motor. Walter Motor Truck Company. 226,700; Apr, 19; Serial No. 240,514; published Jan. 25, 1927.

CLASS 21.

Battery eliminators for radio sets. Acme Apparatus Company. 226,784; Apr. 19; Serial No. 223,155; published Feb. 23, 1926.
Electrically-operated suction cleaners. Scott and Fetzer Company. 226,783; Apr. 19; Serial No. 223,340; published Feb. 1, 1927.
Ignition timers. Glendale Engineering Co. 226,881; Apr. 19.
Radio broadcast receiving sets, loop antennæ, loud speakers, etc. Federal Telegraph Company. 226,880; Apr. 19.
Radio receiving sets. Sauter Bros. 226,900; Apr. 19.
Radio receiving sets, battery eliminators, etc. Harold Herbert, Inc. 226,897; Apr. 19.
Vacuum cleaners, Electrically operated. United Electric Company. 226,877; Apr. 19.

CLASS 22.

Fishhooks. O. Mustad & Son. 226,719; Apr. 19; Serial No. 239,190; published Feb. 8, 1927.
Fish lures, Artificial. Enterprise Manufacturing Company. 226,875; Apr. 19.
Golf bags. Allied Golf Company. 226,680; Apr. 19; Serial No. 228,520; published Feb. 8, 1927.

CLASS 23.

Axes. Kelly Axe Manfg. Co. 29,972; renewed May 4, 1927.
Fire extinguishers. Phister Manufacturing Company. 226,913; Apr. 19.
Flasks. Foundries Service Corporation. 226,909; Apr. 19.
Pumps, engines, wrenches, etc. A. D. Cook, Incorporated. 226,895; Apr. 19.
Saws, knives, trowels, saw handles, saw vises, etc. E. C. Atkins & Company. 226,827; Apr. 19; Serial No. 239,784; published Feb. 8, 1927.
Scrapers, Revolving tractor. Roderick Lean Company. 226,663; Apr. 19; Serial No. 237,126; published Feb. 8, 1927.
Sewing machines. New Home Sewing Machine Company. 226,672; Apr. 19; Serial No. 241,954; published Feb. 8, 1927.
Sewing machines and attachments. New Home Sewing Machine Company. 59,940–3; Jan. 22.
Sewing machines and attachments. New Home Sewing Machine Company. 59,948–53; renewed Jan. 22, 1927.
Sewing machines and attachments. New Home Sewing Machine Company. 60,078–80; renewed Jan. 29, 1927.
Sewing machines and attachments. New Home Sewing Machine Company. 60,723–5; renewed Feb. 19, 1927.
Sizing or grading machines and packing tables and hoppers, Fruit and vegetable. Rochester Rex Company. 226,811; Apr. 19; Serial No. 231,756; published Feb. 8, 1927.
Sprinklers and valves in automatic fire-extinguishing systems. Central Automatic Sprinkler Company. 226,702–3; Apr. 19; Serial Nos. 240,531–2; published Feb. 8, 1927.
Steel, Butcher's. Gustav Volk & Co. 226,863; Apr. 19; Serial No. 238,467; published Feb. 8, 1927.
Typewriting machines. Monarch Typewriter Company. 64,039; renewed July 23, 1927.
Vending machines. Vendex, Inc. 226,796; Apr. 19; Serial No. 242,031; published Feb. 8, 1927.

CLASS 26.

Battery-testing devices. Forest Electric Co. 226,905; Apr. 19.
Films, Moving-picture. Bray Productions, Inc. 226,799; Apr. 19; Serial No. 242,082; puublished Feb. 8, 1927.
Films, plates, and photographic papers. Actien-Gesellschaft für Anilin-Fabrikation. 62,741; renewed May 21, 1927.
Gauges, Liquid. Boston Auto Gage Company. 226,803; Apr. 19; Serial No. 242,224; published Feb. 8, 1927.
Navigational apparatus. Sperry Gyroscope Company. 226,684; Apr. 19; Serial No. 226,210; published Feb. 8, 1927.
Optical lenses. Shur-On Standard Optical Co. 226,670; Apr. 19; Serial No. 242,026; published Feb. 8, 1927.
Patterns for molding. Foundries Service Corporation. 226,912; Apr. 19.
Registering terrestrial vibrations and for furnishing data concerning the occurrence and extent of mineral-bearing formations, Apparatus for. Seismos G. m. b. H. 226,691; Apr. 19; Serial No. 240,885; published Feb. 8, 1927.
Thermometers and temperature-indicating devices for use on motor cars. Wilmot Manufacturing Co. Ltd. 226,879; Apr. 19.

CLASS 27.

Watches, watchcases, and watch movements. Katz & Ogush, Inc. 226,759; Apr. 19; Serial No. 240,978; published Feb. 1, 1927.
Watches, watch movements, etc. Bulova Watch Company. 226,889; Apr. 19.

CLASS 28.

Jewelry. F. J. Goldsoll. 64,783; renewed Aug. 20, 1927.
Rings, bar pins, scarf pins, bracelets, etc., Finger. Katz & Ogush, Inc. 226,758; Apr. 19; Serial No. 240,979; published Feb. 1, 1927.

CLASS 29.

Brushes. Pittsburgh Plate Glass Company. 226,901; Apr. 19.

CLASS 32.

Benches, Piano. Tonk Manufacturing Co. 226,921; Apr. 19.
Furniture. Thonet Brothers, Inc. 226,806–07; Apr. 19; Serial Nos. 235,438–9; published Feb. 8, 1927.
Mattresses, cushions, automobile seats, and spiral springs. Peerless Springs, Inc. 226,842; Apr. 19; Serial No. 241,434; published Feb. 8, 1927.
Racks, Book. Pressed and Welded Steel Products Co. Inc. 226,798; Apr. 19; Serial No. 242,066; published Feb. 8, 1927.
Steps and stool, Combined library. John Wanamaker New York. 226,833; Apr. 19; Serial No. 241,075; published Feb. 8, 1927.

CLASS 33.

Glass flasks. Imperial Trust for the Encouragement of Scientific and Industrial Research. 226,809; Apr. 19; Serial No. 235,776; published Feb. 8, 1927.

Insecticide. A. P. Thompson. 244,730; Apr. 19.
Laxative. H. R. Lathrop & Co. Inc. 245,402; Apr. 19.
Lip stick. R. Hudnut. 245,348; Apr. 19.
Lotion, Skin. R. W. Snider. 243,237; Apr. 19.
Medicinal chewing gum. Texas Gum Company. 244,634–5; Apr. 19.
Medicinal preparation. Rex-Zit Products Company. 243,016; Apr. 19.
Medicinal preparation used as a laxative. Van Vleet-Mansfield Drug Co. 240,634; Apr. 19.
Medicinal preparations for the treatment of amenorrhea. Youngs Rubber Corporation, Inc. 234,604; Apr. 19.
Medicinal preparations for the treatment of amenorrhea. Youngs Rubber Corporation, Inc. 234,606; Apr. 19.
Medicine. C. A. Fohrman. 244,611; Apr. 19.
Ointment. W. E. Rutherford. 242,353; Apr. 19.
Ointments. Burdg Brothers. 244,283; Apr. 19.
Perfumes, toilet waters, face powder, etc. S. S. Pierce Co. 245,580; Apr. 19.
Petroleum jelly, insecticide, olive oil, castor oil, antiseptic, etc. Howell Company. 243,213; Apr. 19.
Powder for rendering explosive oils nonexplosive. E. E. Jennison. 239,753; Apr. 19.
Powders and creams, toilet waters, rouges, etc., Face. E. Schultz. 212,154; Apr. 19.
Preparation for the treatment of asthma and hay fever. G. F. Alexander Co. 243,407; Apr. 19.
Preparation for the treatment of burns, scalds, sores, etc. C. T. Hendricks. 244,302; Apr. 19.
Preparation for the treatment of postoperative pain after tooth extraction. D. M. Coney. 242,570; Apr. 19.
Remedies and salve, Eye. Murine Company. 242,959; Apr. 19.
Remedies for the treatment of the blood, kidneys, and liver. Alonzo O. Bliss Medical Company. 245,468; Apr. 19.
Remedy for dog distemper. S. K. Skillman. 244,245; Apr. 19.
Remedy for the treatment of the blood, kidneys, and liver. Alonzo O. Bliss Medical Company. 245,466 Apr. 19.
Salts. Cadmium Process Company. 243,925; Apr. 19.
Salve. D. A. Coviello. 237,726; Apr. 19.
Salve. P. M. Verstynen. 244,896; Apr. 19.
Sealing compounds, mixtures, and materials for radiators and the like. W. C. Jones. 244,403; Apr. 19.
Soda ash, etc. J. B. Ford Company. 225,405; Apr. 19.
Soot cleaner. Klisoot Chemical Co. 243,814; Apr. 19.
Specific for parasites infesting the human hair. W. H. S. Laboratories. 243,330; Apr. 19.
Toilet preparations. Louray Company. 243,613; Apr. 19.
Toilet preparations. Chas. A. Stevens & Bros. 229,476; Apr. 19.
Toilet preparations. Antiseptic. Parfymeri F. Pauli A/B. 239,315; Apr. 19.
Tonic, hairdressing, and eau de quinine, Hair. Odell Company. 242,495; Apr. 19.
Tooth powders. F. Brookfield Slater. 244,516; Apr. 19.
Water-soluble preparations containing cell-building protein substances. J. A. Von Wülfing. 245,171; Apr. 19.

CLASS 9.

Pistol caps. M. Backes' Sons, Inc. 245,530; Apr. 19.

CLASS 10.

Fertilizers. I. G. Farbenindustrie Aktiengesellschaft. 241,657–9; Apr. 19.
Fertilizing materials. Otto Wittbold Nursery. 245,238; Apr. 19.

CLASS 12.

Asphalt. J. J. Flannery. 226,643; Apr. 19.
Cement. Petoskey Portland Cement Co. 243,775; Apr. 19.
Cement, Portland. Universal Portland Cement Co. 237,934; Apr. 19.
Flooring, Composition. American Jointless Flooring Co. 244,125; Apr. 19.

CLASS 13.

Dishes, boilers for cooking foods, cake pans, etc., Baking. Aluminum Goods Manufacturing Co. 244,909; Apr. 19.
Fixtures, valves, etc. Shampooing. Street & Kent Mfg. Company. 241,642; Apr. 19.
Ladles, tea strainers, napkin rings, plates, dishes, etc., Gravy. Dirigold Corporation. 226,641; Apr. 19.
Racks, foot baths, dish pans, sink strainers, etc., Pot-cover-display. Republic Metalware Co. 239,428; Apr. 19.
Screens, Wire cloth for. Hanover Wire Cloth Co. 244,930–32; Apr. 19.
Soldering nipples. Mueller Co. 244,565; Apr. 19.

CLASS 16.

Colors for hand painting on textile fabrics, Liquid. Leo Uhlfelder Co. 244,194; Apr. 19.
Liquid polish for pianos, furniture, and automobiles. C. A. Sullivan. 243,832; Apr. 19.
Paint for coloring and waterproofing. Grassphalte Hard Courts Limited. 242,429; Apr. 19.
Paints, varnishes, enamels, etc., ready-mixed. Diamond Oil & Paint Co. 243,691; Apr. 19.
Paints, varnishes, paint enamels, etc. Payson Varnish Co. 244,412; Apr. 19.
Polish. E. R. Purvis. 203,387; Apr. 19.
Polish, Furniture. J. R. Stanko. 244,372; Apr. 19.
Polishes. Elson and Elson. 242,527; Apr. 19.
Varnishes. Elco Paints Products, Inc. 238,258; Apr. 19.
Varnishes. Morgan Company. 245,156; Apr. 19.

CLASS 17.

Cigars. Z. Goodman. 245,628; Apr. 19.
Tobacco, Chewing and smoking. C. G. Rangos. 245,583; Apr. 19.

CLASS 19.

Airplanes. Pitcairn Aircraft, Inc. 244,883–4; Apr. 19.
Automobiles and constructive parts thereof. Elysee Delivery de Luxe Corporation. 238,311; Apr. 19.
Bicycles. Excelsior Cycle Company. 208,847; Apr. 19.
Couplers. National Malleable and Steel Castings Company. 245,285; Apr. 19.

CLASS 20.

Floor coverings. C. Zimmerman. 225,214; Apr. 19.
Plastic-coated paper, Wall covering comprising. Lincrusta-Walton Company. 243,381; Apr. 19.

CLASS 22.

Bait, Fish. P. Lubetich. 244,018; Apr. 19.
Shoofties, hobbyhorses, and toy rockers. Whitney Reed Corporation. 244,338; Apr. 19.

CLASS 23.

Engines, Aeronautical. Wright Aeronautical Corporation. 242,763; Apr. 19.
Fire extinguishing apparatus, Portable hand. Knight & Thomas, Inc. 244,450; Apr. 19.
Machine used in the manufacture of sodium hypochloride solution. Valhalla Company. 245,461; Apr. 19.
Pistons. Accuralite Company. 239,731; Apr. 19.
Planters, guano distributors, etc., Cotton. Gantt Manufacturing Company. 235,643; Apr. 19.
Printing machines, Embossed. Proffatt & Marans. 245,224; Apr. 19.
Pumps, battery connecter drills, and automobile band adjusters, Automobile oil. G. L. Cunningham. 237,494; Apr. 19.
Sugar-mill imbibition devices. Farrel Foundry & Machine Company. 245,393; Apr. 19.
Typewriting machines and parts thereof. Rheinische Metallwaaren- und Maschinenfabrik. 241,498; Apr. 19.
Wrench sets, socket-wrench sets, etc., Nut. Indestro Mfg. Co. 228,653; Apr. 19.

CLASS 25.

Safe, Wall. Murphy Door Bed Company of Chicago. 229,808; Apr. 19.

CLASS 26.

Adding, calculating, multiplying, and computing machines. P. Rialik. 244,129; Apr. 19.
Adjacent and remote automatic production machinery and comprising mechanism, Control apparatus for. Electric Production Appliance Corp. 237,227; Apr. 19.

CLASS 29.

Brushes. Du Pont Viscoloid Company. 244,820; Apr. 19.
Brushes. A. W. Hahn. 245,396; Apr. 19.
Toothbrushes. P. B. T. Williams. 245,388; Apr. 19.

CLASS 32.

Beds, cots, couches, and cribs. Montauk Bed Co. Inc. 234,789; Apr. 19.
Furniture. Oneidacraft, Inc. 238,133; Apr. 19.

CLASS 34.

Burners and parts thereof, Oil. Weithorn Oil Burner Company. 244,642; Apr. 19.
Stoves and ranges, Wood, coal, gas, oil, and vapor. American Range Corporation. 245,182; Apr. 19.

CLASS 35.

Belts, Machinery-driving. James Hendry Limited. 244,870; Apr. 19.

CLASS 37.

Blank forms. Tax Digest, Inc. 230,605; Apr. 19.
Diaries. Samuel Ward Manufacturing Company. 244,721; Apr. 19.
Envelopes. Magill-Weinsheimer Company. 244,876–7; Apr. 19.
Paper, Printed. American Register Company. 233,904; Apr. 19.
Paper, Wall. Tait Paper and Color Industries, Inc. 243,398; Apr. 19.
Tape, Textile-fabric. Mid-States Gummed Paper Company. 245,741–2; Apr. 19.

CLASS 38.

Cartoons, Title for. New York Evening Post Inc. 243,822; Apr. 19.
Newspaper. Glendale Shopping News. 243,358; Apr. 19.
Newspaper. H. W. McGuire. 243,384; Apr. 19.
Newspaper. Nowy Swiat Publishing Company Inc. 243,166; Apr. 19.
Periodicals. Chicago Bridge & Iron Works. 231,903; Apr. 19.

CLASS 39.

Belts, suspenders, garters, and braces, Waist. Martins-Birmingham Limited. 237,180; Apr. 19.
Blouses and dresses. Rubin Blouse & Dress Company. 243,458; Apr. 19.

Vests, nightgowns, camisoles, bath robes, etc., Ladies' textile. C. J. Farley & Co. 236,922; Apr. 19.

CLASS 40.

Ribbon novelties. H. A. Enrich. 243,801; Apr. 19.
Tapes and trimmings of fabric, Bias-fold. William E. Wright and Sons Company. 244,907; Apr. 19.

CLASS 42.

Cotton piece goods. J. L. Stifel & Sons. 245,593; Apr. 19.
Handkerchiefs. Sullivan Smythfield Company. 245,813; Apr. 19.
Rugs, Textile. Kent-Costikyan Trading Company. 245,724; Apr. 19.
Rugs, Wool. Waite Carpet Co. 242,159; Apr. 19.
Serges in the piece. R. Spitzer. 203,760; Apr. 19.
Silk piece goods. Haytock-Cronemeyer Co. 245,640; Apr. 19.
Textile fabrics. Duplan Silk Corporation. 244,433; Apr. 19.
Woven, knitted, netted, and textile fabrics in the piece. American Cellulose & Chemical Manufacturing Company. 243,838; Apr. 19.

CLASS 43.

Thread. Gardiner Hall Jr. Company. 245,001–2; Apr. 19.
Thread. Gardiner Hall Jr. Company. 245,005; Apr. 19.
Yarn, Rayon. Viscose Company. 245,402; Apr. 19.

CLASS 44.

Electromagnetic therapeutical coils. A. J. C. Bernard. 240,520; Apr. 19.

CLASS 45.

Beverages. Drewrys Limited. 238,043; Apr. 19.
Beverages and sirups. Coca-Cola Company. 242,569; Apr. 19.
Beverages and sirups for making the same. Mavis Corporation. 244,360; Apr. 19.
Beverages sold as soft drinks. Westchester Bottling Works. 245,125; Apr. 19.
Beverages sold as soft drinks and sirups for making the same. M. J. Kraft. 245,500; Apr. 19.
Chocolate sirup used in the preparation of soft drinks. Bowey's, Inc. 237,775; Apr. 19.
Extracts and flavors for soft drinks. Hagen-Becker Company. 244,558; Apr. 19.
Ginger ale. Curran & Joyce Co. 245,477; Apr. 19.
Ginger ale. Natural Dry Ginger Ale Corp. 240,434; Apr. 19.
Ginger ale, carbonated water, and root beer. Peacock Ale Co. 234,731; Apr. 19.

CLASS 46.

Bacon. E. M. Todd Co. 216,238; Apr. 19.
Butter. C. W. Bush. 245,469; Apr. 19.
Candies. Betty Ann Candy Company. 239,842; Apr. 19.
Candy. Corn Products Refining Company. 244,289; Apr. 19.
Candy. Royal Candy Company. 245,453; Apr. 19.
Canned fish. R. E. Cotter Company. 236,911; Apr. 19.
Canned fruits, canned crab meat, salmon, milk, beans, etc. Wilcox-Hayes Company. 244,200; Apr. 19.
Canned goods. E. T. Smith Company. 243,831; Apr. 19.
Canned razor clams. N. E. Willis. 244,525; Apr. 19.
Canned vegetables. Carroon & Co. 244,656–8; Apr. 19.
Cereal breakfast food. Hoyland Flour Mills Company. 242,231; Apr. 19.
Cheese. J. Caspary. 244,391; Apr. 19.
Coffee. Diamond Coffee Mills, Inc. 242,046; Apr. 19.
Coffee. Fletcher-Wilson Coffee Co. 245,262; Apr. 19.
Coffee. San Antonio Coffee Co. 244,722; Apr. 19.
Corn flakes. W. T. McElroy. 243,317; Apr. 19.
Eggs. George Ehlenberger & Company. 244,004; Apr. 19.
Extracts, Food-flavoring. Greever-Lotspeich Mfg. Co. 244,153; Apr. 19.
Feeds, Stock and poultry. Coles Company. 228,976; Apr. 19.
Feeds, Stock and poultry. Coles Company. 229,541; Apr. 19.
Flour, Wheat. International Milling Company. 245,559; Apr. 19.
Flour, Wheat. Pillsbury Flour Mills Company. 245,223; Apr. 19.
Flour, Wheat. Washburn-Crosby Company. 245,384; Apr. 19.

Flour, wheat shorts, bran, cereal breakfast food, etc., Wheat. Norfolk Cereal and Flour Mills Company. 228,259; Apr. 19.
Food, self-rising pancake flour, whole-wheat flour, etc., Breakfast. C. F. Earley & Son. 245,343; Apr. 19.
Fowls, eggs, and cans of frozen eggs, Dressed. F. C. Pennington Produce Company. 244,104; Apr. 19.
Fruits and fresh vegetables, Fresh citrous. Southern Fruit Distributors, Inc. 245,587; Apr. 19.
Jams, jellies, fruit butters, canned fruits and vegetables. Pacific Northwest Canning Company. 240,088; Apr. 19.
Mincemeat. Old Time Mince Meat Corporation. 241,295; Apr. 19.
Pectin, acidified sugar mixture for use in quick jelly-making processes. Speas Manufacturing Company. 244,190; Apr. 19.
Potatoes. Zuckerman Brothers. 236,979; Apr. 19.
Raisins and grapes, Preserved and canned. Rubyette Co. 245,373; Apr. 19.
Salad dressing. L. A. Dickinson. 244,141; Apr. 19.
Sauerkraut. Clyde Kraut Company. 244,427; Apr. 19.
Tow foo, canned bean sprouts, soups, etc. T. Lam. 242,198; Apr. 19.
Vegetables, cantaloupes, and fresh deciduous fruits, Fresh. Chas. H. Jandt Packing Co. 238,908; Apr. 19.

CLASS 47.

Wines, Champagne. Lanson Pere & Fils (Societe a Responsabilite Limitee). 245,732; Apr. 19.

CLASS 48.

Malt sirup. Madison Malt Extract Company. 244,618; Apr. 19.
Malt sirup. A. C. Taylor. 237,295–6; Apr. 19.

CLASS 50.

Floor coverings including hair rug cushions, hair carpet lining, and hair stair pads. Densten Felt and Hair Company. 243,930; Apr. 19.
Shoe forms. Shoe Form Co. 240,220; Apr. 19.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 19TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A. B. Stove Company. (See Reedy, Alfred J., assignor.)
Abbott, John E., Spring Valley, Calif. Container for milk bottles. 1,625,183; Apr. 19.
Abel, Joseph C., Brooklyn, N. Y. Holding molding. 1,625,637; Apr. 19.
Abell-Howe Co. (See Haeger, Milton O., assignor.)
Acme Clutch Company. (See Geist, Walter, assignor.)
Acme Wire Co., The. (See Archer, Harry W., assignor.)
Adams, Walter S., assignor to The J. G. Brill Company, Philadelphia, Pa. Slack adjuster for brake mechanism. 1,625,695; Apr. 19.
Adle, Harry P., and P. Gilpin, Cleveland, Ohio. Motor. 1,624,905; Apr. 19.
Advance Machine Company. (See Richardson, M. H., and Gebert, assignors.)
Advance-Rumely Company. (See Secor, John A., assignor.)
Airubber Corporation. (See Anderson, Arvid E., assignor.)
Albin, Herman, St. Louis, Mo. Passenger car. 1,625,443; Apr. 19.
Albrecht, Christian A., Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y. Typographical composing machine. 1,625,696; Apr. 19.
Allegheny Steel Company. (See Caugherty, William E., assignor.)
Allen, John H. (See Riegel, Samuel S., assignor.)
Allen, Mildred C., Highland Park, Ill. Child's garment. 1,625,184; Apr. 19.
Allen, S. L., & Co. (See Yancey, Samuel H., assignor.)
Altwickler, Carl, Gotha, assignor to Deutsche Werke Aktiengesellschaft, Berlin-Wilmersdorf, Germany. Alternating-current motor. 1,625,760; Apr. 19.
American Can Company. (See Loesel, Nicholas, assignor.)
American Can Company. (See McCann, Leland R., assignor.)
American Can Company. (See Peters, John F., assignor.)
American Can Company. (See Stollberg, Charles, assignor.)
American Multigraph Company, The. (See Hult, John A., assignor.)
American Steel and Wire Company of New Jersey, The. (See Thomas, Edward, assignor.)
American Sundries Co. (See Lawner, Nicholas, assignor.)
American Telephone and Telegraph Company. (See Blackwell, O. B., and Herman, assignors.)
American Telephone and Telegraph Company. (See Faries, Charles L., assignor.)
American Telephone & Telegraph Company. (See Morris, Robert W., assignor.)
American Tool Works Company, The. (See Robinson, Albert E., assignor.)
Ames, James W., Montclair, N. J. Utilizing waste rubber. 1,624,913; Apr. 19.
Amodio, Robert, assignor of one-half to H. C. d'Annunzio, Rochester, N. Y. Heat indicator for heated tools. 1,625,014; Apr. 19.
Anchor Manufacturing Company. (See Katz, Frank, assignor.)
Anderson, Andrew G., Wollaston, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,625,406; Apr. 19.
Anderson, Arvid E., assignor to Airubber Corporation, Chicago, Ill. Flexible hollow article and making the same. 1,625,582; Apr. 19.
Anderson, August P., Toledo, Ohio. Automatic fluid-controlling device. 1,625,185; Apr. 19.
Anderson, Charles M., Salt Lake City, Utah. Flow meter. 1,625,583; Apr. 19.
Anderson, Mervyn F., and T. F. Clark, Hoboken, N. J. Brake. 1,625,584; Apr. 19.
Andres, William J., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake mechanism. 1,625,444; Apr. 19.
Angier, Edward H. (See Wheildon, William M., assignor.)
Antrobus, Mary, London, England. Chair. Des. 72,464; Apr. 19.
Antrobus, Mary, London, England. Sideboard. Des. 72,465; Apr. 19.
Archer, Harry W., assignor to The Acme Wire Co., New Haven, Conn. Core for spools, reels, bobbins, and the like. 1,625,585; Apr. 19.
Archer, Thomas P., and E. E. Heintz, assignors to Ternstedt Manufacturing Company, Detroit, Mich. Window regulator. 1,625,186; Apr. 19.
Argentographica (U. S. A.) Limited. (See de'Sperati, Mariano, assignor.)
Arnold, Marvin L. (See Beechtel, David W., assignor.)
Aron Electric Razor Company. (See Aron, William P., assignor.)
Aron, William P., Dallas, Tex., assignor to Aron Electric Razor Company, Wilmington, Del. Electrical safety razor. 1,625,015; Apr. 19.
Arras, George, and D. E. Worrell, Chicago, Ill. Adjustable fixture. 1,625,069; Apr. 19.
Astrom, John, and V. L. Tannehill, Fort Wayne, Ind. Static eliminator. 1,625,445; Apr. 19.
Attleboro Braiding Co. (See Burlingame, Fred E., assignor.)
Audibert, Jean, Villeurbanne, France, assignor to the corporation Societe des Films en Couleur Keller Dorian of France. Method and apparatus for producing films for color photography. 1,625,586; Apr. 19.
Austin, Arthur O., and D. K. Macleod, Barberton, assignors, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Apparatus for forming plastic materials. 1,625,514; Apr. 19.
Automatic Electric Inc. (See Bellamy, John I., assignor.)
Automatic Electric Inc. (See Martin, Talbot G., assignor.)
Automatic Electric Inc. (See Pracht, Carl J., assignor.)
Automatic Electric, Inc. (See Richardson, Rodney G., assignor.)
Automatic Shoe Shiner Corporation. (See Thomas, Harold D., assignor.)
Ayres, Arthur U. (See Jones, L. D., and Ayres.)
Backstrom, Gustaf V. (See Brown, Perry O., assignor.)
Bailey, David R., Sacramento, assignor to California Almond Growers Exchange, San Francisco, Calif. Apparatus for treating food products. 1,625,070; Apr. 19.
Bailey, William R., Elmhurst, Ill. Automobile bed. 1,625,515; Apr. 19.
Baits, Stuart G. (See Fekete, S. I., and Baits.)
Baker, John C., Lake Bluff, assignor to Fansteel Products Company, Inc., North Chicago, Ill. Making breaker arms. 1,625,697; Apr. 19.
Baker-Perkins Company. (See Engels, Eugene O., assignor.)
Baldyzar, Stephan, Racine, Wis. Phonograph. 1,625,446; Apr. 19.
Ballard, Arthur H., assignor to Ballard Oven Corporation, Boston, Mass. Baking oven. 1,625,761; Apr. 19.
Ballard Oven Corporation. (See Ballard, Arthur H., assignor.)
Balzer, Fritz, Moline, assignor to Troy Laundry Machinery Co., Ltd., Chicago, Ill. Garment press. 1,625,071; Apr. 19.
Bangs, Ralph C. (See Franke, H. C., and Bangs.)
Bankson, William R., Pittsburgh, Pa. Conveyer. 1,625,347; Apr. 19.
Banner, Otto A., assignor to The Falk Corporation, Milwaukee, Wis. Oil engine. 1,625,113; Apr. 19.
Barber Asphalt Company, The. (See Freegard, William, assignor.)
Barber-Colman Company. (See Colman, Howard D., assignor.)
Barger, Fred H., Cherry Valley, Ark. Carburetor. 1,625,516; Apr. 19.
Barghausen, John F., Takoma Park, D. C. Refrigerated display counter. Re16,595; Apr. 19.
Barker, Edwin H., Moylan, assignor to A. H. Wirz, Inc., Chester, Pa. Reenforcement for sprinkler tops. 1,625,016; Apr. 19.
Barkschat, Henry, assignor to Marbelite Corporation of America, Los Angeles, Calif. Lamp post or similar article. Des. 72,466; Apr. 19.
Barkschat, Henry, assignor to Marbelite Corporation of America, Los Angeles, Calif. Lamp post or similar article. Des. 72,467; Apr. 19.
Barnes, Charles H., Ilion, N. Y. Trigger mechanisms for firearms. 1,625,768; Apr. 19.
Barrymore Concrete Mixer Corporation. (See Barrymore, O. C., and Daddisman, assignors.)
Barrymore, Orson C., and R. A. Daddisman, assignors to Barrymore Concrete Mixer Corporation, San Francisco, Calif. Concrete mixer. 1,625,762; Apr. 19.

Bartholomew, John. (See Lyon, John S., assignor.)
Barton, William H., Montclair, N. J. Packing for gate valves. 1,625,698; Apr. 19.
Baskin, Louis, and M. Sternberg, Chicago, Ill. Combination ash tray and lamp cap. Des. 72,468; Apr. 19.
Battle, William T., assignor to G. F. Berkander, Providence, R. I. Barrette. 1,625,587; Apr. 19.
Bauer, John, Detroit, Mich. Windshield. 1,624,906; Apr. 19.
Bay View Furniture Company. (See Lindemann, Marvin C., assignor.)
Baynes, James B., Buffalo, N. Y. Engine. 1,625,638; Apr. 19.
Bayport Foundry Company. (See Relland, Ernest S., and P. M., assignors.)
Beamer, Charles W., Tonopah, Nev. Combination brace and drill. 1,625,517; Apr. 19.
Bearfoot Sole Co. Inc. (See Calvin, Edwin, assignor.)
Bechtold, William S., Newark, N. J. Mirror or similar article. Des. 72,469; Apr. 19.
Becker, William P., Pelham, assignor to The New York Last Company, New York, N. Y. Last. 1,625,588; Apr. 19.
Beechtel, David W., assignor of forty-nine per cent to M. L. Arnold, Los Angeles, Calif. Tire valve. 1,624,914; Apr. 19.
Behrman, Marcus B., assignor to The Lox Seal Corporation, Brooklyn, N. Y. Pile-wire cutter and making it. 1,625,072; Apr. 19.
Beisel Spring Wheel Corporation. (See Beisel, William J., assignor.)
Beisel, William J., Port Richmond, assignor to Beisel Spring Wheel Corporation, New York, N. Y. Spring wheel. 1,625,518. Apr. 19.
Bellamy, John I., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,625,235; Apr. 19.
Bendix Brake Company. (See Andres, William J., assignor.)
Benedict, Clifton E., Spokane, Wash. Cream separator. 1,625,385; Apr. 19.
Benice, Theodore S., Los Angeles, Calif. Exerciser. 1,625,447; Apr. 19.
Bennie, Harold C., Almena, Kans. Tricycle. 1,624,915; Apr. 19.
Benton, Arthur R., Beverly Hills, Calif. Hand oiler. 1,625,699; Apr. 19.
Berggren Engineering Corporation. (See Hall, Frederick, assignor.)
Bergve, Einar. (See Freng, J., and Bergve.)
Berkander, George F. (See Battle, William T., assignor.)
Berry, Bert C., Calgary, Alberta, Canada, assignor to Berry Shocker Incorporated, Wilmington, Del. Shocker. 1,625,386; Apr. 19.
Berry Shocker Incorporated. (See Berry, Bert C., assignor.)
Berthelsen, Carl F., Frederiksberg, near Copenhagen, Denmark. Light projector. 1,625,763; Apr. 19.
Bertrand, Frederic E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on lasts. 1,624,916; Apr. 19.
Besser, William, Wauwatosa, Wis. Manifold electric heater. 1,625,448; Apr. 19.
Bewsick, William W., Shelby, assignor to The Cleveland Trust Company, Cleveland, Ohio. Round fabric belt and method and apparatus for forming the same. 1,625,348; Apr. 19.
Bir, Herman M., Lima, Ohio. Diffusing and coloring rays of light. 1,625,407; Apr. 19.
Birch, William T., Chicago, Ill. Foot pad. 1,625,187; Apr. 19.
Birchard, Ford G., Lewisburg, Pa. Airship and making the same buoyant. 1,624,917; Apr. 19.
Birkholz, Edward P., Colonia, N. J. Circuit closer. 1,625,017; Apr. 19.
Black, Archibald, Garden City, N. Y. Freight-airplane body. 1,625,700; Apr. 19.
Black, Archibald, Garden City, N. Y. Airplane and other aircraft body. 1,625,701; Apr. 19.
Blackburn, Jasper, Webster Groves, Mo. Preselecting and shifting mechanism for sliding-gear transmissions. 1,625,188; Apr. 19.
Blackwell, John B., San Antonio, Tex. Cactus burner. 1,625,702; Apr. 19.
Blackwell, Otto B., Plandome, and J. Herman, New York, N. Y., assignors to American Telephone and Telegraph Company. Method and apparatus for television. 1,624,918; Apr. 19.
Blank, Merton H., Indianapolis, Ind. Internal-combustion engine. 1,625,189; Apr. 19.
Bletcher, Ralph E., and E. H. Bucknell, Los Angeles, Calif. Silencer or flow regulator for valves, faucets, and the like. 1,625,589; Apr. 19.
Bludworth, William D., Sacramento, Calif. Goat and darkie toy. Des. 72,470; Apr. 19.
Blunt, Toran, Chicago, Ill. Hot-water bag. 1,625,018; Apr. 19.
Boardman, Frank E., assignor of one-half to P. P. Williams, Memphis, Tenn. Apparatus for controlling elevators. 1,625,073; Apr. 19.
Bobo, Edward H., Ranger, Tex. Rheostat. 1,625,703; Apr. 19.
Bohn, Harry E., and R. H. Fauquier, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Molding phenol plastic or like compounds. 1,625,449; Apr. 19.
Bollinger, Charles, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Furnace. 1,625,450; Apr. 19.
Bommer, Emil, Brooklyn, N. Y. Pivot spring hinge. 1,624,919; Apr. 19.
Bonilla, Benjamin M., New Orleans, La. Life-saving means for sunken ships. 1,625,704; Apr. 19.
Booth, Herbert L., Beverly Hills, Calif. Wave motor. 1,625,519; Apr. 19.
Borack, Louis. (See Nadworney, Charles, assignor.)
Bosley, Maurice E., Chicago, Ill. Weather stripping. 1,625,764; Apr. 19.
Bouchard, Arsene J., Providence, R. I. Banjo. 1,625,387; Apr. 19.
Bourgon, Joseph H., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Ventilator. 1,624,907; Apr. 19.
Bowman, Lewis N., assignor of one-eighth to H. H. Harrison and one-eighth to A. R. White, Chicago, Ill. Liquid fuel. 1,625,236; Apr. 19.
Bowman, Lewis N., assignor of one-eighth to H. H. Harrison and one-eighth to A. R. White, Chicago, Ill. Liquid fuel. 1,625,237; Apr. 19.
Bowman, Oliver S., Colorado Springs, Colo. Vertical fire-tube boiler. 1,624,908; Apr. 19.
Bowman, Oliver S., Colorado Springs, Colo. Ash-handling equipment. 1,624,908; Apr. 19.
Boynton, Oliver R., St. Louis, Mo. Toilet-paper-roll holder. 1,625,190; Apr. 19.
Braden, Albert R., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making dies. 1,624,920; Apr. 19.
Bradley, Catherine and L. M., Bathurst, New Brunswick, Canada. Waxed milk-bottle stopper made of pasteboard. 1,625,706; Apr. 19.
Bradley, John J., West Springfield, Mass. Sash fastener. 1,625,238; Apr. 19.
Bradley, Lillian M. (See Bradley, Catherine and L. M.)
Brady, Thomas, East Orange, N. J., assignor, by mesne signments, to Otis Elevator Company, New York, N. Y. Door closer. 1,624,910; Apr. 19.
Brady, Thomas, East Orange, N. J., assignor, by mesne assignments, to Otis Elevator Company, New York, N. Y. Door closure. 1,624,911; Apr. 19.
Brenzinger, Julius, Fairfield, and P. H. Lange, assignors to The Max Ams Machine Company, Bridgeport, Conn. Heading machine and body-conveying means. 1,625,039; Apr. 19.
Bridgeport Brass Company. (See Oakley, Erastus G., assignor.)
Briggs Manufacturing Company. (See Maise, Herman C., assignor.)
Brill, J. G., Company, The. (See Adams, Walter S., assignor.)
Broadmeyer, Albert, assignor to The W. O. Hickok Mfg. Company, Harrisburg, Pa. Paper-feeding apparatus. 1,624,912; Apr. 19.
Broadmeyer, Albert, assignor to The W. O. Hickok Manufacturing Company, Harrisburg, Pa. Feeding mechanism for ruling machines and the like. 1,625,239; Apr. 19.
Brophy, James M., Hattiesburg, Miss. Sawmill-dog-actuating mechanism. 1,625,240; Apr. 19.
Broughton, Winn E., assignor to The Turner Tanning Machinery Company, Peabody, Mass. Leather-working machine. 1,624,921; Apr. 19.
Brown, Alfred B., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for drying and storing material. 1,625,451; Apr. 19.
Brown, Frank. (See Snowdon, C., and Brown.)
Brown, Max, Brooklyn, N. Y., assignor to Royal Metal Lighting Fixture Co., Inc. Lighting-fixture strap. Des. 72,471; Apr. 19.
Brown, Perry O., assignor of one-half to G. V. Backstrom, St. Vincent, Minn. Railway switch. 1,625,241; Apr. 19.
Broyles, Leo T., Entiat, Wash. Wrench. 1,624,922; Apr. 19.
Brunner, Theodore P., Los Angeles, Calif. Escape trick device. 1,625,452; Apr. 19.
Bruno, C., & Son, Inc. (See Stark, Theodore H., assignor.)
Buchner, Winfield S., et al. (See Thurston, Charles B., assignor.)
Buckeye Incubator Company, The. (See Linhart, Lena E., assignor.)
Bucknell, Ernest H. (See Bletcher, R. E., and Bucknell.)
Burdsall, Raymond W., Gloucester Heights, N. J. Signal apparatus. 1,624,923; Apr. 19.
Burger, Frederick W. (See Stockfleth, B., and Burger.)
Burgess, Robert, Newton Center, assignor of one-half to J. H. Jones, Winthrop, Mass. Cap spinning frame. 1,625,520; Apr. 19.
Burgett, Orr, Scobey, Mont. Grain-mixing and chemical-treating machine. 1,625,521; Apr. 19.
Burlingame, Fred E., Pawtucket, R. I., assignor to Attleboro Braiding Co., South Attleboro, Mass. Lacing-tipping machine. 1,625,522; Apr. 19.

Burns, David E., deceased; Grand Rapids Trust Company, executor, assignor to C. G. Willett, Grand Rapids, Mich. Road-scraper-adjusting mechanism. 1,625,019; Apr. 19.
Butz, Walter D., Norristown, Pa. Stocking. 1,625,523; Apr. 19.
Caldwell, Erwin, Birmingham, Ala., assignor to Perry-Caldwell Manufacturing Company (Inc.) Blow-off device for steam boilers. 1,625,707; Apr. 19.
Caldwell, Truman S., assignor to Racine Horseshoe Tire Company, Racine, Wis. Tire. Des. 72,472; Apr. 19.
Caldwell, Truman S., assignor to Racine Horseshoe Tire Company, Racine, Wis. Tire. Des. 72,473; Apr. 19.
California Almond Growers Exchange. (See Bailey, David R., assignor.)
California Packing Corporation. (See Olivarius, Holger de F.)
Calvin, Edwin, Squantum, assignor to Bearfoot Sole Co. Inc., Boston, Mass. Shoe sole. Des. 72,474; Apr. 19.
Cameron, Cheever J., et al. (See Williams, Arthur J., assignor.)
Camp, Percy B., Maywood, Ill., assignor to Universal Draft Gear Attachment Co. Brake mechanism. 1,624,924; Apr. 19.
Canfield, Robert W., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Apparatus for shaping glassware. 1,625,590; Apr. 19.
Cantori, Joseph, St. Charles, Ill. Window retainer. 1,625,295; Apr. 19.
Capuano, Crescenzo, Los Angeles, Calif. Pants and pocket ruler. 1,625,453; Apr. 19.
Capwell, Vernon L., Clinton, Ind. Razor-stropping device. 1,625,408; Apr. 19.
Cardwell, Thomas, Sedalia, Mo. Rail for locomotive stalls. 1,625,454; Apr. 19.
Carolyn Laundry. (See Lane, Edwin, assignor.)
Carr Fastener Company. (See Anderson, Andrew G., assignor.)
Carraine, Eugene, Philadelphia, Pa. Illuminated sign. 1,625,708; Apr. 19.
Cary Manufacturing Co. (See Cary, Spencer C., assignor.)
Cary Manufacturing Co. (See Frech, William F., assignor.)
Cary, Spencer C., Brooklyn, assignor to Cary Manufacturing Co., Brooklyn, N. Y. Wire-working machine. 1,624,925; Apr. 19.
Case, J. I., Threshing Machine Company. (See Dugan, Thomas, assignor.)
Case Research Laboratory Incorporated. (See Case, Theodore W., assignor.)
Case, Theodore W., assignor to Case Research Laboratory Incorporated, Auburn, N. Y. Light-reactive apparatus. 1,625,409; Apr. 19.
Caugherty, William E., Natrona, Pa., assignor, by mesne assignments, to Allegheny Steel Company, Brackenridge, Pa. Manufacture of steel sheets. 1,625,524; Apr. 19.
Cazares, Jose L., Los Angeles, Calif. Sensitizing print papers. 1,625,349; Apr. 19.
Chaffee, Emory L., Belmont, Mass. Modulating signaling currents. 1,625,296; Apr. 19.
Chandler, Daniel L., Worcester, assignor, by mesne assignments, to W. H. Whitcomb, Newton, Mass. Coin-controlled and change-making turnstile apparatus. 1,625,242; Apr. 19.
Chase, Earl G., Smethport, Pa. Mask for electric-light bulbs. 1,625,591; Apr. 19.
Chicago-Cleveland Car Roofing Company. (See Wright, William, assignor.)
Chilson, Lewis S., assignor to J. M. Fisher Company, Attleboro, Mass. Belt buckle. 1,625,388; Apr. 19.
Chovanec, Michael, Hazleton, Pa. Combination lid and lifting device. 1,624,926; Apr. 19.
Cincinnati Milling Machine Company, The. (See Nenninger, Lester F., assignor.)
Clark, Leverett M., assignor to Railway Improvement Company, New York, N. Y. Automatic lubricating device. 1,625,074; Apr. 19.
Clark, Theodore F. (See Anderson, M. F., and Clark.)
Clark Tructractor Company. (See Stockfleth, B., and Burger.)
Clarke, Charles W. E., New York, N. Y. Soot-blower connection. 1,624,927; Apr. 19.
Clement, Hans, New York, and G. S. Dey, Mount Vernon, N. Y., assignor to General Optical Company. Ophthalmological apparatus. 1,625,075; Apr. 19.
Cleveland Trust Company, The. (See Bewsick, William W., assignor.)
Cleveland Trust Company, The. (See De Voe, Albert H., assignor.)
Coene, Gaston E. (See Scheluto, J., and Furnemont, assignors.)
Collins, D. G., et al. (See Gardner, William R., assignor.)
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Warp-drawing machine. 1,624,928; Apr. 19.
Colomb, Henri, Tavannes, Switzerland. Manufacturing process of making blanks for watch movements provided with jewel-insetting or plug holes. Re16,596; Apr. 19.
Colorgraph Laboratory, Inc. (See Hernandez, Mejia, Arturo, assignor.)
Columbia Phonograph Company. (See Hinckley, Frank C., assignor.)
Combustion Engineering Corporation. (See Nygaard, Oscar O., assignor.)
Comkle, William H. (See Corson, Henry J., assignor.)
Conant, Ellsworth T., and L. S. McLane, Honomu, Hawaii. Liquid-mixing apparatus. 1,625,592; Apr. 19.
Condon, Gertrude G., Oakland, Calif., assignor to The Hoover Company. Hand and finger protector. 1,625,191; Apr. 19.
Conrad, Bertha L. (See Conrad, Frederick, assignor.)
Conrad, Frederick, assignor of one-half to B. L. Conrad, Bogota, N. J. Sediment trap for boilers. 1,625,709; Apr. 19.
Conti, Eugene, Cliffside Park, N. J., assignor to A. Herz, New Rochelle, N. Y. Machine for forming, printing, and assembling envelopes. 1,625,350; Apr. 19.
Cooper, Irving S. (See Méndez, Ciro F., assignor).
Cooper, James H. (See Stukenborg, L. C., and Cooper.)
Cooper, Joseph M., Denver, Colo. Candy box. 1,625,192; Apr. 19.
Copilovich, Jacob, St. Paul, Minn. Automatic lighting means for gas stoves. 1,625,297; Apr. 19.
Copilovich, Jacob, St. Paul, Minn. Gas stove. 1,625,298; Apr. 19.
Corry, John S., San Pedro, Calif. Vanity case. 1,625,455; Apr. 19.
Corson, Henry J., assignor of one-half to W. H. Comkle, Orville, Wash. Trap. 1,625,710; Apr. 19.
Cortz, Louis, Long Beach, Calif. Quick-action waffle iron. 1,625,243; Apr. 19.
Coryell, Charles N., New York, N. Y. Compact case. 1,625,114; Apr. 19.
Costello, Frank T., Vacaville, Calif., assignor to Standard Spray Pump Company. Plunger pump. 1,625,299; Apr. 19.
Cotton, Walter H., assignor to Union Draft Gear Company, Chicago, Ill. Draft gear. 1,624,929; Apr. 19.
Cound, Samuel R. (See Davies, H. L., and Cound.)
Cox, George W., jr., assignor to National Assorting Company, Washington, D. C. Sorting device. 1,625,711; Apr. 19.
Crabtree, David. (See Spink, A., and Crabtree.)
Cramblet, Paul K., Beloit, Wis. Switch. 1,625,456; Apr. 19.
Cramer, Henry B., San Diego, Calif. Baking pan. 1,625,525; Apr. 19.
Cremieu, Victor, Colombieres-sur-Orb, France. Apparatus for cooling by the expansion of gases. 1,625,712; Apr. 19.
Cresco Creamery Supply Co. (See Ratezenstein, William, assignor.)
Cromble, Charles G. (See Shields, B. F., Cromble, and Windell.)
Cronan, James W., Portageville, Mo. Harness buckle. 1,625,389; Apr. 19.
Cross, Lester H., assignor to C. M. Smillie & Company, Detroit, Mich. Tire cover. 1,625,593; Apr. 19.
Cullison, John F., Oberlin, Kans. Corn knife. 1,625,713; Apr. 19.
Curtin, David F., assignor, by mesne assignments, to The Vortex Mfg. Co., Chicago, Ill. Container for paper cups. 1,625,193; Apr. 19.
Curtin, Leo P., Freehold, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Wood preservative. 1,624,930; Apr. 19.
Cutler-Hammer Mfg. Co., The. (See Layman, Frank E., assignor.)
Cutler-Hammer Mfg. Co., The. (See Packard, Horace N., assignor.)
Cutler-Hammer Mfg. Co., The. (See Re Qua, Frederick L., assignor.)
Cutler-Hammer Mfg. Co., The. (See Seeger, Edwin W., assignor.)
Daddisman, Reginald A. (See Barrymore, O. C., and Daddisman.)
Dalton Adding Machine Company, The. (See Tingley, Bruce H., assignor.)
Daniels, Lee G., Rockford, Ill. Oil and gas burner. Re16,601; Apr. 19.
D'Annunzio, Harry C. (See Amodio, Robert, assignor.)
Dapron, Joseph M., St. Louis, Mo., assignor to National Pneumatic Company, New York, N. Y. Air engine. 1,625,457; Apr. 19.
Darkins, Samuel P., Pittsburgh, Pa. Trunk hasp. 1,625,351; Apr. 19.
Darrow, Benjamin H., Woodstock, assignor to The Sani-Tabl-Tub Company, Alliance, Ohio. Tub. Re16,597; Apr. 19.
Daugert, Peter, Wilkes-Barre, H. Frey, Kingston, and J. J. Dunleavy, Plymouth, Pa. Thread cleaner. 1,625,352; Apr. 19.
Davey, Albert I., et al. (See Leach, William W., assignor.)
Davey, Francis A., et al. (See Leach, William W., assignor.)
Davey, Harold, et al. (See Leach, William W., assignor.)
Davey, James G., et al. (See Leach, William W., assignor.)
Davey, John, et al. (See Leach, William W., assignor.)
Davey, Samuel, et al. (See Leach, William W., assignor.)

Davey, Schuyler, Stillwater, N. Y. Power fork. 1,625,526; Apr. 19.
Davey, William H., et al. (See Leach, William W., assignor.)
Davies, Hector L., Gowerton, near Swansea, England, and S. R. Cound, Aberavon, Wales. Rolling mill for the production of metal sheets or plates. 1,624,931; Apr. 19.

Deere & Company. (See Paul, William L., assignor.)
Deer, John, Tractor Company. (See McCray, Harold E., assignor.)
De Laval Steam Turbine Company. (See Waller, Carl R., assignor.)
Demnitz, Albert, Dresden, Germany. Pneumatic sole-laying machine. 1,625,527; Apr. 19.
Dempsey, William L. (See Shickman, A. J., Thum, and Dempsey.)
Denning, Joseph M., Denver, Colo. Fence machine. 1,625,244; Apr. 19.
De Ram, Georges H. E., Boulogne-sur-Seine, France. Universal joint for shafts. 1,625,410; Apr. 19.
De' Sperati, Mariano, Turin, Italy, assignor to Argentographica (U. S. A.), Limited, London, England. Photocollographic printing plate and producing the same. 1,625,714; Apr. 19.
Deutsche Werke Aktiengesellschaft. (See Altwickler, Carl, assignor.)
De Voe, Albert H., Westfield, N. J., assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio. Round fabric belting and its manufacture. 1,624,932; Apr. 19.
De Wallace, Harry, Syracuse, assignor to W. M. Weeks and J. A. Pease, Skaneateles, N. Y. Bottle closure. 1,625,594; Apr. 19.
Dey, Gilbert S. (See Clement, H., and Dey.)
Dey, Gilbert S., Mount Vernon, N. Y., assignor to General Optical Company, Inc. Optical test chart. 1,625,076; Apr. 19.
Diago, Federico G., Habana, Cuba. Airplane launching and landing apparatus. 1,625,020; Apr. 19.
Diamond, Phillip. (See Rigby, Albert, assignor.)
Dick, Charles F., executor. (See Dick, Joseph.)
Dick, Joseph, deceased, by C. F. Dick, executor, assignor to The Joseph Dick Manufacturing Company, Canton, Ohio. Fodder cutter. 1,625,194; Apr. 19.
Dick, Joseph, Manufacturing Company, The. (See Dick, Joseph, assignor.)
Dickey, Samuel J., Los Angeles, Calif., assignor to General Petroleum Corporation of California. Process of and apparatus for treating one liquid by another. 1,625,195; Apr. 19.
Dickinson, Albert G. (See Simpson, Ward T., assignor.)
Dictaphone Corporation. (See Renholdt, John E., assignor.)
Dillon, Joseph H., Wilmette, assignor to Dillon Pulley Co., Chicago, Ill. Pulley. 1,625,640; Apr. 19.
Dillon Pulley Co. (See Dillon, Joseph H., assignor.)
Dodge, Arthur H., assignor to The J. G. Wilson Corporation, New York, N. Y. Offsetting support for Venetian blinds. 1,625,021; Apr. 19.
Donahoe, John A., Pittsburgh, Pa. Container for foods. 1,625,196; Apr. 19.
Donner, Philip C., Summit, N. J. Carroting fur and treating the same. 1,625,458; Apr. 19.
Dorn, Edward C. (See Vogt, F. P., and Dorn.)
Dorsey, Herbert G., assignor to J. H. Hammond, jr., Gloucester, Mass. Receiving system for compressional waves. 1,625,245; Apr. 19.
Douglas-Pectin Corporation. (See Douglas, R., and Loesch, assignors.)
Douglas, Robert, and H. G. Loesch, assignors to Douglas-Pectin Corporation, Rochester, N. Y. Emulsification of oils and fats and products made therefrom. 1,625,641; Apr. 19.
Draper, George W., Bristol, Conn. Headlight. 1,625,246; Apr. 19.
Droitcour, Michael A., Providence, R. I. Method and mechanism for delivering and stacking sheets. 1,625,642; Apr. 19.
Dubost, Michel, Paris, France, assignor to F. Ducharne Silk Co. Inc., New York, N. Y. Textile fabric. Des. 72,475; Apr. 19.
Ducharne, F., Silk Co. Inc. (See Dubost, Michel, assignor.)
Dudley, Benjamin B., Visalia, and E. R. Dudley, Piedmont, Calif. Collapsing oil drill. 1,625,247; Apr. 19.
Dudley, Edward R. (See Dudley, Benjamin B. and E. R.)
Dugan, Thomas, Wichita, Kans., assignor to J. I. Case Threshing Machine Company, Racine, Wis. Straw spreader. 1,625,353; Apr. 19.
Duncan, William M., Alton, Ill. Mechanical stoker. 1,625,077; Apr. 19.
Duncan, William M., Alton, Ill. Mechanical stoker. 1,625,078; Apr. 19.
Duncan, William M., Alton, Ill. Mechanical stoker. 1,625,079; Apr. 19.
Dunlap, John W., Modesto, Calif. Direction-signal casing. Des. 72,476; Apr. 19.
Dunleavy, John J. (See Daugert, P., Frey, and Dunleavy.)
Du Pont, E. I., de Nemours & Company. (See Jacobs, Charles B., assignor.)
Du Pont, E. I., de Nemours & Company. (See Spotswood, J. B., and Gulick, assignors.)
Durkee, Henry E., Glastonbury, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Tap grinder. 1,624,933; Apr. 19.
Duro Company, The. (See Eisenhauer, Charles P., assignor.)
Eanes, Hugh P., Asheville, N. C., assignor to Paramount Machine Company. Rack for holding warp threads. 1,625,715; Apr. 19.
Eastlack, Oscar A., Camden, N. J. Lock and latch 1,625,595; Apr. 19.
Eckstein, Reuben, New York, N. Y. Electric-miniature-lamp holder. 1,625,248; Apr. 19.
Edison Electric Appliance Company. (See Randolph, Charles P., assignor.)
Edser, Edwin. (See Fowler, S., and Edser.)
Edwards, Charles, Lansford, Pa. Protector fence for highways. 1,625,716; Apr. 19.
Edwards, Charles. (See Smith, C. F., and Edwards.)
Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Water-softening apparatus. 1,625,197; Apr. 19.
Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Automatic water softener. 1,625,198; Apr. 19.
Electric Railway Equipment Company, The. (See Johnston, Lynn, assignor.)
Electrical Engineers Equipment Company. (See Lotz, Alfred F. C., assignor.)
Electro Metallurgical Company. (See Hambuechen, Carl, assignor.)
Electrol, Inc., of Missouri. (See Scott, Lewis L., assignor.)
Elliott, Elwin, and H. Roebuck, Shanghai, China. Thread guide for spinning, twisting, and winding machinery. 1,624,934; Apr. 19.
Elliott, Noah W., New Castle, Pa. Rolling metal. 1,625,643; Apr. 19.
El Paso Sash and Door Company. (See Evans, George, assignor.)
Engels, Eugene O., Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y., doing business at Saginaw, Mich. Gas control for ovens. 1,624,935; Apr. 19.
Erdahl, Bernard F., Duluth, Minn. Producing algin compounds and products derived therefrom. 1,625,301; Apr. 19.
Ersted, Alfred J., Portland, Oreg. Clutch-engaging device. 1,625,769; Apr. 19.
Erwin, Weldon C., Yorba Linda, and C. H. Sweet, Brea, assignors to J. W. MacClatchie, Compton, Calif. Tong-operating safety appliance. 1,625,528; Apr. 19.
Estes, John H., and W. P. Williams, Fort Worth, Tex. Railway-crossing signal. 1,625,459; Apr. 19.
Evans, George, assignor to El Paso Sash and Door Company, El Paso, Tex. Ironing-board cabinet. 1,625,354; Apr. 19.
Evans, Maurice, Barnston Nebr. Cultivator. 1,625,302; Apr. 19.
Fairchild, Arthur B., Buhl, Idaho. Grease-cup valve. 1,625,717; Apr. 19.
Fairchild, Walter L., New York, N. Y. Pneumatic tube. 1,625,460; Apr. 19.
Falco, Mike, Canonsburg, Pa. Penholder. 1,625,115; Apr. 19.
Falk Corporation, The. (See Banner, Otto A., assignor.)
Fansteel Products Company. (See Baker, John C., assignor.)
Farah, Mansour, El Paso, Tex. Automobile lock. 1,625,249; Apr. 19.
Farbman, Israel, Philadelphia, Pa. Coat. 1,625,355; Apr. 19.
Farles, Charles L., Tippecano City, Ohio, assignor to American Telephone and Telegraph Company. Telegraph system. 1,624,936; Apr. 19.
Farmer, Isaac H., Montezuma, Iowa. Reversible disk-sharpening tongs. 1,625,199; Apr. 19.
Fauquier, Raymond H. (See Bohn, H. E., and Fauquier.)
Faurot, Joseph A. (See Wolfe, C. L., and Faurot.)
Fekete, Stephen I., and S. G. Balts, assignors to Hudson Motor Car Company, Detroit, Mich. Automobile engine. 1,625,718; Apr. 19.
Fenning, Louis T., Jackson, Ohio. Time-controlled electric-switch mechanism. 1,625,411; Apr. 19.
Fenton, Paul E., Thomaston, assignor to Scovill Manufacturing Company. Waterbury, Conn. Single-pin socket. 1,625,303; Apr. 19.
Ferguson, Thomas M., Stillwater, Minn. Door-operating mechanism. 1,625,250; Apr. 19.
Ferrette, Louis, Paris, France. Automatic regulator for internal-combustion engines. 1,625,719; Apr. 19.
Files, Alvino F., Maumee, Ohio. Dispensing machine. 1,625,461; Apr. 19.
Finley, Dozier, Berkeley assignor to The Paraffine Companies, Inc., San Francisco, Calif. Emulsion and making the same. 1,625,304; Apr. 19.
Firestone Tire and Rubber Company, The. (See Stevens, Horace D., assignor.)
Fischer Motor Company. (See Spillman, Edward O., assignor.)

Fish, Samuel W., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Multiple-tool-spindle machine. 1,625,116; Apr. 19.
Fishback, F. M. (See Loy, James W., assignor.)
Fisher, George F., Roselle, N. J., assignor, by mesne assignments, to Morgan & Wright, Detroit, Mich. Manufacture of cushion tires. 1,625,644; Apr. 19.
Fisher, J. M., Company. (See Chilson, Lewis S., assignor.)
Fleischmann Company, The. (See Hildebrandt, F. M., and Frey, assignors.)
Floyd, Ray C., assignor to Unique Spark Plug Cleaner Co., Chicago, Ill. Spark-plug attachment. 1,624,937; Apr. 19.
Fodge, Buell, Detroit, Tex. Workholder. 1,625,251; Apr. 19.
Fonseca, Edward L., assignor, by mesne assignments, to The Wilcolator Company, Newark, N. J. Thermostatic oven control. 1,625,080; Apr. 19.
Ford, Edward, Plate Glass Company, The. (See Schutz, Harold R., assignor.)
Forde, Gerald, New York, N. Y. Advertising device. 1,625,305; Apr. 19.
Fornaca, Guido, Turin, Italy. Speed reducer for internal-combustion engines. 1,625,596; Apr. 19.
Fornaca, Guido, Turin, Italy. Forced-feed internal-combustion engine. 1,625,597; Apr. 19.
Forrest, Thomas W. W., Oakland, Calif., assignor to Sun-Maid Raisin Growers of California, Fresno, Calif. Pasteurizer. 1,625,529; Apr. 19.
Fort, Louis, Jersey City, N. J. Insulator. 1,625,645; Apr. 19.
Fousek, Joseph, San Francisco, Calif. Pastry dough. 1,625,022; Apr. 19.
Fowler, Stanley, Yorkshire, and E. Edser, London, England. Prevention of corrosion. 1,624,938; Apr. 19.
Fowler, Stanley, Yorkshire, and E. Edser, London, England. Lubricant. 1,624,939; Apr. 19.
Fox Automotive Products Corporation. (See Henke, Frederick W., jr., assignor.)
Franke, Henry C., Evanston, Ill., and R. C. Bangs, Providence, R. I. Baseball game. 1,625,200; Apr. 19.
Franklin Simon & Co. (See Siegel, Maude, assignor.)
Frattallone, Theodore R., Bronx, N. Y. Washing attachment for tubs. 1,625,306; Apr. 19.
Frauenthal, Harold, Cleveland, Ohio. Dimension gauge. 1,625,462; Apr. 19.
Frazier, Pearl G., Ankeny, Iowa. Rotary-valve structure. 1,625,307; Apr. 19.
Frech, William F., assignor to Cary Manufacturing Co., Brooklyn, N. Y. Machine for deforming wire in definite lengths. 1,624,940; Apr. 19.
Freegard, William, St. Louis, Mo., assignor to The Barber Asphalt Company, Philadelphia, Pa. Flexible shingle. 1,625,608; Apr. 19.
French, Frederick W., Oakland, Calif. Antproof shelf. 1,625,412; Apr. 19.
Freng, Johannes, and E. Bergve, Oslo, Norway. Producing a disinfecting or cleansing spray for hygienic and medical purposes. Re16,593; Apr. 19.
Freund, Robert R., Denver, Colo., assignor to Shotlite Corporation of America. Spotlight mounting. 1,625,413; Apr. 19.
Frey, Charles N. (See Hildebrandt, F. M., and Frey.)
Frey, Henry. (See Daugert, P., Frey, and Dunleavy.)
Friet, Fred L. and J., Parkers Prairie, Minn. Aluminum boat. 1,625,598; Apr. 19.
Friet, Joseph. (See Friet, Fred L. and J.)
Fritzsche, Hermann, E. Krummenacher, H. Gubler, and O. Kaiser, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Intermediate product for the synthesis of dyes and making same. 1,625,530; Apr. 19.
Fritzsche, Hermann, E. Krummenacher, H. Gubler, and O. Kaiser, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Intermediate product for the synthesis of azo dyes and making same. 1,625,531; Apr. 19.
Fritzsche, Hermann, E. Krummenacher, H. Gubler, and O. Kaiser, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Making intermediate products for the manufacture of azo dyes. 1,625,532; Apr. 19.
Fritzsche, Hermann, E. Krummenacher, H. Gubler, and O. Kaiser, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Intermediate product for the synthesis of azo dyes and making same. 1,625,533; Apr. 19.
Frye, William A., Kansas City, and F. Heady, Coffeyville, Kans., assignors to Sinclair Refining Company, New York, N. Y. Placard device. 1,625,309; Apr. 19.
Fulkerson, Nettie R., Fallon, Nev. Cake pan. 1,624,941; Apr. 19.
Fulton Iron Works Company. (See Hildebrand, Reinhard, assignor.)
Furnemont, Fernand J. J. (See Scheluto, J., and Furnemont.)
Gaco Corporation. (See Walters, Philip N., assignor.)
Gaddis, Francis, Merrick, N. Y. Aircraft. 1,625,646; Apr. 19.
Gaffney, John. (See Ryan, J. J., and Gaffney.)
Gangler, Paul, Esslingen, assignor to the Firm Fr. Hesser Maschinenfabrik-Aktiengesellschaft, Stuttgart-Cannstatt, Germany. Closing parcel. 1,625,720; Apr. 19.
Gardiner, William B., assignor of forty-eight one-hundredths to S. Marchese, Quincy, Mass. Adjustable sick bed. 1,625,534; Apr. 19.
Gardner, William R., assignor of one-tenth to W. B. Truslow and C. C. Post and one-tenth to D. G. Collins, Los Angeles, Calif. Vehicle spring hanger. 1,625,023; Apr. 19.
Gauthier, Ernest, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Diamond lap. 1,625,463; Apr. 19.
Gay, Frazer W., Newark, N. J. Electrical current-limiting system. 1,625,464; Apr. 19.
Gebert, Albert E. (See Richardson, M. H., and Gebert.)
Gehres, Hewitt A., Mount Vernon, Ohio. Cylinder and liner construction. 1,625,357; Apr. 19.
Geiger, Erwin A., Ridgewood, N. J., A. F. Schraegle, Ridgewood, and H. T. Jennings, Glendale, N. Y., assignors to Rapid Addressing Machine Company. Selective attachment for addressing machines. 1,625,358; Apr. 19.
Geist, Walter, assignor to Acme Clutch Company, Milwaukee, Wis. Friction clutch. 1,625,201; Apr. 19.
General Optical Company. (See Clement, H., and Dey, assignors.)
General Optical Company. (See Dey, Gilbert S., assignor.)
General Petroleum Corporation. (See Dickey, Samuel J., assignor.)
George, Ross F., Seattle, Wash. Pen. 1,624,942; Apr. 19.
Gerding, Edward A. (See Gerding, Herbert H., and E. A.)
Gerding, Herbert H., Newport, and E. A. Gerding, Fort Thomas, Ky. Bottle crate. 1,625,359; Apr. 19.
Gerrard, Alec J. (See Hintz, Leroy F., assignor.)
Gessert, Frederick, Jamaica, N. Y. Kick-back for bowling alleys. 1,625,599; Apr. 19.
Getty, Fred I., Jennings, La. Whipstock. 1,625,600; Apr. 19.
Geulen, Klara, née Schreiber, executrix. (See Geulen, Wilhelm.)
Geulen, Wilhelm, deceased; K. Geulen, née Schreiber, executrix, assignor to C. Herzog, Freiburg, Germany. Aseptic lighting torch. 1,625,356; Apr. 19.
Gibbs Utilities Company. (See Gibbs, William E., assignor.)
Gibbs, William E., East Orange, N. J., assignor to Gibbs Utilities Company, New York, N. Y. Oil burner. 1,624,943; Apr. 19.
Gillan, Gowan C., assignor to The Ontario Knife Co. Inc., Franklinville, N. Y. Display easel and tray. 1,625,647; Apr. 19.
Gilles, Richard L., Fargo, N. Dak. Evaporation meter. 1,625,310; Apr. 19.
Gillette Safety Razor Company. (See Nickerson, William E., assignor.)
Gilpin, Paul. (See Adle, H. P., and Gilpin.)
Gindick, Raymond H., Waukegan, Ill. Toothbrush cabinet. 1,625,202; Apr. 19.
Girton, Charles E. (See Woodall, W. T. and Girton.)
Glaze, Herbert L., South Pasadena, assignor of one-half to A. R. Maas Chemical Co., Los Angeles, Calif. Dispersing matter into finely-divided form. 1,625,203; Apr. 19.
Glenn, Ivo B., et al. (See Williams, Arthur J., assignor.)
Glenn, William F., jr., et al. (See Williams, Arthur J., assignor.)
Glietenberg, Eugen, Leverkusen, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Azo dyestuff from aminodiphenylenoxide. 1,624,944; Apr. 19.
Glover, Charles A., Lincoln, Mass. Extension foot for ladders. 1,624,945; Apr. 19.
Goddard, Walter T., Hamilton, Ontario, Canada, assignor to Locke Insulator Corporation, Baltimore, Md. Insulator. 1,625,601; Apr. 19.
Godley, Charles E., Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company. Headlight construction. 1,625,648; Apr. 19.
Gold Dust Corporation. (See Van Sant, Robert H., assignor.)
Gollert, Reinhold, Charlottenburg, Germany. Manufacture of Semisoid Rubber Tires. 1,625,117; Apr. 19.
Gondolf, Nicholas J., New Orleans, La. Flushing tank. 1,625,311; Apr. 19.
Good Inventions Co. (See Good, John, assignor.)
Good, John, Garden City, assignor to Good Inventions Co., Brooklyn, N. Y. Vaporizing apparatus for internal-combustion engines. 1,625,312; Apr. 19.
Good, John, Garden City, assignor to Good Inventions Co., New York, N. Y. Combustion apparatus. 1,625,313; Apr. 19.
Gordon, Fred M. (See Rhodes, John J., assignor.)
Gorham, Sidney S., trustee. (See Tanner, Arnold J., assignor.)
Gottfried, Charles, New York, N. Y. Vienna-roll-forming machine. 1,625,649; Apr. 19.
Gottmanns, Karl, Hilden, Germany. Machining double conical work pieces. 1,625,650; Apr. 19.
Gould, Charles T. E., Detroit, Mich. Shoe lace. 1,625,204; Apr. 19.
Gould & Eberhardt. (See Zimmermann, William F., assignor.)
Gould, Harold G., and K. D. Obenshain, McKinney, Tex. Surgical appliance. 1,625,602; Apr. 19.

Graf, Adolph, Chicago, Ill. Steam-heated iron. 1,625,535; Apr. 19.
Grand Rapids Trust Company, executor. (See Burns, David E.)
Grant, Simon P., New Westminster, British Columbia, Canada. Lienman's lifting and hoisting device. 1,625,118; Apr. 19.
Grasselli Dyestuff Corporation. (See Gilletenberg, Eugen, assignor.)
Gray, Jane, Company. (See Stokes, Jane G., assignor.)
Green, Samuel G. (See Jervey, T. M., and Green.)
Gretsch, Frederick, Brooklyn, N. Y. Reed holder. 1,625,651; Apr. 19.
Griggs, Stephen A. (See Higbee, James F., assignor.)
Griscom, Alfred C., assignor to King Sanitary Pipe Cleaner Company, Sandy Hook, Conn. Cutter for milk-bottle seal rings. 1,625,603; Apr. 19.
Griscom-Russell Company, The. (See Price, Joseph, assignor.)
Grisler, Wendell P. (See Hoard, Milo C., assignor.)
Groesbeck, Harold L., Salt Lake City, Utah. Locking cap for tanks. 1,625,652; Apr. 19.
Gronner, George, Davenport, Iowa. Swivel pipe joint. 1,625,536; Apr. 19.
Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring or article of similar nature. Des. 72,477; Apr. 19.
Gross, Benjamin & Edward J. Co. Inc. (See Gross, Benjamin, assignor.)
Grout, Martin B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Coil. 1,625,465; Apr. 19.
Grumme, William F., New York, N. Y. Internal-combustion engine. 1,625,205; Apr. 19.
Grunenwald, Etienne L., Paris, France. Electrical synchronizing system. 1,625,314; Apr. 19.
Gubler, Hans. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)
Gulick, Harold M. (See Spotswood, J. B., and Gulick.)
Gullickson, Francis L., West Salem, Wis. Toothbrush. 1,625,537; Apr. 19.
Haas, Philip J., Omaha, Nebr. Weed and grass cutter. 1,625,081; Apr. 19.
Haeger, Milton O., assignor to Abell-Howe Co., Chicago, Ill. Conveyer-roller feed. 1,625,653; Apr. 19.
Hagan, George J., Company. (See Talley, Randal E., assignor.)
Hahn, Archie V. (See Macartney, J., and Hahn.)
Hahn, Edward J., Gridley, Kans. Tank cleaner. 1,625,721; Apr. 19.
Hall, C. M., Lamp Company. (See Godley, Charles E., assignor.)
Hall, Elbert J., Berkeley, Calif. Piston. 1,625,119; Apr. 19.
Hall, Elbert J., Berkeley, Calif. Piston. 1,625,120; Apr. 19.
Hall, Frederick, Plainfield, N. J., assignor to Berggren Engineering Corporation, Brooklyn, N. Y. Duplex strainer. 1,625,024; Apr. 19.
Hall, Theodore, assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Flaming-arc floodlight. 1,625,315; Apr. 19.
Hall, William B., assignor to Union Railway Equipment Company, Chicago, Ill. Supporting means for drop-brake shafts. 1,625,206; Apr. 19.
Hambuechen, Carl, St. Louis, Mo., assignor to Electro Metallurgical Company. Electrodeposition of chromium. Re16,598; Apr. 19.
Hamilton-Beach Mfg. Co. (See Osius, Frederick J., assignor.)
Hammond, John H., jr. (See Dorsey, Herbert G., assignor.)
Hammond, John H., jr., Gloucester, Mass. Control system for aircraft. 1,625,252; Apr. 19.
Hamnett, Samuel A., Los Angeles, Calif. Seal and making the same. 1,625,466; Apr. 19.
Hansen Canning Machinery Corporation. (See Hansen, Oswald H., assignor.)
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Engine. 1,625,654; Apr. 19.
Hansen, Oswald H., Port Washington, assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis. Preserving fruit. 1,625,207; Apr. 19.
Harbeck, Martin, Grossflottbeck, near Hamburg, assignor to Heidenreich & Harbeck, Hamburg, Germany. Bevel-wheel-shaping device operating by rolling movements. 1,625,722; Apr. 19.
Harcourt, Martha D., administratrix. (See Harcourt, Stillwell R.)
Harcourt, Stillwell R., deceased, Chicago, Ill.; M. D. Harcourt, administratrix. Player-piano mechanism. 1,625,253; Apr. 19.
Hardie, Jessie, Albany, N. Y. Cooking kettle. 1,625,655; Apr. 19.
Harlow, Walter F., Lynchburg, Va. Laundry assorting rack. 1,625,316; Apr. 19.
Harrison, H. H., et al. (See Bowman, Lewis N., assignor.)
Hartford-Empire Company. (See Canfield Robert W., assignor.)
Hartford Rubber Works Company, The. (See Hopkinson, E., and Steinle, assignors.)
Hartmann, Max, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Manufacture of physiologically-active substances from ovaries, corpus luteum, and placenta. 1,625,360; Apr. 19.
Harwick, Henry K., Philadelphia, Pa. Joint for articulated locomotives. 1,625,656; Apr. 19.
Haskell, Samuel, Brooklyn, N. Y. Hand bag or similar article. Des. 72,478; Apr. 19.
Hayes, Harvey C., Annapolis, Md. Microphone. 1,624,946; Apr. 19.
Hazard, Merlin C., assignor to Marvel Oil Tool Company, Huntingdon Beach, Calif. Rotary underreamer. 1,625,208; Apr. 19.
Hazell, Rupert A., Melbourne, Victoria, Australia. Musical instrument of the stringed type. 1,625,538; Apr. 19.
Hazeltine Corporation. (See Holborn, Frederick, assignor.)
Heady, Frank. (See Frye, W. A., and Heady.)
Heidenreich & Harbeck. (See Harbeck, Martin, assignor.)
Heinrichs, Jos., Corporation. (See Scavullo, Angelo C., assignor.)
Heintz, Ernest E. (See Archer, T. P., and Heintz.)
Helbig, Friedrich, Karlsruhe, Germany. Heating furnaces. 1,625,082; Apr. 19.
Henderson, James B., Lee, England. Gyrocompass. 1,625,361; Apr. 19.
Hendey Machine Company, The. (See Knight, George H., assignor.)
Henke, Frederick W., jr., assignor to Fox Automotive Products Corporation, Philadelphia, Pa. Lock for spare wheels of automobiles. 1,625,657; Apr. 19.
Henke, Frederick W., jr., assignor to Fox Automotive Products Corporation, Philadelphia, Pa. Automobile tire lock. 1,625,658; Apr. 19.
Hensbail, Percival P., assignor to John J. Nesbitt, Inc., Atlantic City, N. J. Motor-board suspension. 1,625,659; Apr. 19.
Hercules Powder Company. (See Norman, George M., assignor.)
Herman, Joseph. (See Blackwell, O. B., and Herman.)
Hernandez, Margaret N., administratrix. (See Herandez-Mejia, Arturo.)
Hernandez-Mejia, Arturo, deceased, New Rochelle; M. N. Hernandez, administratrix, assignor to Colorgraph Laboratory, Inc., New York, N. Y. Motion-picture photography and projection. 1,624,947; Apr. 19.
Hersee, Frederick C., Watertown, Mass. Constructing couplings for rheostats and the like. 1,625,604; Apr. 19.
Herskovitz, Max, deceased, Chicago, Ill.; W. Herskovitz and C. Weinfeld, executors; said W. Herskovitz now by judicial change of name William Herst. Illuminated ornamental device. 1,625,539; Apr. 19.
Herskovitz, William, et al., executors. (See Herskovitz, Max.)
Herst, William. (See Herskovitz, Max.)
Hertzberg, Frank, Lomita, Calif. Automatic rotary spider bushing. 1,625,540; Apr. 19.
Herz, Alexander. (See Conti, Eugene, assignor.)
Herzog, Carl. (See Geulen, Wilhelm, assignor.)
Hese, Erich, Dahlem, near Berlin, Germany. Sanding device for power vehicles. 1,625,362; Apr. 19.
Hess, Francis M., Whiting, Ind. Apparatus for distilling hydrocarbons under pressure and a catalyzing agent. 1,625,467; Apr. 19.
Hesser, Fr., Maschinenfabrik-Aktiengesellschaft. (See Gangler, Paul, assignor.)
Hickok, W. O., Manufacturing Company, The. (See Broadmeyer, Albert, assignor.)
Hiering, William C., Newark, N. J., and E. J. Walter, New York, N. Y., assignors to J. E. Mergott Co., Newark, N. J. Bag-frame fastener. 1,625,605; Apr. 19.
Higbee, James F., assignor of one-half to S. A. Griggs, Detroit, Mich. Trailer. 1,625,209; Apr. 19.
Hildebrand, Reinhard, Webster Groves, Mo., assignor to Fulton Iron Works Company, St. Louis, Mo. Fuel injector for internal-combustion engines. 1,625,606; Apr. 19.
Hildebrandt, Frank M., and C. N. Frey, Pittsburgh, Pa., assignors, by mesne assignments, to The Fleischmann Company. Treating and preparing yeast and the product thereof. 1,625,121; Apr. 19.
Hinckley, Frank C., Stratford, assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Sound record. 1,625,705; Apr. 19.
Hinderliter, Frank J., Tulsa, Okla. Swivel bailer top. 1,624,948; Apr. 19.
Hines, O'Dell, Burnsville, Miss. Spring wheel. 1,625,025; Apr. 19.
Hintz, Leroy F., Chicago, Ill., assignor to A. J. Gerrard, Menlo Park, Calif. Method of and apparatus for bracing and securing merchandise packages for transit. 1,624,949; Apr. 19.
Hoard, Milo C., assignor to W. P. Grisler, Stryker, Ohio. Combined undertaker's slumber bed, cooling board, and casket support. 1,624,950; Apr. 19.
Hodde, William, Golden City, Mo. Gate construction. 1,625,254; Apr. 19.
Hodgkinson, Francis, Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Elastic-fluid turbine. 1,625,541. Apr. 19.
Hodgson, Harriette E., New York, N. Y. Artificial hand. 1,625,317; Apr. 19.
Hoe, R., and Co. (See Sheldon, Edward P., assignor.)

Hofer, Bert G. (See Wagner, C. E., and Hofer.)
Hoffman, Herman F. (See McLellan, Joseph R., assignor.)
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Limit stop for shiftable platens. 1,625,607; Apr. 19.
Holborn, Frederick, Hoboken, assignor to Hazeltine Corporation, Jersey City, N. J. Electron-emitting cathode and preparing the same. 1,625,776; Apr. 19.
Holden, Luman, Manchester, N. H., assignor to W. H. McElwain Company, Boston, Mass. Machine for inserting fastenings. 1,625,363; Apr. 19.
Holland, Joseph B., Baltimore, Md. Reversing gear for locomotives. 1,625,364; Apr. 19.
Holmes, George A., Naugatuck, Conn. Machine for shoe soles. 1,625,026; Apr. 19.
Holmes, Roy T., Athens, Ga. Composition for killing certain weeds. 1,625,608; Apr. 19.
Holthouse, Harry B., Chicago, Ill. High-tension circuits. 1,624,951; Apr. 19.
Holtom, Albert O., Rochester, assignor to H. E. Zimmerman, New York, N. Y. Automobile radiator casing. Des. 72,479; Apr. 19.
Homyer, Nicholas R. and W. M., Granite City, Ill. Glare deflector for headlights. 1,625,660; Apr. 19.
Homyer, William M. (See Homyer, Nicholas R. and W. H.)
Hoover Company, The. (See Dondon, Gertrude G., assignor.)
Hoover Company, The. (See Leahy, William P., assignor.)
Hopkinson, Ernest, New York, and W. J. Steinle, Flushing N. Y.; said Steinle assignor to The Hartford Rubber Works Company, Hartford, Conn. Manufacturing tire casings for motor vehicles. 1,625,122; Apr. 19.
Horten, Alphons, Berlin-Wilmersdorf, Germany. Device for the production of concrete pipes and especially for devices for applying the concrete. 1,625,123; Apr. 19.
Hosford, William F., Oak Park, Ill., assignor to Western Electric Company, Incorporated. Method of and apparatus for drying and storing dried material preparatory to processing. 1,625,468; Apr. 19.
Hosford, William F., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Tape or ribbon working machine. 1,625,469; Apr. 19.
Hostettler, Fritz, Bern, Switzerland. Preparation of nonfermented beverages. 1,625,542; Apr. 19.
House, Henry A., Bridgeport, Conn. Link belting. 1,625,609; Apr. 19.
Hudgins, Burnie, Kenova, W. Va. Hose holder. 1,625,255; Apr. 19.
Hudson Motor Car Company. (See Fekete, S. I., and Baits, assignors.)
Hull, Lewis M., Mountain Lakes, and R. W. Seabury, assignors to Radio Frequency Laboratories, Incorporated, Boonton, N. J. Inductive coupling device. 1,625,723; Apr. 19.
Hulse, Thomas W., Inver Grove, Minn. Animal trap. 1,625,027; Apr. 19.
Hult, John A., assignor to The American Multigraph Company, Cleveland, Ohio. Paper detector for printing machines. 1,625,256; Apr. 19.
Humble Oil and Refining Company. (See Ricker, Norman H., assignor.)
Huntington, Arthur S., Omaha, Nebr. Jar handle and producing same. 1,625,210; Apr. 19.
Hussey, William A. (See Masters, F. E., and Hussey.)
Huszti-Horvath, Ferdinand, New York, N. Y. Photographic album. 1,625,724; Apr. 19.
Hutchison, Charles B., Parsons, Kans. Speed-controlling mechanism for motors. 1,625,543; Apr. 19.
Hyatt, Charles H., Cottagewood, Minn. Traction device for motor vehicles. 1,625,028; Apr. 19.
Hydro Refrigerator Company. (See Potter, Thomas I., assignor.)
Hymans, Frederick, Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Compensating rope for hoisting apparatus. 1,625,083; Apr. 19.
Hymans, Frederick, Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Roping for hoisting apparatus. 1,625,084; Apr. 19.
Imperial Brass Manufacturing Company, The. (See McIntosh, Robert D., assignor.)
Imperial Brass Manufacturing Company, The. (See Rudolph, Walter J., assignor.)
Ingersoll Milling Machine Company, The. (See Fish, Samuel W., assignor.)
Ingersoll Milling Machine Company, The. (See Malone, Frank J., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Prellwitz, William, assignor.)
Ingham, Howard T., assignor of one-fourth to L. Kraus, H. T. Ingham, and G. Schaefer, trustees of the trust doing business as The Universal Harvester Company, Kansas City, Mo., and one-fourth to Universal Harvester Corporation. Standing-grain thrasher. 1,625,365; Apr. 19.
Ingham, Howard T., et al, trustees. (See Ingham, Howard T., assignor.)
Ingolfarud, Leif J., and W. H. Soule, Coniston, Ontario, Canada. Apparatus for separating magnetic material from nonmagnetic material. 1,625,257; Apr. 19.
International Motor Company. (See Reid, J. E., and Nein, assignors.)
Irvin Air Chute Co. (See Irvin, Leslie L., assignor.)
Irvin, Leslie L., assignor to Irvin Air Chute Co., Buffalo, N. Y. Method and apparatus for providing parachute shroud lines. 1,625,725; Apr. 19.
Jackson Petroleum Mator Company, The. (See Jackson, Terence G., assignor.)
Jackson, Terence G., Rockford, Ill., assignor to The Jackson Petroleum Motor Company, Augusta, Me. Internal-combustion engine. 1,624,952; Apr. 19.
Jacobs, Charles B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Furnacing in thermo-chemical treatment and apparatus therefor. 1,625,610; Apr. 19.
Jahr, Arthur A., Forest Park, assignor of one-half to A. E. Schultz, Chicago, Ill. Window. 1,625,611; Apr. 19.
Janosek, Albin B., Corpus Christi, Tex. Harrow. 1,625,318; Apr. 19.
Jauch, Robert J., Fort Wayne, Ind. Paper-tube-making machine. 1,625,470; Apr. 19.
Jauch, Robert J., Fort Wayne, Ind. Tube ironing and gripping device. 1,625,471; Apr. 19.
Jeffrey Manufacturing Company, The. (See Liggett, William K., assignor.)
Jelbert, Martin, jr., Lead, S. Dak. Piston-ring contractor. 1,625,258; Apr. 19.
Jennings, Henry T. (See Geiger, E. A. Schraegle, and Jennings.)
Jensen, Carl C., Chicago, Ill. Fastening device. 1,625,612; Apr. 19.
Jensen, Nels, Grass Valley, Calif. Display rack. 1,625,544; Apr. 19.
Jervey, Thomas M., Aberdeen, Md., and S. G. Green, Gray, Ga. Mount for machine guns. 1,625,124; Apr. 19.
Jessup & Moore Paper Co., The. (See Plumstead, Joseph E., assignor.)
Johnson, Gustave T., Chicago, Ill. Balancing machine. 1,625,259; Apr. 19.
Johnson, Robert H., Washington, D. C. Vaporizer for gasoline engines. 1,625,661; Apr. 19.
Johnson, Thomas L., Charleston, W. Va. Coal-loading machine. 1,625,726; Apr. 19.
Johnson Washer Company. (See Schuyler, Frank B., assignor.)
Johnston, Lynn, assignor to The Electric Railway Equipment Company, Cincinnati, Ohio. Cable and trolley clamp. 1,625,366; Apr. 19.
Jones, Edward P., Breckenridge, Colo. Electric-driven rock drill and automatic hammer and boring machine. 1,625,211; Apr. 19.
Jones, Joseph H. (See Burgess, Robert, assignor.)
Jones, Leo D., and A. U. Ayers, assignors to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal machine. 1,625,613; Apr. 19.
Jones, Morris. (See Metcalf, R., and Jones.)
Joniscik, Steven. (See Schnur, J. M., Kesselring, Schnur, and Joniscik.)
Jonkhoff, Henri W., Semarang, Java, Dutch East Indies. Brake device. 1,625,727; Apr. 19.
Jordan, William C., Madison, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,624,953; Apr. 19.
Judson, Russell V., Detroit, Mich. Portable apparatus for cleaning and grading grain, seed, and the like. Re16,600; Apr. 19.
Junkers, Hugo, Dessau, Germany. Erection of wings and the like for flying machines. 1,625,029; Apr. 19.
Kaiser, Otto. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)
Kammerer Corporation. (See Kammerer, George, assignor.)
Kammerer Corporation. (See Reilly, J. B., and Stone, assignors.)
Kammerer, George, Fullerton, assignor to Kammerer Corporation, Brea, Calif. Tool for cutting and removing pipe from wells. 1,625,414; Apr. 19.
Karas, Leland L., Chicago, Ill. Coil and support for same. 1,625,212; Apr. 19.
Karmazin, John, East Amherst, assignor to Laminated Shim Company, Inc., Long Island City, N. Y. Shim. 1,625,545; Apr. 19.
Kast, Harry L., Fort Wayne, Ind. Folding hook. 1,625,662; Apr. 19.
Katz, Frank, Brooklyn, assignor to Anchor Manufacturing Company, New York, N. Y. Plate or similar article. Des. 72,480; Apr. 19.
Kautzky, Joe, jr., Fort Dodge, Iowa. Automatic single-trigger mechanism for double-barrel guns. 1,625,546; Apr. 19.
Kaye, John A., Sault Ste. Marie, Ontario, Canada. Billiard compass. 1,625,770; Apr. 19.
Keane, Francis B. (See Papst, Hermann, assignor.)
Keistler, Charles F. (See Kelly, William H., assignor.)
Keller, Ernest U., Pawhuska, Okla. Drill bit. 1,626,030; Apr. 19.
Kellogg Switchboard and Supply Company. (See Grout, Martin B., assignor.)
Kelly, William A., assignor of one-half to F. J. Timmerman, Green Bay, Wis. Pulp-web cutter. 1,625,472; Apr. 19.
Kelly, William H., assignor of one-third to C. F. Keistler, Charlotte, N. C. Humidifier. 1,625,663; Apr. 19.

Kempf, Conrad, assignor to Suddeutsche Christbaumschmuck- u. Reflektoren Gesellschaft mit beschränkter Haftung, Nuremberg, Germany. Reflector for Chirstmas-tree decoration. Des. 72,481; Apr. 19.

Kenerson, Joseph E., Saugus, assignor to Trimont Manufacturing Company, Roxbury, Mass. Apparatus for securing vises to posts, poles, or the like. 1,625,319; Apr. 19.

Kennon, Louis H., and L. J. Langdon, Houston, Tex. Valve. 1,625,367; Apr. 19.

Kenworthy, James A., Los Angeles, Calif. Oil burner. 1,625,320; Apr. 19.

Kerr, Harold H. (See O'Connell, J., and Kerr.)

Kessler, Archibald K., Huntington, W. Va. Emergency kit. 1,625,547; Apr. 19.

Kesselman, Louis P., Whittier, Calif. Oil pump. 1,625,031; Apr. 19.

Kesselring, Frank. (See Schnur, J. M., Kesselring, Schnur, and Jonlaclk.)

Kettler, Henry, Detroit, Mich. Recentering device. 1,625,032; Apr. 19.

Klug, Louise C., Cleveland, Ohio. Spectacles. 1,625,614; Apr. 19.

King Sanitary Pipe Cleaner Company. (See Griscom, Alfred C., assignor.)

Kirkpatrick, Robert S., Des Moines, Iowa, assignor to J. B. Ladd, Des Moines, Iowa. Caster centering and retaining device. 1,625,213; Apr. 19.

Kispert, Joseph J., Branford, assignor to I. Newman & Sons, Inc., New Haven County, Conn. Combined corset and brassière. 1,625,664; Apr. 19.

Klein, Michael A., Chicago, Ill. Bottle. 1,625,728; Apr. 19.

Klitenick, Mark. (See Turtle, D., and Klitenick.)

Knight, George H., assignor to The Hendey Machine Company, Torrington, Conn. Bull-gear inclosure for crank-shaping machines. 1,624,954; Apr. 19.

Knopp, John E., Tulsa, Okla. Box closer. 1,625,033; Apr. 19.

Knowles, George H., Minneapolis, Minn. Receptacle. 1,624,955; Apr. 19.

Knox, Walter F., Chicago, Ill. Radiator hanger. 1,625,473; Apr. 19.

Koblolke, Adolf M., Glideroy, Victoria, Australia. Apparatus for drying and seasoning timber. 1,625,548; Apr. 19.

Konishi Kotakudo Company. (See Tobita, Toshio, assignor.)

Koroknay, Paul, Houston, Tex. Signal lantern. 1,625,474; Apr. 19.

Kraus, Louis, et al., trustees. (See Ingram, Howard T., assignor.)

Kronenberg, Frederick W., Philadelphia, Pa. Steam boilers. 1,625,549; Apr. 19.

Kruger, Harry B. (See Stranders, Julien, assignor.)

Krum, John H., assignor of one-half to C. E. McGlocklin and E. D. Traver, Bonners Ferry, Idaho. Tongs. 1,625,729; Apr. 19.

Krummenacher, Eduard. (See Fritzsche, H., Krummenacher, Gubler, and Kaiser.)

Küchen, Nicolaus, Aachen, Germany. Brake for vehicles. 1,625,777; Apr. 19.

Kuhnel, Paul, San Francisco, Calif. Velocipede. 1,625,214; Apr. 19.

Kurda, Karl. (See Rüdenburg, R., and Kurda.)

Kurowski, Alfred G. F., Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,625,321; Apr. 19.

Kurz, Gustave A., Zanesville, Ohio. Hand covering. 1,625,368; Apr. 19.

Kuttes, Anthony, Alameda, Calif. Pliers. 1,625,615; Apr. 19.

Lacke, William A., Chicago, Ill. Spacing table. 1,625,215; Apr. 19.

Ladd, J. B. (See Kirkpatrick, Robert S., assignor.)

Laher, Frank J., Portland, Oreg. Vehicle bumper. 1,625,550; Apr. 19.

Lahey, John A., Sewaren, N. J. Fire-flame-coloring means. 1,625,475; Apr. 19.

Lake, Alexander H., Marshfield, Wis. Webbed hand for swimmers. 1,625,730; Apr. 19.

Lamblin, Alexandre, Paris, France. Cooling radiator for aeroplanes and other vehicles and its manufacture. 1,625,665; Apr. 19.

Laminated Shim Company. (See Karmazin, John, assignor.)

Lange, Paul H. (See Brenzinger, J., and Lange.)

Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Laundry-handling device. 1,625,551; Apr. 19.

Landers, Frary & Clark. (See Smith, C. F., and Edwards, assignors.)

Langdon, Lowell J. (See Kennon, L. H., and Langdon.)

Langenberg, Frederick C. (See Solberg, John C., assignor.)

Large, Edward N., Ryderwood, Wash. Saw clamp. 1,625,666; Apr. 19.

Larsen, Mads M. Colton, Calif. Collapsible camp bed. 1,625,476; Apr. 19.

Lasker, William W., Brooklyn, N. Y., assignor to Powers Accounting Machine Corporation, New York, N. Y. Print-bar mechanism. 1,624,956; Apr. 19.

Latour Corporation. (See Latour, Marius, assignor.)

Latour, Marius, Paris, France, assignor to Latour Corporation, Jersey City, N. J. Electrical conductor. 1,625,125; Apr. 19.

Lawner, Nicholas, Brooklyn, N. Y., assignor to American Sundries Co., Inc. Vaporizer. 1,625,034; Apr. 19.

Layman, Frank E., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Molded handle and the like. 1,625,322; Apr. 19.

Leach, William W., assignor to W. H. Davey, A. I. Davey, S. Davey, J. Davey, F. A. Davey, and J. G. Davey, Mansfield, Ohio, and H. Davey, Detroit, Mich. Feeder for sheet metal or the like. 1,625,085; Apr. 19.

Leahy, William P., Canton, Ohio, assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Electric-cord anchorage. 1,625,477; Apr. 19.

Lee Alexander F., Boston, Mass. Handle for cooking utensils. 1,625,731; Apr. 19.

Lee, Charles M., Shreveport, La. Mirror adjuster. 1,625,260; Apr. 19.

Lee, Clarie M., Elyria, Ohio, assignor of one-half to G. W. Lee, Wauseon, Ohio. Automatic gas valve. 1,625,323; Apr. 19.

Lee, George W. (See Lee, Claire M., assignor.)

Lee, Walter D., Grand Junction, Colo. Brushing and polishing machine. 1,625,667; Apr. 19.

Lefranc & Cie. (See Le France, Louis, assignor.)

Le Franc, Louis, assignor to Lefranc & Cie., Paris, France. Manufacture of butyric acids and other aliphatic acids. 1,625,732; Apr. 19.

Lemke, James, jr., Troy, N. Y. Sign. 1,625,216; Apr. 19.

Leon, Lewicki J. West Chicago, Ill. Birdcage. Des. 72,482; Apr. 19.

Lewis, Charles W., Portsmouth, N. H. Combined whip weight and buffer. 1,625,552; Apr. 19.

Lienhard, Leon V. (See Snodgrass, Joseph E., assignor.)

Liggett, William K., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Pulverizing machine. 1,625,553; Apr. 19.

Liggett, William K., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Pulverizing machine. 1,625,554; Apr. 19.

Lilienfeld, Leon, Vienna, Austria. Fluorescent oil and making same. 1,625,415; Apr. 19.

Lilienfeld, Leon, Vienna, Austria. Plastic and making same. 1,625,416; Apr. 19.

Lilley, Clarence E., Kansas City, Mo. Oil refiner for internal-combustion engines. 1,624,957; Apr. 19.

Lilly, Eli, and Company. (See Lilly, Eli, assignor.)

Lilly, Eli, and Company. (See Seaton, A., and Rader, assignors.)

Lilly, Eli, assignor to Eli Lilly and Company, Indianapolis, Ind. Hypodermic kit. 1,625,035; Apr. 19.

Lindemann, Marvin C., assignor to Bay View Furniture Company, Holland, Mich. Cabinet for radio receiving sets. 1,625,478; Apr. 19.

Linehan, Edwin R., River Falls, Wis. Vehicle signal. 1,625,733; Apr. 19.

Linhart, Lena E., Dawn, Mo., assignor to The Buckeye Incubator Company, Springfield, Ohio. Insulating smoke pipes. 1,625,734; Apr. 19.

Link, Vincent, Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Internal-combustion engine. 1,625,201; Apr. 19.

Linquist, Richard A., Minneapolis, Minn. Transmission cover for Fords. 1,625,555; Apr. 19.

Listo Pencil Corporation. (See Webn, Charles E., assignor.)

Litho Etching Corporation. (See Monahan, James B., assignor.)

Locke, Edward B., assignor, by mesne assignments, to The Watson Experimental Laboratory Company, Dayton, Ohio. Counting scale. 1,625,126; Apr. 19.

Locks Insulator Corporation. (See Goddard, Walter T., assignor.)

Loesch, Hugo G. (See Douglas, R., and Loesch.)

Loesel, Nicholas, Richmond Hill, assignor to American Can Company, New York, N. Y. Separating device for can caps or the like. 1,625,262; Apr. 19.

Lomshakoff, Alexis S., Prague, Czechoslovakia. Fire grate. 1,625,556; Apr. 19.

London, David, Baltimore, Md. Clothes hamper. 1,625,668; Apr. 19.

Long, Austin M., Marshall, Mo., assignor to United Shoe Machinery Corporation, Paterson, N. J. Tack-supplying mechanism. 1,624,958; Apr. 19.

Long, Cornelia T. (See Taylor, A. H., Long, and Sohn.)

Long, Cornelia T., Winston-Salem, N. C., and A. C. Sohn, Pittsburgh, Pa., assignors to Taylor-Long Company, Charlotte, N. C. Bottle. Des. 72,483; Apr. 19.

Long, William B., assignor to Union Special Machine Company, Chicago, Ill. Presser foot for sewing machines. 1,625,616; Apr. 19.

Longville, Charles B., St. Paul, Minn. Oil burner. 1,625,217; Apr. 19.

Lorenz, Louis, New York, N. Y. Burning-in machine. 1,625,037; Apr. 19.

Lösel, Franz, Brunn, Czechoslovakia. Elastic-fluid turbine. 1,625,263; Apr. 19.

Loth, William A., assignor to Societe Industrielle des Procedes W. A. Loth, Paris, France. Method and device for rapidly solving ordinary problems of astronomic navigation. 1,625,369; Apr. 19.

Lotz, Alfred F. C., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Rheostat. 1,625,479; Apr. 19.

Loudenslager, William J., New Martinsville, W. Va. Dough raiser. 1,625,036; Apr. 19.

Lougheed, Aaron, Port Arthur, Ontario, Canada. Differential drive. 1,625,264; Apr. 19.

Loughridge, Matthew H., Bogota, N. J. Valve for refrigerating apparatus. 1,625,324; Apr. 19.

Love, Thomas H., Cincinnati, Ohio. Receptacle for carrying infants. 1,625,038; Apr. 19.

Lowe, Richard T., assignor of one-half to B. I. Payne, Cedar Bluff, Va. Train-pipe coupler. 1,625,370; Apr. 19.

Loy, James W., assignor of one-third to F. M. Fishback, Long Beach, Calif. Air pump. 1,625,417; Apr. 19.

Lox Seal Corporation, The. (See Behrman, Marcus B., assignor.)

Lucas, Jonathan, Savannah, Ga., assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Tension device for looms. 1,625,039; Apr. 19.

Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)

Ludy, Clarence C., Venice, Calif. Bag holder. 1,625,480; Apr. 19.

Lukens, Clarence D., St. Louis, Mo. Bottle closure. 1,625,617; Apr. 19.

Lundberg, Godfrey, Winnetka, assignor to The Tribune Company, Chicago, Ill. Plate carrier for multicolor cameras. 1,624,959; Apr. 19.

Lundy, Robert R., South Bend, Ind. Cross-word puzzle. 1,625,218; Apr. 19.

Lyon, John S., assignor of one-half to J. Bartholomew, Rochester, N. Y. Compact powder holder. 1,625,669; Apr. 19.

Lyon Metallic Manufacturing Company. (See O'Connor, John B., assignor.)

Mans, A. R., Chemical Co. (See Glaze, Herbert L., assignor.)

Macartney, Jack, and A. V. Hahn, Los Angeles, Calif. Acoustic horn. 1,625,325; Apr. 19.

MacClntchic, John W. (See Erwin, W. C., and Sweet, assignors.)

Macfarlane, Reginald (See Weinaug, E., and Macfarlane.)

MacLagan, Hector P., assignor to McIntosh Electrical Corporation, Chicago, Ill. Foot switch. 1,625,481; Apr. 19.

Macleod, Donald K. (See Austin, A. O., and Macleod.)

Mahon, R. C., Company, The. (See Miller, William G., assignor.)

Maise, Herman C., assignor to Briggs Manufacturing Company, Detroit, Mich. Support for door bumpers. 1,624,960; Apr. 19.

Malloy, William W., San Pedro, Calif. Golf court. 1,625,265; Apr. 19.

Malone, Frank J., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Milling machine for deseaming billets. 1,625,127; Apr. 19.

Manzel, Adolph W., assignor to Manzel Bros. Co., Buffalo, N. Y. Oil pump. 1,625,618; Apr. 19.

Manzel Bros. Co. (See Manzel, Adolph W., assignor.)

Marbelite Corporation of America. (See Barkschat, Henry, assignor.)

Marchese, Sebastiano. (See Gardiner, William B., assignor.)

Marcus, Benjamin H., Brooklyn, N. Y. Combined buckle and purse. 1,625,040; Apr. 19.

Marden, John W. (See Rentschler, H. C., and Marden.)

Marrette, Jacques, Vincennes, assignor to Pathe Cinema, Anciens Etablissements Pathe Freres, Paris, France. Electric lamp for cinematographic apparatus. 1,625,619; Apr. 19.

Marshall, Guy E., Milwaukee, Wis. Investigating street occurrences. 1,625,041; Apr. 19.

Marshall, Thomas C., Mount Savage, Md. Tire. Des. 72,484; Apr. 19.

Marshall, Thomas C., Mount Savage, Md. Tire. Des. 72,485; Apr. 19.

Martin, Talbot G., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,625,482; Apr. 19.

Marvel Carbureter Company. (See Molony, Donald P., assignor.)

Marvel Oil Tool Company. (See Hazard, Merlin C., assignor.)

Marwin, Alfred C., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Casein glue. 1,625,483; Apr. 19.

Marx, Louis, Brooklyn, N. Y. Mechanically-operated toy. 1,625,326; Apr. 19.

Mason, Summer R., Wilmette, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Process of and apparatus for cleaning metal. 1,625,484; Apr. 19.

Mast, Charles O., Covington, assignor to Mast Lightning Rod Company, West Milton, Ohio. Rod coupling. 1,625,266; Apr. 19.

Mast Lightning Rod Company. (See Mast, Charles O., assignor.)

Masters, Frank E., and W. A. Hussey; said Hussey assignor to C. A. Mechling, Tulsa, Okla. Headrest. 1,625,267; Apr. 19.

Maston, Edward E., Chicago, Ill., assignor to Mid-West Box Company, Chicago, Ill. Packing unit for shipping cases. 1,625,620; Apr. 19.

Mathes, Virgil H., Indianapolis, Ind. Timer, 1,625,268; Apr. 19.

Matsushita, Gentaro, Selma, Calif. Automatic fire extinguisher. 1,625,086; Apr. 19.

Mattice, Royal, Bethlehem, Pa. Repairing broken metallic structures. Re16,599; Apr. 19;

Mattingly Automatic Valve Co. (See Mattingly, Charles F., assignor.)

Mattingly, Charles F., assignor to Mattingly Automatic Valve Co., St. Louis, Mo. Hydraulic brake. 1,625,418; Apr. 19.

Maurer, Michael, Spisska Nova Vos, Czechoslovakia. Drafting instrument. 1,625,735; Apr. 19.

Maurer, Oswald H., Flushing, assignor to Western Electric Company, Incorporated, New York, N. Y. Terminal for electric conductors. 1,625,485; Apr. 19.

Max Ams Machine Company, The. (See Brenzinger, J., and Lange, assignors.)

Maxwell, Frank D., Boise, Idaho. Hat. 1,625,670; Apr. 19.

Mayer, Leon, Chicago, Ill. Bill fold or similar article. Des. 72,486; Apr. 19.

McArdle, Michael W., Chicago, Ill. Spray nozzle. 1,625,042; Apr. 19.

McBee, Harry B., St. Louis, Mo. Loose-leaf binder. 1,624,961; Apr. 19.

McCaa, George S., assignor to Mine Safety Appliances Company, Pittsburgh, Pa. Breathing apparatus. 1,625,419; Apr. 19.

McCall, William H., Philadelphia, Pa. Knife sharpener. 1,625,219; Apr. 19.

McCann, Leland R., Hawthorne, N. J., assignor to American Can Company, New York, N. Y. Process and apparatus for forming side seams on container bodies. 1,625,269; Apr. 19.

McCarthy, Ernest F., Darien, Conn. Combination lamp and smoker's set. Des. 72,488; Apr. 19.

McClintock, Robert S., assignor of one-half to W. S. McClintock, Marianna, Ark. Cotton chopper. 1,625,087; Apr. 19.

McClintock, William S. (See McClintock, Robert S., assignor.)

McCray, Harold E., assignor to John Deere Tractor Company, Waterloo, Iowa. Internal-combustion engine. 1,625,043; Apr. 19.

McDonald, John P., Austin, Tex. Expansion joint. 1,625,557; Apr. 19.

McElwain, W. H., Company. (See Holden, Luman, assignor.)

McGlocklin, Charles E., et al. (See Krum, John H., assignor.)

McIlwaine, John, Virden, Ill. Cushion tire. 1,625,558; Apr. 19.

McIntosh Electrical Corporation. (See MacLagan, Hector P., assignor.)

McIntosh, Robert D., assignor to The Imperial Brass Manufacturing Company, Chicago, Ill. Welding torch. 1,625,128; Apr. 19.

McKeown, William C., assignor to Modern Household Appliance Company, Baltimore, Md. Discharge manifold for pressure containers. 1,625,044; Apr. 19.

McKnight, John P., Revere, Mass. Apparatus for molding cementitious material. 1,625,486; Apr. 19.

McLane, Laurence S. (See Conant, E. T., and McLane.)

McLean, Joseph, South Manchester, Conn. Furnace. 1,624,962; Apr. 19.

McLellan, Joseph R., assignor of one-half to H. F. Hoffman, Wichita, Kans. Lock-actuated switch. 1,625,371; Apr. 19.

McMillan Book Company. (See Sterling, Harry C., assignor.)

McNerney, Bernard L., Minneapolis, Minn. Wrench. 1,625,559; Apr. 19.

Measuregraph Company, The. (See Turner, Douglas, assignor.)

Mechling, C. A. (See Masters, F. E., and Hussey.)

Mele, John M., East Haven, Conn. Single device. 1,624,963; Apr. 19.

Méndez, Ciro F., Mexico City, Mexico, assignor to I. S. Cooper, Los Angeles, Calif. Spring wheel. 1,625,270; Apr. 19.

Méndez, Ciro F., Mexico City, Mexico, assignor to I. S. Cooper, Los Angeles, Calif. Spring wheel. 1,625,271; Apr. 19.

Menefee, Gus, Atlanta, Ga. Boat retaining and releasing device. 1,625,736; Apr. 19.

Mergenthaler Linotype Company. (See Albrecht, Christian A., assignor.)

Mergott, J. E., Co. (See Hiering, W. C., and Walter, assignors.)

Mesker, Bernard T. (See Mesker, John and B. T.)

Mesker Brothers Iron Company. (See Mesker, John and B. T., assignors.)

Mesker, John and B. T., assignors to Mesker Brothers Iron Company, St. Louis, Mo. Window construction. 1,625,220; Apr. 19.

Messinger, Harry C. (See Page, Louis A., assignor.)

Metcalf, Robert, and M. Jones, Hazard, Ky. Hopper door. 1,625,671; Apr. 19.

Meyer, Emile, New York, N. Y. Woven fabric. Des. 72,487; Apr. 19.

Meyer, William, Chicago, Ill. Heater for curling irons and the like. 1,625,487; Apr. 19.
Meyers, Julius R., Evaston, Ill., assignor of one-half to C. A. Straubel Company, Green Bay, Wis. Apparatus for pressing cheese. 1,625,129; Apr. 19.
Meyers, Julius R., Evanston, Ill., assignor to C. A. Straubel Company, Green Bay, Wis. Making, curing and shipping cheese in metal bandages. 1,625,130; Apr. 19.
Mid-West Box Company. (See Maston, Edward E., assignor.)
Miller Company, The. (See Runge, Richard M., assignor.)
Miller, George L., assignor, by mesne assignments, to The Timken Roller Bearing Company, Canton, Ohio. Die. 1,625,131; Apr. 19.
Miller, William G., assignor to The R. C. Mahon Company, Detroit, Mich. Elevator door. 1,624,964; Apr. 19.
Milson, Charles E. (See Milson, John R., assignor.)
Milson, John R., Mansfield, Mass., assignor of one-fourth to C. E. Milson, Providence, R. I. Oiler for spinning machines. 1,625,488; Apr. 19.
Milton, John L., Louisville, Ky. Oscillating device. 1,625,132; Apr. 19.
Milwaukee Brass Manufacturing Company. (See Van Eweyk, William F., assignor.)
Mine Safety Appliances Company. (See McCaa, George S., assignor.)
Minimax Utilities Corporation. (See Routson, Howard W., assignor.)
Mjolsness, Haakon, Chaffee, N. Dak. Grain separator. 1,625,088; Apr. 19.
Modern Household Appliance Company. (See McKeown, William C., assignor.)
Mohler, Thomas B., Burlingame, Calif. Feul and making Same. 1,625,133; Apr. 19.
Mohnkern, Carl A., Curtis, Ark. Mail crane. 1,625,272; Apr. 19.
Mohnkern, Carl A., Curtis, Ark. Pouch-holding clamp for mail cranes. 1,625,273; Apr. 19.
Mohnkern, Carl A., Curtis, Ark. Mail crane. 1,625,274; Apr. 19.
Möller, Gustav, Dortmund, Germany. Sack closure. 1,625,772; Apr. 19.
Molony, Donald P., assignor to Marvel Carbureter Company, Flint, Mich. Automatic charge heating control for internal-combustion engines. 1,625,134; Apr. 19.
Molony, Donald P., assignor to Marvel Carbureter Company, Flint, Mich. Automatic charge-heating control for internal-combustion engines. 1,625,135; Apr. 19.
Monahan, James B., assignor to Litho Etching Corporation, New York, N. Y. Safety device for clutch mechanism. 1,625,045; Apr. 19.
Monard, Alfred, assignor to Societe l'Aster, Paris, France. Liquid meter. 1,625,489; Apr. 19.
Moore, Arlington, assignor to Moore Inventions Corporation, Worcester, Mass. Gyral wheel. 1,625,327; Apr. 19.
Moore, F. Thomas. (See Rosenberg, A., and Ollinger, assignors.)
Moore Inventions Corporation. (See Moore, Arlington, assignor.)
Moore, Jacob L., Muncie, Ind. Bed. 1,624,965; Apr. 19.
M-O-R Products Company. (See Odom, Leland L., assignor.)
Moreton, Charles J., London, England. Waterproofing textile and other materials. 1,625,672; Apr. 19.
Morey, William E., assignor to Rodger Ballast Car Company, Chicago, Ill. Dump-car-control mechanism. 1,625,089; Apr. 19.
Morgan & Wright. (See Fisher, George F., assignor.)
Morley, Michael, Brooklyn, N. Y. Boiler. 1,625,046; Apr. 19.
Morris, Herbert, South Valley, N. Y. Stone picker. 1,625,560; Apr. 19.
Morris, Newton, Fond du Lac, Wis. Drain trap. 1,625,561; Apr. 19.
Morris, Robert W., Roslyn, N. Y., assignor to American Telephone & Telegraph Company. Ambulatory repeating system. 1,624,966; Apr. 19.
Morris, Roger T., Seattle, Wash. Self-serving-store equipment. 1,625,490; Apr. 19.
Mowry, Robert D., assignor to Universal Battery Company, Chicago, Ill. Indicator for storage batteries. 1,625,047; Apr. 19.
Mueller, Adolph, trustee. (See Wagenseller, Charles N., assignor.)
Muir, Wellington W., Lockport, N. Y. Cooling internal-combustion engines. 1,625,737; Apr. 19.
Mullins, Arch, et al. (See Mullins, Ed. and O. B., assignors.)
Mullins, Ed, Cincinnati, Ohio, and O. B. Mullins, assignors of one-fourth to T. E. Mullins and one-fourth to A. Mullins, South Covington, Ky. Car-wheel clamp. 1,625,136; Apr. 19.
Mullins, Oscar B. (See Mullins, Ed. and O. B.)
Mullins, Thomas E., et al. (See Mullins, Ed. and O. B., assignors.)
Mulvihill, Daniel C., Hannibal, Mo. Wheel-cleaning, device. 1,625,137; Apr. 19.
Mutscheller, Arthur, New York, N. Y., assignor to Wappler Electric Co., Inc. Convertible X-ray machine. 1,625,328; Apr. 19.
Nadworney, Charles, assignor of two-thirds to L. Borack, Bayonne, N. J. Coin-controlled vending machine. 1,625,138; Apr. 19.
Nanni, Menotti, Tivoli, near Rome, Italy. Pneumatic connecting device. 1,625,372; Apr. 19.
Naterman, Henry C., Los Angeles, Calif. Resilient package-holding device. 1,625,275; Apr. 19.
National Assorting Company. (See Cox, George W., jr., assignor.)
National Folding Box Company. (See Ryan, J. J., and Gaffney, assignors.)
National Pneumatic Company. (See Dapron, Joseph M., assignor.)
Neighbour, Leonard B., East Moline, Ill., assignor to Deere & Company, Moline, Ill. Axle connection for vehicles. 1,625,139; Apr. 19.
Nein, Charles L. (See Reid, J. E., and Nein.)
Neitzel, Conrad T., Dallas, Tex. Well-testing tool. 1,625,140; Apr. 19.
Nelson, Emil A., Halfway, Mich. Carburetor. 1,625,141; Apr. 19.
Nelson, Virginia P., New York, N. Y. Canopy holder. 1,625,673; Apr. 19.
Nenninger, Lester F., assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Machine-tool clutch. 1,625,738; Apr. 19.
Nesbitt, John J., Inc. (See Henshall, Percival P., assignor.)
Neuendorf, Edward C., Wyandotte, Mich. Headlight shield. 1,625,621; Apr. 19.
Newburn, Clarence, Electra, Tex. Sand-testing tool. 1,625,674; Apr. 19.
New England Wood Heel Co. (See Shaw, Wesley J., assignor.)
New Haven Clock Co. (See Porter, Wilson E., assignor.)
Newland, John D., Los Angeles, Calif. Combination lamp and clock case. Des. 72,489; Apr. 19.
Newman, I., & Sons, Inc. (See Kispert, Joseph J., assignor.)
New York Last Company. (See Becker, William P., assignor.)
Nichols, Guy, Mount Harris, Colo. Automobile chain tightener and fastener. 1,624,967; Apr. 19.
Nickerson, William E., assignor to Gillette Safety Razor Company, Boston, Mass. Knife with detachable blade. 1,625,778; Apr. 19.
Niederhauser, Frederick C., and A. E. Sunderland, Roanoke, Va., assignor to The Viscose Company, Marcus Hook, Pa. Manufacture of artificial silk and the like. 1,625,562; Apr. 19.
Nock, Harold E., assignor to Towle Manufacturing Company, Newburyport, Mass. Plate or analogous article. Des. 72,490; Apr. 19.
Nock, John R., Brooklyn, N. Y. Spring heel. 1,625,048; Apr. 19.
Noishiki, Yoshitoshi, Tottori, Japan. Electrical instrument for medical treatment. 1,625,675; Apr. 19.
Non-Spi Company, The. (See Winters, Edgar W., assignor.)
Norman, George M., assignor to Hercules Powder Company, Wilmington, Del. Transportable dynamite magazine. 1,625,491; Apr. 19.
Nygaard, Oscar O., Saugus, Mass., assignor to Combustion Engineering Corporation, New York, N. Y. Stoker air control. 1,625,276; Apr. 19.
Nykolyshak, George, Jersey City, N. J. Automatic fire escape. 1,625,221; Apr. 19.
Oakley, Erastus G., Southport, assignor to Bridgeport Brass Company, Bridgeport, Conn. Making tire-valve casings. 1,625,492; Apr. 19.
Obenshain, Kyle D. (See Gould, H. G., and Obenshain.)
O'Connell, Joseph, and H. H. Kerr, Kensington, Victoria, Australia. Can cleaning and drying apparatus. 1,625,493; Apr. 19.
O'Connor, Arthur F., assignor to Union Railway Equipment Co., Chicago, Ill. Uncoupling device. 1,625,143; Apr. 19.
O'Connor, Arthur F., assignor to Union Railway Equipment Co., Chicago, Ill. Separable coupler-release rigging. 1,625,144; Apr. 19.
O'Connor, John B., assignor to Lyon Metallic Manufacturing Company, Aurora, Ill. Locker latch. 1,625,145; Apr. 19.
Odom, Leland L., assignor to M-O-R Products Company, Little Rock, Ark. Manufactnre of a substitute for turpentine. 1,625,622; Apr. 19.
O'Dowd, Henry W., Jersey City, N. J., assignor, by mesne assignments, to Standard Gas Equipment Corporation, Baltimore, Md. Gas-stove burner. 1,625,623; Apr. 19.
Oehrle Brothers Company. (See Oehrle, Franklin W., assignor.)
Oehrle, Franklin W., assignor to Oehrle Brothers Company, Philadelphia, Pa. Valance for window draperies. 1,625,329; Apr. 19.
Ohio Brass Company. (See Austin, A. O., and Macleod, assignors.)
Olivarius, Holger de F., assignor to California Packing Corporation, San Francisco, Calif. Pickling ripe olives. 1,625,494; Apr. 19.
Oliver, Ernon V., Portland, Oreg. Distilling apparatus. 1,625,222; Apr. 19.
Oliver, Ernon V., Portland, Oreg. Water still. 1,625,223; Apr. 19.

Oliver, Everett B., Chicago, Ill. Transmission mechanism. 1,624,968; Apr. 19.
Oliver, George A., Cleburne, Tex. Grinding machine. 1,625,049; Apr. 19.
Ollinger, William. (See Rosenberg, A., and Ollinger.)
Olsen, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Magnetic speedometer. 1,625,142; Apr. 19.
Olsen, Simon D., London, England. Arrangement for supplying liquid fuel to internal-combustion engines. 1,625,739; Apr. 19.
O'Neill, Henry W., Elmhurst, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. 1,625,495; Apr. 19.
O'Neill, Joseph A., New York, N. Y. Cushion device for automobiles. 1,625,146; Apr. 19.
Onofrio, Anastas, Detroit, Mich. Combined scrubbing and vacuum cleaning device. 1,625,147; Apr. 19.
Ontario Knife Co. Inc., The. (See Gilian, Gowan C., assignor.)
Orme, Wilber L., Cambridge, Ohio. Service tray for relish or the like. Des. 72,491; Apr. 19.
Oslus, Frederick J., Miami Beach, Fla., assignor to Hamilton-Beach Mfg. Co., Racine, Wis. Vacuum cleaner. 1,624,969; Apr. 19.
Otis Elevator Company. (See Brady, Thomas, assignor.)
Otis Elevator Company. (See Hymans, Frederick, assignor.)
Owye, Harry K., Lovelocks, Nev. Game. 1,624,970; Apr. 19.
Packard, Clarence E., Abilene, Kan. Dump-body vehicle. 1,625,496; Apr. 19.
Packard, Horace N., assignor to The Cutler-Hammer Mfg. Co., Wauwatosa, Wis. Method and means for determining the heating value of combustible gases. 1,625,277; Apr. 19.
Page, Louis A., assignor of one-half to H. C. Messinger, Providence, R. I. Extendible spectacle temple. 1,625,050; Apr. 19.
Pajeau, Charles H., Glencoe, assignor to Toy Tinkers, Inc., Evanston, Ill. Bowling-game apparatus. 1,625,676; Apr. 19.
Palm, Bernard L. (See Palm, Herbert B. and B. L.)
Palm, Herbert B. and B. L., Huron, S. Dak. Hog greaser. 1,625,677; Apr. 19.
Palm, Max J., jr., Cincinnati, Ohio. Plate or similar article. Des. 72,492; Apr. 19.
Panzl, Paul R., Shawinigan Falls, Quebec, Canada. Digester strainer. 1,625,373; Apr. 19.
Papst, Hermann, Vienna, Austria, assignor, by mesne assignments, to F. B. Keane, Bridgeport, Conn. Supporting housing for electrical machines with split poles. 1,625,051; Apr. 19.
Paraffine Companies, Inc., The. (See Finley, Dozier, assignor.)
Paramount Machine Company. (See Eanes, Hugh P., assignor.)
Paramount Rubber Consolidated Inc. (See Roberts, Fred T., assignor.)
Paramount Rubber Consolidated, Inc. (See Roberts, William E., assignor.)
Paramount Rubber Consolidated, Inc. (See Schaefer, James, assignor.)
Pardee, Belle E. (See Pardee, Harvey S., assignor.)
Pardee, Harvey S., assignor to B. E. Pardee, Ravinia, Ill. Radiator cap. 1,625,497; Apr. 19.
Park, William B., assignor of one-half to C. M. Zink, Linton, Ind. Motor controller. 1,625,773; Apr. 19.
Parsons, Arthur W., Miami, Fla. System for carrying out mimic bombing attacks. 1,625,678; Apr 19
Paschall, Williams, Birmingham, Ala. Floor-surfacing machine. 1,625,740; Apr. 19.
Pathe Cinema, Anciens Etablissements Pathe Freres. (See Marrette, Jacques, assignor.)
Pattermann, Otto, Kladno, assignor to Poldihütte, Palackeho Trida, Praha-Vinobrady, Czechoslovakia. Steel. 1,625,741; Apr. 19.
Patterson, Charley T., Springfield, Mo. Moisture guide for incubators. 1,625,420; Apr. 19.
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Subsoil plow. 1,625,278; Apr. 19.
Payne, Ballard I. (See Lowe, Richard T., assignor.)
Payne, John S., Midland Park, N. J. Throttle-control mechanism. 1,625,563; Apr. 19.
Pearl, Frank A., Madison, Wis. Coaster-wagon steering gear. 1,625,421; Apr. 19.
Pearl, Frank A., North Milwaukee, Wis. Convertible coaster wagon. 1,625,422; Apr. 19.
Pearson, Gardner W. (See Proctor, John H., assignor.)
Pearson, George D., Montreal, Quebec, Canada. Automobile tire. 1,625,679; Apr. 19.
Pease, John A. (See Weeks, Wallace M., assignor.)
Pease, John A., et al. (See De Wallace, Harry, assignor.)
Peckenpaugh, John F., Cedar Rapids, Iowa. Window platform. 1,625,423; Apr. 19.
Pelletier, Dominick, Fall River, Mass. Miter box. 1,625,424; Apr. 19.
Penn, George R., assignor to S. R. Penn Mfg. Co., New York, N. Y. Loud-speaker unit. 1,625,148; Apr. 19.
Penn, S. R., Mfg. Co. (See Penn, George R., assignor.)
Pennington, Mary E., St. Davids, Pa., and A. B. Davis, Cincinnati, Ohio. Manufacture of strawboard. 1,625,090; Apr. 19.
Perry-Caldwell Manufacturing Company (Inc.). (See Caldwell, Erwin, assignor.)
Perry, Edgar W., Boston, Mass. Resilient tire. 1,625,742; Apr. 19.
Peters, John F., Rochester, assignor to American Can Company, New York, N. Y. Can-body-making machine. 1,625,091; Apr. 19.
Peters, Minn L., Seattle, Wash. Boudoir cap. Des. 72,494; Apr. 19.
Petnel, Joseph A., Troy, N. Y. Electric switch. 1,625,149; Apr. 19.
Petree, Cuthbert G., assignor to Petree & Dorr Engineers, Inc., New York, N. Y. Recovering sugar content in cane juices. 1,625,680; Apr. 19.
Petree & Dorr Engineers, Inc. (See Petree, Cuthbert G., assignor.)
Phillips, John E., assignor to Albert Pick & Company, Chicago, Ill. Plate or similar article. Des. 72,493; Apr. 19.
Piché, Frank W., Detroit, Mich. Brake mechanism. 1,625,150; Apr. 19.
Piché, Frank W., Detroit, Mich. Brake mechanism for vehicles. 1,625,151; Apr. 19.
Pick, Albert, & Company. (See Phillips, John E., assignor.)
Pickel, Henry C., Pemberton, Minn. Road planer. 1,624,971; Apr. 19.
Pine, William S., Ventura, Calif. Shield for casing-slip handles. 1,625,152; Apr. 19.
Pinkus, Abraham S., New York, N. Y. Radiocondenser. 1,625,330; Apr. 19.
Pitman, Henry L., Westfield, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,625,331; Apr. 19.
Plumstead, Joseph E., Wilmington, Del., assignor to The Jessup & Moore Paper Co., Philadelphia, Pa. Utilizing old paper stock. 1,625,279; Apr. 19.
Poillon, Ethel A., Brooklyn, N. Y. Toilet-powder shaker. 1,625,092; Apr. 19.
Poldihütte. (See Pattermann, Otto, assignor.)
Poliak, Fritz. (See Ripper, Kurt, assignor.)
Pollard, Gurdon T., Denver, Colo. Transmission gear. 1,625,564; Apr. 19.
Porter, Wilson E., assignor to New Haven Clock Co., New Haven, Conn. Stem-winding and stem-setting watch. 1,625,498; Apr. 19.
Porter, Wilson E., assignor to New Haven Clock Co., New Haven, Conn. Timing device for the balance-wheel units of clock and watch movements. 1,625,499; Apr. 19.
Post, C. C., et al. (See Gardner, William R., assignor.)
Potter, Thomas I., Orange, N. J., assignor, by mesne assignments, to Hydro Refrigerator Company, Inc., New York, N. Y. Refrigerating apparatus. 1,624,972; Apr. 19.
Potter, Thomas I., East Orange, N. J., assignor, by mesne assignments, to Hydro Refrigerator Company, Inc., New York, N. Y. Pump. 1,625,153; Apr. 19.
Potter, William H., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Trimming articles. 1,625,332; Apr. 19.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Call-distributing system. 1,625,624; Apr. 19.
Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)
Pracht, Carl J., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Trunk-selecting switch for telephone systems. 1,625,425; Apr. 19.
Pratt & Whitney Company. (See Durkee, Henry E., assignor.)
Prellwitz, William, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Single-chamber clearance unloader. 1,625,681; Apr. 19.
Price, Joseph, Stapleton, assignor to The Griscom-Russell Company, New York, N. Y. Condenser-type heater 1,624,973; Apr. 19.
Proctor, John H., Andover, Mass., assignor to G. W. Pearson, Lowell, Mass. Wooden container. 1,625,280; Apr. 19.
Putnam, Alden L., assignor to Whitehead & Kales Company, Detroit, Mich. Wheel rim and attachment therefor. 1,624,974; Apr. 19.
Quinn, Martin J., Toronto, Ontario, Canada. Pump. 1,625,500; Apr. 19.
Racine Horseshoe Tire Company. (See Caldwell, Truman S., assignor.)
Rader, William O. (See Seaton, A., and Rader.)
Radio Frequency Laboratories, Incorporated. (See Hull, L. M., and Seabury, assignors.)
Radio Frequency Laboratories, Incorporated. (See Seabury, Richard W., assignor.)
Ragg, Mary E., Upper Norwood, England. Obstetric appliance. 1,625,682; Apr. 19.
Rail, Joseph, Terre Haute, Ind. Blade-grader level and slope indicator. 1,625,683; Apr. 19.
Railway Improvement Company. (See Clark, Leverett M., assignor.)
Ramsey, Robert L., Ben Wheeler, Tex. Organized lifting mechanism. 1,625,743; Apr. 19.
Rand, James H., North Tonawanda, assignor, by mesne assignments, to Rand Kardex, Inc., Tonawanda, N. Y. Index tab. 1,625,154; Apr. 19.
Rand Kardex, Inc. (See Rand, James H., assignor.)

Randolph, Charles P., Oak Park, assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill. Electric toaster. Des. 72,495; Apr. 19.
Rapid Addressing Machine Company. (See Geiger, E. A., Schraegle, and Jennings, assignors.)
Raqué, Arthur E. and P. E., Jersey City, N. J. Combined speed regulating and mixing valve. 1,625,281; Apr. 19.
Raqué, Philip E. (See Raqué, Arthur E. and P. E.)
Ratezenstein, William, Chicago, Ill., assignor to Cresco Creamery Supply Co. Valved outlet for Pasteurizers. 1,625,765; Apr. 19.
Ratigan, James P., Walnut Park, Calif. Cable hook. 1,625,155; Apr. 19.
Ray, Felbert A., Wichita Falls, Tex. Tank for separating oil and water from gas. 1,625,052; Apr. 19.
Ray, John M., Apollo, Pa. Corn planter. 1,625,390; Apr. 19.
Redfield, Harry B., New York, N. Y. Telephone attachment. 1,625,333; Apr. 19.
Reece, Raymond H., Joliet, Ill. Timer for ignition systems and the like. 1,624,975; Apr. 19.
Reedy, Alfred J., assignor to A. B. Stove Company, Battle Creek, Mich. Stove-door construction. 1,624,976; Apr. 19.
Renfe, Francis E., Omaha, Nebr. Tire pump. 1,625,374; Apr. 19.
Reid, Josiah E., and C. L. Nein, assignors to International Motor Company, New York, N. Y. Hoisting mechanism for dump trucks. 1,624,977; Apr. 19.
Reid, Josiah E., and C. L. Nein, assignors to International Motor Company, New York, N. Y. Hoisting mechanism for dump trucks. 1,624,978; Apr. 19.
Reiland, Ernest S. and P. M., St. Paul, assignors to Bayport Foundry Company, Bayport, Minn. Sashweight pulley. Re16,594; Apr. 19.
Reiland, Peter M. (See Reiland, Ernest S. and P. M.)
Reilly, John B., Whittier, and C. H. Stone, Brea, assignors to Kammerer Corporation, Santa Fe Springs, Calif. Tool for cutting and removing pipe from wells. 1,625,391; Apr. 19.
Reilly, John B., Whittier, and C. H. Stone, Brea, assignors to Kammerer Corporation, Santa Fe Springs, Calif. Tool for cutting and removing pipe from wells. 1,625,392; Apr. 19.
Reilly, John B., Whittier, and C. H. Stone, Brea, assignors to Kammerer Corporation, Santa Fe Springs, Calif. Tool for cutting pipe in wells. 1,625,393; Apr. 19.
Remy, Franz, Fosses-lez-Namur, Belgium. Electric traction system for agricultural implements. 1,625,744; Apr. 19.
Renholdt, John E., Stratford, assignor to Dictaphone Corporation, Bridgeport, Conn. Speed-control mechanism. 1,625,093; Apr. 19.
Rentschler, Harvey C., and J. W. Marden, East Orange, N. J., assignors to Westinghouse Lamp Company. Target for X-ray tubes. 1,625,426; Apr. 19.
Rentschler, Harvey C., and J. W. Marden, East Orange, N. J., assignors to Westinghouse Lamp Company. Target for X-ray tubes. 1,625,427; Apr. 19.
Reppart, Hugh E., Washington, D. C. Electric condenser. 1,625,094; Apr. 19.
Re Qua, Frederick L., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Regulation of electric circuits. 1,625,282; Apr. 19.
Requa, Reginald C., Cold Spring Harbor, N. Y. Literary savings device. 1,625,053; Apr. 19.
Restein, Clement, Hatboro, Pa. Fiber packing. 1,625,095; Apr. 19.
Reyes, José de L., Los Angeles, Calif. Article of jewelry. 1,625,375; Apr. 19.
Rheinische Kampfer-Fabrik Gesellschaft mit beschränkter Haftung. (See Schöllkopf, Karl, assignor.)
Rhode Island Braiding Machine Company. (See Thomas, Frederick, assignor.)
Rhodes, John J., assignor of one-half to F. M. Gordon, South Hamilton, Mass. Hook bracket. 1,625,745; Apr. 19.
Richards, Arnold E., Midlothian, Md. Timer. 1,624,979; Apr. 19.
Richards, Walter H., New London, Conn. Fluid meter and motor. 1,625,428; Apr. 19.
Richardson, Myron H., Chicago, and A. E. Gebert, Wilmette, assignors to Advance Machine Company, Chicago, Ill. Check-controlled lock. 1,624,980; Apr. 19.
Richardson, Rodney G., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. Re16,602; Apr. 19.
Ricker, Norman H., assignor to Humble Oil and Refining Company, Houston, Tex. Seismograph. 1,625,625; Apr. 19.
Riddle, Edward N., Company, The. (See Riddle, John K., assignor.)
Riddle, John K., assignor to The Edward N. Riddle Company, Toledo, Ohio. Lighting fixture. 1,625,626; Apr. 19.
Riegel, Samuel S., Scranton, Pa., assignor, by mesne assignments, to J. H. Allen, Jersey City, N. J. Railway-vehicle ash or other waste transfer method and apparatus. 1,625,429; Apr. 19.
Rigby, Albert, assignor of one-half to P. Diamond, Paterson, N. J. Loom. 1,625,156; Apr. 19.
Ripper, Kurt, assignor to F. Pollak, Vienna, Austria. Manufacturing homogeneous glasslike condensation products of urea and formaldehyde. 1,625,283; Apr. 19.
Rix, Frank, assignor of one-half to J. F. Siegel, New York, N. Y. Oil burner. 1,625,334; Apr. 19.
Robbins, William H., Springfield, assignor to The Williams Company, London, Ohio. Steel-wool machine. 1,625,158; Apr. 19.
Robbins, William H., Springfield, assignor to The Williams Company, London, Ohio. Steel-wool-removing machine. 1,625,159; Apr. 19.
Roberts, Austin, Pretoria, Transvaal, South Africa. Turning signal for road vehicles. 1,624,981; Apr. 19.
Roberts, Eugene, assignor to The Western States Machine Company, Salt Lake City, Utah. Screen for centrifugal baskets. 1,625,376; Apr. 19.
Roberts, Eugene, assignor to The Western States Machine Company, Salt Lake City, Utah. Backing for centrifugal baskets. 1,625,377; Apr. 19.
Roberts, Fred T., Yonkers, assignor to Paramount Rubber Consolidated Inc., Tuckahoe, N. Y. Making hollow rubber articles. 1,625,394; Apr. 19.
Roberts, Fred T., Yonkers, assignor to Paramount Rubber Consolidated Inc., Tuckahoe, N. Y. Making hot-water bottles, douche bags, etc. 1,625,395; Apr. 19.
Roberts, Horace L., Mount Vernon, N. Y. Feeding mechanism for tag-stringing machines and the like. 1,625,157; Apr. 19.
Roberts, William E., Yonkers, assignor to Paramount Rubber Consolidated Inc., Tuckahoe, N. Y. Making hot-water bottles. 1,625,396; Apr. 19.
Robertson, William H., Dayton, Ohio. Traveling conveyor. 1,625,501; Apr. 19.
Robinson, Albert E., assignor to The American Tool Works Company, Cincinnati, Ohio. Friction-clutch mechanism. 1,625,397; Apr. 19.
Robinson, Arthur, Minneapolis, Minn. Figure projecting toy. 1,625,430; Apr. 19.
Robinson, Lula H., Dallas, Tex. Adjustable rod support for shades, curtains, and drapes. 1,625,160; Apr. 19.
Rodger Ballast Car Company. (See Morey, William E., assignor.)
Roddy, John C., Palatka, Fla. Reenforcing means for flexible couplings of pipe lines. 1,625,684; Apr. 19.
Roebuck, Harold. (See Elliott, E., and Roebuck.)
Roepke Pan Machine Corporation. (See Roepke, William J., assignor.)
Roepke, William J., Los Angeles, Calif., assignor, by mesne assignments, to Roepke Pan Machine Corporation, Wilmington, Del. Automatic pan-making machine. 1,625,502; Apr. 19.
Rolley, Noah F., Karthaus, Pa. Pocket holder for pool tables. 1,625,685; Apr. 19.
Roos, Jacob J., Hull, Iowa. Device for use in moving buildings. 1,625,161; Apr. 19.
Rosato, Victor, Bronx, N. Y. Revolving stencil-cylinder machine. 1,625,054; Apr. 19.
Rosenberg, Abraham, and W. Ollinger, New York, N. Y., assignors to F. T. Moore, Washington, D. C. Signaling and direction-indicating apparatus for automobiles. 1,625,565; Apr. 19.
Rosenberg, Louis, Milwaukee, Wis. Apparatus for cleaning metal parts. 1,624,982; Apr. 19.
Rosenfeld, William S., Baltimore, Md. Alignment device for automobile wheels. 1,625,431; Apr. 19.
Rosenthal, Dunbar A., and C. P. Winter, assignors to United States Paper Mills, Inc., Chambersburg, Pa. Folding machine. 1,625,566; Apr. 19.
Rosenthal, Isadore L., assignor to J. Rosenthal, Brooklyn, N. Y. Method of and device for preventing the skidding of self-propelled road vehicles. 1,625,746; Apr. 19.
Rosenthal, Julia. (See Rosenthal, Isadore L., assignor.)
Rouband, Emile C. C., and R. A. Veillon, Paris, France. Product for destroying mosquito larvæ. 1,625,627; Apr. 19.
Routson, Howard W., Oakland, Calif., assignor, by mesne assignments, to Minimax Utilities Corporation. Washing machine. 1,625,096; Apr. 19.
Royal Metal Lighting Fixture Co. (See Brown, Max., assignor.)
Rüdenberg, Reinhold, Berlin-Charlottenburg, and K. Kurda, Nuremberg, assignors to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Devices for neutralizing the higher harmonics in high-voltage-line plants. 1,625,567; Apr. 19.
Rudolph, Walter J., assignor to The Imperal Brass Manufacturing Company, Chicago, Ill. Air pump. 1,625,097; Apr. 19.
Rudolph, Walter J., assignor to The Imperial Brass Manufacturing Company, Chicago, Ill. Atomizing cleaner. 1,625,098; Apr. 19.
Rudolph, Walter J., assignor to The Imperial Brass Manufacturing Company, Chicago, Ill. Pump. 1,625,099; Apr. 19.
Ruff, Martin L., Jacksonville, Fla. Attachment for hair clippers. 1,625,747; Apr. 19.
Runge, Richard M., assignor, by mesne assignments, to The Miller Company, Meriden, Conn. Lamp support. 1,625,100; Apr. 19.
Rutner, Stanley A., Hill, Calif. Bailer dump. 1,625,686; Apr. 19.

Ryan, John J., and J. Gaffney, assignors to National Folding Box Company, New Haven, Conn. Display carton. 1,625,687; Apr. 19.
Sabin, Milton H., New York, N. Y. Watch bracelet. Des. 72,496; Apr. 19.
Sadler, Frederick W., assignor of one-fourth to B. E. Turney, Oklahoma City, Okla. Casing cover and tool holder. 1,625,774; Apr. 19.
Safety Car Heating and Lighting Company, The. (See Turbayne, William A., assignor.)
Sager, John W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Winding mechanism. 1,625,432; Apr. 19.
Sandel, Albert, assignor of one-half to F. Scholz, Chicago, Ill. Game apparatus for multisix color games. 1,625,055; Apr. 19.
Sandy, Richard E., Cloverdale, Ind. Adjustable measure. 1,625,056; Apr. 19.
Sani-Tabi-Tub Company. (See Darrow, Benjamin H., assignor.)
Sargent & Lundy Incorporated. (See Schroeder, Bernhard, assignor.)
Sauser, Joseph A., assignor to The Toy Tinkers, Inc., Evanston, Ill. Wheeled toy. Des. 72,497; Apr. 19.
Scarth, Harold, Detroit, Mich. Tile closure. 1,625,028; Apr. 19.
Scavullo, Angelo C., New York, N. Y., assignor to Jos. Heinrichs Corporation, Cream pitcher. Des. 72,498; Apr. 19.
Schaefer, George, et al., trustees. (See Inghram, Howard T., assignor.)
Schaefer, James, West Paterson, assignor to Paramount Rubber Consolidated, Inc., Little Falls, N. J. Method of and apparatus for making hollow rubber articles. 1,625,398; Apr. 19.
Schaefer, James, Yonkers, N. Y., assignor to Paramount Rubber Consolidated, Inc. Method of and apparatus for making hollow rubber articles. 1,625,399; Apr. 19.
Schaeffer, George W., Chicago, Ill. Roof-flashing sealing and retaining device. 1,625,688; Apr. 19.
Scheiner, Philip, Brooklyn, N. Y. Stand for a drinking set or similar article. Des. 72,499; Apr. 19.
Scheluto, Jean, and F. J. J. Furnemont, Brussels; said Scheluto, assignor to G. E. Coene, Uccle, near Brussels, Belgium. Regulating automatically sweeping fire in machine guns. 1,625,775; Apr. 19.
Schiess, Fritz, Lichtensteig, Switzerland. Machine for cutting or severing metallic bars. 1,625,748; Apr. 19.
Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine-blade shrouding. 1,625,433; Apr. 19.
Schneider, William G., Camden, N. J. Container cover. 1,625,335; Apr. 19.
Schnur, Jacob. (See Schnur, J. M., Kesselring, Schnur, and Joniscik.)
Schnur, Joseph M., F. Kesselring, J. Schnur, and S. Joniscik, assignors to K. Schnur, as trustee. Chicago, Ill. Carton-feeding machine. 1,625,057; Apr. 19.
Schnur, Katherine, trustee. (See Schnur, J. M., Kesselring, Schnur, and Joniscik, assignors.)
Schöllkopf, Karl, assignor to Rheinische Kampfer-Fabrik Gesellschaft mit beschrankter Haftung, Dusseldorf-Oberkassel, Germany. Manufacture of menthol. 1,625,771; Apr. 19.
Scholz, Frank. (See Sandel, Albert, assignor.)
Schooley, Claude O., Perth Amboy, N. J., assignor to Standard Underground Cable Company, Pittsburgh, Pa. Cable reel. 1,625,503; Apr. 19.
Schraegle, August F. (See Geiger, E. A., Schraegle, and Jennings.)
Schroeder, Bernhard, assignor to Sargent & Lundy Incorporated, Chicago, Ill. Steam-power system. 1,625,336; Apr. 19.
Schroter, George A., Denver, Colo. Dewatering peat. 1,625,058; Apr. 19.
Schulenberg, Frederick H., Lima, Ohio. Hydrocarbon burner. 1,625,162; Apr. 19.
Schultz, August E. (See Jahr, Arthur A., assignor.)
Schurr, William H., assignor to Searls Manufacturing Company, Newark, N. J. Fixture support. 1,625,163; Apr. 19.
Schutz, Harold R., Toledo, assignor to The Edward Ford Plate Glass Company, Rossford, Ohio. Casting table. 1,625,164; Apr. 19.
Schuyler, Frank B., Berkeley, assignor to Johnson Washer Company, Oakland, Calif. Wringer attachment. 1,625,101; Apr. 19.
Schwartz, Gerhardt F., St. Louis, Mo. Making hot-water tanks. 1,624,983; Apr. 19.
Scott, Lewis L., assignor to Electrol, Inc. of Missouri, St. Louis, Mo. Combustion system. 1,625,629; Apr. 19.
Scott, Lewis L., assignor to Electrol, Inc. of Missouri, St. Louis, Mo. Combustion system. 1,625,630; Apr. 19.
Scovill Manufacturing Company. (See Fenton, Paul E., assignor.)
Seabury, Richard W. (See Hull, L. M., and Seabury.)
Seabury, Richard W., assignor to Radio Frequency Laboratories, Incorporated, Boonton, N. J. Composite article and making same. 1,625,749; Apr. 19.
Searls Manufacturing Company. (See Schurr, William H., assignor.)
Seaton, Albert, and W. O. Rader, assignors to Eli Lilly and Company, Indianapolis, Ind. Product and testing sugar tolerance. 1,625,165; Apr. 19.
Seaton, Benjamin C., Nashville, Tenn. Mold and constructing continuous tubes. 1,625,284; Apr. 19.
Seawell, Joseph M., Richmond, Va. Stabilizer. 1,625,224; Apr. 19.
Secor, John A., assignor to Advance-Rumely Company, La Porte, Ind. Exhaust nozzle and assembly. 1,625,102; Apr. 19.
Seeberger, Fred B., Philadelphia, Pa. Cue tip and manufacture thereof. 1,624,984; Apr. 19.
Seeger, Edwin W., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Control system for printing presses. 1,625,225; Apr. 19.
Seibert, Herbert D., Brooklyn, N. Y. Slug case. 1,625,285; Apr. 19.
Shaffer, Daniel J., assignor of one-half to L. E. Worth, Aurora, Ill. Water heater. 1,625,286; Apr. 19.
Sharp, Isaac M., San Francisco, Calif. Oil burner. 1,625,400; Apr. 19.
Sharples Specialty Company, The. (See Jones, L. D., and Ayres, assignors.)
Shaw, Harold F., Leominster, Mass. Combined frame and body with hood for a baby carriage. Des. 72,500; Apr. 19.
Shaw, Wesley J., assignor to New England Wood Heel Co., Haverhill, Mass. Bearing. 1,625,568; Apr. 19.
Sheldon, Edward P., assignor, by mesne assignments, to R. Hoe and Co., Inc., New York, N. Y. Slow-down mechanism for printed products. 1,624,985; Apr. 19.
Shelley, Thomas W., Los Angeles, Calif., assignor to W. W. Whitecotton. Tricycle. 1,625,337; Apr. 19.
Sherrod, William H., Los Angeles, Calif. Toy. 1,624,986; Apr. 19.
Shickman, Abe J., W. A. Thum, and W. L. Dempsey, St. Louis; said Thum and said Dempsey assignors to said Shickman. Automatic printing press. 1,625,569; Apr. 19.
Shields, Benjamin F., C. G. Crombie, and G. A. Windell, Seattle, Wash. Shock-absorbing device. 1,625,570; Apr. 19.
Shillman, Albert H., Baltimore, Md. Pocketbook. 1,624,987; Apr. 19.
Shinkle, Edward M., U. S. Army, Honolulu, Hawaii. Stop for rotating parts. 1,625,571; Apr. 19.
Shot-Lite Corporation of America. (See Freund, Robert R., assignor.)
Sieckmann, Karl, Vienenburg, Germany. Crane. 1,624,988; Apr. 19.
Siegel, Henry M., Malden, Mass. Trousers supporter. 1,625,166; Apr. 19.
Siegel, John F. (See Rix, Frank, assignor.)
Siegel, Maude, assignor to Franklin Simon & Co., Inc., New York, N. Y. Dress. Des. 72,501; Apr. 19.
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Rüdenburg, R., and Kurda, assignors.)
Silven, Joseph, et al. (See Weinaug, E., and Macfarlane, assignors.)
Simmons, Claude, Reno, Nev. Automobile brake and jack. 1,625,226; Apr. 19.
Simpson, Frederick G., Seattle, Wash. Converter of electric current. 1,625,504; Apr. 19.
Simpson, Robert J. O., assignor to The L. S. Starrett Company, Athol, Mass. Cylinder gauge. 1,625,401; Apr. 19.
Simpson, Robert J. O., assignor to The L. S. Starrett Company, Athol, Mass. Dial indicator. 1,625,766; Apr. 19.
Simpson, Robert J. O., assignor to The L. S. Starrett Company, Athol, Mass. Micrometer calipers. 1,625,767; Apr. 19.
Simpson, Ward T., Detroit, assignor, by mesne assignments, to A. G. Dickinson, Grand Rapids, Mich. Carburetor. 1,625,572; Apr. 19.
Simpson, Ward T., Ann Arbor, Mich., assignor, by mesne assignments, to A. G. Dickinson, Grand Rapids, Mich. Carburetor. 1,625,573; Apr. 19.
Simpson, Ward T., assignor, by mesne assignments, to A. G. Dickinson, Grand Rapids, Mich. Carburetor. 1,625,574; Apr. 19.
Simpson, Ward T., Ann Arbor, Mich., assignor, by mesne assignments, to A. G. Dickinson, Grand Rapids, Mich. Carburetor and fuel-feeding system therefor. 1,625,575; Apr. 19.
Sinclair Refining Company. (See Frye, W. A., and Heady, assignors.)
Singer Manufacturing Company, The. (See Tivendale, William, assignor.)
Sioan, Harry E., Hartford, Conn. Rack-tooth-cutting machine. 1,625,402; Apr. 19.
Smillie, C. M., & Company. (See Cross, Lester H., assignor.)
Smith, Charles F., and C. Edwards, assignors to Landers, Frary & Clark, New Britain, Conn. Cooker. 1,624,989; Apr. 19.
Smith, Frederick W., Whittier, Calif. V-section bandless brake. 1,625,103; Apr. 19.
Smith, James T., Newark, N. J. Method and machine for coating leather and the like. 1,625,434; Apr. 19.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,625,338; Apr. 19.
Smith, Lemuel D., Milwaukee, Wis. Surgical syringe. 1,624,990; Apr. 19.
Snodgrass, Joseph E., assignor of one-third to L. V. Lienhard, Amarillo, Tex. Casing head for oil wells. 1,625,378; Apr. 19.

Snow, William N., Beloit, Wis. Ventilated milk-can cover. 1,625,287; Apr. 19.
Snowdon, Charles, and F. Brown, Wolsingham, England. Stretcher for necktles and the like. 1,625,059; Apr. 19.
Snyder, Louis C., Booneville, Ind. Tire. 1,625,750; Apr. 19.
Societe des Films en Couleur Keller Dorian. (See Audibert, Jean, assignor.)
Societe Industrielle des Procedes W. A. Loth. (See Loth, William A., assignor.)
Societe l'Aster. (See Monard, Alfred, assignor.)
Society of Chemical Industry in Basle. (See Fritzche, H., Krummenacher, Gubler, and Kaiser, assignors.)
Society of Chemical Industry in Basle. (See Hartmann, Max, assignor.)
Sohn, Archie C. (See Long, C. T., and Sohn.)
Sohn, Archie C. (See Taylor, A. B., Long, and Sohn.)
Solberg, John C., Arlington, assignor of one-half to F. C. Langenberg, Cambridge, Mass. Fluid-pressure intensifier. 1,625,751; Apr. 19.
Sonora Phonograph Company. (See Wolff, Joseph, assignor.)
Soule, William H. (See Ingolfarud, L. J., and Soule.)
Spangler, George W., Greencastle, Pa. Valve structure. 1,625,689; Apr. 19.
Speaker, Charles, Cherrydale, Va. Wireless telegraph and telephone system. 1,624,991; Apr. 19.
Spencer, Robert L., Harrisburg, Ark. Railway-track construction. 1,625,288; Apr. 19.
Spengler, Henry, New York, N. Y. Snap fastener. 1,625,104; Apr. 19.
Sperry Gyroscope Company, The. (See Hall, Theodore, assignor.)
Spillman, Edward O., North Tonawanda, assignor to Fischer Motor Company, New York, N. Y. Internal-combustion engine. 1,624,992; Apr. 19.
Spink, Alfred, Whitehaven, and D. Crabtree, Bradford, England. Loom for weaving pile fabrics. 1,624,993; Apr. 19.
Spotswood, John B., Montclair, N. J., and H. M. Gulick, Arlington, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Container for explosives. 1,625,631; Apr. 19.
Stacy, Grover C., Dallas, Tex. Telescoping suction pipe. 1,625,576; Apr. 19.
Standard Gas Equipment Corporation. (See O'Dowd, Henry W., assignor.)
Standard Spray Pump Company. (See Costello, Frank T., assignor.)
Standard Underground Cable Company. (See Schooley, Claude O., assignor.)
Stark, Theodore H., assignor to C. Bruno & Son, Inc., New York, N. Y. Violin case. 1,624,994; Apr. 19.
Starrett, L. S., Company, The. (See Simpson, Robert J. O., assignor.)
Staupe, Alton W., Foxboro, Wis. Screw-driver attachment. 1,625,227; Apr. 19.
Stein, Gerhard, Neusornewitz, near Meissen, Germany. Pot for glass-melting furnaces. 1,625,435; Apr. 19.
Stein, Harry B., Chicago, Ill. Window-hanging device. 1,625,280; Apr. 19.
Stein, Louis, Chicago, Ill. Advertising portfolio. 1,625,228; Apr. 19.
Steinle, William J. (See Hopkinson, E., and Steinle.)
Sterling, Frank H., Minneapolis, Minn. Double-entry and trial-balance book. 1,625,105; Apr. 19.
Sterling, Harry C., assignor to McMillan Book Company, Syracuse, N. Y. Loose-leaf binder. 1,625,752; Apr. 19.
Stern, Louis, Company. (See Valcourt, Louis E., assignor.)
Sternberg, Max. (See Baskin, L., and Sternberg.)
Stevens, Horace D., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Flap cutting and measuring machine. 1,625,403; Apr. 19.
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stimpson, Walter F., Louisville, Ky. Scale. 1,624,995; Apr. 19.
Stockfleth, Berger, Berrien Springs, and F. W. Burger, Niles, assignor to Clark Tructractor Company, Buchanan, Mich. Portable elevating apparatus. 1,625,290; Apr. 19.
Stokes and Smith Company. (See Stokes, John S., assignor.)
Stokes, Jane G., Larchmont, assignor to Jane Gray Company, Inc., New York, N. Y. Doll or similar article. Des. 72,502; Apr. 19.
Stokes, John S., Huntington Valley, assignor to Stokes and Smith Company, Philadelphia, Pa. Assembling, tubbing, and applying composite box wrappers. 1,625,577; Apr. 19.
Stollberg, Charles, assignor to American Can Company, New York, N. Y. Can body and forming the side seam thereof. 1,625,229; Apr. 19.
Stone, Charles H. (See Reilly, J. B., and Stone.)
Storm, Adolph, assignor of one-half to C. G. Strand, Minneapolis, Minn. Lead sight for firearms. 1,625,060; Apr. 19.
Strand, Charles G. (See Storm, Adolph, assignor.)
Stranders, Julien, London, England, assignor to H. B. Kruger, New York, N. Y. Display stand. 1,625,436; Apr. 19.
Straubel, C. A., Company. (See Meyers, Julius R., assignor.)
Strayer, Lawrence H., Kent, Ohio. Aeronautic toy. 1,625,167; Apr. 19.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)
Studebaker Corporation, The. (See Bourgon, Joseph H., assignor.)
Studebaker Corporation, The. (See Link, Vincent, assignor.)
Stukenborg, Louis C., Memphis, Tenn., and J. H. Cooper, Lonoke, Ark. Powder-dusting machine. 1,624,996; Apr. 19.
Stump, Earl R. (See Stump, Oscar C. and E. R.)
Stump, Oscar C. and E. R., Seattle, Wash. Collision-signal switch. 1,625,505; Apr. 19.
Stumpf, Johann, Berlin, Germany. Valve gear for steam engines. 1,625,632; Apr. 19.
Suddeutsche Christbaumschmuck- u. Reflektoren Gesellschaft mit beschrinkter Haftung. (See Kempf, Conrad, assignor.)
Sullivan, Josephine W., New York, N. Y. Folding back rest. 1,625,106; Apr. 19.
Sunderland, Alfred E. (See Niederhauser, F. C., and Sunderland.)
Sun-Maid Raisin Growers of California. (See Forrest, Thomas W. W., assignor.)
Swanfeldt, Andrew, Los Angeles, Calif. Ornamental awning fabric and making the same. 1,625,690; Apr. 19.
Sweeney, Patrick, Wisner, Nebr. Disk harrow. 1,625,370; Apr. 19.
Sweet, Cecil H. (See Erwin, W. C., and Sweet.)
Sweitzer, Henry G., Detroit, Mich. Radiator wall shield. 1,624,997; Apr. 19.
Talbot, James A., assignor of one-half to S. V. Davin, Walla Walla, Wash. Weeder. 1,625,168; Apr. 19.
Talbot, James A., assignor of one-half to S. V. Davin, Walla Walla, Wash. Weeder. 1,625,169; Apr. 19.
Talley, Randal E., North Irwin, Pa., assignor to George J. Hagan Company, Pittsburgh, Pa. Electric heating device. 1,625,380; Apr. 19.
Tannehill, Vernon L. (See Astrom, J., and Tannehill.)
Tanner, Arnold J., North Haven, Conn. Display container. 1,625,171; Apr. 19.
Tanner, Arnold J., North Haven, Conn., assignor, by mesne assignments, to S. S. Gorham, Chicago, Ill., trustee. Railway and like fare system and means used therewith. 1,625,170; Apr. 19.
Tatum, John J., Baltimore, Md. Coupler striking plate. 1,624,998; Apr. 19.
Taylor, Arch B., Charlotte, C. T. Long, Winston-Salem, N. C., and A. C. Sohn, Pittsburgh, Pa., assignors to Taylor-Long Company, Charlotte, N. C. Bottle. Des. 72,503; Apr. 19.
Taylor-Long Company. (See Long, C. T., and Sohn, assignors.)
Taylor-Long Company. (See Taylor, A. B., Long, and Sohn, assignors.)
Telautograph Corporation. (See Van Nostrand, Arleigh N., assignor.)
Ternstedt Manufacturing Company. (See Archer, T. P., and Heintz, assignors.)
Thero, Charley, assignor to Union Special Machine Company, Chicago, Ill. Machine for overcasting the edges of fabrics. 1,625,633; Apr. 19.
Thomas, Benjamin D., assignor of one-tenth to Thomas-Morse Aircraft Corporation, Ithaca, N. Y. Airplane-wing construction. 1,625,634; Apr. 19.
Thomas, Edward, Cleveland, Ohio, assignor to The American Steel and Wire Company of New Jersey. Take-up block. 1,625,506; Apr. 19.
Thomas, Erroid B., Newton, assignor to Thomas Products, Inc., Boston, Mass. Sanitary napkin or the like. Re16,603; Apr. 19.
Thomas, Frederick, assignor to Rhode Island Braiding Machine Company, Philadelphia, Pa. Hemmer for sewing machines. 1,625,753; Apr. 19.
Thomas, Harold D., assignor to Automatic Shoe Shiner Corporation, New York, N. Y. Time-switch mechanism. 1,625,339; Apr. 19.
Thomas-Morse Aircraft Corporation. (See Thomas, Benjamin D., assignor.)
Thomas Products, Inc. (See Thomas, Erroid B., assignor.)
Thomas, Thomas C., Evanston, Ill., assignor to The Youngstown Sheet and Tube Company, Youngstown, Ohio. Making Weel points. 1,625,340; Apr. 19.
Thompson, Charles H., assignor to Yarnall-Waring Company, Philadelphia, Pa. Hammer-blow steam trap. 1,625,107; Apr. 19.
Thompson, Henry E., Newark, N. J. Closure fastener. 1,625,507; Apr. 19.
Thorne, Robert H., Williamsport, Pa. Laminated packing and forming the same. 1,625,508; Apr. 19.
Thum, Walter A. (See Shickman, A. J., Thum, and Dempsey.)
Thurston, Charles B., assignor of one-third to W. S. Buchner and one-sixth to R. B. Thurston, Oildale, Calif. Oil-well pump. 1,625,230; Apr. 19.
Thurston, Robert B., et al. (See Thurston, Charles B., assignor.)
Timken Roller Bearing Company, The. (See Miller, George L., assignor.)
Timmerman, Frank J. (See Kelly, William A., assignor.)

Tingley, Bruce H., assignor to The Dalton Adding Machine Company, Cincinnati, Ohio. Automatic shuttle-control mechanism for adding machines. 1,625,291; Apr. 19.
Tivendale, William, Clydebank, Scotland, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Needle-straightening machine. 1,625,691; Apr. 19.
Tobita, Toshio, assignor to Konishi Kotakudo Company, Inc., New York, N. Y. Watch-crystal tray. 1,625,754; Apr. 19.
Togami, Nobufumi, Saga, Japan. Electromagnetic switch. 1,625,509; Apr. 19.
Topham, Laurence E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., Sewing machine. 1,625,231; Apr. 19.
Topham, Laurence E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Bobbin-winding machine. 1,625,232; Apr. 19.
Tower Manufacturing Co. (See Ulmann, Edgar A., assignor.
Towle Manufacturing Company. (See Nock, Harold E., assignor.)
Towns, Pete, Ansley, Nebr. Quick-adjusting fender or shield-lifter attachment for cultivators. 1,625,292; Apr. 19.
Toy Tinkers, Inc. (See Pajeau, Charles H., assignor.)
Toy Tinkers, Inc. (See Sauser, Joseph A., assignor.)
Tredwell, Charles A., assignor to Winchester Repeating Arms Co., New Haven, Conn. Telescopic fishing rod. 1,625,510; Apr. 19.
Tremper, Charles W., assignor, by mesne assignments, to The Tremper-Shields Company, New Haven, Conn. Suction sheet-pick-up mechanism. 1,625,578; Apr. 19.
Tremper-Shields Company, The. (See Tremper, Charles W., assignor.)
Tribune Company, The. (See Lundberg, Godfrey, assignor.)
Trimont Manufacturing Company. (See Kenerson, Joseph E., assignor.)
Triver, Elmer D., et al. (See Krum, John H., assignor.)
Trout, Philip H., Roanoke, Va. Welded composite corrugated sheet. 1,625,061; Apr. 19.
Trout, William A., Los Angeles, Calif. Circulating head. 1,625,172; Apr. 19.
Troy Laundry Machinery Co. (See Balzer, Fritz, assignor.)
Truslow, Wallace B., et al. (See Gardner, William R., assignor.)
Turbayne, William A., Niagara Falls, N. Y., assignor, by mesne assignments, to The Safety Car Heating and Lighting Company, New York, N. Y. System having combined automatic switch and lamp regulator. 1,624,999; Apr. 19.
Turner, Douglas, assignor to The Measuregraph Company, St. Louis, Mo. Ribbon measuring, cost computing, and winding machine. 1,624,173; Apr. 19.
Turner, Harry G., Chicago, Ill. Engraving machine. 1,625,062; Apr. 19.
Turner Tanning Machinery Company, The. (See Broughton, Winn E., assignor.)
Turney, Barbara E. (See Sadler, Frederick W., assignor.)
Turtle, David, and M. Klitenick, New York, N. Y. Metal cutter. 1,625,341; Apr. 19.
Two Vest Sign Company. (See Vest, Thomas F., assignor.)
Ulmann, Edgar A., Los Angeles, Calif., assignor, by mesne assignments, to Tower Manufacturing Co., Inc., New York, N. Y. Controlling apparatus. 1,625,000; Apr. 19.
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Pitman, Henry L., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Ungerer, Karl F., Pforsheim, Germany. Shaft coupling. 1,625,511; Apr. 19.
Union Draft Gear Company. (See Cotton, Walter H., assignor.)
Union Railway Equipment Company. (See Hall, William B., assignor.)
Union Railway Equipment Co. (See O'Connor, Arthur F., assignor.)
Union Special Machine Company. (See Long, William B., assignor.)
Union Special Machine Company. (See Thero, Charley, assignor.)
Unique Spark Plug Cleaner Co. (See Floyd, Roy C., assignor.)
United Shoe Machinery Corporation. (See Bertrand, Frederic E., assignor.)
United Shoe Machinery Corporation. (See Braden, Albert R., assignor.)
United Shoe Machinery Corporation. (See Long, Austin M., assignor.)
United Shoe Machinery Corporation. (See Topham, Laurence E., assignor.)
United States Paper Mills, Inc. (See Rosenthal, D. A., and Winter, assignors.)
Universal Battery Company. (See Mowry, Robert D., assignor.)
Universal Draft Gear Attachment Co. (See Camp, Percy B., assignor.)
Universal Harvester Company, The, et al. (See Ingham, Howard T., assignor.)
Valcourt, Louis E., Pawtucket, assignor to Louis Stern Company, Providence, R. I. Bracelet hook. 1,625,063; Apr. 19.
Van Eweyk, William F., assignor to Milwaukee Brass Manufacturing Company, Milwaukee, Wis. Faucet. Des. 72,505; Apr. 19.
Van Ness, Henry E., Elmira, N. Y. Yarn cleaner. 1,625,692; Apr. 19.
Van Nostrand, Arleigh N., Flushing, N. Y., assignor to Telautograph Corporation, Richmond, Va. Telautograph apparatus. 1,625,342; Apr. 19.
Van Nostrand, Arleigh N., Flushing, N. Y., assignor to Telautograph Corporation, New York, N. Y. Paper-winding mechanism. 1,625,343; Apr. 19.
Van Sant, Robert H., Chicago, Ill., assignor, by mesne assignments, to Gold Dust Corporation, New York, N. Y. Glass-cleaning applicator. 1,625,174; Apr. 19.
Veillon, Raymond A. (See Roubaud, E. C. C., and Veillon.)
Velde, Ernest A., Cedar Rapids, Iowa. Bed davenport. 1,625,437; Apr. 19.
Vello, Nicola, Akron, Ohio. Combination tool. 1,625,064; Apr. 19.
Venon, Jules H., New York, N. Y. Goblet or similar article. Des. 72,506; Apr. 19.
Venon, Jules H., New York, N. Y. Goblet or similar article. Des. 72,507; Apr. 19.
Vernet, Sergius, Brooklyn, N. Y. Reversing mechanism. 1,625 512; Apr. 19.
Vest, Thomas F., assignor of one-half to Two Vest Sign Company, Birmingham, Ala. Signal. 1,625,693; Apr. 19.
Victor, Alexander F., Davenport, Iowa. Intermittent film feed. 1,625,065; Apr. 19.
Vierkötter, Paul, Munich, Germany. Flash-light lamp. 1,625,108; Apr. 19.
Viersen, Tiete, Ter Apel, Netherlands. Making decorative material from peat. 1,625,066; Apr. 19.
Vingheroets, Louis, Grand Rapids, Mich. Tool. 1,625,344; Apr. 19.
Viscose Company, The. (See Niederhauser, F. C., and Sunderland, assignors.)
Vogt, Frank P., and E. C. Dorn, Chicago, Ill. Automobile lock. 1,625,109; Apr. 19.
Voigt, Frank, Milwaukee, Wis. Micrometer. 1,625,175; Apr. 19.
Volkmar, Bernhard, New York, N. Y. Timer for internal-combustion engines. 1,625,001; Apr. 19.
Vortex Mfg. Co., The. (See Curtin, David F., assignor.)
Vosburgh, Edward, Passaic, N. J. Sorting machine. 1,625,438; Apr. 19.
Waechtler, Walter E., et al. (See Weinaug, E., and Macfarlane, assignors.)
Wagenseller, Charles N., assignor to A. Mueller, trustee, Decatur, Ill. Faucet. 1,625,404; Apr. 19.
Wagner, Claude E., and B. G. Hofer, Los Angeles, Calif. Marceling iron. 1,625,440; Apr. 19.
Wagner, Matthias A., Toledo, Ohio. Nursing-bottle container. 1,625,002; Apr. 19.
Walinsky, Ossip J., Sea Gate, assignor to White Luggage Co. Inc., New York, N. Y. Article of luggage. 1,625,439; Apr. 19.
Walker, Margaret W., Wyncote, Pa. Baby spoon. 1,625,003; Apr. 19.
Waller, Carl R., assignor to De Laval Steam Turbine Company, Trenton, N. J. Control for steam turbines. 1,625,004; Apr. 19.
Wallstrom, Ludwig, Lima, Peru. 1,625,381; Apr. 19.
Walter, Emil J. (See Hiering, W. C., and Walter.)
Walters, Philip N., New York, N. Y., assignor to Gaco Corporation, East Greenwich, R. I. Bathing boat. 1,625,579; Apr. 19.
Wappler Electric Co. (See Mutscheller, Arthur, assignor.)
Warmoth, George W., Indianapolis, Ind. Compensating and drainage joint for pavements. 1,625,176; Apr. 19.
Waterman, Elmer E., Remus, Mich. Safety attachment for tractors. 1,625,005; Apr. 19.
Watson Experimental Laboratory Company, The. (See Locke, Edward B., assignor.)
Watt, Ralph E. (See Williams, L. H., and Watt.)
Wattawa, John M., Manitowoc, Wis. Bait box. 1,625,006; Apr. 19.
Waugh Equipment Co. (See Waugh, James M., assignor.)
Waugh, James M., assignor to Waugh Equipment Co., Chicago, Ill. Draft-gear unit. 1,625,177; Apr. 19.
Weaver, Samuel E., Brooklyn, N. Y. Oil burner. 1,625,067; Apr. 19.
Weeber, Christian F., Albany, N. Y. Fuel system for internal-combustion engines. 1,625,007; Apr. 19.
Weeks, Wallace M., et al. (See De Wallace, Harry, assignor.)
Weeks, Wallace M., assignor of one-half to J. A. Pease, Skaneateles, N. Y. Bottle closure. 1,625,110; Apr. 19.
Wehn, Charles E., assignor to Listo Pencil Corporation, Alameda, Calif. Pencil. 1,625,513; Apr. 19.
Weinaug, Emile, and R. L. Macfarlane, assignors of one-half to J. Sifven and one-half to W. E. Waechtler, San Francisco, Calif. Universal electric testing instrument. 1,625,111; Apr. 19.
Weinfeld, Charles, et al., executors. (See Herskovitz, Max.)
Weiss, Henry, Millbrae, Calif. Water cooler. Des. 72,508; Apr. 19.

Welch, William W., Livermore, Calif. Scraper. 1,625,382; Apr. 19.
Wertheimer, Max, Chicago, Ill. Toaster. 1,625,008; Apr. 19.
Western Electric Company. (See Bohn, H. E., and Fauquier, assignors.)
Western Electric Company. (See Bollinger, Charles, assignor.)
Western Electric Company. (See Brown, Alfred B., assignor.)
Western Electric Company. (See Gauthier, Ernest, assignor.)
Western Electric Company. (See Hosford, William F., assignor.)
Western Electric Company. (See Jordan, William C., assignor.)
Western Electric Company. (See Marwin, Alfred C., assignor.)
Western Electric Company. (See Mason, Sumner R., assignor.)
Western Electric Company. (See Maurer, Oswald H., assignor.)
Western Electric Company. (See O'Neill, Henry W., assignor.)
Western Electric Company. (See Potter, William H., assignor.)
Western Electric Company. (See Sager, John W., assignor.)
Western States Machine Company, The. (See Roberts, Eugene, assignor.)
Western Union Telegraph Company, The. (See Curtain, Leo P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hodgkinson, Francis, assignor.)
Westingbouse Electric & Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Lamp Company. (See Rentschler, H. C., and Marden, assignors.)
Wheaton, Harry S., Dallas, Iowa. Automatic safety window latch. 1,625,293; Apr. 19.
Wheeler, Bradley P., Duluth, Minn. Waste-heat boiler for regenerative furnaces. 1,625,112; Apr. 19.
Wheelock, Herbert K., Akron, Ohio. Sectional air bag. 1,625,383; Apr. 19.
Wheildon, William M., assignor to E. H. Angier, Framingham, Mass. Edge folder. 1,625,178; Apr. 19.
Wheildon, William M., assignor to E. H. Angier, Framingham, Mass. Mechanism for dispensing material from rolls. 1,625,179; Apr. 19.
Whitcomb, William H. (See Chandler, Daniel L., assignor.)
White, A. R., et al. (See Bowman, Lewis N., assignor.)
Whitecotton, Wallace W. (See Shelley, Thomas W., assignor.)
Whited, Harry W., Nacogdoches, Tex. Portable electric lumber and timber grade-marking device. 1,625,009; Apr. 19.
Whitehead & Kales Company. (See Putnam, Alden L., assignor.)
White Luggage Co. Inc. (See Wallinsky, Ossip J., assignor.)
Whitesides, Walter L., Long Beach, Calif. Folding table. 1,625,294; Apr. 19.
Whitmarsh, Frederick T., Blandford, England. Cheese-cutting device. 1,625,441; Apr. 19.
Wiggenhorn, Guido J., Los Angeles, Calif. Filter. 1,625,442; Apr. 19.
Wilcolator Company, The. (See Fonseca, Edward L., assignor.)
Willett, Charles G. (See Burns, David E., assignor.)
Williams, Arthur J., assignor of one-fourth to C. J. Cameron, one-fourth to W. F. Glenn, jr., and one-fourth to I. B. Glenn, Nashville, Tenn. Rotary engine. 1,625,233; Apr. 19.
Williams Company, The. (See Robbins, William H., assignor.)
Williams, Harold E., Carthage, Mo. Foldable rack. 1,625,694; Apr. 19.
Williams, Louis H., Camas, Wash., and R. E. Watt, Ontonagon, Mich. Smelter spout. 1,625,755; Apr. 19.
Williams, Pleasant P. (See Boardman, Frank E., assignor.)
Williams, William P. (See Estes, J. H., and Williams.)
Willners, John A., Philadelphia, Pa. Fuel burner. 1,625,635; Apr. 19.
Wilson, J. G., Corporation, The. (See Dodge, Arthur H., assignor.)
Winchester Repeating Arms Co. (See Tredwell, Charles A., assignor.)
Windell, George A. (See Shields, B. F., Crombie, and Windell.)
Windt, Rudolph T., St. Louis, Mo. Gas-burner-control mechanism. 1,625,010; Apr. 19.
Winter, Courtney P. (See Rosenthal, D. A., and Winter.)
Winters, Edgar W., assignor to The Non-Spi Company, Kansas City, Mo. Mailing carton. 1,625,756; Apr. 19.
Wirz, A. H., Inc. (See Barker, Edwin H., assignor.)
Wittgenstein, Gérard F., Zurich, Switzerland. Wireless apparatus. 1,625,234; Apr. 19.
Wolfe, Arthur H., West Philadelphia, Pa., and D. A Wolfe, Grand Rapids, Mich. Article container. 1,625,011; Apr. 19.
Wolfe, Clinton L., and J. A. Fauret, New York, N. Y. Foot-actuated switch. 1,625,068; Apr. 19.
Wolfe, Durward W. (See Wolfe, Arthur H. and D. A.)
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Radiocabinet. Des. 72,504; Apr. 19.
Wonser, Jerry H., Port Angeles, Wash. Magazine lubricator. 1,625,180; Apr. 19.
Woodall, William T., and C. E. Girton, Cincinnati, Ohio; said Woodall assignor to said Girton. Device for joining or burning battery plates. 1,625,384; Apr. 19.
Woodstock Typewriter Company. (See Hokanson, Otto A., assignor.)
Woods, William H., Gable, S. C. Supporting device. 1,625,757; Apr. 19.
Worman, Albert, New York, N. Y. Aeroplane. 1,625,012; Apr. 19.
Worrell, Dwight E. (See Arras, G., and Worrell.)
Worth, Lew E. (See Shaffer, Daniel J., assignor.)
Wright, William, assignor, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Car roof. 1,625,636; Apr. 19.
Wright, William H., Pittsburgh, Pa. Jug cover. 1,625,405; Apr. 19.
Wynn, Loyal L., Florence, Colo. Mechanical toy. 1,625,758; Apr. 19.
Yancey, Samuel H., Philadelphia, Pa., assignor to S. A. L. Allen & Co., Inc. See drill. 1,625,345; Apr. 19.
Yarnall-Waring Company. (See Thompson, Charles H., asignor.)
Yarrow, Harold E., Glasgow, Scotland. Steam superheater. 1,625,759; Apr. 19.
Youngstown Sheet and Tube Company, The. (See Thomas, Thomas C., assignor.)
Zellweger, John, St. Louis, Mo. Process and apparatus for inducing germination and growth of seeds and plants. 1,625,181; Apr. 19.
Zerga, Charles, Philadelphia, Pa. Shoe shank. 1,625,346; Apr. 19.
Zifferer, Lothar R., Columbia, Pa. Expansion bolt. 1,625,013; Apr. 19.
Zimmerman, Herman E. (See Holtom, Albert O., assignor.)
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Spur-hobbing machine. 1,625,580; Apr. 19.
Zimmermann, William F., Maplewood, N. J., assignor to Gould & Eberhardt, Newark, N. J. Fixed-angle helical-gear hobber. 1,625,581; Apr. 19.
Zink, Clyde M. (See Park, William B., assignor.)
Zublin, John A., Los Angeles, Calif. Reciprocating pump. 1,625,182; Apr. 19.
Zubrow, Simon, Philadelphia, Pa. Badge or like article. Des. 72,509; Apr. 19.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 19TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acids and other aliphatic acids, Manufacture of butyric. L. Le France. 1,625,732; Apr. 19.
Acoustic horn. J. Macartney and A. V. Hahn. 1,625,325; Apr. 19.
Adding machines, Automatic shuttle-control mechanism for. B. H. Tingley. 1,625,291; Apr. 19.
Addressing machines, Selective attachment for. E. A. Geiger, A. F. Schraegle, and H. T. Jennings. 1,625,358; Apr. 19.
Advertising device. G. Forde. 1,625,305; Apr. 19.
Advertising portfolio. L. Stein. 1,625,228; Apr. 19.
Aeroplane. A. Worman. 1,625,012; Apr. 19.
Aeroplane launching and landing apparatus. F. G. Diago. 1,625,020; Apr. 19.
Aeroplanes and other vehicles and its manufacture, Cooling radiator for. A. Lambiln. 1,625,665; Apr. 19.
Agricultural implements, Electric traction system for. F. Remy. 1,625,744; Apr. 19.
Air bag, Sectional. H. K. Wheelock. 1,625,383; Apr. 19.
Aircraft. F. Gaddis. 1,625,646; Apr. 19.
Aircraft, Control system for. J. H. Hammond, jr. 1,625,252; Apr. 19.
Air engine. J. M. Dapron. 1,625,457; Apr. 19.
Airplane and other aircraft body. A. Black. 1,625,701; Apr. 19.
Airplane body, Freight. A. Black. 1,625,700; Apr. 19.
Airplane wing construction. B. D. Thomas. 1,625,634; Apr. 19.
Airship and making the same buoyant. F. G. Birchard. 1,624,917; Apr. 19.
Album, Photographic. F. Huszto-Horvath. 1,625,724; Apr. 19.
Algin compounds and products produced derived therefrom, Producing. B. F. Erdahl. 1,625,301; Apr. 19.
Ambulatory repeating system. R. W. Morris. 1,624,966; Apr. 19.
Animal trap. T. W. Hulse. 1,625,027; Apr. 19.
Ash-handle equipment. O. S. Bowman. 1,624,909; Apr. 19.
Ash tray and lamp cap, Combination. L. Baskin and M. Sternberg. Des. 72,468; Apr. 19.
Astronomic navigation, Method and device for rapidly solving ordinary problems of. W. A. Loth. 1,625,369; Apr. 19.
Atomizing cleaner. W. J. Rudolph. 1,625,098; Apr. 19.
Automobile engine. S. I. Fekete and S. G. Balts. 1,625,718; Apr. 19.
Automobile lock. M. Farah. 1,625,249; Apr. 19.
Automobile lock. F. P. Vogt and E. C. Dorn. 1,625,109; Apr. 19.
Automobile radiator casing. A. O. Holtom. Des. 72,479; Apr. 19.
Automobiles, Cushion device for. J. A. O'Neill. 1,625,146; Apr. 19.
Automobiles, Lock for spare wheels of. F. W. Henke, jr. 1,625,657; Apr. 19.
Automobiles, Signaling and direction-indicating apparatus for. A. Rosenberg and W. Ollinger. 1,625,565; Apr. 19.
Awning fabric and making the same, Ornamental. A. Swanfeldt. 1,625,690; Apr. 19.
Badge or like article. S. Zubrow. Des. 72,509; Apr. 19.
Bag: *See*—
  Air bag. Hot-water bag.
Bag holder. C. C. Ludy. 1,625,480; Apr. 19.
Bailer dump. S. A. Rutner. 1,625,686; Apr. 19.
Bailer top, Swivel. F. J. Hinderliter. 1,624,948; Apr. 19.
Bait box. J. M. Wattawa. 1,625,006; Apr. 19.
Baking pan. H. B. Cramer. 1,625,525; Apr. 19.
Balancing machine. G. T. Johnson. 1,625,259; Apr 19.
Banjo. A. J. Bouchard. 1,625,887; Apr. 19.
Bars, Machine for cutting or severing metallic. F. Schiess. 1,625,748; Apr. 19.
Barrette. W. T. Battle. 1,625,587; Apr. 19.
Baseball game. H. C. Franke and R. C. Bangs. 1,625,200; Apr. 19.
Baskets, Backing for centrifugal. E. Roberts. 1,625,377; Apr. 19.
Baskets, Screen for centrifugal. E. Roberts. 1,625,376; Apr. 19.
Battery plates, Device for joining or burning. W. T. Woodall and C. E. Girton. 1,625,384; Apr. 19.
Bearing. W. J. Shaw. 1,625,568; Apr. 19.
Bed. J. L. Moore. 1,624,965; Apr. 19.
Bed, Adjustable sick. W. B. Gardiner. 1,625,534; Apr. 19.
Bed, Automobile. W. R. Bailey. 1,625,515; Apr. 19.
Bed, Collapsible camp. M. M. Larsen. 1,625,476; Apr. 19.
Belt and method and apparatus for forming the same, Round fabric. W. W. Bewsick. 1,625,348; Apr. 19.
Belting and its manufacture, Round fabric. A. H. De Voe. 1,624,932; Apr 19.
Belting, Link. H. A. House. 1,625,609; Apr. 19.
Beverages, Preparation of nonfermented. F. Hostettler. 1,625,542; Apr. 19.
Bill fold or similar article. L. Mayer. Des. 72,486; Apr. 19.
Billiard compass. J. A. Kaye. 1,625,770; Apr. 19.
Binder, Loose-leaf. H. B. McBee. 1,624,961; Apr. 19.
Binder, Loose-leaf. H. C. Sterling. 1,625,752; Apr 19.
Birdcage. L. J. Leon. Des. 72,482; Apr. 19.
Bit: *See*—
  Drill bit.
Blinds, Offsetting support for Venetian. A. H. Dodge. 1,625,021; Apr. 19.
Block: *See*—
  Take-up block.
Boat, Aluminum. F. L. and J. Friet. 1,625,598; Apr. 19.
Boat, Bathing. P. N. Walters. 1,625,579; Apr. 19.
Boat-retaining and releasing device. G. Menefee. 1,625,736; Apr. 19.
Bobbin-winding machine. L. E. Topham. 1,625,232; Apr. 19.
Boiler: *See*—
  Steam boiler.
Boiler, M. Morley. 1,625,046; Apr. 19.
Boilers, Blow-off device for steam. E. Caldwell. 1,625,707; Apr. 19.
Boilers, Sediment trap for. F. Conrad. 1,625,709; Apr. 19.
Bolt, Expansion. L. R. Zifferer. 1,625,013; Apr. 19.
Bombing attacks, System for carrying out mimic. A. W. Parsons. 1,625,678; Apr. 19.
Book, Double-entry and trial balance. F. H. Sterling. 1,625,105; Apr. 19.
Bottle. M. A. Klein. 1,625,728; Apr. 19.
Bottle. C. T. Long and A. C. Sohn. Des. 72,483; Apr. 19.
Bottle. A. B. Taylor and C. T. Long. Des. 72,503; Apr. 19.
Bottle closure. H. De Wallace. 1,625,594; Apr. 19.
Bottle closure. C. D. Lukens. 1,625,617; Apr. 19.
Bottle closure. W. M. Weeks. 1,625,110; Apr. 19.
Bottle container, Nursing. M. A. Wagner. 1,625,002; Apr. 19.
Bottles, Container for milk. J. E. Abbott. 1,625,183; Apr. 19.
Bowling alleys, Kick back for. F. Gessert. 1,625,599; Apr. 19.
Bowling-game apparatus. C. H. Panjeau. 1,625,676; Apr. 19.
Box: *See*—
  Bait box. Miter box.
  Candy box.
Box closer. J. E. Knopp. 1,625,033; Apr. 19.
Box wrappers, Assembling, tabbing, and applying composite. J. S. Stokes. 1,625,577; Apr. 19.
Brace and drill, Combination. C. W. Beamer. 1,625,517; Apr. 19.
Bracelet hook. L. E. Valcourt. 1,625,063; Apr. 19.
Bracelet, Watch. M. H. Sabin. Des. 72,496; Apr. 19.
Bracket: *See*—
  Hook bracket.
Brake: *See*—
  Hydraulic brake. V-section bandless brake.
Brake. M. F. Anderson and T. F. Clark. 1,625,584; Apr. 19.
Brake and jack, Automobile. C. Simmons. 1,625,226; Apr. 19.
Brake device. H. W. Jonkhoff. 1,625 727; Apr. 19.
Brake mechanism. W. J. Andres. 1,625,444; Apr. 19.
Brake mechanism. P. B. Camp. 1,624,924; Apr. 19.
Brake mechanism. F. W. Piché. 1,625,150; Apr. 19.
Brake mechanism, Slack adjuster for. W. S. Adams. 1,625,695; Apr. 19.
Brake shafts, Supporting means for drop. W. B. Hall. 1,625,206; Apr. 19.
Breaker arms, Making. J. C. Baker. 1,625,697; Apr. 19.
Breathing apparatus. G. S. McCaa. 1,625,419; Apr. 19.
Brushing and polishing machine. W. D. Lee. 1,625,667; Apr. 19.

Buckle and purse, Combined. B. H. Marcus. 1,625,040; Apr. 19.
Buckle, Belt. L. S. Chilson. 1,625,388; Apr. 19.
Buckle, Harness. J. W. Cronan. 1,625,389; Apr. 19.
Buildings, Device for use in moving. J. J. Roos. 1,625,161; Apr. 19.
Burner: *See*—
Cactus burner. Oil burner.
Fuel burner. Stove burner.
Hydrocarbon burner.
Burner. L. Wallstrom. 1,625,381; Apr. 19.
Burning-in machine. L. Lorenz. 1,625,037; Apr. 19.
Bushing, Automatic rotary spider. F. Hertzberg. 1,625,540; Apr. 19.
Cabinet, Toothbrush. R. H. Gindick. 1,625,202; Apr. 19.
Cable and trolley clamp. L. Johnston. 1,625,366; Apr. 19.
Cable hook. J. P. Ratigan. 1,625,155; Apr. 19.
Cable reel. C. O. Schooley. 1,625,503; Apr. 19.
Cactus burner. J. B. Blackwell. 1,625,702; Apr. 19.
Cake pan. N. R. Fulkerson. 1,624,941; Apr. 19.
Calipers, Micrometer. R. J. O. Simpson. 1,625,767; Apr. 19.
Call-distributing system. W. T. Powell. 1,625,624; Apr. 19.
Cameras, Plate carrier for multicolor. G. Lundberg. 1,624,959; Apr. 19.
Can body and forming the side seam thereof. C. Stollberg. 1,625,229; Apr. 19.
Can-body-making machine. J. F. Peters. 1,625,091; Apr. 19.
Can caps or the like, Separating device for. N. Loesel. 1,625,262; Apr. 19.
Can cleaning and drying apparatus. J. O'Connell and H. H. Kerr. 1,625,493; Apr. 19.
Can cover, Ventilated milk-. W. N. Snow. 1,625,287; Apr. 19.
Cans, Apparatus for washing ice-cream. C. G. Davis. 1,625,300; Apr. 19.
Candy box. J. M. Cooper. 1,625,102; Apr. 19.
Canopy holder. V. P. Nelson. 1,625,673; Apr. 19.
Cap, Boudoir. M. L. Peters. Des. 72,494; Apr. 19.
Cap spinning frame. R. Burgess. 1,625,320; Apr. 19.
Car-control mechanism, Dump-. W. E. Morey. 1,625,089; Apr. 19.
Car, Passenger. H. Albin. 1,625,443; Apr. 19.
Car roof. W. Wright. 1,625,636; Apr. 19.
Car-wheel clamp. E. and O. B. Mullins. 1,625,136; Apr. 19.
Carburetor. F. H. Barger. 1,625,516; Apr. 19.
Carburetor. E. A. Nelson. 1,625,141; Apr. 19.
Carburetor. W. T. Simpson. 1,625,572–4; Apr. 19.
Carburetor and fuel feeding system therefor. W. T. Simpson. 1,625,575; Apr. 19.
Carton, Display. J. J. Ryan and J. Gaffney. 1,625,687; Apr. 19.
Carton-feeding machine. J. M. and J. Schnur, F. Kesselring, and S. Jonischk. 1,625,057; Apr. 19.
Carton, Mailing. E. W. Winters. 1,625,756; Apr. 19.
Case: *See*—
Compact case. Vanity case.
Slug case. Violin case.
Casing cover and tool holder. F. W. Sadler. 1,625,774; Apr. 19.
Caster centering and retaining device. R. S. Kirkpatrick. 1,625,213; Apr. 19.
Casting table. H. R. Schutz. 1,625,164; Apr. 19.
Cathode and preparing the same, Electron-emitting. F. Holborn. 1,625,776; Apr. 19.
Cementitious material, Apparatus for molding. J. P. McKnight. 1,625,486; Apr. 19.
Centrifugal machine. L. D. Jones and A. U. Ayres. 1,625,613; Apr. 19.
Chain tightener and fastener, Automobile. G. Nichols. 1,624,967; Apr. 19.
Chair. M. Antrobus. Des. 72,464; Apr. 19.
Check-controlled lock. M. H. Richardson and A. E. Gebert. 1,624,980; Apr. 19.
Cheese, Apparatus for pressing. J. R. Meyers. 1,625,129; Apr. 19.
Cheese-cutting device. F. T. Whitmarsh. 1,625,441; Apr. 19.
Cheese in metal bandages, Making, curing, and shipping. J. R. Meyers. 1,625,130; Apr. 19.
Chopper: *See*—
Cotton chopper.

Tool, Combination. N. Vello. 1,625,064; Apr. 19.
Tool for cutting and removing pipe from wells. G. Kammerer. 1,625,414; Apr. 19.
Tool for cutting and removing pipe from wells. J. B. Reilly and C. H. Stone. 1,625,391–2; Apr. 19.
Tool for cutting pipe in wells. J. B. Reilly and C. H. Stone. 1,625,393; Apr. 19.
Toothbrush. F. L. Gullickson. 1,625,537; Apr. 19.
Torch, Aseptic lighting. W. Geulen. 1,625,356; Apr. 19.
Torch, Welding. R. D. McIntosh. 1,625,128; Apr. 19.
Toy. W. H. Sherrod. 1,624,986; Apr. 19.
Toy, Aeronautic. L. H. Strayer. 1,625,167; Apr. 19.
Toy, Figure projecting. A. Robinson. 1,625,430; Apr. 19.
Toy, Goat and darkie. W. D. Bludworth. Des. 72,470; Apr. 19.
Toy, Mechanical. L. L. Wynn. 1,625,758; Apr. 19.
Toy, Mechanically-operated. L. Marx. 1,625,326; Apr. 19.
Toy, Wheeled. J. A. Sauser. Des. 72,497; Apr. 19.
Tractors, Safety attachment for. E. E. Waterman. 1,625,005; Apr. 19.
Trailer. J. F. Higbee. 1,625,209; Apr. 19.
Train-pipe coupler. R. T. Lowe. 1,625,370; Apr. 19.
Transmission cover for Fords. R. A. Linquist. 1,625,555; Apr. 19.
Transmission mechanism. E. B. Oliver. 1,624,968; Apr. 19.
Trap: *See*—
Animal trap. Hammer-blow steam trap.
Drain trap.
Trap. H. J. Corson. 1,625,710; Apr. 19.
Tray for relish or the like, Service. W. L. Orme. Des. 72,491; Apr. 19.
Tray, Watch-crystal. T. Tobita. 1,625,754; Apr. 19.
Trick device, Escape. T. P. Brunner. 1,625,452; Apr. 19.
Tricycle. H. C. Hennie. 1,624,915; Apr. 19.
Tricycle. T. W. Shelley. 1,625,337; Apr. 19.
Trimming articles. W. H. Potter. 1,625,332; Apr. 19.
Trousers supporter. H. M. Siegel. 1,625,166; Apr. 19.
Trucks, Hoisting mechanism for dump. J. E. Reid and C. L. Nein. 1,624,977–8; Apr. 19.
Trunk hasp. S. P. Durkins. 1,625,351; Apr. 19.
Tub. B. H. Darrow. Re16,597; Apr. 19.
Tubs, Washing attachment for. T. R. Frattallone. 1,625,306; Apr. 19.
Tube: *See*—
Pneumatic tube.
Tube boiler, Vertical fire-. O. S. Bowman. 1,624,908; Apr. 19.
Tube ironing and gripping device. R. J. Jauch. 1,625,471; Apr. 19.
Tubes, Mold and method for constructing continuous. B. C. Seaton. 1,625,284; Apr. 19.
Turbine-blade shrouding. H. F. Schmidt. 1,625,433; Apr. 19.
Turbine, Elastic-fluid. F. Hodgkinson. 1,625,541; Apr. 19.
Turbine, Elastic-fluid. F. Lösel. 1,625,263; Apr. 19.

Turbines, Control for steam. C. R. Waller. 1,625,004; Apr. 19.
Turnstile apparatus, Coin-controlled and change-making. D. L. Chandler. 1,625,242; Apr. 19.
Turpentine, Manufacture of a substitute for. L. L. Odom. 1,625,622; Apr. 19.
Typewriting machine. A. G. F. Kurowski. 1,625,321; Apr. 19.
Typewriting machine. H. L. Pitman. 1,625,331; Apr. 19.
Typewriting machine. J. A. B. Smith. 1,625,338; Apr. 19.
Typographical composing machine. C. A. Albrecht. 1,625,606; Apr. 19.
Uncoupling device. A. F. O'Connor. 1,625,143; Apr. 19.
Underreamer, Rotary. M. C. Hazard. 1,625,208; Apr. 19.
Vacuum cleaner. F. J. Oslus. 1,624,969; Apr. 19.
Valve. L. H. Kennon and L. J. Langdon. 1,625,367; Apr 19.
Valve, Automatic gas. C. M. Lee. 1,625,323; Apr. 19.
Valve, Combined speed-regulating and mixing. A. E. and P. E. Raqué. 1,625,281; Apr. 19.
Valve for refrigerating apparatus. M. H. Loughridge. 1,625,324; Apr. 19.
Valve, Grease-cup. A. B. Fairchild. 1,625,717; Apr. 19.
Valve structure. G. W. Spangler. 1,625,689; Apr. 19.
Valve structure, Rotary. P. G. Frazier. 1,625,307; Apr. 19.
Valves, faucets, and the like, Silencer or flow regulator for. R. E. Bletcher and E. H. Bucknell. 1,625,589; Apr. 19.
Valves, Packing for gate. W. H. Barton. 1,625,698; Apr. 19.
Vanity case. J. S. Corry. 1,625,455; Apr. 19.
Vaporizer. N. Lawner. 1,625,034; Apr. 19.
Vehicle bumper. F. J. Laher. 1,625,550; Apr. 19.
Vehicle, Dump-body. C. E. Packard. 1,625,496; Apr. 19.
Vehicle signal. E. R. Linehan. 1,625,733; Apr. 19.
Vehicle spring hanger. W. R. Gardner. 1,625,023; Apr. 19.
Vehicles, Axle connection for. L. B. Neighbour. 1,625,139; Apr. 19.
Vehicles, Brake for. N. Kuchen. 1,625,777; Apr. 19.
Vehicles, Brake mechanism for. F. W. Piché. 1,625,151; Apr. 19.
Vehicles, Method of and device for preventing the skidding of self-propelled road. I. L. Rosenthal. 1,625,746; Apr. 19.
Vehicles, Sanding device for power. E. Hesc. 1,625,362; Apr. 19.
Vehicles, Traction device for motor. C. H. Hyatt. 1,625,028; Apr. 19.
Vehicles, Turning signal for road. A. Roberts. 1,624,981; Apr. 19.
Velocipede. P. Kuhnel. 1,625,214; Apr. 19.
Vending machine, Coin-controlled. C. Nadworney. 1,625,138; Apr. 19.
Ventilator. J. H. Bourgon. 1,624,907; Apr. 19.
Violin case. T. H. Stark. 1,624,994; Apr. 19.
Vises to posts, poles, or the like, Apparatus for securing. J. E. Kenerson. 1,625,319; Apr. 19.
V-section bandless brake. F. W. Smith. 1,625,103; Apr. 19.
Waffle iron, Quick-action. L. Cortz. 1,625,243; Apr. 19.
Wall shield, Radiator. H. G. Sweitzer. 1,624,997; Apr. 19.
Warp-drawing machine. H. D. Colman. 1,624,928; Apr. 19.
Washing machine. H. W. Routson. 1,625,096; Apr. 19.
Watch movements provided with jewel-insetting or plug holes, Manufacturing process of making blanks for. H. Colomb. Re16,596; Apr. 19.
Watch, Stem-winding and stem-setting. W. E. Porter. 1,625,498; Apr. 19.
Water cooler. H. Weiss. Des. 72,508; Apr. 19.
Water heater. D. J. Shaffer. 1,625,286; Apr. 19.
Water softener, Automatic C. P. Eisenhauer. 1,625,198; Apr. 19.
Water-softening apparatus. C. P. Eisenhauer. 1,625,197; Apr. 19.
Wave motor. H. L. Booth. 1,625,519; Apr. 19.
Waves, Receiving system for compressional. H. G. Dorsey. 1,625,245; Apr. 19.
Weather stripping. M. E. Bosley. 1,625,764; Apr. 19.
Weed and grass cutter. P. J. Haas. 1,625,081; Apr. 19.
Weeds, Composition for killing certain. R. T. Holmes. 1,625,608; Apr. 19.
Weeder. J. A. Talbot. 1,625,168–9; Apr. 19.
Weight and buffer, Combined whip. C. W. Lewis. 1,625,552; Apr. 19.
Well points, Making. T. C. Thomas. 1,625,340; Apr. 19.
Well-testing tool. C. T. Neitzel. 1,625,140; Apr. 19.
Wheel: *See*—
Gyral wheel.
Spring wheel.
Wheel-cleaning device. D. C. Mulvihill. 1,625,137; Apr. 19.
Wheel-shaping device operating by rolling movements, Bevel-. M. Harbeck. 1,625,722; Apr. 19.
Wheels, Alignment device for automobile. W. S. Rosenfeld. 1,625,431; Apr. 19.
Whipstock. F. I. Getty. 1,625,600; Apr. 19.
Winding mechanism. J. W. Sager. 1,625,432; Apr. 19.
Window. A. A. Jahr. 1,625,611; Apr. 19.
Window construction. J. and B. T. Mesker. 1,625,220; Apr. 19.
Window draperies, Valance for. F. W. Oehrle. 1,625,329; Apr. 19.
Window-hanging device. H. B. Stein. 1,625,289; Apr. 19.
Window platform. J. F. Peckenpaugh. 1,625,423; Apr. 19.
Window regulator. T. P. Archer and E. E. Heintz. 1,625,186; Apr. 19.
Window retainer. J. Cantori. 1,625,295; Apr. 19.
Windshield J. Bauer. 1,624,906; Apr. 19.
Wire cutter and making it, Pile-. M. B. Behrman. 1,625,072; Apr. 19.
Wire in definite lengths, Machine for deforming. W. F. Frech. 1,624,940; Apr. 19.
Wire-working machine. S. C. Cary. 1,624,925; Apr. 19.
Wireless apparatus. G. F. Wittgenstein. 1,625,234; Apr. 19.
Wood preservative. L. P. Curtin. 1,624,930; Apr. 19.
Wooden container. J. H. Proctor. 1,625,280; Apr. 19.
Workholder. B. Fodge. 1,625,251; Apr. 19.
Woven fabric. E. Meyer. Des. 72,487; Apr. 19.
Wrench. L. T. Broyles. 1,624,922; Apr. 19.
Wrench. R. L. McNerney. 1,625,559; Apr. 19.
Wringer attachment. F. B. Schuyler. 1,625,101; Apr. 19.
X-ray machine, Convertible. A. Mutscheller. 1,625,328; Apr. 19.
X-ray tubes, Target for. H. C. Rentschler and J. W. Marden. 1,625,426–7; Apr. 19.
Yarn cleaner. H. E. Van Ness. 1,625,692; Apr. 19.
Yeast and the product thereof, Treating and preparing. F. M. Hildebrandt. 1,625,121; Apr. 19.

CLASSIFICATION OF PATENTS

ISSUED APRIL 19, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 6: 1,624,958
2— 30: 1,625,664
75: 1,625,184
97: 1,625,355
169: 1,625,368
176: 1,625,670
3— 12: 1,625,317
4— 44: 1,625,311
173: R. 16,597
5— 12: 1,625,437
64: 1,625,534
114: 1,624,965
118: 1,625,515
119: 1,625,476
178: 1,624,950
8— 21: 1,625,458
9— 6: 1,625,598
21: 1,625,579
21.5: 1,625,730
23: 1,625,736
12— 37: 1,625,527
139: 1,625,588
15— 8: 1,624,969
21: 1,625,137
49: 1,625,607
50: 1,625,147
133: 1,625,174
176: 1,625,537
250: 1,624,906
16— 39: 1,625,213
52: 1,624,910
86: 1,624,960
119: 1,625,322
182: 1,624,919
196: 1,625,289
210: R. 16,594
212: 1,625,640
18— 1: 1,625,466
1,625,522

Coffee, Roasted and ground. Southern Coffee Mills, Limited. 241,007; Apr. 26.
Coffee, tea, and spices, etc. Wm. Grossman Co. 225,303; Apr. 26.
Cooky cakes. Independent Baking Co. 245,843; Apr. 26.
Crackers and candy. Pacific Coast Biscuit Co. 243,559; Apr. 26.
Eggs. Palmdale Fruit & Egg Farm. 244,316; Apr. 26.
Figs, Dried. R. H. Selby. 238,287; Apr. 26.
Flour, Rye. Washburn Crosby Company. 244,584; Apr. 26.
Flour, stock and poultry feeds, Wheat. Coles Company. 228,975; Apr. 26.
Flour, Wheat. Loudonville Milling Company. 246,569; Apr. 26.
Flour, Wheat. Minneapolis Milling Company. 242,018; Apr. 26.
Flour, Wheat. Washburn Crosby Company. 244,840; Apr. 26.
Flour, Wheat. Washburn Crosby Company. 245,767; Apr. 26.
Foods, Animal and poultry. Wm. Schluderberg-T. J. Kurdle Co. 239,680; Apr. 26.
Fruits and fresh grapes, Fresh citrous. F. S. Eckel. 228,600; Apr. 26.
Fruits and grapes, Fresh citrous. F. S. Eckel. 228,231; Apr. 26.
Fruits and vegetables, Fresh. Standard Growers Exchange. 211,717; Apr. 26.
Fruits, Dried. R. H. Selby. 238,288; Apr. 26.
Fruits, Fresh deciduous. Trunkey-Wolfe Co. 243,897; Apr. 26.
Fruits, fresh deciduous fruits, vegetables, melons, and grapes, Fresh citrous. Sierra Madre Fruit Co. 244,791; Apr. 26.
Gelatin dessert preparation. Paxton & Gallagher Co. 244,717; Apr. 26.
Grapes, Fresh. G. Zaninovich. 234,810; Apr. 26.
Gum, Chewing. American Chicle Company. 243,408; Apr. 26.
Ice cream. Eskimo Pie Corporation. 245,143; Apr. 26.
Ice-cream cones. L. Harlow. 237,412; Apr. 26.
Ice-cream confection. Reid Ice Cream Corporation. 243,456; Apr. 26.
Mayonnaise salad dressing, mustard, etc. Capital Food Products Company. 219,418; Apr. 26.
Olives, preserved fruits, and capers, Bottled. La Manna, Azema & Farnan. 245,354; Apr. 26.
Oranges, lemons, and grapefruit. La Verne Orange Association. 243,374; Apr. 26.
Oranges, lemons, and grapefruit. La Verne Orange Association. 243,377; Apr. 26.
Oranges, lemons, and grapefruit. Lemon Grove Fruit Growers Association. 237,672; Apr. 26.
Products, Farm, orchard, or milk. M. H. Moody. 226,012 Apr. 26.
Salad oil. M. Heller. 244,933; Apr. 26.
Tomato sauce, macaroni, and olive oil. Cellas', Inc. 242,816; Apr. 26.
Tomatoes. H. M. Batezel. 244,421; Apr. 26.

CLASS 48.

Malt sirup, Barley. D. L. Rosenfeld. 245,297; Apr. 26.
Malt sirup for food purposes. P. Ballantine and Sons. 245,321; Apr. 26.
Malt sirup for food purposes. Southwark Food Products Co. 241,969; Apr. 26.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 26TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbe, George C., assignor to American Road Machinery Company, Inc., Kennett Square, Pa. Differential lock for tractors. 1,626,374; Apr. 26.

Acme Knitting Machine & Needle Company. (See Murphy, G., and Simond, assignors.)

Adams, John B., assignor to B. Egley, Wellington, New Zealand. Life belt. 1,625,971; Apr. 26.

Akers, Ernest, C. C. Mims, F. L. Moutray, and L. P. Miller, Huntsville, Tex. Oil-saving device. 1,626,494; Apr. 26.

Aktiebolaget Karlstads Mekaniska Verkstad. (See Ullgren, Johan D., assignor.)

Aldendorff, Fritz, Berlin-Wilmersdorf, Germany, assignor of one-fourth to P. Kolisch, New York, N. Y. Electromechanically-controlled telephone system. 1,625,779; Apr. 26.

Alexanderson, Charles A., assignor to E. W. Durkee, New York, N. Y. Apparatus for filling cans or other receptacles. 1,626,375; Apr. 26.

Alfieres, Emanuel J., New York, N. Y. Separable vault-light lens frame. 1,626,063; Apr. 26.

Allmanna Svenska Elektriska Aktiebolaget. (See Stenkvist, Emil, assignor.)

Alms, John A., Joplin, Mo. Mail box. 1,626,320; Apr. 26.

Altorfer, Alpheus W., Peoria, assignor to Altorfer Bros. Company, East Peoria, Ill. Washing machine. 1,626,064; Apr. 26.

Altorfer Bros. Company. (See Altorfer, Alpheus W., assignor.)

American Casting and Manufacturing Corporation. (See Dietze, Emil, assignor.)

American Electric Motor Company. (See Daun, C. L., and Keller, assignors.)

American Gas Machine Company. (See Hanson, Hans C., assignor.)

American Machine and Foundry Company. (See Armstrong, Harry Y., assignor.)

American Machine & Foundry Company. (See Bronander, Wilhelm B., assignor.)

American Machine & Foundry Company. (See Gwinn, George W., assignor.)

American Machine and Foundry Company. (See Schmitt, Frank R., assignor.)

American Road Machinery Company. (See Abbe, George C., assignor.)

American Telephone and Telegraph Company. (See Klein, Charles H., assignor.)

American Telephone and Telegraph Company. (See Potter, Ralph K., assignor.)

American Type Founders Company. (See Plum, Stephen H., 2d, assignor.)

Amusement Engineering Corporation of California. (See Wood, E. K., and Metzger, assignors.)

Anaconda Sales Company. (See Gillis, Julius H., assignor.)

Andersen, Johan M., assignor to Albert & J. M. Anderson Manufacturing Company, Boston, Mass. Time switch. 1,626,262; Apr. 26.

Anderson, Albert & J. M., Manufacturing Company. (See Andersen, Johan M., assignor.)

Anderson, Arvid E., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing-circuit-breaker system. 1,626,495; Apr. 26.

Anderson, Ernst G. K., assignor, by mesne assignments, to Appleton Electric Co., Chicago, Ill. Rewinding reel. 1,626,376; Apr. 26.

Anderson, Harry T. (See Hansson, Soren, assignor.)

Anderson, John C. A., Wilmette, assignor to Reliance Elevator Co., Chicago, Ill. Elevator-control system. 1,626,377; Apr. 26.

Anderson, R. C. (See Fontaine, Robert A., assignor.)

Andrew, Frederick W., Andalusia, Pa., and M. Tibbetts, Detroit, Mich., assignors to Packard Motor Car Company, Detroit, Mich. Lock mechanism. 1,626,065; Apr. 26.

Anfenger, Maximilian B., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Storage system for and storing and removing from storage a liquid. 1,626,066; Apr. 26.

Anthony, Marcus O., New York, N. Y., assignor to Continental Engineering Corporation, Omaha, Nebr. Valve-rotating mechanism. 1,626,067; Apr. 26.

Appleton Electric Co. (See Anderson, Ernst G. K., assignor.)

Archipenko, Alexander, New York, N. Y. Apparatus for displaying changeable pictures. 1,626,496; Apr. 26.

Archipenko, Alexander, New York, N. Y. Decorating changeable display apparatus. 1,626,497; Apr. 26.

Arkell Safety Bag Company. (See Goodlett, Nicholas M., assignor.)

Armitage, Joseph. (See Kearney, E. J., and Armitage.)

Armstrong, Harry Y., Syracuse, N. Y., assignor, by mesne assignments, of one-half to American Machine and Foundry Company. Wrapping machine. 1,626,378; Apr. 26.

Armstrong, Harry Y., Syracuse, N. Y., assignor, by mesne assignments, of one-half to American Machine and Foundry Company. Wrapping machine. 1,626,379; Apr. 26.

Arnold, Roy J. (See Smith, R. E., Arnold, and Gay.)

Art Metal Construction Company. (See Lombard, Homer W., assignor.)

Astoria Importing and Manufacturing Co. Inc. (See Straub, Christopher, assignor.)

Åström, Peter E., Gottenborg, Sweden. Cleaning device. 1,625,930; Apr. 26.

Atkins and Company. (See Atkins, Charles H., assignor.)

Atkins, Charles H., assignor to Atkins and Company, Inc., Palmer, Mass. Differential pressure valve. 1,625,780; Apr. 26.

Attwood, Charles E., Wollaston, Mass., assignor to Post-Index Company, Inc., Boston, Mass. Filing and indexing equipment. 1,626,442; Apr. 26.

Atwell, Harold V., assignor to Standard Oil Company, Whiting, Ind. Seal. 1,626,443; Apr. 26.

Atwood, Francis L., Anderson, Ind. Plug gauge. 1,626,176; Apr. 26.

Austin, Herbert, Bromsgrove, England. Window for motor vehicles. 1,626,129; Apr. 26.

Automatic Bottle Machine Corporation, The. (See McNish, Alexander, assignor.)

Automatic Electric Inc. (See Gardner, John E., assignor.)

Automatic Electric Inc. (See Simmons, George H., assignor.)

Automotive Valves Co., The. (See Burtnett, Everett R., assignor.)

Autopoint Company. (See Keeran, Charles R., assignor.)

Avery, U Sherman, Union Hill, and A. K. Trout, Bradley Beach, N. J., assignors to Waverly Novelty Co., Inc., New York, N. Y. Tuning peg for stringed instruments. 1,626,380; Apr. 26.

Avondoglio, Giuseppe. (See Ganio, O., Avondoglio, and Grassis.)

Ayres, Frank W., Colby, Kans. Chassis. 1,625,972; Apr. 26.

Babb, Joseph E. (See Willock, H. H., Caplan, and Babb.)

Bachman, Charles L., et al. (See Wotruba, Charles, assignor.)

Badger Tool & Mfg. Co. (See Tanguay, Arthur G., assignor.)

Bagley, James, assignor, by mesne assignments, to A. L. Preiffer, Bedford, Mass. Pile wire. 1,625,783; Apr. 26.

Bailey, Claude B., W. W. McCord, and C. Wilkins, Wyandotte, assignor, by mesne assignments, to McCord Radiator & Mfg. Co., Detroit, Mich. Gasket. 1,626,110; Apr. 26.

Bailey, Percy S., Marblehead, Mass., assignor to General Electric Company. Reflector. 1,626,438; Apr. 26.

Baker-Rauling Company, The. (See Remde, Edward H., assignor.)

Ball, Edmund B. (See Hurst, J. E., and Ball.)

Banika, William, Stamford, Ontario, Canada. Circuit closer. 1,625,973; Apr. 26.

Banting Manufacturing Company, The. (See Lundquist, Herman A., assignor.)

Barker, Reuben F., Portland, Oreg. Fluid-cooled rotary valve for internal-combustion engines. 1,626,111; Apr. 26.

Barksdale, Irving S., Greenville, S. C. Preparation of cucurbocitrin. 1,626,321; Apr. 26.

Barnes, Eugene L., Watertown, N. Y. Refrigerating apparatus. 1,625,878; Apr. 26.

Barnes, Walter D., Lancaster, Pa. Attachment for printing presses. 1,626,444; Apr. 26.

Barney, Edwin E., New Rochelle, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,625,974; Apr. 26.

Barth, Erich, New York, N. Y. Plumb bob. 1,626,130; Apr. 26.

Bartlett, Harold W., Alvarado, Calif. Apparatus for harvesting fruit. 1,626,068; Apr. 26.

Bass, E & J, Incorporated. (See Negbaur, Harry, assignor.)

Bates, Adelmer M., and A. Krasa, assignors to Bates Valve Bag Company, Chicago, Ill. Sewing, severing, and seam reenforcing machine. 1,625,781; Apr. 26.
Bates, Adelmer M., and J. E. Dancker, assignors to Bates Valve Bag Company, Chicago, Ill. Bag-sewing machine. 1,625,782; Apr. 26.
Bates Valve Bag Company. (See Bates, A. M., and Dancker, assignors.)
Bates Valve Bag Company. (See Bates, A. M., and Krasa, assignors.)
Batts, Walter H., Grand Rapids, Mich. Shipping box for clothing. 1,626,381; Apr. 26.
Baumgarten-Crusius, Carl A., Dresden, Germany. Obtaining a culture mixture for fertilizer production. 1,626,579; Apr. 26.
Bausch and Lomb Optical Company. (See Stevens, Frederick A., assignor.)
Baxter, Bert, assignor to Baxter & Company, Welch, W. Va. Radiator casing or cover. 1,625,931; Apr. 26.
Baxter & Company. (See Baxter, Bert, assignor.)
Bazewick, Walter F., Binghamton, N. Y. Mop wringer. 1,626,445; Apr. 26.
Beall, Frank F., et al., trustees. (See Ramage, Alexander S., assignor.)
Bean, William L., West Haven, Conn. Locomotive smoke-box and saddle construction. 1,625,784; Apr. 26.
Beauchamp, Dora F., Forest Hills, N. Y. Vehicle signal. 1,626,131; Apr. 26.
Bechtel, George M., Montclair, N. J. Contents-level indicator for containers. 1,625,976; Apr. 26.
Beech, Alexander C., Chicago, Ill., assignor to Kroehler Mfg. Co., Naperville, Ill. Reclining chair. 1,626,069; Apr. 26.
Beers, Royce L., assignor to Detroit Stoker Company, Detroit, Mich. Underfeed stoker. 1,625,975; Apr. 26.
Belcher, J. E. (See Brown, James F., assignor.)
Bell, George F., Tulsa, Okla. Flange for bull wheels. 1,626,322; Apr. 26.
Bemis, Albert F., Newton, Mass., assignor to Bemis Industries, Inc., Boston, Mass. Building construction. 1,626,112; Apr. 26.
Bemis Industries, Inc. (See Bemis, Albert F., assignor.)
Bendick, Sidney S., New York, N. Y. Printing stencil and making same. 1,626,323; Apr. 26.
Benetti, Carlos, Barcelona, Spain. Bottle closure. 1,626,499; Apr. 26.
Benetti, Carlos, Barcelona, Spain. Crown stopper. 1,626,500; Apr. 26.
Berg, Roy L., New Ulm, Minn. Nonglare attachment for reflectors. 1,625,932; Apr. 26.
Best, Harry S., assignor to John H. Best & Sons, Galva, Ill. Display rack. 1,626,501; Apr. 26.
Best, Harry S., assignor to John H. Best & Sons, Galva, Ill. Arm. 1,626,502; Apr. 26.
Best, John H., & Sons. (See Best, Harry S., assignor.)
Bevier, Hutchinson L., Duluth, Minn. Muscle beater. 1,625,977; Apr. 26.
Bibb, Carlisle H. (See Zimmerli, W. F., and Bibb.)
Bigger, Andrew F. (See Rost, Robert W., assignor.)
Billingsley, William H., Florence, Ala. Radiator cap. 1,626,177; Apr. 26.
Bing, Julius, assignor to Magnet-Werk G. m. b. H. Eisenach Spezialfabrik für Elektromagnet-Apparate, Eisenach, Germany. Friction body for multiple-disk clutches and the like. 1,625,933; Apr. 26.
Binks, Harry D. (See Sausen, B. R. and Binks, assignors.)
Binks Spray Equipment Co. (See Sausen, B. R., and Binks, assignors.)
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Machine for setting tenpins. 1,626,446; Apr. 26.
Bjorklund, Felix, Fairport Harbor, Ohio. Power operated bandsaw. 1,626,503; Apr. 26.
Blackford, Gilbert V., assignor of one-half to W. R. Hobbs, Independence, Kans. Awning for automobile doors. 1,625,785; Apr. 26.
Blackmon, Ben C., Dallas, Tex. Matrix-making machine. 1,625,786; Apr. 26.
Blair, James C., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Forming sheet glass. 1,626,382; Apr. 26.
Blakesley, George R., Janesville, Wis. Electric heating system. 1,626,221; Apr. 26.
Blatz, Peter A., Wilmington, Del. Coloring leather. 1,625,842; Apr. 26.
Bleick Syndicate. (See Ekman, Andrew, assignor.)
Bloomfield, Grover. (See Woodruff, J. C., and Bloomfield.)
Blue Valley Creamery Company. (See Cook, Joseph, assignor.)
Boedtcher, Franz A., Bergenfield, N. J. Illuminated signal for elevator installations. 1,626,383; Apr. 26.
Boehringer, C. F., & Soehne G. m. b. H. (See Rothmann, A., and Stein, assignors.)
Boge, Adolf, Solingen, Germany. Latch lock. 1,626,384; Apr. 26.
Bond, Edward, and F. W. H. Bond, Vancouver, Wash. Vacuum pump and power plant. 1,626,070; Apr. 26.
Bond, Frederick W. H. (See Bond, Edward, and F. W. H.)
Booth, William G., West Somerville, assignor to Forbes Lithograph Manufacturing Company, Boston, Mass. Box or carton. 1,626,324; Apr. 26.
Booth, William N., Detroit, Mich. Vehicle wheel. 1,625,879; Apr. 26.
Borda, Pasquale, New York, N. Y. Shoe last. 1,626,071; Apr. 26.
Borg & Beck Company, The. (See Reed, Harold V., assignor.)
Borofsky, Samuel H. (See Krafft, Bert H., assignor.)
Borschel, Alfred F. (See Mulholland, J. B., and Borschel.)
Bouwers, Albert. (See Holst, G., and Bouwers.)
Bowe, Marion R., assignor of one-half to W. D. Harris, Philadelphia, Pa. Boiler-cleaning device. 1,626,385; Apr. 26.
Bowes, Thomas D., Cynwyd, assignor of one-third to H. C. Verhey and one-third to L. C. Cope, Philadelphia, Pa. Cylinder for double-acting engines. 1,625,843; Apr. 26.
Bowman, George J., Glenburn Calif. Hay loader. 1,626,178; Apr. 26.
Bowman, George J., Glenburn, Calif. Tightener and holder for tire chains. 1,626,179; Apr. 26.
Boxboard Products Company. (See Kondolf, Mathias R., assignor.)
Brady, Sanford C., Bartlesville, Okla. Pump. 1,626,072; Apr. 26.
Brady, Sanford C., Bartlesville, Okla. Pressure-control device. 1,626,073; Apr. 26.
Bramin, Edwin F., Balboa Heights, Canal Zone, Panama. Concrete-block molding and setting machine and method of molding. 1,626,447; Apr. 26.
Brandes Laboratories, Inc. (See Brigham, Cyril A., assignor.)
Braselton, Chester H., assignor to The Tillotson Manufacturing Co., Toledo, Ohio. Carburetor. 1,625,787; Apr. 26.
Braselton, Chester H., New York, and F. B. MacLaren, Malba, N. Y., said MacLaren, assignor to said Braselton. Vibration-operated pump. 1,625,788; Apr. 26.
Braselton, Chester H., New York, and F. B. MacLaren, Malba, N. Y., said MacLaren, assignor to said Braselton. Liquid-pumping apparatus. 1,625,789; Apr. 26.
Breland, Eugene F. J., Paris, France. Controlling device for marine engines. 1,625,978; Apr. 26.
Bremer, Emil M., Glenville, Minn. Attachment for gas-engine-cooling systems. 1,626,448; Apr. 26.
Brewer-Titchener Corporation, The. (See Miller, Harold G., assignor.)
Brewster, William, New York, N. Y. Glass partition for closed automobile bodies. 1,626,074; Apr. 26.
Briggs, Clyde A., Millwood, Oreg. Saw tooth gauge. 1,626,029; Apr. 26.
Brigham, Cyril A., East Orange, N. J., assignor to Brandes Laboratories, Inc., Newark, N. J. Sound-reproducing apparatus. 1,625,844; Apr. 26.
Bright, George B., Co. (See Bright, G. B., and Cole, assignors.)
Bright, George B., and R. N. Cole, assignors to George B. Bright Co., Detroit, Mich. Ice-can carrier. 1,626,222; Apr. 26.
Brinkerhoff, Frederic H., Riverdale, N. J. Coin magazine. 1,625,979; Apr. 26.
Brinkman, Louis G., Dayton, Ohio. Game apparatus. 1,625,980; Apr. 26.
Briscoe, Benjamin, et al., trustees. (See Ramage, Alexander S., assignors.)
Broadfield, Ward H., assignor to The H. H. Miller Industries Company, Canton, Ohio. Engine. 1,625,880; Apr. 26.
Brockway, Carl P., assignor to Industrial Research Corporation, Toledo, Ohio. Two-cycle rotary plant. 1,625,790; Apr. 26.
Bronander, Wilhelm B., Montclair, N. J., assignor to American Machine & Foundry Company. Paper-feeding roll. 1,626,386; Apr. 26.
Brooke, Frank W., assignor to William Swindell and Brothers, Pittsburgh, Pa. Furnace and operating the same. 1,626,263; Apr. 26.
Brophy, John J., and W. E. Broughton, assignors to The Turner Tanning Machinery Company, Peabody, Mass. Machine for treating hides, skins, and leather. 1,625,981; Apr. 26.
Broughton, Winn E. (See Brophy, J. J., and Broughton.)
Brown, James F., assignor of one-half to J. E. Belcher, Lookout, Ky. Railway tie and rail fastener. 1,626,075; Apr. 26.
Brown, William W., Schenectady, N. Y., assignor to General Electric Company. Automatic antenna regulation. 1,626,449; Apr. 26.
Browne, Lyle W., assignor to The Fisher Governor Company, Marshalltown, Iowa. Float control device. 1,626,504; Apr. 26.
Brownlee, Henry, Port Hope, Ontario, Canada. Combined lock-nut and nut tightener. 1,625,982; Apr. 26.
Brügger, Xaver, Horgen, Switzerland. Yarn reel. 1,626,325; Apr. 26.
Brunelle, Eugene A. (See Deschenes, Adelard G., assignor.)
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Bryant, Henry E., Providence, assignor to Tubular Woven Fabric Company, Pawtucket, R. I. Spool or reel. 1,626,264; Apr. 26.
Bryant, Henry E., Providence, assignor to Tubular Woven Fabric Company, Pawtucket, R. I. Linear-measuring machine. 1,626,265; Apr. 26.
Bullock's. (See Ebell, Helen, assignor.)

Burkett, Byron C., assignor to The Burkett Lightning Rod Company, Fremont, Ohio. Lightning-rod connecter. 1,626,180; Apr. 26.
Burkett Lightning Rod Company, The. (See Burkett, Byron C., assignor.)
Burkey, Ernest R., Cleveland, Ohio. Paper-hanging device for walls. 1,626,020; Apr. 26.
Burlingham, James H., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Distilling apparatus. 1,626,223; Apr. 26.
Burnham, Edward C., and H. A. Davis, assignors to Draper Corporation, Hopedale, Mass. Filling-control mechanism for filling replenishing looms. 1,626,505; Apr. 26.
Burns, Charley E., Haynesville, La. Pump. 1,626,181; Apr. 26.
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,626,387; Apr. 26.
Burtnett, Everett R., assignor to The Automotive Valves Co., Los Angeles, Calif. Internal-combustion engine. 1,626,388; Apr. 26.
Burton, Harry H., New Bedford, assignor to Draper Corporation, Hopedale, Mass. Warp stop mechanism for looms. 1,626,506; Apr. 26.
Bush, A. G. (See Miller, Otis A., assignor.)
Buss Machine Works. (See Buss, W. R., and Dick, assignors.)
Buss, Otto W. L., Minneapolis, Minn. Window structure. 1,626,266; Apr. 26.
Buss, Wendell R., and M. E. Dick, assignors to Buss Machine Works, Holland, Mich. Sectional feed roller for woodworking machine. 1,625,881; Apr. 26.
Butler, Morgan R., Waukesha, Wis. Material handling equipment. 1,626,389; Apr. 26.
Byron, Jackson, Pump Company. (See Hollander, Aladar, assignor.)
Cahill, Edward F. (See Hoover, W. C., Fritz, and Cahill.)
California Card Manufacturing Company. (See Helmquest, William J., assignor.)
Callahan, Michael J., New York, N. Y. Radiator for heating and ventilating units. 1,626,390; Apr. 26.
Camden Pottery Company. (See Wright, Charles C., assignor.)
Campbell, Donald J., Muskegon Heights, Mich. Molder's pattern. 1,626,224; Apr. 26.
Campbell, Donald J., Muskegon, Mich. Molding apparatus. 1,626,225; Apr. 26.
Campbell, Francis H., Brighton, Mass. Shield attachment for automobile doors. 1,625,791; Apr. 26.
Campbell, John G., assignor to Delco-Light Company, Dayton, Ohio. Electrical apparatus. 1,626,182; Apr. 26.
Camper, James H., Huntington, W. Va. Household article. 1,626,507; Apr. 26.
Campion, Paul, Vitry-sur-Seine, France, assignor to A. B. Dick Company, Chicago, Ill. Manufacture of stencils for duplicating apparatus. 1,626,113; Apr. 26.
Candray, José S., San Francisco, Calif. Lighter-than-air craft. 1,626,183; Apr. 26.
Cannon, John W., Birmingham, Ala. Burial garment. 1,626,450; Apr. 26.
Cantor, Osias, Sea Gate, New York Harbor, N. Y. Dental forceps. 1,626,226; Apr. 26.
Cantrell, Alonzo, Salt Lake City, Utah. Merchandise-vending machine. 1,625,845; Apr. 26.
Caplan, Samuel J. (See Willock, H. H., Caplan, and Babb.)
Carborundum Company, The. (See Martin, Harry C., assignor.)
Cardwell, Allen D., Manufacturing Corporation, The. (See Cardwell, Allen D., assignor.)
Cardwell, Allen D., Rockville Center, assignor to The Allen D. Cardwell Manufacturing Corporation, New York, N. Y. Variable air condenser. 1,626,391; Apr. 26.
Carlson, Joseph C., Tulsa, Okla. Surfacing for automobile parts and the like. 1,626,508; Apr. 26.
Carrington, John W., Cincinnati, Ohio. Automobile cleaning device. 1,625,792; Apr. 26.
Carter, Herbert F., Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for wrapping strand material around a core. 1,625,983; Apr. 26.
Caruso, Louis, Irvington, N. J., assignor to The Lionel Corporation. Toy electric railway. 1,626,267; Apr. 26.
Caswell, Robert G., and E. G. Marshall, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making berzanthrone. 1,626,392; Apr. 26.
Cater, William H., Chicago, Ill. Frame structure. 1,626,393; Apr. 26.
Cavett, John J., Woodlawn, Pa., assignor to The Koppers Company. Sealed valve. Re16,604; Apr. 26.
Central Brass Manufacturing Company, The. (See Eckhouse, Edgar A., assignor.)
Centrifugal Castings Limited. (See Hurst, J. E., and Ball, assignors.)
Cesario, Frank, Port Chester, N. Y. Tile construction. 1,626,021; Apr. 26.
Chamberlain, Leroy, Wichita Falls, Tex. Weight elevator for pulling machines. 1,626,114; Apr. 26.
Chambers, John E., Shelbyville, Ind. Cooking oven. 1,625,846; Apr. 26.
Champlin, Franklin J., Dalton, Mass., assignor to General Electric Company. Systems of electric distribution. 1,626,451; Apr. 26.
Chance, Charles E., Annapolis, Md. Boat form. 1,626,509; Apr. 26.
Charles, Henry L. (See Jacquemin, Eugene, assignor.)
Chase, Earle M., assignor to Universal Candy and Chocolate Machinery Company, Inc., Springfield, Mass. Rotary pump. 1,626,510; Apr. 26.
Chase, Walter M., Los Angeles, Calif. Golf practice device and game. 1,626,326; Apr. 26.
Cheek, Tolbert F., assignor to Welte-Mignon Corporation, New York, N. Y. Cabinet player. 1,626,327; Apr. 26.
Cheek, Tolbert F., assignor to Welte-Mignon Corporation, New York, N. Y. Operate piano-pedal mechanisms under control of a record.. 1,626,328; Apr. 26.
Chilton, Ralph H., assignor to Industrial Research Corporation, Toledo, Ohio. Gas-engine starter. 1,625,793; Apr. 26.
Chipman, Morton R., Waterbury, Conn. Dust cap for lubricating apparatus. 1,626,268; Apr. 26.
Christensen, Niels A., Milwaukee, Wis. Compressor governor. 1,626,076; Apr. 26.
Christlein, Paul, Nuremberg, and K. Werner, Nuremberg-Elbach, Germany. Pump having rolling pistons working in nuts. 1,625,794; Apr. 26.
Clark, Edgar M., New York, N. Y., assignor to Standard Development Company. Distilling hydrocarbon material. 1,625,984; Apr. 26.
Clark, Ernest, Rio de Janeiro, Brazil. Paving block. 1,626,269; Apr. 26.
Clark, George H., Melrose, assignor to Crosby-Steam Gage & Valve Company, Boston, Mass. Pressure gauge. 1,625,985; Apr. 26.
Clark, John T., Provo, Utah. Vehicle tire. 1,626,511; Apr. 26.
Clark, John T., Provo, Utah. Pneumatic tire. 1,626,512; Apr. 26.
Clement, Edward E. (See Lowenstein, H. F., and Clement.)
Cleveland Folding Machine Company, The. (See Olson, Andrew, assignor.)
Cluett, Peabody & Co. (See Connolly, Charles M., assignor.)
Cluett, Peabody & Co. (See Cook, Orville E., assignor.)
Clyde Iron Works. (See Ramsey, Robert P., assignor.)
Coates, Frank, Cleadon, and J. Mirrey, East Boldon, assignors to A. Reyrolle & Company, Limited, Hebburn-on-Tyne, England. Oil-immersed electric switch. 1,626,513; Apr. 26.
Coatsworth, Frank E., Lincoln, Nebr. Incubator tray. 1,626,394; Apr. 26.
Cobb, Charles H., Newton, assignor, by mesne assignments, to Service Bureau, Inc., Cambridge, Mass. Index card. 1,625,934; Apr. 26.
Coder, Joseph and L., St.-Marcel-les-Marseille, France. Coupling means between motor tractors and their trailers. 1,626,184; Apr. 26.
Coder, Joseph and L., St.-Marcel-les-Marseille, France. Tractor trailer of the type carried on two wheels. 1,626,185; Apr. 26.
Coder, Louis. (See Coder, Joseph and L.)
Cole, Ralph N. (See Bright, G. B., and Cole.)
Colladay, Edward F. (See Lowenstein, H. F., and Clement, assignors.)
Colone, James, Collinsville, Ill. Curtain bracket. 1,626,186; Apr. 26.
Columbus Heating and Ventilating Company, The. (See Wolfe, Jay A., assignor.)
Commercial Solvents Corporation. (See Woodruff, J. C., and Bloomfield, assignors.)
Comstock-Castle Stove Company. (See Spake, Richard W., assignor.)
Connolly, Charles M., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y. Collar-display device. 1,626,514; Apr. 26.
Consortium für Elektrochemische Industrie. (See Herrmann, W. O., and Deutsch, assignors.)
Continental Engineering Corporation. (See Anthony, Marcus Q., assignor.)
Converse, Charles D., Los Angeles, Calif. Conduit switch box. 1,625,882; Apr. 26.
Converse Rubber Shoe Co. (See Thomas, George C., assignor.)
Cook, Joseph, assignor to Blue Valley Creamery Company, Chicago, Ill. Can steamer. 1,626,452; Apr. 26.
Cook, Orville E., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y. Temperature control for folding machines, etc. 1,626,515; Apr. 26.
Cooper, Abraham, Brooklyn, N. Y. Electric-lighting fixture. Des. 72,510; Apr. 26.
Cope, L. C., et al. (See Bowes, Thomas D., assignor.)
Coquille, Emile H., Paris, France, assignor to Rudge-Whitworth Limited, Coventry, Warwick, England. Spoked metal wheel for motor vehicles and the like. 1,625,986; Apr. 26.
Corbett, James C., Rochester, N. Y. Machine for washing, rinsing, and drying dishes. 1,626,022; Apr. 26.
Cortese, Sam, Dunsmuir, Calif. Thread cutter for sewing machines. 1,626,329; Apr. 26.
Coryell, Charles N., Mamaroneck, N. Y. Vanity case. 1,626,023; Apr. 26.
Cossins, Arthur, Nettlestead, near Maidstone, England. Display stand. 1,626,330; Apr. 26.

Cox, Floyd, assignor of one-fifth to E. W. Swan, Sheridan, Wyo. Pipe wrench. 1,626,453; Apr. 26.
Cox, Irwin W., Denver, Colo. Dry-steam sleeve-finishing board. 1,625,935; Apr. 26.
Cramer, Bessie E., Garnett, Kans. Can washer and steamer. 1,626,516; Apr. 26.
Crane, Pearl M., Kansas City, Mo. Pantaloon dress. 1,626,024; Apr. 26.
Craun, Noel E., Bogota, N. J. Power-transmission device. 1,626,270; Apr. 26.
Crawford, Frederick C., Detroit, Mich., assignor to The Steel Products Company, Cleveland, Ohio. Making a drag-link element. 1,625,795; Apr. 26.
Cresmer, John H., Riverside, Calif. Automobile steering knee control. 1,626,331; Apr. 26.
Crittall, Richard G. and J. L. Musgrave, London, England. Heating and cooling of buildings. 1,625,987; Apr. 26.
Crosby Steam Gage & Valve Company. (See Clark, George H., assignor.)
Crowell, Erd V., Los Angeles, Calif. Gas-energy-control head for oil wells. 1,625,883; Apr. 26.
Crowley, Joseph P., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Drawing sheet glass. 1,626,395; Apr. 26.
Crumley, Le Roy A., assignor to H. M. Feltenstein, New York, N. Y., doing business as M. Eisenberg & Son. Hanging lantern. Des. 72,511; Apr. 26.
Curry, Charles D., Henryetta, Okla. Rail tie. 1,626,517; Apr. 26.
Dahlberg & Company. (See Munroe, Treadway B., assignor.)
Dake, Charles W., and R. S. Levis, assignors to The Pyle-National Company, Chicago, Ill. Glass-polishing machine. 1,626,025; Apr. 26.
Dake, Charles W., and R. S. Levis, assignors to The Pyle-National Company, Chicago, Ill. Glass-polishing machine. 1,626,026; Apr. 26.
Dancker, Johann E. (See Bates, A. M., and Dancker.)
Daniels, Dwight C., Worcester, Mass. Card index 1,626,027; Apr. 26.
Daun, Carl L., and P. E. Keller, assignors to American Electric Motor Company, Milwaukee, Wis. Removable stator for electric motors. 1,626,028; Apr. 26.
Davidson, William B., A. C. Michie, and E. W. Muddiman, Newcastle-on-Tyne, England. Distillation of tar and the like. 1,626,588; Apr. 26.
Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,626,132; Apr. 26.
Davis, Harry A. (See Burnham, E. C., and Davis.)
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Let-off mechanism for looms. 1,626,573; Apr. 26.
Davis, Reginald M., London, England. Smoker's ash tray and like receptacle. 1,625,884; Apr. 26.
Davis, Victor L. (See Olin, J. M., Davis, and Smith.)
Davis, Walter T., assignor to Wheeling Stamping Company, Wheeling, W. Va. Thread cutter for tube-working machines. 1,626,271; Apr. 26.
Day, James C., Maplewood, N. J., assignor to The Whitehead & Hoag Company, Newark, N. J. Badge. 1,626,133; Apr. 26.
Decker, William W., jr., Chicago, Ill. Culinary vessel. 1,625,847; Apr. 26.
Deere & Company. (See Strandlund, Carl G., assignor.)
Deibel, Cyril P., and W. G. Waitt, Lakewood, assignors to The Twin Dry Cell Battery Company, Cleveland, Ohio. Battery unit and producing the same. 1,625,848; Apr. 26.
Delage, Phileas. (See Roy, Joseph W., assignor.)
Delco-Light Company. (See Campbell, John G., assignor.)
Delco-Light Company. (See Starr, Frank F., assignor.)
De Leeuw, Adolph L., Plainfield, N. J., assignor to The Goss and De Leeuw Machine Company, New Britain, Conn. Threading mechanism. 1,626,187; Apr. 26.
Denison, Frederick S., assignor to Minneapolis Heat Regulator Company, Minneapolis, Minn. Ignition-controlling means. 1,625,796; Apr. 26.
De Ram, Georges H. E., Boulogne-sur-Seine, France. Suspension of automobiles and other vehicles. 1,626,188; Apr. 26.
Deschenes, Adelard G., Lisbon, Me., assignor of one-half to E. A. Brunelle, Somersworth, N. H. Machine for frying peanuts and the like. 1,625,797; Apr. 26.
Desmond, James J., South Norwalk, Conn. Hat. 1,626,272; Apr. 26.
Detroit Stoker Company. (See Beers, Royce L., assignor.)
Deutsch, Hans. (See Herrmann, W. O., and Deutsch.)
Devigny, Michel, Paris, France. Manufacture of cut matrices adapted for the production of photographic surfaces comprising refracting elements. 1,626,134; Apr. 26.
Dice, Andrew F., assignor of one-third to G. Dice and one-third to M. Dice, Joliet, Ill. Fishing device. 1,625,988; Apr. 26.
Dice, George, et al. (See Dice, Andrew F., assignor.)
Dice, Minnie, et al. (See Dice, Andrew F., assignor.)
Dick, A. B. Company. (See Campion, Paul, assignor.)
Dick, M. Everett. (See Buss, W. R., and Dick.)
Dictaphone Corporation. (See Woodbridge, Charles K., assignor.)
Dietze, Emil, New York, assignor to American Casting and Manufacturing Corporation, Brooklyn, N. Y. Self-locking seal. 1,626,273; Apr. 26.
Dixon, John W., Maywood, Ill. Machine for making metal binding strips. 1,626,227; Apr. 26.
Doering, Charles J. (See Doering, William W. and C. J.)
Doering, William M. and C. J., Cincinnati, Ohio, Advertising device and reflector therefor. 1,625,798; Apr. 26.
Dornier, Claudius, assignor of one-half to Dornier-Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Landing chassis for flying machines. 1,626,332; Apr. 26.
Dornier-Metallbauten Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Douglass, Neale, Brooklyn, N. Y. Chain wrench. 1,626,518; Apr. 26.
Drake, John L., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-drawing apparatus. 1,626,396; Apr. 26.
Draper Corporation. (See Burnham, E. C., and Davis, assignors.)
Draper Corporation. (See Burton, Harry H., assignor.)
Draper Corporation. (See Davis, Harry A., assignor.)
Draper Corporation. (See Hollins, Denis M., assignor.)
Draper Corporation. (See Mathis, Frederick W., assignor.)
Dreaper, William P., London, England. Manufacture of artificial silk and the like from viscose solutions. 1,626,454; Apr. 26.
Drevenstedt, Amy, assignor to John Wanamaker New York, New York, N. Y. Box cover paper or similar article. Des. 72,512; Apr. 26.
Drew, Herbert H., assignor to Watertown Tableslide Co., Watertown, Wis. Table slide. 1,626,189; Apr. 26.
Dryden Rubber Company. (See Kintzele, Julius H., assignor.)
Duffie, Allen M., assignor to W. H. Robinson, Buffalo, N. Y. Electric heater. 1,625,989; Apr. 26.
Duffy, Patrick J., Holyoke, Mass. Pliers. 1,626,274; Apr. 26.
Dugan, Hugh G., Hinsdale, Ill. Clothes-washing apparatus. 1,626,397; Apr. 26.
Dunlop, William F., New York, N. Y. Dental chuck. 1,626,519; Apr. 26.
Du Paul, George H., Southbridge, Mass., assignor to Shur-On Standard Optical Company, Inc., Geneva, N. Y. Ophthalmic mounting. 1,625,885; Apr. 26.
Du Pont, E. I., de Nemours & Company. (See Caswell, R. G., and Marshall, assignors.)
Du Pont, E. I., de Nemours & Company. (See Essex, H., and Ward, assignors.)
Durand, Paul, Paris, France. Automatic weighing machine. 1,625,799; Apr. 26.
Durkee, Eugene W. (See Alexanderson, Charles A., assignor.)
Dyke, Herbert J., St. Lambert, Quebec, Canada. Railway switch. 1,626,520; Apr. 26.
Eastman, James H., Detroit, Mich. Spark-gap device. 1,626,030; Apr. 26.
Ebell, Helen, assignor to Bullock's, Los Angeles, Calif. Wrapping paper. Des. 72,513; Apr. 26.
Ecco Manufacturing Company. (See Nelson, John H., assignor.)
Eckhouse, Edgar A., Cleveland, Ohio., assignor to The Central Brass Manufacturing Company, Cleveland, Ohio. Bibcock or faucet. 1,626,031; Apr. 26.
Eckstein, George H., Los Angeles, Calif. Toy piano. 1,626,275; Apr. 26.
Eclipse Air Brush Company. (See Reichenbach, Carl L., assignor.)
Edwards, William S., Lockland, Ohio. Gasket-seating machine. 1,625,800; Apr. 26.
Egersdörfer, Fritz, Charlottenburg, Germany. Rotary pump. 1,626,115; Apr. 26.
Egley, Bertram. (See Adams, John B., assignor.)
Egloff, Frank S., Riverside, Ill., assignor, by mesne assignments, to The Phoenix Burner Corporation. Air control for oil burners. 1,626,228; Apr. 26.
Egry Register Company, The. (See Jackson, Philip A., assignor.)
Eisenberg, M., & Son. (See Crumley, Le Roy A.)
Ekman, Andrew, Grand Rapids, Mich., assignor to Bleick Syndicate. Packing. 1,625,801; Apr. 26.
Electrical Improvement Limited. (See Gregory, Richard W., assignor.)
Elliot, William S., assignor to Pro-phy-lac-tic Brush Company, Northampton, Mass. Handle-bending machine. 1,626,190; Apr. 26.
Elliott-Fisher Company. (See Foothorap, Harry A., assignor.)
Elters, William S., assignor to The Gem City Sheet Metal Co., Dayton, Ohio. Hood for registers. Des. 72,514; Apr. 26.
Emerson-Brantingham Manufacturing Company. (See Traphagen, Harry R., assignor.)
Engbrecht, Herman J., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Suction-operated liquid-displacing apparatus. 1,626,455; Apr. 26.
Erickson, Erick G., Alexandria, Minn. Oarlock. 1,626,191; Apr. 26.
Eriksen, Emil M., Oslo, Norway. Ski tie. 1,626,521; Apr. 26.
Essex, Harry, Syracuse, N. Y., and A. L. Ward, Upper Darby, Pa., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Making polyhydroxy carbon compounds. 1,626,398; Apr. 26.

Ever Hot Heater Company. (See Shuell, Frank W., assignor.)
Fain, Frank E., and R. W. Spriggs, Oklahoma City, Okla. Fishing-rod appliance. 1,626,333; Apr. 26.
Fairbanks, Ernest H., Merchantville, N. J. Lubricating system. 1,626,456; Apr. 26.
Fairchild, Sherman M., Oneonta, N. Y. Photographic shutter. 1,626,032; Apr. 26.
Falk, Morris, assignor to Independent Lock Company, Fitchburg, Mass. Key chain. 1,626,334; Apr. 26.
Fankhauser, Charles W., Great Bend, Kans. Coupling for closets. 1,626,135; Apr. 26.
Farber-Kraysler & Bro. (See Kraysler, Irving, assignor.)
Farnham, James P., New York, N. Y. Scavenging, fuel-humidifying, and volatilising process and apparatus for internal-combustion engines. 1,626,335; Apr. 26.
Feltenstein, Harry M. (See Crumley, Le Roy A., assignor.)
Felton, Jack A., Los Angeles, Calif. Steering attachment for vehicles. 1,625,886; Apr. 26.
Ferry, Cora. (See Ferry, Elmer and C.)
Ferry, Elmer and C., Buffalo, N. Y. Combination brake and jack mechanism for automobiles. 1,625,936; Apr. 26.
Fibroc Insulation Company. (See Frederick, Louis T., assignor.)
Finizio, Thomas D., Yorktown Heights, N. Y. Attaching plug. 1,626,580; Apr. 26.
Fisher, Charles, New York, N. Y. Rack for boots and shoes. 1,626,399; Apr. 26.
Fisher Governor Company, The. (See Browne, Lyle W., assignor.)
Fisher, Stanley L., Chester, assignor to Pratt Read Player Action Company, Deep River, Conn. Pneumatic-control device. 1,626,192; Apr. 26.
Fitz-Gerald, Edward T., Newark, N. J. Pipe. 1,625,849; Apr. 26.
Flauder, Alfred J., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Combined salt and pepper shaker. Des. 72,515; Apr. 26.
Flauder, Alfred J., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Combined salt and pepper shaker. Des. 72,516; Apr. 26.
Flint & Walling Mfg. Co. (See Macomber, Herbert H., assignor.)
Foner, Newton F., Pittsburgh, Pa. Engine. 1,626,457; Apr. 26.
Fontaine, Robert A., Martinsville, Va., assignor to R. C. Anderson, Montreat, N. C. Transmission mechanism. 1,626,229; Apr. 26.
Foothorap, Harry A., Harrisburg, Pa., assignor to Elliott-Fisher Company, New York, N. Y. Toll-slip platen. 1,625,802; Apr. 26.
Forbes Lithograph Manufacturing Company. (See Booth, William G., assignor.)
Fort Wayne Engineering and Manufacturing Co. (See Tannehill, Vernon L., assignor.)
Fowler, John S., San Mateo, assignor to Pacific Foundry Company, San Francisco, Calif. Dry-pan crusher. 1,626,887; Apr. 26.
Francke, William J., assignor, by mesne assignments, to John Waldron Corporation, New Brunswick, N. J. Flexible coupling. 1,626,458; Apr. 26.
Frank, John M., assignor to Ilg Electric Ventilating Company, Chicago, Ill. Unit for heating and ventilating systems. 1,626,400; Apr. 26.
Franklin, Simon & Co. (See Siegel, Maude, assignor.)
Frantz, Charles T., assignor to Recording Thermometer Company, Los Angeles, Calif. Printing machine. 1,626,401; Apr. 26.
Frederick, Louis T., assignor to Fibroc Insulation Company, Valparaiso, Ind. Composite gear and making same. 1,626,230; Apr. 26.
Fredrikson, Walter O., et al., trustees. (See McArthur, Robert C., assignor.)
Freeman, John R. (See Krivoshein, Gregory G., assignor.)
Freiberg, Stanley B., Cincinnati, Ohio. Color printing. 1,626,522; Apr. 26.
Frengle, Frederick, Cotati, and F. D. Rohan, Petaluma, assignors to Pride of Petaluma Brooder Stove Company, Petaluma, Calif. Chicken hover. 1,626,251; Apr. 26.
Fritz, Roy D. (See Hoover, W. C., Fritz, and Cahill.)
Frulla, Pacifico, Memphis, Tenn. Railroad gate. 1,625,937; Apr. 26.
Fryman, Nancy, Indianapolis, Ind. Fruit picker. 1,626,402; Apr. 26.
Fürst, Carl, Bedford, Ind. Bush-hammering machine. 1,626,033; Apr. 26.
G. & G. Atlas Systems, Inc. (See Stoetzel, Joseph J., assignor.)
Gagarin, Andrew A., assignor to Gear Grinding Machine Company, Detroit, Mich. Trimming device. 1,626,232; Apr. 26.
Gage, Charles H., Washington, D. C. Safety device. 1,626,077; Apr. 26.
Gallon Metallic Vault Company, The. (See Smith, R. E., Arnold, and Gay, assignors.)
Ganio, Ottavio, G. Avondoglio, and O. Grassis, New York, N. Y. Artificial-flower-curling machine. 1,626,523; Apr. 26.
Gardner, John E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,626,034; Apr. 26.

Garrett, Henry, Dallas, Tex. Traffic signal. 1,625,990; Apr. 26.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock-drilling device. 1,626,277; Apr. 26.
Gatke, Thomas L., Oak Park, Ill. Friction lining and forming same. 1,626,403; Apr. 26.
Gaunt, Floyd, M. B. Reynolds, and R. C. Hughes, assignors to Reynolds Gas Regulator Co., Anderson, Ind. Gas Regulator. 1,626,581; Apr. 26.
Gay, John C. (See Smith, R. E., Arnold, and Gay.)
Gayle, Norman W., Beech Grove, assignor to C. N. Van Cleave, Indianapolis, Ind. Coin-controlled lock. 1,626,193; Apr. 26.
Gear Grinding Machine Company. (See Gagarin, Andrew A., assignor.)
Gear Grinding Company, The. (See Snarry, John W., assignor.)
Gedien, Paul, Cologne-Braunsfeld, and K. Schwade, Cologne-Lindenthal, Germany. Cutting-off device particularly for tubes. 1,625,850; Apr. 26.
Gedien, Paul, Cologne-Brunsfeld, and K. Schwade, Cologne-Lindenthal, Germany. Device for the electrical welding of seamed tubes. 1,626,524; Apr. 26.
Geer, William C., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Golf ball and making the same. 1,626,459; Apr. 26.
Gem City Sheet Metal Co. (See Elters, William S., assignor.)
General Electric Company. (See Anderson, Arvid E., assignor.)
General Electric Company. (See Bailey, Percy S., assignor.)
General Electric Company. (See Brown, William W., assignor.)
General Electric Company. (See Champlin, Franklin J., assignor.)
General Electric Company. (See Goff, Robert W., assignor.)
General Electric Company. (See Hall, Chester I., assignor.)
General Electric Company. (See Jones, Benjamin W., assignor.)
General Electric Company. (See Leddick, George S., assignor.)
General Electric Company. (See Libby, Sam H., assignor.)
General Electric Company. (See Mole, Peter, jr., assignor.)
General Electric Company. (See Perkins, Lucius J., assignor.)
General Electric Company. (See Seede, John A., assignor.)
General Electric Company. (See Unger, Magnus, assignor.)
Genoese, John, San Francisco, Calif. Safety paper. 1,626,078; Apr. 26.
George, David, Lyadal, Westcross, Wales. Packing of goods. 1,626,525; Apr. 26.
Gerrard, Alec J., and P. Wright, Chicago, Ill.; said Wright assignor to said Gerrard. Wire-twisting machine 1,626,404; Apr. 26.
Getchell, Benjamin E., assigaor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Multiple-circuit switch. 1,626,233; Apr. 26.
Gifford, Harrison H., Montreal, Quebec, assignor to Holden Company Limited, Montreal, Canada. Rail anchor. 1,625,938; Apr. 26.
Gifford, Harrison H., assignor to Holden Company Limited, Montreal, Quebec, Canada. Rail anchor. 1,625,939; Apr. 26.
Gillen, George A., Jersey City, N. J., assignor to Gillen, Kimmey, Baker Syndicate Inc., Elmhurst, N. Y. Condenser. 1,626,526; Apr. 26.
Gillen, Kimmey, Baker Syndicate Inc. (See Gillen, George A., assignor.)
Gillette Rubber Co. (See Hutchens, H. O., and Kessler, assignors.)
Gillis, Julius H., Elizabeth, N. J., assignor, by mesne assignments, to Anaconda Sales Company. Roofing element and making the same. 1,625,888; Apr. 26.
Glasner, Rudolph W., and O. G. Nilson, assignors to Marquette Tool & Manufacturing Company, Chicago, Ill. Blank-holding means. 1,625,991; Apr. 26.
Godley, Charles E., Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company. Lamp-door fastening. 1,626,405; Apr. 26.
Godley, Charles E., Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company. Fluted lamp lens. 1,626,406; Apr. 26.
Godley, Charles E., Detroit, Mich., assignor, by mesne assignments, to C. M. Hall Lamp Company. Focusing device. 1,626,407; Apr. 26.
Godsey, H. Mitchell, Shreveport, La., assignor to Godsey-Murphy Company, Inc. Gas burner. 1,625,992; Apr. 26.
Godsey-Murphy Company. (See Godsey, H. Mitchell, assignor.)
Goeller, Vernon R., Boonton, N. J. Tire spreader. 1,626,460; Apr. 26.
Goff, Robert W., Schenectady, N. Y., assignor to General Electric Company. Push-button switch. 1,626,461; Apr. 26.
Gold, Egbert H., Chicago, Ill. Car-heating system. 1,626,234; Apr. 26.

Goldman, Abraham W., Los Angeles, Calif. Window sash and screen. 1,626,336; Apr. 26.
Goodlett, M. Nicholas, assignor to Arkell Safety Bag Company, New York, N. Y. Process and mechanism for making crinkled paper. 1,626,527; Apr. 26.
Goodman, Harry S., Chicago, Ill. Savings bank. 1,626,408; Apr. 26.
Goodman, Joseph, Whitneyville, assignor to The Mt. Carmel Mfg. Co., Mount Carmel, Conn. Making door handles. 1,626,278; Apr. 26.
Goodman Manufacturing Company. (See Davis, Charles E., assignor.)
Goodman Manufacturing Company. (See Vodoz, Frederick W., assignor.)
Goodrich, B. F., Company. (See Geer, William C., assignor.)
Goodrich, B. F., Company. (See Hoover, W. C., Fritz, and Cahill, assignors.)
Goodrich, B. F., Company, The. (See James, James V., assignor.)
Goodrich, B. F., Company, The. (See L'Hollier, Leslie H., assignor.)
Goodrich, B. F., Company, The. (See Mell, Tod J., assignor.)
Gorton, Walter T., U. S. Army, Springfield, Mass. Machine gun. 1,625,993; Apr. 26.
Gorton, Walter T., U. S. Army, Springfield, Mass. Machine gun. 1,625,994; Apr. 26.
Goss and De Leeuw Machine Company, The. (See De Leeuw, Adolph L., assignor.)
Gotham Silk Hosiery Company. (See Wagner, Alfred, assignor.)
Gougnard, Henri C. L., assignor to Societe Belge Des Produits Rationnels, Ahin-Lez-Huy, Belgium. Suppository and insertion of the same. 1,626,079; Apr. 26.
Graham, Alfred, et al., executor. (See Graham, Edward A.)
Graham, Edward A., Brockley, England, deceased, M. Graham and A. Graham, executrix and executor. Telephone receiver. 1,625,995; Apr. 26.
Graham, George, and A. C. Helmus, Douglaston, N. Y. Fabric-roll holder. 1,626,080; Apr. 26.
Graham, Maria, et al., executrix. (See Graham, Edward A.)
Grasselli Chemical Company, The. (See Howard, Henry, assignor.)
Grasselli Dyestuff Corporation. (See Schmidt, Maximilian P., assignor.)
Grassis, Onorato. (See Ganio, O., Avondoglio, and Grassis.)
Gray, W. D. (See Sulfins, H. J., and Mustain, assignors.)
Gregory, Richard W., Hexham-on-Tyne, assignor to Electrical Improvements Limited, Newcastle-upon-Tyne, England. Electric circuit breaker. 1,626,528; Apr. 26.
Griscom Russell Company, The. (See Pabodie, Robert J., assignor.)
Grondahl, Lars O., Pittsburgh, and H. M. Ryder, Forest Hills Borough, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical apparatus. 1,625,996; Apr. 26.
Grönkwist, Oscar R., Stockholm, Sweden. Method of and apparatus for automizing liquid fuel. 1,625,997; Apr. 26.
Gustavus J. Esselen, jr., Swampscott, Mass. Protecting covering for rubber sheets. 1,626,276; Apr. 26.
Gustin, Daniel S., Newark, N. J., assignor to Westinghouse Lamp Company. Applying a getter to vacuum devices. 1,626,235; Apr. 26.
Gwinn, George W., Hewlett, N. Y., assignor to American Machine & Foundry Company. Paper-feed mechanism. 1,626,409; Apr. 26.
Haas, Edward A., Los Angeles, Calif., and M. Posey, Sand Springs, Okla. Water cooler and refrigerating apparatus. 1,625,803; Apr. 26.
Hadrich, George, Detroit, Mich. Spark plug. 1,626,081; Apr. 26.
Haenicke, Arthur, Berlin-Tempelhof, Germany. Attaching buttons to cards. 1,626,337; Apr. 26.
Hahn, Eugene, et al. (See Wotruba, Charles, assignor.)
Halferty, William R., Ollie, Iowa. Railway tie. 1,626,082; Apr. 26.
Hall, Chester I., Fort Wayne, Ind., assignor to General Electric Company. Electric cut-out. 1,626,462; Apr. 26.
Hall, C. M., Lamp Company. (See Godley, Charles E., assignor.)
Halstead, John F., Brooklyn, N. Y., assignor to International Cigar Machinery Company. Transferring device for cigar machines. 1,626,410; Apr. 26.
Hänel, Max, Schlettau, Germany. Ball-securing means. 1,626,529; Apr. 26.
Hanson, Hans C., assignor to American Gas Machine Company, Albert Lea, Minn. Oven for camp stoves. 1,626,035; Apr. 26.
Hansson, Soren, assignor of one-half to H. T. Anderson, Butler, Pa. Making truck lever connections. 1,625,804; Apr. 26.
Hansson, Soren, assignor of one-half to H. T. Anderson, Butler, Pa. Truck lever connection. 1,625,805; Apr. 26.
Hardinge Brothers, Inc. (See Hardinge, Franklin, assignor.)
Hardinge, Franklin, assignor to Hardinge Brothers, Inc., Chicago, Ill. Oil burner. 1,626,116; Apr. 26.
Harnischfeger Corporation. (See Huber, Johannes S., assignor.)
Harnischfeger Corporation. (See Ljungkull, Rolf, assignor.)
Harrington, Jesse F., Memphis, Tenn. Switch. 1,626,463; Apr. 26.
Harris, Henry E., Portland, Oreg. Brine-unit-type refrigerating machine. 1,626,083; Apr. 26.
Harris, Henry E., Portland, Oreg. Cooling box. 1,626,084; Apr. 26.
Harris, Jason E., Howard, Kans. Intake valve. 1,626,279; Apr. 26.
Harris, Raymond J., Houston, Tex. Flytrap. 1,626,530; Apr. 26.
Harris, Raymond J., Houston, Tex. Insect trap. 1,626,531; Apr. 26.
Harris, William D., (See Bowe, Marion R., assignor.)
Hart, Henry R., Montclair, N. J. Flying suit. 1,626,136; Apr. 26.
Hartford-Empire Company. (See Peiler, Karl E., assignor.)
Hartford-Empire Company. (See Willetts, Paul G., assignor.)
Hartsell Motor Company. (See Hutsell, Thomas A., assignor.)
Haskell, Charles O., Hollywood, Calif. Elevating fluids. 1,626,236; Apr. 26.
Hathaway, Charles T., Duluth, Minn. Frolic button. Des. 72,517; Apr. 26.
Heartfield, Henry, Brea, Calif. Renovating and reblocking hat brims. 1,625,869; Apr. 26.
Hegarty, Daniel A., assignor to Mystic Washer Company, Houston, Tex. Spray head for boiler-washing machines. 1,625,851; Apr. 26.
Hehemann, Frederick H., assignor to The Lunkenheimer Company, Cincinnati, Ohio. Valve. 1,626,532; Apr. 26.
Heimgartner, Charles, and O. Stierli, Jersey City, N. J. Collar-button guard. 1,626,137; Apr. 26.
Heina Radio Corporation. (See Heina, William M., assignor.)
Heina, William M., Bronx, N. Y., assignor to Heina Radio Corporation. Portable radio apparatus. 1,626,464; Apr. 26.
Helmquest, William J., assignor to California Card Manufacturing Company, San Francisco, Calif. Picture mounting. Des. 72,518; Apr. 26.
Helmus, Adolph C. (See Graham, G., and Helmus.)
Henderson, Nelson H., assignor to Syracuse Industrial Gas Co., Syracuse, N. Y. Dishwashing machine. 1,626,194; Apr. 26.
Henriot, Louis, Paris, France. Carburetor. 1,626,085; Apr. 26.
Henry, George J. (See Wassel, Albert, assignor.)
Hercules Powder Company. (See Speicher, John K., assignor.)
Hergershausen, Katharina, Berlin, assignor to the Firm Mittelland Gummiwerke Aktiengesellschaft, Hanover-Linden, Germany. Figure of animate objects. 1,626,533; Apr. 26.
Herrmann, Willy O., and H. Deutsch, assignors to Consortium für Elecktrochemische Industrie, Munich, Germany. Manufacture of linoxin like substances. 1,625,852; Apr. 26.
Herzmark, Nicolas, Paris, France. Starting internal-combustion engines. 1,625,940; Apr. 26.
Heublein, Wilhelm O., Frankfort-on-the-Main, Germany. Ampulla composed of several compartments adapted for the purpose of radiotherapeutics. 1,626,338; Apr. 26.
Heyl, George E., Westminster, London, England. Cement and lime burning. 1,625,853; Apr. 26.
Higgins, John S., jr., Chicago, Ill. 1,626,036; Apr. 26.
Hilfman, Harry. (See Villaret, Gustave E., assignor.)
Hiller, William A., Manor, Tex. Flexible coupling. 1,626,195; Apr. 26.
Hills, Burton U., Chicago, Ill. Timer. 1,625,806; Apr. 26.
Hindahl, David, assignor to Rodger Ballast Car Company, Chicago, Ill. Dump-car construction. 1,625,998; Apr. 26.
Hirdler, Harold. (See Robertson, H., and Hirdler.)
Hobbs, Clarence. (See Hobbs, Frank D., and C.)
Hobbs, Frank D., and C., Los Angeles, Calif. Roller screen. 1,626,086; Apr. 26.
Hobbs, William R. (See Blackford, Gilbert V., assignor.)
Hodgkinson, Francis, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Turbine gland. 1,626,237; Apr. 26.
Hoefoed, Hauberg, Marstrand & Helweg Aktieselskabet Titan. (See Thomsen, Thomas C., assignor.)
Hoffenberg, Maurice J., New York, N. Y. Window-sash starter. 1,625,941; Apr. 26.
Hoffner, Frank, Nanticoke, Pa. Gasoline engine. 1,626,196; Apr. 26.
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Escapement mechanism for typewriters. 1,625,890; Apr. 26.
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Removable platen support. 1,625,891; Apr. 26.
Holden Company Limited. (See Gifford, Harrison H., assignor.)
Hollander, Aladar, assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Vertical-shaft floating pump. 1,625,892; Apr. 26.
Hollander, Aladar, assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Vertical pump mechanism. 1,625,893; Apr. 26.

Hollins, Denis M., Blackburn, England, assignor to Draper Corporation, Hopedale, Mass. Bobbin battery for automatic weft-replenishing looms. 1,625,942; Apr. 26.
Holmström, Johan G. (See Malmberg, C. J. G., and Holmstrom.)
Holst, Gilles, and A. Bouwers, assignors to Naamlooze Vennootschap Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. X-ray tube. 1,626,465; Apr. 26.
Holt, Frank, assignor to Stromberg Motor Devices Company, Chicago, Ill. Die for making carburetor frames. 1,625,854; Apr. 26.
Holt, Norris B., St. Louis, Mo. Display device. 1,626,037; Apr. 26.
Hooker Electrochemical Company. (See Rowland, Jasper M., assignor.)
Hoover Company, The. (See Oswald, Earl P., assignor.)
Hoover, William C., R. D. Fritz, and E. F. Cahill, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Grinding and separating apparatus. 1,626,466; Apr. 26.
Howard, Albert H., Bay Roberts, Newfoundland, assignor to The Western Union Telegraph Company, New York, N. Y. Regenerative rotary repeater. 1,626,534; Apr. 26.
Howard, Henry, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Manufacture of ammonium nitrate. 1,625,807; Apr. 26.
Howarth, Stanley W., Stockport, England. Extracting dust from and settling fur, hair, and the like material. 1,626,339; Apr. 26.
Howith, George D., Ottawa, Ontario, Canada. Convertible vehicle seat. 1,626,340; Apr. 26.
Huber, Johannes S., assignor to Harnischfeger Corporation, Milwaukee, Wis. Power shovel. 1,625,855; Apr. 26.
Hughes, Ralph C. (See Gaunt, F., Reynolds, and Hughes.)
Hughes, William G., Downey, Calif. Chain pipe wrench. 1,626,238; Apr. 26.
Hultquist, Charles A., Los Angeles, Calif. Fluid-operated percussive tool. 1,626,087; Apr. 26.
Hunt, John O., Brooklyn, assignor to Independent Paper Mills Inc., Brooklyn, N. Y. Paper folding, cutting, and delivering machine. 1,626,341; Apr. 26.
Hurst, James E., and E. B. Ball, assignors to Centrifugal Castings Limited, Kilmarnock, Scotland. Metal-pouring apparatus for centrifugal casting machines. 1,626,342; Apr. 26.
Hush, Ralph, Johannesburg, Transvaal, South Africa. Machine for breaking ore and other minerals. 1,626,535; Apr. 26.
Hutchens, Howard O., and C. A. Kessler, assignors to Gillette Rubber Co., Eau Claire, Wis. Flexible gasket for tire molds. 1,625,894; Apr. 26.
Hutsell, Thomas A., assignor to Hutsell Motor Company, Spokane, Wash. Piston. 1,625,943; Apr. 26.
Hutton, Earl S., Detroit, Mich. Locking mechanism. 1,626,197; Apr. 26.
Hyde, John, Albion Township, Rene County, Kans. Luggage carrier. 1,625,808; Apr. 26.
Ilg Electric Ventilating Company. (See Frank, John M., assignor.)
Independent Lock Company. (See Falk, Morris, assignor.)
Independent Paper Mills Inc. (See Hunt, John O., assignor.)
Industrial Research Corporation. (See Brockway, Carl P., assignor.)
Industrial Research Corporation. (See Chilton, Ralph H., assignor.)
Industrial Research Corporation. (See Manchester, Clyde C., assignor.)
International Cigar Machinery Company. (See Halstead, John F., assignor.)
International Nickel Company, The. (See Merica, P. D. and Vanick, assignors.)
International Precipitation Company. (See Jakosky, John J., assignor.)
Inventors' Trading Company. (See Ratcliff, William D., assignor.)
Ireland, Ward S., assignor to Lipman Refrigeration Company, Beloit, Wis. Alloy. 1,626,038; Apr. 26.
Irish, Mary S., Los Angeles, Calif. Domestic cooking vessel. 1,625,999; Apr. 26.
Jabouley & Co. (See Jabouley, Joanny B., assignor.)
Jabouley, Joanny B., assignor to Jabouley & Co., (firm) Lyon, France. Loom for weaving. 1,626,411; Apr. 26.
Jackson, Philip A., Atlanta, Ga., assignor to The Egry Register Company, Dayton, Ohio. Automatic register. 1,626,574; Apr. 26.
Jacquemin, Eugene, assignor of one-half to H. L. Charles, Kent, Wash. Toy whistle. 1,626,198; Apr. 26.
Jakosky, John J., Los Angeles, Calif. Drain device. 1,626,089; Apr. 26.
Jakosky, John J., assignor to International Precipitation Company, Los Angeles, Calif. Apparatus for sound reproductions. 1,626,088; Apr. 26.
James, James V., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Tube-making method and apparatus. 1,626,412; Apr. 26.
Janney, Charles L., et al. (See Winterling, William F., assignor.)
Jansen, Otto, Berlin, Germany. Bearing for movements and driving gears. 1,626,536; Apr. 26.
Japs, Bernard W., Minneapolis, Minn. Loose-leaf binder. 1,626,280; Apr. 26.
Jeannotte, Emile A., Montreal, Quebec, Canada. Passing light. 1,626,281; Apr. 26.
Jennings, J. Claud, Winnsboro, Tex. Mattress-display rack. 1,626,282; Apr. 26.
Jensen, James A., assignor to Quaker City Iron Works, Philadelphia, Pa. Emergency valve-control system for tank vehicles. 1,626,283; Apr. 26.
Jirotka, Bohumil, Berlin, Germany, assignor to the Firm, Dr. Otto Sprenger Patentverwertung Jirotka mit beschränkter Haftung, Vaduz, Lichtenstein. Variable condenser. 1,626,537; Apr. 26.
Johanson, Georg K. V., assignor to Svenska Aktiebolaget Gasaccumulator, Stockholm, Sweden. Fluid meter. 1,626,538; Apr. 26.
Johnson, Alvin L., Worcester, assignor, by mesne assignments, to R. W. Robinson, jr., Worcester, and W. C. Watson, Leicester, Mass. Connecter for two-part demountable rims. 1,626,284; Apr. 26.
Johnson & Johnson. (See Zimmerli, W. F., and Bibb, assignors.)
Jones, Benjamin W., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing-circuit-breaker system. 1,626,467; Apr. 26.
Jones, Edward E., Rockford, Ill. Telephone holder. 1,626,539; Apr. 26.
Jones, George D., Petersburg, Va. Ironing-board attachment for wardrobe trunks. 1,626,468; Apr. 26.
Jones, Hulbert A., Ada, Okla. Dispensing and advertising device. 1,625,944; Apr. 26.
Judd, Randall F., Brookline, Mass. Game-ball holder. 1,625,856; Apr. 26.
Jumonville, Edward, New Orleans, La. Making mop heads. 1,625,857; Apr. 26.
Kalman Steel Company. (See White, William E., assignor.)
Karl, Heinrich, Jersey City, N. J. Treating traffic rails. 1,626,285; Apr. 26.
Katz, Sarah, Detroit, Mich. Attachment for telephones. 1,625,895; Apr. 26.
Kay, Edgar B., Washington, D. C. Incinerator. 1,626,000; Apr. 26.
Kaynor, Warren F., assignor to Waterbury Button Company, Waterbury, Conn. Detachable metal button. 1,626,582; Apr. 26.
Kearney, Edward J., Waumatosa, and J. Armitage, Milwaukee, assignors to Kearney-Trecker Corporation, West Allis, Wis. Machine-tool drive. 1,626,001; Apr. 26.
Kearney-Trecker Corporation. (See Kearney, E. J., and Armitage, assignors.)
Keenan, Charles G., Ojai, Calif. Illuminated sign. 1,626,286; Apr. 26.
Keeran, Charles R., assignor, by mesne assignments, to Autopoint Company, Chicago, Ill. Clip for pencils and the like. 1,625,809; Apr. 26.
Keller, Paul E. (See Daun, C. L., and Keller.)
Kellogg, Leroy D., Deerfield, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Receiving circuit. 1,626,239; Apr. 26.
Kellogg Switchboard and Supply Company. (See Kellogg, Leroy D., assignor.)
Kendall, Clyde E. (See Sutton, O. D., and Kendall.)
Kendall, William G., Newark, N. J. Vanity-case-compact holder and catch. 1,626,413; Apr. 26.
Kern, Elmer L. (See O'Neill, E. F., and Kern.)
Kersten, Samuel, Chicago, Ill. Mixing-valve support for laundry trays. 1,626,343; Apr. 26.
Kesselring, Fritz, Furth, Germany. Dynamo-electric machine. 1,626,199; Apr. 26.
Kessler, Charles A. (See Hutchens, H. O., and Kessler.)
Keywood, William, Easton, Wash. Water motor. 1,625,896; Apr. 26.
Kimura, Lawrence Y., Richmond, Calif. Pivoted-type compass. 1,626,540; Apr. 26.
Kinkead, Charles B., Huntington, W. Va. Device for use with telephones. 1,626,287; Apr. 26.
Kintzele, Julius H., St. Louis, Mo., assignor to Dryden Rubber Company, Chicago, Ill. Machine for placing washers upon the pins of rubber-heel molds. 1,626,039; Apr. 26.
Klappal, Emiel L. (See Kollman, M. L., and Klappal.)
Klein, Charles H., Jersey City, N. J., assignor to American Telephone and Telegraph Company. Cable clamp and bridle ring. 1,625,897; Apr. 26.
Klucas, Spencer E., Barry, Minn. End gate. 1,626,414; Apr. 26.
Knapp, Charles L., Shenandoah, Pa. Music-leaf turner. 1,625,898; Apr. 26.
Kohn, Chester B., South Orange, N. J. Fastening device. 1,626,138; Apr. 26.
Kollisch, Paul. (See Aldendorff, Fritz, assignor.)
Kollman, Melvin L., Sioux City, Iowa, and E. L. Klappal, Witton, S. Dak. Seed-cleaning machine. 1,625,858; Apr. 26.
Kondolf, Mathias R., Cynwyd, assignor to Boxboard Products Company, Philadelphia, Pa. Packing. 1,626,344; Apr. 26.
Koppers Company. (See Cavett, John J., assignor.)
Koske, Mike, Proberta, Calif. Combination brush, comb, and mirror. 1,626,415; Apr. 26.

Kosken, Wilho A., Boston, Mass., assignor to Steadylite Motion Picture Machine Corporation, New York, N. Y. Expansible pulley or the like. 1,626,240; Apr. 26.

Krafft, Bert H., Cambridge, Mass., assignor, by mesne assignments, to S. H. Borofsky, Brooklyn, N. Y. Storage-battery-grid pasting machine. 1,626,200; Apr. 26.

Krasa, Albert. (See Bates, A. M., and Krasa.)

Krauss, George M., Lingle, Wyo. Calf weaner. 1,626,090; Apr. 26.

Kraysler, Irving, assignor to Farber-Kraysler & Bro., New York, N. Y. Bracelet. 1,626,139; Apr. 26.

Krichbaum, Ora, Delaware, Ohio. Making a rubber article. 1,625,810; Apr. 26.

Krieger, A. Edward, et al., trustees. (See McArthur, Robert C., assignor.)

Krivoshein, Gregory G., Prague, Czechoslovakia, assignor of one-half to J. R. Freeman, Providence, R. I. Combined suspension and arch bridge. 1,626,241; Apr. 26.

Kroehler Mfg. Co. (See Beech, Alexander C., assignor.)

Kroff, Leonard D., Sterling, Ill. Mechanical toy. 1,626,040; Apr. 26.

Kuehner, Wilhelm, Providence, R. I. Chain. 1,626,416; Apr. 26.

Kuhn, Harry S., Waynesboro, Pa. Tool cabinet. 1,625,945; Apr. 26.

Kyle, Gordon R., Belleville, N. J., and B. A. Mitchell, West New Brighton, N. Y. Belt conveyer. 1,626,041; Apr. 26.

Lader, Jack, Brooklyn, N. Y., assignor to C. R. Whiting Co., Newark, N. J. Lining paper or similar article. Des. 72,519; Apr. 26.

Laird, John H., Louisville, Ky. Headlamp. 1,625,946; Apr. 26.

Lally, John, Boston, Mass. Fireproof building construction. 1,625,899; Apr. 26.

Lally, John, Great Neck, N. Y. Reenforced-concrete-floor construction. 1,625,900; Apr. 26.

Lambie, James M., and D. W. Ross, Washington, Pa. Mold for casting clay blocks and the like and method of molding. 1,625,947; Apr. 26.

Lamson Company, The. (See Maclaren, James G., assignor.)

Landis & Gyr A. G. (See Mettler, Josef, assignor.)

Lane, Alexis T., New York, N. Y. Combined cape and hat protector. 1,626,288; Apr. 26.

Lang, Niels, Vancouver, British Columbia, assignor to Lang's Daylight Limited, Vancouver, Canada. Lamp reflector. 1,625,948; Apr. 26.

Langdon, John J., Hartford, Conn. Flush valve. 1,626,289; Apr. 26.

Lange, Henry, Quincy, Ill. Combination stove. Des. 72,520; Apr. 26.

Lange, William L., New York, N. Y. Banjo. 1,625,811; Apr. 26.

Lang's Daylight Limited. (See Lang, Niels, assignor.)

Lanza, Frank, Philadelphia, Pa. Ductile wire trough for billiard tables. 1,626,242; Apr. 26.

Laro, Joseph, Fenton, Mich. Fabric material and obtaining same from cement bags. 1,626,201; Apr. 26.

La Rosa, John P., Port Chester, N. Y. Swimming device. 1,626,541; Apr. 26.

Larson, Elvin L., Aberdeen, Wash. Hydraulic brake. 1,626,542; Apr. 26.

Lauenstein, Otto, Wernigerode Harz, Germany. Wrapping device for irregularly-shaped delicate objects. 1,626,543; Apr. 26.

Lay, Charles, San Antonio, Tex. Nut guard. 1,625,901; Apr. 26.

Leddick, George S., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,626,469; Apr. 26.

Lee, Gilbert, Rockford, Ill. Straightedge instrument. 1,625,949; Apr. 26.

Lee, James I., Washington, D. C. Game. 1,626,243; Apr. 26.

Lee, U. G. & Co. Inc. (See Lee, Ulysses G., assignor.)

Lee, Ulysses G., assignor to U. G. Lee & Co. (Inc.), Chicago, Ill. Marine water-closet. 1,625,902; Apr. 26.

Lee, Ulysses G., assignor to W. G. Lee & Co. Inc., Chicago, Ill. Marine water-closet. 1,625,950; Apr. 26.

Lemon, Warren, St. Louis, Mo. Dirigible airship. 1,625,951; Apr. 26.

Lending, David M., Brooklyn, N. Y. Tassel fringe. Des. 72,521; Apr. 26.

Leon, Karl O., Lidkoping, Sweden. Roller bearing for radial and axial loads. 1,625,812; Apr. 26.

Leon, Lewicki J., West Chicago, Ill. Wall bracket for birdcages. Des. 72,522; Apr. 26.

Le Rouge, Jean, Boulogne, assignor to Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude), Paris, France. Separating gaseous mixtures. 1,626,345; Apr. 26.

Lewis, Robert S. (See Dake, C. W., and Lewis.)

Lewis-Shepard Company. (See Lovejoy, Ralph M., assignor.)

Lewis, Warren K., Newton, Mass., assignor to Standard Development Company. Distillation apparatus. 1,626,346; Apr. 26.

L'Hollier, Leslie H., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber boot. 1,626,417; Apr. 26.

Libbey-Owens Sheet Glass Company. The. (See Blair, James C., assignor.)

Libbey-Owens Sheet Glass Company, The. (See Crowley, Joseph P., assignor.)

Libbey-Owens Sheet Glass Company, The. (See Drake, John L., assignor.)

Libby, Sam H., East Orange, N. J., assignor to General Electric Company. Thrust bearing. 1,626,470; Apr. 26.

Liebenberg, Arthur J., assignor to The Warner Elevator Manufacturing Company, Cincinnati, Ohio. Elevator-leveling control. 1,626,290; Apr. 26.

Lindholm, Arthur C., Springfield, Mass. Guiding attachment for reamers. 1,626,244; Apr. 26.

Lindstrom, Andrew E., San Francisco, Calif. Apparatus for vacuumizing and sealing cans. 1,626,291; Apr. 26.

Lionel Corporation, The. (See Caruso, Louis, assignor.)

Lipman Refrigeration Company. (See Ireland, Ward S., assignor.)

Little, William M., and Jesse L. Sherman, Norphlet, Ark. Separator. 1,626,245; Apr. 26.

Ljungkull, Rolf, assignor to Harnischfeger Corporation, Milwaukee, Wis. Excavator crane. 1,625,859; Apr. 26.

Lobit, Jean M., Brooklyn, N. Y. Flue. 1,626,002; Apr. 26.

Lobit, Jean M., Staten Island, N. Y. Space band. 1,626,003; Apr. 26.

Locke, Fred M., Victor, N. Y. Glass. 1,626,042; Apr. 26.

Lofman, Charles, assignor to Roberti Bros., Los Angeles, Calif. Bed or couch spring organization. 1,626,140; Apr. 26.

Lo Forti, Joe, Fresno, Calif. Brick mold. 1,626,004; Apr. 26.

Lombard, Homer W., assignor to Art Metal Construction Company, Jamestown, N. Y. Mop mold for library-stack construction. 1,626,043; Apr. 26.

Lorant, Danes, Shreveport, La. Beverage dispenser. 1,626,544; Apr. 26.

Lovejoy, Ralph M., Boston, assignor to Lewis-Shepard Company, Watertown, Mass. Standard locking mechanism for hoisting machines. 1,626,141; Apr. 26.

Lowenstein, Harry F., and E. E. Clement, assignors to E. F. Colladay, Washington, D. C. Radio receiving apparatus. Re16,606; Apr. 26.

Lowman, John W., Chattanooga, Tenn. Paint composition. 1,625,815; Apr. 26.

Lucas, Francis F., East Orange, N. J. Photomicrographic camera. 1,625,952; Apr. 26.

Lucke, Charles E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Internal-combustion engine. 1,626,202; Apr. 26.

Lund, Joel, San Francisco, Calif. Process of and apparatus for making of fluxing materials. 1,626,292; Apr. 26.

Lundquist, Herman A., assignor of one-half to The Banting Manufacturing Company, Toledo, Ohio. Thrashing machine. 1,625,953; Apr. 26.

Lunkenheimer Company, The. (See Hehemann, Frederick H., assignor.)

Lyon, George A., Philadelphia, Pa. Automobile buffer and attachment therefor. 1,626,347; Apr. 26.

Lyon, Norman W. (See Wentworth, E. F., and Lyon.)

MacDonald, Joel W., Little Rock, Ark., assignor to W. L. Rucker, Los Angeles, Calif. Process and apparatus for manufacturing amorphous carbon, etc. 1,626,418; Apr. 26.

Mach, Milton M., Omaha, Nebr. Fountain pen. 1,625,860; Apr. 26.

Macklin, Jesse W., Anita, Iowa. Osteopathic operating table. 1,626,001; Apr. 26.

MacLaren, Fred B. (See Braselton, C. H., and MacLaren.)

MacLaren, James G., assignor to The Lamson Company, Syracuse, N. Y. Power-control apparatus for pneumatic-despatch systems. 1,625,903; Apr. 26.

Macomber, Herbert H., assignor to Flint & Walling Mfg. Co., Kendallville, Ind. Windmill. 1,626,203; Apr. 26.

Macy, Frederick S., Brooklyn, N. Y. Antidiabetic substance. 1,626,044; Apr. 26.

Madge, Francis D., Sound Beach, Conn. Spring cover. 1,625,861; Apr. 26.

Magnet-Werk G. m. b. H. Eisenach Spezialfabrik für Elektromagnet-Apparate. (See Bing, Julius, assignor.)

Majestic Manufacturing Company. (See Morley, Guilford S., assignor.)

Malmberg, Carl J., G. Surahammar, and J. G. Holanström, Saltsjo-Storangen, Sweden. Apparatus for determining the percentage of carbon in a specimen of of iron or steel. 1,626,005; Apr. 26.

Manchester, Clyde C., Toledo, Ohio, assignor to Industrial Research Corporation, Toledo, Ohio. Air cleaner. 1,625,816; Apr. 26.

Mankin, Lynn S. (See Shaffer, J. C., and Mankin.)

March, Carl, Chicago, Ill. Twine holder. 1,626,545; Apr. 26.

Marquardt, Frederick C., Milwaukee, Wis. Bed bottom. 1,625,817; Apr. 26.

Marquette Tool & Manufacturing Company. (See Glasner, R. W., and Nilson, assignors.)

Marquette Tool & Manufacturing Co. (See Rode, Fredrich J., assignor.)

Marshall, Ellsworth G. (See Caswell, R. G., and Marshall.)

Martin, Earl L., New York, N. Y. Forming news and tabloid sections from a continuous web. 1,625,862; Apr. 26.

Martin, Harry C., assignor to The Carborundum Company, Niagara Falls, N. Y. Article of bonded granular material and making the same. 1,626,246; Apr. 26.

Mason, Leon O., assignor of one-half to A. Willock, Los Angeles, Calif. Camp table. 1,626,293; Apr. 26.

Master, Albert, Park Ridge, Ill. Ball-bearing mounting. 1,626,092; Apr. 26.

Mathis, Frederick W., Lynchburg, Va., assignor to Draper Corporation, Hopedale, Mass. Shuttle-feeler thread parter and clamp. 1,626,546; Apr. 26.

Mattison Machine Works. (See Medholdt, Louis T., assignor.)

Mattson, Paul O., Denver, Colo. Folding easel. 1,625,904; Apr. 26.

Maulsby, Zene, Everett, Wash. Burial casket. Des. 72,523; Apr. 26.

Maxwell, George H. (See Westhaver, Norman J., assignor.)

McArthur, Robert C., assignor to W. O. Fredrikson, A. E. Krieger, and R. C. McArthur, trustees, Salamanca, N. Y., constituting McArthur Turnbuckle Company. Turnbuckle. 1,625,818; Apr. 26.

McArthur, Robert C., et al., trustees. (See McArthur, Robert C., assignor.)

McArthur Turnbuckle Company. (See McArthur, Robert C.)

McCaffrey, R. James. (See Smith, William J., assignor.)

McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,626,006; Apr. 26.

McCord Radiator & Mfg. Co. (See Bailey, C. B., McCord, and Wilkins, assignors.)

McCord, William W. (See Bailey, C. B., McCord, and Wilkins.)

McCree, Max A., Beaumont, Tex. Playground slide. 1,626,142; Apr. 26.

McGinty, John J., New York, N. Y. Swing. 1,626,204; Apr. 26.

McGranighan, John, Roxborough, Pa. Coin-controlled dispensing apparatus. 1,626,348; Apr. 26.

McHugh, Edward F., Kingston, Pa. Ventilating sash. 1,626,547; Apr. 26.

McLarty, Gordon, Rochester, N. Y. Apparatus for applying nonslipping material to floor coverings. 1,625,863; Apr. 26.

McNeely, Fred W., Evansville, Ind. Grease gun. 1,625,819; Apr. 26.

McNish, Alexander, assignor of one-half to The Automatic Bottle Machine Corporation, Limited, London, England. Machine for making bottles or other articles of glass. 1,626,548; Apr. 26.

McPherson, Harry L., Memphis, Tenn., assignor to A. Schrader's & Son, Incorporated, Brooklyn, N. Y. Combination dust cap and tire gauge. 1,626,294; Apr. 26.

Medholdt, Louis T., assignor to Mattison Machine Works, Rockford, Ill. High-speed safety cutter head. 1,626,247; Apr. 26.

Melin, George C., Galesburg, Ill. Ballast digging and cleaning machine. 1,625,864; Apr. 26.

Mell, Tod J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Strip-vulcanizing apparatus and method. 1,626,419; Apr. 26.

Merica, Paul D., Westfield, and J. S. Vanick, Elizabeth, N. J., assignors to The International Nickel Company, New York, N. Y. Alloy. 1,626,248; Apr. 26.

Merriman, Thomas C., Tunstall, England, assignor to William S. Pitcairn Corporation, New York, N. Y. Plate or similar article. Des. 72,524; Apr. 26.

Messer, Edward, Pittsburgh, Pa. Candy-jar holder. 1,626,205; Apr. 26.

Mettler, Josef, assignor to the Firm Landis & Gyr A. G., Zug, Switzerland. Coin device for prepayment meters. 1,626,143; Apr. 26.

Metzger, Constance I., administratrix. (See Wood, E. K., and Metzger.)

Metzger, John. (See Wood, E. K., and Metzger.)

Michaels, John I., and L. R. Watkins, assignors to The Watkins Manufacturing Company, Wichita, Kans. Casting jig. 1,626,144; Apr. 26.

Michie, Arthur C. (See Davidson, W. B., Michie, and Muddiman.)

Miller, Arthur N., Henryetta, Okla. Standing valve. 1,626,549; Apr. 26.

Miller, Frederick H., Portland, Oreg. Vegetable cutter. 1,626,550; Apr. 26.

Miller, Harold G., Homer, assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Collapsible vehicle top. 1,626,551; Apr. 26.

Miller, H. H., Industries Company, The. (See Broadfield, Ward H., assignor.)

Miller, Lenard P. (See Akers, E., Mims, Moutray, and Miller.)

Miller, Otis A., assignor to A. G. Bush, Davenport, Iowa. Treating table. 1,626,471; Apr. 26.

Mills, Mortimer B., Chicago, Ill. Toy race course. 1,626,420; Apr. 26.

Milwaukee Gas Specialty Company. (See Spahr, Otto, assignor.)

Mims, Charley C. (See Akers, E., Mims, Moutray, and Miller.)

Minneapolis Heat Regulator Company. (See Denison, Frederick S., assignor.)

Mirrey, James. (See Coates, F., and Mirrey.)

Mitchell, Benjamin A. (See Kyle, G. R., and Mitchell.)

Mitchell, Charlie B., Los Angeles, Calif. Door-holding device. 1,626,007; Apr. 26.

Mitchell, Jonas, Washington, D. C. Detachable ladder for railway cars. 1,626,145; Apr. 26.

Mittelland Gummiwerke Aktiengesellschaft. (See Hergershausen, Katharina, assignor.)

Mitton, Robert E., Salt Lake City, Utah. Valve. 1,626,045; Apr. 26.

Moisselle, David B., Philadelphia, Pa. Rail joint. 1,626,349; Apr. 26.

Mole, Peter, jr., Schenectady, N. Y., assignor to General Electric Company. Feed for arc lamps. 1,626,472; Apr. 26.

Moore, Mary B., et al. (See Moore, Samuel M., assignor.)

Moore, Samuel M., assignor of one-sixth to W. J. Moore, Sumner, and one-sixth to R. A. Welton, one-sixth to M. B. Moore, one-sixth to B. R. Sagers, and one-sixth to B. Sagers, Lawrenceville, Ill. Dancing figure toy. 1,625,955; Apr. 26.

Moore, William J., et al. (See Moore, Samuel M., assignor.)

Moran, Robert B., and A. F. Spengler, assignors to Spengler Core Drilling Company, Los Angeles, Calif. Rotary core drill. 1,626,249; Apr. 26.

Mordin, Ralph, assignor to The Relay Automatic Telephone Company, Limited, London, England. Automatic and semiautomatic telephone system. 1,626,206; Apr. 26.

Morgenroth, Charles R. (See Morgenroth, Edwin and C.)

Morgenroth, Edwin L., Kewaskum, and C. R. Morgenroth, Milwaukee, Wis. Quack-grass-root rake. 1,626,046; Apr. 26.

Morley, Guilford S., University City, assignor to Majestic Manufacturing Company, St. Louis, Mo. Gas stove. 1,626,047; Apr. 26.

Morris, George A., and C. S. Pallot, Port Haney, British Columbia, Canada. Recording device for farm use. 1,626,473; Apr. 26.

Morrison, Simon, Brooklyn, N. Y. Double-swinging-mirror compact case. 1,626,474; Apr. 26.

Morrow, Louis, Ontario, Calif. Railway-track-crossing structure. 1,626,146; Apr. 26.

Morton, Harry U., Chicago, Ill., assignor to Morton Manufacturing Co. Car diaphragm and forming the same. 1,626,048; Apr. 26.

Morton Manufacturing Co. (See Morton, Harry U., assignor.)

Moser, Alexander, Bayside, N. Y. Automatic valve. 1,626,147; Apr. 26.

Mosher, Sherman L., Coffeeville, Miss. Seed-gathering device. 1,626,207; Apr. 26.

Mt. Carmel Mfg. Co., The. (See Goodman, Joseph, assignor.)

Moutray, Fred L. (See Akers, E., Mims, Moutray, and Miller.)

Muddiman, Ernest W. (See Davidson, W. B., Michie, and Muddiman.)

Mulholland, John B., and A. F. Borschel, Buffalo, N. Y. Safety target attachment for air rifles. 1,625,956; Apr. 26.

Muller-Thym, Bernard, Kansas City, Mo. Sanctuary lamp. 1,626,008; Apr. 26.

Multiposter Company. (See Schweiger, William F., assignor.)

Munroe, Trendway B., assignor to Dahlberg & Company, Inc., Chicago, Ill. Flooring material. 1,626,117; Apr. 26.

Murphy, Gilbert, and W. A. Simond, assignors to Acme Knitting Machine & Needle Company, Franklin, N. H. Knitting hosiery. 1,626,049; Apr. 26.

Murray, Richard H., Manchester, England. Light-reflecting device or unit. 1,625,905; Apr. 26.

Murray, Timothy J., Covington, Ind. Folding crate. 1,626,009; Apr. 26.

Musgrave, Joseph L. (See Crittall, R. G., and Musgrave.)

Mustain, John E. (See Sullins, H. L., and Mustain.)

Muter, Leslie F., Chicago, Ill. Variable high-resistance element and making the same. 1,626,421; Apr. 26.

Mutispaugh, Charles A., Plant City, Fla. Latch. 1,626,422; Apr. 26.

Mystic Washer Company. (See Hegarty, Daniel A., assignor.)

Naamlooze Vennootschap Philips' Gloeilampenfabrieken. (See Holst, G., and Bouwers, assignors.)

Nagel, Theodore, Brooklyn, N. Y. Binding fuel material and producing same. 1,626,208; Apr. 26.

National Carton Company. (See Yngve, Victor, assignor.)

National Dump Car Company. (See Nelkirk, John O., assignor.)

National Lead Company. (See Newnam, William E., assignor.)

Naylor, Howard W., Morris, N. Y. Dilator. 1,625,906; Apr. 26.

Neasham, John W., Des Moines, Iowa. Riser attachment for meat-slicing machines. 1,626,093; Apr. 26.

Negbaur, Harry, New York, N. Y., assignor to E & J Bass, Incorporated. Pocket flask. Des. 72,525; Apr. 26.

Nelkirk, John O., Lombard, assignor to National Dump Car Company, Chicago, Ill. Car. 1,626,010; Apr. 26.

Nelson, John H., Chicago, Ill., assignor, by mesne assignments, to Ecco Manufacturing Company. Timing switch. 1,626,475; Apr. 26.

Newnam, William E., Collinsville, Ill., assignor to National Lead Company, Jersey City, N. J. Pig-lead truck. 1,626,350; Apr. 26.

New York Air Brake Company, The. (See Wentworth, E. F., and Yyon, assignors.)

New York Coil Company. (See Rhoades, Lewis T., assignor.)
Nicholls, Gilbert E., Edgewood, assignor to The Swingrite Co., Inc., Providence, R. I. Golf-club shaft. 1,626,476; Apr. 26.
Nicholls, Gilbert E., Edgewood, assignor to The Swingrite Co., Inc., Providence, R. I. Golf-club shaft. 1,626,477; Apr. 26.
Nilson, Olof G. (See Glasner, R. W., and Nilson.)
Nohse, William R. E., New York, N. Y. Lubricating apparatus. 1,626,478; Apr. 26.
North American Lace Company. (See Siner, Raymond K., assignor.)
Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Flexible adjustable coupling. 1,626,351; Apr. 26.
Obrist, Robert, Weehawken, N. J. Gaming device. 1,626,148; Apr. 26.
Odell, Edwin, Central City, Nebr. Obstetrical instrument. 1,626,149; Apr. 26.
Old Colony Trust Company, trustee. (See Toney, George W., assignor.)
Olin, John M., and J. B. Smith, Alton, assignors to Western Cartridge Company, East Alton, Ill. Method and apparatus for stripping detonator igniter terminals. 1,626,119; Apr. 26.
Olin, John M., V. L. Davis, and J. B. Smith, Alton, assignors to Western Cartridge Company, East Alton, Ill. Method and apparatus for making igniter connections for detonators. 1,626,118; Apr. 26.
Oliphant, John, Chicago, Ill., assignor to Sullivan Machinery Company. Pumping system. 1,626,250; Apr. 26.
Olson, Andrew, assignor to The Cleveland Folding Machine Company, Cleveland, Ohio. Feed table. 1,626,352; Apr. 26.
Olson, Andrew, assignor to The Cleveland Folding Machine Company, Cleveland, Ohio. Paper feeder. 1,626,353; Apr. 26.
O'Neill, Eugene F., and E. L. Kern, Minneapolis, Minn. Needle vendor in the form of a miniature phonograph. 1,626,011; Apr. 26.
Ordog, Gergely, Ellis Island, N. Y. Elevator safety stop. 1,626,583; Apr. 26.
Ostroff, Sidney, Lowell, Mass. Gas mixer. 1,626,423; Apr. 26.
Oswald, Earl P., Detroit, Mich., assignor, by mesnes assignments, The Hoover Company, North Canton, Ohio. Electromagnetic switch. 1,625,820; Apr. 26.
Oulton, Daniel L., Everett, Mass., assignor to Oulton Manufacturing Corporation. Safety cranking device for internal-combustion motors. 1,626,209; Apr. 26.
Oulton Manufacturing Corporation. (See Oulton, Daniel L., assignor.)
Pabodie, Robert J., Maywood, Ill., assignor to The Griscom Russell Company, New York, N. Y. Subcooling condenser. 1,625,821; Apr. 26.
Pacific Foundry Company. (See Fowler, John S., assignor.)
Packard Motor Car Company. (See Andrew F. W., and Tibbetts, assignors.)
Packard Motor Car Company. (See Tibbetts, Milton, assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Page, Robert R., New York, N. Y. Top adjustable banjo tailpiece. 1,626,094; Apr. 26.
Paget, Wm W., Virginia City, Nev. Propeller. 1,626,424; Apr. 26.
Paige-Detroit Motor Car Company. (See Reed, Ned S., assignor.)
Pallot, Charles S. (See Morris, G. A., and Pallot.)
Palm, Max J., jr., Cincinnati, Ohio. Plate or similar article. Des. 72,526; Apr. 26.
Parda, Stanley, Middletown, Conn. Changeable picture frame. 1,626,150; Apr. 26.
Pastrengo, Vittorio, San Francisco, Calif. Window. 1,626,479; Apr. 26.
Patscheider, Walter A., Auburndale, Mass. Electric heater for steam boilers and superheaters etc. 1,626,295; Apr. 26.
Pawling, George F., Philadelphia, Pa. Furring construction. 1,625,865; Apr. 26.
Pawling, George F., Philadelphia, Pa. Supporting ceiling furring. 1,625,866; Apr. 26.
Peller, Karl E., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Fabricating glassware in suction-fed molds. 1,626,575; Apr. 26.
Pelsue, Teresa, G., Wentworth, Mo. Nursing-bottle protector. 1,626,425; Apr. 26.
Pennington, Harley D., assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Pipe-threading mechanism. 1,626,251; Apr. 26.
Penrod, John. (See Simons, R. B., and Penrod.)
Perkins, Lucius J., Los Aangeles, Calif., assignor to General Electric Company. Amplifying system. 1,626,480; Apr. 26.
Peters, Caroline A., Los Angeles, Calif. Doll. Des. 72,527; Apr. 26.
Peterson, Edwin O., Elgin, Nebr. Joining materials. 1,625,907; Apr. 26.
Pfeiffer, Alice L. (See Bagley, James, assignor.)
Phillips, Albanus, sr., et al. (See Winterling, Williams F., assignor.)
Phillips, Leon A., New York, N. Y. Garment hanger. 1,626,210; Apr. 26.
Phillips, Levi B., sr., et al. (See Winterling, William F., assignor.)
Phoenix Burner Corporation, The. (See Egloff, Frank S., assignor.)
Photometric Products Corporation. (See Rundell, Rupert E., assignor.)
Pilcher, John V., Louisville, Ky. Separable button. 1,626,296; Apr. 26.
Pilla, Raphael A., Philadelphia, Pa. Drawer stop. 1,626,354; Apr. 26.
Piotrowski, John B., Chippewa Falls, Wis. Boot or shoe. 1,626,426; Apr. 26.
Pitcairn, William S., Corporation. (See Merriman, Thomas C., assignor.)
Platt, Henry. (See Platt, John, W., and H.)
Platt, John, Harrow, England, and W. and H. Platt, Roubaix, France. Carding machine. 1,625,868; Apr. 26.
Platt, William. (See Platt, John, W., and H.)
Plaut, Antoine P., assignor of one-half to Roberts Brass Manufacturing Company, Detroit, Mich. Ajutage. 1,625,867; Apr. 26.
Plum, Stephen H., 2d, Madison, N. J., assignor to American Type Founders Company. Facsimile-printing attachment. 1,625,908; Apr. 26.
Plympton, Frederic K., assignor to N. D. Plympton, Brewster, N. Y. Machine for making bottle closures. 1,625,860; Apr. 26.
Plympton, Naomi D. (See Plympton, Frederic K., assignor.)
Pollak, Arnold A. (See Swanson, J. A., and Pollak.)
Pölsson, Bror. (See Reehsing, Ludwig, assignor.)
Pontiac Tractor Company. (See Wright, Norman A., assignor.)
Poole, Martain J. (See Reeves, W. B., and Poole.)
Posey, Mack. (See Haas, E. A., and Posey.)
Postindex Company. (See Attwood, Charles E., assignor.)
Potter, Ralph K., New York, N. Y., assignor to American Telephone and Telegraph Company. Radio receiver and trouble alarms. 1,625,822; Apr. 26.
Potter, Ralph K., New York, N. Y., assignor to American Telephone and Telegraph Company. Radio receiver and trouble alarms. 1,625,823; Apr. 26.
Power Specialty Company. (See Woolley, Harold O., assignor.)
Pratt, Oscar, Laurier, Wash. Filling devices. 1,626,050; Apr. 26.
Pratt Read Player Action Company. (See Fisher, Stanley L., assignor.)
Prescott, Sydney I., New York, N. Y., and F. J. Rummler, Lyndhurst, N. J. Wheel. 1,626,355; Apr. 26.
Price, James W., Tulsa, Okla. Casing puller. 1,625,909; Apr. 26.
Pride of Petaluma Brooder Stove Company. (See Frengle, F., and Rohan, assignors.)
Pro-phy-lac-tic Brush Company. (See Elliot, William S., assignor.)
Pyle-National Company, The. (See Dake, C. W., and Levis, assignors.)
Quaker City Iron Works. (See Jensen, James A., assignor.)
Quillen, Wrignol E., assignor of one-third to F. Spitz, Pittsburgh, Pa. Fountain soldering iron. 1,626,552; Apr. 26.
Quinn, Patrick A., Clifton, N. J. Automobile brake. 1,626,151; Apr. 26.
Radtke, Albert, Berlin, Germany. Portable tree-felling saw. 1,626,553; Apr. 26.
Ramage, Alexander S., et al., trustees. (See Ramage, Alexander S., assignors.)
Ramage, Alexander S., assignor to F. F. Beall, A. S. Ramage, and B. Briscoe, trustees, Detroit, Mich. Agitator. 1,626,297; Apr. 26.
Rambo, Joseph F., Pomona, Calif. Hydraulic motor. 1,626,298; Apr. 26.
Ramsburg, George S., Somersworth, N. H. Sectional florist bench. 1,626,095; Apr. 26.
Ramsey, Robert P., assignor to Clyde Iron Works, Duluth, Minn. Cable block. 1,625,910; Apr. 26.
Rasmussen, Carl, Menlo Park, Calif. Wood-splitting machine. 1,626,152; Apr. 26.
Ratcliff, William D., London, England, assignor to Inventors' Trading Company, Limited, London, England. Guard for the wheels of vehicles. 1,625,824; Apr. 26.
Reaveley, Emmett, Chicago, Ill. Woodwork shaper table. 1,626,153; Apr. 26.
Recording Thermometer Company. (See Frantz, Charles T., assignor.)
Reed, Harold V., assignor to The Borg & Beck Company, Chicago, Ill. Friction clutch. 1,626,427; Apr. 26.
Reed, James H., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Applying fasteners. 1,625,957; Apr. 26.
Reed, James H., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Stapling machine. 1,625,958; Apr. 26.
Reed, Ned S., assignor to Paige-Detroit Motor Car Company, Detroit, Mich. Cast-wheel construction. 1,626,211; Apr. 26.
Reehsing, Ludwig, Bremen, Germany, assignor to Bror Pölsson, Malmö, Sweden. Absorption refrigerator. 1,626,564; Apr. 26.

Reeves, Milton O., assignor to Reeves Pulley Company, Columbus, Ind. Controller for variable-speed transmission. 1,626,299; Apr. 26.
Reeves, Paul B., assignor to Reeves Pulley Company, Columbus, Ind. Splice block for V-shaped transmission. 1,626,300; Apr. 26.
Reeves, Paul B., assignor to Reeves Pulley Company, Columbus, Ind. Controlling the speed of driven members. 1,626,584; Apr. 26.
Reeves Pulley Company. (See Reeves, Milton O., assignor.)
Reeves Pulley Company. (See Reeves, Paul B., assignor.)
Reeves, William B., and M. J. Poole, Whitehead, N. C. Apparatus for washing clothes. 1,626,154; Apr. 26.
Reichenbach, Carl L., Yonkers, N. Y., assignor to Eclipse Air Brush Company, Newark, N. J. Spray gun. 1,626,096; Apr. 26.
Rekewitz, Charles, Racine, Wis. Lavatory. 1,626,155; Apr. 26.
Relay Automatic Telephone Company, The. (See Mordin, Ralph, assignor.)
Reliance Elevator Co. (See Anderson, John C. A., assignor.)
Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Industrial truck. 1,626,555; Apr. 26.
Remington Typewriter Company. (See Barney, Edwin E., assignor.)
Renee, Joseph C., Libertyville, Ill. Checkrow planter. 1,626,012; Apr. 26.
Reynolds Gas Regulator Co. (See Gaunt, F., Reynolds, and Hughes, assignors.)
Reynolds, Myron B. (See Gaunt, F., Reynolds, and Hughes.)
Reynolds, William G., Grandview, Manitoba, Canada. Printing machine. 1,625,959; Apr. 26.
Reyrolle, A., & Company. (See Coates, F., and Mirrey, assignors.)
Rhoades, Lewis T., Mont Clare, Pa., assignor to New York Coil Company, New York, N. Y. Fixed condenser. 1,626,356; Apr. 26.
Rhodes, Russell I., North Attleboro, Mass. Jewelry-box hinge. 1,626,301; Apr. 26.
Richards, Harold L., Crystal Falls, Mich. Golf tee. 1,625,911; Apr. 26.
Ridgway, Ellis B. (See Ridgway, William H., assignor.)
Ridgway, William H., assignor to W. H. and E. B. Ridgway, Coatesville, Pa. Steam hydraulic system. 1,626,556; Apr. 26.
Ridler, Harry C., Minneapolis, Minn. Cooling device for drinking fountains. Re16,605; Apr. 26.
Rinebolt, Guy S., sr., Huntington, Ind. Fishline reel. 1,626,357; Apr. 26.
Robbert, Hubert W., Campbell, Nebr. Stove-fuel igniter. 1,625,870; Apr. 26.
Roberti Bros. (See Lofman, Charles, assignor.)
Roberts Brass Manufacturing Company. (See Plaut, Antoine P., assignor.)
Robertson, Henry, and H. Hirdler, Long Prairie, Minn. Boat-anchor hoist. 1,625,871; Apr. 26.
Robinson, Robert W., jr., et al. (See Johnson, Alvin L., assignor.)
Robinson, William H. (See Duffie, Allen M., assignor.)
Rode, Fredrich J., assignor to Marquette Tool & Manufacturing Co., Chicago, Ill. Die cushion. 1,626,051; Apr. 26.
Rodger Ballast Car Company. (See Hindahl, David, assignor.)
Roeder, Julius, and W. Wellmann, Witten, Germany. Rolling tubes. 1,626,481; Apr. 26.
Rogers, Cephas B., Danbury, Conn. Single electric-light bracket fixture. Des. 72,528; Apr. 26.
Rogers, Cephas B., Danbury, Conn. Twin electric-light bracket fixture. Des. 72,529; Apr. 26.
Rohan, Francis D. (See Frengle, F., and Rohan.)
Rolaff, Walter G. E., assignor to Rotary Compressor Company, Belleville, Ill. Air compressor or pump. 1,626,557; Apr. 26.
Rolph, Benjamin M., Dixon, Ill. Excavating machine. 1,625,912; Apr. 26.
Rose, James, Olean, N. Y. Spindle retainer. 1,626,252; Apr. 26.
Rosenblum, Morris, Pittsfield, Mass. Pressing apparatus. 1,626,253; Apr. 26.
Ross, David E., Lafayette, Ind. Compensating gearing. 1,626,156; Apr. 26.
Ross, Donald W. (See Lamble, J. M., and Ross.)
Rossman, Agnes R., Scotch Plains, N. J. Service door. 1,626,157; Apr. 26.
Rost, Robert W., Newark, N. J., assignor of one-half to A. F. Bigger, New York, N. Y. Playing ball. 1,626,302; Apr. 26.
Rotary Compressor Company. (See Roloff, Walter G. E., assignor.)
Roth, Herman, Wauwatosa, Wis. Plumbing fixture. 1,626,255; Apr. 26.
Rothmann, Albert, Heidelberg, and H. Stein, Mannheim, assignors to C. F. Boehringer & Soehne G. m. b. H., Mannheim-Waldhof, Germany. Making bisalkyl-xanthogens. 1,626,558; Apr. 26.
Röwer, Fritz. (See Röwer, Heinrich and F.)
Röwer, Heinrich and R., Blender, Germany. Attachment for plows. 1,626,358; Apr. 26.
Rowland, Jasper M., Niagara Falls, assignor to Hooker Electrochemical Company, New York, N. Y. Liquid-weighing apparatus. 1,625,825; Apr. 26.
Roy, Joseph W., assignor of fifty-one one-hundredths to P. Delage, Detroit, Mich. Valve-seat grinder. 1,626,212; Apr. 26.
Royal, Charles B., Chicago, Ill. Lubricator for railway journal boxes. 1,626,428; Apr. 26.
Rozier, Honoré, Marseille, France. Universal woodworking machine for carpenters, joiners, and cabinetmakers. 1,626,559; Apr. 26.
Rucker, Winfred L. (See MacDonald, Joel W., assignor.)
Rudge-Whitworth Limited. (See Coquille, Emile H., assignor.)
Rummler, Francis J. (See Prescott, S. I., and Rummler.)
Rundell, Rupert E., Rockville Center, N. Y., assignor to Photometric Products Corporation. Color-sorting machine. 1,626,359; Apr. 26.
Ruoff, Frederick, Irvington, N. J., assignor to H. N. Smith, New York, N. Y. Vending machine. 1,626,429; Apr. 26.
Russell, Walter S., Los Angeles, Calif. Material-handling device. 1,625,913; Apr. 26.
Russell, Walter S., Los Angeles, Calif. Material-handling device. 1,625,960; Apr. 26.
Ryder, Harry M. (See Grondahl, L. O., and Ryder.)
Sabourin, Jean B. (See Smith, C. F., and Sabourin.)
Sagers, Bert, et al. (See Moore, Samuel M., assignor.)
Sagers, Bonnie R., et al. (See Moore, Samuel M., assignor.)
Saikawa, Sakuhei, Higashinojiri-Mura, Japan. Arrangement for transforming direct-current voltage. 1,626,097; Apr. 26.
St. John, Ancel, Brooklyn, N. Y., assignor to Union Carbide & Carbon Research Laboratories, Inc. Producing homogeneous X-rays and apparatus therefor. 1,626,306; Apr. 26.
Sakowski, Hugo K., New York, N. Y. Pin. 1,626,303; Apr. 26.
Sanders, Allen C., Erie, Pa. Ellipsograph. 1,626,430; Apr. 26.
Sandvig, Naford B., Grafton, N. Dak. Grain separator. 1,626,585; Apr. 26.
Sargent & Company. (See Sargent, Edward R., assignor.)
Sargent & Company. (See Shaw, John H., assignor.)
Sargent, Edward R., assignor to Sargent & Company, New Haven, Conn. Sliding bolt. 1,626,482; Apr. 26.
Sausen, Bert R., and H. D. Binks, assignors to Binks Spray Equipment Co., Chicago, Ill. Spray cooling. 1,626,360; Apr. 26.
Schaefer, August C., Portland, Oreg. Can opener of the nipper type. 1,626,052; Apr. 26.
Schepper, Adam, and P. Schroeder, Bay City, Mich. Rolling radiator shutter. 1,626,098; Apr. 26.
Scheurer, R. E. (See Schlemeyer, Otto, assignor.)
Schlacks, Henry J., Chicago, Ill. Combination window. 1,625,872; Apr. 26.
Schlemeyer, Otto, assignor of one-half to R. E. Scheurer, Electra, Tex. Hydraulic jack. 1,626,158; Apr. 26.
Schmidt, Maximilian P., Biebrich-on-the-Rhine, Germany, assignor, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y. Manufacture of vat dyestuffs. 1,625,826; Apr. 26.
Schmitt, Frank R., Brooklyn, N. Y., assignor to American Machine and Foundry Company. Shelling coconuts. 1,626,361; Apr. 26.
Schmitt, Henry J., Emsworth Borough, assignor of one-half to W. M. Young, Avalon, Pa. Air moistening and cleaning device. 1,626,159; Apr. 26.
Schmitz, William, assignor to C. R. Whiting Co., Newark, N. J. Lining paper or similar article. Des. 72,530; Apr. 26.
Schneider & Cie. (See Schneider, Eugène, assignor.)
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Transmitting apparatus utilizing the principle of the Wheatstone bridge. 1,626,560; Apr. 26.
Schrader's, A., & Son, Incorporated. (See McPherson, Harry L., assignor.)
Schroeder, Paul. (See Schepper, A., and Schroeder.)
Schwade, Karl. (See Gedien, P., and Schwade.)
Schwalberg, Abraham, Brooklyn, N. Y. Removable wristwatch bracelet. 1,626,160; Apr. 26.
Schwarzmann, Leon, New York, N. Y. Automatic embroidering machine. 1,626,256; Apr. 26.
Schweigert, William F., Buffalo, N. Y. Closure for containers. 1,626,099; Apr. 26.
Schweiger, William F., assignor to Multiposter Company, Incorporated, Rochester, N. Y. Stamp-dispensing machine. 1,625,827; Apr. 26.
Scott, David T., Mitchells Island, Vancouver, Canada. Heavy-oil vaporizer. 1,626,561; Apr. 26.
Scott, Henry D. (See Spring, Daniel T., and S. E., assignors.)
Scott, Philip L., Three Oaks, Mich., assignor to Super Diesel Tractor Corporation, La Porte, Ind. Governing device for internal-combustion motors. 1,626,053; Apr. 26.
Seeck, Ferdinand W., Lebanon, Oreg. Differential. 1,626,120; Apr. 26.
Seede, John A., Schenectady, N. Y., assignor to General Electrical Company. Electric furnace. 1,626,431; Apr. 26.
Seibt, Georg, Berlin-Schoneberg, Germany. Making thin-metal shapes. 1,625,914; Apr. 26.
Seigman, Harry, New York, N. Y. Adjustable phonograph repeater. 1,626,100; Apr. 26.
Seigman, Harry, New York, N. Y. Rest for sadiron. 1,626,101; Apr. 26.
Service Bureau, Inc. (See Cobb, Charles H., assignor.)

Sexton, Augustus H., assignor to D. L. Short, Philadelphia, Pa. Hair curling and waving device. 1,626,254; Apr. 26.

Shaffer, John C., and L. S. Mankin, assignors to Tulsa Valve Company, Tulsa, Okla. Water gauges for boilers. 1,625,828; Apr. 26.

Shald, Bruce J., O'Neill, Nebr. Electric signal for railway crossings, public highways, and the like. 1,625,873; Apr. 26.

Sharpless, Stewart L., Milwaukee, Wis. Tripping mechanism for printing machinery. 1,626,304; Apr. 26.

Sherer, William T., Chicago, Ill. Counter. 1,626,013; Apr. 26.

Sherman, Carroll J. and C. H., Houston, Tex. Oil burner. 1,625,961; Apr. 26.

Sherman, Charles H. (See Sherman, Carroll J. and C. H.)

Sherman, Jesse L. (See Little, W. M., and Sherman.)

Sherrod, William H., Los Angeles, Calif. Toy exerciser. 1,626,161; Apr. 26.

Short, David L. (See Sexton, Augustus H., assignor.)

Short, Hugh O., Rochester, England. Elastically connecting landing gear to aircraft. 1,626,483; Apr. 26.

Showers, Joseph R., Shelbyville, Ind. Loud-speaking wireless amplifier. 1,626,102; Apr. 26.

Shuell, Frank W., assignor to Ever Hot Heater Company, Detroit, Mich. Gas valve. 1,625,874; Apr. 26.

Shur-On Standard Optical Company. (See Du Paul, George H., assignor.)

Shaw, John H., assignor to Sargent & Company, New Haven, Conn. Strike plate. 1,626,432; Apr. 26.

Shaw, Stanley W., Galesburg, Kans. Garden cultivator. 1,625,829; Apr. 26.

Sibley, Edwin J., Westbury, N. Y. Friction casement-window adjuster. 1,625,915; Apr. 26.

Siegel, Maude, assignor to Franklin Simon & Co., Inc., New York, N. Y. Dress. Des. 72,531; Apr. 26.

Silber, Walter, Brooklyn, assignor to Special Stamping and Manufacturing Co., Inc., New York, N. Y. Bed-post lock. 1,626,121; Apr. 26.

Silten, Ernst, Berlin, Germany. Making therapeutic materials. 1,626,562; Apr. 26.

Simon, Friedrich, Freiburg-Breisgau, Germany. Parachute. 1,626,563; Apr. 26.

Simmons, George H., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,626,103; Apr. 26.

Simond, Walter A. (See Murphy, G., and Simond.)

Simons, Roy B., and J. Penrod, Okmulgee, Okla. Tubing anchor. 1,626,162; Apr. 26.

Simpson, Christine M. (See Waterbor, Elmer F., assignor.)

Siner, Raymond K., assignor to North American Lace Company, Philadelphia, Pa. Headband. 1,626,433; Apr. 26.

Slater, Dick C., Latrobe, Pa. Combined seat support, table, and luggage carrier for automobiles. 1,625,916; Apr. 26.

Smith, Clinton F., Attleboro, and J. B. Sabourin, Norton, Mass. Ornamenting machine. 1,626,014; Apr. 26.

Smith, Edgar J., Cardiff, Wales. Loading hopper. 1,626,122; Apr. 26.

Smith, Franklin J., Santa Clara, Calif. Swimming pad. 1,626,163; Apr. 26.

Smith, H. N. (See Rnoff, Frederick, assignor.)

Smith, Howard W., Ellwood City, Pa. Pipe-threading die. 1,625,830; Apr. 26.

Smith, Hubert C., St. Louis, Mo. Mattress-filling machine. 1,626,434; Apr. 26.

Smith, John B. (See Olin, J. M., and Smith.)

Smith, John B. (See Olin, J. M., Davis, and Smith.)

Smith, Ralph E., R. J. Arnold, and J. C. Gay, assignors to The Gallon Metallic Vault Company, Gallon, Ohio. Fastening device. 1,625,962; Apr. 26.

Smith, Thomas J. (See Weideman, George C., assignor.)

Smith, William J., assignor to R. J. McCaffrey, Philadelphia, Pa. Pump. 1,626,484; Apr. 26.

Snarry, John W., assignor to The Gear Grinding Company, Limited, Birmingham, England. Indexing mechanism for grinding and other machines. 1,626,564; Apr. 26.

Snyder, Simon, assignor to Sprout, Waldron & Co., Muncy, Pa. Feeding and mixing machine connected in gangs. 1,625,917; Apr. 26.

Snyder, Theodore J., Chicago, Ill. Sealing gasket. 1,625,963; Apr. 26.

Societe Belge des Produits Rationnels. (See Gougnard, Henri C. L., assignor.)

Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude. (See Le Rouge, Jean, assignor.)

"Society of Chemical Industry in Basle." (See Straub, Fritz, assignor.)

Sorensen, Henry, San Francisco, Calif. Construction of fireproof buildings. 1,626,164; Apr. 26.

Spahr, Howard A., Milwaukee, Wis. Electric switch. 1,626,165; Apr. 26.

Spahr, Otto., Philadelphia, Pa., assignor, by mesne assignments, to Milwaukee Gas Specialty Company, Milwaukee, Wis. Flash igniter for gas burners. 1,625,964; Apr. 26.

Spake, Richard W., assignor to Comstock-Castle Stove Company, Quincy, Ill. Heater. Des. 72,532; Apr. 26.

Special Stamping and Manufacturing Co. (See Silber, Walter, assignor.)

Speicher, John K., Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del. Oxidized pine oil for pigments. 1,626,362; Apr. 26.

Spengler, Arthur F. (See Moran, R. B., and Spengler.)

Spengler Core Drilling Company. (See Moran, R. B., and Spengler, assignors.)

Sperry, Elmer A., Brooklyn, N. Y. Gravity bomb. 1,626,363. Apr. 26.

Sperry, Elmer A., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Gyrocompass relay transmitter. 1,626,123; Apr. 26.

Sperry Gyroscope Company, The. (See Sperry, Elmer A., assignor.)

Spitz, Frances. (See Quillen, W. E., assignor.)

Splitdorf-Bethlehem Electrical Company. (See Thompson, Olof, assignor.)

Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)

Sprague, Frank D., Brooklyn, N. Y. Automatic brake-control apparatus. 1,626,586; Apr. 26.

Sprenger, Dr. Otto, Patentverwertung Jirotka mit beschränkter Haftung. (See Jirotka, Bohumil, assignor.)

Sprigg, Robert W. (See Fain, F. E., and Sprigg.)

Spring, Daniel T., and S. E., Wheeling, W. Va., assignors of two-thirds to H. D. Scott, Wheeling, W. Va. Scraper for rolled plates. 1,626,435; Apr. 26.

Spring, Samuel E. (See Spring, Daniel T. and S. E.)

Sprout, Waldron & Co. (See Snyder, Simon, assignor.)

Stabler, Julia, New Brunswick, N. J. Rug. Des. 72,533; Apr. 26.

Stair, William D., Mount Union, Pa. Seat pad for sportmen's coats. 1,626,166; Apr. 26.

Standard Development Company. (See Clark, Edgar M., assignor.)

Standard Development Company. (See Lewis, Warren K., assignor.)

Standard Oil Company. (See Atwell, Harold V., assignor.)

Standard Oil Company. (See Engbrecht, Herman J., assignor.)

Standard Oil Company of California. (See Anfenger, Maximilian B., assignor.)

Stanton, Edward F., Los Angeles, Calif. Marking exhibitor. 1,626,565; Apr. 26.

Stark, Harold M., Highland Park, Mich. Apparatus and process for leeching, filtering, and absorbing gases and the like. 1,625,831; Apr. 26.

Starr, Frank F., assignor to Delco-Light Company, Dayton, Ohio. Engine. 1,626,364; Apr. 26.

Steadylite Motion Picture Machine Corporation. (See Kosken, Wilho A., assignor.)

Steel Products Company, The. (See Crawford, Frederick C., assignor.)

Stein, Charles E., Brea, Calif. Bumper. 1,626,566; Apr. 26.

Stein, Helmut. (See Rothmann, A., and Stein.)

Stein, Mitchell A., Anderson, S. C. Circuit-controlling apparatus. 1,625,832; Apr. 26.

Steinbrecht, Hans S., New York, N. Y. Stabilizer for aircraft. 1,626,567; Apr. 26.

Stenkvist, Emil, Ludvika, assignor to Allmanna Svenska Elektriska Aktiebolaget, Vasteras, Sweden. Treating liquid-insulated transformers. 1,626,213; Apr. 26.

Stephenson, Robert, Blackburn, England. Garment suspender. 1,626,305; Apr. 26.

Stevens, Frederick A., Providence, R. I., assignor, by mesne assignments, to Bausch and Lomb Optical Company, Rochester, N. Y. Ophthalmic mounting. 1,625,833; Apr. 26.

Stickney, Burnham C., Rutherford, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,626,124; Apr. 26.

Stierli, Otto. (See Heimgartner, C., and Stierli).

Stilgenbauer, Glenn W., Shepherd, Mich. Cultivator. 1,625,834; Apr. 26.

Stoetzel, Joseph J., Queens Village, assignor to G. & G. Atlas Systems, Inc., New York, N. Y. Single-tube pneumatic-dispatch unit. 1,626,214; Apr. 26.

Strandlund, Carl O., Moline, assignor to Deere & Company, Moline, Ill. Cultivator. 1,626,215; Apr. 26.

Stratton, John F. O., Chicago, Ill. Flow meter. 1,626,216; Apr. 26.

Straub, Christopher, East Elmhurst, N. Y., assignor, by mesne assignments, to Astoria Importing and Manufacturing Co. Inc. Veneer-cutting machine. 1,626,365; Apr. 26.

Straub, Fritz, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuffs containing chromium and making the same. 1,626,167; Apr. 26.

Straub, Fritz, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuffs and making same. 1,626,168; Apr. 26.

Straub, Fritz, assignor to the Firm: Society of Chemical Industry in Basle, Basel, Switzerland. Duestuffs containing chromium and making same. 1,626,169; Apr. 26.

Striffler, Gottlieb, Chicago, Ill. Heating furnace or stove. 1,626,054; Apr. 26.

Stromberg Motor Devices Company. (See Holt, Frank, assignor.)

Strupp, Herbert A., Evansville, Ind. Connecting-rod attachment. 1,625,965; Apr. 26.

Sughrua, Thomas J., Chicago, Ill. Coin holder. 1,626,366; Apr. 26.

Sullins, Harold L., and J. B. Mustain, Taft, Calif.; said Mustain assignor of one-fourth to said Sullins and one-fourth to W. D. Gray. Sucker rod and lock. 1,626,307; Apr. 26.

Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)

Sullivan Machinery Company. (See Oliphant, John, assignor.)

Sundt, Edward V., Chicago, Ill. Low-capacity fuse. 1,626,105; Apr. 26.

Super Diesel Tractor Corporation. (See Scott, Philip L., assignor.)

Sutton, O. D., and C. E. Kendall, Chicago, Ill. Internal-combustion engine. 1,625,835; Apr. 26.

Svenska Aktiebolaget Gasaccumulator. (See Johanson, Georg K. V., assignor.)

Swan, Earnest W. (See Cox, Floyd, assignor.)

Swanson, John A., Waltham, Mass., and A. A. Pollak, Waterbury, Conn. Bandage-dispensing device. 1,626,257; Apr. 26.

Swift, Ernest L., assignor to V. Swift, Oakland, Calif. Metal-coated electrode. 1,626,104; Apr. 26.

Swift, Virginia. (See Swift, Ernest L., assignor.)

Swindell, William, and Brothers. (See Brooke, Frank W., assignor.)

Swingrite Co., The. (See Nicholls, Gilbert E., assignor.)

Switzer, Elmer E., Beaumont, Tex. Asbestos crown-type packing. 1,626,436; Apr. 26.

Syracuse Industrial Gas Co. (See Henderson, Nelson H., assignor.)

Tanguay, Arthur G., Chicago, Ill., assignor to Badger Tool & Mfg. Co. Cutting tool. 1,625,836; Apr. 26.

Tannehill, Vernon L., assignor to Fort Wayne Engineering and Manufacturing Co., Fort Wayne, Ind. Water softener. 1,626,055; Apr. 26.

Tauschek, Gustav, Vienna, Austria. Punching machine. 1,626,217; Apr. 26.

Tella Sheet Metal Co. (See Zentner, Mathew, assignor.)

Texas Company, The. (See Burlingham, James H., assignor.)

Thatcher, Milo E., Los Angeles, Calif. Toilet-paper receptacle. 1,626,308; Apr. 26.

Thomas, Adolph A., New York, N. Y. Electric phonograph. 1,625,918; Apr. 26.

Thomas, George C., Malden, Mass., assignor to Converse Rubber Shoe Co. Arctic or gaiter. 1,626,587; Apr. 26.

Thomas, Idris. (See Vaughn, F. B., and Thomas.)

Thomas, William J., Coverdale, Pa. Coal drill or boring machine. 1,626,568; Apr. 26.

Thompson, Milton D., Fairhaven, Mass. Propeller. 1,626,056; Apr. 26.

Thompson, Olof, New York, N. Y., assignor, by mesne assignments, to Splitdorf-Bethlehem Electrical Company, Newark, N. J. Magneto generator. 1,626,367; Apr. 26.

Thomsen, Thomas C., assignor to Messrs. Koefoed, Hauberg, Marstrand & Helweg, Aktieselskabet Titan, Copenhagen, Denmark. Centrifugal separator. 1,625,919; Apr. 26.

Thurley, Arthur J., London, England. Adjustable single-lever pipe and nut wrench with ratchet-like control. 1,626,309; Apr. 26.

Thurman, Fred A., Apache, Okla. Box. 1,625,920; Apr. 26.

Tibbetts, Milton, assignor to Packard Motor Car Company, Detroit, Mich. Lock mechanism. 1,626,106; Apr. 26.

Tibbetts, Milton. (See Andrew, F. W., and Tibbetts.)

Tillotson Manufacturing Co., The. (See Braselton, Chester H., assignor.)

Tilt, Le Roy W., Baltimore, Md. Drain guard for washing machines. 1,626,125; Apr. 26.

Tipton, Edna S., Jackson Heights, N. Y. Dental compact. 1,626,310; Apr. 26.

Tipton, Edna S., New York, N. Y. Beauty compact. 1,626,311; Apr. 26.

Tipton, Edna S., New York, N. Y. Beauty compact. 1,626,312; Apr. 26.

Toney, George W., Waltham, Mass., assignor, by mesne assignments, to Old Colony Trust Company, trustee. Timepiece with hand-driving extension. 1,626,170; Apr. 26.

Traphagen, Harry R., assignor to Emerson Brantingham Manufacturing Company, Rockford, Ill. Adjusting mechanism for plows. 1,626,308; Apr. 26.

Trout, Albert K. (See Avery, U. Sherman, and Trout.)

Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)

Tubular Woven Fabric Company. (See Bryant, Henry E., assignor.)

Tuckey, Edson N., Minneapolis, Minn. Air motor. 1,626,313; Apr. 26.

Tuckey, Edson N., Minneapolis, Minn. Air motor. 1,626,814; Apr. 26.

Tulloss, Stuart B., Washington, D. C. Sorting case. 1,626,126; Apr. 26.

Tulsa Valve Company. (See Shaffer, J. C., and Mankin, assignors.)

Turner Tanning Machinery Company, The. (See Brophy, J. J., and Broughton, assignors.)

Twin Dry Cell Battery Company, The. (See Deibel, C. P., and Waitt, assignors.)

Ullgren, Johan D., Stocksund, assignor to Aktiebolaget Karlstads Mekaniska Verkstad, Karlstad, Sweden. Pulp grinder. 1,626,015; Apr. 26.

Ullrich, Peter M., Waverly, Iowa. Device for holding registration cards on automobiles. 1,626,107; Apr. 26.

Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)

Unger, Magnus, Pittsfield, Mass., assignor to General Electric Company. Induction furnace. 1,626,437; Apr. 26.

Unger, Magnus, Pittsfield, Mass., assignor to General Electric Company. Induction furnace. 1,626,485; Apr. 26.

Union Carbide & Carbon Research Laboratories, Inc. (See St. John, Ancel, assignor.)

Union Switch & Signal Company, The. (See Grondahl, L. O., and Ryder, assignors.)

Union Switch & Signal Company, The. (See McCann, Ronald A., assignor.)

Union Switch & Signal Company, The. (See Wallace, Herbert A., assignor.)

United Engineering and Foundry Company. (See Pennington, Harley D., assignor.)

United Shoe Machinery Corporation. (See Reed, James H., assignor.)

Universal Candy and Chocolate Machinery Company. (See Chase, Earle M., assignor.)

Vallier, Orvis W., assignor to J. B. Wise Incorporated, Watertown, N. Y. Flow regulator for faucets. 1,625,921; Apr. 26.

Van Bommel, Pierre, Antwerp, Belgium. Shock-absorbing socket for electric filament lamps. 1,626,108; Apr. 26.

Van Cleave, Charles N. (See Gayle, Norman W., assignor.)

Van der Does de Bije, Anne J. M. A. R., The Hague, Netherlands. Furnace. 1,625,954; Apr. 26.

Vanick, James S. (See Merica, P. D., and Vanick.)

Vaughn, Fred B., Maywood, and I. Thomas, Whittier, Calif. Well-production apparatus. 1,626,057; Apr. 26.

Vendrell, Jacinto, Barcelona, Spain. Loom. 1,626,569; Apr. 26.

Venturini, Guillermo, Santiago, Chile. Electric lamp. 1,626,315; Apr. 26.

Verbey, Hubert C., et al. (See Bowes, Thomas D., assignor.)

Victor Engineering Co. (See Wotruba, Charles.)

Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Backplate for bracket lighting fixtures or similar articles. Des. 72,534; Apr. 26.

Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Arm for lighting fixtures or similar articles. Des. 72,535; Apr. 26.

Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Escutcheon plate for lighting fixtures or similar articles. Des. 72,536; Apr. 26.

Vodoz, Frederick W., Wilmette, assignor to Goodman Manufacturing Company, Chicago, Ill. Cutter chain. 1,626,016; Apr. 26.

Voegeli, Frederick B., Easton, Pa. Treating textiles. 1,626,438; Apr. 26.

Voegeli, Frederick B., Easton, Pa. Apparatus for treating textile. 1,626,439; Apr. 26.

Von Herz, Edmund, Berlin-Charlottenburg, Germany. Manufacturing detonating compositions for explosive and percussion caps. 1,625,966; Apr. 26.

Von Mihály, Dénes, Budapest, Hungary. Phototelegraphic apparatus. 1,625,967; Apr. 26.

Waisman, Abraham, St. Louis, Mo. Garment retainer. 1,626,218; Apr. 26.

Waitt, Walter G. (See Deibel, C. P., and Waitt.)

Wagner, Alfred, Philadelphia, Pa., assignor to Gotham Silk Hosiery Company, Inc., New York, N. Y. Course-controlling attachment for knitting machines. 1,626,017; Apr. 26.

Wagniere, August L., Los Angeles, Calif. Sash-balancing device. 1,626,018; Apr. 26.

Wahl Clipper Corporation. (See Wahl, Leo J., assignor.)

Wahl, Leo J., Sterling, assignor to Wahl Clipper Corporation, Sterling, Ill. Self-regulating device for electromagnetic clippers. 1,626,058; Apr. 26.

Wakeman, Frank M., Lisbon Falls, Me. Baking pies. 1,626,316; Apr. 26.

Waldron, John, Corporation. (See Francke, William J., assignor.)

Walker, Hervey S., Ardmore, Pa. Electrical wiring system. 1,626,570; Apr. 26.

Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,626,486; Apr. 26.

Walters, Joseph C., Waterbury, Conn. Envelope. 1,626,578; Apr. 26.

Wanamaker, John, New York. (See Drevenstedt, Amy, assignor.)

Ward, Alger L. (See Essex, H., and Ward.)

Ware, Louis, Miami, Ariz. Dispensing container for lubricating grease, etc. 1,625,968; Apr. 26.

Warner Elevator Manufacturing Company, The. (See Liebenberg, Arthur J., assignor.)

Warren, David, Lewiston, Me. Emulsifier. 1,626,487; Apr. 26.

Washburn, Edwin C., Englewood, N. J. Lever draft gear. 1,626,258; Apr. 26.

Wassel, Albert, assignor to G. J. Henry, San Francisco, Calif. Vehicle wind wing. 1,625,875; Apr. 26.

Wasserman, Rudolf, New York, N. Y. Marking device. 1,626,440; Apr. 26.

Waterbor, Elmer F., assignor to C. M. Simpson, Detroit, Mich. Cast wheel. 1,625,876; Apr. 26.

Waterbury Button Company. (See Kaynor, Warren F., assignor.)
Watertown Tableslide Co. (See Drew, Herbert H., assignor.)
Watkins, Lester R. (See Michaels, J. I., and Watkins.)
Watkins Manufacturing Company, The. (See Michaels, J. I., and Watkins, assignors.)
Watson, Clyde E., Appleton, Wis. Display rack. Des. 72,537; Apr. 26.
Watson, Walter C., et al. (See Johnson, Alvin L., assignor.)
Waverly Novelty Co. (See Avery, U. S., and Trout, assignors.)
Waverly Oil Works Company. (See Willock, H. H., Caplan, and Babb, assignors.)
Wayne, Oscar T., Philadelphia, Pa., assignor to X-It Laboratories, Inc., New York, N. Y. Hand massage implement and medicine applicator. 1,626,127; Apr. 26.
Webster, Lyman L., Franklinville, N. Y. Rail-tie support. 1,626,317; Apr. 26.
Weideman, George C., assignor of one-half to T. J. Smith, Cleveland, Ohio. Furnace. 1,626,576; Apr. 26.
Weidenfeld, Samuel, New York, N. Y. Prize-game device. 1,625,922; Apr. 26.
Weidlich Bros. Mfg. Co., The. (See Flauder, Alfred J., assignor.)
Welch, Lon E., Memphis, Tenn. Artificial stone or marble. 1,626,577; Apr. 26.
Wellmann, Wilhelm. (See Roeder, J., and Wellmann.)
Wells, Sidney D., Quincy, Ill. Cooking vegetable fiber. 1,626,171; Apr. 26.
Welte-Mignon Corporation. (See Cheek, Tolbert F., assignor.)
Welton, Rosie A., et al. (See Moore, Samuel M., assignor.)
Wenner, John C., Carrollton, Ohio. Tractor hitch. 1,626,441; Apr. 26.
Wentworth, Elihu F., East Orange, and N. W. Lyon, Caldwell, N. J., assignors to The New York Air Brake Company. Pressure-retaining valve. 1,626,109; Apr. 26.
Werner, Karl. (See Christlein, P. and Werner.)
Western Cartridge Company. (See Olin, J. M., and Smith, assignors.)
Western Cartridge Company. (See Olin, J. M., Davis, and Smith, assignors.)
Western Electric Company. (See Carter, Herbert F., assignor.)
Western Electric Company. (See Whittle, Horace, assignor.)
Western Union Telegraph Company, The. (See Howard, Albert H., assignor.)
Westhaver, Norman J., Cambridge, Mass., assignor to G. H. Maxwell, Phoenix, Ariz. Shoe-bottom-filling machine. 1,626,571; Apr. 26.
Westinghouse Electric & Manufacturing Company. (See Hodgkinson, Francis, assignor.)
Westinghouse Lamp Company. (See Gustin, Daniel S., assignor.)
Wettstein, Karl, Brux, Czechoslovakia. Making reenforced building elements. 1,626,318; Apr. 26.
Weymann, Charles T., Paris, France. Operating and locking device for oscillating panels. 1,625,923; Apr. 26.
Wheary, George H., assignor to Wheary Trunk Company, Racine, Wis. Trunk fitting. 1,626,059; Apr. 26.
Wheary Trunk Company. (See Wheary, George H., assignor.)
Wheat, Frank R., Los Angeles, Calif. Sectional partition or panel structure. 1,626,259; Apr. 26.
Wheeling Stamping Company. (See Davis, Walter T., assignor.)
Whitacre, Charles R., Cincinnati, Ohio. Nonreturn check valve for brake systems connecting a plurality of engines. 1,625,837; Apr. 26.
White, William E., assignor to Kalman Steel Company, Chicago, Ill. Support and spacer for bars. 1,625,838; Apr. 26.
White, William E., assignor to Kalman Steel Company, Chicago, Ill. Junction clip and spacer for reenforcements. 1,625,839; Apr. 26.
White, William E., assignor to Kalman Steel Company, Chicago, Ill. Strip for roadways. 1,626,219; Apr. 26.
Whitehead & Hoag Company, The. (See Day, James C., assignor.)
Whitham, George S., jr., Hudson Falls, N. Y. Moisture indicating and recording. 1,626,060; Apr. 26.
Whiting, C. R., Co. (See Lader, Jack, assignor.)
Whiting, C. R., Co. (See Schmitz, William, assignor.)
Whitmire, William A., Big Creek, Calif. Excavating apparatus. 1,626,019; Apr. 26.
Whittle, Horace, assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission system. 1,625,840; Apr. 26.
Wiederhold, Oscar C., Philadelphia, Pa. Storage-battery system. 1,626,488; Apr. 26.
Wiese, John D., Manson, Iowa. Drag attachment for disk cultivators or harrows. 1,626,572; Apr. 26.
Wilkins, Charles. (See Bailey, C. B., McCord, and Wilkins.)
Willetts, Paul G., West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn. Producing fired ceramic blocks. 1,626,260; Apr. 26.
Willetts, Paul G., West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn. Making refractory blocks. 1,626,261; Apr. 26.
Williamson, John S., Seattle, Wash. Folding shipping case. 1,626,369; Apr. 26.
Willock, Alice. (See Mason, Leon O., assignor.)
Willock, Harry H., S. J. Caplan, and J. E. Babb, assignors to Waverly Oil Works Company, Pittsburgh, Pa. Lubricant. 1,625,969; Apr. 26.
Winterbottom, William G., sr., et al. (See Winterling, William F., assignor.)
Winterling, William F., Cambridge, Md., assignor of one-fifth to W. G. Winterbottom, sr., one-fifth to L. B. Phillips, sr., one-fifth to A. Phillips, sr., and one-fifth to C. L. Janney. Time switch for parking lamps. 1,626,319; Apr. 26.
Wise, J. B., Incorporated. (See Vallier, Orvis W., assignor.)
Wojcik, Frank J., Lowell, Ariz. Foot shield. 1,626,489; Apr. 26.
Wolfe, Jay A., assignor to The Columbus Heating and Ventilating Company, Columbus, Ohio. Heating and ventilating apparatus. 1,626,172; Apr. 26.
Woodbridge, Charles K., Flushing, N. Y., assignor to Dictaphone Corporation, Bridgeport, Conn. Sound distributing and transmitting means and method. 1,625,976; Apr. 26.
Wood, Edward K., Wilmington, J. Metzger, deceased, by C. I. Metzger, administratrix, Venice, Calif., assignors to Amusement Engineering Corporation, Los Angeles, Calif. Amusement apparatus. 1,625,877; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,924; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,925; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,926; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,927; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,928; Apr. 26.
Woodruff, John C., and G. Bloomfield, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Catalyst for synthetic methanol production. 1,625,929; Apr. 26.
Woodstock Typewriter Company. (See Hokanson, Otto A., assignor.)
Woolley, Harold O., Maplewood, N. J., assignor to Power Specialty Company, New York, N. Y. Combined superheater and boiler. 1,626,220; Apr. 26.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,626,061; Apr. 26.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Mixture-forming means for internal-combustion engines. 1,626,062; Apr. 26.
Worner, Henry F., Philadelphia, Pa. Radioreceiver. 1,626,370; Apr. 26.
Worthington Pump and Machinery Corporation. (See Lucke, Charles E., assignor.)
Wotruba, Charles. Fort Washington, assignor to C. L. Bachman and E. Hahn, Philadelphia, Pa., composing the Copartnership Victor Engineering Co. Ash conveyer and elector. 1,626,490; Apr. 26.
Wright, Arthur H., Minneapolis, Minn. Rotary reciprocating engine. 1,625,841; Apr. 26.
Wright, Charles C., Camden, N. J., assignor of one-half to Camden Pottery Company. Flush-tank construction and valve-lever-operating mechanism therefor. 1,626,128; Apr. 26.
Wright, Norman A., assignor to Pontiac Tractor Company, Pontiac, Mich. Spraying attachment for tractors. 1,626,371; Apr. 26.
Wright, Parvin. (See Gerrard, A. J., and Wright.)
Wright, William B., Custom House, London, England. Rotary tool for cleaning, chipping, or scaling surfaces. 1,626,491; Apr. 26.
X-It Laboratories, Inc. (See Wayne, Oscar T., assignor.)
Yngve, Victor, South Orange, N. J., assignor, by mesne assignments to National Carbon Company, Inc., New York, N. Y. Dry cell. 1,626,173; Apr. 26.
Young, William M. (See Schmitt, Henry J., assignor.)
Youngson, Alexander C., Brooklyn, N. Y. System for preparing packages for shipment or delivery. 1,626,492; Apr. 26.
Zabel, George W., Sherman, Calif. Hinge. 1,626,372; Apr. 26.
Zabel, George W., Sherman, Calif. Hinge clutch. 1,626,373; Apr. 26.
Zentner, Mathew, Oshkosh, assignor to Tella Sheet Metal Co., Oshkosh, Wis. Check draft. 1,626,174; Apr. 26.
Zimmer, Joseph, Brooklyn, N. Y. Swimming shoe. 1,626,175; Apr. 26.
Zimmerli, William F., Akron, Ohio, and C. H. Bibb, New Brunswick, N. J., assignors to Johnson & Johnson, New Brunswick, N. J. Adhesive. 1,626,493; Apr. 26.
Zweig, Joseph, Brooklyn, N. Y. Lighting fixture. Des. 72,538; Apr. 26.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 26TH DAY OF APRIL, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Adhesive. W. F. Zimmerli and C. H. Bibb. 1,626,493; Apr. 26.
Advertising device and reflector therefor. W. M. and C. J. Doering. 1,625,798; Apr. 26.
Agitator. A. S. Ramage. 1,626,297; Apr. 26.
Air cleaner. C. C. Manchester. 1,625,816; Apr. 26.
Air compressor or pump. W. G. E. Rolaff. 1,626,557; Apr. 26.
Aircraft, Elastically connecting landing gear to. H. O. Short. 1,626,483; Apr. 26.
Air craft, Lighter-than-. J. S. Candray. 1,626,183; Apr. 26.
Aircraft, Stabilizer for. H. S. Steinbrecht. 1,626,567; Apr. 26.
Air moistening and cleaning device. H. J. Schmitt. 1,626,159; Apr. 26.
Air motor. E. N. Tuckey. 1,626,313–14; Apr. 26.
Airship, Dirigible. W. Lemon. 1,625,951; Apr. 26.
Ajutage. A. P. Plaut. 1,625,867; Apr. 26.
Alloy. W. S. Ireland. 1,626,038; Apr. 26.
Alloy. P. D. Merica and J. S. Vanick. 1,626,248; Apr. 26.
Ammonium nitrate, Manufacture of. H. Howard. 1,625,807; Apr. 26.
Amplifying system. L. J. Perkins. 1,626,480; Apr. 26.
Amusement apparatus. E. K. Wood and J. Metzger. 1,625,877; Apr. 26.
Anchor hoist, Boat. H. Robertson and H. Hirdler. 1,625,871; Apr. 26.
Anchor, Tubing. R. B. Simons and J. Penrod. 1,626,162; Apr. 26.
Antenna regulation, Automatic. W. W. Brown. 1,626,449; Apr. 26.
Antidiabetic substance. F. S. Macy. 1,626,044; Apr. 26.
Arc lamps, Feed for. P. Mole, jr. 1,626,472; Apr. 26.
Arm. H. S. Best. 1,626,502; Apr. 26.
Arctic or gaiter. G. C. Thomas. 1,626,587; Apr. 26.
Article of bonded granular material and making the same. H. C. Martin. 1,626,246; Apr. 26.
Ash tray and like receptacle, Smoker's. R. M. Davis. 1,625,884; Apr. 26.
Atomising liquid fuels or other liquids, Method and apparatus for. O. R. Grönkwist. 1,625,997; Apr. 26.
Automatic register. P. A. Jackson. 1,626,574; Apr. 26.
Automobile bodies, Glass partition for closed. W. Brewster. 1,626,074; Apr. 26.
Automobile brake. P. A. Quinn. 1,626,151; Apr. 26.
Automobile buffer and attachment therefor. G. A. Lyon. 1,626,347; Apr. 26.
Automobile cleaning device. J. W. Carrington. 1,625,792; Apr. 26.
Automobile doors, Shield attachment for. F. H. Campbell. 1,625,791; Apr. 19.
Automobile parts and the like, Surfacing for. J. C. Carlson. 1,626,508; Apr. 26.
Automobile steering knee control. J. H. Cresmer. 1,626,331; Apr. 26.
Automobiles and other vehicles, Suspension of. G. H. E. de Ram. 1,626,188; Apr. 26.
Automobiles, Combination brake and jack mechanism for. E. and C. Ferry. 1,625,936; Apr. 26.
Automobiles, Device for holding registration cards on. P. M. Ullrich. 1,626,107; Apr. 26.
Awning for automobile doors. G. V. Blackford 1,625,785; Apr. 26.
Badge. J. C. Day. 1,626,133; Apr. 26.
Bags, Fabric material and obtaining same from cement. J. Laro. 1,626,201; Apr. 26.
Ball-securing means. M. Hänel. 1,626,529; Apr. 26.
Ball: *See*—
Playing ball.
Ball-bearing mounting. A. Master. 1,626,092; Apr. 26.
Ballast digging and cleaning machine. G. C. Melin. 1,625,864; Apr. 26.
Bandage-dispensing device. J. A. Swanson and A. A. Pollak. 1,626,257; Apr. 26.
Banjo. W. L. Lange. 1,625,811; Apr. 26.
Banjo tailpiece, Top adjustable. R. R. Page. 1,626,094; Apr. 26.
Bank, Savings. H. S. Goodman. 1,626,408; Apr. 26.
Bars, Support and spacer for. W. E. White. 1,625,838; Apr. 26.
Battery grid-pasting machine, Storage-. B. H. Krafft. 1,626,200; Apr. 26.
Battery unit and producing same. C. P. Deibel and W. G. Waitt. 1,625,848; Apr. 26.
Bearing for movements and driving gears. O. Jansen. 1,626,536; Apr. 26.
Bearing for radial and axial loads, Roller. K. O. Leon. 1,625,812; Apr. 26.
Bearing, Thrust. S. H. Libby. 1,626,470; Apr. 26.
Bed bottom. F. C. Marquardt. 1,625,817; Apr. 26.
Bed or couch spring organization. C. Lofman. 1,626,140; Apr. 26.
Bedpost lock. W. Silber. 1,626,121; Apr. 26.
Belt conveyer. G. R. Kyle and B. A. Mitchell. 1,626,041; Apr. 26.
Belt, Life. J. B. Adams. 1,625,971; Apr. 26.
Bench: *See*—
Florist bench.
Benzanthrone, Making. R. G. Caswell and E. G. Marshall. 1,626,392; Apr. 26.
Bib cock or faucet. E. A. Eckhouse. 1,626,031; Apr. 26.
Billiard tables, Ductile wire trough for. F. Lanza. 1,626,242; Apr. 26.
Binder, Loose-leaf. B. W. Japs. 1,626,280; Apr. 26.
Binding strips, Machine for making metal. J. W. Dixon. 1,626,227; Apr. 26.
Birdcages. Wall bracket for. L. J. Leon. Des. 72,522; Apr. 26.
Bisalkyl-xanthogens, Making. A. Rothmann and H. Stein. 1,626,558; Apr. 26.
Blank-holding means. R. W. Glasner and O. G. Nilson. 1,625,991; Apr. 26.
Block: *See*—
Cable block. Paving block.
Blocks, Making refractory. P. G. Willetts. 1,626,261; Apr. 26.
Board: *See*—
Sleeve-finishing board.
Boat form. C. E. Chance. 1,626,509; Apr. 26.
Boiler-cleaning device. M. R. Bowe. 1,626,385; Apr. 26.
Boilers, and superheaters, etc., Electric heater for steam. W. A. Patscheider. 1,626,295; Apr. 26.
Boilers, Water gauge for. J. C. Shaffer and L. S. Mankin. 1,625,828; Apr. 26.
Bolt: *See*—
Sliding bolt.
Bomb, Gravity. E. A. Sperry. 1,626,363; Apr. 26.
Boot or shoe. J. B. Piotrowski. 1,626,426; Apr. 26.
Boot, Rubber. L. H. L'Hollier. 1,626,417; Apr. 26.
Boots and shoes, Rack for. C. Fisher. 1,626,399; Apr. 26.
Bottle closure. C. Benetti. 1,626,499; Apr. 26.
Bottle closures, Making. F. K. Plympton. 1,625,869; Apr. 26.
Bottle protector, Nursing-. T. G. Pelsue. 1,626,425; Apr. 26.
Box: *See*—
Cooling box. Switch box.
Mail box.
Box. F. A. Thurman. 1,625,920; Apr. 26.
Box or carton. W. G. Booth. 1,626,324; Apr. 26.
Bracelet. I. Kraysler. 1,626,139; Apr. 26.
Bracelet, Removable wrist-watch. A. Schwalberg. 1,626,160; Apr. 26.
Bracket: *See*—
Curtain bracket.
Brake: *See*—
Automobile brake. Hydraulic brake.
Brake-control apparatus, Automatic. F. D. Sprague. 1,626,586; Apr. 26.
Brake systems connecting a plurality of engines, Nonreturn check valve for. C. R. Whitacre. 1,625,837; Apr. 26.
Brick mold. J. Lo Forti. 1,626,004; Apr. 26.
Bridge, Combined suspension and arch. G. G. Krivoshein. 1,626,241; Apr. 26.
Buckle, Turn. R. C. McArthur. 1,625 818; Apr. 26.
Building construction. A. F. Bemis. 1,626,112; Apr. 26.
Building construction, Fireproof. J. Lally. 1,625,899; Apr. 26.
Building elements, Making reenforced. K. Wettstein. 1,626,318; Apr. 26.
Buildings, Heating and cooling of. R. G. Crittall and J. L. Musgrave. 1,625,987; Apr. 26.
Bull wheels, Flange for. G. F. Bell. 1,626,322; Apr. 26.
Bumper. C. E. Stein. 1,626,566; Apr. 26.
Burner: *See*—
Gas burner. Oil burner.
Burners, Flash igniter for gas. O. Spahr. 1,625,964; Apr. 26.
Bush-hammering machine. C. Fürst. 1,626,033; Apr. 26.
Button, Detachable metal. W. F. Kaynor. 1,626,582; Apr. 26.
Button, Frolic. C. T. Hathaway. Des. 72,517; Apr. 26.

Button, Separable. J. V. Pilcher. 1,626,296; Apr. 26.
Buttons to cards, Attaching. A. Haenicke. 1,626,337; Apr. 26.
Cabinet player. T. F. Cheek. 1,626,327; Apr. 26.
Cabinet, Tool. H. S. Kuhn. 1,625,945; Apr. 26.
Cable block. R. P. Ramsey. 1,625,910; Apr. 26.
Cable clamp and bridle ring. C. H. Klein. 1,625,897; Apr. 26.
Casting machines, Metal-pouring apparatus for centrifugal. J. E. Hurst and E. B. Ball. 1,626,342; Apr. 26.
Calf weaner. G. M. Krauss. 1,626,090; Apr. 26.
Camera, Photomicrographic. F. F. Lucas. 1,625,952; Apr. 26.
Camp table. L. O. Mason. 1,626,293; Apr. 26.
Can opener of the nipper type. A. C. Schaefer. 1,626,052; Apr. 26.
Can steamer. J. Cook. 1,626,452; Apr. 26.
Can washer and steamer. B. E. Cramer. 1,626,516; Apr. 26.
Cans, Apparatus for vacuumizing and sealing. A. E. Lindstrom. 1,626,291; Apr. 26.
Cans or other receptacles, Apparatus for filling. C. A. Alexanderson. 1,626,375; Apr. 26.
Cape and hat protector, Combined. A. T. Lane. 1,626,288; Apr. 26.
Car. J. O. Neikirk. 1,626,010; Apr. 26.
Car construction, Dump-. D. Hindabi. 1,625,908; Apr. 26.
Car diaphragm and forming the same. H. U. Morton. 1,626,048; Apr. 26.
Car-heating system. E. H. Gold. 1,626,234; Apr. 26.
Cars, Detachable ladder for railway. J. Mitchell. 1,626,145; Apr. 26.
Carbon, etc., Process and apparatus for manufacturing amorphous. J. W. MacDonald. 1,626,418; Apr. 26.
Carbon in a specimen of iron or steel, Apparatus for determining the percentage of. C. J. G. Malmberg and J. G. Holmström. 1,626,005; Apr. 26.
Carburetor. C. H. Braselton. 1,625,787; Apr. 26.
Carburetor. L. Henriot. 1,626,085; Apr. 26.
Carburetor frames, Die for making. F. Holt. 1,625,854; Apr. 26.
Card, Index. C. H. Cobb. 1,625,934; Apr. 26.
Carrier: *See*—
Ice-can carrier. Luggage carrier.
Case: *See*—
Compact case. Sorting case.
Shipping case. Vanity case.
Casing puller. J. W. Price. 1,625,909; Apr. 26.
Casket, Burial. Z. Maulsby. Des. 72,523; Apr. 26.
Cast wheel. E. F. Waterbor. 1,625,876; Apr. 26.

Rewinding reel. E. G. K. Anderson. 1,626,376; Apr. 26.
Rifles, Safety target attachment for air. J. B. Mulholland and A. F. Borschel. 1,625,956; Apr. 26.
Rims, Connecter for two-part demountable. A. L. Johnson. 1,626,284; Apr. 26.
Roadways, Strip for. W. E. White. 1,626,219; Apr. 26.
Rock-drilling device. E. G. Gartin. 1,626,277; Apr. 26.
Rolled plates, Scraper for. D. T. Spring and S. E. Spring. 1,626,435; Apr. 26.
Roller screen. F. D. and C. Hobbs. 1,626,086; Apr. 26.
Roofing element and making the same. J. H. Gillis. 1,625,888; Apr. 26.
Rubber article, Making a. O. Kirchbaum. 1,625,810; Apr. 26.
Rubber sheets, Protecting covering for. G. J. Esselen, jr. 1,626,276; Apr. 26.
Rug. J. Stabler. Des. 72,533; Apr. 26.
Sadirons, Rest for. H. Selgman. 1,626,101; Apr. 26.
Safety device. C. H. Gage. 1,626,077; Apr. 26.
Salt and pepper shaker, Combined. A. J. Flander. Des. 72,515–16; Apr. 26.
Sash and screen, Window. A. W. Goldman. 1,626,336; Apr. 26.
Sash-balancing device. A. L. Wagniere. 1,626,018; Apr. 26.
Sash, Ventilating. E. F. McHugh. 1,626,547; Apr. 26.
Saw, Portable tree-felling. A. Radtke. 1,626,553; Apr. 26.
Saw, Power-operated hand. F. Bjorklund. 1,626,503; Apr. 26.
Saw-tooth gauge. C. A. Briggs. 1,626,029; Apr. 26
Screen: *See*—
Roller screen.
Seal. H. V. Atwell. 1,626,445; Apr. 26.
Seal, Self-locking. E. Dietze. 1,626,273; Apr. 26.
Seat: *See*—
Vehicle seat.
Seat pad for sportsmen's coats. W. D. Stair. 1,626,166; Apr. 26.
Seat support, table, and luggage carrier for automobiles, Combined. D. C. Slater. 1,625,916; Apr. 26.
Seed-cleaning machine. M. L. Kollman and E. L. Klappal. 1,625,858; Apr. 26.
Seed-gathering device. S. L. Mosher. 1,626,207; Apr. 26.
Separator: *See*—
Centrifugal separator.
Grain separator.
Separator. W. M. Little and J. L. Sherman. 1,626,245; Apr. 26.
Sewing machine, Bag-. A. M. Bates and J. E. Dancker. 1,625,782; Apr. 26.
Sewing machines, Thread cutter for. S. Cortese. 1,626,329; Apr. 26.
Sewing, Severing, and seam-reinforcing machine. A. M. Bates and A. Krasa. 1,625,781; Apr. 26.
Shaper table, Woodword-. E. Reaveley. 1,626,153; Apr. 26.
Shipping box for clothing. W. H. Batts. 1,626,381; Apr. 26.
Shipping case, Folding. J. S. Williamson. 1,626,369; Apr. 26.
Shoe-bottom-filling machine. N. J. Westhaver. 1,626,571; Apr. 26.
Shoe last. P. Borda. 1,626,071; Apr. 26.
Shoe, Swimming. J. Zimmer. 1,626,175; Apr. 26.
Shovel: *See*—
Power shovel.
Shuttle-feeler thread parter and clamp. F. W. Mathis. 1,626,546; Apr. 26.
Sign, Illuminated. C. G. Keenan. 1,626,286; Apr. 26.
Signal: *See*—
Traffic signal.
Vehicle signal.
Signal for railway crossings, public highways, and the like, Electric. B. J. Shald. 1,625,873; Apr. 26.
Silk and the like from viscose solutions, Manufacture of artificial. W. P. Dreaper. 1,626,454; Apr. 26.
Ski tie. E. M. Eriksen. 1,626,521; Apr. 26.
Sleeve-finishing board, Dry-steam. I. W. Cox. 1,625,935; Apr. 26.
Sliding bolt. E. R. Sargent. 1,626,482; Apr. 26.
Soldering iron, Fountain. W. E. Quillen. 1,626,552; Apr. 26.
Sorting case. S. B. Tulloss. 1,626,126; Apr. 26.
Sound distributing and transmitting means and method. C. K. Woodbridge. 1,625,970; Apr. 26.
Sound-reproducing apparatus. C. A. Brigham. 1,625,844; Apr. 26.
Sound reproductions, Apparatus for. J. J. Jakosky. 1,626,088; Apr. 26.
Space band. J. M. Loblt. 1,626,003; Apr. 26.
Spark-gap device. J. H. Eastman. 1,626,030; Apr. 26.
Spark plug. G. Hadrich. 1,626,081; Apr. 26.
Speed of driven members, Controlling the. P. B. Reeves. 1,626,584; Apr. 26.
Speed transmission, Controller for variable-. M. O. Reeves. 1,626,299; Apr. 26.
Spindle retainer, J. Rose. 1,626,252; Apr. 26.
Spool or reel. H. E. Bryant. 1,626,204; Apr. 26.
Spray cooling. B. R. Sausen and H. D. Binks. 1,626,360; Apr. 26.
Spray gun. C. L. Reichenbach. 1,626,096; Apr. 26.
Spreader, Tire. V. R. Goeller. 1,626,460; Apr. 26.
Spring cover. F. D. Madge. 1,625,861; Apr. 26.
Stamp-dispensing machine. W. F. Schweiger. 1,625,827; Apr. 26.
Stand: *See*—
Display stand.
Stapling machine. J. H. Reed. 1,625,958; Apr. 26.
Steam hydraulic system. W. H. Ridgway. 1,626,556; Apr. 26.
Stencil and making same, Printing. S. S. Bendick. 1,626,323; Apr. 26.
Stencils for duplicating apparatus, Manufacture of. P. Campion. 1,626,113; Apr. 26.
Stoker, Underfeed. R. L. Beers. 1,625,975; Apr. 26.
Stone or marble, Artificial. L. E. Welch. 1,626,577; Apr. 26.
Storage-battery system. O. C. Wiederhold. 1,626,488; Apr. 26.
Storage system for and storing and removing from storage a liquid. M. B. Anfenger. 1,626,066; Apr. 26.
Stopper: *See*—
Crown stopper.
Stove, Combination. H. Lange. Des. 72,520; Apr. 26.
Stove, Gas. G. S. Morley. 1,626,047; Apr. 26.
Stoves, Oven for camp. H. C. Hanson. 1,626,035; Apr. 26.
Straightedge instrument. G. Lee. 1,625,949; Apr. 26.
Strike plate. J. H. Shaw. 1,626,432; Apr. 26.
Stringed instruments, Tuning peg for. U. S. Avery and A. K. Trout. 1,626,380; Apr. 26.
Strip-vulcanizing apparatus and method. T. J. Mell. 1,626,419; Apr. 26.
Sucker rod and lock. H. L. Sullins and J. E. Mustain. 1,626,307; Apr. 26.
Suit, Flying. H. R. Hart. 1,626,136; Apr. 26.
Superheater and boiler, Combined. H. O. Woolley. 1,626,220; Apr. 26.
Suppository and insertion of the same. H. C. L. Gougnard. 1,626,079; Apr. 26.
Suspender, Garment. R. Stephenson. 1,626,305; Apr. 26.
Swimming device. J. P. La Rosa. 1,626,541; Apr. 26.
Swimming pad. F. J. Smith. 1,626,163; Apr. 26.
Swing. J. J. McGinty. 1,626,204; Apr. 26.
Switch: *See*—
Circuit switch.
Electric switch.
Electromagnetic switch.
Push-button switch.
Railway switch.
Time switch.
Timing switch.
Switch. J. F. Harrington. 1,626,463; Apr. 26.
Switch box, Conduit. C. D. Converse. 1,625,882; Apr. 26.
Table: *See*—
Camp table.
Feed table.
Shaper table.
Treating table.
Table slide. H. H. Drew. 1,626,189; Apr. 26.
Tank construction and valve-lever-operating mechanism therefor, Flush. C. C. Wright. 1,626,128; Apr. 26.
Tar and the like, Distillation of. W. B. Davidson, A. C. Michie, and E. W. Muddiman. 1,626,588; Apr. 26.
Tassel fringe. D. M. Lending. Des. 72,521; Apr. 26.
Telephone, Device for use with. C. B. Kinkead. 1,626,287; Apr. 26.
Telephone holder. E. E. Jones. 1,626,539; Apr. 26.
Telephone system, Automatic. J. E. Gardner. 1,626,034; Apr. 26.
Telephone system, Automatic. G. H. Simmons. 1,626,103; Apr. 26.
Telephone system, Automatic and semiautomatic. R. Mordin. 1,626,206; Apr. 26.
Telephone system, Electromechanically-controlled. F. Aldendorff. 1,625,779; Apr. 26.
Telephones, Attachment for. S. Kats. 1,625,895; Apr. 26.

Telephonic receiver. E. A. Graham. 1,625,995; Apr. 26.
Tenpins, Machine for setting. J. W. Bishop. 1,626,446; Apr. 26.
Textile, Apparatus for treating. F. B. Voegeli. 1,626,439; Apr. 26.
Textiles, Treating. F. B. Voegeli. 1,626,438; Apr. 26.
Therapeutic materials, Making. E. Silten. 1,626,562; Apr. 26.
Thrashing machine. H. A. Lundquist. 1,625,953; Apr. 26.
Threading mechanism. A. L. De Leeuw. 1,626,187; Apr. 26.
Tie: *See*—
Rail tie.
Railway tie.
Ski tie.
Tile construction. F. Cesario. 1,626,021; Apr. 26.
Time piece with hand-driving extension. G. W. Toney. 1,626,170; Apr. 26.
Time switch. J. M. Andersen. 1,626,262; Apr. 26.
Timer. B. U. Hills. 1,625,806; Apr. 26.
Timing switch. J. H. Nelson. 1,626,475; Apr. 26.
Tire chains, Tightener and holder for. G. J. Bowman. 1,626,179; Apr. 26.
Tire molds, Flexible gasket for. H. O. Hutchens and C. A. Kessler. 1,625,894; Apr. 26.
Tire, Pneumatic. J. T. Clark. 1,626,512; Apr. 26.
Tire, Vehicle. J. T. Clark. 1,626,511; Apr. 26.
Tool for cleaning, chipping, or scaling surfaces, Rotary. W. B. Wright. 1,626,491; Apr. 26.
Toy, Dancing figure. S. M. Moore. 1,625,955; Apr. 26.
Toy electric railway. L. Caruso. 1,626,267; Apr. 26.
Toy exerciser. W. H. Sherrod. 1,626,161; Apr. 26.
Toy, Mechanical. L. D. Kroff. 1,626,040; Apr. 26.
Toy piano. G. H. Eckstein. 1,626,275; Apr. 26.
Toy race course. M. B. Mills. 1,626,420; Apr. 26.
Toy whistle. E. Jacquemin. 1,626,198; Apr. 26.
Tractor hitch. J. C. Wenner. 1,626,441; Apr. 26.
Tractor trailer of the type carried on two wheels. J. and L. Coder. 1,626,185; Apr. 26.
Tractors and their trailers, Coupling means between. J. and L. Coder. 1,626,184; Apr. 26.
Tractors, Differential lock for. G. C. Abbe. 1,626,374; Apr. 26.
Tractors, Spraying attachment for. N. A. Wright. 1,626,371; Apr. 26.
Traffic rails, Treating. H. Karl. 1,626,285; Apr. 26.
Traffic signal. H. Garrett. 1,625,990; Apr. 26.
Transformers, Treating liquid-insulated. E. Stenkvist. 1,626,213; Apr. 26.
Transmission mechanism. R. A. Fontaine. 1,626,229; Apr. 26.
Transmission system. H. Whittle. 1,625,840; Apr. 26.
Transmitting apparatus utilizing the principle of the Wheatstone bridge. E. Schneider. 1,626,560; Apr. 26.
Trap: *See*—
Insect trap.
Treating table. O. A. Miller. 1,626,471; Apr. 26.
Trimming device. A. A. Gagarin. 1,626,232; Apr. 26.
Truck, Industrial. E. H. Remde. 1,626,555; Apr. 26.
Truck-lever connection. S. Hansson. 1,625,805; Apr. 26.
Truck-lever connections, Making. S. Hansson. 1,625,804; Apr. 26.
Truck, Pig-lead. W. E. Newman. 1,626,350; Apr. 26.
Trunk fitting. G. H. Wheary. 1,626,059; Apr. 26.
Trunks, Ironing-board attachment for wardrobe. G. D. Jones. 1,626,468; Apr. 26.
Tube: *See*—
X-ray tube.
Tube-making method and apparatus. J. V. James. 1,626,412; Apr. 26.
Tube-working machines, Thread cutter for. W. T. Davis. 1,626,271; Apr. 26.
Tubes, Cutting-off device particularly for. P. Gedien and K. Schwade. 1,625,850; Apr. 26.
Tubes, Device for the electrical welding of seamed. P. Gedien and K. Schwade. 1,626,524; Apr. 26.
Tubes, Rolling. J. Roeder and W. Wellmann. 1,626,481; Apr. 26.
Turbine gland. F. Hodgkinson. 1,626,237; Apr. 26.
Twine holder. C. March. 1,626,545; Apr. 26.
Two-cycle rotary plant. C. P. Brockway. 1,625,790; Apr. 26.
Typewriters, Escapement mechanism for. O. A. Hokanson. 1,625,890; Apr. 26.
Typewriting machine. E. E. Barney. 1,625,974; Apr. 26.
Typewriting machine. B. C. Stickney. 1,626,124; Apr. 26.
Universal woodworking machine for carpenters, joiners, and cabinetmakers. H. Rozier. 1,626,559; Apr. 26.
V-shaped transmission, Splice block for. P. B. Reeves. 1,626,300; Apr. 26.
Vacuum devices, Applying a getter to. D. S. Gustin. 1,626,235; Apr. 26.
Valve. F. H. Hehemann. 1,626,532; Apr. 26.
Valve. R. E. Mitton. 1,626,045; Apr. 26.
Valve, Automatic. A. Moser. 1,626,147; Apr. 26.
Valve, Differential-pressure C. H. Atkins. 1,625,780; Apr. 26.
Valve, Flush. J. J. Langdon. 1,626,289; Apr. 26.
Valve, Gas. F. W. Shuell. 1,625,874; Apr. 26.
Valve, Intake. J. E. Harris. 1,626,279; Apr. 26.
Valve, Pressure-retaining. E. F. Wentworth and N. W. Lyon. 1,626,109; Apr. 26.
Valve-rotating mechanism. M. O. Anthony. 1,626,067; Apr. 26.
Valve, Sealed. J. J. Cavett. Re16,604; Apr. 26.
Valve-seat grinder. J. W. Roy. 1,626,212; Apr. 26.
Valve, Standing. A. N. Miller. 1,626,549; Apr. 26.
Vanity case C. N. Correll. 1,626,023; Apr. 26.
Vanity-case compact holder and catch. W. G. Kendall. 1,626,413; Apr. 26.
Vaporizer, Heavy-oil. D. T. Scott. 1,626,561; Apr. 26.
Vegetable cutter. F. H. Miller. 1,626,550; Apr. 26.
Vegetable fiber, Cooking. S. D. Wells. 1,626,171; Apr. 26.
Vehicle seat, Convertible. G. D. Howith. 1,626,340; Apr. 26.
Vehicle signal. D. F. Beauchamp. 1,626,131; Apr. 26.
Vehicle top, Collapsible. H. G. Miller. 1,626,551; Apr. 26.
Vehicle wheel. W. N. Booth. 1,625,879; Apr. 26.
Vehicle wind wing. A. Wassel. 1,625,875; Apr. 26.
Vehicles and the like, Spoked metal wheel for motor. E. H. Coquille. 1,625,986; Apr. 26.
Vehicles, Emergency valve-control system for tank. J. A. Jensen. 1,626,283; Apr. 26.
Vehicles, Steering attachment for. J. A. Felton. 1,625,886; Apr. 26.
Vehicles, Window for motor. H. Austin. 1,626,129; Apr. 26.
Vending machine. F. Ruoff. 1,626,429; Apr. 26.
Vending machine, Merchandise-. A. Cantrell. 1,625,845; Apr. 26.
Veneer-cutting machine. C. Straub. 1,626,365; Apr. 26.
Washers upon the pins of rubber-heel molds, Machine for placing. J. H. Kintzele. 1,626,039; Apr. 26.
Washing clothes, Apparatus for. W. B. Reeves and M. J. Poole. 1,626,154; Apr. 26.
Washing machine. A. W. Altorfer. 1,626,064; Apr. 26.
Washing machine, Spray head for boiler-. D. A. Hegerty. 1,625,851; Apr. 26.
Washing machines, Drain guard for. L. W. Tilt. 1,626,125; Apr. 26.
Water-closet, Marine. U. G. Lee. 1,625,950; Apr. 26.
Water cooler and refrigerating apparatus. E. A. Haas and M. Posey. 1,625,803; Apr. 26.
Water motor. W. Keywood. 1,625,896; Apr. 26.
Water softener. V. L. Tannehill. 1,626,055; Apr. 26.
Weighing apparatus, Liquid-. J. M. Rowland. 1,625,825; Apr. 26.
Weighing machine, Automatic. P. Durand. 1,625,709; Apr. 26.
Well-production apparatus. F. B. Vaughn and I. Thomas. 1,626,057; Apr. 26.
Wells, Gas-energy-control head for oil. E. V. Crowell. 1,625,883; Apr. 26.
Wheel: *See*—
Cast wheel.
Vehicle wheel.
Wheel. S. I. Prescott and F. J. Rummler. 1,626,355; Apr. 26.
Wheel construction, Cast-. N. S. Reed. 1,626,211; Apr. 26.
Wheels of vehicles, Guard for. W. D. Ratcliff. 1,625,824; Apr. 26.
Windmill. H. H. Macomber. 1,626,203; Apr. 26.
Window. V. Pastrengo. 1,626,479; Apr. 26.
Window adjuster, Friction casement-. E. J. Sibley. 1,625,915; Apr. 26.
Window, Combination. H. J. Schlacks. 1,625,872; Apr. 26.
Window-sash starter. M. J. Hoffenberg. 1,625,941; Apr. 26.
Window structure. O. W. L. Buss. 1,626,266; Apr. 26.
Wire, Pile. J. Bagley. 1,625,783; Apr. 26.
Wire-twisting machine. A. J. Gerrard and P. Wright. 1,626,404; Apr. 26.
Wireless amplifier, Loud-speaking. J. R. Showers. 1,626,102; Apr. 26.
Wood-splitting machine. C. Rasmussen. 1,626,152; Apr. 26.
Woodworking machines, Sectional feed roller for. W. R. Buss and M. E. Dick. 1,625,881; Apr. 26.
Wrapping device for irregularly-shaped delicate objects. O. Lauenstein. 1,626,543; Apr. 26.
Wrapping machine. H. Y. Armstrong. 1,626,378–9; Apr. 26.
Wrapping strand material around a core, Method of and apparatus for. H. F. Carter. 1,625,983; Apr. 26.
Wrench: *See*—
Chain pipe wrench.
Chain wrench.
Pipe wrench.
Wringer: *See*—
Mop wringer.
X-ray tube. G. Holst and A. Bouwers. 1,626,465; Apr. 26.
X rays and apparatus therefor, Producing homogeneous. A. St. John. 1,626,306; Apr. 26.
Yarn reel. X. Brügger. 1,626,325; Apr. 26.

CLASSIFICATION OF PATENTS

ISSUED APRIL 26, 1927.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 2: 1,625,957
20: 1,625,958
2— 64: 1,626,450
71: 1,626,024
79: 1,626,136
84: 1,626,288
94: 1,626,166
193: 1,626,272
4— 67: 1,626,128
1,626,255
77: 1,625,950
90: 1,625,902
193: 1,626,343
208: 1,626,125
247: 1,626,308
257: 1,626,155
5— 259: 1,625,817
260: 1,626,140
294: 1,626,121
8— 5: 1,625,842
8: 1,626,201
20: 1,626,438
1,626,439
9— 6.5: 1,626,509
17: 1,625,971
21: 1,626,163
1,626,175
1,626,541
26: 1,626,191
10— 89: 1,626,251
120: 1,625,830
12— 135: 1,626,071
14— 18: 1,626,241
15— 29: 1,625,792
104.14: 1,626,491
229: 1,626,036
262: 1,626,445
16— 128: 1,626,301
139: 1,626,373
141: 1,626,372
195: 1,626,479
198: 1,626,018
18— 1: 1,626,039
1,626,571
2: 1,626,466
3: 1,626,190
17: 1,626,419
26: 1,626,118
45: 1,625,894
54: 1,626,454
56: 1,625,810
59: 1,625,963
1,626,278
19— 106: 1,625,868
156: 1,626,339
20— 4: 1,626,259
6: 1,626,117
48: 1,625,872
52: 1,626,336
56.4: 1,626,547
22— 29: 1,626,225
